Development: 4 shafts. No. 9, the main shaft, has 3 compartments, is 825' deep, with levels at 100', 200', 300', and below this at 125' intervals to the 800' level; No. 9 shaft is the only one operating at present; underground workings total 12,507'. No. 10 shaft is 388' deep, with levels at 140', 240' and 365'; underground workings, 925'. No. 11 shaft has 3 compartments, is 419' deep, with levels at 175', 275' and 400'; underground work, 90' of cross-cutting. No. 12 shaft has 3 compartments, is 179' deep, with a level at 159', underground workings 510'. Total development of 4 shafts up to Jan. 1, 1916, 14,032', exclusive of shaft footage.

Ore reserves: estimated for consolidation purposes, 1,776,360 tons, average value \$9.06 per ton; gross value \$16,100,180. Estimate does not include ore in 19 other veins, combined length 2,945', average width 5.40', average value \$11.89 per ton, upon which no work has been done other than sampling of their surface outcrops. Ore was assumed to continue in these veins to a depth of 100', giving an estimated tonnage of 133,480; gross value, \$1,592,500. Costs figured same as Hollinger, from \$3.25 to \$3.50 per ton.

Equipment: at No. 9 shaft includes two 100-h. p. double-drum electric hoists; one 1,500 cu. ft. electrically-driven compressor; one 700-k. w. transformer station; crusher, capacity 700 tons per day; and an aerial tram from mine to Hollinger mill. The other 3 shafts have 10x12 single-drum hoists. Total cost of plant to Jan., 1916, \$120,507.

Ore is treated at the Hollinger mill. In 1915, 106,486 tons were milled, compared with 2,910 tons in 1914. Milling costs in 1915, \$1.09.

Claim No. 13,147

Owned by Canadian Mining & Finance Co., Ltd., before the consolidation. Consists of 40 acres, adjoining Acme on the south and Hollinger on the east. Rock formation is basalt, a coarse amygdaloidal lava (Keewatin), and the only ore found to date upon the claim is that developed by Porcupine Vipond Mines, Ltd., at a point on the south boundary of Claim 13,147; here the Vipond has followed ore up to the boundary on the 100', 200' and 300' levels. On the N. E., the Schumacher Co. claims have developed a considerable tonnage of ore. Surface work on Claim 13,147 has shown several quartz veins, but none have shown payable values at the surface. A

shaft is being sunk, near the S. W. corner, to a depth of 400'. For consolidation purposes an arbitrary assumption was made of 130,000 tons ore, average value \$7 per ton; with an estimated profit of not over \$2 per ton, due to isolated position of claim and amount of development work required. Cost of plant and development to Jan. 1, 1916, \$14,787.

Millerton Gold Mines, Ltd., Ontario

Inc. in Ont. Cap., \$3,000,000; shares \$5 par. Before the consolidation was owned entirely by the Canadian Mining & Finance Co., Ltd., and worked under one administration with Acme and Hollinger.

Property: 3 claims, approximately 40 acres each, adjoining the Hollinger on the west. The north claim has over $\frac{2}{3}$ of its surface covered by Miller Lake.

Development: 3 shafts; No. 6, 394' deep, with levels at 55', 150', 250' and 379'; total underground workings, 1,311'. No. 7 shaft, 170' deep, has a level at 167'. No. 8 shaft is 45' deep. Underground work is insufficient to permit a dependable estimate of ore reserves. Sampling has shown an average value of \$7.08 per ton for the ore found. Allowing for persistence of ore for 50' from underground exposures, gives 115,490 tons, gross value \$818,120. For consolidation purposes an arbitrary assumption was made of 400,000 tons ore, average value \$6.50 per ton. Cost of production figured not to exceed \$3.50 per ton.

HOLLOWAY MINE.

VIRGINIA

Idle. Owned by Wm. M. Pannebaker estate, Virgilina, Va. **Property:** the old Holloway or Eustis mine, $3\frac{1}{2}$ miles S. of Virgilina, Halifax Co., Va., on a spur of the Southern railway. Has a 460' shaft, and produced ore from 75', 150', 200' and 300' levels. The vein is strong, persistent and 3 to 33' wide, owing to lenticular expansions. The ore is chalcocite in quartz, with epidote. Is described in detail by Weed in Bull. 455, U. S. Geol. Survey, p. 79. Produced 6,000 tons of 12% ore about 1902.

HOLMES MINING & MILLING CO.

WISCONSIN

Idle. Mellen, Ashland Co., Wis. **Officers:** John Holmes, pres.-mgr.; A. D. Barnes, v. p.; Thos. A. Humphries, sec.; F. P. Simmons, treas.; preceding, with Edw. Bekken, A. D. Wilson and A. D. Hill, directors. **Inc.** Jan. 9, 1902, in Wisconsin. **Cap., \$150,000; shares 25 cts. par.**

Property: 160 acres in the Penokee iron range, about 1 mile N. of Bad river, shows fissure veins in greenstone, diorite and slate with E.-W. strike and dip of 70°. Three orebodies are claimed of which one, said to be 40' wide and traceable one-half mile by a strong gossan, with slate foot-wall and diorite hanging, is reported to have chalcopyrite in a quartz gangue. Ores give assays up to 9 oz. silver and \$3 gold per ton. **Development:** by shafts of 150' and 188'. **Equipment:** includes a 16-h. p. hoist.

HOME COPPER CO.

ARIZONA

Morenci, Graham Co., Ariz. H. J. Degener, pres.; W. A. Leonard, v. p.; W. P. Gee, sec.-treas. **Inc.** April, 1901. **Property:** 35 claims, 700 acres, in 2 groups, also a mill site on Eagle river. Promoters were unable to inspire confidence and could not raise enough money to prospect the property sufficiently to prove if it has merit. Not a "wild cat" but a mistake. See Vol. XI, Copper Handbook.

HOME RUN COPPER CO.

NEVADA

Office: 1118 Newhouse Bldg., Salt Lake City, Utah. Mine in Bristol mining district near Pioche, Nev. **Officers:** M. C. Godbe, pres.; E. S. Woodward, v. p.; H. F. Earle, sec.-treas.; preceding, with A. H. Godbe and Henry Sadler, directors. W. H. Pitts, supt. **Inc.** 1912. **Cap., \$100,000; shares 10 cts. par.**

Property: 8 claims, 3 fractions, 180 acres, 9 miles from railroad, adjoins the Gypsy mine and is said to carry same fissures. Claims show fissures in limestone expanding into replacement deposits and caves carrying rich copper ores with gold and silver values. Development in 1916 on the 65' level said to have opened up a 5' vein of copper ore.

Company also owns Bristol mine.

Development: by 225' shaft with levels at 65', 90' and 150' opening up caves, showing 1,500 tons of ore containing 8.25% copper and 40 to 200 oz. silver.

Equipment: includes gasoline engine, hoist, compressor and necessary buildings.

HOME RUN COPPER MINING CO.

WYOMING

Office: Rooms 17-18, Postoffice Bldg., Colorado Springs, Colo. Mine near Rudefeha, Carbon Co., Wyo. **Officers:** A. L. Bohrer, pres.; J. F. Humphrey, v. p.; Adolph Fehringer, treas.; Wm. C. Robinson, sec., at last accounts. **Cap.**, \$1,500,000; shares \$1 par. **Property:** 180 acres, partly patented, known as the Copper Bell group, near the Ferris-Haggarty mine, having a 350' tunnel showing a vein of 30" to 9' width assaying up to 12% copper, with gold and silver values. Idle.

HOMELODE MINING & MILLING CO.

SOUTH DAKOTA

Silver City, Pennington Co., S. Dak. L. A. Richards, gen. mgr.; L. L. Farnam, supt. Property shows several quartz veins, 1' to 2' wide, containing gold, silver, antimony, lead and zinc ore. Two veins have been opened up; one by a 200' adit connecting with a shaft, sunk on the vein, at the 100' level; a 50' winze shows the ore to be continuous to that depth. In these workings vein varies from 12" to 18" and is 150' in length; values are mainly in gold and antimony. The second vein parallels the first, is ¼ mile E., said to be 24" wide and to contain more zinc than No. 1. Two shafts, 370' apart, 66' and 103' deep, respectively, have been sunk on the vein.

Equipment: includes 100-h. p. boiler and an amalgamating mill, equipped with Dodge crusher, slow-speed Lane mill, and Deister table. Company employs 35 men. Plans to sink No. 2 shaft, 77' deep, an additional 100'.

HOMESTAKE MINING CO.

SOUTH DAKOTA

Main office: 354 Pine St., San Francisco, Calif. **Eastern office:** 15 Broad St., New York. **Mine office:** Lead, South Dakota. **Officers:** Edward H. Clark, pres.; Frank G. Drum, v. p.; Fred Clark, sec.; Louis P. Haggin, treas.; preceding, with Harry L. Tevis, Thos. Turner and Richard A. Clark, directors. Richard Blackstone, supt. C. W. Merrill and Allen J. Clark, cons. metallurgists.

Inc. Nov. 5, 1877, in Calif. **Cap.**, \$21,840,000, increased March 25, 1913, to \$25,116,000 by payment of 15% stock dividend; shares \$100 par. Columbia Trust Co., New York, transfer agent. Union Trust Co., New York, registrar. Annual meeting, third Tuesday in March in San Francisco. Listed on New York Stock Exchange since 1879.

(a) Also 15% paid in stock, March 25, 1913.										

The first claims acquired by the company were the Grant and Old Abe, located by J. B. Pearson, Dec. 11, 1875. In the Fall of 1876, representatives of Haggin and Hearst bought these claims, and the Homestake Mining Co. was incorporated. In July, 1878, the first and only assessment was levied, \$1 per share; it furnished the \$200,000 required to build the 80-stamp Homestake mill. In 1899, company acquired the Highland Mining Co., an adjoining property of about 73 acres; also the Black Hills Canal & Water Co., owning 40 miles of ditches, flumes and pipe lines, with reservoirs, improvements and water rights covering the water supply of Deadwood and Lead districts.

Property: 468 claims, about 3,723 acres in the White Wood mining district, Lawrence Co. The towns of Lead and Deadwood and the settlements of Blacktail, Terraville and Central City have grown up around the mines and mills.

Ore: gold bearing, lies in a mineralized zone of nearly vertical Algonkian slates and crystalline schists, having a general strike, N. 35° W., and dipping slightly toward the east, into which enormous masses of rhyolite have been intruded. The ore bearing zone is approximately ½ mile wide and several miles long. Only the northern end of the zone has been extensively developed; such work lying mostly between the gulches, Gold Run, Deadwood and Blacktail. The deposits are not fissure veins, but impregnations that appear to have taken place along two converging lines of crushing; they follow roughly the direction of schistosity and show a general pitch southward; where several unite, the aggregate thickness is over 500' and many stopes are carried across that width of ore. The larger lenses are on the west side of the zone and are flanked on the east by a series of smaller parallel lenses, some of which join the larger at depth. Near the surface the orebodies follow the rhyolite porphyries, but at depth diverge from them and become in part associated with phonolite. The ore varies considerably in composition in different portions of the deposit, but that of the deeper levels, the unoxidized ore, usually contains either chlorite or ferruginous hornblende (cummingtonite), with quartz, carbonates of lime,

magnesia, iron, arsenopyrite, pyrite and pyrrhotite. Ferrous minerals predominated and this has been an important factor in determining the metallurgical treatment. In the upper oxidized parts of the deposits the ore is dark red, but deeper, in the sulphide zone, is greenish blue to blue black. The sulphides vary in amount from 3 to 5%, and even as high as 10% or more of the ore. In the sulphide zone the distribution of gold is uniform and averages \$4 to \$4.50 per ton. Over 60% of the ore is free milling. Secondary enrichment has not resulted in the formation of any particularly rich zones.

Development: 6 shafts; 4 in the footwall, one in the hanging, and one in the lode; depths Jan. 1, 1916:

Ellison	B. & M.	Golden Prospect	Golden Star	Old Brig	Gldn. Gate
1,920' (a)	1,700'	1,100'	1,400'	800'	800'

(a) Lowest level is at 1,850'. In Feb., 1916, sinking to the 2,000' level was started.

The 1,850' and 2,000' levels of the Ellison shaft will eventually be connected with the B. & M. shaft, through which outlet the bulk of the ore will be hoisted to surface. The B. & M. shaft will be equipped with skips, which will dump into No. 8 Gates crushers, and their product carried by a belt conveyor system to smaller gyratories. Total cost of sinking at the Ellison shaft is said to have averaged \$60.64 per ft. There are in all about 130 miles of workings. Underground work in 1914 amounted to 17,809' of drifting; in 1915, 17,114' of drifting and 1,001' of raising. The measured ore reserves are large and sufficient to supply the reduction plants for many years.

The metallurgical equipment at the Homestake is one of the most modern and efficient in the country.

Mills: At the South Side—3 stamp mills (660 stamps) with 36,356 sq. ft. of amalgam plates; 1 regrinding plant, with independent cone system, and 540 sq. ft. of amalgam plates; 4 batteries of cones for classification; 3 clarifying tank houses; 1 sand plant. The mills are the Amicus, Golden Star, Homestake and Pocahontas. In 1915 the Pocahontas mill was completely rebuilt. The Amicus mill is being rebuilt.

At the North Side—2 stamp mills (360 stamps), the Monroe mill and Mineral Point mill; 2 tank houses; 2 cone houses; 1 sand plant. Ore supplied to these mills is usually drawn from the upper levels of the mine, and is at least partly oxidized.

At Deadwood—1 slime plant, treating the combined slime from south and north sides. The stamps weigh 900 lbs., drop 10", making 88 drops per minute. Increased mill capacity is to be secured by a combination of heavier stamps and secondary crushing; the new stamps will weigh 1,000 lbs.; this, it is estimated, will give 10% additional stamp duty, while secondary crushing will allow another 8% increase in capacity. The Homestake order of drop is 1-3-5-2-4 or 1-4-2-5-3. A 25-h. p. back-gear motor drives each 10 stamps. Ratio of water to ore is large, at the Lead mills being 10 or 12 tons of water to one of ore. A minimum of about 50,000 tons of water per day is used, most of which comes from Spearfish Creek and its tributaries, being conveyed over 20 miles in ditches and vitrified clay pipe.

Inside amalgamation is practiced, quicksilver being fed to the mortar. Chuck-blocks are cleaned in rotation, at intervals of about 2 weeks; outside plates, except those of the fourth row, are cleaned and dressed daily. Fourth row plates are dressed at 2-day intervals. Amalgam is restored three times each month. Oil-fired retorts are used, the resulting bullion being melted in coke-fired furnaces. Loss of quicksilver in retorting is almost nil.

Cost of stamp milling per ton of ore: stamping, \$0.242; amalgamating,

normal charges, \$0.024. Power at \$30 per h. p. year; quicksilver at 50c per lb.; castings, 2¼c per lb.; mill labor, \$2.97 per 8-hr. shift.

Regrinding is done in tube mills. In cyaniding the usual methods are closely conformed to. Slime plant costs in 1914 were \$0.184 per ton of slime; unit consumptions per ton of slime treated: sodium cyanide, 0.16 lb.; zinc dust, 0.12 lb.; lime, 3.84 lbs.; hydrochloric acid, 0.39 lb.; costing 0.93c per ton treated; power, 1.15 kw.-hr. A recovery is made of about 94% of the values in the ore: 72% by amalgamation and 22% by cyanidation.

Power and equipment: company has hydro-electric plants at Spearfish and Englewood. New power equipment in 1915 includes a steam-driven electric generating station at Lead, maximum capacity, 4,000 k.v.a.; this, in conjunction with the hydro-electric plants, will furnish sufficient power for all purposes except the hoists, which will continue to be operated by steam. A completely equipped central boiler plant of six 600-h. p. boilers was completed in 1915. The B. & M. shaft was equipped in 1915 with a compound condensing hoist, designed to handle two 6-ton skips from a maximum depth of 4,000'. The company operates its own machine shops, carpenter shops and foundry.

The Homestake Mining Co. has long been known for the fine way in which it has looked after the welfare of its 2,350 employees. In 1914, it completed a recreation building, containing a theatre with seating capacity of 1,000, library, swimming pool, gymnasium, bowling alleys, billiard and amusement rooms.

Production: to Jan. 1, 1916, \$140,610,382. Recent production has been:

	Tons milled	Recovered per ton	Total cost per ton
1915.....	1,573,822	\$4.0848	\$2.6561
1914.....	1,587,774	3.8797	2.9155
1913.....	1,540,961	4.0148	2.7258

In 1915 Homestake produced tungsten ore from the Golden Summit claim, which netted \$19,237. A 20-ton concentrating plant is being built to handle the low-grade ore. It will consist of 5-stamps and concentrating tables.

HOMESTAKE T. & C. CO.

UTAH

Idle. Is a subsidiary of the Great Divide Mines Co. and controlled by John B. Taylor, 678 E. So. Temple St., Salt Lake City, v. p.; Walter A. Cook, sec.-treas. Inc. 1906, in Utah. Cap., \$100,000; shares \$5 par; assessable; fully issued. Is a close corporation, with only 5 stockholders.

Property: 30 claims, in Pine Canyon, West Mountain section, Tooele county, with water rights, tunnel rights and franchise for a deep tunnel, from Pine Canyon into the Bingham district, also several hundred acres of bench lands, and an 800-acre smelter site, 4 miles from the International smelter. Claims show veins with lead and copper ores.

HOMESTEAD-IRON DYKE MINES CO., INC.

OREGON

Halstead Lindsley, gen. mgr., Room 1508, No. 60 Broadway, New York; E. F. Galligan, supt. Operates property of Iron Dyke Copper Co., which see.

HONDO MINING & MILLING CO.

COLORADO

Cripple Creek, Teller Co., Colo. R. G. Mullen, pres.-gen. mgr. Inc. in 1914. **Property:** adjoins that of the Golden Cycle on Battle Mountain and includes the old Keystone property, developed by the Sitting Bull shaft, down 250' at the time property was acquired. Also owns 3 claims in the Tenderfoot Hill section. Little work had been done on the Battle Mountain property for 20 years. Present management sank the shaft to the 500' level, and is said to have opened up low-grade ore from the 3rd to 5th levels. At last accounts a crosscut on the 5th level was being

driven to strike the 3 veins cut on the 4th level. Some shipments have been made, but results are not available. Authentic information on the property is meagre.

HONEST ENDEAVOR MINING CO.

NEVADA

Property closed down. Letters returned from Yerington, Lyon Co., Nev. **Officers:** B. W. Wooding, pres.; Elmer Hoff, v. p.; C. S. Wood, sec.; F. D. Goodale, treas.-gen. mgr., at last accounts. **Inc.** 1907, in Arizona. **Cap.**, \$2,500,000; shares \$1 par.

Property: 11 claims in Buckskin district, west of and across the valley from Ludwig, the railroad terminus, and 3½ miles from Buckskin, in the Yerington district. **Development:** by 300' shaft and drifts said to open up 2 veins, showing 2' of sulphide ore with commercial values. **Equipment:** includes hoist, compressor, etc.

HOOSAC TUNNEL & MINING CO.

COLORADO

At last accounts an attempt was being made to reorganize under name of New Life Tunnel & Mining Co. Company has been in hands of receivers for a number of years. **Property:** is on Belleview Mt., at junction of Fall River and Clear Creek, near Idaho Springs, Clear Creek Co., Colo.

HOP CANYON MINING & SMELTING CO.

NEW MEXICO

Office: 154 West Randolph St., Chicago. **Mine address:** Magdalena, Socorro Co., N. M. **Officers:** Alpheus McCallum, pres.; Elias G. Raffety, sec.-treas.; Oscuro, N. M.; above with Alexander McCallum and J. A. Pement, directors. J. A. McCallum, supt. **Inc.** April, 1906, in N. Mex. **Cap.**, \$1,000,000; shares \$100 par, nonassessable; 8,852 shares outstanding.

Property: 11 claims, 220 acres, 3 miles from Santa Fe R. R., in the Magdalena mining district, shows a shear zone in rhyolite running N. 25° W., with steep dip N. E. Surface shows thin seams of oxidized ore, developed by 1,550' crosscut tunnel and shafts. Total amount of work is about 4,000'. A test shipment made to El Paso in 1915, contained 7.02% copper and 12.9 oz. silver. Company said to be clear of indebtedness and expects to ship ore in 1916. Government report states conditions do not warrant the expectation of finding important bodies of ore.

HOPE MINES DEVELOPMENT CO.

CALIFORNIA

Offices: Boston Bldg., Salt Lake City, and Sonora, Tuolumne Co., Calif. **Officers:** T. W. Whiteley, pres.; Henry Sadler, v. p.; C. W. Johnson, treas.; F. O. Horn, sec. Geo. Weston, mgr.

In Feb., 1916, it was reported the company's production for the past year had been sufficient to pay a debt of \$20,000, a dividend of \$4,500, and put \$15,000 in the treasury.

Property: an old one, is on the Bonanza lead, ½-mile E. of Sonora, and is said to show free milling gold ore. Vein strikes N. 85° E. with dip of 23° W. and 2' average width. Has mica schist footwall and porphyry hanging. **Development:** by tunnels, present work being done 300' below the old workings; main tunnel is in several hundred feet.

Equipment: includes a 25-h. p. gasoline engine and a 5-stamp mill. Eight men are employed.

HORN SILVER MINING CO.

UTAH

Office: 27 Cedar St., New York. **Operating office:** McCornick Bldg., Salt Lake City, Utah. **Mine office:** Frisco, Beaver Co., Utah. **Officers:** Jacob Needle, pres. and treas.; Alexander B. Simonds, v. p.; Edward F. Emmet, sec.; preceding, with Harvey N. Wadham, E. B. Critchlow, A. B. Simonds, W. R. Britton, Chas. Brenneman, Wm. J. Barrette and H. S. Young, directors; Benjamin B. Lawrence, cons. engr.; Wm. H. Hendrickson, mgr.

Inc. 1879, in Utah. **Cap.**, \$10,000,000; shares \$25 par. Has paid dividends of \$5,642,000, last having been paid in 1907. Net profit for year ending Jan., 1914, was \$13,179.

Property: 19 claims, 9 patented. The mine is extensively developed, has been a large producer of zinc, lead, silver and gold, and has yielded some copper as a byproduct. The old bonanza mine carried good values to depth of about 800', showing silver ores on the footwall, with copper ore on the hanging. Main shaft is 1,600' deep, but stoping is mainly above the 900' level. **Development:** for 1914, comprised 579'. Main shaft was retimbered from 900' level to the 1,000' level. **Equipment:** includes a 30-stamp mill.

Production shipped, under a 2-year contract ending 1911, to the American Smelting & Refining Co., shipments, 1909, said to have averaged about 20% lead and 20 oz. silver per ton. Zinc ore, carrying up to 10% lead and 5 oz. silver, is shipped to Colorado and Kansas zinc plants. Production was suspended, 1907, for the first time in 20 years, because of temporary inability to market ore.

Production: 25,183 tons, with total receipts from ore shipments of \$149,380, in 1913; 24,121 tons, with receipts of \$201,163 in 1914.

The mine was a bonanza silver producer for many years, but has seen its best days and since 1906 has done but little better than make expenses, though it seems probable that some small further profits will be secured from production.

HORNITOS GOLD MINING CO.

CALIFORNIA

Offices: 127 Montgomery St., San Francisco, and Hornitos, Mariposa Co., Calif. H. W. Morris, pres. In May, 1913, company took over and in 1915 began operating the Ruth Pierce gold mine, consisting of 2 claims, located 4 miles from Hornitos. Mine had been idle for some time. Vein averages 3' in width; developed by a 550' shaft, part vertical and part incline, with about 2,500' underground workings.

Equipment: includes a hoist, driven by 105-h. p. motor, 4-drill compressor, and a 10-stamp mill.

HORSE MOUNTAIN COPPER CO.

CALIFORNIA

Eureka, Humboldt Co., Calif. David Wilson, pres.; George Wilson, mgr., Eureka, Cal.; D. W. Stapp, supt. **Inc.** Nov., 1910. **Cap.**, \$1,000,000. **Property:** 70 claims, unpatented, in vicinity of the Humboldt Copper Co., with which this corporation apparently is connected in ownership and management.

Property: Ruby Copper mine on Horse mountain, in the Hoopa range, Horse River district, on the watershed between Redwood creek and Trinity river, in T. 6 N., R. 1 E. For miles copper occurs along a serpentine-gabbro contact; claims show native copper in a vein 30' thick having 2' of high-grade ore.

Development: by 6 tunnels, No. 6 of 900', another of 450', 3,000' in all. **Equipment:** includes engines, boilers, 35 buildings and a \$12,000, 50-ton concentrator with Huntington mill, installed in 1912. Concentrates sacked and shipped by pack train to Korbelt, on Arcata and Mad River railroad, thence by steamer from Eureka to the Tacoma smelter. Small shipment made in 1914. Concentrates average 20% copper and \$4 gold per ton. Twenty-six men employed.

HORST-POWELL COPPER MINING CO.

IDAHO

Address: P. O. Box 2221, Spokane, Wash. A. J. Devlin, mgr. and lessee. **Property:** 7 claims and a 5-acre mill site, well timbered, on the Little North Fork river. **Development:** by 3 tunnels, 300', 600' and 200' long, and 2 shafts, 50' and 100'. Vein is of 15' estimated surface width,

opened up for 800' and proved to depth of 400' with slate footwall and quartzite hanging wall, carrying copper ore averaging 2-6%. **Equipment:** includes steam and gasoline power, with a hoist and necessary mine buildings. Mill being installed 1916. Property is connected with Idaho No. R. R. at Murray by 5-mile wagon road. Estimated 15,000 tons of copper ore on the dumps. Thirty men employed.

HOSEY MINE.

Patagonia, Santa Cruz Co., Ariz. **Property:** in Wrightson mining district, Santa Rita mountains, 12 miles west of Patagonia. Claims show fissure veins carrying high-grade chalcopryrite and glance ore developed to a depth of 200'. Shipments of several carloads have been made. Shaft now caved in, but property favorably reported upon by John Daniells, of Calumet, Mich. Reported under lease to August Varick in 1915.

HOTCREEK SYNDICATE TRUST.

Idle. Property at Hotcreek, via Tonopah, Nye Co., Nev. Victor Barndt, trustee; John Lawton Butler, sec. Is not incorporated. **Property:** 32 claims, unpatented, in Rattlesnake canyon, shows limestone and andesite, carrying replacements in limestone near porphyry contacts, and fault planes; orebodies reported by company to be 2 to 25' in width and traceable from 400' to more than 2,000'. **Development:** by about 1,000' of workings, showing copper ores said to average 2 to 3% copper, 5 to 10 oz. silver and \$1 gold per ton. Ore at water level is disseminated chalcopryrite, of concentrating grade.

HOUGHTON-ALASKA EXPLORATION CO.

Office: Houghton, Mich. **Mine office:** McCarthy creek, Copper River district, Alaska. **Officers:** J. H. Rice, pres.; Deen L. Robinson, sec.-treas.; Ocha Potter, mgr; preceding, with Dr. L. L. Hubbard and F. G. Coggin, directors. Inc. 1905, in Michigan. **Cap.,** \$500,000.

Property: 12 claims, 180 acres, patented; also 160 acres patented placer lands, held for town site and general purposes. Lands adjoin the Bonanza group of the Kennecott Corp., on the N. E., and are on the McCarthy Creek slope of the divide, the Bonanza group being on the Kennecott slope. About 1,000 h. p. is available from McCarthy creek, for a hydro-electric installation.

The Bonanza fault, traceable 7,000', consists of a 6" to 12' fissure filled with brecciated limestone, with mineralization in places up to 100' width, on the fault and along the stratification planes of intersecting veins. The Bonanza fault has a series of fissures cutting the main fault, with mineralization along both, at and near the points of intersection, but where other fissures intersect the cross fissures, only the Bonanza fault is mineralized. Ore is exclusively chalcocite, except at surface, where sometimes broken down to carbonates, and the ore is pockety.

Development: scanty, management apparently awaiting development of its neighbors.

HOUGHTON COPPER CO.

Office: 199 Washington St., Boston, Mass. **Mine office:** Houghton, Houghton Co., Mich. **Officers:** Chas. J. Paine, Jr., pres.; Geo. P. Gardner, v. p.; A. E. Coe, sec.-treas.; preceding, with W. Cameron Forbes, Jas. P. Edwards and Fredk. W. Nichols, directors. Rex R. Seeber, supt.

Inc. Jan., 1910, in Michigan. **Cap.,** \$2,500,000; shares \$25 par; assessable; 1,675,000 issued; \$8 paid. Is controlled by St. Mary's Mineral Land Co., through ownership of 37,228 shares of the 67,000 shares outstanding. Old Colony Trust Co., Boston, registrar; State Street Trust Co., Boston, transfer agent.

Annual report for year ended Dec. 31, 1915, shows: total receipts,

\$82,761, of which \$71,524 was from assessments, as compared with receipts of \$20,917, with \$5,652 from assessments in 1914. Expenditures for 1915 amounted to \$60,888. Balance of assets was \$24,763, compared with \$7,650 balance of liabilities, Dec. 31, 1914.

Property: 23 acres of surface rights, with mineral rights to 160 acres owned in fee, being the N. W. $\frac{1}{4}$ of Sec. 14, T. 54 N., R. 34 W., lying E. of the Isle Royale mine and adjoining the Superior mine. Diamond drilling was begun March, 1910, in the horizon of the Baltic-Superior bed, showing 2 cupriferosus amygdaloidal beds, the Superior and East lodes, 17' and 20' wide respectively, with dip of 51°, separated by about 83' of trap and conglomerate, the lower bed overlying another conglomerate at a distance of about 150', these strata corresponding exactly with the Baltic formation. Maximum operating depth is figured at 2,800'.

Development: by 620' shaft, sunk about 60' in the footwall, and a winze sunk 400' below the 620' level, disclosing rich copper rock in the Superior lode. The ground penetrated by the shaft is soft and badly broken, necessitating close timbering and occasional concreting; the shaft has been lined with a concrete collar for depth of 300'. Work in 1914 included 1,383' of drifts on the 620' level on the Superior lode; 200' winze below 820' level and 741' drifting from bottom in high-class rock. In 1915 the winze was sunk to the 12th level and a crosscut run to the West lode. In June, 1916, this crosscut, reported in 72', has so far failed to meet copper of commercial grade or quantity.

Equipment: includes a small power plant, and a 16-drill Nordberg electric air compressor. There are necessary buildings, including an office, changing house and warehouse, all of wood.

Due to the outbreak of the European war the mine was closed down from Sept., 1914, to July, 1915. During the summer the 8,140 ton rock pile was sent to the Winona mill, in addition to which 6,517 tons were shipped from underground work. Shipments now being made principally of rock coming from the 6th and 10th levels, amount to about 90 tons per day; recovery reported to be slightly better than 13 lbs. copper per ton.

Production:

	Tons Rock milled	Lbs. Min. prod.	Lbs. Min. p. t.	Lbs. Ref. Copper	Lbs. Cu. p. t. Rock
1915.....	14,656.92	258,900	19.5	156,766	10.69

Sale price for the year was 22.2 cts. per pound.

The property, though small, for the Lake Superior district, is considered promising and management good. Company employs about 35 men.

HOWE SOUND CO.

BRITISH COLUMBIA

Office: 747 Fifth Ave., New York. **Mine office,** Britannia Beach, in the Vancouver district, B. C. **Officers:** Grant B. Schley, pres.; J. W. D. Moodie, v. p.-gen. mgr.; Kenneth B. Schley, sec.-treas.; preceding, with Dennis Sullivan, E. J. Berwind, Louis S. Noble, M. Gavin, W. J. Walworth, G. B. Schley, Jr., and Chas. G. Raynor, directors; Jas. E. Manter, clerk. Inc. Aug. 22, 1903, in Maine. Cap., \$3,000,000; shares \$1 par; issued, \$1,984,150. Listed on New York Curb. Bonds, \$1,000,000, convertible into stock at par. Bankers Trust Co., New York, transfer agent. Annual meeting, third Monday in March.

Balance sheet of Dec. 31, 1915, shows assets: \$2,599,883, which includes: share investments, \$1,402,800; accounts receivable, \$1,186,966; cash, \$10,117. Liabilities include: bills payable, \$500,000; profit and loss, \$115,733. There was authorized in Dec., 1915, an issue of \$5,380,000 20-year, 6%, Gold bonds (5% Sinking Fund). This bond issue is to pay for 53,800 shares out of a total outstanding capitalization of 60,000 shares, of the

El Potosi Mining Co., which see. As owner of the Britannia M. & S. Co. its stock is a desirable investment and ranks high.

The company is a securities-holding corporation, controlling the Britannia Mining & Smelting Co., Ltd., which took over the properties of the Britannia Copper Syndicate, Ltd., and the Britannia Land Co., Ltd., which latter two companies were dissolved in 1915.

HOWELL MINING CO.

UTAH

Office: 218 So. Main St., Salt Lake City, Utah. Ezra Thompson, pres.; J. C. Lynch, v. p.; Lynn H. Thompson, sec.-treas.; with J. M. Howell and David Neff, directors. **Inc.** in 1910. **Cap.**, \$600,000; shares \$1 par; 500,000 shares outstanding. Listed on Salt Lake Exchange.

Property: an old mine, formerly known as the Baby McKee, 8 claims, 4 patented, 140 acres, in the Alta-Cottonwood district, Salt Lake Co., about 25 miles S. E. of Salt Lake City, adjoins the Cardiff property on the east. Reported that it will eventually be merged with Cardiff. Claims cover strike of Howell vein, said to be traceable on property for over a mile, with strike N. E.-S. W. and 4' width. Country rock is quartzite and limestone.

Ore: silver, copper, lead, zinc and antimony, said to average \$20 to \$50 per ton. **Development:** 150' of shafts, 1,790' of tunnels, 90' of raises, 40' of crosscuts. Shipments were made prior to 1910, but amount not known. Management plans adding a compressor, continuing upper tunnel to the contact, and driving the lower tunnel farther along the Howell fissure.

HUBBARD-ELLIOTT COPPER CO.

ALASKA

Offices: 319 So. La Salle St., Chicago, Ill. **Home office:** 411 New York Bk., Seattle, Wash. **Mine office:** Elliott Creek, Chitina district, Alaska. **Officers:** Jerome G. Steever, pres.; H. P. Elliott, 1st v. p.; Thomas S. Hopkins, 2nd v. p.; A. J. Elliott, sec.; John T. Evans, treas.; Carl Hauser, mine supt.; Earl C. Stroup, mech. engr. **Inc.** Jan., 1911, in Washington. **Cap.**, \$3,500,000; shares \$1 par; 1,500,000 shares issued in exchange, share for share, for stock in the old Hubbard-Elliott Copper Mines Development Co., of Alaska; 2,000,000 shares treasury stock.

Property: 35 patented claims, 4 mill sites with U. S. government titles and 84 unpatented claims, over 2,400 acres, also 300 acres of timber, covering over 6 miles in Elliott Creek valley. Elliott creek is an affluent of the Kotsina river, about 15 miles above junction of the Kotsina with the Copper river.

Geology: copper ore occurs in fissure veins and associated replacement orebodies in greenstone with limestone beds above it. The prominent outcrops are practically all on the north side of Elliott creek, near the contact, which runs N. 75° W. and dips 80° N. All outcrops are in the greenstone underlying the limestone beds except on the Leland and Lawton claims which are in a well-defined porphyry dike. Above the limestone is found a heavy capping of conglomerates.

The principal ore minerals are bornite, glance and chalcopyrite. The total absence of surface oxidation due to glacial action is notable and sulphides occur in a calcitic matrix in the veins and with a greenstone matrix.

Development: mainly by the Albert Johnston tunnel, now 1,000' long, in the gulch 500' below the old tunnel which crosscuts the outcrop for 48' all in ore ranging from 4 to 22% copper. The outcrop averages 40' wide and is exposed for 350' in length. The new tunnel will be 390' below it and it is hoped that this work will develop sufficient tonnage to warrant the building of a branch of the Copper River and Northwestern railroad from Elliott Junction to the property, a distance of 15¼ miles.

Equipment: includes compressor, drills, etc. Hydro-electric power plant and concentrating mill installed in 1914.

HUDSON BAY MINES, LTD.

ONTARIO

New Liskeard, Ont. **Officers:** Geo. Taylor, pres.; A. A. McKelvie, v. p., with Thos. McCamus, D. M. Ferguson, J. J. Grills, S. S. Ritchie and C. L. Sherrill, directors. F. L. Hutchinson, sec.-treas.

Inc: July 16, 1909, in Ontario, to acquire from the Temiscaming & Hudson Bay Mining Co., silver properties at Cobalt; it is the operating company of the latter. **Cap.**, \$3,500,000; shares \$1 par, outstanding Sept. 1, 1915, \$3,200,050. Controls Dome Lake Mining & Milling Co., Ltd., through ownership of 460,900 shares.

Balance sheet for year ending Aug. 31, 1915, shows assets \$3,262,202, which includes: mining claims, at Cobalt, \$2,953,228; at Gowanda, \$44,900; claims in Teck & Lebel Twp., \$15,159; plant, concentrator and equipment, \$41,320; accounts receivable, \$4,863; Dome Lake M. & M. Co., \$80,600; 460,900 shares Dome Lake M. & M. Co., Ltd., \$100,877; 2,943 shares of Mines Water Supply Co., Ltd., \$2,943; cash, \$16,667. Liabilities show: accounts payable, \$1,273; Temiscaming & Hudson Bay Mining Co., Ltd., \$37,975; wages due, \$118; capital stock, \$3,200,050; surplus, \$22,785. **Dividends:** to 1916, \$778,909; last dividend, 2½%, was paid Aug. 31, 1913.

Property: 9 claims, 340 acres, at Cobalt. Work during 1915 was on property of Dome Lake M. & M. Co., which see. No work was done on the other properties, except assessment work at Gowanda.

HUDSON BAY ZINC CO., LTD.

BRITISH COLUMBIA

Office: Salmo, B. C. J. L. Bruce, gen. mgr.; J. K. Neill, mine supt. **Inc.** April, 1916, in B. C. **Cap.**, \$5,000,000; shares \$5 par. Incorporators were M. W. Bacon, Old National Bank Bldg., Spokane, Wash.; W. E. Cullen, Jr., and associates, who are reported to have secured a 3-year lease and bond, dating from Sept. 1, 1915, on the property described below. An 18 months' option on the property was acquired by the Butte & Superior Mng. Co. (Hayden Stone & Co.) for approximately \$1,200,000, in May, 1916.

The Canadian Cons. at one time held a lease and bond on this property for \$500,000, and shipped 3,200 tons of lead carbonate ore containing a small amount of zinc from near the surface. The option was relinquished, due to increase of zinc with depth.

Property: 14 claims, 600 acres, 8 miles S. E. of Salmo, and 25 miles S. of Nelson on the Great Northern Ry. **Ore:** zinc, contains lead values in varying amounts, but no silver. Orebodies occur as replacement deposits along bedding planes in shattered limestone. Orebody cut, but not displaced by diabase dike. Vein is on N. E. slope of mountain, 1,500' above Sheep creek; runs N. 28° W. and dips 85° S. W. It is stripped and stoped for 1,000'.

Development: in Nov., 1915, consisted of a 600' crosscut tunnel, No. 2 tunnel, 200' below the outcrop, said to cut a mineralized zone 300' wide with many veins carrying low-grade zinc carbonates, and one or two of shipping grade. Veins strike N. 28° W., dip 85° S. W. The main vein is 33' in width and averages 10% in zinc, with 4' of 30% zinc ore. For 840' of stope, the vein averaged 9% zinc, 3.93% lead, 18% iron, 2.29% lime. In November it had been drifted on 1,000' north and south with no decrease in size or value. A 100' winze from this tunnel level showed 30' of vein matter and a 10' orebody, 4' of which was shipping grade. A lower tunnel, now in several hundred feet, is being driven 1,700' to put the vein 830' below the outcrop. **Ore reserves:** estimated in November, 1915, at 225,000 tons in sight, 10% of shipping grade.

Equipment: includes a small water-power plant working under a 300 head to operate the compressor plant. An aerial tram is being built from the mine to the foot of the hill, where a mill will be erected in Summer of 1916. The railroad will be continued from Salmo to the mill location.

Production: all from development work during the past few months, has been about 1,000 tons monthly of carbonate ore. The present management is pushing development work, completing the lower tunnel and adding to the equipment. Production will be increased as soon as possible. Present indications are that the property will become one of the largest and most profitable producers of the province.

HUGO GOLD & COPPER MINING CO.

MONTANA

Saltese, Missoula Co., Mont. **Officers:** Richard W. Seideman, pres.; A. G. Kearns, v. p.; A. G. Seideman, sec.-treas., with A. B. Atwater and Peter Weber, directors. **Inc.** 1907, in Idaho. **Cap.**, \$1,000,000; shares 10 cts. par; assessable; 770,000 issued.

Property: 3 claims, carrying the extensions of the Boston-Colby vein system, next E. of the New York & Brooklyn mine, and ½-mile E. of Saltese. Claims carry 2 parallel veins, 300' apart, 1 about 15' wide, said to show copper carbonates, bornite and chalcopyrite, giving assays, from selected specimens of 2 to 57% copper. The second vein, proven by trenching, is said to be about 12' wide, carrying a 3' paystreak of ore assaying 12% copper, 6 oz. silver and \$8 gold per ton. Developed by 2 drift tunnels, 1,350' long, that follow the vein. An overshot water wheel, taking water, under a 12' head, from the St. Regis river, runs a 4-drill air compressor. Only assessment work done in 1915. Is a prospect.

HULBERT MINING CO.

MICHIGAN

Idle. Albert S. Bigelow, pres., 199 Washington St., Boston, Mass. W. A. S. Chrimes, sec.-treas.; Fred W. Nichols, agt., Houghton, Mich. **Inc.** about 1865, in Michigan. **Cap.**, \$1,000,000; shares \$25 par; all issued.

Owens 1,640 acres of mineral land, in Houghton and Keweenaw counties, Michigan, undeveloped; part of the surface rights have been sold, but mineral rights reserved. Property valued at \$21,862. Gross receipts for 1912 were \$403. No mining done since organization.

HULL COPPER CO.

ARIZONA

Jerome, Yavapai Co., Ariz. Hon. Geo. W. Hull, pres.-gen. mgr.; Will L. Clark, v. p.; S. F. Dennison, sec. **Officers** are the directors. **Inc.** 1906, in Arizona. **Cap.**, \$10,000,000; shares \$1 par, fully issued; nonassessable.

Property: 21 claims, partly fractional, patented, 249 acres, shows syenite, diorite and slate, a continuation of the formation of the United Verde adjoining, reported by company to show 21 orebodies, carrying some oxidized ores, but mainly sulphides, as developed. The "1888" shaft, of 475' depth, has produced a small amount of ore, but not at a profit.

Development: the Hull property and that of the Cleopatra Copper Co. have been developed by a 5,200' adit driven from Deception gulch, through Cleopatra ground into the Hull property. A winze has been started on the lode at 5,000' from the portal.

The Dillon tunnel extends completely around two sides of the United Verde ground. There are many drifts branching out from the tunnel and these usually follow a fracture plane in the rock showing 1 or 2' of fractured country rock, which usually shows pyrite and may be slightly copper stained. These drifts twist and turn in a manner showing lack of system and finally branch out like a tree, each branch following a fracture plane, some of which show 2 or 3" of copper ore, and some are not even copper-stained. These fracture planes are described as being "leaders" from the big orebodies below, and because the country rock contains a small amount

of pyrite disseminated through it, these ragged workings were stated to block out low-grade concentrating ore.

On the Silent claim a drift from the tunnel exposed an irregular body of excellent chalcopyrite from which 2 shipments were made, the ore assaying 8½% copper. The stope is about 60' long, in places is 12' wide and of irregular height. A 160' raise shows it to branch into 2 seams of 2' and 3' wide. An inaccessible winze was said to show 13' of ore, but inasmuch as shipments had ceased, this seems questionable. Beyond this orebody the tunnel turns the southwest corner of the United Verde property and follows along its western boundary to the "1888" shaft. For part of this distance the tunnel follows a lens of quartz devoid of copper. Aside from the 1 lens of chalcopyrite mentioned the showing in the tunnel is exceedingly discouraging. The mine has upward of 2 miles of openings, but the manager states that these old workings are not deep enough to develop the extension of the main orebodies of the United Verde.

Equipment: includes a 94-h. p. steam plant and a gasoline engine, with 2 hoists, one being a steam hoist, installed 1909, at the "1888" shaft. There also is a small air compressor.

HUMBOLDT CONSOLIDATED MINES CO. ARIZONA

Humboldt, Yavapai Co., Ariz. **Officers:** Benj. Rybon, v. p. and acting gen. mgr.; Dr. B. S. Bowen, treas. and gen. mgr.; John Newman, supt. **Property:** near McCabe, developed by 2,200' of tunnels. Ore occurs in fissure veins. Sample assays returned 400 oz. silver per ton. Equipped with gasoline hoist. Tunnel being driven to 1300' vertical depth to cut main vein.

Company reported to have acquired stock and property of La Tosca Mining Co.

HUMBOLDT COPPER CO. MICHIGAN

Idle. Copper Falls, Keweenaw Co., Mich. Thos. Hoatson, pres.; C. A. Wright, sec., Calumet, Mich. Inc. 1863, in Mich. Cap., \$1,000,000; shares \$25 par. Amount paid in, \$100,000 in real estate, and \$240,986 cash. Annual report of Dec. 31, 1915, shows \$2,281 cash on hand. Is controlled through ownership of 5/6 of the outstanding stock by the Keweenaw Copper Co. Annual meeting, fourth Tuesday in March.

Property: Secs. 16 and 21, the former fractional, T. 58 N., R. 31 W., all on the mineral belt, about midway between the Arnold and Phoenix mines, lying north of the greenstone, with the Eagle River and Natick mines to the south. The mine, opened 1853, though never a producer, has a single shaft about 300' deep, sunk on the ashbed, which shows the same characteristics as at the Arnold, carrying occasional bunches of rich ground.

In May, 1914, diamond drill holes numbered 12-13 and 15 were bored through a portion of the hanging wall and across the lode. Holes 12 and 13 intersected the copper bearing part of the lode at 489 feet and 364 feet respectively from surface. Hole number 15 cut this same formation at 713 feet from surface, and disclosed vein matter of good width with good values in both the upper and lower portions of the amygdaloidal flow in each of the holes. **Equipment:** includes an engine house, compressor building, smithy, warehouse and 4 dwellings.

No work was done in 1915.

HUMBOLDT COPPER MINING CO. CALIFORNIA

Eureka, Humboldt Co., Cal. T. L. Loofbourrow, pres.; Kenneth Newett, Jr., sec. Apparently this corporation is a twin of the Horse Mountain Copper Co. **Property:** 8 claims, unpatented, well watered, adjoining the Horse mountain, in Secs. 28 and 29, T. 6 N., R. 4 E., and Secs. 32

and 33, T. 6 N., R. 4 E., said to show strong veins with a good showing of copper ore, including chalcocite and cuprite. **Development:** by 750' of drifts, 210' raise and 20' winze. **Equipment:** consists of 3 surface buildings. Only assessment work being done.

HUMBOLDT MINES CO.**COLORADO**

Telluride, Colo. **Officers:** Bulkeley Wells, pres. and gen. mgr., Telluride; F. N. Watriss, v. p.; Thos. J. Regan, sec.-treas., 120 Broadway, New York; preceding, with C. N. Bell and E. B. Adams, directors. C. N. Bell, supt. Inc. 1915, in Colorado. **Cap.**, \$500,000; shares \$100 par; outstanding, \$382,000.

Property: 25 patented claims, 180 acres, in Mt. Sneffels mining district, Ouray county. **Ore:** gold, silver, lead and iron, in a 2' quartz fissure vein in andesite with N. W.-S. E. strike and dip of 76°.

Development: 680' vertical Humboldt shaft with 7 levels and the mile-long Sheridan tunnel connecting with lowest level of the Humboldt shaft. Greatest depth of workings, 840'. **Equipment:** includes a 50-h. p. electric hoist, Ingersoll-Rand compressor and a tramway. Power is electric.

Production: started Jan. 1, 1916. Ore is milled by Smuggler Union Mng. Co. Production and costs are not given out. When company acquired property it was reported that the mine would be put on 150-ton daily output basis.

HUMBOLDT ORE CO.**ARIZONA**

Controlled by Consolidated Arizona Smelting Co.

HUMBOLDT TRINITY GOLD MINING & MILLING CO. NEVADA

Office: Lovelock, Humboldt Co., Nev. E. L. Connell, mgr. Not incorporated. **Property:** 10 claims, 200 acres, 12 miles N. of Lovelock, said to show gold-silver ore in quartz vein, 18" to 2' wide. The ore above water level at 100' depth is said to assay \$18 to \$25 per ton, with higher values below.

Development: 108' Humboldt incline shaft with drifts on 90' and 55' levels, 80' and 90' long, respectively. Claims \$10,000 in ore is blocked out. **Equipment:** includes an 11-ton Huntington mill, and a 15-h. p. gasoline engine. "Production varies on account of lack of water; if mill runs steady, about \$3,000 per month." Nevada is a dry state.

HUMBOLDT MINING CO.**UTAH**

Merged with Uncle Sam Consolidated Mining Co.

HURON GOLD CO.**ARIZONA**

Idle. **Office:** Jerome, Ariz. **Mine office:** Huron, Yavapai Co., Ariz. Geo. W. Hull, pres.-treas. and gen. mgr.; H. E. Wilcox, sec. **Inc.** in Ariz. **Cap.**, \$1,000,000; shares \$1 par. **Property:** 5 claims, 80 acres, known as the Swindler mine, in the Big Bug district, developed by 125' shaft and 680' tunnel, with 1,500' of workings. Claims said to show veins from 4-10' wide, carrying ore reported to assay 2.5 to 11% copper and \$5 to \$20 gold per ton. Is said to have 800 tons of ore on the dump. Inactive since 1903, except for annual assessment work.

HURONIAN BELT CO., LTD.**ONTARIO**

Office: 310 Dominion Express Bldg., Montreal, Canada. **Officers:** J. M. Bell, managing director; F. H. Hamilton, chairman; with E. Turk, E. T. McCarthy, Scott Lings, H. B. Hooper, directors.

Inc. March, 1914, in Ontario. **Cap.**, £200,000. Company acquired, in 1914, all the interests of the Huronian Belt Syndicate, Ltd.; controls the North Thompson Gold Mine, Ltd. Also has claims in Northern Ontario and near Great Slave Lake.

HURRY-UP MINING CO.**MISSOURI**

Webb City, Jasper Co., Mo. **Property:** in the North Webb City

sheet-ground district, said to show lead-zinc ore occurring at depth of 200'. A 300-ton mill on the property, operating almost continuously for 10 years, is to be dismantled and replaced with one of 400 tons capacity in 10 hours. Company soon expects to begin hoisting ore from the Florence shaft, 1,000' N. E. of the mill.

HUSSEY-HOWE MINING CO.**MICHIGAN**

Address: care C. A. Senecal, Lake Linden, Mich. **Officers:** Wm. H. Rea, pres., with Geo. W. Guthrie, Geo. W. Howe, C. G. Hussey, F. B. Nimick and G. H. Childs, all of Pittsburg, directors. **Inc.** 1911, in Michigan. **Cap.**, 100,000 shares; \$25 par; 54,000 shares issued, fully paid, 45,000 going to owners for property, 9,000 sold for development.

Property: 320 acres, bounded by Indiana and Bohemia ground, includes N. E. $\frac{1}{4}$ Sec. 22 and N. W. $\frac{1}{4}$ Sec. 23, T. 51, R. 37 W., in Ontonagon county. Property shows outcrop of the Eastern sandstone and 100' west of it an amygdaloid vein supposedly the Baltic lode of 2 veins. It shows copper carbonates and oxides over a width of over 100' resembling the Baltic outcrop at Champion, 25 miles N. E. As the dip is 60 to 65°, the property contains a valuable area for working.

HYDAH (HAIDAH) COPPER CO.**ALASKA**

Mine near Kasaan P. O., Prince of Wales Island, Alaska. Company inactive since 1912, and letters undelivered at the Alaskan and Seattle offices. See Vol. XI, Copper Handbook.

HYPOTHEEK MINING & MILLING CO.**IDAHO**

Otto A. Olsen, sec., Wallace, Idaho. **Mine address:** Kingston, Shoshone Co., Idaho. **Officers:** J. H. Kern, pres.-gen. mgr.; S. L. Shonts, cons. engr.; Fred L. Beigin, mgr.; preceding, with W. W. Davidson, J. H. Kirk and S. A. Covert, directors. Stock is assessable. Issue of \$200,000, 7% 12-year bonds authorized in 1914 to furnish necessary funds for development and equipment.

Property: 9 claims, located, 1886, by Octave Guay, shows 3 veins, 2 of 10 to 20' estimated width, the third vein, known as the Great Western, of 8 to 25' width, having a 12 to 18" paystreak carrying native copper and cuprite, assaying up to 16% copper, balance of vein carrying low-grade ore, estimated to carry 2% copper, with small gold and silver values, with quartz gangue..

Development: by 1,000' tunnel and 3-compartment shaft to the 1,100' level. The 523' level (750' below surface) opened up a fine shoot of commercial lead ore in 1912. The 900' level also shows an ore shoot 6' thick and 400' long, from which small shipments were made in 1915. This is the deepest mining work in the Prichard slates of the Coeur d'Alene sedimentary series, a formation hitherto considered unpromising. The finding of chalcocite at this mine below 1,000' of Burke quartzite completely contradicts all former views. In Feb., 1916, a crosscut on the 1,100' level opened up a vein of solid galena ore from 18"-2' wide.

The mine is electrically equipped and has a 100-ton concentrator with Chilean mill, Wilfley table, Frue vanners, etc. Property examined and reported upon by Jas A. McEachran, 1911.

A 3-mile aerial tram was installed to convey ore from the mine to the railway. The new 125-ton mill was reported ready for operations in June, 1916. **Production:** 1913, about 200 tons of first-class ore a month. Recent production not available.

IBAPAH GOLD MINING CO.**UTAH**

Property: the Queen of Sheba mine, in the south end of the Deep

Creek country, Beaver Co., Utah, an old gold mine credited with a production of \$80,000. Mine shows vein 5-18' wide. Pay ore occurs in shoot assaying from \$10-\$13 per ton. **Development:** by a 1,187' main tunnel, several short tunnels and a 376' raise. **Equipment:** includes a small mill.

Worked under a 3-year lease from 1914 by C. E. Johnson.

IBEX GOLD MINING CO.

UTAH

Joy, Juab Co., Utah. A Knight Investment Co. property, under lease and bond to Detroit Copper Co. and described thereunder.

IBEX MINING CO.

COLORADO

Office: 929 Equitable Bldg., Denver. **Mine office:** Leadville, Colo.

Officers: A. V. Hunter, pres.-treas.; John A. Ewing, v. p.; Chas. Caven-der, sec.; J. F. Campion, mgr., with W. W. Davis, Wm. Byrd Page and J. J. Brown, directors. Geo. Becker, supt. Inc. March, 1891, in Colorado. **Cap.**, \$100,000; shares \$1 par; nonassessable; all issued. Annual meeting 1st Monday in June. Company is operated as a close corporation.

Property: 10 claims, patented, 52 acres, on Breece Hill, Lake county, includes the Little Jonny claim, which has produced about \$25,000,000 worth of ore. Ore occurs in blanket deposits carrying silver, lead, copper and zinc values. Bodies of contact metamorphic ore encountered at depth were low-grade and not valuable. Vein structure is very complicated, owing to faulting.

Development: by 4 vertical shafts to depth of 1,250'. On the 900' level an oreshoot, opened for 2,000', is reported to be 70' wide and 55' high and to run from 0.80 to 1.30 oz. gold per ton. **Equipment:** includes 18 machine drills, breaking about 350 tons of ore per day. Mine is worked by lessees.

IBEX MINING CO.

IDAHO

Mullan, Shoshone Co., Idaho. Controlled by the Amalgamated Stock Holding Co., of Wallace, Idaho. Inc. April 15, 1911, in Idaho. Company still in existence, but comatose. Owns 4 claims adjoining Idaho, Boulder Creek and Bitter Root mines, three-fourths of a mile S. of Mullan and 300' from N. P. R. R. Property shows 4' iron vein adjacent to a diabase dike. Developed by 2 tunnels, the lower starting from Coeur d'Alene river to cut vein at 700' below outcrop.

ICE PLANT MINING CO.

MISSOURI

Carthage, Mo. Inc. in Missouri. **Cap.**, \$50,000. Has a lease on 40 acres of mineral land belonging to the Guinn Investment Co., in Sec. 7, T. 28, R. 32, Jasper Co., Mo. **Property:** developed by 3 shafts to depth of 180'. **Equipment:** includes 300-ton concentrating plant, a 200-gal. per min. pump, 8 drills, hoist, crusher, compressor, boiler and steam power.

IDA MONTANA MINING CO.

MONTANA

Company dead. Property at Butte, Mont., bought at sheriff's sale, 1915, by J. W. Black, Houghton, Mich. Fully described Vol. XI.

IDAHO ANTIMONY MINING CO.

IDAHO

H. L. Williams, Seattle, Wash., managing director. Channing Prichard, supt. **Property:** in Yellow Pine mining district, near Cascade, Idaho county, shows an orebody of stibnite, 18-30" wide, developed by 4 tunnels. Two carload shipments, 1915-16, are reported to have yielded 47% antimony.

IDAHO BRIDE MINING & MILLING CO.

COLORADO

Officers: E. D. Payne, sec. and gen. mgr., 227 Temple Court Bldg., Denver, Colo. H. A. Miller, pres.; R. A. Kramer, v. p.; A. A. Ancoin and H. Angerman, directors. **Cap.**, \$100,000; shares \$1 par, fully paid, nonassessable.

Property: about 150 acres near Idaho Springs. Company organized

to take a lease on the Bride vein, worked through the Idaho tunnel, and supposedly has lease and bond on the Seaton mine, opened at depth by 300' drift in the Newhouse, or Argo, tunnel, 800' lower than the Idaho. Company took over Foxhall property, 1914.

Ore: mostly galena with silver-gold content, from 1,300' level said to have run \$9 to \$20 per ton.

Equipment: includes a concentrator. Recovery on \$4.65 ore is given as \$4.08, or 88%. Net smelter returns to Jan. 1, 1916, advertised as \$25,000.

Management states that upward of \$500,000 has been expended in development work. Advertising literature for the purpose of raising money to pay balance on mill and extend main tunnel, is not favorably regarded.

IDAHO CONTINENTAL CO.

IDAHO

Officers: A. Klockman, pres. and gen. mgr., 711 Paulsen Bldg., Spokane, Wash.; J. B. Whitehill, v. p.; R. Schacht, sec.-treas.; preceding, with E. M. Robinson, Wm. Wraith, directors. Inc. 1909, in Wash. **Cap.**, \$1,500,000; shares \$1 par, outstanding 1,325,000 shares. John D. Ryan, through the International Smelting & Refining Co., advanced \$325,000 for the development of the property on condition that it be given a 10-year contract to treat the company's ores, should name 3 directors and a manager and receive an option on 150,000 shares at 50 cts. a share.

Property: 20 patented claims, 26 miles from Port Hill, Bonner Co., Idaho, N. of head of Priest Lake, said to show a strong vein in quartzite and slate with a succession of ore shoots, 8' to 20' wide, carrying galena and a little copper ore. These ore shoots have been opened to a depth of 600' and on that level exceed 1,000' in length. Is an important new lead producer. A 300-ton concentrator was erected and was operating during June and July, 1915, producing over 2,000 tons of concentrates, when destroyed by fire. Rebuilt 1916. **Output:** 30 to 40 tons concentrates daily after April 1, 1916.

IDAHO COPPER MINING CO., LTD.

IDAHO

Office: Wallace, Idaho. **Mine office:** Mullan, Shoshone Co., Idaho. **Officers:** John H. Nordquist, pres.; A. N. Stroud, v. p.; Geo. F. Stoney, sec.; A. H. Featherstone, treas.; W. H. Herrick, gen. mgr. **Property:** 6 claims, 3 patented, on the Continental divide, between Idaho and Montana, near the head of Willow creek, in the Hunter district, west of the Reindeer Copper & Gold M. & M. Co., Ltd. Claims carry about 4,500' of the strike of the extension of the Reindeer vein, and are developed through the 3,000' Reindeer crosscut tunnel. Requests for information ignored.

IDAHO EXPLORATION CO

IDAHO

Property: a group of patented claims in Kelly Gulch, W. of Hailey, Blaine county, Idaho, showing lead-silver ore at surface. A rich strike made in 1915, said to have disclosed an orebody several feet wide, assaying 110 oz. silver and 70% lead per ton. Under development in 1916.

IDAHO GIANT MINING CO.

IDAHO

Cap., \$100,000; shares 10 cts. par. **Property:** the Idaho Giant mine, adjoins the Carbonate Hill above Mullan, Shoshone Co., Idaho. **Development:** mainly by tunnels, shows lead-silver ore in veins. The mine has been bonded to Thos. Brennan, manager of the Hunter Mine, for 5 years, starting April 1, 1915, with first payment of \$10,000 to be made at the end of 3 years.

IDAHO GOLD COIN COMPANY.

IDAHO

Controlled by the Salger Seed Co., La Crosse, Wis. S. W. Ford, supt., Landore, Idaho. **Property:** in the Black Lake section of the Seven

Devils district, Adams county, carries gold ore assaying from \$12-\$16 per ton. Company has expended \$250,000 in 12 years development work. A 50-ton cyanide plant at the mine treats the output.

IDAHO AND LOS ANGELES M. & M. CO.

IDAHO

Wallace, Idaho. **Property:** 6 lode claims, in process of patenting, in Beaver and Placer Center mining districts, Shoshone county, said to show a well defined vein containing lead-silver-zinc and copper ore. Developed by 250' tunnel which is being extended in search of a continuous orebody.

IDAHO MINING, REDUCTION & TRANS. CO.

COLORADO

Wm. E. Renshaw, mgr., Idaho Springs, Clear Creek Co., Colo. **Property:** the Silver Age, Gem and Freightons Friend mines (formerly the Gem. Cons. Mines Co.), showing veins with gold-copper ores:

Development: by several shafts and extensive tunnel workings. Is now operated by lessees. **Equipment:** includes electric-driven compressor and hoist, and a 200-ton concentrator with 20 stamps.

IDAHO MINING & SMELTING CO.

IDAHO

Is the successor, 1912, of Clayton Mining & Smelting Co., reorganized, 1913, as the Red Bird Smelting Co., which see.

IDAHO-MONTANA AMALGAMATED MINING CO.

IDAHO

Owns the Idaho-Montana mine, near Kalka station, on the Great Northern R. R., 7 miles E. of Bonner's Ferry, Bonner Co., Idaho. Developed by a 400' incline shaft which discloses a 2 to 4' vein in diorite, containing lead and silver values associated with iron sulphide, expected to develop copper with depth. Has 50-ton concentrator and is reported to have made a shipment of lead ore in 1914. Considered promising.

IDAHO MONTANA MINING CO., LTD.

IDAHO-MONTANA

Office: J. H. Wixom, sec., Box 32, Wallace, Idaho. **Officers:** Walter H. Hanson, pres.; E. H. McConnell, v. p.; Harry Harris, treas.; preceding, with F. P. Miller, directors.

Inc. Aug. 18, 1905, in Idaho. **Cap.**, 1,000,000 shares; 10 cts. par; assessable; 386,349 shares outstanding. Annual meeting 1st Saturday in Sept.

Property: 10 claims, unpatented, 200 acres in Shoshone Co., Idaho, and Sanders Co., Mont., showing lead-copper-silver ore in quartz veins. Developed by 1,200' tunnel to depth of 540'. Mine has no equipment and is not yet producing.

IDAHO NEVADA EXPLORATION CO., LTD.

IDAHO

Wallace, Idaho. **Officers:** Dr. L. E. Hanson, pres.; P. J. Limacher, v. p.-gen. mgr.; E. R. Turk, sec.-treas., with A. B. Livingston, Jos. Peila and Jos. Ghierrardi, directors. W. B. Lively, mgr.; S. L. Shonts, cons. engr. **Inc.** 1914, in Idaho. **Cap.**, 1,500,000 shares; shares given to those agreeing to pay an assessment of 1 mill per share every 2 months.

Property: 3 lode claims, the Castle Rock, Smart Alec and Arlington, and a mill site, formerly owned by the Castle Rock Mining Co., about 3 miles S. E. of Wallace on Placer Creek. Ore occurs as chalcopyrite in a 4' vein in quartzite formation.

Developed to depth of 200', from whence a crosscut is being driven to intercept the main vein. **Equipment:** includes compressor and hoist. A carload shipment to Tacoma smelter in 1915 said to have assayed .04 oz. gold, 10.89% copper, 10.5% silica, 35.7% iron. Surface equipment and buildings destroyed by snowslide, Jan., 1916.

IDAHO NORTHERN MINERAL CO.

IDAHO

Office: Room 1508, No. 30 Second Ave., Spokane, Wash. **Mine office:** Murray, Idaho. **Officers:** F. Swanson, pres.; Vina Burton, sec.

treas., with A. Engquist and J. A. Sangren, directors. Inc. in Washington. **Cap.**, \$1,500,000; shares \$1 par.

Property: 18 unpatented claims, in the Summit mining district, 5 miles from Murray, shows copper, lead, silver and gold ore in 2 well defined veins. Developed to depth of 400' by 1,500' tunnel. Property still in development stage.

IDAHO-SEATTLE MINING CO.

IDAHO

Office: 1604 Hoge Bldg., Seattle, Wash. **Mine office:** Tendoy, Idaho.

Officers: F. R. Van Tuye pres.; L. E. Eyman, v. p.; R. V. T. Horsha, sec.-treas.; with F. A. Linford and L. R. Margetts, directors. Walter M. Stephen, supt. Inc. Oct. 13th, 1915, in Mont. **Cap.**, \$1,000,000; shares \$1 par; 100,000 issued. Annual meeting 2nd Monday in January. Gross earnings in 1915 were \$15,000 from dump ore sales.

Property: 3 claims, 2 patented, 60 acres, known as the Copper Queen mine, in Agency creek, 8 miles from Tendoy, Lemhi county, held under bond and lease. Claims show bornite, chalcopyrite, copper glance and quartz in fissure veins dipping at from 45-70°. Ore occurs in shoots 20"-16', reported to average 10% copper, ½ oz. gold, 1 oz. silver per ton. Developed by 1,600' of underground workings to depth of 300'. Ore is mined by overhead stoping.

Equipment:- includes small concentrator. Management concentrated and shipped low-grade dump ore in 1915. Plans extensive development and installing drills, hoist and pump in 1916.

IDAHO SM. & REF. CO.

IDAHO

Dead. Mortgage foreclosed and title now in name of Union Trust & Savings Bank as trustee for bondholders. When expenses incurred by trustee are paid, property will be turned over to a new company to be known as the Ponderay Mng. & Sm. Co. and bondholders will take their respective pro rata.

IDAHO TUNGSTEN CO.

IDAHO

Had a 7-year lease on the Ima Cons. M. & M. Co. (which see) property near Ima, Patterson Creek, Lemhi Co., Idaho. Said to have shipped 12 tons of 60% tungsten concentrates, 1915.

IDEAL COPPER CO.

NEVADA

Office: 634 Bridge St., Grand Rapids, Mich. **Mine office:** Luning, Nevada. **Officers:** S. J. Hufford, pres.; H. D. Keefer, v. p.; Henry Riechel, sec.-treas., with Henry Smith, J. I. Keller, directors. Inc. Jan. 12th, 1915, in Nev. **Cap.**, \$600,000; shares \$1 par; 4,000 shares issued. Annual meeting, 2nd Tuesday in January.

Property: 16 claims, in 2 groups, unpatented, 360 acres, about 4 miles from Luning, formerly owned by the Wagner Azurite C. Co., and listed Vol. XI. The Atwood group, which is the principal property, shows a contact zone of about 600' width, traceable 2,000', between an altered granite footwall and limestone hanging, with N. W.-S. E. strike and dip of 50° N. The outcrop carries silver and gold-copper ores with a quartz gangue. **Development:** 2 tunnels, 1, 700' and 350' long, with a total of 2,185' of workings.

The Nevada-Wisconsin group shows several dikes of 50 to 100' width of which one is said to show 2 to 11% copper sulphide ore. Developed by shaft.

Equipment: includes 40-h. p. steam plant with 15-h. p. hoist, 3-drill straight-line air compressor, 100-ton leaching plant and 10-stamp mill. Owing to excess of lime in the ore, the leaching plant proved a failure and was closed down. During 1915 only assessment work was done, but

management plans extensive development at depth. Property considered promising.

IDORA MINING CO., LTD.

IDAHO

Office: Jamieson Blk., Spokane, Wash. **Mine office:** Wallace, Idaho. **Officers:** J. C. Broad, pres.; J. B. Carson, v. p.; C. E. Malette, sec.-treas. and mgr., with C. J. Orland and A. Landen, directors. E. L. Latta, supt.

Inc. May, 1915, in Idaho. **Cap.**, \$150,000; shares 10 cts. par; 1,200,000 shares issued, assessable; ½ ct. levied in 1915. Annual meeting 1st Monday in April. Company had \$26,000 debts in August, 1915, which have since been partly paid off. Property formerly held by the Idora Hill Mining Co., was purchased for \$100,000.

Property: 9 claims, 1 patented, in Beaver district, Shoshone county, show lead-silver-zinc ore in 3½' quartz vein. Formation is Prichard slate. Average assays reported to run 50% lead, 25 oz. silver, 8% zinc.

Development: by 8,000' of underground workings to depth of 600', including a 5,000' tunnel. **Equipment:** consists of electric power, compressor, 150-ton concentrating mill and a tramway. Mill operated under 3-year lease by Gus Ehrenberg. A new Janney flotation unit being installed, 1916. Shipped from 80 to 100 tons of ore a month, in 1915, to East Helena smelter over the O. W. R. & N. Co. Employs 6 men.

IGNACIO RODRIGUEZ RAMOS, S. A.; COMPANIA MINERA

MEXICO

Property "confiscated" by Gen. Villa, 1915, and operated by Sr. F. R. Quijano, Chihuahua City, Chih., Mexico. Shipments 1915 to Granby Mining & Smelting Co., St. Louis, held up by Villistas, and smelter agent unjustly jailed. No direct information received.

Property: 129 hectares, covering the mineral zone of the Sierra Almoloya. The geological conditions greatly resemble the Santa Eulalia camp. Ore occurs in limestone, in lenses, one having a width of 70' and length of 140', ore said to average 5% copper, 25% lead, 6% zinc, 15 oz. silver and \$8 gold per ton. Values are mainly in silver-lead ores, though chalcopyrite occurs as a byproduct.

The mine is extensively developed to a depth of 300 meters, by an 800' shaft and 2 main tunnels, with much rich ore in sight.

Equipment: includes steam and electric power, with steam hoist and air compressor. A 3-stamp experimental mill is connected with the mine by a 4,000' incline tram.

IKEDA MINES, LTD.

BRITISH COLUMBIA

Ikeda Bay, Queen Charlotte Islands, B. C. S. J. Castleman, gen. mgr.; Andrew G. Larson, cons. engr. and supt. **Inc.** Sept., 1910, in British Columbia. **Cap.**, \$850,000; shares \$1 par.

Property: the former holdings of the Aways-Ikeda Co., Ltd., taken over for \$200,000, include 42 claims, 2,100 acres in several groups on Ikeda bay, at the southern end of Moresby island, 3 miles from Jedway, and connected therewith by government rail and telephone. Steamer connection is had with Vancouver, 450 miles distant.

The Lily group, 8 claims, 400 acres, crown patented in 1912, on the southwestern side of Ikeda bay, discovered May, 1898, by Arichika Ikeda, and developed by him until taken over by the present company, Sept., 1910. The group shows limestone and slate cut by dikes of greenstone and diorite, having well defined flat fissures at right angles to and between the main fissures, which are practically vertical, the others being approximately horizontal and of great number. Ore occurs in a series of veins of 2 to 8' width, the largest orebodies lying along the horizontal main fissure. The vein principally developed is of 5 to 30' width, proven for

1,000' in length and about 300' in depth. The ore shoot, up to 20' in width, carries lenses of chalcopyrite, averaging, as mined, about 2.5% copper, with a gangue of silicious country rock and occasional stringers of quartzite and limestone. The ore mined by the former owners averaged about 4% copper, 2.2 oz. silver and \$2.25 gold per ton.

The Lily mine has 4 tunnels connected by winzes. No. 3 tunnel, 940' long, has about 5' of chalcopyrite of good average tenor and ends in a 40x50' chamber from which considerable ore has been stoped, the ore in the chamber apparently being not the same as that followed in the tunnel, lying about 45' to the N. and found by crosscutting.

Production: to end of 1910 was about 12,000 tons of ore. Property idle in 1912, save for assessment work on unpatented claims, but was reported as shipping 50 tons of ore monthly to the Granby smelter at Anyox in 1915.

ILLINOIS COPPER & SILVER MINING CO. WASHINGTON

Idle. Letters to Pittsfield, Ill., neither answered nor returned. Mine at Keller, Ferry Co., Wash. J. C. Davis, pres. and gen. mgr.; J. D. Nighbert, v. p.; A. Hamilton, supt.; B. H. Swan, sec.; J. D. Hess, treas., at last accounts. Inc. in Washington. Cap., \$2,000,000; shares \$1 par, nonassessable, in \$1,000,000 preferred and \$1,000,000 common stock. Owns 9 claims, in the San Poil district. The Columbia group of 4 claims, 3½ miles from Keller, shows auriferous and argentiferous copper ores. The Oregon group has 300' of workings, developing a vein claimed to be 72' wide, showing low-grade ore. Not favorably regarded.

IMA CONSOLIDATED MINING & MILLING CO. IDAHO

Warran Zeigler, supt. Inc. 1900 in Idaho. Property: 21 patented claims near Ima, on Patterson creek, 21 miles S. W. of Landore, Ida. Tungsten was discovered on this property in 1903, but was not mined until 1911.

Ore: mainly hubnerite with some wolframite, occurs in white quartz fissure veins, 1-10' thick in a formation of pre-Cambrian sedimentaries, closely resembling silicious schist. The quartz gangue shows lead, zinc and iron sulphides.

Development: aggregates about 2,500' of tunnels and drifts. **Equipment:** includes a 50-ton concentrator with flotation unit. Property was worked under a 7 years' lease by the Idaho Tungsten Mining Company. Shipped about 12 tons of 60% tungsten concentrates in 1915. Reported under lease to L. A. Jeffs and E. W. Johnson, 1916.

IMLAY MINING CO. NEVADA

Letters to 204 Herald Bldg., Salt Lake City, Utah, neither answered nor returned. Mine near Imlay, Humboldt Co., Nev. Geo. W. Morgan, pres.; Hon. O. W. Powers, v. p.; R. E. Siddoway, sec., at last accounts. Inc. April 19, 1907, in Utah, as successor of Morrison Mining Co. Cap., \$500,000; shares \$1 par; assessable; fully issued.

Property: 26 claims, unpatented, with 2 mill sites and a town site, 7 miles from Imlay. Mine has a vertical shaft, with about 4,000' of workings, developing ore said to assay up to 8.8% copper, 7.6% lead, and 0.18 to 66.5 oz. silver per ton, with gold values.

Equipment: includes three 60-h. p. boilers, a hoist, air compressor, 50-ton mill and electric plant, office and shops. Company was preparing to resume operations in 1914, but failure to answer letters indicates a fear of publicity.

IMPERIAL CONSOLIDATED MINING CO. COLORADO

Office: 725 Colorado Bldg., Denver, Colo. Mine office: Georgetown, Clear Creek Co., Colo. Edw. J. Wilcox, pres. and mgr.; Henry Butler, supt. Inc. as a reconstruction of the Waldorf Cons. Mining Co.

Property: 600 acres, patented, including the Tobin mine, in the East Argentine district, shows a strong fissure vein with 3' pay streak of gold-bearing copper ore. **Development:** includes the Tobin and Wilcox tunnels, with 7 miles of workings. A 3' vein of high-grade copper was intersected, April, 1915, at depth of 500'. **Equipment:** includes a 125-ton mill at the portal of the Wilcox tunnel. After an idleness of several years, operations were resumed in 1915.

A 42-ton trial shipment said to have averaged 10% copper, 8% lead, 1.53 oz. gold and 66 oz. silver per ton. Main development work being carried on by lessees in 1916 on the Commonwealth vein.

IMPERIAL COPPER CO.

ARIZONA

Dead. G. W. Dietz, sec., Tucson, Ariz. In 1903 company bought the old Silver Bell mines and built the Arizona Southern railway line from the Southern Pacific R. R. to the mine; it erected a smelter at Sasco, through its subsidiary, the Southern Arizona Smelting Co., and built a concentrator and fine plant at the mine. Mining was stopped in 1913 by the loss of a 450' shaft by fire and the inability of the mine to furnish 700 or 800 tons of ore of high enough grade to pay with copper below 12½¢ a lb. Had the parent corporation, the Development Co. of America, been able to supply the funds, which it claims were promised by the Southern Pacific R. R., the Imperial could probably have tided over this period.

In 1911 trustee for bondholders of the company began foreclosure proceedings, resulting in the sale in 1915 of the property, including the stock control of the railroad and of the smelting company. Immediately thereafter the American S. & R. Co. secured a bond and churn-drilled the tract to check assay plans of former management, and in March, 1915, property was taken over and lease taken at \$2,000 per month on the Sasco smelter.

The Silver Bell mines cover 85 claims, 1,700 acres, in a small mountain range called the Silver Bell. The range has a monzonite porphyry core capped by Paleozoic limestone and quartzite, eroded and faulted, with ore-bodies in the baked and altered limestone as irregular lenses along shear planes in this contact zone. The porphyry is itself altered and impregnated with copper sulphides. Oxidation extends downward 100-150'. The underlying sulphide ore carries chalcopyrite and some bornite. This is the largest developed mine south of the Southern Pacific R. R., being but 35 miles south of Tucson.

For geology see Bull. 285, U. S. Geol. Survey, 1906, pp. 102-3. Also Min. Res. 1907, p. 175; 1908, pp. 204 and 305; 1909, pp. 167 and 251. Fully described in Vol. XI, Copper Handbook.

IMPERIAL COPPER CO.

SOUTH DAKOTA

Durbin Groupe, pres.; John O'Brien, supt. Property in Custer Peak district, developed by 175' shaft, reaching permanent water level. Cross-cutting will be done to open up the 30' ledge. **Equipment:** steam hoist, pump and mill of several hundred tons capacity. Mine reported to show good values in copper in upper workings.

IMPERIAL COPPER & GOLD MINING CO.

WYOMING

Office: 423 Caswell Block, Milwaukee, Wis. Jacob Best, sec.-treas. **Property:** 6 claims, 113 acres, patented, near the Penn Wyoming mine, on Upper Cow creek, 12 miles west of Encampment, said to show 2 veins, 1 of 26 to 32' estimated width, being a schist dike. Mine has about 500' of tunnels, developing ore giving assays of 6 to 14% copper, with small gold and silver values. Secretary reports all taxes paid, 1915. Idle in 1915-16.

IMPERIAL MINING CO.

IDAHO

Mine office: Burke, Shoshone Co., Idaho. **Officers:** John H. Nordquist, pres.-gen. mgr.; J. N. Thennes, v. p.; H. G. Brown, sec.; with P. J. Jearon,

E. Day, directors. Inc. 1906. Cap., \$1,000,000, increased 1908 to \$1,500,000; shares \$1 par. Assessment of 1½ mills per share levied 1913 and 5 mills per share in 1915.

Property: 6 claims and 3 fractions, 180 acres, adjoins the Copper King, on the west, near Burke. Developed by 5,000' of tunnels and crosscuts. After being closed down for 2 years, property was reopened in 1915. Over \$15,000 worth of development work was done, including diamond drilling and raising, to prospect the orebody found in the upper or 4,000' tunnel, which was not encountered below. Contract for a new 400' tunnel was given in 1916. Equipment with 3-drill electrically driven compressor.

IMPERIAL MINING CO.

OREGON

C. L. Arzeno, mgr., 8 East 5th St., Covington, Ky.; Otto Simons, supt. Property: the Imperial mine at Cable Cove, 10 miles from Sumpter, the nearest railroad station. Ore occurs in fissure veins in granodiorite. The Imperial, or main vein is ¾' wide and has been extensively developed. **Equipment:** includes a small mill. Has been a small and irregular producer.

INCLINE MINING CO.

MISSOURI

Controlled by Tom Walker & Co., Webb City, Mo. Has a lease on part of the lands belonging to the Center Creek Mining Co., in Sec. 17, T. 28, R. 32, between Webb City and Carterville. Developed by 5 shafts to depth of 150', showing lead and zinc ore. **Equipment:** includes 2 concentrators of 500 tons capacity, pump, boiler and steam power.

INDEPENDENCE MINE.

IDAHO

Harry J. Allen, mgr. and owner. Mine near Ketchum, Blaine county, shows a well-defined lead-silver vein, from which shipments in 1915 averaged 45% lead, 95 oz. silver and 0.2 oz. gold per ton. Operations hampered owing to apex litigation and lack of water supply for the mill.

INDEPENDENCE GOLD & COPPER MINING CO.

MONTANA

Deer Lodge, Powell Co., Mont. Officers: I. S. Eldred, pres. and gen. mgr.; Peter Pauley, v. p.; E. Scharnikow, sec.; W. F. Gullette, treas.; preceding officers, A. D. Hoss and W. C. Spottswood, directors. **Inc. 1907 in Montana. Cap., \$900,000; shares \$1 par. Assessments to date 10 mills per share.**

Lands: 120 acres in the Oro Fino district, 12 miles S. of Deer Lodge and 5 miles S. of 2 railways, include the old Independence mine located 1870, which is a patented tract of 102x2,200'. **Development:** includes shafts and tunnels, one 425' long, 1915, showing a vein of 4 to 5' width, carrying copper ore said to have averaged as produced about \$12 per ton in combined values, and to be capable of concentration 4 into 1, giving concentrates with excess of iron. Closed down Sept., 1908, for lack of funds.

In June, 1914, a lease and bond for \$75,000 was given to T. C. Neumann with two years' option and royalty of 10% net on smelter returns. A 3' vein carrying gold, silver and traces of copper was encountered, 1915.

INDEPENDENCE GOLD MINING CO.

ALASKA

Seward, Alaska. Property: 5 claims and a mill site, in process of patent, in Fishhook Creek Valley, on the east slope of Granite Mountain, Willow Creek mining district. Mine located in 1907, and formerly owned and operated by the Alaska Gold Quartz Mining Co., shows 2 veins. The Granite Mtn., or main vein, from 2"-4" thick, occurs in quartz diorite, showing native gold, pyrite and chalcocopyrite; strike N. 14°, 20° W., with average dip 20° S. W. Developed by opencuts, stopes and several tunnels, longest 386'. The Independence, or upper vein, 620' vertically above and running parallel to the Granite Mtn., has strike N. 12° W. with average dip of 42° W., averages 12" thick and is only slightly developed.

Equipment: includes small stamp mill and concentrator, 2 aerial trams

connecting mine and mill. Production in the past has been mainly from the Granite Mtn. workings. Operated in a small way, 1915.

INDEPENDENCE LEAD MINES CO.

IDAHO

Officers: Maurice W. Bacon, pres., Old National Bank Bldg., Spokane, Wash.; John H. Wourms, v. p.; W. E. Cullen, Jr., sec.; with R. A. Carnochan and C. Van Ordstrand, directors. **Inc.** Nov., 1914, in Idaho, as a reorganization of the Independence Gettysburg Mining Co. **Cap.**, \$1,500,000; shares \$1 par; 1,300,000 shares issued. Stock listed on the Spokane Exchange.

Property: 8 patented claims and a ½ interest in the Key Lode claim, in the Coeur d'Alene district, 1 mile from Mullan, on the No. P. R. R. Claims adjoin the Gold Hunter M. Co. holdings to the E. and the You-Like and Morning veins of the Federal M. & S. on the W. Mine shows 3 veins believed to be the extension of the Morning-Evening, You-Like & Midnight orebodies, which have been profitably worked to depth of 2,800' on adjoining properties.

Development: mainly by 4 crosscut tunnels, 200', 400' and 1,800' long. The longest, or No. 4 tunnel, 370' vertically below No. 3, early in 1916 intercepted the You-Like vein, showing 8' of ore assaying 4 oz. silver, 3% lead with some iron sulphide. This tunnel is being continued north to reach the Morning vein. Employs 15 men.

INDEPENDENCE MINING CO.

WYOMING

Idle. Office: 55 High St., Oshkosh, Wis. **Officers:** E. E. Meeleus, pres.; Henry L. Larsen, v. p.; H. O. Granberg, sec.-treas. and gen. mgr. **Inc.** June 28, 1904, in Wyo. **Cap.**, \$1,000,000, shares \$1 par, as successor of Leighton-Gentry Mining Co.

Property: 6 claims, patented, 120 acres, 2 miles north of Dillon in the Battle Lake district, shows eruptive metamorphic country rocks, carrying an 11' contact vein between quartzite and diorite. **Development:** by 200' incline shaft and 250' tunnel, showing occasional stringers of 3 to 12" width, carrying a little chalcopryrite assaying 12% copper, with small quantities of nickel and cobalt and traces of silver and gold. Has steam power, a hoist and several small mine buildings.

INDEPENDENT COPPER MINING & MILLING CO.

IDAHO

Officers: John H. Nordquist, pres.; J. N. Thennes, v. p., gen. mgr. and agt., Wallace, Idaho; Otto A. Olsson, sec.-treas.; preceding, with James A. Beau, Aug. Mott, Chas. McKinnis, Forest Clark and Henry Bilberg, directors. **Inc.** 1907 in Idaho. **Cap.**, \$1,250,000; shares \$1 par; issued \$950,000; assessment to date 1½ cts. per share. First meeting in 7 years held June, 1914.

Property: 3 claims, the Bullpen, San Quentin and Independent Fraction, in the Snowstorm copper belt, 3½ miles N. E. of Mullan in the Hunter mining district. Claims show quartzite cut by 4' fissure vein running N. 72° W., 80° S., the vein underground said to be 10' wide and to carry scattered bunches of 2% copper ore.

Development: includes 800' crosscut tunnel, with 300' or more of drifts at a depth of 300' below the outcrop. Development to date, 1,300' shows ore in various places, but not in commercial amount. Property inactive since 1908, but reopened 1913. **Equipment:** includes 100-h. p. electric motor, etc. Is a prospect.

INDIAN MOUND MINING CO.

WISCONSIN

Quincy, Ill. Mine office: Benton, Wis. L. N. Dana, supt. **Property:** the Monroe mine, near Benton, Lafayette Co., Wis., is a regular shipper of galena and sphalerite concentrates.

INDIAN QUEEN CONSOLIDATED MINING CO.

UTAH

Idle. Address: care Jesse Knight, pres., Provo, Utah. Mine near New-

house, Beaver Co., Utah. Inc. 1907 in Utah. **Cap.**, \$150,000; shares 10 cts. par.; fully issued. Shares are listed on the Salt Lake Stock Exchange.

Property: 25 claims, partly patented, near the King David mine, about 2 miles E. of Newhouse, taken over from the old Indian Queen and Leland companies. **Development:** by a shaft and a 4,700' tunnel planned to be driven 6,000'. **Equipment:** includes electric power, with a hoist and air compressor. Closed down July, 1910, and worked by lessees since then with small production of picked ore.

INDIAN QUEEN MINING & SMELTING CO. MONTANA

Idle. Office: 22 West Park St., Butte, Mont. Mine near Apex, Beaverhead Co., Mont. **Officers:** Thos. F. Stephens, pres., treas. and gen. mgr.; Wm. Robertson, v. p.; Thos. W. Ellis, sec.; A. H. Stephens and T. J. Ellis, directors. **Inc.** July, 1904, in Montana. **Cap.**, \$450,000; shares \$1.50 par; nonassessable; issued, \$228,000.

Lands: 2 claims, 40 acres, and a 3-acre mill site, in the Utopia district, known as the Indian Queen mine. Owned jointly by this company and the Anaconda Copper Mining Co. The property shows granite, quartzite and dolomite, having 2 contact deposits between granite and limestone, of 8 to 10' average width, carrying malachite, azurite and chalcocite, estimated by management to average 8% copper, 10 to 12 oz. silver and \$1 to \$4 gold per ton. Mine was opened 1867, and has been worked intermittently by lessees. **Development:** by shafts of 150' and 220', and 820' tunnel, with about 1,600' of workings.

INDIAN SPRINGS MINING CO. NEVADA

Address: 223 Mohawk Block, Spokane, Wash. Mine at Lida, Esmeralda Co., Nev. **Officers:** A. B. Railton, pres.; H. T. DeMerritt, v. p.; Fred N. Davis, sec.; Thos. R. L. Harris, treas.; Ross C. Craddock, supt., at last accounts. **Inc.** Feb., 1911, in Washington. **Cap.**, \$1,500,000; shares \$1 par; assessments, 3 mills to April, 1913. Company is a reorganization of the Indian Springs Copper Mining Co., with new directorate.

Company owns 8 claims, 100 acres mineral land in Lida valley, or Tule Canyon district, 30 miles S. W. of Goldfield, Nev. Ground shows veins and replacements in massive gray limestone. Vein runs E.-W., has vertical dip and is said to be 70' wide, traceable for 1,000'. **Development:** by 100' shaft and 200' tunnel. Has steam power.

INDIANA & LAST CHANCE GROUP. CALIFORNIA

Owned by Messrs. Roan and Putney. **Property:** 4 claims in Sec. 29, T. 33 N., R. 5 W., ½ mile N. of Copley, Shasta county, shows oxide ores at surface and heavy sulphides at depth. Only slightly developed by tunnels and drifts, and is an unimportant producer.

INDIANA MINING CO. MICHIGAN

Office: 60 Congress St., Boston, Mass. Mine office: Dee Bldg., Houghton, Mich. **Officers:** R. M. Edwards, pres. and gen. mgr.; Sidney J. Jennings, v. p.; Henry Tolman, treas.; preceding officers, Carlos W. Van Law and C. A. Hight, directors; Albert L. Wyman, sec.; Thomas Bennett, supt. **Inc.** Aug. 11, 1909, in Michigan. **Cap.**, \$2,500,000; shares \$25 par; issued \$2,000,000; paid in \$11.50. State Street Trust Co., Boston, transfer office. Federal Trust Co., Boston, registrar. Annual meeting 3rd Thursday in April. Company gave 60,000 shares to owners of lands for its property and offered 36,000 shares, Aug., 1909, for public subscription. Receipts, 1915, were \$80,555, of which \$80,000 was assessments. Expenditures, 1915, totaled \$36,448, accounts showing balance of assets at end of year of \$14,574, as compared with a deficit of \$29,532 in 1914.

Property: 1,200 acres bought 1909 from the Indiana Copper Co., the tract lying N. E. of the Lake and N. of the North Lake, in Secs. 21, 27 and

28, T. 50 N., R. 37 W. The property was worked on a small scale previous to the burning of the mill, 1864, but the old openings are inaccessible and no work has been done thereon by the present company. The lands are heavily timbered and can supply all mining timber for a considerable time. Ample water is available from the Fire Steel river. Transportation is furnished by a spur of the Copper Range railway, and the Mineral Range line is within a short distance.

The lands are traversed by the Evergreen belt of copper-bearing amygdaloidal beds and by a number of unidentified cupriferous beds lying between the Evergreen belt and the eastern sandstone. The southeastern part of the tract is in the hypothetical horizon of the Lake amygdaloidal bed. The Indiana is covered with a heavy overburden of sand, hampering drilling operations. The ground has been tested by extensive diamond-drill borings.

No. 2 drill hole disclosed phenomenally rich copper rock from a bed immediately under a 400' conglomerate. The nature of this ore is a subject of dispute, it having been called sandstone, conglomerate and felsite, but there is little question that it is an altered felsite; the rock consists essentially of quartz and light colored mica, with secondary infiltrations of calcite and small irregular grains of disseminated native copper. The even size of the quartz grains, with their interlocking texture, indicates an igneous origin. There are indications that the 40' of rich felsite rock and a second zone of about 25' width, are parts of a single bed of approximately 265' width, the second zone of 25' being near the center of the wide bed. No. 5 hole and No. 9 hole both cut felsite carrying heavy copper, apparently a continuation of the same orebody.

Ground was broken, Jan., 1911, near No. 2, the discovery hole, for a vertical shaft, the overburden at this point being about 110'. The shaft is cylindrical, of 17' outside diameter, lined with steel and concrete, with inner dimensions of 8x12', and is 1,415' deep. Development work was confined to the 600' level, but no commercial rock was found. A total of 1,152' of cross-cutting was done at \$11.13 per ft., 1914. In 1915 search was started on this level to find No. 2 drill hole, but to date it has not been found. It was this hole that disclosed rich copper rock at 1,450'. Shaft has been unwatered and drifting is under way on the 1,150' and 1,400' levels, June, 1916.

Equipment: includes a steam hoist good for 2,500' depth, compressor and necessary mine buildings.

INGALLS LEASING CO.

COLORADO

Operates the Ingalls Mine on Quartz hill, Gilpin county, showing gold-silver-copper ore in veins. Developed to depth of 240' by shaft and cross-cuts. Shipments in 1915 to Globe smelter reported to have yielded from 1.23-5.20 oz. gold, 7-27 oz. silver and from 1-5% copper per ton.

INGUARAN; COMPAGNIE D'

MEXICO

Office: 56 Rue de Provence, Paris, France. Mine office: Inguarán, Ario, Michoacán, Mex. Ch. Laforgue, gen. mgr.; Maurice Armand de Lille, agt.; J. L. Philips, supt. **Inc.** Jan. 15, 1898, in France. **Cap.**, 12,000,000 francs, shares 500 francs par. Is controlled jointly by the French house of Rothschild and the Banque Mirabaud; a considerable portion of the company's stock is owned by the Compagnie du Boleo. Property is said to have cost 1,500,000 pesos, and company reported to have expended about \$8,000,000 thereon, which is undoubtedly overestimated.

Property: 185 hectares, and a mineral zone of 5,000 additional hectares, in the Tacambaro district 70 miles north of the Balsas river, Michoacán, lying on the plateau of the volcano Jorullo, 1,500' above the plains. **Geology:**

the Inguarán mountain is traversed by a dike 2,000 to 3,000' wide, of fine-grained pink granite, or granodiorite sprinkled with grains of copper glance and copper pyrite. This dike is traceable several miles across country. The granite rock is sprinkled with specks of chalcocite and chalcopyrite forming a disseminated, or so-called porphyry deposit whose payable ores occur in belts or bands in the dike. Proven depth of the ore is about 300 meters, at which point it apparently cuts off.

Development: by a 2,500' tunnel and 2 main shafts, deepest 350', with levels opened at 80' intervals. Both ore and country rock are exceedingly firm, little timbering being required. Estimates of size and value of the orebodies vary greatly, but the best authorities estimate an average of 3.25% copper, with 2,000,000 to 3,000,000 metric tons of ore blocked out. The ore is not well adapted to wet concentration as the metallic sulphides are firmly interlocked with the granitic minerals, but it is admirably adapted to treatment by froth flotation of the Minerals Separation Co., and apparently could be put about 8 or 10 into 1.

The Inguarán was the particular bugaboo of the copper situation at the end of the nineteenth century, the exigencies of the trade demanding that there always be some mine, just about to begin production, that can make several hundred million pounds of copper yearly at a merely nominal cost. The Inguarán has a large body of low-grade ore, but it is not equal in quantity or quality to that of several of our other "porphyry" coppers.

The property has been idle some years and cannot become a serious producer until rail connections are secured; judging from the very leisurely progress of the past decade it will become a large producer about the time that Gabriel blows his horn.

INLAND COPPER CO.

ARIZONA

Idle. Letters to 1017 Commerce Bldg., Kansas City, Mo., and to the mine at Planet, Yuma Co., Ariz., unanswered. L. E. Corbin, pres.; A. W. Bork, v. p.; S. D. Dodson, sec.-treas. Inc. in Arizona. **Cap.**, \$5,000,000; shares \$1 par; nonassessable. **Property:** 40 claims, including 2 groups of about 15 claims each, in the Bill Williams range, near the Bill Williams Fork river, with a mill site, smelter site and water rights. The mine has 2 tunnels, and a 2-compartment shaft equipped with an 18-h. p. gasoline hoist. Company advertised for copper ores, presumably to show its stockholders, since it had no reduction plant of its own. Is not regarded favorably.

INSPIRATION CONSOLIDATED COPPER CO.

ARIZONA

Office: 42 Broadway, New York. Mine at Miami, Ariz. **Officers:** William B. Thompson, pres.; William D. Thornton, v. p.; Joseph W. Allen, sec.-treas.; Evan J. Dudley, asst. sec.; W. S. Harper, asst. treas.; Charles E. Mills, gen. mgr.; Wm. B. Thompson, Wm. D. Thornton, Jos. W. Allen, John F. Alvord, Thomas F. Cole, Edmund C. Converse, William E. Corey, Charles A. Corliss, Philip L. Foster, L. D. Ricketts, Eugene Meyer, Jr., William G. Rockefeller, John D. Ryan, Charles H. Sabin and Albert H. Wiggin, directors. D. A. Welch, purch. agt. Guaranty Trust Co., New York, and Old Colony Trust Co., Boston, transfer agts. Bankers' Trust Co., New York, and National Shawmut Bank, Boston, registrars.

Inc. Dec. 18, 1911, in Maine. **Cap.**, \$30,000,000; shares \$20 par; issued and outstanding Dec. 31, 1915, 920,975 shares. **Bonds:** \$6,000,000, 10-year, convertible 6%, due March 1, 1922, convertible into stock at \$25 per share, of which there was outstanding June 1, 1916, \$304,000; \$4,500,000 5-year convertible debenture 6%, due July 1, 1919, convertible into stock at \$25 per share, of which there was outstanding June 1, 1916, \$21,300; these were called for payment, July 1.

Comparative General Balance Sheet: year ending Dec. 31:

Assets—					
	Prop. & Equip.	Supplies	Copper on Hand	Other Current	Total
1915:...	\$25,293,529	\$622,276	\$1,115,960	\$ 411,281	\$27,443,046
1914....	22,166,764	439,880	2,641,219	25,247,863
Liabilities—					
	Capital Stock	Bonds	Current	Surplus	Total
1915.....	\$18,419,500	\$ 6,544,500	\$1,878,983	\$600,062	\$27,443,046
1914.....	14,459,160	10,500,000	288,703	25,247,863

Profit and loss account for 6 months ending Dec. 31, 1915, shows: sales of copper, \$1,138,878; total expenses, \$1,640,214; copper in process and on hand, \$1,101,399; balance forward, profit, \$600,062. Estimated operating profits for first half of 1916, \$8,750,000. **Dividends:** an initial quarterly dividend of \$1.25 per share was paid May 1, 1916, followed by a \$2 dividend, payable July 31.

Company took over properties owned by the Inspiration Copper Co. and the Live Oak Development Co., paying for same in stock. In May, 1912, the mill and camp site of the Black Warrior copper mine was purchased from the Warrior Copper Co. for \$175,000. Early in 1914 the property of the New Keystone Copper Co., lying between the Inspiration and Live Oak groups, 219 acres, was purchased for \$795,940, payable in 39,797 shares of stock at \$20 per share, 9 shares of New Keystone for 1 share Inspiration.

The consolidated property holdings of the company are as follows: mining lands, 1,881 acres; mill site and tailing lands, 615 acres; ranches, water lands, etc., 1,032 acres; total, 3,528 acres, located 8 to 10 miles W. of Globe, Ariz.

Geology: property carries about 1½ miles of the strike of a mineralized belt by Pinal schist, much crushed, altered and silicified by contact action, due to the intrusion of the great mass of granite forming the hills to the S. W., the shattering having allowed the free circulation of secondarily enriching solutions. The oxidized zone shows carbonates, occasionally of commercial tenor, as in the Clipper tunnel, but ore occurs mainly in secondary form as disseminated chalcocite, forming an enriched zone of commercial ore of 50 to 575' in thickness, estimated by the management to average 180', with an average of 90 to 100' of overburden, underlain by a primary zone of cupriferous pyrite below commercial tenor. About 40% of the values occur in small fissures and veinlets and along the jointing planes and planes of schistosity, copper being mainly in the form of flakes and grains of chalcocite, the balance of about 60% of ore values being disseminated through the gangue of friable Pinal schist, with some quartz. The mineralization also extends into the granite-porphry contact, about 10 to 15% of the ore developed in the Colorado orebody being in granite. The cupriferous schist is faulted, just east of the Woodson orebody, by the Bulldog fault zone, of about 300' width.

The Live Oak group of 14 claims, 200 acres, is about 1½ miles W. of Miami, at the western end of the Miami ore belt and separated from the Inspiration group by the New Keystone group. The geological conditions are similar to those of the Miami belt generally, save that much of the surface is covered by leached white granite, showing brilliant, green-stained outcrops of far more attractive appearance than any other part of the belt. This granite is underlain by schists carrying the ore, but part of the orebody is in granite.

The mine was originally opened on a flat dipping vein, 5 to 12' thick, carrying high-grade chrysocolla ore, from which shipments running 17 and

18% were made for several years. Much of this material is quartzose and valuable as a gemstone. The vein ended at water level in a mass of low-grade chalcocite ore similar to that of the Miami mine. Orebody was developed by tunnel work and drilling by the Live Oak Development Co. by over 50 drill holes with 20,000' of drilling and 5,000' of underground work. This work blocked out a body of disseminated ore 1,400' long, 75 to 200' deep beneath a capping of oxidized material averaging 435' thick. The orebody as developed averaged 114' thick and contained 15,000,000 tons of 2.11% copper ore.

The New Keystone Group has about 60 acres underlain by Pinal schist, covered in part by a sheet of granite porphyry, 25' to 200' thick. A strong fissure vein crossing the property was mined by the old Keystone Copper Co., the vein being 12' thick with a paystreak averaging 15", from which shipments of 19 to 22% copper and 2 to 5 oz. silver per ton were made for some years. Mine yielded, according to report, about \$1,000,000. The New Keystone Copper Co. explored and opened up a deposit of disseminated glance ore similar to that of the Miami mine.

Development: by the new company consisted in blocking out this orebody by underground workings and churn drilling. The Keystone shaft is 330' deep and at the time the company was absorbed by the Inspiration Cons. Copper Co., had a total of 14,886' of workings. Churn drilling along 200' squares was discontinued June, 1912, after company had put down a number of holes with an aggregate of 21,947' of work. Development blocked out 2,516,000 tons of ore, which sampling showed to have an average of 2.25% copper.

Development under the present company has been of a dual nature, including both extensive underground openings, and churn-drill borings along the same general system as followed in the development of the Ray and Chino mines. Underground work in 1915 amounted to 109,546'; total workings, Dec. 31, 1915, approximately 64 miles, in addition to 29½ miles churn drilling.

The Inspiration orebody will be worked by 2 main tramming levels at 326' and 450' in depth, respectively. The Live Oak orebody will be accessible through the Live Oak shafts, but all ore will be hauled through the main haulage tunnel, 6,600' long, connecting with the bottom level of the Inspiration shafts.

Ore is mined by the so-called Ohio system, locally termed the "Finger Raise" system, undercutting and caving in blocks of about 70' vertical dimension; the broken and caved ore is drawn off through a system of inclined raises delivering to the haulage-ways below; these raises have a sufficient number of branches immediately below the caved area to reduce the interval between the heads of the raises that tap the caved ore to a minimum of about 8'. The ore is carried in trains of 5-ton cars by air locomotives to the working shafts, where it is delivered to one set of double concrete bins underground holding 3,700 tons and hoisted to surface through 2 shafts, delivering to a bin of 2,000 tons capacity located between the shafts. Skip loading and hoisting is automatically controlled. Ore extraction will be entirely confined to these 2 cement and steel-lined shafts, 585' deep and 107' apart, in Webster gulch, on the north side of the mountain, while men and supplies will be lowered and water pumped at the Incline, or Supply shaft on the opposite, or Miami side of the mountain. The 2 shafts will be operated from the same hoist house, but will be entirely independent units, capable of handling 1,000 tons per hour. The total lift is 630'. The ore will be hoisted in skips, passed through crushers and put in 25,000-ton storage bins. From these bins it will be carried over the company's 1.6-mile

railroad, with 3% grade, to the new mill at the old Black Warrior town-site. Mining costs are estimated at 85 cts. a ton.

Ore reserves: Jan. 1, 1916, consisted of 97,143,000 tons of 1.63% copper ore made up of the following: (a) sulphide ore, 46,252,000 tons, 2.01% copper; (b) low sulphide material, 28,698,000 tons, 1.26% copper; (c) oxidized material, 17,460,300 tons, 1.31% copper; (d) mixed carbonate and sulphide material, 4,732,700 tons, 1.31% copper.

The new mill, designed by H. K. Burch, consists of 18 sections, each one with rated capacity of 800 tons per day, making a total of 14,400 tons per day, exclusive of the 600-ton experimental mill, which is in a separate building; 2 more sections, already provided for in the mill, are being added. This will increase the mill capacity to 16,000 tons per day and provide sufficient milling capacity to maintain full copper production in case it is decided to drop the grade, thus assuring a minimum output of 10,000,000 lbs. copper per month from a greater tonnage of ore, but without increasing the cost per lb. of copper.

The scheme of treatment, stated in general terms, is as follows: at the mine—crushing ore to 4", maximum size in gyratory crushers, crushing this ore to 1½" maximum size by Symons disc crushers. At the mill—crushing product from the Symons disc crushers in Marcy ball mills to pass 48-mesh screen, treatment of this product in flotation machines with separation of flotation tailing into sand and slime. Sand is treated on concentration tables and the slime retreated in flotation machines. Concentrates are dewatered in the filter plant.

While plans were for a 7,500-ton mill to cover 8 acres, adoption of the flotation process has permitted doubling originally planned capacity within space of 3 acres. As a result of this compactness, elimination of elaborate classification, and some stage crushing, the costs of the combined oil flotation and water concentration will not exceed 35c per ton. Mill is equipped with Mineral Separation and Callow flotation machines, also one designed by Dr. Gahl, who is in charge of the mill. Coal tar is the chief component in the frothing mixture. The first unit of the mill went into operation June 29, 1915, the 18th in Feb., 1916. The first ore was caved underground and actual mining started July 25, 1915.

From the time the ore is dumped from the chutes into the mine cars no manual labor is required, all operations being entirely mechanical.

The company owns its own railroad of 4½ miles standard-gauge track, connecting the mine with the mill and the mill with the smelter of the International Smelting Co.'s Miami plant, where concentrates are smelted.

The mine and mill are connected with both the U. S. Reclamation hydroelectric plant at Roosevelt and with the company's own steam plant, consisting of three 6,000-k. w. turbo generator units.

Production: for last six months of 1915—

1915	Tons Milled	Cu. %	Rec. (%)	Ratio Conc.	% Cu. In Conc.	Cost per Ton				Net Prod. Lbs. Cu.	Cost per lb. Cta.
						Mng	Conc.	Mktg. & Roy. etc.	Total		
	778,851	1.702	79.95	24.6:1	32.67	\$0.631	\$0.487	\$0.764	\$1.988	20,067,310	8,136

(a) Recovery on sulphide ore, 88.56%. Yield in refined copper was 26.4 lbs. per ton of ore.

(b) Includes a charge of 20c calculated to cover average amount of development work per ton ore.

(c) Includes coarse crushing, 2.9c; ore hauling, 2.0c, and concentrate hauling, 0.2c.

(d) Gross production, 20,445,670 lbs.; for first 5 months 1916, 43,348,925 lbs.

Ore that averaged 1.702% copper had .226% in oxide combination; apparently about 24% of this was saved. In all probability a 4,000-ton plant will be required to treat the oxide ores in the same proportion to the developed tonnage as the sulphides.

The monthly output in 1916 has increased rapidly from 5,500,000 lbs.

copper in Jan. to 10,400,000 lbs. in May, practically maximum capacity, and the rate originally planned, 120,000,000 lbs. per year. This production will, when sustained, be surpassed in this country only by Anaconda, Utah and Kennecott. The first dividend followed within six weeks after the completion of the mill. Inspiration's record is an enviable one and both property and management are regarded as exceptionally good.

INSPIRATION EXTENSION COPPER CO.

ARIZONA

Officers: William Evans, pres., 433 Broome St., New York. Anton Trojanovich, gen. mgr., Miami, Ariz.; John Kasser, v. p.; Fred Augustin, sec.-treas.; preceding officers and Geo. Kingdon, directors; J. A. Thomas, mine supt. and engr. Inc. Feb. 11, 1913, in Delaware. **Cap.**, \$1,000,000, increased to \$1,500,000 in 1915; shares \$5 par; \$80,000 issued. Annual meeting, Feb. 11. Company's holdings are under bond and lease to the Castle Dome Dev. Co., 7 Wall St., New York.

Property: 9 claims, 145 acres, patented, in the Miami district, surrounded by claims of the Inspiration Consolidated Copper Co., and underlain by schist, locally altered, that is said to show a large deposit of low-grade copper ore that will average 3%. Also 29 locations, about 500 acres, on Porphyry Mountain in the Globe mining district, on which the Castle Dome Dev. Co. is driving a tunnel, looking for low grade "porphyry" ore.

Development: by a shaft that has passed through schist into granite.

Equipment: includes a 35-h. p. gasoline hoist good for 500', with various buildings.

INSPIRATION NEEDLES COPPER CO.

ARIZONA

Offices: 116 Nassau St., New York, and Globe, Ariz. **Officers:** D. R. Williamson, pres.; Frank Beston, v. p.; F. W. Hamm, asst. sec.; A. D. Williamson, treas.; with Geo. J. Stoneman, directors; John S. Cook, sec. Inc. Jan. 4, 1912, in Ariz. **Cap.**, \$2,000,000; outstanding, \$1,300,000; shares \$1 par. Security Transfer & Registrar Co., New York, transfer agent and registrar. Listed on New York Curb. Annual meeting first Monday in February. Statement of June 29 gives: property, \$1,275,000; mining expense, \$5,000; cash, \$20,000.

Property: 500 acres, 3 miles from Miami, Ariz., adjoins Southwestern Miami on the W., lies 1 to 2 miles S. W. of Inspiration Cons. property. Surface shows Gila conglomerate, Pinal schist and Schultze granite formation. **Development:** the result of assessment work, consists of a number of shafts, none over 100' in depth, and tunnels, none over 200' in length.

August, 1916, two churn-drills operating at holes No. 1, 395' deep, and No. 2, 300' deep, had cut oxidized ore carrying 1% to 2.6% copper, proving that the ground is on the ore zone of the district.

Churn drilling began June 18, 1916. Expect to have 7 drills in operation. Examined by J. H. Dockweiler (Crocker Bldg., San Francisco, Calif.) in June, 1916.

INTERCOLONIAL COPPER CO.

NEW BRUNSWICK

Idle. Office: 32 Tyler Bldg., Pawtucket, R. I. Mine office: Dorchester, Westmoreland Co., N. B. Darius L. Goff, pres.; T. J. Edwards, sec. Inc. 1899 in Arizona. **Cap.** decreased, 1906, to \$2,000,000, shares \$5 par, in preferred and common shares, latter with restricted voting privileges.

Property: 250 acres freehold and 1,100 acres held by leasehold from the Crown, show a blanket vein carrying carbonate and sulphide ores, claimed to average 3 to 4% copper. Has shafts of 40', 75' and 150', also a 1,500' drainage tunnel, with about 8,000' of underground workings.

Works include a 200-ton concentrator, leaching plant and electrolytic refinery. The electrolytic plant has 550 lead cathodes and 550 lead anodes, 22x33" each, giving a plating surface of 5,000 sq. ft., for the deposition of

electrolytic copper. Plant also includes tanks for precipitation of metal on scrap iron. Reduction plant proved unsatisfactory after making about 50 tons fine copper. Letters neither answered nor returned. Unfavorably regarded.

INTERMOUNTAIN COPPER MINING CO.

MONTANA

Wallace, Ida. Mine office: Iron Mountain, Mont. **Officers:** Oscar Nordquist, pres.-mgr.; Edw. Evans, v. p.; H. M. Childs, treas.; with E. V. Lambert and G. W. Griffith, directors.; A. L. Nicholson, sec. **Inc. 1915** in Mont. to take over the holdings of the Amador Copper and Gold M. & M. Co. **Cap.**, \$2,000,000; shares \$1 par; assessable; 1,500,000 outstanding.

Property: 6 patented and 15 unpatented claims on Cedar Creek, 10 miles S. of Iron Mountain, Mont., shows a small shoot of fair grade copper-gold ore with calcite gangue, in black slate. Ore occurs irregularly and in small bunches.

Development: 700' vertical, 3-compartment shaft, with levels at 200', 460' and 700' and long drifts on each level. There are also 4 tunnels of 187', 512', 632' and 662'.

Equipment: includes a 2-mile flume and pipe line, delivering water under a 310' head, and steam power, with 2 hoists, compressor, pumps, saw-mill, and about 15 mine buildings. A 100-ton concentrator was constructed in 1915. Equipment is ahead of company's needs and property is not yet far enough developed to be a self-sustaining mine. Idle in 1915 but resumption of operations planned for 1916.

INTERNATIONAL COPPER & GOLD CO.

Letters returned, 1915, marked "Out of business," from 1207 Fort Dearborn Bldg., Chicago, Ill. See Vol. XI, Copper Handbook.

INTERNATIONAL COPPER & MINING CO.

ARIZONA

Office: 57 W. 109th St., Chicago, Ill. **Mine office:** Mayer, Ariz. **Officers:** Roy A. Hillstrom, pres.-treas.; John Slak, v. p., sec. and mgr. **Inc. Feb. 1, 1916**, in Ariz. **Cap.**, \$1,500,000; shares \$1 par. Annual meeting Feb. 15th.

Property: 12 patented claims, 200 acres, in Black Canyon mining district, Yavapai county, shows fissure veins in lime-porphyr-schist formation. The main orebody has N. S. strike and dips 10° from vertical. Average assays reported to run 6% copper, \$5 gold, \$3 silver per ton. **Development:** by incline shaft and 3 short tunnels.

Equipment: includes 25-h. p. gasoline hoist and 10x10' Ingersoll compressor. Management plans sinking to 500' depth and crosscutting every 100'.

INTERNATIONAL COPPER ORE CORPORATION.

MEXICO

Office: 424 Scarritt Bldg., Kansas City, Mo. A. M. Conard, pres., Nogales, Ariz., at last accounts; his record is enough to discourage any ordinary investor. **Mine office:** Noria, Sonora, Mex. Is the Mexican operating corporation of the Sonora Copper Smelting Co.

INTERNATIONAL GOLD & COPPER MINING CO.

MEXICO

Idle. **Mine office:** Guaynopa, Chihuahua, Mex. J. C. Peterson, pres. Company took over lands formerly held by International Cons. Smelting & Mining Co., known as the Utah mine, in Guaynopa canyon. Claimed by former owners to have a 90' vein, with an 8 to 12" pay streak carrying high-grade chalcopryrite, assaying 5 to 8% copper, with good silver values. Mine has several short tunnels. Idle on account of revolution, but regarded unfavorably for other reasons. No recent returns secured.

INTERNATIONAL LEAD REFINING CO.

INDIANA

East Chicago, Ind. Is a subsidiary of the International Smelting Co., and described thereunder.

INTERNATIONAL & INTERCONTINENTAL**MNG. & REF. CO.****UTAH AND NEVADA**

Office: 60 Wall St., New York City. **Officers:** Raoul Madero, pres.; Wm. W. Wilson, v. p.; D. T. Gately, sec.-treas.; with C. C. Graham, A. W. Middleton, Antonio G. Garializo and Wm. H. Hull, directors; Edward M. Bement, treas.

Inc. Feb. 26, 1916. in Del. **Cap.,** \$3,000,000; shares \$5 par; outstanding, 537,500 shares; 62,500 reserved for conversion of bonds. Stocks transferred at company's office. Metropolitan Trust Co., New York, registrar. Listed on New York Curb.

Bonds: \$125,000 ten-year, 8% convertible debenture coupon, dated March 1, 1916, due March 1, 1926. Int. payable quarterly, March, June, Sept. and Dec. 1. Company is a holding company, the Uvada Copper Co. being the operating company.

Balance sheet of March 24, 1916, shows assets of \$3,124,671, which includes: accounts receivable, due from Cons. Calif.-Nev. Co. stockholders and claims against Cons. Calif.-Nev. Co., \$29,082; contract rights, \$1,617,835 (under contract International is entitled to receive 304,757 shares out of 600,000 shares outstanding of the Uvada Copper Co. stock); investment in capital stock of the Cons. Calif.-Nev. Co., \$1,476,215; cash, \$723; organization expense, \$816. Liabilities include: contract liability, \$84,545; notes payable, \$6,560; debenture bond cfts., issued and reserved, \$33,566.

Reported in March, 1916, that "Negotiations are now pending with Francesco Madero for the purchase by this corporation of certain mining properties belonging to the former in Mexico."

INTERNATIONAL METALS SELLING CO.**UNITED STATES**

Is a subsidiary of the U. S. Smelting, Refining & Mining Co. and managed by Vogelstein & Co., 42 Broadway, New York.

INTERNATIONAL MINES DEVELOPMENT CO.**MEXICO**

Main office: 523 Los Angeles Investment Bldg., Los Angeles, Calif. **Eastern office:** Room 1506, 20 Broad St., New York. **Officers:** Max Muller, pres.; P. Schabarum, v. p.; Frank Turner, sec.-treas.; above, with August Freese, Geo. Grunig, H. J. Wendler, Jas. M. Satterfield, directors. **Cap.,** \$3,000,000; shares \$1 par; \$2,000,000 issued. U. S. Corporation Co., New York, registrar and transfer agent. Stock listed on New York Curb.

Property: the Santa Rita, Santa Gertrudis, Santa Ana and El Carmen mines, in Sonora, Mexico, about 200 miles from Bisbee, Ariz. Company also reported to have a 5-year option on the Ash Peak mine near Clifton, Arizona. The Mexican properties have been small silver-gold producers in the past, but have not been developed and owing to revolutionary conditions will probably remain undeveloped for some time to come. A George Graham Rice promotion.

INTERNATIONAL MINING CO.**ARIZONA**

Owns a group of claims about 2 miles from Ray, Pinal county, showing a 15" streak of chalcopryite, claimed to run \$78 per ton in copper and silver.

INTERNATIONAL MINING CO.**MONTANA**

Bozeman, Gallatin Co., Mont. **Officers:** J. W. Wilcox, pres.; S. J. V. B. Henderson, v. p. and treas.; Samuel F. Walker, sec. and gen. mgr.; preceding officers, Harvey M. Farriss and A. Badgley, directors, all of Bozeman, Mont. **Inc. Oct. 2, 1902,** in Montana. **Cap.,** \$600,000; shares \$100 par, fully paid and nonassessable.

Property: 12 claims, 240 acres, well timbered, in Springhill mining district, Gallatin county, Mont., said to show gneiss, quartzite and shale.

fissure and contact veins, opened by 380 to 1,800' tunnels and 5 shafts of 80 to 800', showing sulphide ores.

Company developing an ore shoot, at last accounts, said to carry 26% lead, 8 oz. silver and \$8 to \$67 gold per ton. The Lone Star group adjoining the International is practically under the same ownership. Letters neither answered nor returned, so it is safe to say company's affairs are not prosperous.

INTERNATIONAL NICKEL CO. UNITED STATES & CANADA

General office: Constable Hook, Bayonne, N. J. **Executive office:** 43 Exchange Place, New York. **Officers:** Ambrose Monell, pres.; R. M. Thompson, chairman of board; E. F. Wood, 1st v. p.; J. R. De Lamar, 2nd v. p.; J. L. Ashley, sec.-treas.; W. N. Cromwell, A. Jaretzki, D. Coulson, W. E. Corey, S. H. P. Pell, E. C. Converse, Wm. T. Graham, W. A. Bostwick, W. H. Brownson and S. Prosser, directors.

Inc. Sept., 1912, succeeding International Nickel Co. and Colonial Nickel Co., the former absorbing the Canadian Copper Co., which owns the great nickel-copper mines and smelters of Sudbury, Canada.

Cap., \$8,912,600, 6% non-cumulative preferred stock, \$100 par, and \$41,834,600 common stock, \$25 par.

Stock is listed on the New York Stock Exchange. Bankers Trust Co., New York, transfer agent. New York Trust Co., New York, registrar.

Comparative Statements of Income Account and Balance Sheets years ending March 31:

Total	\$57,758,671	\$55,195,300	\$53,941,207	\$54,140,707

The net quick assets, or excess of current assets over current liabilities, amounted to \$11,745,766 on December 31, 1915, as compared with \$8,347,827 on March 31, 1915, \$7,384,563 on March 31, 1914, and \$7,195,608 on March 31, 1913.

Dividends-Earnings: regular dividends of 6% have been paid upon preferred stock since 1906, and varying rates have been paid on common since 1909. Stockholders received 10½% in 1913, 10% in 1914, 10% stock and 17½% cash in 1915; in 1916, 8%, paid June 1. Present rate is 20% per annum, payable quarterly, M. J. S. and D. 1. Since the expansion in 1912, the International Nickel Co.'s earnings have averaged about 12% yearly for its common shares. Actual percentages are 11.79% for year ending March 31, 1913; 11.2% in 1914, 13.32% in 1915. Allowing for 6% preferred dividends, this would be equivalent to about 27% on stock outstanding. The large increase in earnings does not seem to be entirely due to war conditions.

The copper-nickel properties consist of mines with an estimated developed reserve of 20,000,000 tons, smelting plants at Copper Cliff, Canada, handling 3,500 tons daily, separating and refining plants at Constable Hook and Camden, N. J. Company also absorbed the Orford Co., Anglo-American Iron Co., Vermillion Mining Co., American Nickel Works, Nickel Corporation of Great Britain, and the Société Minière Calédonienne.

Production: company is said to control the world's production of nickel, which is 60,000,000 to 70,000,000 lbs. per year, selling usually at 40 to 50 cts. per lb. It also produces about 35,000,000 lbs. copper annually, and 1915-16 profits from this source are larger than normal though the price of nickel has remained practically stationary. War requirements for nickel have been less of a factor than generally supposed, the big expansion having taken place in developing new uses for the metal. Company has adopted policy of increasing earnings through development of new uses for the product. When the war is over International Nickel ought to retain most, if not all of its present large earning power. Is planning erection of another refining plant in Canada.

Company's mines are described under Canadian Copper Co.

INTERNATIONAL SMELTING CO.

Office: 42 Broadway, New York. **Officers:** Cornelius F. Kelly, pres.; Wm. D. Thornton, 1st v. p.; Dennis Sheedy, 2nd v. p.; Albert H. Melin, treas.; with Chas. H. Sabin, Benj. B. Thayer, and John D. Ryan, directors. David B. Hennessy, sec. J. B. Whitehill, ore purchasing agent. Inc. in Montana. **Cap.,** \$15,000,000. Stock entirely owned by Anaconda Copper Mining Co. Company is a reorganization of the International Sm. & Ref. Co.

Company operates smelters at Tooele, Utah and Miami, Ariz., the Raritarn Copper Works at Perth Amboy, N. J., and the smelter of the International Lead Refining Co., at East Chicago, Ind.

MIAMI SMELTER

The Miami smelting plant, Miami, Ariz., C. E. Mills, gen. mgr.; L. R. Wallace, supt, built primarily to smelt the concentrates produced by the mills of the Inspiration Cons. Copper Co. and the Miami Copper Co., is equipped to handle custom ores. The plant is situated about a mile E. of Miami and 6 miles W. of Globe, on the Inspiration Co.'s Industrial Ry., connecting with the Arizona Eastern R. R. at Miami.

The smelter is essentially a reverberatory plant, which on account of the high copper content of the concentrates treated has been built to minimize losses in the handling of material from one department to another, and the prevention of dust losses, as far as possible.

Material from both Miami and Inspiration mills is largely flotation concentrate hauled to the smelting plant in 60-ton steel cars especially designed to handle sticky fine material of this nature.

Bins: concentrates are first bedded in three 3,000-ton V-bottom bins with the necessary limerock, pyrite, first-class ore and secondaries to give a proper smelting mixture. First-class ore goes to receiving bins with capacity of 1,350 tons.

Crushing and Sampling Plant: 22'x40', 5-stories high, contains: 1 18"x30" Blake crusher; 1 set 54"x16" rolls; 3 sets 42"x16" rolls; 1 16" Snyder sampler; 3 27" Snyder samplers; 2 24"x8" rolls.

Steel storage bins of 1,500 tons capacity are provided for the storage of crushed ore and fluxing material.

Roaster and Dryer Plant: 67'x97 and 93' high, contains 5 Wedge roasting furnaces, 22'6" in diam., each having 5 regular hearths and a dryer hearth. Oil burners operating in combustion chambers supply the heat for drying. No roasting is permitted, as the sulphur content of the concentrates is so low that it is necessary to add pyrite to keep matte down to a proper grade.

Each furnace is fed from a 190-ton storage bin directly over it. The gases pass directly to a header flue, and then into Cottrell treaters located above the charge floor. The Cottrell treaters in this plant practically prevent the loss of any flue dust.

Reverberatory Plant: the reverberatory building, 134'x176', contains 3 reverberatory furnaces with hearth areas of 21'x120'. The furnaces are oil fired and discharge their gases through Stirling boilers, according to the usual practice. There are seven 712-h. p. waste heat Stirling boilers.

Converter Plant: is 58'x380'x49' to the top of crane rail. Two 40-ton, maget switch controlled electric traveling cranes are provided.

The plant contains 5 converter stands of 12' electrically operated Great Falls type converters; 2 straight line casting machines with 56"x16'6" tilting furnaces, 1 skullbreaker, etc. Silica bins filled by belt conveyors discharge into weighing hoppers, which measure out a pre-determined charge, delivering it directly into the mouth of the converter through pivoted spout.

The gases from the converters are passed through Cottrell treaters, before being discharged into the chimney, which give a high recovery of the precious metal values contained in the gases.

Power Plant: at the smelting works is operated by the Inspiration Co., the smelting plant selling its steam to, and purchasing its power from the Inspiration company. The power plant buildings are of steel and reinforced concrete construction throughout. The main units consist of three 6,000-k. w. Turbo-Generators and 3 cross compound, 15,000 cu. ft. blowing engines, switchboard, etc. Modern auxiliary apparatus is provided for condensing, automatically measuring steam and feed water, recording temperatures, pressures, etc. The boiler house contains six 712-h. p. oil fired Stirling boilers equipped with superheater and economizer.

The plant operates at very high economy.

Shops, Offices, Etc.: a steel shop building, equipped with traveling crane, is divided into four departments, viz., machine, blacksmith, boiler, electrical and carpenter shops, all well equipped with modern tools.

The warehouse building and general office and laboratory buildings are of reinforced concrete throughout and there are 8 reinforced concrete cottages at the smelting plant for its staff. Water for the plant is obtained from the Inspiration Co.'s water main.

On account of the high copper contents of the concentrates which the plant receives, it has a production capacity of 16,000,000 lbs. of copper per month, with spare reverberatory furnace and converter stand.

The plant commenced operations May 21, 1915; in remainder of year treated 70,304 tons concentrates and 17,104 tons purchased ores. **Production:** 51,769,669 lbs. fine copper; 70,000 oz. silver, and 822 oz. gold.

TOOELE SMELTER

Tooele Smelter: Wm. Wraith, gen. mgr., Kearns Blk., Salt Lake City, Utah. The smelter is $6\frac{1}{2}$ miles from Tooele Junction on the main line of the San Pedro, Los Angeles & Salt Lake railroad, where connection is made with the Tooele Valley railroad, and plants and yards cover one-half square mile.

Crushing and sampling 5-story building, 2 complete sections using the Brunton **system** of sampling, contains 8 Blake type crushers, 9 to 12"x15 to 24" in size and 8 rolls, 12 to 15" wide and 26", 42" and 48" diameter. Each sampling section contains 4 Brunton sample cutters. In the copper plant ore is crushed to $\frac{3}{8}$ ", conveyed from sample mill to roaster storage bins (5,000 tons capacity) by belt conveyor, thence to roaster feed hoppers by belt conveyor.

Copper Department: The McDougall roaster building contains 2 sections, each 64x162' and holding 32 furnaces. These furnaces are 16' in diameter, 18' high and have 6 hearths. Roaster gases pass through a 120x140' hopper bottomed brick dust chamber 30' high above hoppers, containing two 4' banks of wires; thence through brick flue 255' long to stack. The brick stack is 350' high and 25' inside diameter at the top. The reverberatory plant receives the calcine by electric tram system. It contains 5 coal-fired furnaces. Anaconda type, 1 with 19'x90' hearth, 4 with 19'x102' hearths. Each furnace is equipped with 750-h. p. waste-heat Stirling boiler. Gases go through a brick flue 1,360' long to stack.

The converter plant has 5 electric-driven stands for 96x150" shells and a 60-ton crane. Converter shells are lined with magnesite brick. Copper is cast in steel moulds by 30-ton crane. Slag is cast in beds and broken up and sent to the lead blast furnaces. Gases from plant go through a steel flue to a 50x126' brick bag house containing 960 31x1'6" woolen bags. From the bag house the gas is discharged through a 150' stack 15' in diameter at the top.

The power house contains 2 Corliss engines direct-connected to 250-k. w. 500-vdc. generators; 2 vertical triple-expansion engines direct-connected to 750-kva. 2,200-v. generators; 2 converter blowing engines, 15 lbs. air; 1 steam-driven 90-lb. air compressor; 1 electric-driven 90-lb. air compressor; 2 No. 10 Roots blowers, direct-connected to tandem compound Corliss engines; one 750-k. w. Westinghouse-Parsons turbo-generator; and 2 Leblanc condensers and necessary auxiliaries. Condensing water is cooled in natural draft cooling tower. In addition to the waste-heat boilers, there are 3 hand-fired 350-h. p. Stirling boilers.

Lead Department: The lead plant contains blast furnaces, sinter plant and charge bins. There are 26 double steel bins with a capacity of 10,000 tons of ore and concentrate, receiving material from the crushing plant by belt conveyor. Fine concentrates and ores already sampled can be dumped direct. Charges for blast furnaces and sinter machines are weighed in scale hoppers and dropped into charge cars, going direct to furnaces, but sinter charges go by car to a hopper-feeding belt conveyor delivering to sintering machines.

The sinter plant contains 10 Dwight-Lloyd machines, 42x264" 

capacity 100 tons per day per machine. Sinter from machines goes to blast-furnace charge bins by standard railway cars.

The blast-furnace plant is a steel and concrete building with two 45x180" and two 60x180" furnaces whose daily capacity averages 250 tons of charge. Gases pass to brick bag house containing 1,440 bags, lead to drossing plant and the lead-copper matte to the converter plant. A slag settling furnace is being erected. The drossing plant has four 30-ton kettles and uses a Howard press.

Tooele Valley railway has 7 miles of main line; 1 locomotive, 6-wheel switching type, 57 tons weight; 1 locomotive Mogul type, 60½ tons weight; 2 locomotives, Consolidation type, 96 tons; 30 steel hopper-bottom ore cars; 3 flat cars and 4 passenger coaches.

This plant has a fully-equipped assay office and laboratory, shops, weather observation department, emergency hospital, offices, etc.

Industrial equipment consists of four 18-ton and four 12-ton electric locomotives, with necessary slag trucks, matte trucks, calcine and coal cars. All buildings are of steel and concrete construction.

The smelting practice of copper ores largely follows Anaconda methods. The sulphide fines are roasted with a certain amount of silicious ore added upon the fifth hearth of the roasters to heat the ore and keep the temperature at the right point. The ore is roasted down to .7% sulphur corresponding to a matte fall of 15 to 18 tons per day. The reverberatory slag, carrying 40 to 42% silica, is tapped at the back of the furnace and the matte, carrying 20 to 30% copper, conveyed in ladles to the converters. The converters, when operated only on day shift, are kept hot over night by filling them with cinders from the reverberatory furnaces. Silica is applied to the converter in lump ore, 2 boats to each 8-ton charge. The bag-house dust from the smelter fumes is removed by reversing the fan and direction of current, drawing the dust into the chamber beneath.

The completion of the Utah Metal Mining Co.'s 11,000' tunnel in 1913, gives direct connection with the Bingham mines. In 1915 the plant treated 270,374 tons copper ore, 395,574 tons lead ore. **Production:** 14,271,174 lbs. fine copper, 113,002,657 lbs. lead, 5,090,157 oz. silver, and 48,020 oz. gold.

RARITAN COPPER WORKS

The Raritan Copper Works: E. C. Clark, supt., Perth Amboy, N. J., is on New York harbor. Completed 1899, and since enlarged repeatedly, it is one of the largest and most modern electrolytic copper refineries in the world.

The smelting department consists of one 200-ton, one 150-ton and one 100-ton furnaces for casting anodes, and two 225-ton, one 150-ton and two 100-ton furnaces for casting wire bars, ingots and cakes.

The electrolytic refinery includes 2 tank houses with their respective power houses; power consumption being about 7,000 k. w. The department has special shears for trimming cathode sheets and Morrow loop machines for attaching copper lugs to the cathode starting-sheets.

The tank house No. 1 has 1,800 tanks and a capacity of 22,000,000 lbs. per month. The general arrangement and method of operation is very similar to that in No. 2 tank room. This room is 210x582'.

No. 1 power house, which furnishes power for No. 1 tank room, contains four 1,000-k. w. Nordberg triple-expansion Corliss engines and Allis-Chalmers barometric condensers. The engines are direct-connected to 1,000-k. w. electric generators, 2 being furnished by the General Electric Co. and 2 by the Crocker-Wheeler Co.

No. 2 tank house has 3 bays running lengthwise, with two 10-ton 3-motor Whiting cranes in each bay, equipped with special devices for hand-

ling an entire tankful of anodes or cathodes at 1 load. There are 3 electric circuits running lengthwise, 1 in each bay, each circuit of 396 tanks being handled from the power house by an electric generator. Current is 7,500 amperes, giving a current density of 20 amperes per sq. ft. The main conductor has a cross-sectional area of $12\frac{3}{4}$ ". There are 1,188 depositing tanks arranged in 108 nests of 11 cells each, with electrode arrangement on the Walker system.

In 1915 the plant treated 162,282 tons copper bullion, and 719,343 oz. silver bullion. **Production:** 323,850,718 lbs. fine copper; 16,025,993 oz. silver, and 174,408 oz. gold.

INTERNATIONAL LEAD REFINING CO.

The International Lead Refining Co.: Wm. Wraith, gen. mgr., G. P. Hulst, supt., a subsidiary company, with an extensive plant located at 151st St. and McCook Ave., East Chicago, Ind., has 64 acres of ground. Construction work started April 20, 1912, and plant was in operation Oct. 3, 1912. Plant comprises main refinery building, all steel and concrete, with 3 standard-gauge tracks entering the building. There are 2 crane runways running the full length of the building, with 3 traveling cranes. A men's change house, of brick, is equipped with toilets, shower baths, steel lockers, and 1 room equipped as a dining room. Bag house is constructed of brick and concrete, divided into 4 compartments of 144 bags, 30'x18".

Equipment: consists of one 12,000-ton battery Parkes process, two 300-ton softeners, four 60-ton desilverizing kettles, one 300-ton refining furnace, and one 200-ton molding furnace. The bullion comes in on a high track, is charged into furnace with charging machine and flows by gravity through the plant. Lead is hand-molded and trucked into cars. Sampling is done in two 40-ton kettles and bullion pumped into softeners with centrifugal pump. Residues are worked up in three 30-ton reverberatory furnaces. There are two 40-ton blast furnaces, 1 for antimonial slag, and 1 for by-products and ores; 8 retort furnaces for treating zinc skim and two 5-ton cupels for treating high-grade retort metal.

Common lead is double refined by crystallization in kettles in the corroding lead plant. Refining plant is in complete operation. All furnace gases except softeners and retorts are drawn through a sheet flue 700' long and passed through the bag house.

Power is supplied by the Northern Indiana Gas & Electric Co. Two waste-heat boilers supply steam for compressors and refinery. High-pressure air is supplied by centrifugal air compressor and air for blast furnaces is supplied by a Connersville blower. A 50,000-gal. tank elevated 50', and 100,000-gal. sump tank, waste running back into sump tank and pumped into the 50,000-gal tank, the elevated tank being connected with the East Chicago Water Co.'s mains. Oil storage capacity, two 12,000-gal oil tanks.

The International is not burdened by old smelteries acquired at exorbitant prices, but has new and up-to-date plants, capable of handling ore as cheap, if not cheaper, than any of its competitors and is a big factor in the mining world. It is in strong and competent hands, both technical and financial, and its profitable operation is assured.

In 1915 the plant treated 55,376 tons of lead bullion from Tooele, and 2,266 tons foreign ore. **Production:** 103,121,355 lbs. common and corroding lead; 9,164,073 lbs. antimonial lead; 4,031,610 oz. silver, and 18,136 oz. gold.

INTERNATIONAL SMELTING AND REFINING CO.

Properties and assets: purchased 1914 by Anaconda Copper Mng. Co. for \$10,392,709. Company dissolved and properties transferred to In-

ternational Smelting Co. Properties described thereunder. Entire stock issue owned by Anaconda Copper Mng. Co.

All stock exchanged for that of Anaconda Copper Mng. Co. stock, 1914, on the basis of 3.3 shares Anaconda for 1 International. Shareholders who did not exchange their stock received at the rate of \$103.92 a share, plus quarterly dividend of \$2.

INTERNATIONAL TUNGSTEN CORPORATION. ARIZONA

Office: 52 Broadway, New York. **Officers:** Hiram Whitcomb, pres.; W. C. Taylor, v. p.; J. Ralph Bloomer, v. p.-sec.; Richard Lounsbury, treas.; with Thos. A. Doe, Chas. Stillman and Wm. M. Clark, directors; Reginald Ronalds, asst. treas.

Inc. June 16, 1916, in Virginia. **Cap.**, \$10,000,000; shares \$10 par. Company acquired entire capital stock of the Emery-Whitcomb Tungsten Co. and the National Tungsten Co., both inc. in Arizona.

Property: 8 patented claims, 143 acres, and 18 unpatented claims, 350 acres, all contiguous, in the Arivaca mining district, Pima Co., 65 miles S. W. of Tucson and 23 miles from Amada on the So. Pac. R. R. Claims are said to cover an area of granite, rhyolite and diorite, the latter with quartz-filled fissures containing tungsten ore. Two of the veins are said to traverse the property for over 10,000' with widths ranging from 2½' to 12'; one ore-shoot claimed to be 12' wide, 175' long and containing 1% tungstic oxide, WO₃.

Development: mainly by tunnels, longest 500', with several shafts, deepest 156', which is said to be sunk on a 30' vein that traverses the property for a mile; 15' of this vein is said to contain rich tungsten ore; the balance, 2½% copper sulphide ore, "which taken together constitute a mammoth mine." Ore reserves are undoubtedly greatly over-estimated.

Equipment: includes a hoist, compressor and a 7½-ton auto truck for delivering ore to the mill. The 10-stamp mill has three 50-h. p. gas engines, Blake crusher, gyratory crusher, 8 Wilfley tables, Johnson vanner and 2 small air compressors.

Production: during May and June, 1916, said to have been 20 tons monthly. Early in July an engine suffered a breakdown and nothing has been produced since. Management states that production will start when repairs are made.

INTERSTATE SILVER-LEAD MINING CO.

IDAHO

See Cons. Interstate-Callahan Mng. Co.

INYO COPPER MINES CORPORATION.

CALIFORNIA

Office: 215 Balboa Bldg., San Francisco, Cal. **Mine address:** Keeler, Inyo Co., Cal. R. G. Paddock, pres. and gen. mgr.; F. J. O'Dea, sec. **Inc.** Nov. 19, 1910, in California. **Cap.**, \$1,000,000, shares \$1 par, assessable; issued, 550,000.

Company is a reorganization of the Inyo Copper Mines & Smelters Co. The president stated that it is free of debt but waiting for better financial conditions before attempting to raise money and only a small amount of work was being done.

Property: 19 claims in Ubehebe district, covering a contact zone between limestone and granite porphyry. For a mile this contact is said to show places where there is 1 to 20' of ore carrying 8 to 40% copper. The steep mountain side permits development by tunnel and future work will be of this character. **Development:** amounting to 650', includes 6 shallow prospect shafts and as many short tunnels, the longest 120', together with 100' of trenching. Ores carry appreciable values in gold and silver, as well as copper.

INYO GOLD MINING CO.

CALIFORNIA

Cap., \$1,000,000; shares \$1 par; assessable. Stock listed on Salt Lake Exchange. **Property:** 17 claims, patented, at Elko, Inyo county, Calif., developed by 350' of shafts, 700' of tunnels and 75' of crosscuts. Company officials estimate \$650,000 worth of gold-silver ore in sight.

IOWA COPPER MINING CO.

UTAH

Property: on Scott hill, which is the divide between Park City and the Big Cottonwood district, is developed by a 300' tunnel, showing several rich stringers; an 1,100' tunnel develops a fissure vein carrying silver, lead and copper ores, latter of good grade. Mine is quite wet, causing some trouble in operation. Hopes to cut big fissure that carries good ore in Barry Coxo ground. Is generally regarded as a silver mine, copper occurring in small quantities only. W. D. Lewis, Dave Scott and others of Park City, Utah, said to have taken a lease and bond on property, 1914.

IOWA MONTANA DEVELOPMENT CO.

MONTANA

Address: Fraser, Iowa. **Mine address:** Jefferson Island, Madison Co., Mont. **Officers:** T. J. McGinnis, pres.; F. H. Hoeffner, sec.; E. H. Daniels, treas.; all of Fraser, Iowa, and John Young, J. D. Morrison, F. Wood, directors. J. D. Morrison, mgr., Butte, Mont.

Inc. June, 1915, in Iowa. **Cap.**, \$75,000; shares \$50 par. Is a leasing company. Company obtained a 3-year lease, taking possession June 1, 1915, on the Bismark mine of the Montana-Illinois Copper Mining Co., which see for description.

IOWA TIGER MINING CO.

COLORADO

Property at Silverton, San Juan county, is operated by the Melville Leasing Co. and several sets of independent lessees.

IRON BLOSSOM CONSOLIDATED MINING CO.

UTAH

Officers: W. Lester Mangum, sec.-treas., 11 Knight Blk., Provo, Utah. Jesse Knight, pres.; J. Wm. Knight, v. p.-gen. mgr.; preceding, with R. E. Allen and A. M. Knight, directors. H. V. Birch, asst. mgr.; Chas. Zabriskie, supt.

Inc. Nov. 7, 1899, in Utah. **Cap.**, 1,000,000 shares, 10 cts. par; assessable; all outstanding. **Dividends:** to March, 1916, \$2.55 per share; \$300,000 paid in 1915. Balance sheet of Dec. 31, 1915, showed receipts: \$770,980; \$557,184 from ore sales, with a cash balance on hand of \$340,000, April 1, 1916.

Property: 15 claims, patented, 147.75 acres in the Tintic mining district, Juab Co., Utah. The Iron Blossom mine is in limestone cut by a large fissure on which the orebodies are aligned. **Development:** property is opened to a depth of 1,900' and is mining a very large orebody of silver-lead ore. In Oct., 1915, high-grade copper ore, carrying silver, was opened in a winze on the 900' level and a large tonnage of this ore is expected to run 10%. A crosscut 80' from the winze on the 1,000' level, mostly in vein matter, carried 20' of copper ore, assaying from 9-16%. A drift is being driven on the 1,700' to connect with the winze. Diamond drilling for 1,300' on the 1,900' level failed to disclose anything of value.

Mine had 52,442' of underground workings, March, 1916, of which 5,293' was done in 1915.

Production: in 1914 was 41,082 tons of ore, averaging 25 oz. silver, 9% lead, 0.2% copper and 0.14 oz. gold, netting \$306,150, and in 1915 was 16,548 tons, averaging 25-31 oz. silver, 2-8% lead and 1% copper, netting from \$9 to \$13.52 per ton. Costs were \$5.36 in 1914 and from \$8-\$9 per ton in 1915.

Property good, but ore shoots erratic, and while it is impossible to

say where next year's ore supply will come from, past experience indicates that the company will keep up its record for several years.

IRON CAP COPPER CO.

ARIZONA

Office: 50 Congress St., Boston, Mass. Mine at Copper Hill, Gila Co., Ariz. **Officers:** Frank P. Knight, pres.; J. Judson Dean, Andover, Mass., v. p.; Jas. F. Lockwood, sec.-treas.; F. A. Woodward, supt.; preceding and Alvin T. Baldwin, directors.

Inc. Feb. 7, 1911, in Maine. **Cap.**, \$2,000,000; shares \$10 par, fully paid and nonassessable; 50,000 preferred and 150,000 common; issued, 35,985 preferred, 100,225 common. First quarterly dividend, $1\frac{3}{4}\%$ on pfd. shares, declared Dec., 1915.

Bonds: \$50,000 7% authorized and \$37,015 issued. Federal Trust Co., registrar; Exchange Trust Co., transfer agent. Stock listed on Boston curb. Annual meeting first Tuesday in January.

Is practically a reorganization of the National Mining Exploration Co., buying its property under foreclosure sale, May 25, 1911. To provide money for development purposes, the company offered 30,000 shares of common stock in July, 1915, 21,560 being subscribed for. Company reports Dec. 31, 1915, cash and accounts receivable, \$175,109; gross earnings 1914-1915 were \$216,463 (ore sales \$167,949), with operating expenses for same period of \$81,715, exclusive of a 5% depreciation charge. Net earnings for 1915 were \$102,370. No debts except outstanding bonds.

Property: 2 groups, the Iron Cap at Globe, and the Fumarole group in Graham county, Ariz. The Iron Cap group, 21 claims, 16 patented, 193 acres, 5 surveyed for patent, lies immediately W. of the Arizona Commercial holdings and next to the Old Dominion property at Globe, Ariz. The claims show shale and quartzite cut by diorite in depth and traversed by a fissure vein running N. E. and S. W. and dipping at 70°.

Development: by the William shaft, 881' deep, with levels at 660', 765' and 868'. The vein has been developed to a depth of 765' and for a length, on the 2 upper levels, of 600'. A crosscut is being driven to the vein on the 9th level. Another shaft, the Iron Cap, 600' deep, idle for several years, is being enlarged preparatory to sinking. Total extent of underground workings, 6,400'.

The Fumarole group, 7 patented claims in the Lone Star mining district, 9 miles N. E. of Safford, Graham county, Ariz., is supposed to contain gold ores in a volcanic neck, but has thus far been unremunerative, though the former company spent \$125,000 on the Fumarole mine and opened up a little low-grade ore on the 500' level. The Fumarole shaft, 570' deep, has been idle since Dec., 1909. The mine has 2,000' drifts and crosscuts on the 200', 500' and 700' levels.

Equipment: includes a new Wellman-Seaver-Morgan double-drum hoist, capable of hoisting from 1,500' depth. Employs 60 men.

During 1915 the average grade of ore shipped contained 10.37% copper and 6.71 oz. silver, with a net output of 1,209,767 lbs. copper at a cost of 9.687 cts., including selling commission. Average price received for copper was 18.15 cts. per lb. Shipments are made to El Paso, Texas. No shipments were made between Nov. 1, 1914, and April, 1915, when the mine was closed on account of low price of copper.

Development work planned for 1916 includes the opening of the 9th level and sinking the Williams and Iron Cap shafts to 1,000' depth.

IRON DIKE MINE

NEVADA

Address: care W. R. Smith, Mina, Nev. **Property:** 10 claims in Gold Range mining district, Mineral county, about 5 miles from Mina, shows

fissure veins in lime-porphry formation. A tunnel, 1,016' long, Jan. 1, 1916, is expected to tap the vein at 417' vertical depth.

IRON DYKE COPPER CO.**OREGON**

Mine near Homestead, Baker Co., Ore. **Officers:** C. N. Conrad, pres.; H. G. Fink, v. p.; A. A. Clauss, sec.; F. F. Curtze, treas.; preceding, with Geo. R. Metcalf and Davenport Galbraith, directors. **Inc.** in Pennsylvania. **Cap.**, \$500,000; shares \$100 par. Erie Trust Co. holds title by trust deed and bond. Worked by Homestead-Iron Dyke Mines Co., Inc.

Property: a copper deposit discovered 1897, about 2,000' from railroad at Homestead. Lower tunnel, 300' above town, is about 1,300' long, cutting the orebody at 800' in and connected by raise with 3 tunnels above. The mine has several thousand feet of workings. The lower tunnel shows massive chalcopryrite and pyrite ore about 6' wide, said to extend upward to the upper tunnel. Ore said to contain \$2 to \$3 gold, 3 oz. silver and 5% copper per ton.

Shipments started in Sept., 1915, were at the rate of 100 tons daily in June, 1916. Ore is treated at Salt Lake City. **Production:** to June 1, 1916, approximately 2,000,000 lbs.

IRON KING MINE.**NEW MEXICO**

Oro Grande, Otero Co., N. M. James H. Parker, operating mine, 1916. **Property:** near Brice, shows fissure vein and replacement deposits of oxidized copper ores carrying gold and silver values.

IRON KING MINING CO.**UTAH**

Mine near Eureka, Juab Co., Utah. **Officers:** Col. C. Edw. Loose, pres.; Reed Smoot, v. p.; P. G. Peterson, sec., all of Provo, Utah. Property is in Tintic district and has not yet found a body of silver-lead ore. Assessments of 1 ct. a share have paid for development work. Mine has a 600' shaft and a 3,500' tunnel, planned to be driven 6,000' eventually. The mine is said to show 100,000 tons of iron ore blocked out and ready for stoping. Mine closed down March, 1912, owing to inability to market the iron ore at a profitable figure. No recent returns secured.

IRON MASK MINE.**BRITISH COLUMBIA**

Owned by Kamloops Copper Co., at Kamloops, Yale district, B. C.

IRON MASK MINING CO.**MONTANA**

Office: St. Maries, Idaho. Mine near Carter, Missoula Co., Mont. **Officers:** T. B. Huey, pres.; Leon Demers, v. p.; P. Martin, sec.-treas.; preceding, with F. Perrier, J. J. Bouchard, directors. **Inc.** May, 1908. **Cap.**, \$1,000,000; shares \$1 par; \$500,000 outstanding. Assessment No. 3 of 2 mills per share, levied June, 1913.

Property: 6 claims, well timbered and watered, 3 miles from a railroad, are said to show a 10' vein of concentrating ore, with an 18" vein of smelting ore. **Development:** by tunnel 1,700' long, with back of about 700', and 2,400' of drifting on the vein in the various tunnels. The workings show silver-lead ore of good average grade, with a small percentage of copper. **Equipment:** includes gasoline power and necessary mine buildings.

IRON MOUNTAIN COPPER CO.**CALIFORNIA**

Office: 301 First National Bank Bldg., Riverside, Cal. Mine near Blythe City, Riverside Co., Cal. **Officers:** Harwood Robbins, pres.; E. W. Tucker, v. p.; Holton Webb, sec.-treas. **Inc.** about July, 1911, in California. **Cap.**, \$10,000; shares \$1 par; issued, 5,000 shares.

Property: 35 claims, about 700 acres, known as the Crescent group, in Ironwood mining district, Riverside county, Cal., 26 miles S of Blythe

Junction on the Parker cut-off of the Santa Fe railroad. Claims show fissure veins in granite and porphyry, the main ledge being traceable 2 miles.

Development: includes 120' shaft with a level at 100' depth that is 70' long and shows high-grade copper ore containing visible gold. Ore shipments by former owners averaged \$100 per ton. Outcrop shows high-grade ore at several places. Mr. Robbins, who is said to have furnished all the money thus far, plans putting in a small smelter.

IRON MOUNTAIN TUNNEL CO.

MONTANA

Purchased in July, 1915, by Federal Mining and Smelting Co., which see.

IRON QUEEN MINING & SMELTING CO.

ARIZONA

Address: Wm. T. Read, 15 William St., New York City. Mines near Mayer, Yavapai Co., Ariz. **Directors:** F. W. Wood, Wm. T. Read, A. D. Barnhart, I. D. L. Williams and H. B. Bishop. **Cap.,** \$3,500,000; shares \$10 par. Company formed to take over, subject to a mortgage for \$130,000, the greater part of the former holdings of the George A. Treadwell Mining Co., sold at tax and foreclosure sales. The Boggs and Hackberry properties are not included, being bought by the Commercial Mining Co., controlled by Phelps, Dodge & Co. The organizers of the Iron Queen offered stock at 75 cts. a share to stockholders of the Treadwell Co.

Property: consists of Iron Queen group near Mayer, the narrow gauge railway, the smelter plant, 31 claims and interests in 3 others in the Verde mining district. The Iron Queen group was favorably reported upon by M. A. Finney, former manager of the Consolidated Arizona Smelting Co. (Humboldt smelter), who states that property is leached down to 300' level, has zinc ore between that and 400' level and has 6' pyritic ore carrying 3% copper, 38% iron and 38% sulphur below that and on the 500' level.

As the former Treadwell holdings are not considered as even decent prospects, the shares of the new company are considered unfavorably. Letters neither answered nor returned, 1915-16.

IRON SILVER MINING CO.

COLORADO

Offices: Room 1408, 40 Exchange Place, New York, and 615 Stevens Bldg., Detroit, Mich. Mine near Leadville, Lake Co., Colo. **Officers:** W. R. Cobb, pres.; Henry G. Stevens, v. p.; Homer A. Hoit, sec.; Fremont Woodruff, treas.; preceding, with Bruce G. Broad, R. H. Webber, Isaac J. Meyer, Eber W. Cottrell, H. C. DuVal, Samuel E. Reinhard and Chas. E. Hilton, trustees. Geo. O. Argall, gen. mgr.; Philip Argall & Sons, cons. engr.

Inc. March, 1880, in New York. Cap., \$10,000,000; shares \$20 par. Net earnings were \$267,034.64 in 1904; \$515,127 in 1906; \$65,366 in 1907; \$6,960 in 1908; \$183,121 in 1909; \$138,308 in 1910; \$187,639 in 1911; \$274,322 in 1912; \$123,927 in 1913; \$174,629 in 1914; \$184,199 in 1915. **Dividends:** \$400,000 in 1906; \$300,000 in 1907; none in 1908; \$50,000 in 1909; \$200,000 in 1910; \$100,000 in 1911; \$200,000 in 1912; \$200,000 in 1913; \$100,000 in 1914 and 1915, with total dividends, to Jan., 1916, \$5,050,000. Stock listed on N. Y. Consolidated Stock Exchange and the Detroit Exchange. Farmers Loan & Trust Co., New York, registrar. Annual meeting, first Tuesday in March.

In 1915 company mined 38,264 tons of ore which, after sorting, amounted to 34,217 tons, of a net value of \$387,214. Total income for year was \$418,620, and total expenses \$234,420. Balance sheet Dec. 31, 1915, showed cash surplus of \$398,528.

Company owns and operates the Moyer, Tucson and Blind Tom

mines. on Iron hill, about 2 miles E. of Leadville, and also controls, through stock ownership, the Nisi Prius Cons. Mining Co. and the New Marian Cons. Mining Co., which see. In 1915, company purchased an undivided 1/2 interest in the Proserpine and Cumberland lode mining claims, U. S. Survey No. 5214, which secured for the Iron Silver Co. a 5/8 interest in these claims, consisting of 9.9 acres, adjoining the company's property on the N. W.

The Moyer mine yielded 16,474 tons of ore in 1915, net value of \$224,351. The mine has over 2 miles of workings and contains large orebodies of very low-grade complex lead-zinc ore from which large tonnages have been extracted for several years past. The "East" orebody opened and stoped in 1912, 18' thick, 70' wide and 360' long, was completely exhausted in 1915, and ore production was secured from older workings, abandoned in former years because the ore was considered too low-grade to pay. Company averaged 13.05 cts. per lb. for spelter, as compared with 5.06 cts. in 1914.

In 1915, 1,828' of development work and 992' of diamond drilling was done, but failed to locate ore in commercial quantities. The North Moyer shaft is being deepened to 200' below the old workings. Main development is on the 3rd and 4th levels.

The Tucson mine yielded high-grade copper ore in 1911, from a lens of copper sulphide found in the Tucson fault between the 600' and 700' levels, but extensive prospect work has not revealed any other orebody and this lens is now practically worked out. An orebody opened in 1914, and developed for 120' between the 4th and 5th levels, is 80' wide, 16' thick and furnished the chief portion of the 1915 production. The bulk of ore mined in 1915 was a complex zinc-lead sulphide, not suitable for production of spelter, consisting mainly of a mixture of iron, zinc and lead sulphides, changing near the Tucson fault to copper-bearing iron pyrite with silver.

Development: in 1915, consisted of 2,130' of drifts and 858' of raises. A 3-compartment raise is being put up to connect with the intermediate level from the 5th level; when completed the ore shoot will be extensively developed.

Six leases were given on the upper workings of the Iron mine and lessees produced 2,190,112 lbs. zinc, 234,966 lbs. lead, 384,934 lbs. iron and 9,169.86 oz. silver. Company derived an income of \$17,901 from royalties and hoisting of lessees' ore. On the Blind Tom mine, 148' of drifting failed to disclose new deposits in the limestone underlying the main ore shoot and operations were confined to mining of a small zinc carbonate orebody. **Production:** was 499,805 lbs. iron, 145,275 lbs. zinc and 2,850 oz. silver. The total production of the mine for 1915 was 16,794 tons of a net value of \$154,805. The Tucson has a 1,200' aerial tram, of 12 tons hourly capacity, from the shaft to the railway siding, costing \$7,855, which has cut the cost of ore transportation from 60 cts. to about 12 cts. per ton.

Recent production: of the mines as a whole:

	Copper lbs.	Gold oz.	Silver oz.	Lead lbs.	Zinc lbs.	Iron lbs.
1915....	33,694	575.	136,674	4,205,616	16,674,848	2,957,235
1914....	12,751	923.1	327,976	10,608,734	17,396,362	5,247,433
1913....	7,230	509.	391,603	12,105,921	25,658,913	2,745,511
1912....	58,543	323.92	470,403	12,874,099	21,601,428	2,816,079

Property is well equipped and well managed.

IRONSIDE MINE.**MONTANA**

Address: care Dr. F. A. Ironsides, Butte, Mont. Mine near Whitehall, Jefferson Co., Mont., at head of Little Boulder river, 15 miles from Butte. Shows fissure vein in granite developed by adit tunnel opening a shoot of silver-copper-lead ore. Property has been equipped with a concentrator, including flotation equipment, and is shipping regularly.

IRONSIDES MINE.**CALIFORNIA**

Jas. Ironsides, owner. **Property:** 7 miles S. W. of Yreka, in Sec. 26, T. 45 N., R. 8 W., Greenhorn mining district, Siskiyou Co., Cal.; is slightly developed and is a small producer.

IROQUOIS COPPER CO.**NEVADA**

Goldfield, Nev. **Officers:** H. B. Lind, pres.-mgr.; J. M. Fenwich, sec., with M. A. Lind, directors. **Cap.,** \$12,000; shares \$1 par. All the stock is owned by the Nevada & Boston Copper Company, a Wyoming corporation.

Property: 10 unpatented claims, about 180 acres, in New York canyon, Sante Fe mining district, Mineral county, $4\frac{1}{2}$ miles E. of the S. P. R. R. and 7 miles S. E. of Luning. **Development:** by crosscut tunnels, said to show an orebody averaging 4% copper and \$2 silver per ton. Shipments commenced in 1914 and to date amount to about 2,000 tons of ore carrying from 5-12% copper. Mine being worked by lessees in 1916.

IRVINGTON SMELTING & REFINING CO.**NEW JERSEY.**

Address: Charles Engelhard, treas., 30 Church St., New York. Works at Irvington, N. J. **Officers:** W. L. Glorieux, pres.; C. O. Baker, v. p.; C. W. Baker, v. p.; Robert A. Knorre, sec. Property is an electrolytic smelter and refinery for gold, silver, platinum and copper ores.

ISABELLA COPPER MINING CO.**CALIFORNIA**

Directors: R. E. Rader, M. A. Fesler, Howard W. Williford, of Berkeley; E. J. Rader, Sacramento, and E. E. Rader, of Barzilla, San Mateo Co., Cal. **Inc.** 1911. **Cap.,** \$500,000. 100' tunnel was being driven, 1915.

ISABELLA MINES CO.**COLORADO**

Office: 203 Burns Bldg., Colorado Springs. **Officers:** Ira Harris, pres.; E. E. Quentin, v. p., with Horace G. Lunt, R. M. Carson, and John T. Hawkins, directors. Daniel Thatcher, sec.-treas.; Clark G. Mitchell, gen. mgr.-supt., Box 133, Independence, Colo. **Inc.** 1903 in Wyoming. **Cap.,** \$3,000,000; shares \$1 par; 2,528,291 outstanding. Stock listed on Colorado Springs Exchange. Colorado Title & Trust Co., registrar. Annual meeting 1st Monday in February at Cheyenne, Wyo. Balance sheet for year ending Dec. 31, 1915, showed assets: property \$2,966,589; cash \$36,393, accounts receivable \$24,450, and liabilities: \$109,701, with a surplus of \$85,993 at end of year. Receipts from ore sales were \$507,791; total receipts amounted to \$534,099, as against total expenditures of \$490,525, showing an operating profit of \$43,573.

Property: 116 claims, patented, in N. E. $\frac{1}{4}$ of Sec. 20 and N. W. $\frac{1}{4}$ of Sec. 21 on Bull Hill, Cripple Creek district, shows quartz veins in breccia carrying gold and some silver values. **Development:** by 2 main vertical shafts, the Lee, 1,274' and the Empire, 9,407'. During 1915, 17,289' of development work was done, as compared with 10,766' in 1914. Of this 1,509' was done by the company and 15,699 by lessees. Much work was done on the lower levels of the mine and a 3' vein of high-grade ore has recently been opened on the 1,275', or 15th level of the Lee shaft.

Equipment: includes a 100-ton concentrating mill, entirely remodeled in 1915, to use a cyanide process with sand leaching, pump, Parkison fur-Heine boiler, etc.

Recent production: has been as follows:

Years--	Tons Mine ore	Tons Dump ore	Total tonnage	Gross Value
1915.....	23,861	837	24,698	\$507,791
1914.....	15,706	2,040	17,746	345,819
1913.....	11,385	6,903	18,288	243,251

Total production to date estimated at \$8,000,000. Company is one of the oldest in the Cripple Creek district and is operated successfully along conservative lines.

ISLAND COPPER CO.

CALIFORNIA

Office: Security Bank Bldg., Oakland, Calif. Frank A. Leach, pres.; O. H. Wilcox, v. p.; E. R. Leach, mgr. **Property:** 4 patented mining claims and other property aggregating 265 acres, in the S. W. corner of Trinity county, within 500 yards of the Northwestern Pacific R. R., operating from San Francisco to Humboldt bay. The postoffice is Island Mountain, Trinity Co., Calif.

Ore: lenticular bodies of copper-iron sulphides occur in metamorphosed sedimentary rocks, outcropping at several places. Development is said to indicate that these various outcrops are part of one mass, whose estimated dimensions are 90 to 100' in width, 450' in length and a proven depth of from 60 to 145'. Ores are stated to carry 2½% copper, 1½ oz. silver and \$2 in gold per ton.

Development: by 4 tunnels and 4 shallow incline shafts with 1,100' of underground workings, is estimated to block out 275,000 tons of ore. Some of the workings are now caved. Jan., 1916, company reports having recently shipped 2,500 tons ore.

ISLAND COPPER CO.

MICHIGAN

Office: 1400 Alworth Bldg., Duluth, Minn. **Officers:** Thos. F. Cole, pres.; Geo. C. Stone, v. p.; Frederick W. Nichols, sec.; preceding, with F. W. Heimick, Oscar J. Larson, Henry Nolte, Geo. G. Barnum, Geo. A. Tomlinson and Julius H. Barnes, directors; Edw. J. Maney, treas. **Inc.** March 9, 1909, in Michigan. **Cap.**, \$1,000,000; shares \$25 par, \$6.00 paid; issued, \$678,375. Annual meeting, first Tuesday in June.

Property: on Isle Royale, over 92,000 acres out of the 125,000 acres comprising the island, includes the former holdings of the Isle Royale Land Corporation, Ltd., and the Island Mining Co. Idle. See Vol. XI, Copper Handbook.

ISLAND MOUNTAIN COPPER MINE.

CALIFORNIA

Owned by Island Copper Co., which see.

ISLE ROYALE COPPER CO.

MICHIGAN

Office: 12 Ashburton Place, Boston, Mass. **Mine office:** Houghton, Mich. **Officers:** E. V. R. Thayer, pres.; Jas. MacNaughton, gen. mgr.; Chas. O. Whitten, F. L. Whitcomb, E. C. Lewis, E. V. R. Thayer, R. M. Saltonstall, G. R. Whitten, and Chas. N. King, directors; Geo. A. Flagg, sec.-treas.; Clarence H. Bissell, asst. sec.-treas.; Jas. E. Richards, mine supt.; A. G. Andrews, Jr., mill supt.; Harry Reeder, engr.; John T. Reeder, chief clerk and purch. agt.; Harry E. Lukey, clerk; Edward Colenso, chief mg. capt.

Inc. March, 1899, in New Jersey, as a merger of the Isle Royale Cons. Mining Co. and Miners' Copper Co. **Cap.**, \$3,750,000; shares \$25 par. Is controlled through ownership of 32,910 shares of outstanding stock, by the Calumet & Hecla. Old Colony Trust Co., Boston, transfer agent; State Street Trust Co., Boston, registrar. Company owns a one-sixth interest in the Lake Superior Smelting Co. Annual meeting, first Wednesday in April, at 243 Washington St., Jersey City, N. J.

Company ended 1915 with balance of current assets, \$1,230,654. Net profits 1915 were \$498,277, as compared with \$24,374 in 1914 and an operating loss of \$128,313 in 1913. **Dividends:** \$1 per share was paid March 31, 1913 and July 31, 1916.

Property: 3,520 acres and an 80-acre mill site. Mineral lands include the old Isle Royale, Grand Portage and Huron mines, the Dodge and Frue prospects, the mineral rights in the Montezuma tract of about 200 acres purchased, 1913, for \$100,000, and sundry undeveloped tracts. The Hussey-Howe tract of 280 acres, lying N. E. of the Superior, supposed to carry the extension of the Baltic bed, was bought, 1907, for \$220,000. Lands include all of Secs. 1, 2 and 11, and parts of Secs. 3, 9, 10 and 15, T. 54 N., R. 34 W., also 160 acres in Sec. 6, T. 54 N., R. 33 W., 40 acres in Sec. 31, T. 55 N., R. 33 W., and 160 acres in Sec. 36, T. 55 N., R. 34 W., giving a compact tract carrying about 2½ miles of the strike of the system of copper-bearing beds.

The Isle Royale has 3 parallel amygdaloidal beds, with strike of N. 32° E. and average dip of 56°, of which 2 have been extensively opened, these being the Isle Royale and Portage beds, the latter lying approximately 200' W. of the former. The shafts are on the Isle Royale, but the Portage bed is opened on many levels by crosscuts. East of the amygdaloids is the "Mabbs vein," lying near the Eastern sandstone, 4 to 7' wide and rich in mass and barrel copper, but deficient in stamp rock. It was opened to a depth of about 250' by John and Austin Mabbs, about 1875, and has been tested to some extent by the present owner. There also are unidentified and unexplored copper-bearing amygdaloids lying W. of the Portage bed and occasional narrow fissure veins carrying arsenical copper ores.

The 3 old mines included in the present Isle Royale tract produced 48,452,590 lbs. fine copper, under primitive conditions, at a net aggregate loss of about \$2,500,000. The old Isle Royale and Grand Portage mines were opened in 1853 and the Huron in 1855. The history of these 3 mines is given in detail in Vol II.

Development: considerable diamond drilling has been done. Underground openings were 19,106' in 1912; 13,626' in 1913; 9,694' in 1914; 14,446' in 1915. About 75 rock drills are used.

No. 1 shaft, near the northern boundary, was completely gutted by fire, Dec., 1903, and was abandoned. This shaft had 3 compartments and is 1,614' deep, opened on the Isle Royale bed, with crosscuts driven on the 11th to 15th levels, inclusive, to the Portage bed, lying 150 to 220' W., with about 2 miles of drifts opened thereon, stoping having been about equally divided between the 2 beds, which were found markedly similar in characteristics and copper values. Concrete dams have been built across the south drifts of No. 1 at the 13th and 14th levels, holding back the mine water. Surface water is collected on the 8th level and sent to No. 2 shaft for taking out. The surface plant at No. 1 was dismantled, 1908, machinery going to No. 4 shaft.

In May, 1914, work was started to retimber the shaft, preparatory to sinking and exploring the Portage lode. In Feb., 1916, the work had been finished down to the 14th level and hoisting was being done from the upper levels.

No. 2 shaft, with 3 compartments, 2,280' S. W. of No. 1, is 3,211' deep. This shaft produces less mass copper than formerly, and the north drifts have not looked especially well for several years, the average of ground being below that of the mine as a whole.

No. 2 shaft has a combination shaft rock house, with Portage Lake

crushers. The engine house is equipped with a hoist capable of raising 6-ton skips from a depth of 6,000'.

No. 3 is merely a site for a shaft, to reopen the old Huron mine.

The new shafts, Nos. 4, 5, 6 and 7, are all on the Isle Royale bed, at the southern end of the property, and have several miles of workings showing considerable heavy copper. These shafts are unconnected with the former workings, in shafts Nos. 1 and 2, at the northern end of the property. Shafts 4, 5 and 6 are connected by drifts on the upper levels.

No. 4 shaft, about 3,100' S. of No. 2, is 2,244' deep, developing stamp rock of very fair average grade. Equipment includes a Nordberg duplex-cylinder hoist, good for 1 mile depth and a 35-drill air compressor, both taken from No. 1 shaft. There is a cylindrical steel shaft rock house, built by the Wisconsin Bridge & Iron Co., having cylindrical rock bins 42' in diameter and 32' high.

No. 5 shaft, about 5,100' S. of No. 2, on Sec. 2, was started Oct., 1906, and was 1,758' deep Jan., 1916. The shaft is sunk in the footwall, and is equipped with a hoist, good for a depth of 3,000'.

No. 6 shaft, about 7,300' S. W. of No. 2, near the center of Sec. 11, has 3 compartments and was 1,912' deep Jan., 1916, developing very good average ground, the bed showing much epidote. The levels are opened at 100' and 120' intervals. On surface there is a circular steel shaft rock house, similar to that at No. 4. The plant at No. 6 includes a brick engine house, with hoist and 45-drill air compressor, and a steel boiler house.

No. 7 shaft, 2,400' S. of No. 6, was started in 1913. Work was stopped on account of the strike and was not resumed until late in 1915.

"A" shaft, started Sept., 1908, on the Hussey-Howe tract, is 972' deep, with the first plat cut at depth of 350'. A 205' crosscut, at depth of 474', discloses only the bed in which the shaft is sunk. On the 3rd level, at depth of 714', a drift was run S. to within 50' of the Houghton Copper Co. boundary, disclosing a fair amount of amygdaloidal rock, not carrying copper in promising quantities. "A" shaft is supposed to be sunk on the Baltic bed, but there is very great doubt as to whether the shaft really is opened on the northern extension of the Baltic, and failure to locate the twin Baltic bed, within a distance of 205' in the crosscut on the 474' level, accentuates this doubt.

The Sec. 12 shaft, begun Oct., 1905, and discontinued Jan., 1908, at depth of 812', also was sunk in search of the Baltic bed and drifts and crosscuts were opened in 4 directions, without securing satisfactory results. The shaft was sunk in a badly disturbed amygdaloidal bed, practically barren of copper.

A shaft was started, 1904, on Sec. 10, but was discontinued because of the heavy overburden, and a diamond drill substituted, the drill cores showing an amygdaloidal bed of which about 5' in width carried stamp-copper in fine grains.

The main plant, at No. 2 shaft, includes No. 2 engine house, a compressor house having a 35-drill Nordberg 2-stage air compressor; a 44x72' boiler house, with a 16x72' coal-storage addition and a 3,000-ton coal trestle, having three 150-h. p. 84" Burt horizontal boilers, taking water from a dam 300x500x6'. The machine shop is of steel, on stone foundations. Shaft houses and rock houses are lighted by electricity, commercial current being taken from the Houghton County Electric Light Co. The company has a private telephone system. There are about 100 dwellings on the company's lands.

The Isle Royale railway, owned by the company, connects the mine and mill with about 5 miles of main line, having easy grades. Equipment

includes 35-ton, 55-ton and 60-ton locomotives, and 40 forty-ton steel rock cars, equipped with air brakes.

The mill site, at the mouth of Pilgrim river, has nearly 1 mile of frontage on Portage lake. The old mill, insured for \$100,000, was burned Dec. 24, 1914. Work on a new 2,000-ton mill was started immediately and in June, 1915, the first stamp head was operating. By the end of August the 3 heads were working. The mill cost \$220,000 and has three 300-ton rock bins and 3 Nordberg stamps having circular mortars and $\frac{5}{8}$ " screen openings. The stamps rest on concrete bases, 20' thick, and are fitted with steeple-compound steam cylinders. Each stamp has a maximum capacity for 700 to 750 tons daily. The dressing floor has 78 rough jigs, 6 finishing jigs and 55 Wilfley tables to treat slime. There are rolls with fixed bearings to regrind coarse gravel from the mortars.

The mill has a complete machine shop on the second floor, power being furnished by a 600-k. w. mixed pressure G. E. Curtis Turbo generator, taking steam from five 200-h. p. boilers in a boiler house at the rear of the mill.

There is a 32x600' wharf, with deep water alongside, at the mill site, with appliances for unloading coal and general freight and for the dispatch of mineral, in scows to the Dollar Bay smelter, 2 miles across Portage lake.

Water is furnished the mill by a 16,000,000-gal. Nordberg Corliss pump, especially designed to handle muddy water, having a triple discharge into a 30" riveted steel water main, running 2,200' from pump house to mill, the pump being located some distance from the mill, to obviate stamp sand clogging the intake. Three 100-h. p. boilers furnish power for the pumps, fuel being taken from a large coal trestle at the rear of the pump house boiler rooms. A dam near the mill supplies feed water for the boilers.

Recent production: has been as follows—

Year—	Tons R'k Treated	Lbs. Min. Produced	Lbs. Mine		Lbs. Cu. Produced	Total Cost per Lb.	Rec'd per Lb.
			Cu. per Stpd.	Cost per Ton (a)			
1915.....	680,270	13,727,832	13.7	\$1.45	9,342,106	(b)14.94c	18.36c
1914.....	474,349	9,451,115	13.9	1.49	6,601,235	13.05c	13.16c
1913.....	314,679	5,887,000	13.2	2.12	4,158,548	18.81c	15.29c
1912.....	531,105	11,461,410	15.4	1.54	8,186,957	11.89c	16.66c
1911.....	457,440	10,339,171	16.4	1.47	7,490,120	10.85c
1910.....	520,860	10,433,060	14.5	1.42	7,567,399	11.84c

(a) Includes mining, transportation, stamping and taxes. (b) Includes nearly 2c per lb. extraordinary expense of rebuilding stamp mill, reopening No. 1 shaft, and No. 7 shaft expense.

Isle Royale's production in 1914 was greatly restricted by the Lake Superior labor strike; normal production was again resumed in June, 1914, to be soon followed by the demoralized copper market due to the outbreak of the European war; the property operated on a three-quarters time basis until Feb., 1915.

The Isle Royale is a low-grade mine, but shows itself capable of earning substantial profits. In 1915 the property made amends for its short-comings of the previous 2 years; and at present more men are employed and more rock is being hoisted than ever before in its history. Production has reached 1,000,000 lbs. copper per month. Large ground reserves are maintained and necessary, and with a still larger output in prospect, profitable operations for many years to come are confidently anticipated.

IT MINING CO.

Ketchikan, Alaska. Mine 1 mile from the shore on Kasaan bay, Prince

ALASKA

of Wales Island, Alaska. **Officers:** H. C. Strong, pres.; J. C. Barber, sec. and mgr.; C. H. Black, treas. **Inc.** 1908 in Washington. **Cap.**, \$30,000; shares \$1 par; nonassessable.

Property: 12 claims, 5 in process of patenting, in the Ketchikan district, showing a number of contact deposits between diorite and limestone. The ore deposit consists of magnetite with chalcopyrite and some bornite, varying up to 15' in width, and estimated by the management to average 8% copper, 1 oz. silver and \$3.50 gold per ton. Mine was opened 1908, and is only worked summers. **Development:** by a prospect shaft and 1,400' tunnel, driven to cut the orebody 200' below the workings from the 200' shaft. Old workings include open cuts and overhand stopes above 200' level.

Equipment: includes a 15-h. p. hoist and a 2-stage Sullivan air compressor. The mine has ore bunkers and a 1,200' gravity tram connecting with a 4,000' ground tram leading to 1,000-ton shipping bunkers on a substantial wharf. The company planned driving a new 1,400' tunnel to cut the present workings at depth of 400', or 200' below the bottom of the shaft, to serve also for drainage, as there are water courses in the limestone that cause considerable trouble.

Net smelter returns to end of 1910, \$150,000. Property considered promising. Letters neither answered nor returned, 1915.

ITMAY COPPER MINING CO.

WYOMING

Idle. Office: Rawlins, Wyo. Mine near Rambler, Carbon Co., Wyo. I. C. Miller, mgr.; Albert Bryle, supt., at last accounts. **Property:** 4 miles S. of Rambler, is said to have a 20' vein, carrying a paystreak of high-grade ore, apparently undeveloped, and another vein up to 8' in width carrying sulphide ore averaging about 8% copper. **Development:** by a 300' shaft. Mine has been a complete failure to date.

IVANHOE CONSOLIDATED MINES CO.

ARIZONA

Main office: 591 I. W. Hellman Bldg., Los Angeles, Calif. **Mine office:** Oatman, Ariz. **Officers:** E. A. Carter, pres.; C. C. Spicer, v. p.; S. M. Warmbath, sec.; with Fred Fox and F. P. McLain, directors. A. G. Keating, supt. **Inc.** March 29, 1915, in Ariz. **Cap.**, \$1,000,000; shares \$1 par; 790,800 shares issued. Stock listed on New York Curb and Los Angeles Stock Exchange. Security Transfer & Registrar Co., New York, transfer agents and registrar.

Property: 5 claims and 2 fractions in the N. W. section of Oatman mining district, Mohave county. Claims cover about 3,000' along the strike of the main vein. Four veins have so far been disclosed. Developed by 500' shaft. A crosscut at 204' intersected a vein, 60' wide, showing average values of \$9 per ton. A crosscut is now being driven S. on the 500' level to encounter this vein. A drift will also be carried westward to intersect the Nancy Lee vein, from which a 20-ton shipment of \$150 gold-silver ore was made early in 1916. Company leased the Nancy Lee claim to L. V. Le Grand in 1916. Is a promising prospect.

IVANHOE MINE.

ARIZONA

Patagonia, Santa Cruz Co., Ariz. Formerly owned by Ivanhoe Mining Co., which has been dissolved. Property now owned by A. H. Ives, of Minneapolis, and J. E. Hurd, who, in 1915, did assessment work only.

Property: the Ivanhoe mine and various claims, 25 in all, unpatented, 500 acres, in the Wrightson district, 4 to 6 miles S. W. of Patagonia, the nearest rail point. The group shows rhyolite, andesite and diorite, with brecciation zones carrying orebodies, of which 5 are estimated by owners to average 27' in width, carrying chloride, silver ore, gray copper and chalcocite, estimated by management to average 16% copper, 6% lead and 225 oz. silver per ton.

Development: by the 200' Commercial shaft, with considerable cross-cutting, developing, it is said, large bodies of milling ore. There are also several tunnels, with 2,700' of workings, estimated to show 100,000 tons of ore. **Equipment:** includes a 70-h. p. steam plant with a 50-h. p. hoist good for 1,000' depth. There are 5 buildings, and water is supplied by a 6-h. p. gasoline pump.

IVANHOE MINING CO.

IDAHO

Oscar Nordquist, mgr., Wallace, Ida. **Cap.**, \$1,500,000; shares \$1 par. **Property:** the Ivanhoe and Palisades groups, patented, adjoining the Star Group on the S., 3 miles N. W. of Mullan, Shoshone county, shows lead-silver-zinc ore. Mine supposed to have continuation of Morning vein. A crosscut from the Star main tunnel intersected the main vein at 1,400' vertical depth. Drifting on the ledge for 200' proved it to average 6' in width with 2' of low-grade milling ore. Property has been under development since 1904. Employing 15 men in 1916.

IVANHOE MINING CO.

WASHINGTON

W. B. McChesney, mgr., Oroville, Wash. **Property:** on Palmer Mtn., 7 miles from Oroville, Okanogan county, is developed by a 4,400' tunnel to a vertical depth of 1,559', at which depth the main orebody was intersected in Dec., 1915.

JACK POT MINING & MILLING CO.

WYOMING

Idle. Office: 55 High St., Oshkosh, Wis. Ole Granberg, pres. and gen. mgr.; H. Thorsgaard, v. p.; H. O. Granberg, sec.-treas. **Inc.** Dec. 23, 1903, in Wyoming. **Cap.**, \$1,000,000; shares \$1 par. **Property:** 9 patented claims, 180 acres, in the Battle Lake district, showing fissure veins in diorite and chloritic schist, and 2 contact veins, between diorite and porphyry, carrying carbonate and sulphide ores. Two veins, slightly developed, are said to average 14' and 60' width. The smaller vein has averaged 8% copper and \$3 to \$12 gold per ton, the larger vein showing very low-grade copper ore. **Development:** 75' tunnel, 100' shaft and 8 pits of 20 to 36' depth, with 411' of workings. Though inactive for many years, company still in existence and reports that all taxes have been paid to date.

JACK WAITE MINING CO., LTD.

IDAHO

Officers: Robt. Sheffell, Govan, Wash., pres.-gen. mgr.; J. P. Schroeder, v. p.; Fritz Marschante, Spokane, sec.-treas.; with E. Winsby, Chas. Feehan and Chas. Chamberlain, directors. H. T. Ahrens, supt. **Cap.**, \$1,500,000; shares \$1 par; assessable; 1c levied Oct., 1915. Stock listed on Spokane Stock Exchange.

Property: in the North Coeur d'Alene district near Murray, Shoshone county, a group of claims covering a large vein carrying lead ores, whose silver values are much lower than those of the mines of the main Coeur d'Alene district. The oreshoot is said to be large and the property a good one. Is being extensively developed by crosscuts and tunnels, the upper one 1,500' and the lower main tunnel 3,000' long, early in 1916. The work is done under contract system. Company neither issues reports nor furnishes information.

JACKET-CROWN POINT-BELCHER MINES CO.

NEVADA

Office: Mills Bldg., San Francisco, Calif. Mine near Virginia City, Nev. **Directors:** M. B. Forman, C. L. Moore, J. L. Brainard, H. W. Glen-sor and L. M. Bliss. Wm. P. Miller, supt. Virginia City, Nev. Company is a merger of 3 of the big Comstock mines. **Inc.** Feb. 11, 1915, in Calif. California Corpor'n Commission authorized issue of 360,000 shares common and 12,000 shares preferred to the Yellow Jacket G. & S. Mng. Co.; 208,000 common and 10,400 preferred to Belcher Mng. Co., and 150,000 com-

mon and 10,000 preferred to the Crown Point G. & S. Mng. Co. Above stock is in payment for all properties of these 3 companies subject to debts of \$80,962; 217,600 shares to be sold at par, money to be used for development.

These are the bonanza properties which made the fortunes of Flood, Mackay, Lucky Baldwin and D. O. Mills. The mines are in the southern part of the Comstock lode, a great fissure vein 4 miles long, filling a fault plane in the andesite-diorite rocks of Mt. Davidson, near Virginia City. The ore is quartz carrying silver-gold. Geology described in Monograph 3, U. S. Geological Survey.

The merger made it possible to install modern pumps, to unwater the 1,700' and 1,800' levels of the mines where good ore was formerly worked until a great influx of hot water stopped mining. A fire in Dec., 1915, interrupted operations, but a centrifugal pump now installed on the 1,600' level has successfully handled the water and deep mining can now be resumed.

Production: for 1915 and first half of 1916 has come from old stopes and workings on the 1,600' level and above, the average production from both mines being about 1,000 tons per week.

JAMESTOWN EXPLORATION CO.

CALIFORNIA

Office: 546 E. Weber Ave., Stockton, Calif. **Officers:** A. R. Kirkland, pres.-mgr.; J. P. Mangante, v. p.; L. T. Freitas, sec.; J. H. Utt, treas.; with W. S. Kelly, directors. **Inc.** April 19, 1913, in Calif. **Cap.**, \$100,000; shares \$1 par; assessable; 25,000 shares issued. Annual meeting, 1st Tuesday in April.

Property: 1 claim, patented, 20 acres, $\frac{3}{4}$ mile W. of Jamestown, Tuolumne Co., shows a 5' quartz vein with gold values, said to average \$14 per ton. Developed by 700' tunnel to depth of 100'. Work was stopped in 1915, owing to lack of funds.

JAPAN-FLORA MINES & TUNNEL CO.

COLORADO

Idle. Office: 709 Colorado Bldg., Denver, Colo. Mine near Telluride, San Miguel Co., Colo. **Officers:** J. J. Fisher, pres.; Chas. H. Johnson, v. p.; Wm. E. Humphreys, sec.; J. P. H. Cunningham, treas.; preceding, with Geo. W. Johnson, directors. **Inc.** Aug. 22, 1903, in Colorado. **Cap.**, \$2,000,000; shares, \$1 par; nonassessable; fully issued. **Bonds:** \$300,000 authorized, at 6%; issued, \$240,800. Annual meeting in October.

Property: 43 patented claims, 311 acres, and a 35-acre mill site, in the Upper San Miguel district, near Telluride, 4 miles from a railway. Property shows 5 fissure veins, in brecciated andesite and porphyry, 3 being extensively developed and said to show a width of 1 to 8', carrying complex sulphide ores with gold and silver, associated with pyrite, in a quartz gangue. Ore said to average 1 to 2% copper, 3 to 40% lead, 2 to 20% zinc, 20 to 50 oz. silver and \$8 to \$30 gold per ton.

Development: by 2 shafts and a 3,000' tunnel, total underground workings amounting to nearly 35,000' in 1913. The mine is estimated by its manager to have 100,000 tons of ore blocked out for stoping. **Equipment:** includes a 2-drill Leyner electric air compressor and 17 buildings.

Property has a concentrating mill equipped with Blake and Gates crushers, 2 trains of rolls, three 6-compartment Hartz jigs, 4 Wilfley tables, 2 Frue vanners, 4 sizers and a 5' Huntington mill. Property has produced considerable ore in the past.

JARILLA CONSOLIDATED COPPER CO.

NEW MEXICO

Mine at Brice, Otero Co., N. M. **Officers:** E. S. Plaisted, pres.; John B. Boss, treas.; I. W. Crozier, John McLean, Geo. W. Kimball and W. W. C. Spencer, directors; W. W. C. Spencer, gen. mgr., 1888 Beacon St., Brookline, Mass.; Geo. W. Moffett, supt., mg. engr., chemist-assayer and purch. agt. **Inc.** 1912 in Arizona. **Cap.**, \$2,000,000; shares \$1 par; fully paid and

nonassessable; issued, \$1,000,000. Annual meeting, first Monday in December.

Property: 40 claims, about 800 acres, in Jarilla (Silver Hill) district, Otero Co., N. M., carrying sulphide ore in contact deposits between limestone and monzonite porphyry. Vein said to be 3 to 30' wide, 300' to a half mile long and proven to 170' depth, averaging 3 to 5% copper, 2 oz. silver and \$1 gold per ton. **Development:** by 5 shafts, deepest 172', and the Harvey tunnel, 165' long.

Company is a merger of and holds the properties formerly owned by the Eureka Mines Cons. Co., Boston Jarilla Copper Co., Amarillo Mining Co. and Eureka Placer Mining Co., whose combined capitalization of \$8,000,000 is reduced to \$2,000,000.

JARILLA COPPER SYNDICATE, INC.

NEW MEXICO

Brice, via Oro Grande, Otero Co., N. M. **Officers:** R. B. Hutchinson, pres.; J. J. Mundy, v. p.; T. B. Rains, sec.-treas. and acting mgr. Inc. July, 1912, in Arizona.

Property: the By-Chance group comprising the Stokes, Butterfly, Buckeye and By-Chance claims, all owned outright, is in the Jarilla district, 4 miles from Oro Grande on the El Paso & S. W. railroad. District shows Paleozoic limestone and shale cut by intrusive masses of monzonite porphyry. The By-Chance claim, the only one operated, has a contact metamorphic deposit of chalcopyrite-hematite-garnet ore lying alongside of a porphyry mass with ore along a fracture zone in the limestone.

Development: includes 150' vertical working shaft with a level at 86' on which the blanket orebody, 12 to 30' thick, has been stoped. A 60' winze from this level is reported to show a second and lower orebody estimated to have an average assay value of 3% copper, with streaks of copper glance running up to 30%.

Production: to Oct. 1, 1913, 6,000 tons of ore shipped to El Paso and Douglas, averaging 2% copper and \$2 gold per ton. Shipments to middle of 1914 average 600 tons monthly with returns which just about covered development and operating expenses. Operations resumed late in 1915. Property promising and management good.

JASPER COUNTY LAND & MINING CO.

MISSOURI

Frank Danglade, Webb City, Mo., supt. **Property:** the McKinley mine, near Carterville, Jasper Co., Mo., developed by 2 shafts and 15 drill holes, showing a large body of zinc blend and lead ore at depth of from 190-210' A 350-ton concentrating mill was erected in 1914 and started operations in April, 1915.

J. BENNETT SMITH MINING CO.

MINNESOTA

Idle. **Office:** 280 Chestnut St., Kingston, Pa. Mine address: Pine City, Pine Co., Minn. **Officers:** J. Bennett Smith, pres.; Herbert Conyngnam, sec.; Edw. Hilles, treas.; Henry Hoefler, gen. mgr., at last accounts. **Property:** 500 acres of copper-bearing ground, along Snake river, a mile below Cross lake, in Pine county, Minn. The lands show the western extension of the Keweenaw copper-bearing beds of Lake Superior, the bedded formation having a strike of about N. 20° E., with dip of about 72° S.-E., showing the beds to be on the northern fold of the syncline.

Development: includes 560' shaft; also several shallow pits and shafts. Several of the amygdaloidal and conglomerate strata, showing native copper, have been proven by test pitting and diamond-drill borings. Company reports having expended about \$50,000 on exploratory and development work since 1879.

JEFFERSON CALHOUN MINING CO.

COLORADO

Company was adjudged bankrupt and its property sold under judg-

ment proceedings. The old company was a reorganization of the Wabash Consolidated Co. Reorganized as Calhoun Consolidated Mines Company, which see.

JEFFERSON MONTANA COPPER MINES CO. MONTANA

Corbin, Jefferson Co., Mont. C. K. McCormick, pres.; P. A. Bell, supt. **Property:** 16 patented claims, in Colorado mining district, 3 miles from Corbin, shows fissure veins, 3-5' wide in granite. The course of the orebody is N. E.-S. W., with dip of 60-70°. Developed to depth of 540' by vertical shaft. Electric power to be installed in 1916.

JENNIE SAMPLE CONSOLIDATED MINING CO. COLORADO

Office: 218 Burns Bldg., Colorado Springs. **Officers:** Daniel Thatcher, pres.; Jas. I. Burns, v. p.; with A. E. Carlton, Ira Harris and J. N. Beaty, directors; R. M. Frank, sec.; F. H. Gay, treas.; John T. Hawkins, gen. mgr. **Inc.** in Wyoming. **Cap.**, \$25,000; shares 1c par; 1,668,885 shares issued. Stock listed on the Colorado Springs Stock Exchange. Gross earnings for 1915 were \$42,351, all from ore sales; operating expenses amounted to \$16,061. Company had no liabilities and \$3,319 cash in treasury, Jan. 1, 1916.

Property: 5 patented claims, 31 acres, on S. slope of Raven Hill, in Cripple Creek district, shows fissure veins with streaks of gold. Developed by shafts and drifts to depth of 1,000'. Equipped with hoist, drills and steam power. Company inactive, but property worked by lessees in 1915.

JEROME-OATMAN MINING CO. ARIZONA

Office: Jerome, Ariz. **Mine office:** Oatman, Ariz. **Officers:** Walter C. Miller, pres.; D. J. Shea, v. p.; S. F. Denison, sec.; H. W. Lewis, treas.; with H. E. Campbell and Henry Lovin, directors. **Jas. P. Rice, supt.** **Inc.** July, 1915, in Arizona. **Cap.**, \$150,000; shares 10c par; 442,251 shares in treasury, Oct., 1915. Stock is listed on Los Angeles Exchange.

Property: 11 claims, unpatented, in San Francisco mining district, 3 miles N. W. of Oatman, Mohave Co., shows gold-silver ore in quartz veins cutting andesite and rhyolite. The veins run N. W.-S. E. and dip N. 70°. A 2-compartment shaft, 300' deep, April, 1916, is being sunk to 500', on a 30' ledge yielding assays of from 20c to \$6 per ton. About 16 men employed, 1916.

JEROME SUPERIOR COPPER CO. ARIZONA

Organized by R. E. Tally, Thos. Taylor, J. J. Stanton and Leroy Anderson, all of United Verde Copper Co., Jerome, Ariz. **Inc.** May, 1916, in Ariz.

Property: 60 claims, the Sutcliffe and Stanridge group, lying east and south of the Arkansas and Arizona and the North Verde.

JEROME VERDE COPPER CO. ARIZONA

Office: 223 Security Bldg., Los Angeles, Cal. **Mine office:** Jerome, Yavapai Co., Ariz. **Officers:** Henry Werner, asst. sec., 60 Broadway, New York; Truman Berry, pres.; H. T. Helm, v. p.; I. Mabbett Sutton, sec.-treas.; with F. V. Henshaw and T. E. Campbell, directors.

Inc. Dec., 1906, in Arizona. **Cap.**, \$5,000,000; shares \$1 par; nonassessable; issued May 31, 1916, \$4,952,545. Registrar & Transfer Co., New York, transfer agent and registrar. Listed on New York Curb. Was organized as successor of Verde Queen Copper Co., giving old shareholders \$2,501,000 in stock, which is held by the old company in a single certificate, and is practically escrowed; 1,000,000 shares of this stock will be distributed on and after July 3, 1916.

Property: 28 claims, patented, 486 acres, lying E. of the United Verde and adjoining the Little Daisy mine of the United Verde Extension, shows an iron gossan with outcrops of copper ore on the Verde and Columbia claims. **Development:** by 700' two-compartment Columbia shaft, with

about 2,190' of workings, showing mainly copper carbonates, with small quantities of oxide and silicate ores, also some sulphide and a little native copper, all slightly auriferous and argentiferous. Average assays were reported, by former management, at 8.4% copper. Up to June, 1916, no pay ore had been developed. The mine is wet, and has electric pump, with capacity of 175 gals. per min., working against 500' head.

Equipment: includes a hoist, good for 1,000' depth, and a 5-drill air compressor. Commercial current is taken from the Arizona Power Co. There are a number of mine buildings, and a 35-ton smelter.

The promising disclosures on the Little Daisy mine of the United Verde Extension, adjoining this property, resulted in an option being given on the Jerome Verde property until June 15, 1915, to the United Verde Extension Co. This option provided for the payment of \$500, per month and that 100' of work per month should be performed. Under the option 935' of drifting and crosscutting was done on the 800', 775' on the 1,200', and a little work done on the 1,400' level. Results were unsatisfactory and option was relinquished after an expenditure of \$50,000. In April, 1916, an agreement was made with United Verde Extension under terms of which said company is to do 150' of development work per month, to be paid for by Jerome Verde on the basis of the company's working costs, plus 15% royalty; the work is being done on the 1,400' level of Jerome Verde. This is the only interest United Verde Ext. has in Jerome Verde. Company plans enlarging Columbia shaft to 3 compartments and sinking 330', equivalent to 1,400' level of United Verde Extension.

The mine shows geological conditions similar to those of the United Verde Extension and the stock is therefore a good gamble.

JEROME-VICTOR EXTENSION COPPER CO.

ARIZONA

Office: Laurium, Mich. **Mine office:** Jerome, Ariz. Is a reorganization of the Haynes Copper Co., which succeeded the Jerome Mines Development Co. **Officers:** Jas. T. Fisher, pres.; Brainard Avery, v. p.; J. B. Paton, sec.; with A. H. Floeter, A. F. Heidkamp and D. F. Printz, directors; J. P. Peterman, treas.; D. Leveque, asst. sec. **Inc.** 1916 in Ariz. **Cap.**, \$1,000,000; shares \$1 par; 450,000 shares issued, of which 250,000 are offered for subscription at par.

Property: 8 patented claims, 160 acres, known as the Harryhausen group, adjoining the United Verde on the N. W., shows lenticular orebodies in dioritic schist, reported to be 3'-19' wide and traceable for 2,000'. **Development:** includes 1,200' shaft, with 2,000' drift and crosscut work, also a 350' prospect shaft and 248' tunnel. Excessive flow of water encountered in drill holes, 2-300' deep, said to have forced former management to pull the pumps and close down the property in 1914.

Equipment: includes 150-h. p. steam hoist, 10-drill Ingersoll-Rand compressor and 12 buildings. Operations to be resumed in 1916.

Is a J. A. Minnear Co. promotion.

JERRY JOHNSON GOLD MINING CO.

COLORADO

Office: 427 Symes Bldg., Denver, Colo. **Mine office:** Cripple Creek, Colo. **Officers:** A. P. Mackey, pres.-mgr.; C. F. Potter, v. p.; J. W. Graham, sec.-treas.; with J. F. Mackey and C. A. Graham, directors; D. C. Smith, supt.

Inc. 1902 in Wyo. **Cap.**, \$250,000; shares 10c par; all issued. Has paid \$187,500 in dividends to date. Last payment of \$5 per 1,000 shares in Nov., 1914. Stock listed on the Colorado Springs Exchange. Company had \$30,000 cash in treasury, May, 1915, and no debts. Derives income from royalties on leasing operations.

Property: 35 claims, patented, in Cripple Creek district, shows gold-

silver ore in contact veins. Developed by 975' vertical shaft to depth of 850'. The mine is being worked from surface to the 650' level by Frank Caley, and below the 650' level by the Cripple Creek Deep Leasing Co.

Equipment: includes steam power, 8 drills, concentrator and 75-ton cyanide mill, erected in 1915 by Frank Caley and reported operating at capacity in 1915. Total output to 1916, 1,500,000 tons. During first 6 months in 1916 the mine produced \$25,632 in ore.

JERSEY VALLEY MINES CO.

NEVADA

Worcester, Mass. W. Prince Catlin, mgr., Battle Mountain, Lander Co., Nev. **Property:** in Kimberly or Hill Top district, 23 miles from Battle Mountain, comprises the Jersey Valley group, and the Gray Eagle claims, acquired Sept., 1913, from the Gray Eagle Mining Co. Four sets of leases were taking out ore from the last named claims at last reports.

JESSIE BELLE M., M. & SM. CO.

CALIFORNIA

T. S. and Ray Daulton, of Madera, Madera Co., Calif., reopened the mine in 1914, under a 4-year lease. Inc. 1902. in Arizona. **Cap.**, \$1,500,000; shares \$1 par. **Property:** 3 patented claims, 40 acres, 7 miles from and in same belt as the Copper Queen mine, in Mariposa county. Contains copper carbonate ore with gold and silver values.

Development: by 200' main shaft, shows 4 fissure veins, carrying oxide, carbonate and sulphide ores. Has steam power, air compressor and a 30-ton concentrator. No recent returns secured.

JEWEL-DENERO MINES, LTD.

BRITISH COLUMBIA

Secretary's office: W. Robertson, 71 George St., Edinburgh, Scotland. Mine office: Greenwood, B. C. **Directors:** J. Galloway, chairman; A. H. Bremner, J. E. Rogerson and W. W. Slater. C. A. Banks, mgr. Inc. Nov. 22, 1912, in Edinburgh. **Cap.**, £70,000; shares 5s each; 279,400 shares issued. Authorized bond issue, £12,500, 8%; £11,202 issued.

Property: the Jewel gold mine at Greenwood and the Idaho Alamo mine in the Slocan district, B. C. The Jewel mine is developed to depth of 500' by shafts and crosscuts and started production in 1911. Produced 16,525 tons of ore in 1914, yielding £31,360. In 1915 only development work was done and in 1916 the mine was being operated by lessees. **Equipment:** includes a 15-stamp cyanide mill. Company expects to resume operations on both properties in 1916.

JEWELL MINES & REDUCTION CO.

COLORADO

R. A. Schwab, sec., Century Bldg., Denver, Colo. W. E. Hager, v. p.-gen. mgr. **Property:** the Pandora mine and mill site, 231 acres, partially patented, 7 miles E. of Pitkin. Gunnison Co., Colo., said to carry 8 fissure veins. **Development:** by 1,800' tunnel **Equipment:** includes air compressor, machine drills. water power.

JIM BLAINE MINE.

OREGON

Owned by L. A. Lewis, Portland, Ore. Worked under lease by G. S. Epperly and Wm. H. Borgman, Placer, Ore. **Property:** 1 patented claim, 20 acres in Placer mining district, Josephine county, shows gold-silver ore in quartz veins in porphyry formation. The orebody runs N. W.-S. E. and dips 65°. Developed by 200' tunnel to depth of 150'. **Equipment:** includes compressor and concentrating mill. Concentrates reported to average 1 oz. gold and 50 oz. silver. Mine produced 1,000 tons of ore in 1915, yielding a gross return of \$9,842.

JIM BUTLER TONOPAH MINING CO.

NEVADA

Office: 501 Bullitt Bldg., Philadelphia, Pa. **Officers:** Clyde A. Heller, pres.; Wm. M. Potts, v. p.; K. Kitto, sec.-treas.; R. G. Wilson, asst. sec.-treas.; C. B. Taylor, gen. counsel. **Directors:** Clyde A. Heller, Wm. M. Potts, R. G. Park, H. W. Davis, S. D. Sinkler, T. W. Synnott, M. B. Cutler

and J. C. Fraley† Fred'k Bradshaw, gen. supt.; L. R. Robins, mng. engr.; W. J. Pike, supt.

Inc. Nov. 13, 1903, in Delaware. Cap., 2,000,000 shares; \$1 par; all issued; 281,979 in hands of Trustee for company. Initial dividend 10% paid Aug. 2, 1915. Treasurer's statement for 6 months ended Jan. 1, 1916, shows: available resources, cash in banks, loans and silver stored @ 50c per oz., \$477,974; receipts, \$285,436; operating and administration expenses, \$144,969. Net earnings for 6 months, \$140,466, exclusive of misc. income of \$1,236.

Property: 16 patented, 2 unpatented claims, 241.7 acres, at Tonopah, Nev.; also Ophir King group, 91.69 acres, bought at sheriff's sale Nov., 1914, for \$1,750.

Geology: of Tonopah is complex; a series of volcanic rocks, partly lava flows, partly intrusive sheets and masses of quickly varying thickness overlie one another irregularly. The productive veins are in the Mizpah "trachyte," overlaid by the Midway andesite and intruded by the Westend rhyolite. The veins are cut through by the Midway andesite and do not commonly outcrop, but terminate against the Midway andesite at depths up to 1,200'. They are fissure veins which for some distance lie on or in planes of contact between eruptive rocks. Values are in gold and silver. See U. S. G. S. Prof. Paper, No. 42. The company holdings are identical in character to those of its neighbors, the Tonopah Mining and Belmont companies.

Development: is through the Desert Queen and Wandering Boy shafts. Development for fiscal year 1915 was 8,569', costing \$64,783, or \$7.48 per ft.; drifting cost \$8.11; crosscutting \$6.928, and raising \$7.512 per ft.; ore developed, 5.6 tons per ft.

Ore reserves: Sept. 30, 1915, consisted of 26,773 tons positive ore, 15,537 tons possible ore, a total of 40,310 tons, compared with 50,197 tons in preceding year; 53,311 tons were mined in the fiscal year. Further exploration of the orebodies and of virgin territory is expected to add largely to this amount.

Ore in 1915 averaged 0.301 oz. gold and 26.42 oz. silver per ton, compared with 0.304 oz. gold and 27.14 oz. silver in 1914. Silver realized \$0.4623 per oz., or 95% of \$0.4866. Ore is milled for cost plus 5% (plus 50c p. t.) by the Belmont Milling Co., with 91.45% recovery in 1915.

Recent production and Costs per ton:

	Ore	Value	Mng.	Trmt.	Gen.	Total	Oper.

(A) Deductions by ore purchasers.

The \$3,000,000 apex suit of the Jim Butler against the West End Co. for trespass and ore extracted was decided July, 1916, in favor of the West End Co. by the State Supreme Court. Case will be appealed.

JIMULCO MINING CO.

MEXICO

Letters returned, 1916, from Otto, Coahuila, Mex. Otto Wahrmond, pres.; Otto Koehler, v. p.; S. G. Newton, sec.; Arthur L. Tuttle, gen. supt.; John D. Moore, mine supt. Inc. 1901 in Texas. Cap. \$500,000; shares \$50 par, increased March, 1906, and reduced 1908 to \$1,000,000, shares \$100 par. **Dividends:** to end of 1912, \$1,005,000.

Property: 111 hectares, carrying argentiferous copper ores, oxidized ores predominating, as replacement deposits in limestone. **Development:** by a 500' main shaft and 10 prospecting shafts of 100 to 150' depth, with 6 main tunnels and 4 short prospecting tunnels. The mine has about 10

miles of workings showing good ore in the bottom levels. Ore is shipped to the Aguascalientes smelter for reduction.

Equipment: includes gasoline and electric power, with an electric hoist. There is a 5-mile private narrow-gauge railway connecting with the Mexican Central line, at Otto.

Production: in 1912 was 684,420 lbs. Property considered valuable and management good. Probably idle owing to revolutionary disturbances in Mexico.

JOE BOWERS MINING CO.

UTAH

Office: 515 Dooly Blk., Salt Lake City, Utah. John Dern, pres.; A. Reeves, sec. Inc. in Utah. **Cap.**, 450,000 shares; 25c par; assessable; 460,216 shares outstanding. Listed in Salt Lake City. **Property:** 40 acres in the Tintic district shows silver-lead ore. Is a prospect.

JOE CREEK COPPER CO.

CALIFORNIA

Idle. Hutton, Siskiyou Co., Cal. Is one of the many prospects of the copper belt of northern California, whose owners believed a copper outcrop could be made to pay cost of development and equipment from ore mined from shallow workings. **Property** apparently owned formerly by Copper King Mining Co., lying between the Blomfield group and the Blue Ledge mine, has opencuts and crosscuts developing the mine to depth of 400'. Mine is said to carry several large orebodies, ranging 5 to 8% in copper tenor and \$8 per ton in combined gold and silver values, an estimate considered excessive.

JOE DANDY LEASING CO.

COLORADO

Thos. Smith, supt. Operates a lease on the Joe Dandy mine on Raven hill, Cripple Creek district, Teller Co., Colo. Mine developed to about 1,000' depth by shaft and drifts, exposing an orebody, 2-4' wide, said to average \$30 per ton. Reported shipping from 3 to 5 cars of ore per week, Jan., 1916.

The Joe Dandy cyanide leaching plant, operated under lease by Thos. Kavanaugh, treats about 2,000 tons of ore per month, partly \$2 per ton dump ore.

JOHNNY BULL MINE.

NEW MEXICO

W. H. Henry, Boston Road, New York, N. Y., owner; David L. Creswell, Steins, Grant county, N. M., purch. agt. **Property:** 3 patented claims, south of Steins Pass, between S. P. and E. P. & S. W. R. R., on western slope of Peloncillo range, shows a contact deposit between limestone and a N-S. monzonite dike. The ore is said to average 5% copper and to run high in lime and iron.

Development: includes 2 old shafts 100' and 150' deep, with 1,000' of work, exposing 2 parallel veins, each 125' wide. Property was formerly owned by the Johnny Bull Copper Mining Co., whose charter was forfeited in 1902. Owner claims to have done development work in 1915.

JOHNSON COPPER DEVELOPMENT CO.

ARIZONA

Office: Frankfort, Ky. Mine address: J. T. Tong, mgr., Johnson, Cochise Co., Ariz. **Officers:** Henry S. Krug, St. Louis, Mo., pres.; Ralph R. Wilson, v. p.; E. H. Elliott, sec.-treas.; preceding, with P. S. Head, Hon. A. A. Hazelrigg, Hon. Baily D. Berry, Hon. A. C. Van Winkle and H. P. Hubbell, directors. **Inc.** March 13, 1908, in Arizona. **Cap.**, \$2,000,000; shares \$1 par; nonassessable; issued, about \$1,400,000. Annual meeting, second Monday in October.

Property: 8 claims, 3 fractional, unpatented, 123 acres, known as the Climax group, in center of the Johnson camp, between the Peabody, Peacock, Republic and Black Prince mines. Claims show granite and limestone, with replacement deposits carrying malachite, chrysocolla, bornite and chalcocite, averaging 4% copper and 5 oz. silver per ton for the sev-

eral thousand tons thus far developed. Orebody has a flat dip, averaging 32°, and is about 2' wide on the 250' level. **Development:** by 250', 1½-compartment working shaft, said to be bottomed in bornite disseminated in limestone. The 100' level has about 500' of crosscuts and drifting, much of it in ore, but ground is leached and broken. The 250' level has N. and S. drifts, 500' of workings, on a 2' vein. A 500' winze was sunk from the S. drift. Development is said to show large bodies of low-grade carbonates near the surface and some sulphides at 400' depth. Reported that some shipments have been made, also that a new hoist and compressor will be added.

Equipment: includes a 40-h. p. gasoline hoist, compressor and 5 buildings.

JOLLY JANE LEASING CO.

NEVADA

Has 3-year lease on the Jolly Jane claim, of Pioneer Extension Mines Co., which see.

JOPLIN-KENTUCKY LEAD & ZINC CO.

MISSOURI

Joplin, Mo. **Inc.** in Kentucky. **Cap.**, \$50,000. Operates a lease on 33 acres of mineral land owned by the St. Louis-Joplin L. & Z. Co., in Sec. 32, T. 28, R. 33, at Joplin.

Development: by 3 shafts to depth of 150'. **Equipment:** includes 125-ton concentrating plant, 2 pumps, 3 drills, steam power, 3 hoists, Carterville crusher and 2 Wilfley tables.

JOPLIN ORE AND SPELTER CO.

KANSAS

Offices: 40 Exchange Place, New York, and Joplin, Mo. **Works** at Pittsburg, Kan. **Officers:** Wm. Barret Ridgely, New York, pres.; E. Allendorf, Joplin, Mo., treas.

Inc. April, 1916, in West Virginia, to take over the property of the Joplin Ore & Spelter Co., of Missouri. **Cap.**, \$2,000,000; shares \$5 par; all issued and fully paid. An initial dividend of 5.5c paid May 25, 1916. Empire Trust Co., New York, registrar. Stock transferred at company's office.

Property: a zinc smelter at Pittsburg, Kan., about 37 miles from Joplin, Mo. Plant consists of 6 blocks of furnaces, each having 224 retorts, a total of 1,344 retorts. Two additional blocks of 224 retorts are being built, which will give the company a total of 1,792 retorts and an estimated capacity of 14,380,000 lbs. of spelter annually. Property reported on by Arthur E. Feust, E. M., in 1916.

JOSEFINA MINE.

MEXICO

Owned by Chenowith Bros., of Nogales, Ariz. **Property:** 5 miles from Santa Cruz station, on the Cananea branch of the S. P. R. R. and 40 miles N. W. from Cananea. Shipments are made to the Douglas smelter.

JUALIN ALASKA MINES CO.

ALASKA

Company is a subsidiary of the Algonican Development Co. W. B. Hoggatt, pres.; H. G. Young, mgr., Juneau, Alaska. **Property:** 20 claims on the north shore of Berners Bay, in the Juneau region, is developed by 360' main shaft, crosscuts and a drainage tunnel, 2,000' long, planned to be driven 7,500'.

Ore is reported to be 85% free milling. **Production:** under former owners said to total 50,000 tons of \$11.20 per ton gold ore. **Equipment:** includes 5½-mile tram, connecting the mine with the wharf, 450-h. p. compressor and hydro-electric plant. Operations were curtailed at outbreak of European war, but diamond-drill prospecting continues and management plans erecting a mill.

JUANITA MINING CO., S. A.

MEXICO

Office: Sellwood Bldg., Duluth, Minn. **Operating address:** Bisbee, Ariz. **Officers:** Martin Pattison, pres.; Byron M. Pattison, v. p. and mgr.;

Lemuel E. Shattuck, sec.-treas. **Property:** about 1,000 hectares, known as the Juanita group adjoining the Carnegie L. & Z. Co. property, 3 miles N. W. of Cananea, is traversed by several narrow fissure veins in volcanic tuff beds. These veins carry small oreshoots with chalcopryrite, galena and sphalerite. No. 1 shaft is 220' deep and there also is a 75' shaft. Work suspended since 1912 owing to political disturbances in Mexico. Is an undeveloped prospect.

JUANITA MINING & MILLING CO.

ARIZONA

Office: Phoenix, Ariz. Mine at Prescott, Yavapai Co., Ariz. **Officers:** M. Dwight Jennings, pres.; W. S. Heflin, v. p.; D. A. Seaman, sec. and gen. mgr.; E. J. Bennett, treas.; preceding, with B. F. Peters, Otto Kring and E. Payne Palmer, directors. **Inc.** April, 1905, in Arizona. **Cap.**, \$1,500,000; shares \$1 par; nonassessable; issued, \$1,200,000. Annual meeting, first Tuesday after second Monday of April.

Property: 16 claims, unpatented, 300 acres, and a 5-acre mill site about 4 miles from the Senator mine in the Hassayampa district, about 17 miles S. of Prescott. Management reports the property to carry 11 fissure veins in porphyry and schist with 4 under development of 1 to 60' width, traceable 1,000 to 3,000' carrying copper sulphides assaying 2 to 10% copper, 1 to 100 oz. silver and \$1 to \$1,700 gold per ton. Apparently the main vein is of 8' average width.

Development: by 210' shaft and several tunnels from 45 to 450' long, with 3,500' of workings estimated, 1913, to have blocked out 5,000 tons of ore with 25,000 tons in sight. **Equipment:** includes 25-h. p. hoist, 2-stamp mill, 7 tons capacity.

Property leased to D. A. Seaman until Nov., 1916, lessee to develop mine and install machinery, leaving not less than a 20-stamp mill, and pay royalty on all ore taken from opencuts and stopes. No recent returns secured.

JUDGE MINING & SMELTING CO.

UTAH

Office: 1022 Kearns Bldg., Salt Lake City, Utah. Mine P. O.: Park City, Summit Co., Utah. **Officers:** H. Otto Hanke, pres.; M. C. Fox, v. p.; G. M. Lambourne, sec.-treas. and mgr.; W. M. Bradley and A. C. Wall, directors; O. N. Friendly, gen. supt.; Geo. D. Blood, cons. engr.

Inc. 1901 in New Jersey as the Daly Judge Mining Co. Reorganized, 1916, under present name. **Cap.**, \$300,000; shares \$1 par, increased March, 1916, to \$500,000. Stock listed on Salt Lake Exchange and New York Curb. **Dividends:** paid in 1915 amounted to \$300,000; total dividends to date, \$1,155,000. Present rate is 25c per share quarterly. Balance of \$678,906 in treasury, Jan. 1, 1916. Total receipts from ore sales in 1915, \$1,041,413.

Property: company has valuable holdings, about 1,100 acres patented ground, covering 11,000' of a fissure vein system, in Park City district, adjacent to the Daly West mine. Is a large producer of silver-lead ores with much zinc and a small amount of copper.

Development: mainly by tunnel and drifts, amounting to 12,017' in 1915, was towards the Bonanza Flat section from the 300' to the 2,300' level, principally on the 1,200' level, opening an 18" vein, said to run 30% lead, 60 oz. silver and 3% copper. The Snake Creek tunnel driven 14,000' to the property line was completed early in 1916; it will unwater the mines at greater depth and provide transportation.

Equipment: includes 400-h. p. electric hoist, compressor and 500-ton wet concentrating plant with flotation unit for treatment of slimes, making a zinc and lead product.

Production: for 1914 was 54,701 tons and 69,744 tons in 1915. Mill treated 49,095 tons in 1914, producing 9,675,200 lbs. lead; 7,838,984 lbs. zinc;

384,782 lbs. copper; 519,979 oz. silver and 724 oz. gold, and 63,935 tons in 1915, producing 10,828 tons lead concentrates, 7,169 tons zinc concentrates, a concentration ratio of 5.8 to 1 of lead concentrates and 3.5 to 1 of all products combined. Crude ore mined in 1915 amounted to 5,809 tons, averaging 30.32 oz. silver, 17.73% lead, 10.82% zinc, 7.67% iron, 1.86% copper and 0.034 oz. gold, returning \$23.93 per ton. Total production to 1916 was 5,622,420 oz. silver, 11,800.22 oz. gold, 116,601,381 lbs. lead, 86,937,150 lbs. zinc, 2,984,875 lbs. copper, which sold for \$6,482,833.

Property is a regular dividend payer and the unexplored portion of the mine is promising. The increase in capitalization provides funds to construct a new zinc plant near Park City and enables the company to continue dividends at the present rate.

JULIAN MINING & MILLING CO.

UTAH

Idle. American Fork, Utah Co., Utah. **Officers:** Jas. Chipman, Jr., pres.; Wm. Thornton, v. p.; J. E. Bennett, sec.-treas. Inc. Aug., 1909, in Utah. Cap., \$50,000; shares 5 cts. par. Apparently succeeded a company of same title organized in Nebraska, with an office at Geneva, Neb., which lost its charter 1909. **Lands:** 5 claims, unpatented, showing gold, silver and copper ore.

JUMBO EXTENSION MINING CO.

NEVADA

Goldfield, Nev. **Officers:** Chas. S. Sprague, pres.; J. K. Turner, v. p.; Ben Gill, sec.-treas.; preceding, with C. D. Olney, and N. P. Ward, directors. Inc. April, 1904, in Ariz., as successor of the Jumbo & Vernal Extension Mng. Co. Cap., \$1,250,000, increased to \$1,550,000 in 1915; shares \$1 par; all issued. Securities Transfer & Registrar Co., N. Y., and Registration Surety Co., San Francisco, transfer agts. and registrars. Annual meeting 2nd Tuesday in July. Listed on New York Curb and in Salt Lake City.

Comparative Income Statement

Year Ending June 30

	Previous			Other	
	Cash Bal.	Receipts	Dividends	Expend's	Cash
1916	\$120,533	\$688,086	\$465,100	\$240,255	\$103,274
1915	29,100	473,335	125,317	256,585	120,533

Dividends: first dividend, 10c per share, was paid in July, 1911, out of proceeds of sale of Vinegorone fraction. Dividends since then have been as follows: Dec., 1914, 5c; March, 1915, 5c; Sept., 7½c; Dec., 10c; March, 1916, 7½c; June, 5c per share. Dividend for 3rd quarter passed.

On Jan. 1, 1912, the company had cash on hand \$106,575, and on Jan. 1, 1914, only \$9,350, a cash loss of \$97,000 in 2 years and nothing to show for it. In Dec., 1913, control of the property passed to C. S. Sprague and associates of Goldfield, with H. Schwaikert, New York, as president. In first 5 months of new arrangement, net profits were \$53,342. In August, 1914, stock sold down to 12½c per share. In October a rich orebody was found that started the stock on a sensational career, making it a storm center on the New York Curb, that lasted for several months. A time-worn and familiar but, nevertheless, effective trick played on brokers carried the price to \$4 in December, after which record it immediately dropped to lower levels.

In February, 1915, an apex suit was filed by the Reorganized Booth Mining Co. against the Jumbo Extension to recover \$900,000 for ore claimed to have been mined from one of the veins of the Goldfield Booth Co. and the mine was closed. Within a short time an agreement was reached whereby operations were resumed, pending the hearing of the case in May. The litigation was settled by the Reorganized Booth Mining Co. deeding to the Jumbo Ext. Co. all ore in the Velvet claim and in return the

Booth Co. was given 300,000 shares of Jumbo Ext. stock, the cause of the increase in Jumbo Ext. Co. capitalization, and also \$15,000 in cash. The Jumbo Ext. Co. now has side-line agreements with the Booth, Goldfield Cons. and Goldfield Merger Mines Co., thus protecting itself from all future litigation.

Property: 9 claims, 97 acres, in Goldfield district, Esmeralda Co., Nev. **Ore:** gold, silver and copper in a quartz vein, occurring on the contact between shale and latite, locally called "Goldfieldite." Vein strikes N.-S.; dips 30° E. The pay ore occurs in shoots averaging 4' in width. For geology of the district, see U. S. G. S. Prof. Paper, No. 66.

Development: by two shafts, one on the Paloverde claim, 1,017' deep, and the Original Velvet, or No. 2 shaft, on the Velvet claim, 400' deep, until May, 1915, when work was started on enlarging it from a 2-compartment to a 3-compartment shaft and sinking to the 1,017' level, where connection will be made with No. 1. In June, 1916, sinking had reached a depth of 900'. Shaft is equipped with 100-h. p. double drum hoist and Cameron pump. Air is supplied from the 16-drill compressor at No. 1.

During the first quarter of 1916 development work from No. 1 shaft totaled 2,430' and cost \$6.86 per foot. The Velvet shaft and the 770 and 880' stations were completed in this period.

Ore reserves: estimated at end of fiscal year, June 30, 1915: (none given for 1916)

Mill ore on dump.....	1,500 tons
Shipping ore	49,500 tons
Milling ore	35,750 tons

Total 86,750 tons

Average grade of shipping ore was figured at \$41.21 per ton and the milling ore at \$8.67 per ton.

The company's leased mill at Bonnie Clare, Nev., was shut down June 10, 1914, and ore was sent to the mill of the Goldfield Cons. Milling & Trans. Co. until Sept. 10, 1914. The ore was not susceptible to the treatment used there and experimental work has since been carried on to find a satisfactory milling process, but without success thus far.

Production: for fiscal year ending June 30:

	Ore Tons	Gross Value	Loss in Treatment	—Value— Total Per Ton	
1915:					
To smelter.....	10,873	\$669,560	\$51,161	\$618,399	\$56.87
To Cons. Mill (3 mos.)	5,547	81,850	49,302	32,548	5.87
1916:					
To smelter.....	35,541	1,124,487	153,703	970,785	27.32

Total output in 1915 was 22,562 tons, yielding \$403,827 net, of which \$333,750 was paid in dividends. The ore contained 1,259,388 lbs. copper, 30,480 oz. gold, and 99,459 oz. silver. Earnings for first quarter, 1916, reported as \$64,120.

Net operating expense for the last fiscal year was \$15.656 per ton; \$2.91 for mining, \$2.49 for development, \$9.26 freight and treatment on ore shipped, \$1.17 for general expense, etc. Total mining, development, repair and other costs for first quarter of 1916 were \$5.34 per dry ton of ore.

It is evident that the property has been forced to pay dividends for stock market effect. The Bonanza orebody, 150' long and 56' vertical, was greatly over-estimated. The boosting of the price to \$4 a share was a case of rank market rigging by brokers, the real value being believed to be less than \$1.00. Property has, however, possibilities of further ore and needs

development. Reported by the management in August, 1916, that "No new commercial ore has been opened in the mine for the past six months and the production has come entirely from the one ore-shoot first opened 18 months ago. The drain on this one ore-shoot has been very heavy and the end of the productive life of the mine is not remote, unless further development discloses new orebodies. Engineer Turner's plan of development will require at least \$100,000. It is also the purpose of the company, in order to perpetuate the corporation, to acquire a new producing property."

It is worthy of note that the property produced 1,259,388 lbs. copper in 1915, sold at an average price of 14.33c per lb., which at early 1916 prices gives a profit of double that of 1915. **Production:** for first quarter of 1916, was 9,230 tons smelting ore sold, and 99 tons dump ore, which realized \$247,192 gross, or \$120,062 net; mining costs \$3.07 per ton.

JUMBO JUNIOR MINING CO.

NEVADA

Goldfield, Nev. **Inc.** 1915 in Nev. **Cap.** \$1,500,000; shares \$1 par. Stock listed on San Francisco Exchange. **Property:** the Spearhead Fraction claim, 6 acres, located between the Velvet, Kewanas and Spearhead properties at Goldfield, purchased of the Spearhead Fraction Mining Company, is merely a prospect.

JUMBO MINING CO.

IDAHO

Wallace, Idaho. John Carlson of Gem, J. N. Morgan of Mace and John Wood, C. E. Conn and Chas. Minch of Gem, Idaho, incorporators. **Inc.** Aug. 28, 1913. **Cap.** \$1,000,000, shares \$1 par. No returns secured.

JUMPER CALIFORNIA GOLD MINES CO.

CALIFORNIA

Stent, Calif. P. E. de Caplaine, pres., W. D. Waltman, v. p., Lester S. Grant, mgr. **Property:** 120 acres at Stent, Tuolumne Co., Calif., on the Mother Lode, is developed to depth of 1,800' by an incline shaft. **Equipment:** includes a 60-ton 20-stamp mill. The mine was operated by 7 sets of lessees in 1915 who are reported to have produced \$10,000 worth of ore in 10 months, ending August, 1915. Company receives 25% royalty and charges \$1 a ton for milling ore extracted.

JUNE BUG DEVELOPMENT CO.

NEVADA

Office: Ogden, Utah. **Mine office:** Las Vegas, Clark Co., Nev. **Directors:** Lester S. Scoville, pres.; Milton J. West, v. p.; Frank L. Scoville, sec.-treas.; above with John Hochett and Walter B. Scoville. Milton J. West, mgr., L. S. Scoville, supt. **Inc.** Jan., 1916. **Cap.** \$100,000, shares 10c par; 825,000 issued. Annual meeting Jan. 4th.

Property: 9 claims, surveyed for patent, 18 miles N. W. of Las Vegas, in the Good Springs district, Nev., said to show gold, silver and zinc ore. Pay ore occurs in shoots 30' long, from 6-10' wide and from 14" to 5' thick, reported to assay 40% zinc, \$1.50 gold and \$4 silver per ton. The ore is a zinc silicate. Veins are in limestone formation.

Development: by shallow shafts and about 1,200' of underground workings. Shipments of 650 tons for 4 months ending June, 1916, to the Utah Ore Sampling Co., returned \$35,000. Management reports that company is marketing sufficient ores to take care of all extensions and new developments, 1916.

JUNE COPPER CO.

WASHINGTON

H. S. Spedden, supt., Chewelah, Stevens Co., Wash. **Inc.** June, 1913, in Washington, by R. C. Toole, L. B. Cottingham and W. L. Hansom. Presumably owns the June-Echo mine near Chewelah, where a 40-h. p. gasoline hoist has been installed and a 200' shaft sunk. Vein shows copper-silver ore. Reported under lease to J. W. Douglas, 60 Wall St., New York, in May, 1915.

JUNE GROUP.**BRITISH COLUMBIA**

See Copper Mountain Mining & Development Co.

JUNIATA GOLD & COPPER CO.**ARIZONA**

Office: 315 South Broadway, Los Angeles, Cal. **Mine address:** Parker, Yuma Co., Ariz. **Officers:** P. W. Powers, pres.; E. S. Field, v. p.; Dalton S. Patterson, sec.-treas.; H. B. Ailman, supt. **Inc:** Oct. 29, 1907, in Arizona. **Cap.**, \$1,000,000; shares \$1 par. **Property:** 10 claims, 200 acres, lying between the Gray Eagle and Carnation mines, in the Seneca district about 9 miles N. E. of Parker, on the E. side of the Colorado river. Claims show gray micaceous schists with interbedded limestone. The schists dip about 45° and are cut by shear zones in which copper ores occur. **Development:** by 200' shaft with 2 prospect shafts reported to expose 8' of ore carrying 4% copper and \$9 gold per ton. A second vein said to be 18' wide is reported to carry 2½% copper and \$6 gold. Property is a prospect. No recent returns secured.

JUPITER MINES, LTD.**ONTARIO**

Succeeded, 1915, by the McIntyre-Jupiter Mines, Ltd., which see.

JUSTICE GOLD MINING CO.**NEVADA**

Goldfield, Nev. Officers: O. M. Justice, pres.; John La Foe, v. p.; Mrs. A. B. Hays, sec.-treas.; C. W. Hays, gen. mgr., with J. R. West, directors. **Inc.** 1914, in Nevada. **Cap.**, \$1,000,000; shares, \$1 par. Stock listed on San Francisco Stock Exchange. **Property:** the Gold Coin Extension claim in the Diamondfield section of the Goldfield district and a lease on the adjoining property of the Diamondfield Daisy Gold Mining Co., which carries a 2½' vein of gold-copper ore running from \$18-\$39 per ton.

Development: by 265' Daisy shaft, with crosscuts, drifts and stopes. Several carload shipments in 1915 from stope above the 265' level reported to have yielded \$70 per ton.

KAMLOOPS COPPER CO.**BRITISH COLUMBIA**

General office: 609 First National Bank Bldg., Duluth, Minn. **Mine address:** Kamloops, Yale district, B. C. **Officers:** E. G. Wallinder, pres.-mgr.; W. H. Eaton, v. p.; Louis Ramstad, treas.; J. J. Eklund, Reiner Hoch, C. E. Evans, Theodore Michel, Otto Johnson, directors; W. W. Blackshaw, sec., 1412 Tower Ave., Superior, Wis.; Arthur Wallinder, supt. **Inc:** Sept. 7, 1909, in Arizona. **Cap.**, \$3,000,000, shares \$10 par, part paid; 128,561 issued, none preferred. Has issued \$282,100—6% bonds.

Property: 10 claims, 2,041 acres, 228 acres mineral land, including the Iron Mask mine, 4 miles S. W. of Kamloops. The Iron Mask shaft is sunk on a shear zone, mineralized for 20 to 30' in width, with segregations of better grade ore forming a paystreak of variable width, carrying chalcocopyrite, associated with magnetite in a choric gangue containing orthoclase intercrystallized with copper sulphide. The country rock is a diorite with smeary basic patches of gabbroic material. The Iron Mask orebody averages 28' in thickness, but is lenticular in shape. The ore averages 5% copper, 0.2 oz. silver and .09 oz. gold per ton. It is troublesome to concentrate by ordinary methods owing to its chloritic and quartz-orthoclase gangue.

The mine shows several orebodies besides the Iron Mask, all of them due to "igneous aftereffects," and occurring in fresh diorite, filling fissures as replacements along fissures and in patches, the ore consisting of orthoclase, chlorite, epidote and other secondary pneumatolytic minerals, with interlocked chalcocopyrite, pyrite, magnetite, etc.

The Erin orebody shows excellent ore and numerous pits at various points on the property all show ore.

Development: includes the 780' Iron Mask shaft and some 9,000' of workings, on 9 levels; the 330' Erin shaft sunk on ore for 300' with 600' of drifts and crosscuts; the 50' Lucky Strike shaft and 3 other prospect shafts. Electric power is obtained from the City of Kamloops power station.

Equipment: includes one 150-h. p. compressor, one 225-h. p. motor for the "Iron Mask" hoist and 8 smaller motors, 6' double-drum hoist, 3 air compressors of 1,300 cu. ft. capacity, good for 15 drills, an electric-light plant and a sawmill. Transportation is by a good wagon road with steep grades, leading to the railway siding below Kamloops. The management plans a 2½-mile tram, having a drop of 1.100'.

Company reports mining costs at \$1.12 and concentration costs at \$0.28 per ton, which low figures are regarded as a result of not charging up general expenses, development, etc., to costs.

Property is valuable but needs churn drilling as Iron Mask mine alone is not a sufficient basis for a big company, and surrounding ground, while mineralized, is unproven. **Ore reserves:** of Iron Mask and Erin mines claimed to be 1,800,000 tons of 2½% copper ore. Mine shows a large tonnage of low-grade ore susceptible to concentration by froth flotation. The old 160-ton concentrating mill has been enlarged to a 30 ton per hour capacity. **Production:** Jan. 1, 1915, was 1,500,000 lbs. of copper, 5,548 oz. silver and 807 oz. gold. Property not worked in 1912, company husbanding its resources to meet payments on the property. Operations in 1913 were confined to ore extraction from the Erin shaft and to cleaning up the old Iron Mask workings.

In 1915 considerable crosscutting and raising was done from the 750' level and a crosscut started on that level toward the Erin mine, 1,500' distant. It is understood that the English corporation has extended the time for further payments on the property. About 2,000 tons of ore and concentrate were shipped in 1915.

KAMLOOPS MINES, LTD.

BRITISH COLUMBIA

Office: 151 Coronation House, 4 Lloyds Ave., London, E. C., Eng. Company in hands of trustees, as property is under lease and bond to the Kamloops Copper Co.

KANSAS CITY-JOPLIN MINING CO.

MISSOURI

Office: West Fourth St., Joplin, Mo. Is reopening the Red Lion mine at Joplin, Mo. Has a 200-ton mill on the property.

KANSAS CITY-NEVADA CONS. MINES CO.

NEVADA

Office: 411 Commerce Bldg., Kansas City, Mo. **Mine office:** Bruner, Nev. **Officers:** E. C. Sooy, pres.; E. M. Ridenour, 1st v. p.; C. R. Jones, 2nd v. p.; B. H. McGarvey, treas.; R. E. Bruner, sec.; H. W. Bruner, gen. mgr., with Jas. B. Welsh, H. M. Wheaton and Wm. J. Morse, directors.

Inc. 1915 in Nev. **Cap.,** \$6,000,000; shares \$1 par; 1,500,000 shares in treasury, Feb. 1916. Company gave 100,000 shares for the property of the Big Henry Gold Mining Co.; 2,000,000 shares to redeem the outstanding stock of the Phonolite Paymaster Mng. Co.; 800,000 shares to redeem the outstanding stock of the Phonolite Silent Friend Mng. Co., and 1,600,000 shares for the Duluth Gold Mng. Co. holdings, in the Bruner district, Nye Co., Nev.

The Paymaster property has about ½ mile of underground workings. In the main 1,000' tunnel an orebody, 110' long, has been opened up, reported to carry gold-silver ore averaging \$20 per ton. Management plans extensive development in 1916.

KANSAS COPPER CO.

ALASKA

Inactive. Inc. by W. G. L. Totten, Buckannon, W. Va., J. C. McWhor-

ter, E. W. Martin, U. G. Young and G. F. Smith, to operate copper and other mines in Alaska.

KANSAS NEVADA MINING CO.**NEVADA**

Goodsprings, Clark Co., Nev. **Officers:** Frank Williams, pres.; Chas. Locknow, v. p.; J. T. Bristow, sec.-treas.; with John Williams and Thos. Williams, directors.

Inc. July 16, 1907, in Nev. **Cap.**, \$1,000,000; shares \$1 par; 706,895 outstanding. Operating expenses for 1915 were \$2,128 and gross earnings from ore sales were \$1,560.

Property: 3 unpatented claims, about 53 acres, 9 miles W. of Goodsprings, shows zinc, lead and silver ore in a 4' vein in limestone formation. The vein runs E. W. and dips N. Developed by 500' tunnel to depth of 130'. An initial shipment of 53 tons of ore made in 1915 averaged \$30 per ton.

KATE HARDY MINES CO.**CALIFORNIA**

Office: Bacon Bldg., Oakland, Calif., A. D. Grant, supt. **Property:** the Kate Hardy mine and mill at Forest, Sierra Co., Calif., has been operated intermittently since 1860 and is credited with a production of over \$225,000 in gold. Six veins have been cut on the property from 6-10' wide, carrying mainly oxides, but some sulphides. The main vein runs N. 20° W. and dips about 80° W. Pay ore occurs in patches of free gold and auriferous arsenopyrite. Developed by several tunnels, longest 600'. **Equipment:** includes a 3-stamp mill, 1 classifier and Wilfley tables. Geology fully described in U. S. G. S. Bull. 580, p. 181.

KATINKA GOLD MINING CO.**COLORADO**

Owns property at Guyot Hill, operated under lease 1915 by Progressive Gold Mining Co. Chas. Warden, mgr. Work stopped Jan. 1916 by threatened apex litigation.

KATTENHORN BROS. MINE.**NEVADA**

Battle Mountain, Lander Co., Nev. **Property:** 3 claims, 54 acres, unpatented, in the Pittsburgh mining district. Gross earnings reported for 1914, \$80,000, all from ore sales; operating expense, \$60,000.

Ore: silver in fissure vein in limestone and quartzite with N. W.-S. E. strike and dip of 55°, said to assay 200 oz. silver per ton. **Development:** 1,800' tunnel, with 3,000' of workings; greatest depth 200'.

Production: amounted to 750 tons ore, yielding 150,000 oz. silver in 1914. No production in 1915.

KAUFMAN & RANDALL MINE.**NEVADA**

Charles Oberg, lessee, Yerington, Nev. **Property:** in west side of Yerington district, Lyon county, Nev., shows 12 to 15' of oxidized ore containing cuprite from which shipments to the Wabuska smelter are said to have yielded \$615.80 per ton net.

KAY COPPER CO.**ARIZONA**

S. J. Tribolet, pres. and mgr., Phoenix, Ariz. Company owns the Starkweather mine and claims on the Agua Fria river, at the mouth of Black Canyon creek, 50 miles N. of Phoenix and some 9 miles from Cave creek. Past reports indicate that company developed a body of high-grade ore. The main shaft, 340' deep, is said to have shown 17' of 10% ore on the 260' level and 8' of gray copper ore, averaging 17.7% copper, on the S. drift of the 300' level. No recent report on the mine, presumably idle.

KAY MINE SMELTING CO.**VIRGINIA**

Address: R. F. D., No. 2 South Boston, Va. **Officers:** Z. L. Kay, pres. and gen. mgr.; J. R. Wilbourne, v. p.; H. P. Wilder, sec.; H. J. Watkins, treas., and Jas. S. Sebree, directors. **Inc.** Aug. 8, 1905, in South Da-

kota. **Cap.**, \$1,000,000; shares \$1 par; 525,000 shares paid Z. L. Kay for property; 200,000 issued.

Property: 261 acres, comprising the Kay farm at the N. end of the Virgilina district, 9 miles from South Boston, in Halifax county, Virginia. The tract shows lenticular quartz veins enclosed in schistose rocks formed from old volcanic tuffs and andesite, of the type characteristic of the Virgilina district. Veins consist of white quartz and carry primary copper glance below the water level with carbonates, oxides and some native copper in the oxidized zone. The vein varies from 3 to 6' in width and is said to be traceable 1 mile.

Development: by two 50' shafts, said to show ore averaging 4.8% copper with small values in gold and silver. Owner estimates 1,000 tons in sight. There is a 15-h. p. gasoline hoist and a 1-drill compressor. A trial shipment of ore was sent to the Reid electric smelter, Newark, N. J.

Development money is supplied by local residents, the work being contingent upon their ability to supply the funds. As work has been intermittent since 1905, and property now has but 109' of workings, the outlook is not very hopeful. The future of the entire district, including this property, depends upon the use of some cheap method of concentration, which froth flotation apparently supplies.

KEARNS-KEITH MINING CO.

UTAH

Thomas Kearns, pres.-gen. mgr. and David Keith, v. p., Salt Lake City, owners. Is a privately owned corporation, which is being sued by the Keystone Mining Co. for \$1,500,000 for alleged illegal extraction of ore in 1901-1907.

KEATING GOLD MINING CO.

MONTANA

Office: care Jesse B. Roote, Lewisohn Bldg., Butte, Mont. Mine near Radersburg, Mont. **Officers:** Julius H. Barnes, pres.-treas., Duluth, Minn.; Jesse B. Roote, v. p.; A. P. Barnes, sec.; preceding with Ward Ames, Jr., and A. T. Banning, Jr., directors.

Inc. 1908 in Mont. **Cap.**, \$2,000,000; shares \$5 par; 375,000 issued. No dividends to date. Superior State Bank, Superior, Wisc., registrar and transfer agt. Annual meeting 1st Tuesday in June. Listed on Butte Stock Exchange.

Property: 19 patented claims, about 300 acres, contains the Keating gold vein in andesite with a number of other veins, two of which have been worked. The Keating is a strong fissure vein with well defined walls and quartz-pyrite filling with more or less calcite. The ore is pyrite, frequently very coarsely, but massively crystalline, with some chalcopyrite and no visible gold, only occasionally showing gray copper, lead or zinc sulphides. The pay ore varies from a few inches to 8' in width, the average stopping width being about 3'. The value cannot be estimated from the amount of pyrite present, nor from its physical character but must be determined by assay. The ore shipped for several years past has averaged about 1% copper.

Development: to the 1,200' level has been by an inclinal shaft on the vein with a vertical southerly shaft, now idle, down to the 600' level. Cross-cutting to adjacent veins has disclosed ore but not in large amounts. The geology is described by Stone in Bull. 470, U. S. G. S., p. 93-96.

Equipment: ample for an output of 100 tons a day. As the mine is wet and the water from the old stopes very acid the pumping item is a large one.

Production: for 9 years has aggregated about \$4,500,000, but without profit to the stockholders, heavy teaming charges with freight and smelter

treatment costs aggregating over \$7.00 a ton, having absorbed temporary profits. Lack of railway transportation and failure to mill the ore is therefore responsible for the present financial position of the company.

It is understood that measures are being taken to develop the mine to the 1,500' level and to erect a 50-ton mill to treat the ore at the mine. A careful investigation of the ore treatment problem is being made by experts. 1916. The mine was examined by Walter Harvey Weed, Jan., 1916.

KELLOGG SUNNYSIDE MINING CO.

IDAHO

Jacob Thorpe, pres., Kellogg, Ida. Inc. April, 1916. in Idaho. **Cap.**, \$150,000; shares 10c par. J. A. McEachran, S. A. McCoy and Geo. H. Wilson of Spokane, incorporators.

KELLY MINE.

NEW MEXICO

Kelly, Socorro Co., N. M. Owned by Tri-Bullion Smelting & Development Co.

KELVIN-SULTANA COPPER CO.

ARIZONA

Office: 339 Monadnock Bldg., Chicago, Ill. **Mine office:** Kelvin, Pinal Co., Ariz. **Officers:** A. H. Westfall, pres.; Geo. P. Baldwin, v. p.; H. Carman Lutkin, sec.; Jas. W. Nye, treas.; preceding with Jas. A. Russell, Donald G. Ross, and Dr. J. A. Glenn, directors. A. L. Flagg, supt. Inc. April 19, 1910, in Arizona. **Cap.**, \$3,000,000, increased Dec., 1914, to \$5,000,000; shares \$1 par, nonassessable; issued 3,842,752 shares. Authorized bond issue to Nov. 1, 1919, \$200,000, \$198,700 outstanding. Company was a reconstruction of the Sultana-Arizona Copper Co. financed by the Baldwin Syndicate of Chicago and the entire floating indebtedness eliminated.

Property: 21 claims and 3 fractions, 530 acres; all patented but 2 claims and fraction, in Ray-Kelvin district, Pinal county, Ariz. Company also owns 30 acres of gold and silver lands in Ures district of Mexico.

The Arizona mines were formerly known as the Riverside and Bryan groups, and are across the Gila river from and 1½ miles S. E. of Kelvin. Management reports 21 contact deposits, between granite and diorite, of which 5 veins have been developed; reported as 18" to 6' wide, and estimated to average 5' in width, with a generally N. W. trend. The property also was said, formerly, to show a 6' vein carrying chalcopryrite in the lower workings, from which shipments to the Humboldt smelter returned 8.7 to 10.6% copper. Average tenor of ore in all veins is estimated by the company as 6% copper and 3 to 4 oz. silver per ton.

Development: by 6 shafts, deepest 590', and the Hunter and Agnes tunnels. About 10,000' of underground work has been done and is said to show widening of veins at depth. A 165' shaft on Diamond Joe claim is reported by Ralph Harris, mining engineer, to cut cuprite, chalcocite, chalcopryrite and pyrite. Vein No. 2 is said to show 6' of 4% ore and in a winze from the 300' level 3' of 6% ore. On the Bryan claim, a 175' incline shaft has exposed shipping ore, reported to be very rich.

A crosscut on the 540' level, being driven 2,000' and 1,267' long, Feb. 1916, is reported to have intersected 3 veins which are now under development; No. 510—a vein 4' wide, carrying 2% copper ore and No. 510-b, about 1' wide, with from 3-17% copper, 4½% lead and 2½ oz. silver.

Equipment: includes a 575-h. p. oil-burning electric plant, a 1-mile aerial tram across the Gila river, to the railway station of Kelvin and a concentrator of 200 to 300 tons daily capacity.

Production: of old company, to end of 1909, was 522 tons of ore, yielding \$12,450. Production in 1907 was 45,838 lbs. fine copper and 653 oz. silver. Daily shipments of 20 tons to the Hayden smelter were made in summer of 1913. The mill has been closed down until sufficiently large

reserves have been blocked out to insure profitable operation. Lessees are working on the surface and have made shipments said to average 8-14% copper.

Company not favorably regarded.

KELVIN TUNNEL SITE & MINING CO.

ARIZONA

Letters to J. D. Ferree, pres.-treas., P. O. Box 126, Phoenix, Ariz., returned unclaimed. N. Nelson, v. p.; W. S. Mahin, sec.; Thos. Hall, supt. Inc. 1906 in Arizona. **Cap.**, \$2,000,000; shares \$1 par. Authorized bond issue \$100,000; \$40,000 bonds issued.

Property: 11 claims and a fraction, 230 acres, and a 5-acre mill site in Riverside district, 2¼ miles from Kelvin, Pinal County, Ariz.

Development: since 1906 consists of an 8x9' tunnel, in 700', at last accounts, which cuts 4 veins. Unselected average ore said to have assayed 2.10-9% copper; \$1.24-\$5.92 gold-silver and 9.60% iron per ton. Five men employed. Assessment work only being done.

KENAI-ALASKA GOLD MNG. CO.

ALASKA

Jas. Hayden, mgr., Seward, Alaska. **Property:** on Great Falls Lake, adjoining the Skeen-Lechner. shows a 2' vein, cut on the 260' level, which is said to carry ore mining better than \$60 per ton. **Developed:** by 1,700' of tunnels and stopes. **Equipment:** includes 5-stamp mill, operating since 1914 and a 6,000' aerial tram connecting mine and mill.

KENEFICK ZINC CORPORATION.

MISSOURI

Controlled by United Zinc Smelting Co., which see. **Office:** 115 Broadway, New York. **Officers:** Wm. Kenefick, pres.; Arthur Day, v. p.-treas., with Russel Cowles, C. Buckman, Arnold Davis, C. V. Jones and Paul H. Easley, directors. A. Anderson, sec. Inc. Feb. 2, 1916, in New York. **Cap.**, 5,000 7% preferred shares at \$100 par and 200,000 shares of common stock of no par value; all issued. Stock listed on New York Curb.

Dividends: two of 10c each were paid on common stock to May 1916. After payment of a 7% dividend on preferred and \$1.20 annually on common stock, 50% of net earnings are to be applied to the retirement of the preferred stock at par. Empire Trust Co., New York, transfer agts. Bankers Trust Co., New York, registrar.

Property: includes 5 producing zinc mines: the Samson and Coyote mines at Joplin, the Media and Electric at Webb City and the Milan mine and mill at Prosperity, Mo.; company also owns and operates 4 mills with total daily capacity of 3,000 tons.

Production: in 1915 was 30,000 tons of high-grade zinc concentrates, assaying 60% zinc with only a small percentage of lead.

KENNEBEC MINING CO.

UTAH

W. J. Craig, pres.-mgr.; S. M. Levy, v. p.-sec. Inc. in 1901. **Cap.**, \$400,000; shares \$1 par; 130,000 shares in treasury.

Property: 30 patented claims, about 400 acres, in the South Fork of the Big Cottonwood district, Salt Lake Co., Utah, adjoins the Cardiff on the east and west and the Wasatch Mines and Columbus Extension on the north.

Development: by a 700' incline shaft, a 3,000' lower tunnel and an upper tunnel, now being extended to intercept the main vein.

Property is an old-time silver-lead producer and has been under development by present management for many years.

KENNECOTT COPPER CORPORATION.

ALASKA

Office: 120 Broadway, New York. **Officers:** Stephen Birch, pres.; Wm. Pierson Hamilton, v. p.; Thos. Cochran, H. O. Havemeyer, Elliot

C. Bacon, S. W. Eccles, Seward Prosser, Samuel J. Clarke and John N. Steele, directors. C. T. Ulrich, sec.; E. S. Pegram, treas. Inc. April 29, 1915, in New York Cap., \$6,000,000, increased May 1915 to \$15,000,000, in 3,000,000 shares, fully paid and non-assessable.

On December 31, 1915, there were outstanding 2,754,625 11-13 shares of the stock, issued for the following purposes:

	Shares
Cash (original incorporation).....	100
For Kennecott Mines Co. property, assets and liabilities.....	599,900
For Beatson Copper Co. property, assets and liabilities.....	119,996
For 404,504 shares of Utah Copper Co.....	606,756
For all C. R. & N. W. Ry. Co. stock and bonds, and 13,000 shares of Alaska S. S. Co. stock.....	200,000
For 1,330,280 shares stock of Braden Copper Mines Co. and \$5,887,000 bonds of Braden Copper Mines Co.....	771,593 11-13
For \$9,782,000 Kennecott Copper Corporation bonds.....	391,280
Compensation to Underwriting Syndicate.....	65,000
Total	2,754,625 11-13

Bonds: authorized, (June 1, 1915) \$10,000,000 1st mortgage 6% 10-year convertible Sinking Fund Gold Bonds. An initial dividend of \$1 was declared Feb. 1916, calling for the disbursement of \$2,780,583. D. A. Crockett, 120 Broadway, transfer agt.; Bankers Trust Co., New York, registrar. Annual meeting first Tuesday in May. Stock listed on New York Exchange.

Property: Alaskan holdings of the Corporation include the Kennecott and Beatson mines; also 17 patented claims, 216 acres, at Latouche.

The **Kennecott** group, 3 miles from Kennecott on the C. R. & N. W. R. R. includes the Bonanza and Jumbo mines, with 22 additional patented lode claims and 14 patented placer claims, 2,314 acres.

The **Bonanza** mine has one of the most remarkable orebodies ever found by a prospector. This great mass of high-grade ore, much of it carrying 60% copper, outcrops on the crest of a precipitous mountain overlooking the Kennecott river, a tributary of the Chitina, which flows into Cooper river. In 1912 the ore reserves were estimated at 30,000 tons of 50 to 60% ore and 54,000 tons of 30% ore carrying \$13 per ton in silver, with 30,000 tons of broken ore as a talus pile beneath the outcrop. Recent development has indicated non persistence in depth.

There are no large masses of oxides or carbonates present, as glaciation and active erosion prevent the formation of an oxidized capping. The ore outcrops as massive chalcocite averaging about 50% copper and 0.2 oz. silver to each per cent copper. It was thought at first the chalcocite was primary, but later development showed chalcopyrite to be primary.

Geology: the various mining claims show Nicholai greenstone, consisting of a number of basaltic flows of lava, a hard close grained rock considerably altered and in places amygdaloidal, varying in color from brown to light green. The greenstone is overlaid by massive beds of Chitistone limestone of Triassic age, with bedding planes parallel to the flow planes of the lava, the limestone being of a bluish color, weathered to gray at the surface. There also are diabase and andesite intrusions and dikes.

Ore occurs in more or less irregular replacement masses and in a fault zone, the orebodies being more or less parallel to the vertical fault planes, though the ore follows, to some extent, minor fault planes, as well as the bedding planes of the limestone making stockwerks and irregular masses in the crushed limestone. The outcrop is 20 to 40' wide, with an average of about 25', and is something over 400' in length, the southern half showing 2 nearly parallel bands of chalcocite, 4 to 10' in width, separated by about 10' of limestone, showing breaks in places, and at the northern end of the outcrop the chalcocite bands give place to stringers and interlacing seams of chalcocite and azurite, which thin out as they follow the vein northward and fade out as they pass into barren limestone.

In addition to the Bonanza outcrop there was a large amount of ore in the talus, or slide rock, broken off from the outcrop. This mass of broken ore and rock was about 300' wide, extending for about 500' or more down the slope from the outcrop, varying from 3 to 20' in depth. A number of testpits, sunk to the outcrop, showed an average of 4' depth, with an average assay of 13% copper, this including both boulders of chalcocite up to 200 lbs. in weight and barren limestone. Ore is extracted from the slide by a system of cuts. Two grades of ore mined with 70% and 14% copper, respectively.

Development: to depth of 1,130' is by tunnels. The highest tunnel, at an elevation of 6,200' above the sea level, extends through the vein, near the southern end of the outcrop, from the western face of the ridge, and there is a small system of workings from the eastern slope of the ridge, further north, the latter comprising an upper tunnel extending through the ridge, and a longer lower tunnel of about 300' length, directly underneath, with had 10,500' of workings, Jan. 1, 1916.

The **Jumbo** mine is also being worked and had 9,692' of underground workings, Jan. 1, 1916. Orebodies on the 500' lowest level are larger and

higher grade than on the upper levels. In stope 581, ore has been developed for a width of 50' and will average 70% copper. The Jumbo mine has been under development since 1912 and up to August 1, 1915, shipped 35,000 tons of ore averaging 39% copper, from development work only.

The Bonanza mine is connected with the mill at the lower camp by a Bleichert aerial tram, in 2 sections, the upper of 7,000' and lower of 8,000', with a drop of 4,000'. The tram line has 40 towers, longest span 1,500', with ore bins at both terminals, and has an estimated hourly capacity of 25 tons. The lower camp has the mine buildings, power plant and mill. **Equipment:** includes a small steam plant and an air compressor. Buildings include a bunk house, mess house, assay office and 10,000' sawmill.

The 700-ton concentrator is equipped with Blake & Symonds crushers, Hancock jigs, bull jigs, rolls, Wilfley and Deister tables. Mill recovery averages about 85% and concentrates produced about 54% copper. The average grade of ore treated in 1915 was 10.20% copper. Rich ore is hand-sorted, and lower grade ores, though of excellent average tenor, are being concentrated in the mill and ore and concentrates shipped to the Tacoma smelter. An ammonia leaching plant is being built to treat the tailings from the concentrator.

Guggenheim interests have constructed the Copper River & Northwestern railway, at a cost of about \$20,000,000, this line of 195 miles length starting at Cordova, on the sea, and ending at the lower camp, having had to cope with tidal, river and glacial floods, blizzards and other difficulties inseparable from railway operations in an extremely mountainous country near the Arctic circle.

The **Beatson** mine comprises 17 patented claims, 268 acres, about 3 miles from the northern end of Latouche island, within one-half mile of tide-water, where there is a good natural harbor. Mine was located, July 4, 1897, by Andrew K. Beatson, and began shipping, 1903. Country rock is slate; ore is chalcopyrite, pyrite and pyrrhotite, occurring in brecciated portions of the country rock. The orebody is a large lens; total length developed is about 800' with an average width of 100'. Ore assays up to 30% and as shipped has returned 8% to 10% copper and 2 oz. silver per ton.

Development: includes 9,700' of underground workings. The ore is mined in an open pit and dropped through mill holes to the main tunnel level. Mine and mill are connected by an aerial tramway. A 700-ton concentrator, employing the oil flotation process and completed Feb. 1915, is to be enlarged to handle 1,000 tons a day. The average grade of ore milled, 1915, was 2.23% copper; average recovery 77.17%; concentration ratio 9.21, and average grade of concentrates produced 15.87%. Buildings include rooming, mess and change houses, office, store and a hospital with physician in charge.

Production: during seven months ending Jan. 1, 1916, approximately 63,000,000 lbs. of copper. Total costs were as follows:

Mining and milling, 1.19c per lb.; freight to smelter, 2.18c per lb.; smelting and refining, 1.37 per lb.; selling, .18c per lb.; general expense, .06c per lb.; marine insurance, .09c per lb.; proceeds silver contents, *.52c per lb., misc. earnings, *.01c per lb.; total, 4.54c per lb.

* Deduction. The average selling price of copper for the 7 months was 19.36c per lb. The average product shipped from both mines during the 7 months averaged 60.11% copper. Production for the first 6 months of 1916 was 61,400,000 lbs. copper.

The following figures show past production, costs and profits of the two Alaska companies prior to their acquisition by the Kennecott Corporation:

Kennecott Mines Co.:	Net Lbs. Copper	Cost per Lb.	
	Produced	Inc. Selling	Profit
1915 (5 months).....	14,240,412	4.00 cts.	\$1,522,747
1914	13,988,273	5.78 cts.	1,104,645
1913	14,621,834	5.48 cts.	1,424,635
1912	22,366,478	4.43 cts.	2,633,568
1911 (9 months).....	21,007,096	4.19 cts.	1,656,205
	<u>86,224,093</u>	4.57 cts.	<u>\$8,341,803</u>
Beatson Copper Co.:			
1915 (9 months).....	1,970,947	11.41 cts.	122,504
1914	5,286,667	8.75 cts.	241,895
1913	5,178,629	8.36 cts.	353,239
1912	3,254,858	9.74 cts.	221,116
1911 (9 months).....	3,078,444	7.44 cts.	163,939
	<u>18,769,545</u>	8.78 cts.	<u>\$1,102,696</u>

Management estimates 5 years ore supply blocked out at the past average rate of production.

The **Braden Copper** and **Utah Copper** companies are described under their respective titles.

KENNECOTT MINES CO.

ALASKA

Entire property, assets and liabilities purchased, May 27, 1915, by the Kennecott Copper Corporation, which see.

KENNEDY CONS. GOLD MINING & MILLING CO.

NEVADA

Office: Yerington, Nev. Mine at Buckskin, Douglas Co., Nev. **Officers:** W. C. Pitt, pres.; W. T. Campbell, v. p.; E. H. Whitacre, sec.; Lyon County Bank, treas.; Geo. F. Willis, T. Ebert, F. E. Baker and F. C. Biddleman, directors. **Inc.** May 16, 1906, in Arizona. **Cap.**, \$1,500,000; shares, \$1 par, nonassessable; 1,000,000 promotion and 500,000 treasury stock; issued, 1,039,000. Annual meeting, second Tuesday in May.

Property: 7 claims, 110 acres, patented, in Buckskin district, Douglas Co., Nev., developed by 3 shafts, 90', 147' and 220' deep and by one 240' tunnel, said to expose some large bodies of ore, mostly sulphides with gold, silver and copper. Mine is 4 miles from Nevada Copper Belt railroad and has power line within 1 mile.

KENNEDY GOLD M. & M. CO.

COLORADO

Georgetown, Clear Creek Co., Colo. David Kennedy, mgr., at last accounts. **Property:** the Centennial mine, 640 acres, shows cupriferous gold and silver ores in a 30" paystreak, assaying up to 24% copper, 5 to 50 oz. silver and 3 to 5 oz. gold per ton. Has steam power.

KENNEDY MINING & MILLING CO.

CALIFORNIA

Office: 409 Montgomery St., San Francisco, Calif. Webb Smith, supt. **Cap.**, \$100,000; shares \$100 par. **Dividends:** to date \$1,831,000; last payment 3c, April 10, 1916.

Property: 9 claims, covering 3,100' on the Mother Lode, includes the Kennedy mine adjoining the Argonaut, 1 mile north of Jackson, Amador Co., Calif. The Kennedy vein, one of three veins in the Lode, outcrops in andesite passing downward into Mariposa slate, following roughly the contact between the two rocks. The vein dips 57° E. and the payshoots rake to the north. The best ore occurs near the footwall over a black gouge 1-2' thick.

Development: by 3 shafts; the vertical south shaft, 2,300' deep, north shaft, 2,500' deep and the 3-compartment east shaft sunk to vertical depth of 3,900' with crosscuts and drifts, run N. and S. on the veins. Recent development on 3,300' level opened a 6' quartz vein with slate hanging-wall and diabase footwall. On the 3,600' level a drift is being run on a 12' vein between greenstone footwall and slate hanging-wall. Present ore extraction is from 2,700' and 3,600' levels.

Equipment: includes air-drills, 15"x30". Murry compressor, 25"x30" Fulton compressor, nine 80-h. p. boilers, oil fired, steam power, 800-h. p. double-drum hoist and 100-stamp mill, making an extraction of 83%. Monthly capacity is 15,000 tons. Concentrates assay \$100 per ton and tailings run about 60c per ton. Concentrates are treated at the mine in a 10-ton chlorination plant with 2 roasting furnaces. Employs 200 men. Company purchased the Zeila mine and 40-stamp mill at Jackson, about 1½ miles S. of the Kennedy, in 1915, for \$35,000. The Zeila is worked out down to the 450' level, but new orebodies averaging \$4 per ton are said to have been disclosed below the old workings. A flotation unit is to be installed.

KENTUCKY-DOUGLAS MINING CO.

UTAH

Address: care Roger Traweck, sec., 62 W. 3d St. N., Salt Lake City. **Officers:** E. S. Holt, pres.-treas.; Thos. E. Brooks, v. p., with T. S. Fowler, directors. Inc. 1916 in Utah. **Cap.**, \$1,000,000; shares \$1 par; 600,000 paid for property, 400,000 in treasury.

Property: 10 claims, in Silver mining district, western Tooele Co., Utah, said to show silver-lead ore in veins and deposits in limestone, at and near porphyry contacts. **Development:** 150' crosscut tunnel, expected to cut vein at 250'. Is a prospect.

KENTUCKY LEAD & ZINC CO.

MISSOURI

W. S. Pate, Joplin, Mo., mgr. Inc. in Missouri; \$75,000 has been invested in land and equipment. Operates a lease on a portion of the St. Louis-Joplin L. & Z. Co. property. **Development:** by 3 shafts to depth of 150'. Sinking new shaft 300' S. of mill.

Equipment: includes 150-ton concentrating mill, 3 pumps, boilers, drills and steam power. Shipments of concentrates were commenced in August 1914. Diamond drill prospecting to determine extent of the orebody is in progress.

KERR LAKE MINING CO.

Office: 61 Broadway, New York. **Officers:** Adolph Lewisohn, pres., Sam A. Lewisohn, v. p.; E. H. Westlake, sec.-treas., with J. J. Steindler, D. M. Steindler, S. S. Rosenstamm, J. Parke Channing, J. H. Susmann and Wm. B. Joyce, directors. Inc. Sept. 14, 1905, in New York. **Cap.**, \$3,000,000; shares \$5 par; all outstanding. Federal Trust Co., Boston, Bankers Trust Co., New York, transfer agts.; Equitable Trust Co., New York, Old Colony Trust Co., Boston, registrars. Annual meeting 4th Monday in September. Stock listed on Boston and Toronto Exchanges; traded in on New York and London Curbs.

Balance sheet as of Aug. 31, 1915, shows: assets, \$3,155,843, which includes, Kerr Lake Mining Co., Ltd., stock, \$3,000,000; 150,000 shares Wettlaufer Lorrain Silver Mines, Ltd.; stock, \$22,500; 200,000 shares Kerr Lake Majestic Mines stock, \$79,548; 837,400 shares Caribou Cobalt Mines Co. stock, \$50,000. Current liabilities include: reserve, \$1,250; Kerr Lake Mng. Co., Ltd., \$58,000; profit and loss, \$94,976. Total receipts for the year were \$620,534, of which \$620,000 was received in dividends from the Kerr Lake Mng. Co., Ltd. Expenditures totaled \$24,163. Dividends paid quar-

terly at the rate of 20% annually, last payment of 5%, March, 1916. Payments have been as follows:

1916*.....	\$0.25	1909.....	\$1.15
1915.....	1.00	1908.....	.75
1914.....	1.00	1907.....	.40
1913.....	1.00	1906.....	.22½
1912.....	1.65	1905.....	.02½
1910.....	2.00		

This makes 209%, or \$6,270,000.

* 1st quarter 1916.

Company is a holding company owning the entire stock issue of the Kerr Lake Mng. Co., Ltd., and controls the Cobalt Comet. Ltd., through majority stock ownership in the Caribou Cobalt Mines Co., the holding company for the former. The operating companies are separately described.

KERR LAKE MINING CO., LTD.

ONTARIO

Office: 61 Broadway, New York. Robt. Livermore, gen. mgr., Cobalt, Ont. Is controlled through ownership of entire stock issue by Kerr Lake Mng. Co., of New York, which see.

Balance sheet of Aug. 31, 1915, shows assets: \$959,876, which includes mining property, \$104,178; ore on hand, sold and in transit, \$104,818; cash, \$265,777; short term bonds, \$355,154; Kerr Lake Mng. Co., of N. Y., \$58,000; Kerr Lake-Crown Reserve drainage account, \$27,900; liabilities: 400 shares of capital stock at par \$100, \$40,000; accts. payable, \$6,655; accrued wages, \$7,688; reserve for outstanding liabilities and taxes, \$13,664, leaving a surplus balance of \$891,868 after payment of \$620,000 in dividends.

Dividends: to April, 1916, amounted to \$6,820,000. Payments are at the rate of \$1 per share annually. Total proceeds from ore sales were \$890,013; operating expenses were \$197,077 for production and development; \$119,911 for shipment and treatment; \$14,165 for general expenses; written off on property acquired, \$24,589. Operating profit for the year was \$550,774.

Property: one patented claim and two fractional claims, 57 acres in Coleman Twp., Nipissing district, Cobalt, Ont., Can. For description of geological features see Nipissing Mines Co. The ore occurs in several small vertical fissure veins in Horonian slate and conglomerate. The veins and ore are characteristic of the Cobalt district. The oreshoots vary from a few feet to 400' in length and occur in an area of about 8 acres.

Development: comprises several vertical shafts, deepest 487', with a total of 46,000' of underground workings. New development for the fiscal year, 1915, amounted to 4,226', as compared with 5,399' in 1914. From the 6th level of No. 3 shaft a drift was run E. & W. on the Keewatin vein and a winze sunk 64'. The vein showed considerable smaltite with low silver values. A 450' crosscut on No. 2 level of No. 3 shaft failed to disclose new orebodies. Further exploration work was discontinued and the shaft has been closed down temporarily. Recent development by a 186' north crosscut from shaft No. 7 on the 140' level on the Fleming vein showed the orebody to average 350 oz. silver for a width of 6.3". This ore, however, does not extend below the 190' level.

Development work for 1916 is on the No. 10 vein. The entire block above the 225' level in the Fleming vein, about 11,911 sq. ft., has been stoped, producing 38,000 oz. of high-grade and 3,000 tons of milling ore. The Main E. vein was stoped for 8,622' and the No. 10 vein for 4,564', mostly above the 140' level, both veins producing high-grade and milling ore. Development on the No. 218 vein proved disappointing. Work on the Drummond failed to disclose any new ore and the working shaft was closed down in

August, 1915. Development will henceforth be carried on through the Kerr Lake and Crown Reserve workings. The Drummond produced 150,462 oz. silver during the fiscal year ended Aug. 31, 1915.

Equipment: includes 12-drill air compressor, 10x12 Jenckes hoist, sorting and jiggling plant of 125 tons daily capacity, fully equipped machine shop and a pot melting furnace to melt the rough metallics into bullion, installed in 1915.

Production for year ending Aug. 21, 1915, is reported as:

Grade of Ore	Net Weight	Silver cont.		Aver. Silver
		lbs.	oz.	
1st class.....	564,273	954,112.37		3,831.24
Bullion from 1st class.....		126,802.04		867.55
2nd class.....	238,606	103,501.68		
Bullion from Metallics.....		14,141.07		
Mill ore.....	23,035 tons	838,405.38		36.396
		2,036,962.54		

Of the total silver production, 1,198,557 oz. were produced from shipping ore and 838,405 oz. from low-grade ore milled by the Dominion Reduction Co., Ltd.; 47,436 tons of rock were hoisted at a cost of \$4.15 per ton as compared with \$5.09 in 1914. Shipments for the year amounted to 1,992,065; total cost of production per oz. of silver was 21.45c.

Estimated production from Aug., 1915, to May 31, 1916, was 1,758,907 oz. silver. With silver at 64c and a cost of but 21c, this, if continued for the year would yield \$2.00 per share.

Management estimates total ore reserves at 4,172,400 oz. silver, Sept. 1, 1915. No permanent new reserves were added during the year's operations; the lake bottom was thoroughly explored and only a comparatively small block still remains to be explored. Development in the diabase and Keewatin formations in the S. half of the property was not encouraging.

Property is apparently exhausting ore reserves and new veins are not likely to be found.

KEWANAS EXTENSION MINING CO.

NEVADA

Inc. 1915, in Goldfield, Nev. Cap., \$1,000,000. Is a small well located property, 18 acres, adjoining Keewanas on the north and in direct line with its ore zone, as developed on its north drift. It adjoins the Booth mine at Goldfield. Is controlled by the Sprague interests and other California men who have underwritten the stock at 5c a share. Gave the Booth company 25,000 shares of stock for a sideline agreement, thus avoiding litigation.

KEWANAS MINING CO.

NEVADA

See Reorganized Kewanas Gold Mining Co.

KEWEENAW COPPER CO.

MICHIGAN

Office: Calumet, Mich. Mine near Mandan, Keweenaw Co., Mich. **Officers:** Thos. F. Cole, pres.; Spencer R. Hill, v. p.; Capt. Thos. Hoatson, 2nd v. p. and mining director; Chas. A. Wright, sec.-treas.; W. J. Uren, gen. mgr., and G. G. Hartley, directors. John C. Shields, railway supt.

Inc. March 11, 1905, in Michigan. Cap., \$10,000,000; shares \$25 par; issued \$3,826,872; paid in, \$18. Last assessment was \$1, June, 1915. Stock listed on Boston and Duluth Stock Exchanges. Controls, through stock ownership, the Phoenix Consolidated Copper Co., Meadow Mining Co., Humboldt Copper Co., and Keweenaw Central Railroad Co. Has about 2,300 share-holders. American Trust Co., Boston, registrar; Old Colony Trust Co., Boston, transfer agt. Annual meeting, second Monday in March.

Balance sheet, Dec. 31, 1915, shows:

Assets, \$3,836,582, which includes real estate, \$1,404,996; securities, \$1,387,544; cash, \$45,993; development acct., \$702,657; acct's. receivable, \$289,843; current liabilities include bills and accts. payable, \$2,976; misc. revenue, \$129; interest, \$6,605.

Property: 25,000 acres, mainly mineral lands, heavily timbered, in 3 main groups, carrying the strike of the Keweenaw mineral belt for about 14 miles, including practically all of the amygdaloidal and conglomerate cupriferous beds of the district, as well as numerous copper-bearing cross fissures. Lands are in T. 58 N., of Rs. 27, 28 and 29W., and include the tracts formerly owned by the Aetna, Copper Harbor, Empire, Girard, Hanover, Keweenaw, Mandan, Medora, Pennsylvania & Boston, Resolute and Vulcan companies, in addition to lands controlled through stock ownership in subsidiary corporations.

The company's lands carry nearly 2 miles of water frontage on either side of the Montreal river, including Fish cove, 1 mile east of the river's mouth, which might be made a fair harbor at comparatively small expense. The lands include 5 miles of the course of the river, on both banks, and, with other holdings, give the company the entire water-frontage of Mosquito lake, making possible the development of a great water power, with a hydro-electric installation at the mouth of the river. There is a mill site on Bete Gris bay, at the mouth of the Montreal river, having about 5 miles of water frontage.

The company also owns the Lac La Belle, or Mendota, ship canal, 1 mile long, connecting Lac La Belle with Lake Superior. This canal has a 14' channel, and leads to a splendid haven that should be made a harbor of refuge.

The Medora mine, opened about 1860, had 3 old shafts, about 100' apart, deepest 140'. The Medora amygdaloidal bed, traversing lands of the company for about 4 miles, lies immediately under the Allouez conglomerate, and outcrops several hundred feet north of the Montreal river bed. The Medora, about 12' in average width, is a soft chocolate-colored amygdaloid, carrying considerable prehnite, calcite and quartz, in connection with fine stamp copper and occasional heavy copper, a 30" paystreak along the foot-wall carrying some barrel work, the bed as a whole being bunched.

The Medora tract also carries other copper-bearing beds, among these being the Medora fissure vein, outcropping about 225' E. of No. 1 shaft, but making into the shaft at depth. About 100' S. of the Medora amygdaloid is another bed carrying copper in small quantities, and to the northward are the Wolverine amygdaloid, of about 15' width, and the Allouez conglomerate, lying about 280' N. of the Medora bed, at surface.

The Medora mine was reopened on a considerable scale to depth of 1,700' and length of 1,800', with about 2 miles of workings. All work in the mine was stopped Sept., 1909. The Medora workings are fully described Vol. VIII.

The Empire mine also carries the Medora bed, about 3 miles E. of No. 1 shaft, and some trenching and test pitting, done 1906-07, on the Empire tract, showed a bed of about 15' width, carrying some copper at surface. The Empire also carries the Montreal river amygdaloid, on which the Manitou did considerable work.

The Medora-Mandan-Resolute tract of 2,440 acres carries the Kearsarge bed under practically its entire territory. The shaft on the Kearsarge bed, known as No. 2, is about a mile S. of the old Medora workings, and was 1,355' deep when abandoned, 1911.

The company owns a diamond drill outfit and has made extensive borings, securing a cross section of the Medora, Mandan, Resolute and Empire

tracts. Operations, 1912-14, were confined to exploratory work in the horizon of the Ashbed lode, and the first drill hole located a copper deposit of considerable promise, early 1913, at a depth of about 500'. Mine has been idle since May 28, 1914.

The Keweenaw Central Railroad Co., is a reconstruction of the old Lac La Belle & Calumet railway. The entire capital stock issue, \$730,000, is owned by the Keweenaw Copper Co. The railway company has \$500,000 bonds, not issued, and ended 1915 with accounts and bills payable of \$197,046, owing mainly to the Keweenaw Copper Co., and a deficit of \$11,627. The railway, with about 40 miles of main line, spurs and branches, cost \$856,935, and runs from Centennial, a northern suburb of Calumet, where connection is had with the Copper Range line, to Lac La Belle. Service is discontinued from Nov. to May.

KEWEENAW LAND ASSOCIATION, LTD.

MICHIGAN

Office: Room 33, No. 87 Milk St., Boston, Mass. **Operating office:** Marquette, Mich. T. M. Davis, chairman; Dudley S. Dean, sec.-treas.; John M. Longyear, gen. agt. Is a land corporation, holding 400,000 acres, mainly timber lands, but with some mineral lands, partly on the Keweenaw copper belt, in the upper peninsula of Michigan, taken over from the Lake Superior Ship Canal, Railway & Iron Co.

KEYSTONE CONSOLIDATED MINING CO.

ARIZONA

G. S. Holmes, 163 S. State St., Salt Lake City, Utah, and T. H. Fitzgerald, organizers. **Property:** the Keystone mine, 4 claims, in Mineral Park, Cerbat Range, formerly owned by Ross D. McCausland of Kingman. **Ore:** silver-zinc-copper bearing, returning \$75 per ton. **Development:** 260' shaft, with 900' of work on 150 and 200' levels.

KEYSTONE CONSOLIDATED M. & M. CO.

COLORADO

Officers: Clifford A. Staley, mgr., Magnolia, Boulder Co., Colo. Willis K. Howell, pres., New York; Richard Howell, v. p. **Property:** the Keystone mine at Magnolia, is an old-time producer. **Development:** by 400' two-compartment shaft which will be sunk to 700' and is drained by the Sylvanite tunnel driven by Wheelman tungsten people from Boulder creek. **Equipment:** includes hoist, compressor and electric power. A 50-ton concentration mill with flotation equipment is reported under construction. Drifting is in progress on the 260' level and a shipment of 4 tons of \$62 ore made, 1916.

KEYSTONE COPPER MINING CO.

ARIZONA

Office: 603 W. Broadway, Newton, Kans. Mine at Johnson, Cochise Co., Ariz. **Officers:** W. W. Miller, pres. and gen. mgr.; A. Bannow, v. p.; T. C. Miller, sec.; W. J. Trousdale, treas.; preceding are the directors. Doane Merrell, territorial agt.; U. R. Miller, supt. Inc. 1908 in Ariz. **Cap.,** \$900,000; shares \$1 par; \$741,735 issued.

Property: the Bannon group, 16 unpatented claims, surrounding the St. George claim and 1½ miles from the Arizona United property, said to show a large deposit of iron ore and to have cut several veins in a 400' vertical shaft. Claims to have blocked out a considerable tonnage of milling ore between the 300' and 400' levels. Shipped 16 cars of ore during the spring of 1916, assaying 17.5% copper and 3.6 oz. silver. Plans further sinking and developing with possible erection of a 200-ton concentrator.

KEYSTONE DEVELOPMENT CO.

ARIZONA

Operating the Isabella mine, 20 miles from Casa Grande, Pinal Co., Ariz., at last accounts. Reported to have some 7% copper ore.

KEYSTONE EXTENSION MINING CO.

UTAH

Mine near Bingham, in West mining district, Salt Lake Co., Utah. Company inactive for some time owing to heavy flow of water in mine

workings. Property covers about 3,000' of the Keystone vein outcrop and shows ore said to average \$14 per ton in gold, silver, lead and copper values, from surface down to bottom of 165' shaft.

Development: by inclined shaft with drifts on vein opening up stopes from which shipments have been made. The Montana Bingham Consolidated Mining Co. was to open the ground by its deep tunnel, thus eliminating pumping costs and heavy wagon-haul charges on ore shipped, but no recent information can be obtained.

KEYSTONE MINES CORPORATION.

IDAHO

Officers: V. D. Williamson, gen. mgr., Empire St. Bldg., Spokane, Wash.; F. O. Berg, pres.; E. C. Tousley, sec.; M. L. Fox, treas.; E. A. Ely, engr.

Property: 21 patented and 22 unpatented claims in the Blacktail district, 5 miles east of St. Joe, Shoshone Co., Idaho, formerly held by the Little Joe M. Co. and W. H. Brown. Shows copper-gold-silver-lead ores. **Development:** 1,500' tunnel with a 1,000' upraise and about 3,000' of drifting and crosscuts. Plan extending tunnel another 1,200'. About 30 men are employed.

KEYSTONE MINING CO.

CALIFORNIA

Carlton R. Downs, Jackson, Calif., gen. mgr. **Property:** the Keystone mine at Amador City, Amador Co., covering 4,400' along the Mother Lode.

The Keystone is a quartz vein, 12'-200' wide, occurring on the contact between black clay slate footwall and meta-andesite hanging-wall. Two other veins, the Spring Hill and east veins, have been developed; the latter is now furnishing the ore. The contact vein was mined above the 900' level. See Mines & Min. Resources of Amador Co., State Mineralogist's Report, p. 34-36.

Development: by 3-compartment Patton shaft, 2,680' deep and 1,118' south shaft on 60° incline, with crosscuts and drifts E. and N. on the 100', 900', 1,000', 1,200' and 1,400' levels. Development work now being done on the 1,400'.

Equipment: includes 40-stamp amalgamation and concentration mill, making an extraction of 90%; electric hoist, 300-h. p. motor, air compressor and drills. Concentrates run \$50 per ton; the tailings 30c per ton. About 35 men employed.

Production: for 6 months ending Jan. 1, 1916, mine produced 38,663 tons of ore, returning \$86,167, or \$2.23 per ton, mostly from the 900', 1,000' and 1,200' levels. Mine is credited with a total production to date of \$14,000,000.

KEYSTONE MINING CO.

MEXICO

Office: Shamokin, Penn. Is a reorganization of Keystone Copper Smelter Co., of Philadelphia, and is the holding company for the Mexicana Co., Tapalpa district, Jalisco, Mexico. W. H. Childs, gen. mgr.

Lands: about 100 hectares, in 5 groups, in Tapalpa, including the Mexicana, America and Palma groups, also timber rights to 50,000 acres of adjoining lands. Principal development is on La Mexicana group, 82 hectares, 15 miles west of Tapalpa, mine having a 200-metre crosscut tunnel, cutting 4 veins, with about 1 mile of workings. Veins are fissures in porphyry, averaging 5' width, carrying auriferous and argentiferous chalcopyrite, sphalerite and pyrite.

Equipment: includes steam and electric power and 30-ton mill. The entire plant was enlarged and remodeled and resumed operations in Jan., 1912. Presumably idle, 1915-16, owing to revolutionary conditions in Mexico. Letters unanswered.

KEYSTONE MINING CO.**UTAH**

Offices: 163 S. Main St., Salt Lake City, Utah and 32 Broadway, New York. **Officers:** H. G. McMillan, pres.; Ernest Bamberger, v. p. and treas., with John Dern, H. I. Wilson, C. W. Saacke, Alfred Frank, John McGinnis, directors. L. B. McCornick, treas.; Herbert Cohen, sec.; J. L. Tilton, asst. sec.

Inc. Sept. 12, 1902, in Wyo. **Cap.**, \$700,000; shares \$1 par; outstanding \$500,000; assessable; last assessment 2c, Dec., 1915. **Transfer office:** J. L. Tilton, 32 Broadway, New York. Empire Trust Co., New York, registrar. Listed on Salt Lake Exchange and on New York Curb as a prospect.

Property: 16 patented claims, 66 acres, in Uintah mining district, 3 miles S. W. of Park City, said to show silver-lead ore. **Development:** 225' vertical shaft and 700' tunnel, work of former years. Has been idle a number of years; a little work done in 1915. Plans to continue sinking winze from tunnel level, 160' deep, June, 1916.

The property was rehabilitated in 1916, compressor and motor installed and exploration started. A suit against the Kearns-Keith Mng. Co. and the Silver King Coalition Mines Co., asking \$1,500,000 damages for alleged unlawful extraction of ore pending, June, 1916.

KILL BUCK MINING CO., LTD.**IDAHO**

Owned by estate of Jos. Clark and by Hon. W. A. Clark. **Cap.**, \$100,000; shares 10c par; all issued; unlisted.

Property: 5 claims on Lake creek, adjoins Chicago-Boston holdings, 2 miles S. W. of Wallace. **Development:** by extension of Coeur d'Alene Vulcan M. Co. tunnel, 3,500' southerly to cut vein, already opened 900' above. Shipped silver-lead ore many years ago but idle lately.

KIMBALL MINING CO.**WYOMING**

Address: Kimball, Neb. B. A. Lathrop, pres. and supt., Centennial, Carbon Co., Wyoming. G. W. Forsling, v. p.; A. J. Hull, sec.-treas.

Property: 19 unpatented claims, near Centennial. Has driven 800' of tunnels to develop a quartz vein with gold and silver-bearing copper ores. Management reports that development work has been done in 1915, opening up milling ore that will average about 3% copper and \$3 gold per ton.

KIMBERLY CONSOLIDATED MINES CO.**NEVADA**

Office: 1200 Franklin Bldg., Philadelphia, Pa. **Mine office:** Hilltop, Nev. **Officers:** Frank Le Bar, pres.; Geo. A. Ford, v. p.; E. Ross Carver, sec.-treas.-mgr., with Chas. A. Beach, S. P. Curtis and John L. Cox, directors H. Crouch, supt. **Inc.** 1910 in South Dakota. **Cap.**, \$5,000,000; shares \$1 par; 4,297,916 shares issued. Stock listed on the San Francisco Exchange. Annual meeting in May. Gross earnings in 1915 amounted to \$9,780.

Property: 24 claims, 16 patented, 460 acres, at Hilltop, shows gold, silver, copper and lead ore in quartz veins. The vein runs N.-S., dips W., and is said to have been proven for 5,000' in length. A crosscut driven on the 350' level reported to have cut a 12' vein assaying \$9.48 per ton. Developed by 5,000' tunnel and several shafts.

Equipment: includes compressor, ½ mile tram and 25-h. p. gasoline engine. **Production:** in 1914 amounted to 3,660,000 lbs. Ore is milled at the plant of Hilltop Milling and Reduction Co.

KIMBERLY SHIPPER MINING CO.**NEVADA**

Office: 417 McIntyre Bldg., Salt Lake City, Utah. **Officers:** R. B. Respass, pres.; Jas. C. Atkins, v. p.; C. W. Fleck, sec.-treas., with F. L. Goddard and John McGovern, directors. **Inc.** in Utah. **Cap.**, \$50,000; shares 5c par.

Property: 60 acres at Hilltop, Lander Co., Nev., 20 miles E. of Battle Mt., shows gold-silver ore in shoots. Developed by 800' tunnel and drifts. A shipment to the U. S. smelter in Dec., 1915, yielded \$75 per ton. Samples from a rich shoot opened in April, 1916, reported to have assayed 226.85 oz. gold and 317.2 oz. silver, or \$4,737 per ton.

KING COPPER MINING CO.**UTAH**

Office: Salt Lake City, Utah. Located on the divide between Emigration and Red Butte canyon, 12 miles E. of Salt Lake City, Utah. Controlled by the Baileys of Salt Lake. Property shows 6' ledge of copper carbonates on contact between quartzite and blue limestone. Is developed by 300' tunnel, principally in sandstone. Ore said to carry \$14 in gold, copper and silver.

KING DAVID MINING CO.**UTAH**

Is controlled by Knight Bros., Provo, Utah. Mine near Frisco, Beaver Co., Utah. **Officers:** Jesse Knight, pres.; Jacob Evans, v. p. and mgr.; R. E. Allen, sec.-treas. **Inc.** 1908, in Utah. **Cap.**, \$500,000; shares 50c par, assessable. Assessment levied Feb., 1912, one-half cent per share.

Property: 70 claims, patented, 940 acres, adjoining the Horn Silver mine, includes the Reciprocity group. Property is supposed to carry the extension of the Horn Silver vein. Mine has an 800' two-compartment shaft, showing values mainly in silver-lead ore, with some chalcopryrite.

Equipment: includes two 80-h. p boilers, a double-drum hoist, and a 5-drill air compressor.

KING EDWARD MINE.**ONTARIO**

Owned by J. S. Dobie and Mary C. Dobie, Thessalon, Ont. **Property:** 1,000 acres, patented, in Rose Township, includes Sec. 14 and part of 11 and 24, the two properties, King Edward and Canada Verdi being a mile apart. The latter claim shows a 16' vein, said to be traceable 2 miles, in diabase; it has steep southerly dip, and carries ore streaks, one 3' thick showing 3% copper and 2 oz. gold. Examined 1915 by C. G. Bateman and C. Rollins.

Development: by shaft and numerous shallow pits. Was under option to King Edward Mining Co. Idle in 1915.

In April, 1916, it was reported that the National Mines, Ltd. Co. had been formed to develop the property. Messrs. Jackman and E. Whitbeck, of Rochester, N. Y., incorporators. **Cap.**, \$2,000,000.

KING EDWARD MINES, LTD.**BRITISH COLUMBIA**

Idle. Fairview, Boundary district, B. C. **Inc.** 1904, in British Columbia. **Cap.**, \$500,000; shares \$1 par. **Property:** 10 claims, 500 acres, in the Similkameen division of the Osoyoos district. Opened by 350' workings to show a sulphide orebody 6 to 10' wide averaging 5% copper.

KING OF THE HILLS MINE.**UTAH**

Address: Milford, Beaver Co., Utah. Mine in Granite district, 25 miles N. E. of Milford, reported to have 14 to 18' contact metamorphic vein of copper-lead ore in limestone, cut by porphyry. **Development:** by tunnels. Equipped with concentrating mill, making a product carrying 10% copper, 42% lead and 10 oz. silver. Developing at last accounts.

KING MINING CO.**WASHINGTON**

Officers: V. D. Williamson, pres., Empire St. Bldg., Spokane, Wash.; J. W. Douglas, v. p.-gen. mgr. **Inc.** in 1916, to take over the Copper King and Copper Queen mines at Chewelah, Stevens Co., Wash.

The Copper King shows 4 veins carrying grey copper and chalcopryrite ore and is developed by 1,200' tunnel. A 4' ledge of high-grade ore was cut on the 500' level. Equipped with 100-ton oil-burning smelter, which was

completed by former management. The mine was bid in at receiver's sale for \$125,000, July, 1915.

The Copper Queen property, 6 claims, is developed by 200' tunnel and crosscuts. An 8' vein showing silver and copper ore was intercepted 50' from the portal of the tunnel, at a depth of 70'.

KING & QUEEN COPPER CO.

NEW MEXICO

Idle. Dr. J. Odd Hamilton, pres. and chief owner. Mine near Steins, Grant Co., N. M., 8 miles S. W. of Steins Pass, near the King Kendall and Johnny Bull mines, shows limestone cut by a large N.-S. dike of monzonite porphyry with ore occurring in contact metamorphic deposit of altered garnetiferous limestone. Ore carries a little bornite, chalcopyrite, pyrite, calcite and on the Queen claim, some chrysocolla. The ore is low grade, carries zinc and lead and is hard to concentrate.

Development: numerous shallow workings showing ore said to average 1½-2% copper. Property being developed under lease and bond in 1915-16.

KING & QUEEN MINING CO.

MONTANA

Mine near Keystone, (formerly known as Carter), Chouteau Co., Mont. **Officers:** G. T. McCullough, v. p.; John F. Hinckley, sec.; H. A. Spangler, treas.; C. H. McHeftry, supt. in charge. Inc. Feb. 22, 1905, in Montana, practically as a reconstruction of the Montana Mining & Development Co Cap., \$1,000,000; shares \$1 par.

Property: 15 claims, partly patented, 188 acres and a 20-acre mill site, well timbered, 3½ miles from Keystone the nearest rail point, in the Spring Gulch district, 9 miles N. W. from Superior. Property carries limestone, quartzite and shale with contact deposits between quartzite and limestone. The deposit under development, of 8' estimated average width, shows copper, lead and silver ore with malachite, chalcocite, chalcopyrite and galena, reported to average 4.5% copper and 12 oz. silver per ton with gold values ranging up to 8 oz. per ton.

Development: by 1,200' crosscut tunnel opening up 4' of 4.6% copper ore that carries 9 oz. silver and 11% lead. This tunnel, planned to be driven 1,600', has cut the vein 460' below the old workings and intersects several veins. A 200' raise gives ventilation with the upper workings now abandoned. The main workings total 5,000'.

Equipment: includes an 80-h. p. boiler, 25-h. p. hoist and 6-drill duplex air compressor. There are several small mine buildings and a sawmill. About 40 men are employed.

Production: in 1913 was 40' to 50 tons daily, shipped to Salt Lake smelters. A new 125-ton lead-silver concentrator erected, 1914, and development in progress, 1916.

KING SOLOMON LEASING CO.

CALIFORNIA

Nosser Illingsworth, mgr., Randsburg, Calif. Operating a lease on the King Solomon mine near Johannesburg, Kern Co., Calif., developed to 250' level by shafts and crosscuts. **Shipments:** in 1915-16 to the Red Dog mill said to have yielded from \$60-\$130 per ton.

KING SOLOMON MINE.

CALIFORNIA

Owned by C. B. Cottrell, Westerly, R. I. W. H. Young, supt. **Property:** 40 acres in Secs. 6 and 7, T. 38 N., R. 11 W., near Randsburg, in the Liberty Mining district, Siskiyou Co., Calif., shows a 5' vein of free milling ore, with quartz porphyry foot and slate hanging-wall. The vein runs N. S., and dips 60° E. Developed by 460' tunnel, 130' shaft and drifts. **Equipment:** includes an 8-stamp mill, hoist, boiler and buildings. Developing and producing at last accounts. Five men employed.

KING SOLOMON MINE.**WASHINGTON**

S. J. Gray, owner, Lakeside, Wash. **Property:** near Lucerne. Chelan Co., Wash., consists of 3 patented claims, developed by 1,500' of tunnels said to show fissure veins in gneiss porphyry, carrying gold-silver-copper values.

KING SOLOMON MINING CO.**MONTANA**

Clancey, Jefferson Co., Mont. S. N. Moreland, pres.; I. S. Moreland, mgr. and supt. **Property:** on Clancey creek, 2 miles W. of Clancey, shows granite with aplite cut by a dacite porphyry dike that forms the hanging-wall of the lode. This lode or shear zone is 25' wide, consisting of slabs of rock alternating with bands 1½ to 3" thick of sulphides, mainly gray copper, (tetrahedrite) galena and zinc blende with chalcadonic quartz.

Development: consists of a 300' inclined shaft being sunk to 700', with levels at 100', 200' and 300' W. of shaft. **Equipment:** includes hoist, skip and air compressor. Is a small silver property, which is not considered likely to become a dividend payer.

KING SOLOMON TUNNEL & DEVELOPMENT CO. COLORADO

Office: 810 Majestic Bldg., Denver, Colo. **Mine office:** Frisco, Summit Co., Colo. **Officers:** F. C. Dinsmore, pres. and gen. mgr.; S. H. Alexander, v. p.; C. W. Rowe, sec.-treas.; preceding with S. R. Theobald, C. A. Kissingner and Theo. Dungway, directors. H. S. Sanderson, managing eng. **Inc. Jan., 1903, in South Dakota. Cap., \$2,500,000; shares \$1 par; nonassessable.**

Property: 40 quartz claims and about 20 placer claims, in the Ten Mile district, shows fissure veins in granite, carrying auriferous and argentic copper and lead ores. **Development:** by a 5,200' tunnel with 5,000' drifting. Lessees working on the "Eleven" vein, 3,700' from portal of the tunnel are said to have opened up 40' of pay ore, showing gold-silver, copper and lead values, averaging \$35 per ton.

Equipment: includes a 160-h. p. steam and 115-h. p. electric plant, with an 8-drill compressor. Management plans erecting mill and granting further leases in 1916. Colorado & Southern R. R. runs by the property.

KING WILLIAM MINING CO.**UTAH**

Office: 546 E. 1st South St., Salt Lake City, Utah. **Mine address:** Eureka, Juab Co., Utah. **Officers:** Chas. H. Blanchard, pres. and gen. mgr.; J. H. Rouse, v. p.; A. C. Ellis, Jr., sec.; L. H. Farnsworth, treas.; W. M. Owen, supt. **Inc. 1907, in Nevada. Cap., \$1,250,000; shares \$1.25 par, nonassessable. Shares listed on Salt Lake Stock Exchange.**

Property: 2 claims, patented, 16 acres, surrounded by the holdings of the Eagle & Blue Bell, Centennial-Eureka and Grand Central. **Development:** is through the Eagle & Blue Bell workings, on the 500' and 1,000' levels, corresponding with the 1,400' and 1,900' levels of the King William. There are several shallow shafts.

Property was under option to sell for 25c per share to the Centennial-Eureka Mining Co., but the lease was dropped in March, 1915, after expenditure of a considerable amount of money, said to be in line with general orders of the U. S. Smelting, Refining and Mining Co. discontinuing much of its prospecting at that time. The company has a debt of \$4,000 and present plans are to reorganize, levy an assessment, pay off the indebtedness and resume work.

KINGS QUICKSILVER MINING CO., LTD.**CALIFORNIA**

Office: 502 King St., London, Ont., Canada. **Officers:** Wm. Gray, pres.; W. P. Darsh, sec.; A. A. Lewis, supt.

Property: a group of claims, in Sec. 20, T. 23 S., R. 16 E., Kings Co., 14 miles E. of Parkfield, Monterey Co., Calif. **Ore:** native mercury, cinnabar

and calcite, occurs in a crushed zone, 35' wide, running S. E. with dip 45° S. W. Country rock is serpentine, shale and metamorphic sandstone.

Development: to depth of 200' by 700' upper and 850' lower tunnels, with raises and winze. **Equipment:** includes 10-ton Scott fine ore furnace with brick condensers and 25-h. p oil engine. Mine worked intermittently since 1902. Present management plans installing concentrator and further development.

KINSLEY DEVELOPMENT CO.

NEVADA

Currie, Elko Co., Nev. **Officers:** John D. Kendall, pres.; W. M. Bradley, v. p.; Newton A. Dunyon, sec.-treas. and mgr.; R. J. Deighton, asst. sec.; preceding with B. F. Beaur and Wm. Fischell, directors. **Cap.**, \$1,000,000; shares \$1 par.

Property: 28 miles from Currie, on Nevada Northern railroad, shows limestone cut by parallel N.-S. fissures, which carry copper ore at the south end of the property and lead ore 1½ miles north. Has been worked intermittently by lessees for past few years. Has steam plant, 3 hoists, compressor and a concentrating mill erected 1909. Presumably idle. No recent returns secured.

KIRKLAND LAKE EXPLORATION, LTD.

ONTARIO

Office: care Wheater, Cornwallis-West & Co., Pinners' Hall, London, Eng. C. H. Villiers, G. Cornwallis-West and F. H. Hatch, directors. **Inc.** Jan. 1914, in England to acquire mining properties in the Kirkland Lake district, Ontario, Can. **Cap.**, £150,000; shares £1 par.

KIRKLAND LAKE PROPRIETARY, LTD.

ONTARIO

Secretary and office: J. J. Sneddon, Finsbury Pavement House, London, E. C., Eng. **Directors:** H. G. Latilla, A. Burt, C. A. Foster, J. D. G. Simpson and G. F. Wyatt. **Inc.** Nov. 27, 1913. **Cap.**, £200,000; shares £1 par; 75,000 issued and fully paid. First annual meeting was held Aug. 3, 1915. Company's assets consist of shares in the following companies: Tough-Oakes Mines, Ltd., Burnside Gold Mines, Ltd., Sylvanite Gold Mines, Ltd., Teck-Hughes Gold Mines, Ltd. and Sudbury Syndicate, Ltd. Balance sheet Feb. 28, 1915, shows liabilities, £168,409, which includes £75,000 outstanding stock, £84,899 loans and interest, £8,510 sundry debts; assets include £95,068 shares in other companies, £59,562 loan and interest and £102 cash in bank. The operating subsidiary companies are described under their respective titles.

KISHMAN LEASING CO.

COLORADO

Cripple Creek, Colo. **Officers:** J. Gottberg, pres.; Siebert Rudman, v. p.; M. W. Kishman, sec.-mgr. Operates a lease on 1 patented claim, 10 acres, belonging to the Trail mine, in Cripple Creek district, showing free gold and sylvanite in a fissure vein, 5' wide and 150' long. The vein runs N. E. and dips 15°. Developed by 600' vertical shaft and 2,000' tunnel to depth of 1,000'. **Production:** in 1915 amounted to 500 oz. gold, the ore averaging \$30 per ton.

KITCHIGAMI GOLD DEV. CO.

ONTARIO

Officers: John Daniell, pres., Calumet, Mich.; John MacRae, v. p.; Chas. Chynoweth, sec.; Jas. T. Fisher, treas. **Inc.** 1915 in Ariz. **Cap.**, \$300,000; shares \$2 par; 100,000 shares subscribed at 25c.

Property: 160 acres, Gordon McGuire claims, on Goldfish lake, Morissette township, Ont., Kirkland district, adjoining the Goldfish Lake Gold Mine Co. Ground acquired on advice of Chas. W. Botsford, E. M.

KITTIE LANE GOLD MINING CO.

COLORADO

Office: 507 Exchange Bank Bldg., Colorado Springs, Colo. **Officers:** Marx Lorig, pres.; B. F. Webster, v. p.; Arthur Cornforth, sec.-treas. Is a reorganization of the Gould Mining Co. **Inc.** in 1912. **Cap.**, \$2,000,000;

shares \$1 par; 265,000 shares in treasury. Company had no debts and \$2,776 cash and bills receivable, Jan. 1, 1916. Stock listed on Colorado Springs Exchange. Owns about 30 acres on Raven hill, adjoining the Elkton. Inactive.

KITTIMAC MINES CO.**COLORADO**

Silverton, Colo. **Officers:** Daniel B. Carey, pres.; Wm. Youngson, v. p.; Jos. L. Clark, sec.-treas.; R. J. Walter, gen. mgr.; Frank Card, mill supt. Inc. 1914, in Wyoming, as successor to company of same name inc. in Arizona and now dead, which is described in Vol. XI, Copper Handbook. **Cap.**, \$2,500,000; shares \$1 par; fully paid; nonassessable; \$2,000,000 shares issued and a \$40,000 bond issue outstanding.

Property: 800 acres in Eureka Mining district, near Silverton, San Juan Co., Colo., includes 70 claims and a 76-acre mill site. Mine has 2 sulphide and 7 quartz veins, outcropping on surface for 3,000' and developed by 2 tunnels, 920' and 1,050' long, with 2,000' of drifts. Ores carry gold-silver-copper-lead-zinc and iron values. On the Isabella vein an orebody 19' wide has been developed for 600', said to average \$10 per ton in gold and silver.

Equipment: includes compressor, drills, electric motors, 10,040' aerial tramway, 150-ton mill with flotation unit, Huff electrostatic separators and several buildings. **Ore reserves:** management estimates 500,000 tons of ore in sight. Company was selling treasury stock in 1915 in order to raise funds for further development at depth and installation of cyanide plant.

KLAMATH MINING & MILLING CO.**NEVADA**

O. W. Robertson, pres., Klamath Falls, Ore. Holdings in Jumbo district, near Virginia City, said to show 12'-20' ledge under development by crosscut tunnel.

KLONDYKE-PORTLAND MINES CO.**NEVADA**

Goldfield, Nev. **Officers:** Benj. Rosenthal, pres.; M. F. Hill, v. p.; J. F. Henry, sec.-treas.; with J. B. Witt and Peter Felis, directors. Inc. 1915 in Nev. **Cap.**, \$100,000. **Property:** 9 claims in the Klondyke district, near Goldfield, Esmeralda Co., Nev., showing gold-silver-lead ore.

KNIGHT INVESTMENT CO.**UTAH**

Offices: Knight Blk., Provo, and 817 Newhouse Bldg., Salt Lake City, Utah. **Officers:** Jesse Knight, pres.; Amanda M. Knight, v. p.; W. Lester Mangum, sec.-treas.; preceding, with R. E. Allen, J. Wm. Knight and Knight Starr Jordan, directors. Company controls 17 properties, ranging from prospects to successful dividend paying mines, in the Tintic district, Juab county, Utah, including the Beck Tunnel Cons., Black Jack Cons., Bonneville Mining, Dragon Cons., Iron Blossom Cons., Lucky Boy Cons., Opex Cons., Spring Canyon Coal, Tintic Milling, Utah Ore Sampling, Colorado Mining, Knight Christensen Metallurgical companies, the Rico Wellington Mining Co. at Rico, Colorado, and the Lucky Tiger and Black Hawk Zinc mines near Neck City, Mo., acquired in 1915. The latter 2 properties are fully developed, equipped with 250-ton mill and credited with production of \$115 ore.

Company also operates the Knight Woolen Mills and Eureka Hill R. R. Co. The new 100-ton Knight-Christensen custom milling plant at Silver City, designed by N. C. Christensen to treat the complex, low-grade Tintic ores, was started Oct., 1913, and operated successfully on Iron Blossom ore, attaining an 85% extraction at a cost of less than \$2 per ton, until completely destroyed by fire, April 4, 1915.

KNOB HILL MINING CO.**WASHINGTON**

Office: 622 Old National Bldg., Spokane. Mine office: Republic, Wash. **Officers:** Chester Shoudy, pres.; J. W. Lloyd, v. p.; John Burne, v. p.; O. A.

Broyles, sec.-treas.; S. H. Richardson, gen. mgr.; with T. A. White, J. W. Beckett, R. B. Gaines, H. C. Kreysler and Geo. J. Hurley, directors. Kenneth McEwen, supt.

Cap., \$1,000,000; shares \$1 par; all issued. Stock listed on Spokane Exchange. Annual meeting Jan. 12th.

Property: the Knob Hill and Mud Lake mines at Republic, Ferry Co., Wash. The Knob Hill is developed by shafts and crosscuts. A vein 4-7' wide, opened on No. 2 level at a vertical depth of 250', gave assays of \$27 per ton. On the intermediate level a 4' vein carrying values up to \$50 in gold is being developed; on the 3rd or lower level recent development work opened up a 7' vein of \$15 ore.

Shipments: to Trail smelter during 1915 amounted to 35,000 tons of ore, yielding 2.4 oz. gold and 7.2 oz. silver per ton. Smelter returns totaled \$62,000. Company expended \$7,795 on development work, \$1,500 on improvements and had \$5,746 cash on hand at end of 1915 after paying off debts amounting to \$13,000. Shipments of 24 cars of ore from Jan.-April, 1916, yielded \$11,562 and netted \$3,039, leaving a cash balance on hand at that date of \$8,248.

Company purchased the Alpine claim, adjoining the Knob Hill on the E., for \$20,000. It is believed to carry the extension of the Knob Hill vein. A 500' shaft is to be sunk on the Alpine, which will give a depth of about 900' on the dip of the vein and crosscuts will be driven to reach the Knob Hill orebody.

KOMET MINING CO.

COLORADO

M. Korff, mgr., Cripple Creek, Colo. Inc. 1915. **Cap.**, \$25,000. Operates a lease on the Jefferson vein of the Isabella Mines Co. property, in Bull Hill section of the Cripple Creek district. **Development:** by 300' Lee shaft, said to have opened up a 6' vein yielding \$182 per ton in gold.

KOOTENAY BONANZA MINES, LTD.

BRITISH COLUMBIA

Officers: W. Finch Page, pres., Nelson, B. C.; A. E. Rand, v. p.; R. S. Lennie, sec.-treas.; preceding, with A. C. Burdick and J. A. Hendry, directors. Inc. in British Columbia. **Cap.**, \$3,000,000; shares \$5 par; outstanding, \$200,000. Company organized to take over the Silver King mine from the bondholders of the Hall Mining & Smelting Co., Ltd.; the claims of the Kootenay Development Syndicate, Ltd.; Dandy & Ollie Cons. Mines, Ltd., and of the Starlight Mines, Ltd., as well as other properties.

Silver King and Dandy groups of claims were sold to the Silver King Mines, Ltd. The company now holds 34 other claims, comprising the North Star, Great Western, Starlight and Irene groups.

LA ANOZIRA GOLD MINING CO.

ARIZONA

Office: 218 Colorado Bldg., Denver. **Officers:** Walter C. Williams, pres.; Thos. B. Everett, v. p.; engr.; J. C. McDowell, sec.-mgr. Inc. Oct. 27, 1914, in Ariz. **Cap.**, \$1,000,000; shares \$1 par; nonassessable.

Property: 2 claims in the Cerbat Mtns., Mohave county, about 12 miles from Kingman, said to carry a 4' vein of free gold, running from \$6 to \$80 per ton. In a stock selling campaign to raise funds for a mill, the President stated, Dec. 14, 1914: "The mine is developed by 640' of tunnels, 230' of shafts, all in ore. Shafts have been sunk to connect tunnels with surface and, in fact, a mine is fully proven by the thousands of dollars of work done. The property has been thus developed and is now ready for a mill."

In Oct., 1915, the public was notified that, "Our mines are well located; producing properties all around us. We have large development, large tonnage of high-class ore, and everything at hand for grand success, only awaiting the time when we have our 50-ton mill (which is ordered) paid for. Our

directors will not incur debts. We go on the policy of 'Safety First.' We have not much money to raise to pay for this mill and get it installed. This should attract the attention of investors because this company agrees to return your full invested money within one year from date of certificate and you to retain the stock. The physical value of the property is such that the company feels justified in making this liberal offer. The lowest estimated earnings will return all the stockholders money as promised, with a large dividend in addition." To date, June, 1916, no further report of development, mill or profits has reached us.

LA BELLE KIRKLAND MINES, LTD.

ONTARIO

Office: Home Life Bldg., Toronto, Can. Frank Loring, gen. mgr.

Property: the Gibson group of claims at Goldfish Lake, Kirkland Lake district, Cobalt, Ont., shows molybdenite and gold ore in Keewatin formation. Developed to depth of 240' by shafts and crosscuts, showing several 2' stringers of high-grade ore. Encountered fault on this level, April, 1916. On the 100' level a promising vein is under development. **Equipment:** includes compressor and hoist good for depth of 1,000'.

LA BELLE MINING CO.

ARIZONA

Vicksburg, Yuma Co., Ariz. **Officers:** A. W. Hompe, pres.; E. B. Moore, v. p.; L. S. Judd, sec. and gen. mgr.; James Bayne, treas. **Inc.** Aug. 3, 1909, in Arizona. **Cap.**, \$100,000; shares \$10 par; issued, \$82,600. Company is a close corporation, entire stock issue being owned by officers. Annual meeting, June 30.

Property: 11 claims, 220 acres, in the Plomosa district, said to be covered by rhyolite cut by fissure veins running N. W. and dipping steeply. The vein developed is traceable for 1½ miles, averages 6' wide and carries leached material with less than 1% copper, the sulphide zone not having been reached.

Development: aggregates 814', including a 478' shaft and 4 tunnels. **Equipment:** includes 10-h. p. hoist, 2-drill compressor, 65-h. p. gasoline engine and various mine buildings. Property is 10 miles from Santa Fé railroad. Only assessment work done in 1915.

LA COBRIZA DE COBRE.

MEXICO

Address: Rafael Elias, Cananea, Sonora, Mex. **Property:** 5 claims, adjoining Carnegie L. & Z. property on S. E., shows several veins in bedded volcanic tuffs with complex, silicious lead-copper-silver ore. Developed by 200' shaft with short drifts in ore.

LA COBRIZA MINING CO.

MEXICO

Office: 209 Nat. Bank of Ariz. Bld., Phoenix, Ariz. Mine at Noria, Sonora, Mex. **Officers:** J. W. Cook, pres.; E. B. Sharpe, sec.; J. E. Bentley, treas.; with J. H. Strong and F. C. Emery, directors. Robt. Mitchell, gen. mgr. **Inc.** June 5, 1905, in Arizona, and legalized in Mexico. **Cap.**, \$250,000; shares \$1 par. Balance sheet March 1, 1914, shows cash balance of \$21,507.

Lands: 142 hectares, 350 acres, in the Altar district near Puerto, 7 miles west of Noria. Property shows several contact deposits of nearly vertical dip, between limestone, quartzite and granite. The main orebody under development is reported by company as of 40' average width, traceable 1,500' on surface, carrying carbonates to depth of about 100', underlain by chalcopyrite ore averaging 6 to 8% copper, 4 to 6 oz. silver and \$1.50 gold per ton.

Development: by shafts of 200' and 520', and a short tunnel, management reporting 7,500' of workings. Property idle, 1912, but resumed work in Oct, 1913, on the 500' level, opening up a vein said to be 4' wide and to show ore assaying from 3-15% copper. Plans sinking a 3-compartment shaft and erecting concentrator.

Equipment: includes a 300-h. p. steam plant, with a new hoist, installed 1912, and a 10-drill air compressor. There are 20 buildings, including an engine house, shops, store, office and about 15 dwellings. The smelter has a 100-ton Macdonald hot-blast pyritic furnace and is operating steadily. Management estimated 70,000 tons of ore in the mine.

The company's affairs have not been harmoniously managed, and many stockholders have been desirous of a change of management. Reports indicate that a compromise has been effected and that operations will be continued at the property under the old management. A suit brought by minority stockholders at Chicago is now pending to nullify the transfer of the company's property to the La Cobriza Mining Co., the Mexican corporation.

LA DURA MILL & MINING CO.

MEXICO

See Mines Co. of America.

LA EXPOSICION MINING CO.

ARIZONA AND MEXICO

Office: Room 901, 25 W. 45th St., New York. **Officers:** Fred A. Swan, pres.; Forrester A. Linn, v. p.; Appollos Fuller, sec.-treas.; with Chas. Putnam, directors. **Inc.** May 20, 1910, in Ariz. **Cap.**, common, \$500,000; all issued; preferred, \$1,500,000; outstanding, \$750,000; all shares \$1 par. Security, Transfer & Registrar Co., New York, transfer agent and registrar. Listed on New York Curb as a prospect.

Balance sheet of May, 1916, shows assets \$2,623,550, which includes "ore in sight on Hurlbut lease" \$2,500,000, and "ore in sight on Zesiger lease" \$50,000. Neither tonnage, grade nor kind of ore are reported. The company had a lease and bond on property of the Leadville Mining Co. at Courtland, Ariz., but at last accounts had failed to make payments due and title reverted to the latter company.

Property: La Exposicion claim, 42 acres, at Cumpas, Sonora, and 2 claims, 74 acres, near Nacozari, Mex. In Arizona company has a bond on 7 claims near Wickenburg, adjoining the Monte Cristo on south, said to show copper sulphide ore.

Development: 2 incline shafts. A 100' incline shaft is said to show 20' of sulphide ore; the other shaft, ore 16' to 18' in width. Claim 30,000 tons of 8% copper ore in sight.

Company also has bond on a gold property, 5 claims, near Greaterville, Pima Co., Ariz., said to show a vein 200' wide and 1,000' long on surface, capable of being mined by steam shovel, and entire vein will mill better than \$8 per ton. **Development:** 2 tunnels, 250' and 300' long, and 90' incline shaft "all in ore." Management claims 500,000 tons free milling ore, capable of being handled for \$1.50 per ton, netting company \$8 per ton; all of which is preposterous; further comment is superfluous.

Equipment: includes a hoist and 2-drill air compressor.

A 3½' Huntington mill being erected, which is expected to treat 50 tons daily.

LA FORTUNA MINING CO.

MEXICO

Idle. Office: 221 Colorado Bldg., Washington, D. C. Mine office: Apartado 21, Ocotlan, Oaxaca, Mex. **Officers:** C. E. Miller, pres.; Wm. H. Brown, first v. p.; E. D. Stinson, 2nd v. p.; Amos Tyree, sec.; W. H. Brown, treas., at last accounts. **Inc.** 1906 in South Dakota. **Cap.**, \$250,000; shares \$10 par; nonassessable; outstanding, \$230,000.

Property: 30 hectares, known as the Treadwell group, about 3 miles from Ocotlan and one-half mile from the Oaxaca-Taviche branch of the Mexican Southern railway, shows a well-defined nearly vertical fissure vein of 2 to 12' width, cutting bedded andesite tuffs, greatly leached and oxidized to depth of 300'.

Development: by a 400' vertical shaft, with 700' of workings, two 100' prospect shafts and 4 tunnels of 700' aggregate length. Workings show chalcopryrite, with quartz gangue, estimated by company to average 4.5% copper and 200 grams silver per metric ton. Some ore was shipped returning 14% copper and 600 grams silver per metric ton. **Equipment:** includes a 30-h. p. boiler, hoist and a small air compressor for hammer drills.

Is a copper mine, whose silver output is a by-product only. Idle since 1912 owing to conditions in Mexico.

LA LUZ COPPER CO.**NEW MEXICO**

La Luz, Otero Co., N. Mex. **Officers:** J. C. Yoes, pres.; W. T. Fulton, v. p.; Jas. G. Barrett, sec.-mgr.; Otto Sergeant, treas.; with G. W. Wilson, directors. **Inc.** Feb. 1, 1915, in N. Mex. **Cap.**, \$250,000; shares \$1 par. Annual meeting April 1.

Property: 8 claims, 160 acres, about 4½ miles N. E. of La Luz, said to carry a vein 7' wide, averaging 6% copper with small gold and silver values. No development done, but management plans driving a tunnel.

LA MINE D'OR HURONIA, LTD.**ONTARIO**

Three Rivers, Quebec. **Officers:** Chas. Lafond, pres.; P. V. Ayotte, v. p.; A. Lebrun, sec.-treas.; E. H. York, gen. mgr.

Property: 4 claims, 177 acres, in McVittie Twp. and in Gauthier Twp., Swastika district, Ont., Can., 18 miles from Dane. **Development:** by 3 shafts, 102', 75' and 45' deep, a 300' tunnel and 125' of drifting on the 50' level. **Equipment:** includes mill and hydro-electric plant. Power is transmitted to the mine from the Goldfields mine at Larder Lake. Total gold production to date amounts to \$7,064. About 40 men employed.

LA REGINA MINING CO.**MEXICO**

Office: 2120 W. Tioga St., Philadelphia, Pa. **Mine office:** San Martin Hidalgo, Jalisco, Mex. **Officers:** Chester P. Ray, pres.; F. W. Schmidt, v. p.; A. W. Brackmeyer, sec.-treas.; M. J. Slattery, gen. mgr.; John P. Delaney, supt. **Inc.** Nov. 1, 1909. **Cap.**, \$1,000,000; shares \$1 par, as successor of Philadelphia Copper & Gold M., M. & Smelter Co. Debentures \$200,000 authorized; issued, \$62,000.

Property: 73 hectares, including the San Vicente, La Perla, La Fe, La Concha, Ajax and other mines, shows veins of 3 to 25' width, carrying auriferous and slightly argentiferous chalcopryrite. The mine has 4 tunnels, at 150' intervals, and a 465' shaft. The Ajax mine shows a 12' vein, estimated to average 4% copper, 2 oz. silver and \$1.33 gold per ton. La Estrella del Norte mine has a 260' tunnel. **Development:** property as a whole has 8 shafts, of 100' average depth, with a total of about 1,000' of workings, claimed to put in sight 125,000 tons of auriferous copper ore. Development in recent years has been confined to the gold-silver vein, said to show at depth of 115', ore averaging 2 oz. silver and 15 grams gold per ton.

Equipment: includes a steam hoist and air compressor, at the San Vicente group. The mill has a 25-ton Elspass mill, 25-ton experimental cyanide plant, Huntington mill and 3 Pachuca tanks. Idle on account of political disturbances in Mexico.

LA REINA UNION MINING & REDUCTION CO.**MEXICO**

Office: 602 Empire Bldg., Denver, Colo. **Mine Office:** San Javier, Hermosillo, Sonora, Mex. J. F. Williams, mgr, at last accounts. **Lands:** include the Mimbres mine, said to show a fissure vein carrying lenses of complex lead-copper-sulphide ore with gold and silver values. **Development:** in 1914 by shaft, cut a vein that assayed from 15 to 30 grams gold and 400 grams silver per ton. **Equipment:** includes steam and electric power, and an air compressor.

LA ROSE CONSOLIDATED MINES CO.**ONTARIO**

Office: 201 Inspector St., Montreal, Quebec. **Officers:** D. Lorne McGibbon, pres.; Shirley Ogilvie, v. p.; Edwin Hanson, v. p., with E. W. Nesbitt, Duncan Coulson, V. E. Mitchell, W. M. Dobell, R. B. Watson and W. A. Black, directors. S. J. Le Huray, sec.-treas. Inc. May 22, 1908, in Maine. **Cap.**, \$7,500,000; shares \$5 par; 419,210 shares issued. Bankers Trust Co., New York, Toronto Gen. Trusts Corp. and Montreal Trust Co., transfer agts. Guaranty Trust Co. of New York, Toronto Gen. Trusts Corp. and Montreal Trust Co., registrars. Annual meeting last Monday in April.

The report of La Rose Cons. Mines Co. for the year ended Dec. 31, 1915, shows: Total receipts, \$328,000; dividends, \$299,725; balance, \$28,275; administration expenses, \$26,428; surplus, \$1,847; previous surplus, \$7,569; total surplus, \$9,416.

The balance sheet as of Dec. 31, 1915, shows:

Assets: stock of subsidiary companies, \$7,493,135; distribution, \$1,867,877; furniture and fixtures, \$1,079; due from La Rose Mines receivable in January, 1916, \$80,000; cash in banks and on hand, \$3,267; total, \$9,445,359.

Liabilities: Capital stock, \$7,493,135; depreciation, \$1,867,877; dividends payable Jan. 20, 1915, \$74,931; profit and loss surplus, \$9,415; total, \$9,445,359.

Statement of March 31, 1916, shows a cash surplus of \$849,181 and ore in transit and ready for shipment, \$131,986. Current liabilities are \$40,935, leaving balance of \$940,732.

Results of 1915 operations compare with previous year as follows:

	Prod. oz. Silver	Net Value	Cost Prod. per oz.	Net Price per oz.	Net Profit	Dividends	Surplus
1915.	1,185,142	\$528,996	\$1.64c	\$0.88c	\$280,662	\$299,725 (4%)	\$ 957,490
1914.	1,368,247	637,555	37.2c	58.92c	217,979	749,318 (10%)	1,040,880

Profits for 1915 on each share were equivalent to 15.3c; dividends paid by company amounted to 20c per share.

Property: 6 patented claims, 359 acres, in Nipissing district, Cobalt. Ont., include the La Rose, Princess, Lawson. University and Fisher-Eplett, all practically worked out. Work was discontinued in 1914 on the Princess and Fisher-Eplett claims after extensive development work failed to locate new orebodies, but exploratory work continues on the La Rose. The new shaft was down 350' in Feb., 1916, and diamond drilling from this level to reach the Keewatin formation is in progress.

Considered a liquidating proposition unless new properties are acquired. (For geology of district see description of Hollinger Gold Mines. Ltd.)

LA ROSE MINES, LTD.**ONTARIO**

Is a subsidiary of the La Rose Cons. Mines Co., which see.

LA SAL COPPER-SILVER MINING CO.**COLORADO**

Paradox, Montrose Co., Colo. J. Ensign Fuller, pres.; John B. Overton, sec., at last accounts. Is a reorganization of Consolidated La Sal Mining & Smelting Co., which succeeded La Sal Copper Mining Co.

Property. the Cashin mine, 7 claims, patented, and 3 mill sites, 150 acres, some distance from a railway. The mine has a 1,540' tunnel, showing carbonate and sulphide ores, assaying up to 35% copper and 18 oz. silver per ton. Lands are also said to carry coal. **Equipment:** includes steam power and a Leyner air compressor. Development resumed in 1915 after long idleness.

LA SALLE COPPER CO.**MICHIGAN**

Office: 12 Ashburton Place, Boston, Mass. **Mine office:** Calumet, Houghton Co., Mich. **Officers:** Rodolphe L. Agassiz, v. p.; Geo. A. Flagg, sec.-treas.; Jas. MacNaughton, gen. mgr.; preceding with Col. Thos. L. Livermore, Benj. Joy, Courtney C. Douglass, Francis W. Hunnewell and

T. M. Perkins, directors; Ole Hallingby, supt.; Wm. Skewes and Josiah Bartell, mining captains.

Inc. Dec., 1906, in Michigan. Cap., \$10,000,000; shares \$25 par; issued, 302,977 shares. Company absorbed the Caldwell Copper Co. and controlled the Tecumseh Copper Co., through ownership of practically the entire issue, giving $1\frac{1}{2}$ shares of La Salle for 1 of Tecumseh, and bought the entire property of the Tecumseh, May 11, 1910, for \$1,648,000. Is controlled, through ownership of 152,977 shares, by the Calumet & Hecla Mining Co. The Calumet & Hecla contributed \$1,000,000 cash to the company's treasury, taking pay in stock, and agreed to loan \$750,000 additional cash, as needed. Operations for 1915 show total receipts, \$150,598; total expenses, \$166,120, leaving a deficit of \$15,522 for the year. Balance of assets Dec. 31, 1915, \$94,636. Annual meeting, second Wednesday in June.

Property: 2,360 acres, also the Gregory mill site, on Torch lake, nearly opposite the Calumet & Hecla mills. The Tecumseh and Caldwell contributed 560 acres each and 540 acres were furnished by the Calumet & Hecla, St. Mary's Mineral Land Co., Sheldon & Douglass Estate, and other interests, these lands being put into the company at a novel basis of valuation, figured upon zones of 2,500' depth on the dip of the Kearsarge bed, allowance being made for decreased land values on zones carrying the underlay at increased depths. There are 4 shafts, 2 on the Tecumseh and 2 on the Caldwell tract, with room for 3 additional shafts, to give a total of 7 shafts, at intervals of about one-third mile. The property carries the strike of the Keweenawan formation for about $2\frac{1}{2}$ miles.

Development. property has been prospected by diamond drilling, more than 30 diamond-drill holes having been bored on the Tecumseh and Caldwell tracts, a few years ago.

The first work at the Tecumseh mine was done on the Calumet conglomerate, many years ago, when a 1,000' shaft was sunk that found no payable ore. During the second era of activity, 1889-1902, a shaft was sunk 2,300' on the Osceola amygdaloid, but this bed being found practically barren of copper, work was abandoned Nov., 1902. It is probable that the old Osceola shaft will eventually be reopened, as the southern drifts of the No. 6 shaft of the Osceola, below the 4,000' level, near the Tecumseh boundary, are among the best in that mine.

La Salle No. 1 shaft, formerly known as No. 1 Tecumseh, sunk on the Kearsarge bed, has 3 compartments, 2,146' deep, and shows the Kearsarge lode to be 8' to 12' thick, but is characterized by irregularly distributed values. The workings have encountered large areas of good ore, some of it with very rich patches of coarse copper that is rather showy though the average value has been, on the whole, somewhat disappointing in the mill. Equipment includes a 250-h. p. boiler and a hoist.

La Salle No. 2 shaft, formerly known as No. 2 Tecumseh, is located about 1,700' S. of No. 1 and is of the same size; it is 1,863' deep, and shows a bed of workable thickness but not carrying much copper. The power plant has a 125-h. p. boiler, a hoist good for 2,500' depth, and a 15-drill air compressor. Buildings include a changing house. A branch of the Mineral Range railroad was built to the shaft in 1913.

No. 5 shaft, originally known as No. 1 Caldwell, and later as No. 1 La Salle, is 1 mile S. of No. 1 shaft; is 1,450' deep, shows a poorly-defined bed, with unsatisfactory copper contents, and work was discontinued Nov., 1910.

No. 6 shaft, known as No. 2 La Salle, sunk at a point 1,500' S. W. of No. 5, was abandoned, June, 1909, at depth of 882', because the lode showed little or no copper; the surface equipment was removed to No. 2 shaft.

The Kearsarge bed is comparatively thin in the Tecumseh tract, ranging from 7 to 11', with an average thickness of about 9'. It is estimated that approximately 1,000,000 tons of stamp rock were blocked out in the No. 1 Tecumseh, to the end of 1912, the greatest length of lateral opening being on the 12th level, where a stretch of about 1,000' of good stoping ground has been developed.

Development: in 1913 No. 1 shaft was unwatered down to the 17th level and stoping started in July. The big labor strike started on the 23rd of the month and the mine was closed down. Operations, started in Jan., 1914, continued until Aug., at the time of outbreak of the European war. Work was again resumed in June, 1915. Total development work amounted to 141' in 1913; 1,123' in 1914; 1,127' in 1915. At the present time daily shipments are 600 to 700 tons of rock while development work is also being pushed. Ore is treated at C. & H. mill at Lake Linden.

Year	Production:

LA SALLE COPPER MINING & MILLING CO. NEW MEXICO

Carrizozo, Lincoln Co., N. M. Geo. C. Hopkins, v. p. Inc. in Arizona. Cap., \$1,000,000; shares \$100 par. Lands: 3 claims, 60 acres, 6 miles from Carrizozo, said to show a 12' to 15' vein of low-grade copper ore. Idle.

LA UNION CONSOLIDATED COPPER CO. MEXICO

C. B. Bell, Douglas, Ariz., owner. Property: 660 acres, in Cerro Tordillo section of the Ajo mountains, W. of Fronteras, Sonora, Mex., shows a 3' to 20' vein traceable a mile, that carries high-grade copper, gold, silver, zinc ore. Orebody is a contact deposit in lime and porphyry formation, ore occurring in shoots.

Development: by 5,000' of tunnels and shafts to depth of 500'. Shipments of 1,500 tons were made to April, 1914, averaging 15% copper, 15 oz. silver and 0.1 oz. gold. The property was worked in 1882-86, acquired by present owner in 1906, and considerable work done in 1912-13-14.

Company gave up property in 1914, and C. B. Bell plans resuming operations when peace is restored in Mexico.

LA VORE GOLD MINES CO. UTAH

St. George, Utah. Officers: Willard Snowcroft, pres.; R. G. McQuarrie, v. p.; D. H. Morris, sec.-treas., with Irvine McQuarrie and Herrick McQuarrie, directors. Inc. 1915, in Utah. Cap., \$100,000; shares 10c par; 60,000 issued.

Property: 10 claims in the Goldstrike district, Washington Co., Utah, said to show a vein 11' wide, averaging \$5 gold per ton. Developing with a small force.

LACLEDE MINING CO. IDAHO

Wallace, Ida. Officers: C. Fred Kratzer, pres.; O. W. Lewis, v. p.; Jas. A. Wayne, sec.-treas.; with T. N. Barnard and W. J. Weyer, directors. E. A. Gnaedinger, mgr. Cap., \$1,000,000; shares \$1 par; assessable at the rate of 3 mills every 3 months; 900,000 shares outstanding.

Property: lies between the Interstate-Callahan and Tamarack & Custer, in the Coeur d' Alene district., Shoshone Co., Idaho. **Development:** consists of 300' crosscut tunnel, a winze down 300' below the tunnel level,

Feb., 1916, or 600' vertically below the apex of the vein, with drifts run each way every 100'. Ore occurs irregularly and thus far is not of commercial grade.

LADD METALS CO.**IDAHO**

Company has disposed of all properties and is out of the mining and melting business. Fully described Vol. XI, Copper Handbook.

LADYSMITH COPPER MINING CO.**MONTANA**

Offices: Marquette Bldg., Chicago. Mine near Elliston, Powell Co., Mont. **Officers:** Edw. R. Roe, pres.; F. J. Schroter, sec.-treas.; preceding with W. A. Lynch, Wm. K. Steele and B. B. Switzer, directors. **Inc.** 1905, in South Dakota. **Cap.**, \$1,600,000, increased from \$400,000 in 1908; shares \$1 par.

Property: 10 claims, 12 miles N. W. of Elliston, are well timbered and carry a contact deposit between limestone and granite that is 15' in maximum width. **Development:** includes a 180' two-compartment shaft, and a 110' shaft, with about 1,500' of workings, sulphide ore occurring at depth of about 165'. Idle since June, 1910, except for diamond drill prospecting, but plans further development.

LAKE COPPER CO.**MICHIGAN**

Office: 85 Devonshire St., Boston, Mass. **Mine office:** Lake Mine, Ontonagon Co., Mich. **Officers:** Wm. A. Paine, pres.; John H. Rice, v. p.; Robt. H. Gross, sec.-treas.; preceding with Wm. F. Fitzgerald, Reginald C. Pryor, Wm. S. Rooney, F. Ward Paine, directors. Elton W. Walker, mgr.; C. E. Weed, supt.

Inc. Nov. 27, 1905, in Mich. **Cap.**, \$2,500,000; shares \$25 par; \$5 paid, fully issued. Shares are listed on the Boston Stock Exchange. Federal Trust Co., Boston, registrar; State Street Trust Co., Boston, transfer agt. Annual meeting, third Tuesday in June.

Report for fiscal year, ending April 30, 1916, shows: total receipts, \$334,007, which includes: copper sold, \$318,581; assessments, \$7,686; miscellaneous, \$7,739. Expenditures total \$246,987, include mine expenses, \$202,896; charges for smelter, freight, marketing copper, etc., \$30,688; taxes, \$11,302; Surplus May 1, 1915, \$167,145; surplus April 30, 1916, \$254,164. In 1916 company is reported to be earning over \$3 per share annually.

Property: 2,010 acres, including 1,150 acres of mineral land, 680 acres of timber lands and 180 acres of cutover lands. The company bought 20 acres immediately E. of the shaft from St. Mary's Mineral Land Co., to provide room for a surface plant, the purchase carrying with it mineral rights to a depth of 100', thus caring for the upper portion of the Lake shaft, collar of which is almost divided by the section line. Property includes the S. E. $\frac{1}{4}$ of Sec. 29, S. E. $\frac{1}{4}$ of Sec. 30, N. W. $\frac{1}{4}$ of Sec. 32, and E. $\frac{1}{2}$ of Sec. 31, T. 51 N., R. 37 W.

The first work of the company was done on the Knowlton and Butler beds, with a little work on what formerly was supposed to be the Evergreen, principal work being on the Knowlton amygdaloid, on which there were old shafts of 170' and 300', latter having been deepened to 600' by the present company. Considerable copper was taken from the Knowlton bed, but it was thought wise to transfer work to virgin territory, at the southern end of the property, and the wisdom of this move was demonstrated by the outcome. There also is a 90' shaft on the Tresidder bed, 1,000' E. of the Knowlton, which was sunk 1865, and is said to have paid for sinking from the copper extracted. Considerable diamond drilling has been done, and the borings of the Adventure, on adjoining lands, indicate that the Lake should have several other promising amygdaloidal beds, in the same general horizon as the Lake bed now being opened.

Geology: the strike of the Lake amygdaloid in the immediate vicinity of the shaft is about N. 6° E., with dip of about 35° W. It was at first thought that the Lake bed was a fissure, but that this is not the case was proven conclusively by the disclosure of parallel strata, including a conglomerate lying about 400' thereunder. The Lake bed, which is a typical Lake Superior amygdaloidal trap flow, barring its unusual strike and dip, is exceedingly wide for a copper-bearing bed, ranging from 50 to 100'. The hanging-wall of trap is fairly well defined but the footwall is extremely irregular, there being no marked line of separation between copper rock and trap. The Lake bed appears to carry 3 well-defined shoots of enriched copper ground, raking northward with depth. An attempt was made to locate the northerly extension of the Lake bed by diamond drilling from surface, but without success, though 3 holes were bored and it is now known that the lode turns W. and passes into South Lake ground. Thirteen diamond drill holes have been bored, aggregating 1,628'. The northernmost bottom workings of the mine show a deflection to the westward, with a strike, at the extreme north, of N. 15° W., which corroborates the hypothesis of Dr. L. L. Hubbard, that the Lake bed is the third and the East lode, the fourth bed from the top in the series of 4 amygdaloidal beds cut by the drill holes of the South Lake.

There are two other lodes only 50' W. of the Lake with commercial ore. The long crosscut on the South Lake proves Dr. Hubbard's theory.

The mine is operated by a 1,500' incline shaft, ore being extracted from all levels from the 2nd to the 11th. The lode is bunchy with very rich spots and some mass copper, but the general average is about 2% which is equivalent to 25 lbs. of refined copper.

The Knowlton shaft was unwatered Aug., 1916, to mine ore from the Knowlton lode, which though narrow, shows good copper values where opened. The Butler and Evergreen lodes can be reached by an 800' crosscut from this shaft.

Development: the mine has about 30,000' of workings, a very large proportion of the drifts being in neither the footwall nor the hanging-wall, giving a rather indifferent line on the actual values in the bed. New work during last fiscal year totaled 2,177'.

Equipment: includes a 32x72" Nordberg duplex-cylinder double-conical-drum hoist, capable of lifting 10-ton loads from depth of a mile; old 6-drill and 15-drill air compressors, taken from the equipment of the old Belt mine, and a new 50-drill 2-stage cross-compound air compressor, in a steel compressor house. Mine structures include a machine shop, smithy, changing house, office and boarding house. There are 9 dwellings and a number of old houses at the Belt location. The property is served by the main line of the Copper Range railway, which passes through the old Belt location, with a 1½ mile spur to the shaft, and a siding has been built to within 500' of the shaft by the Mineral Range railway, giving the mine the advantage of competitive railway rates. About 150 men are employed.

Production: fiscal year ending April. Work resumed in May, 1915, after 2-year shutdown.

	Tons Rk. Stmpd.	Mineral Lbs.	Lbs. Cu. per Ton Rk.	Lbs. Cu. Prod.	Cost per. Lb.	Rec. per Lb.
1916(a).....	59,848	2,511,216	26.42	1,581,071	15.622(b)	20.149
1914			14.95	275,647		15.074
1913	83,109	2,153,128	15.39	1,300,562	19.5(c)	

(a) Did not produce during first 3 months. (b) Includes 1.036c charge due to resuming operations. (c) Approximately.

Production by July, 1916, reached 200,000 lbs. copper monthly, with net

earnings of \$25,000 per month. With an increased production the cost per lb. should be materially lowered.

The management is both experienced and capable, and the mine, though small, is most promising.

LAKE COPPER MINING CO., LTD.

NOVA SCOTIA

Idle. Office: care Dr. H. Mackay, New Glasgow, N. S. Mine office: Polson's Brook, Antigonishe Co., N. S. A. G. Baillie, gen. agt. Inc. Jan. 1908. Cap., \$2,500,000; shares \$1 par. Property: 6,400 acres, on Polson lake, said to show a vein 5' thick, traceable a mile and carrying auriferous and argentiferous copper ore. Mine has a 103' shaft with 554' of workings.

LAKE GEORGE DEVELOPMENT CO.

COLORADO

Office: 22 E. Columbia St., Colorado Springs, Colo. Mine office: Lake George, Park Co., Colo. Officers: O. W. Battles, pres. and mgr.; S. C. Drollinger, v. p.; A. J. Kiser, sec.-treas. and purch. agt.; preceding with M. A. Kiser and R. H. Kiser, directors. Inc. 1910, in Colorado. Cap., \$600,000; shares \$1 par, divided into 30,000 preferred and 570,000 common shares, preferred shares being issued to bondholders of this amount. Bonds bear interest at 7½%.

Property: 28 claims, 530 acres and 750 acres miscellaneous lands, partly patented, in the Lake George district, show a calcareous contact deposit between quartzite and granite. Ores contain chalcopryrite with good silver and gold values. Development: by 3 shallow shafts, deepest 80', and a 1,100' tunnel.

LAKE MILLING, SMELTING & REFINING CO.

MICHIGAN

Office: 12 Ashburton Place, Boston, Mass. Operating office: Calumet, Mich. Works office: Point Mills, Houghton Co., Mich. Officers: R. L. Agassiz, pres.; Geo. G. Endicott, sec.-treas.; Jas. McNaughton, mgr.; preceding with H. F. Fay and W. L. Frost, directors.

Inc. 1891, in Michigan. Cap., \$2,500,000; shares \$25 par; fully issued; \$5 paid in. Stock distribution is as follows: Allouez Mining Co., 36,164 shares; Centennial Copper Mining Co., 16,164 shares; Hancock Cons. Mng. Co., 10,000 shares; Isle Royale Copper Co., 18,836 shares; Superior Copper Co., 18,836 shares.

Owens 2 mills; one, called the Centennial-Allouez mill, is at Point Mills, on the shore of Portage lake, on land adjoining the Franklin mill site. The mill was built by the Arcadian Copper Co., and was bought, 1904, by the Centennial Copper Mining Co., and later transferred to the present corporation. The mill of 4,000 tons daily capacity is equipped with 6 Nordberg stamps and crushing rolls to treat oversize material. Power is furnished by a 600-h. p. Nordberg cross-compound engine, and water is supplied by a 15,000,000-gal. Nordberg pump. A new boiler house containing 8 boilers was completed in 1915. The other mill, known as Lake No. 2 mill, is at Hubbell and has 2 stamps in operation at present. Two more are to be added. A wharf, running 675' into deep water, is equipped with a modern coal hoist and coal shed.

LAKE MINE.

COLORADO

Robt. H. Sayre, Central City, Colo., mgr. Property: 5 patented claims, in Virginia mining district, Clear Creek Co., shows pyrite, chalcopryrite, grey copper, zinc and lead. Ore occurs in fissure vein running N. 80° E. with dip 65°, in granite-gneiss formation.

Development: by 2 tunnels, 600' and 2,000' long to vertical depth of 2,400', with a total of 15,500' of underground workings. Production: from Aug., 1914, to Aug., 1915, was 16,506 tons of ore, averaging \$15 per ton, yielding a gross return of \$225,000 and a net return of \$122,629. Dividend

distributed among the owners for the fiscal year ending Aug. 1, 1915, was \$21,000. Mine is worked by lessees.

LAKE SHORE MINE

ARIZONA

Address: Frank M. Leonard, mgr., 82 N. 6th Ave., Tucson, Ariz. Howard M. Snyder, supt., Casas Grande. **Property:** 7 claims, 3 patented, 115 acres, 5 miles W. of Tucson and 35 miles S. of Casas Grande, carries a contact deposit in granite and andesite. The ore channel runs N.-S. and dips 45°. The deposit carries oxidized copper ores.

Development: by 285' vertical shaft bottomed in copper sulphide ore.

Production: by former owner, B. S. Wilson, averaged 7% to 12% copper and 31.4 oz. silver per ton. Property has been examined and reported on by Frank W. Royer, A. J. Waters and Thos. H. Leggat. Property promising.

LAKE SHORE MINES, LTD.

ONTARIO

Haileybury, Ont. Harry Oakes, pres.; J. W. Morrison, sec.-mgr. **Inc.** Feb. 25, 1914, in Ontario. **Cap.**, \$1,500,000. **Property:** the Lake Shore gold mine, on Kirkland Lake, adjoins the Teck-Hughes on the east.

Development: by 300' shaft with crosscut at bottom being driven to reach the vein opened on 100' level. Vein reported to measure 42" in width at surface and 40" at 100' depth. **Equipment:** includes 3-drill compressor boilers, blacksmith shop and office buildings. About 30 men employed.

LAKE SHORE MINING CO.

MICHIGAN

Idle several years. **Office:** 990 West Kensington Road, Los Angeles, Calif. Mine near Green, Ontonagon Co., Mich. W. H. Garlick, pres. **Inc.** in Michigan. **Cap.**, \$500,000; shares \$25 par.

Property: 821 acres, patented, on the shore of Lake Superior, is reported to carry bedded deposits, between slate walls, of 5' and 12' width, showing copper oxides and chalcocite giving average assays of 2% copper, 0.5 oz. silver and 40 to 80c gold per ton. Apparently the orebody is of the secondary or Porcupine series of the Keweenawan formation, and ores may change to native copper at depth. A little prospecting has been done.

LAKE SUPERIOR & ARIZONA MNG. & SMELTING CO. ARIZONA

Office: Calumet, Mich. **Mine office:** Superior, Pinal Co., Ariz. **Officers:** John D. Cuddihy, pres.; Johnson Vivian, v. p.; A. E. Petermann, sec.; Wm. B. Anderson, treas; preceding officers, Wm. H. Thielman, Edw. Ulseth, Henry L. Baer, Frank S. Carlton, all of Calumet; W. A. Holt, Globe, Ariz., and John T. Reeder, Houghton, Mich., directors.

Inc. Sept. 30, 1902, in Arizona, as the Lake Superior & Arizona Mining Co. **Cap.**, \$200,000; shares \$1 par, and reorganized, 1904, in Arizona, with present title; **Cap.**, \$2,500,000, shares \$20 par; issued, \$1,680,000, formerly assessable, but now fully paid. Annual meeting, second Tuesday in March. A. E. Petermann, transfer agt., Calumet, Mich. First National Bank, Calumet, Mich., registrar.

Property: the Gold Eagle mine, with 11 claims, 110 acres, freehold at Superior, in the Pioneer district, 3 miles S. of the Silver King mine, 30 miles W. of Globe and 28 miles E. of Florence. Claims show thickly bedded, steeply upturned limestone, resting on quartzite, underlaid by diabase. Ore occurs following slips, or brecciation along bedding planes which in general lie within 20' of the base of the limestone. In places the ore is 4' thick, and sometimes leached iron gossan is 15' thick. This brecciation is due to fracturing or bedding faulting, and does not follow exactly the same bed.

As the vein matter is a leached iron gossan with only occasional patches and segregations of oxidized ore or residual nuclei of sulphide, hope is felt that massive sulphides will be found in depth. Though a heavy flow of

water is encountered, the sulphide zone has not yet been reached.

Development: the principal working is the Charlton tunnel, which for 2,000' follows the mineralized fracturing along the bedding plane between Devonian limestone and quartzite. This tunnel is 130' vertically below the Holt tunnel, is connected with the latter by a 165' winze on the dip of the vein and is 3,000' long, showing ore assaying up to 30% copper. At the northern end of this long tunnel, there is an incline shaft sunk along the bedding plane, at 26° inclination for 1,800' with short levels at various intervals.

Equipment: includes steam plant with 175-h. p. water-tube boiler, and 16-drill Rand 2-stage air compressor. Fuel is petroleum, and there are 5 storage tanks at the mine and 2 at Florence, each holding 2 carloads of oil.

Buildings include a power house, smithy and bunkhouse at the mine, and an office and dwelling at Florence, 28 miles distant.

Production: was 99,120 lbs. copper, 1,040 oz. silver and 188 oz. gold in 1907; none since. Work was suspended 1907, resumed 1910 by the Magma Copper Co., and again suspended 1911. Property is considered promising.

In March, 1913, the Gunn Thompson interests, who as the Magma Copper Co., had an option on the property expiring 1912, are reported to have offered to spend \$100,000 in sinking the shaft and developing and further agree to add several claims to the group, all for one-half of the company's stock, provided the L. S. & A. Co. give them title to one of the claims. Plans under way, Dec., 1915, to reorganize with idea of obtaining money for more development work.

LAKE SUPERIOR DEVELOPMENT CO.

MICHIGAN

Office: care Clyde Mackenzie, sec., Houghton, Mich. **Jos. Croze, pres.;** Jos. W. Selden, treas. **Property:** 400 acres, held under option, the N. ½ of Sec. 25, and S. ½ of S. W. ¼ of Sec. 24, T. 57 N., R. 32 W., about ½ mile E. of the Gratiot and about 1½ miles of the Ojibway. Lands are on the Keweenawan formation. Drill boring made 1910-11, gave much encouragement, and company hopes to resume operations.

LAKE SUPERIOR OPHIR MINING CO.

COLORADO

Ophir, Colo. **Inc. Sept., 1911, in Ariz. Cap., \$1,000,000;** shares \$2 par. Is reorganization of the Calumet-Telluride Mng. Co. **Property:** in Chapman gulch above Ophir, San Miguel Co., Colo., said to carry free gold ore.

Equipment: includes aerial tram, electric power and 20-stamp mill, handling about 100 tons of \$15 ore daily in 1915. Employs 30 men.

LAKE SUPERIOR SMELTING CO.

MICHIGAN

Office: 12 Ashburton Place, Boston, Mass. **Works office:** Dollar Bay, Houghton Co., Mich. **Officers:** R. L. Agassiz, pres.; C. H. Bissell, sec.-treas.; preceding with Geo. A. Flagg, F. L. Higginson, F. W. Hunnewell and Jas. MacNaughton, directors. Jas. MacNaughton, gen. mgr.; Harry B. Conant, supt.

Inc. July, 1891, in Michigan. Cap., \$1,200,000; shares \$25 par, fully paid and issued. Is controlled through ownership of 25,000 shares, by the Tamarack Mining Co., and by the Osceola Cons. Mining Co., which has 15,000 shares, and the Isle Royale Copper Co., which has 8,000 shares.

The smelter, closely connected with the plant of the Tamarack-Osceola Mfg. Co., has 11 reverberatory furnaces and 3 refining furnaces. There is a mechanical ladling and casting device having a 1,100-lb. ladle, and a casting machine with molds linked into an endless belt, dumping over sprockets into cooling tanks, whence the ingots are delivered mechanically by cleat elevators to inspection and loading platforms. About 300 men are employed.

The smelter treats ore from the Tamarack, Osceola, Isle Royale, Ahmeek and Centennial mines. The company also owns the dismantled

smelting plant at Hancock, Houghton Co., Mich.

LAKE SUPERIOR & WESTERN MINING CO.

ARIZONA

Office: 208 Glencoe Bldg., Duluth, Minn. **Officers:** A. Hagberg, pres.; A. Bjorkman, v. p.; A. Borgquist, sec.; A. Johnson, treas., with Magnus Olson, John Peterson, A. R. Norman, Ed. Falk, and A. Kolstad, directors. **Inc.** 1912, in Ariz. **Cap.**, \$1,000,000; shares \$1 par; \$250,000 issued; assessable, subject to calls from 60c-\$1. Authorized bond issue \$300,000; \$134,000 bonds outstanding. Annual meeting 1st Tuesday in February. Is a holding company, owning a ½ interest in the Big Pine Cons. Mng. Co., which see.

Company owned the Mascot gold mine and a 100-ton cyanide plant at Crown King. After expenditure of \$250,000 on the mine and mill, ore proved to be too low-grade to pay and property was abandoned. In 1915 a consolidation was effected with the Big Pine Cons. Mng. Co., a \$500,000 corporation, on the following basis: 200,000 shares of the 500,000 shares of capital stock were issued for the Big Pine properties and 200,000 shares and \$32,150 in cash was paid the Lake Superior & Western Co. for its mill, which has been moved to the Big Pine ground.

LAKEVIEW MINING CO.

UTAH

Office: 303 Dooly Bldg., Salt Lake City and Ogden. **Mine office:** Promontory Point, Utah. **Officers:** W. A. Perkins, pres.; Sampel S. Arentz, v. p.-mgr.; L. F. Farr, sec.-treas., with C. L. Farr and Jas. Wotherspoon, directors.

Inc. March 9, 1915, in Utah. **Cap.**, \$500,000; shares 5c par, assessable; all issued to officers of the company. Annual meeting March 9th. Gross earnings for 1915 were \$135,000, all from ore sales. Operating expenses totaled \$65,000. **Dividends:** to May, 1916, amounted to 20c per share, or \$100,000.

Property: 15 claims, unpatented, 235 acres, at Promontory Point, Box Elder Co., 3 miles E. of Saline on the S. P. R. R., shows zinc-lead ore in a contact deposit between limestone foot and shale hanging-wall. The ore-body measures up to 20' in width, runs N. 35° W. and dips 35° N. E. Pay ore occurs in shoots from 1'-20' wide and from 50'-250' along the strike. Assays reported to average 32% zinc, 5% lead, 2% iron, 16% insoluble.

Development: to 1,000' below the outcrop by 5 adits, from 250'-350' long. A 6' vein assaying 18% lead with some silver has recently been opened on the South Hill ground and is now under development. Zinc ore as shipped averages 32% and lead ore 26%.

Equipment: includes 600' tram and oil-driven Chicago pneumatic compressor of 187 cu. ft. capacity.

Production: to March, 1916, totaled 126 cars averaging \$25-\$30 per ton and returning \$200,000. Output for May was 800 tons, netting \$16 per ton. A lease and bond held by the A. S. & R. Co., for \$625,000 was allowed to lapse, March, 1916. Company employs 90 men. The Western Zinc Co., operating a lease on a block of the Lakeview, shipped about 1,000 tons of ore during 1915.

The mine and management have made quite a remarkable record. Located Jan. 27, 1915, work was commenced March 9, with a small force and by December, 1915, all debts were paid, the mine was developed, equipped and shipping, a \$70,000 dividend paid to stockholders and a cash surplus remained in the treasury.

LAKEVIEW VOLUNTEER MINING CO.

UTAH

Office: Orpheum Bldg., Salt Lake City, Utah. **Officers:** Leo Nielsen, pres.; Frank Jardine, v. p.-gen. mgr.; Willard P. Funk, sec.-treas., with A. B. Maughn and Ben C. Risk, directors. **Inc.** 1916, in Utah. **Cap.**, \$50,000;

shares 5c par; assessable. Listed in Salt Lake City. In May, 1916, treasury had 450,000 shares and \$625 in cash.

Property: 3 claims in Promontory district, Box Elder Co., and 2 claims in Blacksmith Fork canyon, Cache Co.; the former have 500' of development work, including a 125' shaft, said to show zinc ore. Equipped with a hoist. The work done on the Blacksmith Fork claims is said to show copper-lead-zinc ore. Is a prospect.

LAKINA COPPER CO.

WASHINGTON-IDAHO

Office: Eagle Bldg., Spokane, Wash. **Officers:** E. A. Patrick, pres.-mgr.; E. J. Coleman, v. p.; T. E. Coleman, sec.-treas., with G. W. Dickinson, H. R. Waters, and L. N. Koonz, directors. **Cap.**, \$3,000,000; shares \$1 par; 1,750,000 shares outstanding.

Property: 2 claims, 40 acres, in Deadwood mining district., 3 miles N. E. of Lowman, Boise Co., Idaho, and 4 claims, about 25 miles N. of Twisp, Okanogan Co., Wash. The Idaho property is a free milling proposition reported to carry a fissure vein, 30' wide, traversing granite-porphry and giving assays of from \$48-\$76 per ton. Both properties are under development.

LAKINAW TAGISH CO.

ALASKA

J. L. Harper, mgr., Cymru mine, Moira Sound, via Ketchikan, Alaska. Holds bond on Cymru mine (which see) and on Portland (or Westlake King) group.

At the Cymru a 100' shaft has been sunk and the mine equipped with 3-drill compressor and gasoline hoist. A mile long tram with gasoline motor connects mine and shipping wharf; 300 tons of ore were shipped to Tacoma in July, 1916.

The Portland Group, near Mineral lake, is 1½ miles from the Cymru. It shows a 4' vein carrying silver-zinc-lead and copper values, zinc being predominant. **Development:** by 130' shaft. The ore is transported by 1,000' aerial tram to Mineral Lake, from there by scows to the Cymru; 500 tons are reported ready for shipment to Oakland, Calif. Ten men employed.

LANDLOCK BAY COPPER MINING CO.

ALASKA

Office: Valdez, Alaska. **Mine office:** Landlock, Alaska. Dr. W. A. Rystrom, pres. and mgr. **Inc.** 1907. **Cap.**, \$1,000,000; shares \$1 par; issued 750,000 shares.

Property: 7 claims, 140 acres, on a small peninsula, with tide water on both sides, has 2 tunnels on the western side, besides a shallow shaft, 500' of drifts, a winze and raises, showing chalcopryrite, sphalerite and pyrrhotite ore assaying 7½% copper. Developing at last accounts. Geology fully described, p. 97, Bull. 605, U. S. G. S.—1915.

LANYON STARR SMELTING CO.

OKLAHOMA

Office: St. Louis, Mo. Controlled by American Metal Co., Ltd., 120 Broadway, New York City. Plant at Bartlesville, Okla. **Officers:** S. Roos, pres.; M. Schott, v. p.; Wm. Simon, treas.; with E. V. Lanyon, R. E. Rombauer, directors; W. H. McMillan, sec. **Inc.** in Maine. **Cap.**, \$500,000 common and \$250,000 6% cumulative preferred; shares \$100 par. Annual report for 1915 shows: profit, \$373,641 and balance of \$261,378, after writing off 1914 deficit of \$37,887. **Dividends:** paid amounted to \$15,000 on preferred stock.

Company operates a zinc smelter of 35,000 tons annual capacity.

LAS ANIMAS PEAK GOLD MINES CO.

NEW MEXICO

Office: 1516 No. American Bldg., Chicago, Ills. **Mine office:** Hillsboro, N. Mex. **Officers:** Hon. E. W. Kirkpatrick, pres.; R. Liebman, v. p.; C. B. Van Deman, sec.-mgr.; W. A. Nason, treas.; with L. E. Marvin, W. McCarty Moore and J. H. Palmer, directors. E. B. Van Deman, supt.

Inc. 1914 in Ariz. Cap., \$1,000,000; shares \$1 par; 450,000 issued. Annual meeting 3rd Wednesday in January.

Property: 12 claims unpatented, 240 acres, 4 miles N. of Hillsboro, Sierra Co., N. Mex., shows gold-silver ore in a fissure vein, said to be 3-12' wide, striking N. and dipping 70°. Developed by several shafts to depth of 435'. A new 2-compartment shaft being sunk. Management estimated 100,000 tons of ore blocked out.

Equipment: includes 50-h. p. steam hoist, Cameron pump, compressor and 50-ton concentrating mill. A cyanide plant and electric power are to be installed in 1916.

Property was a good producer under former owners, the Philadelphia M. & M. Co., which went into bankruptcy in 1907. Litigation followed and mine remained idle until acquired by present company two years ago. Management plans extensive development work.

LAS VIGAS MINING CO.

MEXICO

Dead. Property controlled by A. McKenzie, 66 Broadway, New York. Mine at San Sostenes, Coyame, Iturbide, Chihuahua, Mex., consists of 74 hectares, said to show upturned Cretaceous sandstones and shales with interbedded copper lodes, occurring as impregnations and replacements in sandstone. Four veins last under development are reported to average 7 to 12' width, and to give average returns of 7.5% copper and 3 oz. silver per ton, mainly from disseminated bornite and chalcopyrite, with occasional oxidized ores and native copper.

Development: by shafts of 61', 98', 125' and 212', with various levels; also 3 short tunnels. Workings estimated to develop 160,000 tons of ore.

Equipment: includes steam power, a hoist, an air compressor, and a 100-ton concentrator. Buildings include an office, store and 19 dwellings. Ore was hauled, 43 miles, to Las Trancas station, by a Buffalo-Pitts traction engine. Reported under option to English parties, 1916.

LASQUETI ISLAND MINING CO., LTD. BRITISH COLUMBIA

Vancouver, B. C. **Officers:** R. A. Mather, pres.; A. D. Tennant, v. p.; John D. Mather, sec.; Geo. E. Winter, treas.; Percy Williams, mgr., at last accounts. Inc. 1910. Cap. \$500,000, shares 25 cts. par.

Property: 3 claims, 150 acres, on Lasqueti island, on the S. W. end of Texada island, on the Gulf of Georgia, 55 miles from Vancouver. **Development:** by a tunnel, on a 20' vein known as St. Joseph, having 4 paystreaks, of 6 to 24" width, said to carry ore averaging 10% copper and \$20 gold per ton. Presumably idle.

LAST CHANCE COPPER MINING CO.

MONTANA

Officers: Geo. Champagne, pres.; W. H. Nichols, sec.; Dr. T. C. Wither-
spoon, treas., Murray Hospital, Butte, Mont. Cap., \$1,200,000; shares \$1 par.

Property: 2 claims, patented, adjoining the Ben Hur mine, 4 miles north of Saltese, Missoula county, Mont. Mine is developed by shallow shafts and a 2,300' tunnel, the workings said to show a 30' vein, faulted in the tunnel, but a winze shows an 18" streak of ore said to carry about \$100 per ton in values. Company reports past shipments of about \$150,000, one car-load shipped giving returns of 13.6% copper, 394 oz. silver and \$12 gold per ton. Tunnel being driven in 1915-16 to reach the rich oreshoots from which shipments were made.

LAST CHANCE MINE.

OREGON

Owned and operated by Baker Mines Co., which see.

LAST CHANCE MINING CO.

UTAH

Owns 1 patented claim, adjoining the American Copper Co., in the Big Cottonwood district, near Alta, Salt Lake Co., Utah. Shaft, at depth of 70',

is said to show a 6" lead of silver-lead ore. Operations resumed in 1915 by F. O. Horne and Jas. Hauerbach.

LAST DOLLAR MINING & DEVELOPMENT CO. COLORADO

M. B. Rapp, pres.-gen. mgr., Cripple Creek, Colo.; F. R. Berbower, sec.-treas. Has a 2-years' lease and bond on the Last Dollar mine, 18 acres, adjoining the Portland & Modoc mines, Cripple Creek district, Teller Co., Colo. Mine is credited with a past production of \$30,000,000.

Development: by 1,517' shaft with levels at 500', 1,000', 1,200', 1,300' and 1,500'. The West vein, opened on the bottom level, is said to be 2½' wide and producing better than \$30 per ton ore in 1916. Shipments are made to the Golden Cycle mill at Colorado City. Four sets of lessees are working above the 1,300' level.

LAST HOPE MINE.

NEVADA

Owned and operated by Chas. Koegel, Chas. Huber and C. Pike. Mine adjoins the Queen Regent Mines Co. on the W., at Rand, Mineral Co., Nev., and is reported to carry an extension of the Queen Regent vein. **Development:** by 250' double-compartment shaft. **Shipments:** in 1915, said to have averaged \$80 per ton, amounted to \$30,000.

LATAH COPPER MINING CO., LTD.

IDAHO

Potlatch, Latah Co., Idaho. Idle since 1907. See Vol. XI, Copper Handbook.

LATEST OUT MINING & SMELTING CO.

IDAHO

Ralph Nichols, mgr., Gilmore, Lemhi Co., Idaho. **Property:** the Latest Out mine, at Gilmore, is a lead-silver mine, developed to depth of 800'. Shipments of 27,000 tons were made 1910-12. Worked by lessee in 1915-16. (See full description by Nichols in Trans. Am. Inst. M. E., Vol. XLVI, pp. 937-9, Lead-Silver Mines of Gilmore (Lemhi Co., Idaho).)

Ore: limonite and hematite replaced by shoots of lead minerals in fissure veins in limestone at right angles to bedding with south rake to ore-shoots. Sulphides decrease with depth. Ore on 200'-500' level assays 32% lead, 10% silica, 25% iron, 3% zinc and 12 oz. silver per ton. Oreshoots are 30'-40' wide in places.

LATOUCHE COPPER MINING CO.

ALASKA

Latouche, Latouche island, Alaska. Geo. Barrach, mgr. **Property:** 7 claims, about one-half mile north of the Bonanza mine of the Beatson Copper Co., at the northern end of Latouche island. The vein has been traced about 750', by trenches and pits, and its developed by a 750' tunnel, showing chalcopryrite, associated with pyrite and pyrrhotite, with drifts in ore of 4 to 12% copper tenor, having small gold and silver values. There is an 1,175' ground tram to a shipping wharf. Idle since 1914.

LATOUCHE ISLAND COPPER MINING CO., LTD.

ALASKA

Office: 509 Burke, Bldg., Seattle, Wash. **Mine office:** Latouche Latouche island, Alaska. **Officers:** Jas. A. Murphy, pres.; L. G. Wheeler, v. p.; A. E. Fraser, 2nd v. p.; C. P. McCormick, sec.; A. L. Cohen, treas.; preceding officers, Tenning Carlson and H. J. Jacobs, directors. **Inc. in Washington. Cap., \$5,000,000; shares \$5 par.**

Property: 42 claims, with about 4 miles of tidewater frontage, is on the N. E. shore of Latouche island, 60 miles S. of Valdez. The property has 3 practically parallel N.-S. veins, of 8 to 20' estimated average width, with dip of about 65°, somewhat faulted but proven by trenches for about 3 miles.

Development: by a shallow shaft and 4 short tunnels, claimed to have in sight approximately 200,000 tons of 5% ore, which is considered excessive. Ore carries bornite and chalcopryrite, with quartz gangue, assaying up to 25% copper, with \$1 to \$3 combined gold and silver values per ton.

Equipment: includes a small hydro-electric plant having a water wheel and a Class E Rand air compressor. Company was shipping 125 tons of ore daily at last accounts. No returns secured 1915-16.

LAURA LEE MINING & LEASING CO.

COLORADO

Office: 501 Majestic Bldg., Denver. **Officers:** Hon. Geo. W. Musser, pres.; Chas. A. Woodward, v. p.; W. R. Benzie, sec.-treas.; A. S. Pierce, gen. mgr.; with D. M. Wright and Chas. J. Hallett, directors. **Inc.** 1916 in Colo. **Cap.**, 1,500,000 shares; 10c par; fully paid and nonassessable.

Property: a 3 years' lease, with option to purchase, on the Laura Lee mine, on the southern slope of Mineral hill, Cripple Creek, owned by the Vindicator Cons. Gold Mining Co. **Development:** by 160' shaft, sunk about 15 years ago, and 2 west drifts on the vein for 200'. The shaft is being deepened and equipment installed in 1916.

A prospectus of the company contains the following typical paragraph: "Our Ore—starting from the 100' level: This is about as low as any mine can figure on stoping ground (meaning breaking the ore down from above in place of digging at much greater expense), and what have we? Ore that will assay from a few dollars a ton to as many thousands a ton, as you would want in your wildest imagination of possible wealth, and it will average enough to make every pound of it Pay Ore. The drift to the South is offering possibilities of riches that would make any prospector work without food and sleep to get to the 'big pay streak,'" etc., etc. Advertising literature and stock selling campaign very unfavorably regarded.

LAURIER MINING CO.

WASHINGTON

Office: 410 Columbia Blk., Spokane, Wash. **Mine office:** Laurier, Ferry Co., Wash. **Officers:** Dayton H. Stewart, pres.-mgr.; F. L. McNeil, v. p.; E. K. Erwin, sec.-treas.; with Grant A. Stewart and Guy P. Linville, directors. G. A. Stewart, supt. **Inc.** Oct. 22, 1908, in Wash. **Cap.**, \$1,000,000, increased later to \$1,500,000; shares \$1 par; all issued.

Property: 7 claims unpatented, about 120 acres, in the Curlew district, 9 miles from Grand Forks, B. C., and 127 miles N. W. of Spokane. Developed by 140' shaft and several tunnels, showing a vein of pyrrhotite ore said to show copper, silver and gold values.

Equipment: includes a 2,900' aerial tramway connecting the mine with a railroad siding, constructed in 1915. Plan installing electric power and seven-drill compressor in 1916. **Shipments:** commenced in 1915, were sent to the Granby smelter; about 500 tons of copper-silver ore from development work averaged 4.16-7.66% copper and 2 oz. silver, netting \$30 per ton.

LAURIUM MINING CO.

MICHIGAN

Office: 12 Ashburton Place, Boston, Mass. **Mine office:** Calumet, Houghton Co., Mich. **Officers:** Rodolphe L. Agassiz, v. p.; Geo. A. Flagg, sec.-treas.; Jas. MacNaughton, gen. mgr., and Francis L. Higginson, directors; Geo. G. Endicott, asst. sec.-treas. **Inc.** in Michigan. **Cap.**, \$1,000,000; shares \$25 par; fully issued. Is controlled, through ownership, of 37,823 shares, by the Calumet & Hecla Mining Co. Has paid dividends of \$4 per share, through sale of town lots in the village of Laurium. Company ended 1915 with balance of liabilities of \$19,313. Annual meeting, second Tuesday in June.

Property: 575 acres with mineral rights, including 325 acres whose surface is also owned. Company originally owned 640 acres, lying next east of the Calumet & Hecla, but a triangular tract of about 65 acres, carrying both surface and mineral rights, was sold to the Calumet & Hecla, and about 250 acres of surface rights have been disposed of since as building lots, with reservation of mineral rights. The property carries about 1½ miles of the

strike of the Kearsarge bed, with 280 acres of underlay, giving the Laurium a chance to develop this bed to a depth of about 4,400'.

Development: the Laurium shaft, started Aug. 7, 1909, as a result of previous diamond-drill borings, is about 2,200' from the S. W. corner of Sec. 26, and about one-half mile N. of No. 1 Tecumseh shaft. The shaft is 1,661' deep, with about 7,000' of workings. The mine was closed July, 1913, at the time of the strike and has not been reopened since. When operations were suspended workings on the 12th, 14th and 15th levels were in poor ground, showing very little copper.

Equipment: includes a boiler house, engine house with a large hoist and air compressor, and a changing house.

LAWRENCE MINING & MILLING CO., LTD.

IDAHO

Office: 728 Mission St., Spokane, Wash. **Mine office:** Clarke Fork, Idaho. **Officers:** Jos. Reed, pres.-mgr.; O. A. Turnbow, v. p.; S. Hilliard, sec.-treas.; with John Reed and W. W. Wood, directors. **Cap.**, \$75,000; shares 5c par; 1,472,794 outstanding.

Property: 10 claims, about 1½ miles from Clarke Fork, said to carry gold-silver-copper-lead ore in fissure vein, up to 20' thick. **Development:** 800' tunnel. Equipped with 60-ton concentrator, pump and compressor. Property considered promising, but development hampered by lack of capital.

LAZY BOY GOLD MINES CO.

ARIZONA

Oatman, Ariz. Officers: Jas. L. McIver, pres.; W. H. Ridenour, v. p.; Geo. W. Long, sec.-treas.; with Wallace Keith and H. C. Hammond, directors. **Inc.** 1916 in Ariz. **Cap.**, 1,000,000 shares; 10c par. Stock listed on San Francisco Exchange. 300,000 shares and \$65,000 cash in treasury, March, 1916.

Property: 130 acres, includes the Lazy Boy, Red Bird, Never Rest, Jumbo, Combination, Falcon, Blue Bird and Live Boy, in the Gold Roads district, about 1¾ miles S. of Oldtrails, Mohave Co., Ariz. Two veins seen on the surface are being developed by the 2-compartment Lazy Boy shaft, 300' deep, March, 1916, and to be sunk to 500'. **Equipment:** includes 300 cu. ft. compressor, 3 jackhammer drills, 40-h. p. gasoline hoist. Is considered one of the best prospects of the camp, having actual ore already exposed.

LEAD KING MINING CO.

IDAHO

Address: E. W. Conrad, gen. mgr.-sec., Eagle Bldg., Spokane, Wash. **Inc.** 1911 as successor of the Marie Mining Co., Ltd. **Cap.**, \$1,000,000. **Assessment** of 1 mill per share levied, Nov., 1914.

Property: 13 claims, in McFarren gulch, about 1 mile south of Osburn, Idaho, said to carry 2 veins, one with outcrops of high-grade galena, the other showing outcrops of silver-copper ore. **Development:** mainly by 4 tunnels, longest 550', with open cuts and shallow shafts, showing silver-lead and gray copper ore, giving good assays. **Equipment:** includes several small cabins for mine purposes. Company dormant since 1913.

LEAD KING MINING & MILLING CO.

NEVADA

Office: Continental Natl. Bank Bldg., Salt Lake City, Utah. **Officers:** A. P. Spitko, pres.-mgr.; Geo. F. Goodwin, sec.-treas.; A. Cigneaux, supt. **Inc.** 1899. **Cap.**, 300,000 shares; 10c par; assessable; 254,500 shares issued. Stock is listed on Salt Lake Exchange.

Property: 15 claims, 8 patented, 250 acres, in Duck Creek mining district, White Pine Co., Nevada, is said to carry high-grade galena ore with small silver values, occurring in gray and blue limestone formation. **Shipments:** to date total 10 carloads, netting \$20,000. Development work resumed, April, 1916.

LEADVILLE MINING CO.**ARIZONA**

Courtland, Cochise Co., Ariz. **Officers:** Wm. Holmes, pres.-gen. mgr.; W. D. Monmonier, sec., Pearce, Ariz.; Calvin Glenn and W. A. Stilson, directors. **Inc.** 1905 in Arizona. **Cap.**, \$600,000; shares \$1 par.

Property was bonded, June, 1916, to the Needles Mining & Smelting Co. for \$600,000, with a first payment of \$10,000, final payment to be made within 12 months. Option requires that 10 men shall be continuously employed; that assessment work be done; the Maid of Sunshine shaft deepened 80', and drifts run. Present lessees continue work under same condition as before.

Property: 13 claims, 199 acres, patented, in the Turquoise district, includes the Leadville and Maid of Sunshine mines, showing contact deposits between monzonite and limestone. Ores are mainly malachite, azurite and chrysocolla, with some chalcopryrite and pyrite showing in the Maid of Sunshine mine. The orebodies, under development, carry an average of about 8% copper. Company is developing the Lower group on the 300' level. There are 5 shafts, deepest 365', and a 60' tunnel.

Equipment: includes a 250-h. p. steam plant, 2 hoists and air compressor. Company resumed active operations, Oct., 1915. **Shipments:** about 15 tons of 8% copper ore daily, and management estimates 100,000 tons ore in sight. Property considered good. A detailed report and valuation of mine was made by S. M. Greenidge, of Douglas, Ariz., 1913.

LEHI-TINTIC MINING CO.**UTAH**

Address: H. J. Fitzgerald, pres.-gen. mgr., Atlas Block, Salt Lake City, Utah. Geo. Nichols, supt. **Property:** 12 claims in the Tintic district, about 4 miles from Eureka, shows silver-lead-gold ore in fissure vein.

Development: by 1,700' tunnel. Equipped with compressor and steam power. Operated intermittently with proceeds from assessments, 18 of which had been called to April, 1916. Stock listed on Salt Lake Exchange.

LEIGHTON-WYOMING MINING CO.**WYOMING**

Idle. **Office:** 417 Seventh St., Milwaukee, Wis. **Officers:** M. H. Yewdale, pres.; Herman Pereles, v. p.; H. E. Dankoler, sec.; Spencer C. Yewdale, treas.; with A. G. Weissert, S. P. Bjorklund and C. W. Hendricks, directors. **Inc.** 1906. **Cap.**, \$1,000,000; shares \$1 par; issued, \$810,000.

Property: 2 patented claims, about 1 mile north of the Ferris-Haggerty mine in the Battle Lake district. **Development:** by a 186' tunnel and a 65' shaft. **Equipment:** includes a saw mill and a small machinery plant, bought 1909, from the Haskins mine.

LELAND MINING & DEVELOPMENT CO.**COLORADO**

Chas. Howbert, Cripple Creek, Colo., gen. mgr. **Property:** the Conundrum and Anchoria Leland mines on Gold Hill, Cripple Creek district. The Conundrum is developed by an 800' incline shaft and the Anchoria Leland mine is operated through the Gold Hill tunnel. Development work reported in progress by company and lessees in 1916.

LEMHI GOLD MINING CO.**UTAH**

Operates the property of the Virginia Cons. Mining Co., near Baker, Lemhi Co., Utah.

LENNAN ZINC & LEAD CO.**OKLAHOMA**

Operating a lease on Emma Gordon mine, Miami, Ottawa Co., Okla. An ore face 60' in height is being worked by drifting under the old workings on the 400' level. Equipped with concentrator. Producing since 1914.

LEONARD COPPER CO.**ARIZONA**

Gleeson, Cochise Co., Ariz. J. W. Bennie, Clifton, Ariz., mgr.; J. E. Penberthy, supt. Gleeson. **Inc.** 1910 by interests closely connected with the Shannon Copper Co., and property is under lease to that company.

Property: the Copper Belle mine, 8 claims, in the Turquoise or Courtland district, is opened by a vertical shaft and about 1 mile of underground workings, developing several orebodies on 3 different contacts. Ore is nearly solid pyrite, with considerable chalcopyrite and some bornite.

Equipment: includes steam plant with 2 hoists, compressor, repair shop, etc. Output 150 tons per day, loaded directly into railway cars at mine and shipped over the E. P. & S. W. railroad to Morenci.

LEONORA y HUERTA; MINAS.

MEXICO

Office: care James M. Daniel, owner and gen. mgr., Apt. 16, Aguascalientes, Mex. Mine near Villanueva, Zacatecas, Mex. **Property:** 100 acres, with 500 acres miscellaneous lands, in the Jalapa district, said to show a fissure vein in porphyry, of 10' average width, carrying galena, argentite, melaconite and azurite, with clay gangue, and about 5% copper, 10% lead, 200 oz. silver and 29 milligrams gold per ton. Mine was opened in 1820, and reopened 1883. Has shafts of 300' and 1,000', with about 1 mile of underground workings. **Equipment:** includes steam power, and a concentrator. Concentrates and smelting ores shipped, 75 miles, by pack train, to the Aguascalientes smelter, when operating. Presumably idle. No returns secured.

LEONORA MINING & MILLING CO.

UTAH

Office: 18-20 E. 1st South St., Salt Lake City, Utah. **Mine office:** Milford, Beaver Co., Utah. **Officers:** John Matson, pres.-mgr.; Willard Hansen, v. p.; C. D. Brown, sec.-treas.; preceding with J. W. Chase and Edward Rheinstrom, directors. A. C. Nebeker, mine supt. **Inc.** Dec. 19, 1903, in Utah. **Cap.**, \$100,000; shares 10c par; assessable; issued, 950,000 shares.

Property: 13 claims, in the North Star district near Milford, shows fissures in limestone carrying replacement deposits of gold, silver, zinc and lead ores. **Development:** by tunnels of 900', 500' and 300' and 7 shallow shafts of 25' to 100 depth. **Equipment:** includes electric hoist and air compressor.

Company did 1,050' of development work in 1915 and opened up some high-grade zinc ore from which shipments were made, 1916.

LEPANTO MINING CO., INC.

PHILIPPINES

Office: Manila, P. I. **Mine office:** Mancayan, Lepanto, Luzon, Philippines. **Officers:** Geo. E. Wolf, pres.; J. R. McDill, v. p.; M. F. Loewenstein, sec.; J. A. Hamilton, treas. Albert P. Wright, supt. **Inc.** Sept., 1906, in the Philippines. **Cap.**, 1,000,000 pesos; shares 100 pesos par. Company holds a franchise for a railway, from Mancayan to Bangar, on the western coast of Luzon. The copper property, but slightly developed, in the vicinity of Mancayan, was optioned to the Tellus Aktiengesellschaft, of Frankfurt-am-Main, Germany, but option was surrendered. Presumably idle. No recent returns secured.

LE ROI NO. 2, LTD.

BRITISH COLUMBIA

Secretary's address: F. A. Labouchere, 539 Salisbury House, London Wall, London, E. C., England. **Mine office:** Rossland, Trail district, B. C. **Directors:** Lord Ernest W. Hamilton, chairman; A. B. Dealtry, F. C. D. Haggard, H. W. Morrison and Major C. H. Campbell. Ernest Levy, mine mgr.; Alex. Hill & Stewart, cons. engrs.

Inc. June 1, 1900, in Great Britain. **Cap.**, £600,000; shares £5 par; fully issued and fully paid. **Dividends:** 5s in 1901; 5s in 1902; 2s in 1904; 3s in 1905; 8s in 1906; 3s in 1907; 6s in 1908; 6s in 1909; 6s in 1910; 5s in 1911; 1s in 1912; 2s in 1915. Total dividends to end of 1915 were £2 12s per share, or £312,000. For fiscal year ending Sept. 30, 1914, net profit was £6,193. The

company holds a share interest in the Cloncurry Syndicate, Ltd., and a two-thirds interest in the Van Roi Mining Co.

Property: 120 acres, including the Josie No. 1 and Annie mines, on Red mountain, also 8 claims near the old mine, 2 claims near the Velvet mine, and 5 claims in the Ymir district of British Columbia. Considerable diamond drilling has been done. The property shows a number of veins, the most important being the Josie, Annie and Hamilton.

Development: by the 1,300' Josie main shaft, and by 3 tunnels, 2 on the Josie and 1 on the Poorman claim. New underground openings made were 4,633' in 1913, 3,729' in 1914. The Josie vein is narrower than the average in the camp but has ore about twice as rich as that in the bottom workings, carrying up to 4% copper and 15 dwts. gold per long ton. Ore of the property as a whole is chalcopyrite, associated with pyrite and pyrrhotite, in a silicious gangue, with average assay of 1.64% copper, 0.87 oz. silver and 0.8 oz. gold per ton. Concentrating ore ranges 0.4 to 0.5% in copper tenor, with only about 20% of the copper saved, the extraction of assay values in gold being 56 to 60%.

Ore reserves: estimated by the management, 1913, at 150,000 long tons, including some ore shoots of considerable better than the average grade of the camp. Side line agreements with the Consolidated Mining & Smelting Co. of Canada insure freedom from possible litigation.

Equipment: includes a 150-h. p. electric hoist, a machine shop, framing shop, smithy, superintendent's dwelling, etc.

The mill, across a small gulch from the Josie shaft, is of 50 tons rated daily capacity, having Blake and Gates crushers, 2 Chilian mills, 3 Jencke sizers, and 6 Wilfley tables. An Elmore oil concentrator, fully described Vol. IV., was installed 1903, proving a technical but not a commercial success, and was superseded by Wilfley tables. Concentrators average 1% copper, .75 oz. silver and .75 oz. gold per ton.

Production: largest copper production was 3,001,027 lbs. in 1902. Recent production has been as follows:

Years (a)	Tons Ore			
	Prod.	lbs. Copper	oz. Gold	oz. Silver
1914.....	29,679
1913.....	35,553
1912.....	507,499	14,157	12,281
1911.....	864,500	22,725	19,219
1910.....	970,966	26,447	24,078

(a) Fiscal year ending Sept. 30

Property considered valuable and management good.

LEROY GOLD & COPPER MINING CO.

MONTANA

Office: Wallace, Idaho. **Mine office:** Saltese, Missoula Co., Mont. **Officers:** Hon. Herman J. Rossi, pres.; G. F. Dann, v. p.; C. E. Clark, sec-treas., with Wm. Fissenger and Chas. Bollinger, directors. Lands adjoin the Monitor mine, and survey for the extension of the Monitor tunnel runs through this property. Assessment of 2 mills per share called Aug., 1915, and development work resumed after several years of idleness.

LESLIE COPPER MINING CO.

IDAHO

Office: 508 Bank St., Wallace, Idaho. **Mine office:** Mullan, Shoshone Co., Idaho. **Officers:** Wesley Everett, pres. and mgr.; A. W. McLaughlin v. p.; Hon. Herman J. Rossi, sec.-treas., with A. M. Stevens and O. E. Peppard, directors. Inc. Feb., 1899, in Idaho. **Cap.**, \$100,000; shares 10c par.

Property: 11 claims, 220 acres, adjoining the Amazon-Dixie, also a mill site and 2 water rights, lying east of Mullan. Has several fissure veins.

in porphyry, the main vein, of 12' average surface width, having a 35' shaft. **Development:** mainly by tunnels, with about a mile of underground openings. The upper workings show galena and copper ore, and a lower tunnel is to give a back of 650'. The property carries mainly silver-lead ore, of concentrating grade, with a narrow copper paystreak. **Equipment:** includes water power, an air compressor, and several mine buildings.

LEVIATHAN GOLD MINING CO.**MONTANA**

Pony, Madison Co., Mont. Property carries copper ores, with values mainly in gold. **Equipment:** includes a hydro-electric power plant, compressor, and 100-ton concentrator. No returns secured.

LEVIATHAN MINES CO.**ARIZONA**

Office: 203 Essex Bldg., St. Paul, Minn. **Mine office:** Kingman, Ariz. **Officers:** John H. Conway, pres.; A. J. Brawley, v. p.; W. C. Gould, sec.; G. H. Prudden, treas., with A. A. Nystrom, Ola Hakanson, C. E. Bernhardt, O. L. Bjorkman, Geo. F. Thompson, Jacob Kiewel and G. C. Stricker, directors. R. C. Jacobson, mgr.; I. C. Stricker, supt. **Inc.** Oct. 14, 1914, in Ariz. **Cap.**, \$500,000; shares \$1 par; 351,668 shares issued. Annual meeting 1st Tuesday in Dec.

Property: the Whale & Copper Canyon mines, 7 claims, about 120 acres, in the Copper canyon, Cedar mining district, Mohave Co., Ariz., shows copper-molybdenite-silver-lead ore in 2 quartz veins traversing an altered granite. The main orebody said to be 7' wide and proven for 3,000' in length, runs N. 8° E. and dips 80° E. Ore said to average 2-4.5% molybdenum, 2-3% copper, 2-6 oz. silver, 60c-\$1 gold.

Development: 115' shaft and 2 tunnels, 40' and 320' long. Work in 1915 consisted mainly in testing ores to determine separation of molybdenite from chalcopyrite. **Ore reserves:** estimated at 2,000 tons of ore on dumps and 25,000 tons blocked out on three sides, averaging 2-4% molybdenum and 2½% copper.

Equipment: includes 8-h. p. gasoline hoist, small Cameron pump, compressor, gas engine. Management plans sinking to 250' level and erecting a 50-ton concentration and flotation plant in 1916.

LEWIS & CLARK MINING CO.**IDAHO**

Mullan, Shoshone Co., Idaho. J. Wm. Grismer, pres. **Inc.** 1907, in Idaho. **Cap.**, \$1,250,000; shares \$1 par; 375,000 shares in treasury. **Property:** 19 claims, N. E. of the Snowstorm, has surface showing of red hematite, with silver-copper values. **Development:** consists of 120' tunnel. Management attempting to raise funds for further development.

LEWIS MINE CO.**COLORADO**

Telluride, San Miguel Co., Colo., Bulkeley Wells, mgr. Property has fissure veins with shoots of complex lead-zinc-copper ore, which was treated in 50-ton concentrating mill. Developed by 500' shaft and equipped with steam plant. Idle.

LEXINGTON-ARIZONA MINING CO.**ARIZONA**

Office 538 Merchants Natl. Bank Bldg., Los Angeles, Calif. **Mine office:** Old Trails, Ariz. **Officers:** Dr. C. H. Phinney, pres.; H. N. Fletcher, v. p.; J. A. Small, sec.; C. Durkee, treas., with R. M. Keeney, directors. **Inc.** Feb. 12, 1912, in Ariz. **Cap.**, \$1,000,000; shares \$1 par, 836,832 shares issued. Stock listed on San Francisco and Los Angeles Stock Exchanges. Annual meeting 4th Tuesday in Sept.

Property: 15 claims, 8 patented, 155 acres, at Old Trails, in the Tom Reed Gold Road district, shows fissure veins, from 6'-25' wide, running N. W.-S. E. and dipping 75° N.-N. E. Ore occurs as quartz-spar, in andesite, and is said to assay from \$2-\$14 gold per ton.

Development: by numerous shafts from 45' to 225' in depth. A 3-

compartment vertical shaft is now being sunk to 600'. **Equipment:** includes hoist, compressor and Cornish pump. Company also owns the townsite of Old Trails.

LEXINGTON GOLD MINING CO.

COLORADO

Office: 709 Colorado Bldg., Denver. **Mine office:** Manitou, Colo. **Officers:** H. J. Anstic, pres.-mgr.; N. H. Partridge, v. p.; Wm. E. Humphrey, sec.-treas., with Geo. B. Lott, directors. **Inc.** 1895, in Colo. **Cap.**, \$1,500,000; shares \$1 par; 1,330,675 shares issued. Stock listed on Colo. Springs Exchange. Colo. Title & Trust Co., Colo. Springs, registrar and transfer agts.

Property: 5 patented claims, 12.6 acres on Gold Hill, Cripple Creek district, shows gold ore in fissure veins, assaying from \$7 to \$8 per ton. Developed to depth of 350' by shafts and crosscuts. The mine is credited with an output of \$400,000 and management estimates 125,000 tons of ore blocked out Jan., 1916. Lessees have been operating the property on a royalty basis during the past few years but company plans resumption in 1916 and erection of a 100-ton cyanide mill.

LIBERTY BELL GOLD MINING CO.

COLORADO

Office: 131 State St., Boston, Mass. **Mine office:** Telluride, San Miguel Co., Colo. **Officers:** Arthur Winslow, pres.; J. J. Cairnes, v. p.; Henry L. Rand, sec.-treas., with Hermann Kuhn, Geo. R. Fearing, Jr., directors. Chas. A. Chase, gen. mgr.; H. G. McClain, supt. **Inc.** in Missouri. **Cap.**, \$700,000; shares \$5 par; \$667,755 outstanding. Stock listed on Salt Lake Exchange. **Dividends:** in 1915 amounted to 16%.

Property: the Liberty Bell mine at Telluride, shows gold and silver-bearing quartz in fissure veins from 3' to 4' wide. The main orebody runs N. W.-S. E. and dips 57° E. For geology of the district, see U. S. G. S. Geologic Folio No. 57; also Tomboy Gold Mines Co., Ltd.

Development: by 2,600' tunnel and 1,000' raise from tunnel level to abandoned upper workings. Ore is mined by open stopes on stulls or by shrinkage stoping. **Equipment:** includes hoist of 50 tons hourly capacity, electric power, 1 Leyner duplex compressor, 1 Norwalk compressor, 1.5 miles tram and a 500-ton concentrator and cyanide mill. Extraction averaged 85% and total cost per ton amounted to \$3.70 per ton in 1915. **Shipments:** in 1915, averaged 1.8 oz. silver and 0.13 oz. gold.

Production:

	Tons Ore Treated	Oz. Silver Produced	Oz. Gold Produced
1915.....	173,700	314,432	24,054
1914.....	173,840	315,919	33,150
1913.....	179,216	288,602	36,693
1912.....	175,340	313,845	48,993

LIBERTY COPPER MINING CO.

WASHINGTON

Office: Spokane, Wash. **Mine office:** Bluecreek, Wash. **Officers:** J. H. Reser, pres.; C. Oldfather, v. p.; A. Haas, sec.; S. G. Neff, treas. and gen. mgr.; R. E. McVicar, trustee. **Inc.** in Wash. **Cap.**, \$1,000,000; shares \$1 par. **Property:** 6 claims, well watered and timbered, on Blue creek, about 1½ miles from Blue Creek station, and 6 miles N. W. of Chewelah. The main vein, developed by 4,000' of tunnels, is about 18" wide, carrying auriferous and argentiferous copper and lead ores.

Equipment: includes a Fairbanks-Morse steam hoist, 100-h. p. boiler and an air compressor. The mine has been under steady development since 1906, and made its first carload shipment March, 1909, to the Northport smelter. Management is said to plan a concentrator.

LIGHTNER GOLD MINING CO.**CALIFORNIA**

Office: 301 N. Eldorado St., Stockton, Calif. **Mine office:** Piedmont, Calif. **Officers:** C. M. Jackson, pres.; Alex. Chalmers, v. p.-mgr.; B. F. Williams, Jr., sec.-treas., with A. D. Schindler and L. J. Wagner, directors. **Inc.** Oct. 26, 1896, in Calif. **Cap.**, \$125,000; shares \$1 par; assessable; 62,287 shares outstanding. Dividends paid to date, \$550,000. Gross earnings in 1914 were \$46,012 and operating expenses totaled \$38,245. Mine was not operated during 1915. Assets, Feb., 1916, amounted to \$224,281 and liabilities to \$85,186. Annual meeting last Thursday in Oct.

Property: 1 patented claim, $4\frac{1}{3}$ acres, in Angels Camp, Calaveras Co., between the Utica and Angels quartz mines, shows a quartz fissure vein said to be 80' wide, running N. W.-S. E., with dip of 70° and assaying \$5 per ton. The mine is credited with a total production to date of \$2,000,000. Property was closed down in 1910, owing to caving of the old shaft sunk on the orebody.

Development: the mine was worked out from the 600' to the 350' level through this shaft, a 30' bed of talc cutting off the orebody between the 500' and 600' levels. Work was continued through 1911-1912 and a new 2-compartment shaft sunk. In 1914 work was again resumed and a winze sunk to the 900' level, where a crosscut run N. is said to have found the orebody in place under the talc, 30' wide and with the same dip as on the 300' level. This vein was drifted on for 120' and appears to be the top of a new orebody of same age and character as was found above the talc. Production ceased after 9 months operations in 1914 and the shaft is being sunk to below the 1,000' level.

Equipment: includes hoist, drills, electric power, compressor and 60-stamp amalgamation and concentration mill, making an extraction of 90%. Employs about 70 men and maintains an average daily output of 150 tons when working. Management estimated ore reserves at 200,000 tons above the 300' level, Feb., 1916.

LILIAN MINE.**COLORADO**

J. Clarence Hersey, mgr.; R. I. Hughes, supt. **Property:** in Iowa gulch, near Central City, Gilipin Co., Colo., developed by 550' of shafts and crosscuts; carries gold-lead and zinc ores. Worked by lessees in 1915-16 and output estimated at 250 tons per month. Oxide ore from the Lovejoy claim containing lead-gold values, is shipped to the Ohio-Colorado smelter at Salida. Zinc carbonate ore from the Lilian is sold to the Western Zinc Oxide Co.

LINCOLN GOLD & COPPER MINING CO.**GEORGIA**

Idle. Metasville, Wilkes Co., Ga. Carl Heinrich, pres. and gen. mgr.; W. Murdock Wiley, sec. **Inc.** June 11, 1906, in Oklahoma. **Cap.**, \$2,000,000; shares \$1 par; issued \$1,820,000. Paid 1 dividend, of one-half of 1%. Was practically the successor of the Seminole Mining Co., which was a sad failure. Annual meeting, first Tuesday in Aug.

Property: 901 acres, freehold, known as the Magruder or Seminole mine, just over the Wilkes Co. line, 12 miles from the Georgia Central railroad and 70 miles from Ducktown, Tenn. Shows gray sericitic schists, intruded by eruptive dikes of 2 different ages, with 4 veins in schist and between schists and eruptive rocks. They have an average strike of N. 30° E., to N. 40° E., and dip of 50° to vertical, veins averaging 3 to 14' in width, and traceable 1,200', showing ores consisting of pyrite with chalcopyrite, some bornite, cuprite and melaconite, estimated by company to average 2.5% copper, 3% lead, 1.5% zinc, 4 to 5 oz. silver and \$5 gold per ton.

The mine, opened 1852, and closed 1862, on account of the American Civil War, was reopened 1878, 1899 and 1905. **Development:** by a 225'

main shaft, a 150' air shaft and shafts of 40', 45' and 80', with about 1,500' of workings.

Equipment: includes a 175-h. p. boiler, 12-h. p. and 15-h. p. hoists and a 4-drill Rand air compressor. There are 10 buildings, including a machine shop, smithy, assay office and boarding house.

The small and ramshackle mill is equipped with a Gates centrifugal crusher, set of rolls, Twentieth Century jig, 2 Bartlett tables, elevators and revolving screens.

The toy smelter, immediately adjoining the concentrator and very close to the mine, has a 16-ton rectangular water-jacket blast furnace, and a 10-ton reverberatory furnace, making, when in operation, a matter of 15 to 20% copper tenor, carrying 20 oz. silver and 1.5 to 3 oz. gold per ton, shipped to the Maurer works of the American Smelting & Refining Co. for reduction, first-class ore and concentrates also being shipped to Maurer.

LINCOLN GROUP MINES CO.

COLORADO

Office: 1726 Broadway, Denver, Colo. **Officers:** H. A. Wimbush, pres.; Peyton Hugh, v. p.; H. G. Wimbush, treas.; R. R. Moodie, sec., with Harry J. Newton, directors. **Inc.** 1914, in Arizona.

Property: 10 claims at Idaho Springs, Clear Creek Co., Colo., said to carry streaks of ore assaying 7.8 oz. gold and 8.1 oz. silver. Developed by tunnels, crosscuts and drifts. Operated by lessees in 1916.

LINCOLN HILL MILLING & MINING CO.

NEVADA

Office: G. S. Johnson Co., Clay Peters Bldg., Reno, Nev. G. S. Johnson, pres.-mgr.; Robt. Nye, supt. **Cap.**, \$1,000,000; shares \$1 par, non-assessable; 100,000 shares in treasury.

Property: the Lincoln Hill mine on Lincoln Hill, Rochester mining district, Humboldt Co., Nev., is said to carry 35 well defined veins, averaging, \$150 per ton. **Development:** by 1,600' of tunnels, raises and winzes. **Equipment:** includes electric power, compressor, power drills, hoist, 2-stamp mill, and surface buildings. Mine, reported to have produced \$50,000 worth of ore under former owners, is still a prospect.

LINDEN GROUP.

ARIZONA

Wm. Linden, Groom Creek, Yavapai Co., Ariz., owner and mgr. **Property:** the Cottonwood and Vera groups, 7 claims, 140 acres at Groom Creek, in the Hassayampa district, shows gold-silver-copper-molybdenum ore in quartz contact vein traversing diorite-schist formation.

Development: by 50' vertical shaft and several tunnels, deepest 300'.

Shipments: in 1916, totaled 100 tons from the Cottonwood claim and averaged 17% copper with some silver and gold. Owner plans installing 50-ton Marathon mill and cyanide unit and driving a 400' tunnel in 1916.

LION HILL CONSOLIDATED MINES CO.

UTAH

Office: 50 Congress St., Boston, Mass. **Mine office:** Ophir, Utah. **Officers:** E. W. Clark, pres.; Ed. A. Fordyce, sec.-treas. **Inc.** Sept., 1910, in Maine. **Cap.**, \$1,000,000; shares \$1 par; fully paid; 431,347 issued.

Property: 640 acres in the Ophir camp, Tintic mining district, Tooele Co., reported to show high-grade silver-lead ore in fissure veins in limestone formation. **Development:** by 5,000' of shafts, tunnel and drifts. Operated by lessees, and zinc-silver-lead ore mined, 1915-16.

LITTLE BELL CONSOLIDATED MINING CO.

UTAH

Office: Newhouse Bldg., Salt Lake City, Utah. **Mine office:** Park City, Summit Co., Utah. Solon Spiro, pres. and gen. mgr.; S. M. Bamberger, sec.; Joe Kemp, supt. **Inc.** 1902, in Wyoming. **Cap.**, \$1,500,000; shares \$5 par, non-assessable; fully issued. Began payment of 5c quarterly dividends, Nov. 1909, and up to and including Sept. 2, 1910, had paid 4

quarterly dividends of \$15,000 each. Shares listed on Salt Lake Stock Exchange; 20% of stock owned by Daly West Mng. Co.

Property: 30 claims, patented, in Park City district. **Development:** extensive, showing deposits of lead-silver ore.

Equipment: includes steam power, with hoist and air compressor. Electric power is taken from the Knight plant at Provo. The old 100-ton mill at the Fortuna Mining Co., at Bingham Canyon, was bought 1910, and re-erected at Park City. Worked intermittently.

LITTLE BILLY OPERATING CO.

BRITISH COLUMBIA

Van Anda, Texada island, B. C. J. C. Taylor, supt. **Property:** the Little Billy mine is said to have an orebody of 8' estimated average width, developed by a 260' shaft, with a 35' headgear. **Equipment:** includes an 80-h. p. boiler, single-drum hoist, and a 5-drill air compressor. There is a crude concentrating mill, with sorting tables, and a 500' trestle with double-track gravity tram to a shipping bunker on tidewater. The Granby Co. did some prospecting on the property in 1914. Idle 1915-16.

LITTLE BULLY HILL MINING & SMELTING CO. CALIFORNIA

Idle. Mine near Winthrop, Shasta Co., Cal. **Cap.**, \$1,000,000; shares \$1 par. **Property:** 5 claims, said to adjoin the Bully Hill mine, and to be opened by a 130' tunnel and several trenches, that show sulphide ore. Company's prospectus misleading and its operations apparently unsuccessful. No recent information secured.

LITTLE CHOPACA MINING CO.

WASHINGTON

Idle some years, except for necessary annual assessment work. Loomis, Okanogan Co., Wash.

LITTLE GIANT GOLD M. & M. CO.

COLORADO

Lawson, Colo. **Officers:** L. H. Mumbrue, pres; F. F. Chady, v. p.; H. E. Minier, sec.-treas.-mgr., with R. L. Dear, F. L. Collom, Ira Spencer and F. P. Koontz, directors. Martin T. Michel, supt. **Inc. in Colo. Cap.**, \$500,000; shares \$2 par.

Property: 58 patented claims, 350 acres, in Downieville mining district, Clear Creek Co., Colo., carries gold-silver-lead ores in quartz veins, running E. W. with dip 60°. Country rock is granite. **Development:** to depth of 900' by 2 tunnels, 3,500' and 1,000' long. **Equipment:** includes steam hoist, compressor and drills.

Mine has been worked by lessees but company plans resumption of operations and installation of 50-ton concentration and flotation mill in 1916.

The Little Giant is credited with a past production of \$4,000,000.

LITTLE GOLDIE MINE.

MONTANA

M. R. Ostronick, Twin Bridges, Mont., owner and mgr. **Property:** 3 claims, 54 acres, in Goodrich gulch, Madison Co., Mont., said to show 2-18" fissure veins, running E.-W., and assaying as high as \$114 in gold-silver-lead. Ore occurs in gneiss and limestone formation. Developed by 200' tunnel, several drifts, and raises. Equipped with compressor.

Shipments: in 1915, reported to have averaged \$80 per ton, amounted to \$30,000. Owner estimated 6,000 tons of ore blocked out, March 19, 1916.

LITTLE JOHNNIE MINE.

ARIZONA

Owned by Harrington Blauvelt, Prescott, Ariz. **Property:** in the Haysayampa district, Yavapai Co., shows a 2' fissure vein, carrying gold-bearing copper ore said to run 2 oz. gold.

LITTLE MARY MINING CO.

MISSOURI

Webb City, Jasper Co., Mo. **Cap.**, \$100,000. Operates a lease on 40 acres of mineral land, owned by D. S. Weaver, in S. 6, T. 29, R. 32. Developed by 3 shafts to depth of 175'. **Equipment:** includes 500-ton concen-

trating mill, pumps, 3 drills, 2 hoists, steam power and Ingersoll compressor. Employs 25 men. No record of production received.

LITTLE MIAMI COPPER MINES CO.**ARIZONA**

Letters returned from 15 Broad St., New York. Idle and presumably out of funds. See Vol. X and XI, Copper Handbook, for further details.

LITTLE NORTH FORK COPPER M. & M. CO., LTD.**IDAHO**

Officers: T. R. Mason, president; Archie McDonald, sec.; John Locke, treas. Jas. H. Hoskins, supt. **Inc. Sept., 1903, in Idaho. Cap., \$1,500,000; shares \$1 par, assessable; 1 mill per share called Sept., 1914.**

Property: 10 claims, known as the Handspike Mine, on Little Copper creek, near Little North Fork, 12 miles from a railroad. Claims lie above the Horst-Powell holdings.

Development: by the 232' No. 1 upper tunnel, showing ore assaying up to 28.8% copper, 1 oz. silver and \$1.20 gold per ton, and the No. 2 lower tunnel of 1,500' showing a 12 to 18" paystreak of argentiferous copper ore that averages \$8 to \$30 per ton. Property claimed to have \$200,000 worth of copper ore in sight.

In 1914 Jerome Day took an option on the property, which was not exercised and management is reported to have resumed development work, 1916.

LLUVIA DEL ORO MINING CO.**MEXICO**

Is a close corporation, owned and controlled by B. F. Yoakum, John Scullin of St. Louis, Mo., and the estate of Jas. Campbell. Fred G. Farish, mgr. **Property:** in the Andres del Rio Mtns., Chihuahua, Mex., consists of the Lluvia del Oro gold mine, a mill, cyanide plant and hydro-electric plant.

L. & N. GROUP.**ARIZONA**

Owned by Christopher Martin, et al. **Property:** 7 claims, about 7,500' along the Gila county belt, in the Sunflower mining district, Maricopa Co., Ariz., shows stringers of quartz and cinnabar. Development work and prospecting in progress. A furnace with 1 retort was built in 1914 and 2 flasks of quicksilver were shipped March, 1915. Geology fully described U. S. G. S. Bull. 620-F. (1915).

LOGGER MINING CO.**UTAH**

Officers: J. A. Maxfield, pres.; R. D. Maxfield, v. p.-gen. mgr.; J. W. McKinney, sec.; C. S. Tingey, treas., with Mrs. K. F. Scott, directors. **Inc. July, 1915. Cap., 500,000 shares; 1c each. Stock listed on Salt Lake Exchange.**

Property: the Logger mine in Big Cottonwood canyon, adjoining the Maxfield mine, shows a 1' fissure vein, developed by a 230' adit and a winze now being sunk on the vein from the 200' point. Assays said to return \$16.47 gold, 13.4 oz. silver and 11% copper.

LOGOS MINES CO.**ARIZONA**

Mine near Mayer, Yavapai Co., Ariz. Henry W. Thacker v. p. and treas., 815 W. 8th St., Los Angeles, Calif. **Inc. June, 1906, in Arizona. Cap., \$1,000,000; shares \$10 par. Property:** 46 claims, partly patented, 900 acres, and 320 acres of miscellaneous lands, in the Big Bug district, 8 miles S. E. of Mayer. **Development:** by a 180' shaft, and a 190' tunnel, with 2,000' of workings, besides considerable surface work. **Equipment:** includes a 40-h. p. gasoline hoist and 2-drill air compressor. Developing in a small way at last accounts.

LOMBARDY MINING & MILLING CO.**IDAHO**

Kellogg, Shoshone Co., Idaho. **Officers:** Peter Albinola, pres. and gen. mgr.; Hon. Herman J. Rosi, v. p.; Edw. Albinola, sec.-treas. **Inc.,**

1898, in Idaho. **Cap.**, \$1,000,000; shares \$1 par. Annual meeting, fourth Thursday in April.

Property: 15 claims, shows a bedded vein, estimated to average 27' wide with shale footwall and quartzite hanging and traced for 800'. Ore is said to carry variable values in copper, up to 47% lead and 33 oz. silver per ton. **Development:** by tunnels of 360' and 900', with about 1,500' of workings. Idle, except for annual assessment work.

LONDON ARIZONA CONSOLIDATED COPPER CO. ARIZONA

Office: 723 Title Insurance Bldg., Los Angeles, Calif. **Mine office:** Chilito, Gila Co., Ariz. **Officers:** Chas. E. Finney, pres.; Herbert L. McNair, v. p.; Edw. W. Brooks, v. p.; Robert J. Simpson, sec.-treas., with F. B. Pugh, B. P. Cheney, D. Karl Kurtz, John E. Coffin, and E. L. Finney, directors. Edward W. Brooks, cons. engr. and geologist. Harry Scott, supt.

Inc. Sept 18, 1913, in Maine, as a merger of the London Arizona, London Range, London Shamrock and Ball Copper companies. **Cap.**, \$12,000,000; shares \$5 par, fully paid and nonassessable; 920,500 shares outstanding. **Bonds:** \$303,000 6% outstanding. Commercial Trust & Savings Bank, Los Angeles, trustee. Citizens Trust & Savings Bank, Los Angeles, registrar. Annual meeting first Tuesday in Oct. Company started out with a treasury fund of \$500,000.

Property: 132 claims, 2,300 acres, in the Banner mining district, (Ray quadrangle), 5 miles N. of Hayden. Claims form a compact group covering an extensive, well mineralized area. **Geology:** the tract shows a series of 1,500' of well-bedded limestone, quartzite and shales resting on a laccolithic mass of diabase; these rocks are broken, faulted and later intruded by dikes and sheets or diorite porphyry, presumably the offshoots of an underlying batholithic mass of granite material. The ore occurs in contact metamorphic deposits and replacements, especially in the limestone. Much of the ore consists of garnet (andradite, the lime and iron species) intergrown with specular hematite, copper sulphides and a variety of iron-magnesian lime silicate minerals. The copper ore occurs largely in "blanket" deposits, but also in fissures and vertical contacts. The main ore outcrop is 10 to 30' wide and about three-fourths of a mile long, lying between beds of limestone and quartzite.

Silver-lead ores do not occur in the contact deposits, but are found in limestone along dike contacts where contact alteration is not noticeable. Some 2,000 tons of lead carbonate ore shipped, 1913, averaged 28% lead, 40c gold and 3'oz. silver per ton.

Development: includes the 300' Curtain shaft, 182' Arizona, 190' Red Bird and 90' O'Carroll shafts, the 200' Roberts tunnel and 250' Johnson tunnel, total underground development amounting to 2,500'. The Roberts tunnel is developing what appears to be a large body of copper sulphides, carrying from 3-6% copper. Shipments of copper carbonates being made to Hayden smelter carry 5-8% copper, 1-5 oz. silver and from 20-40c gold.

Management plans development work on a comprehensive scale. The company has a strong directorate, an experienced management and promises to become an important producer.

LONDON-ARIZONA COPPER CO. ARIZONA

Office: 723 Title Insurance Bldg., Los Angeles, Calif. **Officers:** Chas. E. Finney, pres.; Chas. S. Gleed, v. p.; Robt. J. Simpson, sec.-treas.; Edw. W. Brooks, cons. engr.; preceding with B. P. Cheney, H. L. McNair, Jos. Ball and E. E. Hellyer, directors.

Inc. April 12, 1907, in Arizona. **Cap.**, \$10,000,000; shares \$10 par; issued, 600,000 shares. Debentures, \$152,000 at 6%. Company merged with Lon-

don Range, London Shamrock and Ball Copper companies as the London-Arizona Consolidated Copper Co., a Maine corporation, in Sept., 1913, and now holds 763,054 shares of the capital stock of the new company.

LONDON MINING & REDUCTION CO. COLORADO

Controlled by the Story, Jewett and Packard estates. **Mine office:** Alma, Park Co., Colo. Chas. Aicher, mgr. **Property:** the London mine on London mountain, 7 miles W. of Alma, and about the same distance from Leadville, opened in 1875, is an old-time producer of gold-lead-silver ore.

The ore deposits are replacements of blue limestone at its contact with eruptives or are true fissure veins in quartz porphyry. The main London vein, 3-12' wide, runs N. 37° W., with dip 65° W. The gangue is pure quartz with small amounts of calc-spar and barite. Assays reported to average from 1.4-3.3 oz. gold, 1.3-2.9 oz. silver, 4% lead. This vein is credited with all but 10% of the total production of the mine to date and is the only one deserving of further exploration and development.

Development: by 2 adits, one 300' below the other, opening the London vein for 2,980' and exposing backs of 150' to 650'. Mine was operated by lessees in 1914-15, but company resumed operations in 1916 and plans driving a new tunnel below the old workings and the installation of electric power.

LONE ELM MINING & DEVELOPMENT CO. MISSOURI

Holds a lease on 240 acres of Granby M. & S. Co.'s land and 80 acres of Picher Lead Co.'s land, N. of Joplin, Mo. Company unwatered the ground, sub-leases its holdings in small tracts and operates a 150-ton custom mill.

LONE STAR CONSOLIDATED COPPER CO. ARIZONA

Officers: Hon. Wm. H. Powers, pres.; Duncan MacVichie, 407 New-house Bldg., Salt Lake City, v. p.; Henry H. Folsom, sec.; A. G. Smith, treas.; S. S. Campbell, gen. mgr. Chas. B. Spaulding, supt. **Inc.** Aug. 6, 1906, in Maine. **Cap.**, \$5,000,000; shares \$10 par, practically as successor of Maravilla Copper Co.

Company controls the Mineral Mountain Copper Co., through ownership of a two-thirds share interest, and controls, through majority stock ownership, the Chase Creek Copper Co.

Property: 32 claims, includes the Little Clara mine, developed by tunnel and shaft, and the Lone Star mine, in the Gila mountains, 10 miles N. of Solomonville, having a 900' shaft, said to show a 5' vein of sulphide ore carrying 8 to 10% copper, with fair silver values and a little gold. The shaft also shows stringers of ore giving assays of 5 to 20% copper. Air compressor and drills installed 1915, and operations to be resumed.

LONE STAR CONS. MNG. CO. NEVADA-CALIFORNIA

Goldfield, Nev. **Officers:** W. W. Waterson, pres.; M. Q. Waterson, v. p.-treas.; J. S. Henderson, sec., with Carroll Henderson and Chas. S. Sprague, directors. J. K. Turner, cons. engr., J. M. Healy, supt. **Inc.** April 17, 1912, in Nevada. **Cap.**, \$2,500,000; shares \$1 par; assessable; 1,859,-650 shares outstanding. John S. Cook & Co., Goldfield, registrar. **Stock** listed on Salt Lake and San Francisco Exchanges. Two assessments, total 3c, called in 1915. Annual meeting last Wednesday in April.

Property: 16 patented claims in Goldfield mining district, Esmeralda Co., Nev., and 7 unpatented claims in Indian mining district, Mono Co., Calif. **Development:** the Goldfield property is developed by two 200' vertical shafts and 500' of drifts and crosscuts on the 250' level of the Nelligan shaft. Operations suspended July, 1915. No commercial ore developed as yet, though some medium grade ore was found.

LONE STAR COPPER MINING CO.**WASHINGTON**

Officers: Oscar De Camp, pres.; Wm. S. Thyng, sec. and engr., and R. C. Rimertsen, directors. **Inc.** April, 1910, in Washington, practically as a reconstruction of the Copper Hill Mining & Milling Co. **Cap.**, \$1,500,000; shares \$1 par. Owns sundry claims, including the Copper Hill mine near Newport, Stevens Co., Wash., developed by several shallow shafts and tunnels. Mine has an 18' vein, carrying chalcopyrite, disseminated in pyrrhotite. There is no machinery. Idle several years, except for annual assessment work.

LONGACRE-CHAPMAN MINING CO.**MISSOURI**

Inc. in Missouri. **Cap.**, \$56,250. Company operates a lease on 10 acres of mineral land owned by the Reliance Mng. Co. in Sec. 8, T. 29, R. 32, Jasper Co., Mo. Developed by 2 shafts to depth of 185'. **Equipment:** includes 200-ton concentrator, pumps, 2 air-drills, steam power, Carterville crusher, and compressor. Employs 25 men. Production figures not available.

LOOKOUT COPPER CO.**ARIZONA**

Office: Prescott, Ariz. **New York office:** Room 514, 49 Wall St. F. M. Murphy, pres. **Property:** the Lookout group, 15 copper claims; Mark Twain group, 6 silver-lead claims; Davis group, 8 gold-silver-copper claims, in the State Creek Mining district, Yavapai Co., Ariz.; Bodie group, 21 silver-lead claims, and the Wild Bill and Texas claims, in the Hassayampa mining district, Yavapai Co., Ariz.

Development: a 100' shaft was sunk on the Lookout property with short levels at 45, 60 and 100'; 800' north of the shaft are other workings, consisting of a crosscut to the vein and two drifts north and south with a 60' winze and raise to the surface from the north drift. At the mouth of the raise a gallows frame was erected and a hoisting plant installed. An excellent wagon road about $3\frac{1}{4}$ miles long connects the mines with the main road leading to the Davis mines.

On the Mark Twain group very little development work was done, although the mine had been worked in a small way at a profit, before acquired by the Lookout Co. The Mark Twain, Blue Dick and several other promising properties should be consolidated, insuring, under good management, a profitable mining enterprise.

The Davis group is one of the old mines of the district. From the surface and shallow workings much high-grade ore was shipped in the early days. The principal development work was by two tunnels about 200' apart in elevation, showing good ore; the high-grade ore carries considerable copper, though principal values are in gold and silver.

On the Bodie group of mines a good deal of development work was done on the patented claims. A shaft was sunk some 340', with levels at 55, 85, 170, 230, and 335', all said to show ore. The 3-compartment vertical shaft was started at a central point. Work was stopped on all the Lookout properties in 1910.

Surveys were completed for an ore road from the Walker end of the Poland tunnel, through the Senator district to Lookout camp. A branch was also surveyed from this line to the Bodie. The road measures 13.6 miles from the tunnel to Lookout and 8 miles to Bodie, with a maximum grade of 4%. It was intended to build a 30" gauge road with good roadbed and heavy rails, and operate it by steam. Two miles of railroad purchased from the Metals Milling Co. constituted the first 2 miles of the Lookout ore road. This contemplated road would furnish cheap transportation and tap a country that should produce large amounts of ore.

Extensive development work is planned for 1916-17. Part of the company's property is now being operated under lease.

LOON BROOK MINING CO., LTD.**NOVA SCOTIA**

Office: 1 Leys Ave., Letchworth, Herts, Eng. **Mine office:** Montague, N. S. E. Romilly Smith, mgr. Operating a gold property and 10-stamp mill with cyanide unit in Montague district, N. S. **Production:** for year ending Sept. 30, 1914, was 118 tons of ore, which yielded 400 oz. gold.

LOON LAKE COPPER CO.**WASHINGTON**

Office: 602 Columbia Bldg., Spokane, Wash. **Officers:** Judge Geo. Turner, pres.; A. W. Kemp, v. p.; Frank Crane, sec.-treas.; Evan Morgan, managing director, with S. W. Miller, Andrew Laidlaw, E. K. Erwin, directors. **Inc.** 1915. **Cap.**, \$375,000; shares 25c par.

Property: the Kemp-Komar and O. K. mines, 150 acres on Grouse creek, 6 miles N. of Loon Lake, Stevens Co., on the Great Northern R. R., said to carry a well-defined fissure vein, 20' wide, running E.-W., which gave returns of from 24-30% copper when formerly worked.

Development: by 200' incline shaft, now being sunk to 500'; a 300' tunnel and 300' of drifts driven east from the old shaft toward a new shaft, 40' deep, Feb., 1916. **Equipment:** includes hoist and pump. **Property** resumed shipments, 1916, after 15 years' idleness.

LORETTO COPPER MINING CO.**CALIFORNIA**

Main office: Tonopah, Nev. **Mine office:** Big Pine, Inyo Co., Calif. John G. Kirchen, mgr.; John Cole, supt. Is controlled through stock ownership by Chas M. Schwab and the Gail Borden estate. **Property:** about 750 acres, east of Bishop, has a 40' vein, carrying ore said to average 4% copper and about \$3 gold per ton.

Development: by 1,700' main shaft, said to be in commercial ore, and 2 crosscut tunnels to the N. E., 1 of 90' length said to have cut a 74' vein. Improvements include a smithy and several small mine buildings. **Developing** and planning to install a 100-h. p. electric hoist and build a railroad to Coaldale, the nearest R. R. point.

LOS ANGELES GEM CO.**ARIZONA**

Office: Los Angeles, Calif. **Mine office:** Kingman, Mohave Co., Ariz. E. E. Peck, pres. and gen. mgr.; C. W. Morrell, sec.-treas. **Property:** includes a variscite mine in Esmeraldo Co., Nev., but the principal property is the George Washington group of 6 claims in Mineral Park, near Kingman. This property carries a vein of 18 to 24" width, developed by a 143' upper tunnel and a 370' lower tunnel, said to show ore assaying up to 4% copper, 200 oz. silver and \$4 gold per ton. The company mined turquoise from the claims for some years, before developing copper. **Equipment:** includes gasoline hoist.

LOS CERRÓS COPPER CO.**CUBA**

Idle. Office: Blackstone Bldg., Cleveland, Ohio. **Officers:** W. I. Boardman, pres.; W. C. Watkins, v. p.; Sherman C. Dalbey, sec.; W. L. Rees, treas.; Col. D. H. Pond, gen. mgr. **Inc.** Aug. 12, 1905, in Arizona. **Cap.**, \$500,000; shares \$100 par.

Property: 2 claims, 100 acres, also 1,500 miscellaneous lands, near Fomento, Prov. de Sta. Clara, Cuba, opened by 3 shallow shafts and 5 tunnels, longest 250', showing ore assaying 10% copper, 20 to 25% zinc, 20% sulphur and 30% silica, with gold and silver values. Zinc apparently decreases at depth. The vein has a 12 to 15' gossan outcrop along its strike. **Property** is an antigua last operated in 1750. The ore though mostly low-grade and zinciferous can be concentrated and property is considered worthy of further development under competent direction.

LOS PLATANOS MINING CO.**MEXICO**

Mine office: Choix, Fuerte, Sinaloa, Mex. **Officers:** A. M. McDermott, pres. and gen. mgr.; C. F. Iredell, v. p.; J. L. Davidson, sec., with

R. E. Small and W. W. Thomas, directors. E. B. Hosford, mine supt. Inc. Dec., 1909, in Arizona. **Cap.**, \$1,200,000; shares \$10 par, nonassessable; issued, \$280,000. Operates through Cia. Exploradora de Los Platanos, S. A., inc. in Mexico. Merchants' Trust Co., Los Angeles, transfer agt. Annual meeting, first Monday in October.

Property: 96 acres, bought of Choix Cons. Mining Co., Ltd., 3 miles from Choix, and 40 miles from Fuerte, the nearest rail point. The eastern extension of the Kansas City, Mexico & Orient railway is planned to pass within 10 miles of mine.

Property shows diorite, cut by dikes of andesite, crossed by shear zones, of 30 to 100' estimated width with length of 2,500'. These zones carry ore shoots connected with a system of cross-fractures. The upper portion of one vein shows flakes of native copper, near surface, succeeded by a leached zone. The other vein is entirely leached near surface, except for occasional copper strains, and small bunches of ore. Ore is estimated by management to average 7% copper, 1.5 to 2 oz. silver and 60c to \$1.50 gold per ton.

Development: includes 1,500' of workings, estimated by the management to show 12,000 tons of ore. Records of 1,093 tons of ore shipped show average returns of 21.8% copper and 5.5 oz. silver per metric ton. The discard from these shipments, about 7,500 tons, is estimated to average 4% copper and 1.5 oz. silver per ton. **Equipment:** includes a hoist, and several other buildings. Idle several years owing to unsettled conditions in Mexico.

LOST CABIN MINING CO.

WYOMING

A. B. Elnick, pres., Lysite, Fremont Co., Wyo. A. O. Heyer, sec.; D. Schoening, treas. **Cap.**, \$150,000. **Property:** the Lost Cabin group, in the Boyeson section, is said to carry the Summit vein. Gold, silver and copper ore occurs in quartz veins. Since 1909 assessment work only has been done.

LOST PACKER MINING CO.

IDAHO

Office: 564 E. First South St., Salt Lake City, Utah. **Mine and works office:** Ivers, Custer Co., Idaho. **Officers:** Jas. Ivers, pres.; J. T. Finlen, v. p.; Henry Welsh, sec.-treas., with J. Frank Judge and H. A. McCornick, directors. J. P. Boyle, mgr. Inc. 1903, in Utah. **Cap.**, \$150,000; shares \$1 par, all issued. Company declared a dividend of 25c a share, Oct., 1913. Gross earnings, 1914-15, were \$27,500; \$20,000 from ore sales, netting \$12,500 for the year's operations.

Property: 34 claims, 4 patented, in the Loon Creek district, 112 miles west of Mackay, the nearest rail point, the mine being seriously handicapped by inadequate transportation facilities. The mine and smelter are located high in the mountains, only accessible by steep and dangerous trail and hampered by such deep snows that the smelter can only be run a short time.

Development: by drift tunnels, No. 1 having a back of 450', No. 2 a back of 700', and No. 9 a back of 870', latter showing rich ore, and planned to have a back of 2,000', ultimately. Tunnels are drifts on a vein of 2 to 7' average width, with maximum width of 15 to 18', carrying ore said to average 9 to 16% copper, and 2-8 oz. gold per ton, with a paystreak of 2" to 5" width, proven to average about 2' for a distance of 500', and depth of 400'. Mine is developed to 1,000' level.

Company employs 80 men at the mines and 400 horses are required to handle supplies and output.

Equipment: about \$225,000 has been expended on surface improvements and equipment, including the smelter, but excluding the 50-ton oil

flotation concentrator, built in 1915. The property has water power, with an electric light plant, assay office and necessary mine buildings.

The smelter has a 100-ton water-jacket blast furnace, making matte of about 45% copper, 25 oz. silver and 8 to 10 oz. gold per ton, with slags running only about 0.2% copper. The smelter ran 24¼ days in the summer of 1913, smelting 1,800 tons of ore, and producing 380 tons of matte. Total production to end of 1915 was \$800,000. Management estimates 20,000 tons of ore in old stopes expected to net \$4.97 per crude ton.

The property, though very difficult of access, and having many features unfavorable to operations, is promising. See U. S. G. S. Bull. 530G.

LOST PACKER MINING & SMELTING CO.

IDAHO

Office: 34 West 33rd St., New York. Mine near Ivers, Custer Co., Idaho. John T. Clarke, treas. and managing director. **Inc.** 1907, in Wyoming. **Cap.**, \$3,000,000; shares \$5 par, as a holding company, to gradually acquire the outstanding stock of the Lost Packer and other mining companies.

LOST RANCH & TUNNELSITE MINE.

MONTANA

Harvey Sullivan, Brenner, Beaverhead Co., Mont., owner. **Property:** 7 claims in the Bloody Dick section. 5 miles from Brenner, shows gold, silver, lead, copper ore in veins. Developed by 420' tunnel, to depth of 170'.

LOST TREASURE MINING CO.

ARIZONA

Gold Road, Mohave Co., Ariz. **Officers:** Geo. W. Long, pres.; J. F. McConnell, v. p.; J. L. McIver, sec.-treas.; J. E. Strumquist and L. J. Hammell, directors. **Inc.** 1915 in Ariz. **Cap.**, \$150,000; shares 10c par.

Property: the Gold Ore Extension Nos. 1 and 6, 120 acres, at Gold Road, adjoining the Gold Ore on the N. and W., and claimed to carry the extension of the Gold Ore vein. A 700' vertical shaft is now being sunk. The mine is one of the many new prospects in the Tom Reed district yet to be proved.

LOUIS d' OR GOLD MINING CO.

ARIZONA

Address: P. O. Box 995, Miami, Ariz. **Office:** 339 Monadnock Block, Chicago, Ills. **Officers:** L. Ogden Wadleigh, pres.; Geo. P. Baldwin, v. p.; J. A. Glenn, treas.; G. O. Swarts, sec., with Carlos S. Andrews, Willis H. Smith, Theo. A. Steller and Dr. L. W. Whitmer, directors.

Inc. July, 1912, in Ariz. **Cap.**, \$3,000,000, increased July, 1915, from \$2,000,000; 1,234,450 issued; 300,000 shares offered for sale by Baldwin Syndicate, April, 1916, at 25c per share. Company is practically a reconstruction of the Lost Gulch United Mines Co., and is controlled by Baldwin Syndicate of Chicago.

Property: 17 claims, partly fractional, 292 acres, in 2 contiguous groups, about 2 miles north of the mouth of Lost gulch, and 3 miles from a railway. Claims show monzonite-porphry, diorite and granite, carrying 4 fissure veins, of which 3, of 4' estimated average width, are more or less developed, the mines as a whole having about 7,000' of workings.

The **Badger** mine has a vein of 3 to 6' width, developed by a 145' shaft, somewhat wet, carrying ore said to average about \$7 per ton in values, with occasional shoots of \$17 to \$30 per ton, and a 400' tunnel showing a vein of 3 to 6' width, averaging about \$7 per ton. Equipment includes a 15-h. p. gasoline hoist, good for 400' depth.

The **Bonanza** mine has a 1,050' tunnel. The **Cedar Tree** mine carries mainly argentiferous and auriferous galena, with a little copper and zinc. The **Tiger** or main vein is entirely auriferous, is developed by a 350' tunnel to 110', and is said to carry values of from \$3 to \$90 per ton. All ores are sulphide.

Shipments: of surface ore averaged 6 oz. silver and 1 oz. gold, with lead and silver. Development by winze sunk from the tunnel on the vein.

Equipment: the mill, of wood, completed Feb., 1910, has 10 stamps, a 6x10" Gates crusher, 2 Wilfley tables, 2 Frue vanners and a Pierce amalgamator; power equipment includes two 80-h. p. water-tube boilers and a 150-h. p. Corliss engine, 40 h. p. steam plant and compressor, installed 1915. Management expects to install cyanide plant and to sink a 2-compartment shaft from surface.

LOUISIANA CONSOLIDATED MINING CO.

NEVADA

Offices: Room 2851, No. 120 Broadway, New York, and Mt. Montgomery, via Mina, Esmeralda Co., Nev. **Officers:** Walter E. Trent, pres.; T. F. Bonneau, v. p.; L. A. Dessar, sec.-treas.; with Capt. A. B. Wolvin and H. C. Cutler, directors. H. C. Cutler, cons. engr., Reno, Nev. Inc. May 17, 1912, in Nev. **Cap.**, 1,000,000 shares; 10c par; outstanding 600,000; 200,000 shares set aside for bond conversion. Registrar & Transfer Co., New York, transfer agt. and registrar. Listed on New York Curb and San Francisco Exchange. Annual meeting, Dec. 10th.

Bonds: authorized, not issued, \$40,000, 1st mortgage, 7%, dated May 1, 1916, due May 1, 1921; redeemable in 5 years or before at option of company at 115; convertible into stock at 20 cts. per share. Balance sheet of May 1, 1916, shows assets, \$268,200, which includes: property, \$100,000; treasury stock, \$40,000; treasury bonds, \$40,000; improvements, \$80,000; developments, \$5,000; cash, \$3,200. Liabilities show: capital stock, \$100,000; bonds, \$40,000; surplus, \$128,200.

Property: 3 claims and a fraction, 65 acres, including the Louisiana, or Tip Top mine, at Mt. Montgomery, Oneota district, 5 miles from the S. P. Narrow Gauge R. R., running from Mina, Nev., to Keeler, Calif. Also has an option on the Brownie mine, 5 claims, 100 acres, 1,500' W. of the Louisiana. Property formerly belonged to the old Thorndyke-Bley Mining Co., now dead.

Ore: gold-silver occurs in N.-S. veins, dipping 60° E., with auesite footwall and rhyolite hanging-wall. Company's claims cover 4,500' along strike of veins; two veins in each mine, the footwall vein, 6' wide, and hanging-wall vein, 2½' wide. In the Louisiana veins are 5' apart, but at times come together, forming ore widths of 12' to 16'. Veins are 20' apart in the Brownie mine.

Development: tunnels, with 1,000' of underground workings. In the Louisiana mine most of ore above 120' level has been mined; a 100' winze and 60' drift below tunnel level said to show \$7 to \$9 ore. Management claims Louisiana mine should produce 10,000 to 20,000 tons of ore for each 100' in depth, with a profit of \$3 to \$4 per ton; and the Brownie mine 25,000 tons of ore for each 100' in depth. Brownie ore said to average \$7 to \$9 per ton. **Ore reserves:** claims 5,000 tons blocked out and 10,000 tons partially developed ore.

Louisiana is said to have produced \$120,000, of which 75% was in gold; 25% in silver; all from above 120' level.

Equipment: includes 10-stamp mill, cyanide and bullion refinery plants, capacity 75 tons per day; steam plant using fuel oil; 75-k. w. generator and electric hoist. Water is obtained from 2 springs, 2 miles from the mill.

Plans developing to the 420' level and starting the mill in 1916.

LOUISIANA DEVELOPMENT CO.

CALIFORNIA

Office: 606 Electric Bldg., Cleveland, O. **Property:** the Louisiana quartz mine, 4 claims, 50 acres, 2 miles N. W. of Tuolumne, Tuolumne Co., Calif., said to carry an 18" vein in granodiorite, running N. 15° E., with dip 70° S. E. Ore occurs as free gold with pyrrhotite, sphalerite and galena.

Developed by 520' shaft with N. and S. drifts of several hundred feet. Operated by lessees in 1916.

LOWER LEVEL MINING CO.

MISSOURI

Sarcoxie, Mo. Is a reorganization of the Bearcat Mining Co. **Directors:** J. W. Boyd, J. J. Stephenson, Geo. Spiva and Sam Tamblyn. **Property:** the Cameron mine on J. W. Boyd land, at Sarcoxie, 20 miles E. of Joplin, Jasper Co., Mo., is a zinc producer. Developed by 278' and 200' shafts. **Equipment:** includes compressor, boilers and 400-ton mill. Company plans deep development work.

LOWER MAMMOTH MINING CO.

UTAH

Office: 515 Dooly Bldg., Salt Lake City, Utah. Mine office: Mammoth, Juab Co., Utah. **Officers:** John Dern, pres.; J. C. Dick, v. p.-gen. mgr.; A. Reeves, sec.; W. S. McCornick, treas.; with F. D. Kimball, M. P. Braffet and Geo. H. Dern, directors. Wm. Fouyer, supt.

Inc. July 3, 1896, in Utah. **Cap.,** \$150,000, increased 1906 to \$190,000, again increased 1907 to \$250,000, and again increased 1911 to \$1,000,000; shares \$1 par; assessable. **Dividends:** to Jan. 1, 1916, \$67,000; total assessments levied, \$127,500. Paid last dividend of 1c, Dec. 15, 1915. Last assessments were in 1914, $\frac{1}{2}$ c and 1c per share. In treasury Jan., 1916, \$5,578. Shares listed on Salt Lake Stock Exchange. Annual meeting, second Monday in January.

Property: 6 claims, 50 acres, patented, adjoining the Mammoth and Grand Central mines, carrying a continuation of the Mammoth orebody. **Development:** by 700' tunnel, and 2,000' three-compartment shaft. The extensive workings show large bodies of low-grade ore, decreasing in values with depth. The oxidized zone extends to depth of at least 1,800', ores to this depth including lead carbonates, ruby silver and native silver. The copper ore occurs mainly on the footwall of the Mammoth vein, and is overlaid by silver-lead ore of smelting grade, the segregation of the copper and lead ores being remarkably complete. The lower workings in the sulphide zone show auriferous and argentiferous galena, chalcopyrite and pyrite, coming in at a depth of 1,800' to 2,000'. Recent development consists of a drift on the 700' to cut the orebody, followed by a raise from the 1,000' level.

Equipment: includes 2 electric hoists, 1 of 165-h. p., with double drum, good for a half-mile depth, and an electric air compressor. Buildings include a carpenter shop, smithy, assay office and superintendent's dwelling.

Operations were suspended March, 1907, and resumed May, 1908, and in 1914 the mine shipped 1,595 tons of ore, which realized \$9,996. Production in 1916 is from the 1,500 and 1,700' levels. Management considered good and property promising, notwithstanding the rather poor record of the past. Company claims to have a 200,000-ton orebody, averaging 13% zinc, between the 1,500' and 1,800' levels. Lessees and company are working the mine. Output for 1915 realized \$54,848.

LOWLAND TUNNEL WATER & TRANSPORTATION CO. UTAH

Office: 819 Newhouse Bldg., Salt Lake City. Mine office: Starr, Utah. **Officers:** E. P. Jennings, pres.; Louis Fugal, v. p.-mgr.; C. L. Whitney, sec.-treas.; with Geo. F. Wasson and D. H. Livingston, directors. **Inc.** Nov., 1912, in Utah. **Cap.,** 1,000,000 shares; 1 ct. par; nonassessable; 350,000 issued.

Property: 36 unpatented claims, 700 acres, in Nebo mining district, Juab Co., Utah, said to carry gold-silver-lead-copper-zinc-iron ore. Formation is quartzite, lime and granite. Ore occurs as a contact deposit and in fissure veins, running N.-S. with dip of from 40-90°.

Company is driving a 10,000' drainage and transportation tunnel into the Mt. Nebo mineral belt to serve 11 companies operating in that district and to develop its own mineralized ground. The tunnel was in 500', Jan. 31, 1916.

LUCANIA TUNNEL & MINES CO.**COLORADO**

Mortgage foreclosed in 1914 by Pennsylvania Mining, Power & Reduction Co., which see.

LUCIA MINING CO.**MEXICO**

Office: 15 William St., New York. Mine office: Pánuco de Coronado, San Juan del Rio, Durango, Mex. H. M. Hubbard, v. p.; Myra B. Martin, sec.-treas. Inc. 1900 in West Virginia. Cap., \$25,000; shares \$5 par. This company is controlled by the San Luis Mining Co. and its property is described under that title.

LUCILE GOLD & COPPER MINING CO.**CALIFORNIA**

Office: 303 Lankershim Bldg., Los Angeles, Calif. Mine near Kelso, Calif. Officers: Dr. S. K. Walsworth, pres.; Frank L. Pitney, v. p.; F. R. Pitney, sec., treas. and mgr.; with C. V. Boyd, directors. Inc. Nov., 1906, in Arizona. Cap., \$1,000,000; shares \$1 par; 900,000 shares outstanding. Annual meeting, 3rd Tuesday in April. Management reports \$650 expended on assessment work in 1915.

Property: 5 claims, unpatented, 100 acres, on the western slope of the Providence mountains, 11 miles from Kelso. Ore: gold-silver-copper, with iron sulphide, occurs in fissure veins in granite-porphry, said to be 25' wide, and to assay 69% iron, \$4.50 gold, \$1.50 silver and 6% copper per ton. Development: 220' tunnel and 100' shaft. Mine has no equipment. 50,000 tons of ore reported on the dumps, May, 1916. Company is awaiting the erection of a smelter.

LUCKY ABE MINING CO.**MISSOURI**

Webb City, Mo. Inc. in Missouri. Cap., \$10,000. Operates a lease on 40 acres of mineral land owned by the Joplin-Pittsburgh Land Co. in S. 14, T. 27, R. 33, Joplin, Jasper Co., Mo. Development: by 15 shafts, averaging 116' deep. Equipped with pumps, boilers, air-drills, steam-power and hoists. Employs 45 men. Production figures not available.

LUCKY BART GROUP**OREGON**

J. H. Beeman, Gold Hill, Jackson Co., Ore., owner and mgr. Property: 11 claims, partly patented, 220 acres in Sardina mining district, near Gold Hill, said to carry 5 known veins, averaging 2' in width. Ore is free milling, running from \$5-\$100 and said to average \$50 per ton. Developed by 2,000' tunnel to depth of 190'. Equipment: includes 40-h. p. steam plant, 5-stamp concentrating mill. Concentrates said to average from 3-5 oz. gold and silver. Mine has been operated more or less regularly since 1893.

LUCKY BOY CONSOLIDATED MINING CO.**NEVADA**

Address: care J. H. Miller, Hawthorne, Nevada. Officers: Jesse Knight, pres.; John H. Miller, v. p.-gen. mgr.; W. Lester Mangum, sec. Company controlled by the Knight Investment Co. Total dividends paid to date, \$425,000.

Property: the Lucky Boy mine, under the town of Lucky Boy, about 5 miles from Hawthorne, shows silver-gold-lead-copper ore in a vein in limestone near granite. Ore contains galena and tetrahedrite with quartz and some calcite, in lenses and shoots, in a vein which runs N. 80°-85° E. and dips 65°-75° S. Geology fully described in U. S. G. S. Bull. 594, p. 153.

Development: by 1,000' Hubbard shaft with drifts E. and W. at 100' intervals and by a deeper drainage tunnel, 6,200' long. Equipment: includes air compressor, electric motors, machine drills and useless 10-stamp mill.

The big oreshoot, which produced \$800,000 in 8 months and half as much more in the next year, has been mined out except where narrow. No stoping ore was cut in the lower tunnel, but there is much unworked ground in the mine and much virgin territory in the property. Lessees now working at 6 or 7 places are extracting 2 to 3 carloads of ore a month, which

yields a substantial profit to the company. Reported under option to New York interests, July, 1916.

LUCKY BOY GOLD MINING CO.

IDAHO

Office: Empire Bldg., Boise. **Mine office:** Idaho City, Idaho. **Officers:** Frank E. Johnesse, pres.-mgr.; E. W. Barry, v. p.; Fred V. Tinker, sec.-treas.-supt.; with T. L. Rippey and John G. Huber, directors. **Inc.** Sept. 30, 1914, in Idaho. **Cap.**, \$500,000; shares \$1 par; 125,000 shares outstanding.

Property: 7 claims, 120 acres, in Gambrinus mining district, Boise county, said to show a shear zone, 3'-40' wide, of granitic porphyry, carrying some quartz streaks and considerable soft talc. The orebody runs E.-W. and dips about 60°. Ore is free gold and said to average \$4.78 per ton.

Development: by 300' shaft and 840' tunnel to depth of 360'. **Equipment:** includes 25-h. p. hoist, Newark 12"x14" compressor, steam power, 10-stamp mill of 25 tons daily capacity. Management plans installing electric power, 100-h. p. crude oil engine direct connected to 55-k. w. electric generator, Chilean or tube mill and electric hoist.

Ore reserves: estimated Feb., 1916, 130,000 tons of ore. Credited with production of \$130,000 under former owners. Present management competent and property considered promising.

LUCKY BOY MINING & MILLING CO.

ARIZONA

Office: 677 I. W. Hellman Bldg., Los Angeles, Calif. **Mine office:** -Oatman, Ariz. **Officers:** Geo. E. Fairhead, pres.; N. A. D'Arcy, v. p.; W. S. Tarbell, sec.-treas. **Inc.** 1915 in Ariz. **Cap.**, 1,000,000 shares; 10c par. Stock listed on San Francisco and Los Angeles Exchanges.

Property: 200 acres in the Tom Reed district, adjoining the Telluride on the S. and the Tom Reed on the S. W., said to show gold ore occurring in stringers of quartz and calcite. A shaft on the Friday claim, down 300' in April, 1916, is being sunk to 500'.

Equipment: includes 25-h. p. hoist, 200-cu. ft. air compressor, 35-h. p. engine, compressor and Jackhammer drills, installed 1915. Property considered promising.

LUCKY BOY MINING & MILLING CO.

UTAH

E. E. Lowry, pres.; Ira Griffiths, sec.-treas. **Inc.** April 20, 1916. **Cap.**, \$50,000; shares 10c par; assessable; 25,000 shares outstanding. Listed in Salt Lake City. **Property:** 6 claims in Clear Creek mining district, Box Elder Co., Utah, said to show copper-silver-gold ore.

LUCKY CALUMET COPPER MINING CO., LTD.

IDAHO

Office: Wallace, Idaho. **Mine office:** Mullan, Shoshone Co., Idaho. **Officers:** John H. Nordquist, pres. and gen. mgr.; Chas. H. Solberg, v. p.; Otto A. Olsson, sec.-treas., Eagle Block, Wallace, Idaho; with A. J. Olson, directors; Al. J. Grills, supt. **Inc.** Oct., 1906, in Idaho. **Cap.**, \$1,500,000; shares \$1 par; assessable. Last assessment 5 mills per share, levied in 1914.

Property: 10 claims, patented, 181 acres, on Snowstorm hill, between the Independent and Snowstorm mines, and about 5 miles N. E. of Mullan. Property shows 2 fissure veins of 10 to 50' width, in quartzite. **Development:** by 3 tunnels. The upper one, of 1,700' length, has a quarter-mile of drifts and crosscuts, which develop what is supposed to be the extension of the Snowstorm vein, showing low-grade ore carrying disseminated carbonates and bornite of 2 to 3% estimated copper tenor. The lower tunnel, a crosscut, from the head of Gentle Annie gulch, is 3,600' long and has opened up a good body of ore, presumably the National, at depth of 1,200'. Property is worked intermittently with proceeds of annual assessments, but information is hard to obtain from this as well as all other Nordquist companies.

Equipment: includes electric power, with 2 motors, and a 5-drill air compressor.

LUCKY DEPOSIT MINING CO.**NEVADA**

Officers: Simon Davis, pres.; Heber M. Wells, v. p.; Pearl Jack, sec.; L. G. Hardy, treas.-mgr.; with E. C. Ashton and J. P. Cahoon, directors. **Inc.** March 1, 1914, in Utah. **Property:** at Aurum, White Pine Co., Nev., developed by 175' crosscut tunnel cut along a porphyry dike said to measure 200' across. The tunnel is being driven to reach depth of 300'.

LUCKY FIVE MINING CO.**WISCONSIN**

Mr. McKinley, supt., Dodgeville, Wisc. Operates a lease on Davis and Thomas lands, in Dodgeville district, near Cuba City, Grant Co., Wisc., and is the largest producer of high-grade lead-zinc concentrates in the district. Developed by 100' shaft. **Equipment:** includes steam plant and 50-ton concentrator. Shipments made to the Collinsville smelter, under lease to the Picher Lead Co.

LUCKY FRIDAY MINING CO.**IDAHO**

Wallace, Idaho. **Officers:** Franklin Pfirman, pres.; Jas. A. Wayne, sec.; J. H. Wade, mgr. Is a reorganization (1914) of the Lucky Friday Mines Co. **Cap.**, \$1,500,000; shares \$1 par; assessable; 170,000 shares in treasury.

Property: 4 claims, adjoining the Hunter mine on the south. **Development:** by 90' shaft; 625' upper crosscut tunnel and 700' lower crosscut tunnel, developing a 10' vein, with 4' paystreak giving assays up to 3.5% copper, 29% lead and 89 oz. silver per ton.

Equipment: includes electric drilling plant, trackage and ore cars. Development work resumed in 1915 and lower tunnel being driven 100' further to reach the main ledge.

LUCKY GEORGE MINING CO.**MISSOURI**

M. L. Hughes, pres.-gen. mgr., Joplin, Mo. Company operates a lease on 15 acres lead-zinc bearing land at Belle Center, 3 miles N. W. of Joplin, Jasper Co., Mo. Developed by 2 shafts and several drifts. A 150-ton concentrator was to be started up early in 1916.

LUCKY GOLD & COPPER MINING CO.**ARIZONA**

Letters to J. D. Ferree, pres.-treas., Phoenix, Ariz., returned unclaimed, 1916. A. F. Mahin, v. p. **Inc.** 1904 in Ariz. **Cap.**, \$300,000, increased 1911 to \$500,000; shares \$1 par; 400,000 shares issued at last accounts. Authorized bond issue \$50,000; \$10,000 outstanding.

Property: 9 claims, 180 acres, in Riverside district, Pinal Co., Ariz., 3 miles S. of the A. E. R. R. Developed by several shallow shafts and drifts, said to show ore giving assays of 1-17% copper, \$1.60-\$2.39 gold, \$1.36 silver per ton. Presumably idle since 1914.

LUCKY GROUP.**NEW MEXICO**

M. D. Gaylord, mgr., Brice, via Oro Grande, Otero Co., N. M. **Property:** the Lucky, May, Copper King and Lincoln claims in Jarilla district said to carry malachite ore a few inches to 3' thick in bedding planes and along seams and cross fractures. The ore averages 7% copper. A chimney of ore 50' wide is said to carry \$4 to \$11 per ton in gold, largely free.

Development: by tunnel, exposing several orebodies at 300' depth. In Sept., 1913, an experimental plant of the Dawson patent process was installed at the mine and a tramway was constructed, 1914.

Production: at the rate of 50 tons per day carrying 2 to 5% copper and \$3.50 to \$10 gold with a bonus of \$2 for iron and lime. J. R. and H. D. Darroch reported to have bought a half interest in the mine. Employs 15 men.

LUCKY JIM ZINC MINES, LTD.**BRITISH COLUMBIA**

Office: 213 Belmont Bldg., Victoria, B. C. A. G. Larsen, trustee; G.

Weaver Loper, mgr.; A. J. Becker, supt. **Cap.**, \$2,500,000; shares \$1 par; authorized bond issue \$150,000, bearing 7%. Stock listed on Spokane Exchange.

Property: the Lucky Jim Mine at Zincton, B. C., developed by 3,600' of tunnels, drifts, raises and crosscuts. Two promising shoots of zinc ore are developed on No. 5 level. **Shipments:** 780 tons of crude ore in 1913 averaged 46.37% zinc.

Operations were interrupted by lack of funds in the Autumn of 1914 and efforts made to foreclose on the first mortgage of \$62,000, but the court appointed a trustee to reopen the mine and operations were resumed in 1915. Ore is shipped to the Roseberry mill on Slocan lake, owned by the Monitor Mining Co.

LUCKY SAM MINING CO.

ARIZONA

Office: 678 I. W. Hellman Bldg., Los Angeles, Calif. **Officers:** W. S. Tarbell, pres.; G. M. Gilbert, v. p.; Geo. E. Fairhead, sec.-treas.; L. C. Randall, supt. **Inc.** 1915 in Ariz. **Cap.**, \$100,000; shares 10c par.

Property: 12 claims, 235 acres, in the Tom Reed district, Mohave Co., Ariz., carries 2 main parallel veins, 4-6' wide. Developed by 2 shafts, deepest 163', in May, 1916. A prospect.

LUCKY SIX MINING CO.

WISCONSIN

J. N. Vial, mgr., Mifflin, Wis. Property in Mifflin district, Iowa Co., Wisc., developed by two shafts. Produced about 2,305 tons of zinc concentrates in 1914.

LUCKY SWEDE GOLD & COPPER MINING CO.

IDAHO

Office: 625 Cedar St., Wallace, Idaho. **Officers:** Morris Pearson, pres.-gen. mgr.; Otto A. Olsson, sec.-treas.; L. F. Macejowski, Harry Pearson and Ida Pearson, directors. **Inc.** May, 1909. **Cap.**, \$1,000,000; shares \$1 par; assessable; last assessment 3 mills per share, delinquent Sept., 1913; 300,000 shares issued to end of 1914. Company planned 1914 to give away stock to those agreeing to pay a 1-mill assessment per share every 60 days to provide necessary funds for development work.

Property: 14 claims in the St. Joe district, S. E. of Mullan, near the C. M. & St. P. R. R., shows 3 veins with surface ores giving good assays in copper and gold. **Development:** by tunnel with about 600' of workings. Company's last assessment provided funds for a new 1,500' tunnel to start near the railway line and cut a copper vein expected to be reached at depth of 1,000'. **Equipment:** includes compressor, installed 1913, and a Pelton wheel.

LUCKY TIGER-COMBINATION GOLD MNG. CO.

MEXICO

Office: 1012 Baltimore Ave., Kansas City, Mo. Mine office: Esqueda, Sonora, Mex. **Officers:** John Kelly, pres.; E. C. Sooy, v. p.; O. V. Dodge, sec.; H. Vanderslice, treas.; with E. D. Fisher, D. J. Haft, Wm. Huttig, W. H. McCrum, W. A. Moses, J. Z. Miller, Jr., Trigg Garner, A. E. Mosier and N. J. Simonds, directors. L. R. Budrow, gen. mgr.; R. T. Mishler, asst. gen. mgr.

Inc. March 16, 1903, in Ariz. **Cap.**, 800,000 shares; \$10 par; 715,337 shares issued. Annual meeting, 3rd Monday in March. Company owns the entire capital stock of the Tigre Mining Co., S. A.

Combined balance sheet for 1914 of the Lucky Tiger Combination Copper Mining Co. and the Tigre Mining Co., S. A., shows total assets \$9,807,762, which includes mining property \$6,061,040; plant, machinery, equipment, \$488,147; product on hand and in transit, \$255,853; cash, \$77,411; liabilities include capital stock, \$7,153,370; bonds and interest, \$1,285; current liabilities, \$91,751. Total receipts for the year's operations were \$1,510,721, including

\$1,503,610 from ore sales; total expenditures were \$764,285; depreciation of property, plant and equipment, \$129,374; net profits, \$604,612.

Dividends: paid since organization of the company:

Year—	Number	Amount
1915.....	\$493,582.53
1914.....	58-68	715,337.00
1913.....	46-57	450,662.31
1912.....	40-45	336,208.39
1911.....	30-39	357,601.10
1910.....	18-29	429,000.00
1909.....	6-17	409,500.00
1908.....	1-5	71,500.00

Total\$3,263,391.33

Property: the El Tigre mine, 6 claims, 622 acres, at El Tigre. Montezuma district, Sonora, Mex., shows gold-silver-lead-copper ore in fissure veins traversing rhyolite. Ore is a silicious sulphide occurring in vein 25' wide, proven for 4,000' in length, and running N.-S. with average dip of 65°. Developed by 1,000' incline shaft and 5,000' tunnel, with about 10 miles of underground workings. Ore is mined mostly by overhand shrinkage.

Equipment: includes electric power, 25-h. p. electric hoist, 250-ton concentrating mill and cyanide plant. Reported extraction in 1914 was 93.8%, concentrates averaging 2.3 oz. gold, 520 oz. silver, 2.3% copper, 10.8% lead. **Production:** 83,000 tons in 1912; 90,000 tons in 1913; 88,000 tons in 1914. Ore averages 30 oz. silver, 0.8% zinc.

Company has been able to continue operations and shipments more or less regularly, notwithstanding disturbed conditions in Mexico during the past years.

LUCKY TIGER MINING CO.

MISSOURI

Neck City, Mo. Inc. in Missouri. **Cap.**, \$20,000. Operates a lease on mineral land owned by Penn Zinc Co., in Sec. 8, T. 29, R. 32, between Alba and Neck City, Jasper Co., Mo. **Developed** by 2 shafts to depth of 220'. **Equipment:** includes 250-ton concentrating plant, pump, 3 air drills, steam power, Blake crusher and Norwalk air compressor. Employs 30 men. Producing mainly from the 220' level.

LUDWIG MINE.

NEVADA

Owned by Nevada Douglas Copper Co., at Yerington, Lyon Co., Nev.

LUEMA MINING CO.

COLORADO

Leadville, Colo. Warren F. Page, mgr. **Property:** the Valley and Forest Rose mines, on Prospect Mtn., developed by a 450' shaft and 2,000' tunnel, said to show silver-bearing copper and lead ores. On the 1,500' point in the bore, drill holes down to 200' have proved valuable orebodies and management plans sinking interior shaft on the course of the drills. Has electric power, hoist and all necessary machinery. Surface buildings, destroyed by fire in 1914, were rebuilt the following year.

LUNING GOLD MINES SYNDICATE.

NEVADA

See R. B. Todd Mines Co.

LUNING-IDAHO MINING CO.

NEVADA

Office: 203 Nixon Bldg., Reno, Nev. Mine office: Luning, Mineral Co., Nev. **Officers:** Robt. B. Todd, pres. and gen. mgr.; Max Hahn, v. p.; S. W. Todd, sec.-treas.; with W. A. McPhee and Prof. E. P. Heald, directors. Inc. April 29, 1910, in Nevada. **Cap.**, \$1,500,000; shares \$1 par; issued \$900,000.

Property: 13 claims, 275 acres, in the Santa Fe mining district, shows several fissure veins in quartzite, said to carry 5½% copper, 2 oz. silver and

about 60c gold per ton. **Development:** by about 600' of underground workings to depth of 150'.

Management plans continuing Hahn tunnel 1916 and sinking a working shaft on one of the orebodies showing at surface.

LUPFER MINING CO.**MONTANA**

Whitefish, Flathead Co., Mont. **Officers:** George Hoffman, pres.-mgr.; Mike Sullivan, v. p.; Pete Hoffman, sec.; with E. Boettcher and John Roeder, directors. **Inc.** 1906 in Montana. **Cap.**, 500,000 shares; par value 15c; 250,000 issued.

Property: 160 acres, about 14 miles W. of Whitefish. Developed by 150' shaft, showing a well defined vein of copper ore, 3' wide in porphyry and limestone, said to assay 2% copper, 3 oz. silver with a trace of gold. Has a small steam hoist and air compressor. Idle since 1911 owing to lack of funds.

LYCOMING CO.**MINNESOTA**

Office: 708 Lonsdale Bldg., Duluth, Minn. Was a securities-holding company. Inactive and no assets.

LYNN BIG SIX MINING CO.**NEVADA**

W. W. Ruby, supt., Goldville, via Carlin, Nev. Henry Harker, pres., Taylorsville, Utah. J. H. Marshall, mgr., Cont. Nat'l Bank Bldg., Salt Lake City, Utah.

Property: a gold mine, with a 4' vein said to carry a 20" streak of ore averaging \$150 per ton smelter return. The rest of the vein is said to assay \$46 per ton. A second vein, the West, shows mill ore. **Development:** 200' shaft with drifts at 100 and 200'. Shipments average 3 cars a month.

LYON COPPER CO.**ARIZONA**

Reorganized as Arizona Merger Gold & Copper Co., which see.

MACNAMARA MINING & MILLING CO.**NEVADA**

Offices: 565 Mills Bldg., San Francisco, and Tonopah, Nev. **Officers:** J. L. Joseph, pres.; Mark Wulfsohn, v. p.; E. W. Elliott, sec.-treas.; J. W. Sherwin, supt. **Inc.** 1914 in Calif., as a reorganization of the MacNamara Mining Co. **Cap.**, \$1,500,000; shares \$1 par; assessable. Transfer office and registrar: 565 Mills Bldg. Listed on San Francisco Exchange.

The MacNamara Mining Co. completed a mill on its property, Dec. 1912, and in 1913 treated 28,000 tons of \$8.41 ore at a loss. The management got into bad repute with the stockholders because no statements of operations were given out and stockholders were at a loss to know what had become of the money in the treasury. To provide working capital the company was reorganized under its present title and the stock was put upon an assessable basis. Two assessments of 3c per share each have been levied. The property of the MacNamara Mining Co. was sold to the new company for 1,340,076 shares of the latter's capital stock.

Property: 2 patented claims, 12 acres, at Tonopah, said to show gold-silver ore in quartz vein in andesite. **Development:** 800' shaft.

In 1914 the property was operated for 8 months; the mill treated 15,776 tons of \$11.08 ore, with 93.3% recovery. **Production:** was 10,544 tons of \$7.04 ore; costs for 7 months were \$10.34 per ton. The shutdown was attributed to lack of development, shortage of money, and low price of silver. Property was not operated in 1915.

In Feb., 1916, arrangements were made with the West End Cons. Mining Co. by which the MacNamara Company could develop on its side of the property line a body of ore which the West End has exposed in its stopping operations near the line; work to be done through West End workings, to avoid the necessity of MacNamara driving a 500' crosscut. Shipments

were made during March to the West End mill at the rate of about 50 tons per week. Ore is said to average \$30 to \$40 per ton. **Equipment:** includes electric hoist, 100-h. p., and compressor.

At last accounts the company was planning to start its own 75-ton 10-stamp mill and cyanide plant. There is said to be a considerable tonnage of low-grade ore remaining in the mine which can be worked at a profit at present high price of silver.

MAD MULE MINING CO.

CALIFORNIA

Owns the Mad Mule mine, formerly known as the Banghart, 5 miles N. W. of Stella, in the Shasta mining district. In 1914 a tunnel was being driven to cut the ore at greater depth. T. W. Briggs, supt., in 1914. Mine is fully described in U. S. G. S. Bull. 540, pp. 40, 42, 52-54. See also State Mineralogist's Report 1915, Mines & Min. Res. of Shasta Co., p. 47.

MADDEN SCRATCH GRAVEL MINES CO.

MONTANA

Helena, Mont. **Officers:** Jas. Madden, pres.; Peter Scharenbroich, v. p.; Wm. Muth, sec.-treas.; above, with Theo. Sarter, L. P. Wells and E. Edwards, directors. **Inc.** March 16, 1916, in Mont. **Cap.**, \$300,000; shares \$1 par; outstanding \$170,000. Annual meeting, third Monday in June.

Property: 3 patented claims, 50 acres, known as the Jacquemin group, in the Scratch Gravel Hills, 8 miles from Helena, said to show gold ore in fissure veins in granite. The claims are said to have been worked in a haphazard manner by Jacquemin. **Development:** 160' incline shaft, and 340' tunnel. Present management intends to develop the property.

MADERA ENTERPRISE MINES & LAND CO.

CALIFORNIA

Grub Gulch, Madera Co., Calif. **Officers:** Lou K. Johnson, pres.-gen. mgr.; A. L. Emberson, sec.-treas.; S. R. Johnson, mgr. **Inc.** in 1914. **Cap.**, \$500,000; shares \$1 par. A close corporation. **Property:** 550 acres patented, including the John W. Cates mine, 3 miles N. E. of Grub Gulch. **Ore:** gold quartz in fissure vein in schist and slate. Vein runs N. 35° E.; dip 80° N. E. It was discovered in 1881 and worked for a short time, during which it is said to have yielded over \$108,000 from ore averaging \$13.13 per ton. It was then idle until April, 1913.

Development: by 4 tunnels, longest 365', drifts and winzes, totaling 1,500' of underground workings. **Equipment:** 10-stamp, 25-ton mill built by present owners, air compressor and engine. Water from the Fresno river furnishes power, except in the dry season, when a gasoline engine is used; there are 1½ miles of ditch and flume. Employs 10 men.

MADERA MINING CO.

ARIZONA

Machinery has been removed and property is idle. No funds. **Address:** 178 Main Ave., Passaic, N. J. See Copper Handbook, Vol. XI.

MAGGIE MURPHY COPPER CO.

WYOMING

Office: care Chas. S. Ashley, pres., New Bedford, Mass. Mine near Douglas, Converse Co., Wyo. **Inc.** Aug., 1904, in Wyoming. **Cap.**, \$1,000,000; shares \$1 par.

Property: 12 claims, 180 acres, and a 60-acre mill site in Horseshoe canyon, in the Laramie Peak district. Claims show granite, with gneiss and schists, carrying 7 veins between gneiss and mica-schist, one of which ranges 30 to 60' in width and shows covellite, bornite and chalcopryrite, with pyrrhotite ores assaying 1 to 6% copper, 2 to 9 oz. silver and 40 cts. to \$4.50 gold per ton.

Development: includes 114' shaft and various shallow workings. Company has kept up necessary annual assessment work, but has done no development.

MAGISTRAL-AMECA COPPER CO.

MEXICO

Office: 201 Hibernian Bldg., Los Angeles, Cal. Mine office: Ameca,

Jalisco, Mex. **Officers:** H. L. Percy, pres.; Fred M. Lyon, v. p.; Geo. C. B. Robinson, sec.-treas.; Jas. P. Harvey, gen. mgr., and H. N. Manington, directors; Percy A. Babb, cons. engr. Inc. May 20, 1909, in Arizona. **Cap.:** \$1,500,000; shares \$1 par; nonassessable; issued, 1,255,300 shares. Holds direct title to lands through Magistral-Ameca Copper Co., S. A., inc. in Mexico. Annual meeting, second Wednesday in November.

Property bought of Las Moras Copper Mining Co. for \$100,000 by Messrs. Patrick Clark, Jas. P. Harvey, H. L. Percy and Fred M. Lyon, Mr. Clark selling his quarter interest to his associates for \$55,000.

Property: .74 pertenencias, 185 acres, known as the Mina Magistral, on the Hacienda Hegira, 8 miles S. W. of Ameca, has veins in diorite that are cut by porphyry dikes. The veins occur on dike contacts and show outcrops of silicified rock with quartz stringers and hematite. The vein varies from 4 to 25' in thickness and carries lenticular orebodies connected by mere films of quartz or fissures with wall rock impregnated with chalcopyrite. The Magistral ore shoot occurs where 3 veins intersect. The ore carries copper sulphides and averages from 4 to 7% in copper with about \$2 in combined gold and silver values.

Development: by 321' shaft, planned to be deepened to 350', and by tunnels with about 1 mile of openings, March, 1913, developing copper ground for width of 5 to 50', said to assay 4 to 8% copper. The Magistral was worked many years ago for bluestone, used by neighboring mines in the process of treating silver-lead ores.

Equipment: includes two 80-h. p. high-pressure boilers and a 150-h. p. tandem compound engine, with hoist good for 500', at the Magistral. The mines are connected with Ameca by a good wagon road, 8 miles long, with a 1½% grade, built with the idea of using it for railway tracks in the future. About 100 men are employed.

The concentrator was rebuilt, 1914, but owing to disturbed conditions in Mexico, operations have been greatly interfered with.

MAGISTRAL, S. A.; NEGOCIACION MINERA DEL MEXICO

Office and mine: Aptdo 22, Zacatecas, Zacatecas, Mex. Dudley H. Norris, pres.; Chas. O. Gilbert, mgr. Company, a close corporation, is said to have paid for improvements from net earnings. Owns the Refugio de Magistral and San Roberto mines.

The San Roberto mine, about 300' deep, has iron ore carrying small values in copper, silver and gold, used for fluxing, and also has a little high-grade silver and silver-lead ore.

The Magistral mine carries chalcopyrite and galena, and ore is produced returning about 6% copper and up to 200 grams silver per metric ton. **Development:** by a 900' tunnel and 2 shafts, 1 of 400' depth, the second, with 3 compartments, is to be sunk 1,500'.

Equipment: includes a 40-h. p. gasoline and 150-h. p. steam hoist, boiler plant, compressor, etc.

The reduction plant, at Magistral siding, on the Mexican Central line, connected with the mine by a narrow-gauge railway, includes a 50-ton sampling mill and a 200-ton smelter. Slags are highly silicious, and matte is sent for conversion to the Torreon smelter. Works treat about 2,000 tons of ore monthly, including a considerable amount of custom ore. About 150 men employed. No recent returns secured. Property probably idle owing to Mexican revolution.

MAGMA COPPER CO.

ARIZONA

Office: 14 Wall St., New York. **Mine office:** Superior, Pinal Co., Ariz. **Officers:** W. H. Aldridge, pres.; F. W. Holmes, v. p.; H. E. Dodge, sec.-treas.; preceding, with John F. Alvord, C. A. Corliss and H. F. J. Knobloch.

directors. W. C. Browning, gen. mgr.; E. H. Lundquist, mine supt.; J. A. Garrett, mill supt. Inc. June, 1910, in Maine. Cap., \$1,500,000; shares \$5 par; issued, \$1,200,000. Transfer agent, Guaranty Trust Co., New York. Registrar, Bankers Trust Co., New York.

Balance Sheet:

Assets—						
	Property & Plant	M. A. R.R. Stock	Cash & Copper	Other Current	Supplies	Total
1915....	\$928,186	\$200,000	\$443,068	\$46,855	\$35,166	\$1,653,275
Liabilities—						
	Capital Stock	Current	Surplus	Total		
1915.....	\$1,200,000	\$47,478	\$405,797	\$1,653,275		

Income Account:

	Metal Sales	Total Income	Total Expenses	Oper. Profit	Deprec.	For'd
1915...	\$1,040,896	\$1,041,235	\$370,348	\$670,886	\$59,157	\$611,729

Earnings for first half 1916 were \$575,226.

Quarterly dividends of 50c per share began Sept. 30, 1915.

Property: the Silver Queen mine, with 22 claims, 346 acres and 133 acres in mill sites and other locations in the Pioneer district. The known ore-bodies of the mine occur in a strong fault fissure filled with porphyry and cutting diabase, quartzite and limestone. The ore is mainly chalcocite.

Development: mine has been partially prospected and developed to the 1,200' level by the old 800' shaft and a new 1,200' three-compartment shaft. Development work in 1915 totaled 5,619', of which 855' was shaft sinking. Total underground workings Jan. 1, 1916, 17,583'. The vein has been developed on the 500', 650', 725', 800', 1,000' and 1,200' levels. On the 1,000' level an orebody had been drifted on, to Feb. 1, 1915, for 275'. It averaged 4.8' in width and assayed 14.34% copper and 13.12 oz. silver. On the 1,200' level 800' of work has been done. Maximum width of vein, where opened on this level, 50', of commercial ore 23'.

In addition to the copper orebody there is a footwall orebody of lower grade copper and between the two lies a large shoot of zinc ore. For 800' the vein dips north about 65°; from the 800' to 1,000' level it is perpendicular, and from the 1,000' to 1,200' level it dips about 65° S. Development work has been preceded and accompanied by diamond drilling. On the 1,000' level the gold content, about \$1.60 per ton, is four times as great as on the upper levels, and zinc was first found here. The zinc lenses contain about 20 oz. silver and 5% lead.

Ore Reserves: estimated Jan. 1, 1916, as 90,000 tons assaying 6.65% copper, 6.75 oz. silver and .029 oz. gold per ton. This included: reasonably assured ore, 87,000 tons, 6.72% copper; ore in third class dumps, 3,000 tons, 4.85% copper. In addition there are 10,000 tons of lead-zinc probable ore, assaying 14% zinc, 4% lead and 10 oz. silver per ton.

Equipment: is electrical throughout, but includes a 160-h. p. steam hoist, now driven by compressed air, 2 air compressors, one of 1,500, the other of 900 cu. ft. capacity, driven by a 225-h. p. motor and 3 vertical Aldrich pumps, each driven by a 75-h. p. motor.

In Aug., 1914, the company completed a concentration and oil flotation mill, having a monthly capacity of 4,500 tons. Uses General Naval Stores oil. Mine and mill are connected by a 2,600' aerial tram. The Callow flotation process is used in the mill and treats the tailing from the finishing tables. Recovery was 86.765%. Ore and concentrates are shipped to the

plant of the A. S. & R. Co. at Hayden, Ariz. A new 100-ton zinc concentrator has recently been completed.

The company owns substantially all the shares of the Magma Arizona Railroad Co., completed in 1915, a 30.4-mile narrow gauge road from Superior to Webster, a station on the Arizona Eastern R. R.

A 15-mile electric power line with steel towers was built by the company from its property to the Inspiration mine, at Miami, where it connects with the power line from Roosevelt Dam. The company has a contract for several years with the U. S. Reclamation Service for electric power, at an approximate cost of \$49 per h. p. year.

Production: for 1915 was 6,046,459 lbs. copper and \$208,658 gold and silver. Total ore mined to Dec. 31, 1915, was 89,841 tons, containing 7.30% copper, 8.39 oz. silver and \$0.60 gold per ton. Output for 1915 is as follows:

		Ore Milled		Ratio			
Tons Mined	Cost per Ton	% Copper	% Silver	Conc.	% Rec.	Lbs. Cop. per Prod.	Cost per Lb.
(a) 46,691	\$4.54	5.21	6.04	3.69 to 1	86.76	6,046,459	6.82c

Average price received was 17.91 cts. per lb.

(a) Crude sorted ore amounted to 3,756 tons, carrying 18.44% copper and 20 oz. silver. Ore obtained from dump and milled, 12,528 tons, averaged 4.62% copper and 5 oz. silver per ton.

55,463 tons of ore averaging 5.21% copper and 6.04 oz. silver were milled, producing 15,039 tons concentrates carrying 16.67% copper, 19.05 oz. silver and \$2.18 per ton gold. The mine also produced 900 tons carbonate ore averaging 8.20% copper, 4.55 oz. silver per ton and \$1.20 gold.

Production for 6 months, 1916, totaled 3,937,237 lbs. copper.

Reported that negotiations are under way by which Magma may acquire parts of the Lake Superior & Ariz. Mng. & Sm. Co. property.

MAJESTIC COPPER CO.

ARIZONA

Office: First National Bank Bldg., Kansas City, Mo. **Mine office:** Oracle, Pinal Co., Ariz. **Officers:** E. A. Hosier, pres.; W. A. Neiswanger, v. p.; E. T. Wilder, sec.-treas. **Inc.** as Inspiration Mining Co., but sold its property, in the Globe district, to the Inspiration Copper Co., and changed its name, March, 1909, to present title, to avoid misunderstandings. **Cap.**, \$3,000,000; shares \$1 par; \$2,707,000 outstanding; bonds authorized, \$25,000; \$14,350 outstanding.

Property: 6 claims near Oracle, on which assessment work is done. Company received from the sale of the Inspiration mine about \$1,500,000.

MAJESTIC COPPER MINING & SMELTING CO.

UTAH

Office: 79 Milk St., Boston, Mass. John M. Dick, president. To all practical intents and purposes this company was succeeded, 1904, by Majestic Copper Co., which was succeeded, 1908, by Majestic Mines Co. Majestic Copper M. & S. Co., however, remains in existence, though practically the entire stock issue, and a large majority of the bonds, are owned by the Majestic Mines Co. The company became bankrupt, 1904, but paid 100 cts. on the dollar. Very fully described Vol. IV, Copper Handbook.

MAJESTIC MINES CO.

UTAH

Office: 342 Exchange Bldg., Boston, Mass. **Mine office:** Milford, Beaver Co., Utah. **Officers:** John M. Dick, pres.; H. M. Inman, v. p.; D. J. Flanders, sec.-treas.; J. A. Bailey, G. F. Kellogg, John Muller, R. H. Phillips, E. M. Southworth and John Freeland, directors; Alex. D. Moffat, mine mgr. **Inc.** May 18, 1908, in Maine, practically as successor of Majestic Copper Co. and Majestic Copper Mining & Smelting Co. **Cap.**, \$5,000,000; shares \$5 par; assessable; issued, 808,795 shares.

Stocks of both companies were exchanged share for share for stock of the Majestic Mines Co. on payment of 15 cts. a share; bonds of the Majestic Copper Mining & Smelting Co. were exchanged for stock of the Majestic Mines Co., giving 900 shares of new stock for each \$1,000 bond.

The result of the reorganization has been as follows: all floating indebtedness of the operating company has been liquidated; \$868,500 of the \$1,000,000 outstanding bonds have been purchased and are now owned by the Majestic Mines Co.—practically 87%—which gives the Majestic Mines Co. control of the situation. Assessments of present company have been as follows: 15 cts. in 1908; 5 cts. in June, 1910; 10 cts. in April, 1911. Shares listed on Salt Lake Stock Exchange, Boston and New York curbs. Federal Trust Co., transfer agent; State Street Trust Co., registrar, Boston, Mass. Annual meeting, 3rd Tuesday in March.

Property: 120 claims, 2,450 acres, in 8 groups, also an 80-acre smelter site, and 800 acres miscellaneous lands. The groups, located in 5 different districts of Beaver county, are the O. K., Old Hickory, Harrington-Hickory, Vicksburg, Hoosier Boy, Southern States, Larkspur, Copperfield and Treasurer, said to have about 100 orebodies, carrying copper, gold, silver, platinum, lead, cobalt, bismuth, vanadium and uranium. The company has platted the town site of Lewisville, where the smelter was located, and the property is served by the S. P., L. A. & S. L. R. R.

Development: claims are under active development, 1916; there are 18 shafts, 100 to 600' deep, with a total of 6 miles of underground workings. The Old Hickory and O. K. mines yield copper ores, the others silver-lead ores.

The principal work of the present company is on the Old Hickory group of 9 claims, from which shipments are being made at the rate of about 33 tons ore daily. Smelter returns on this ore are given as 3.46% copper, 1.7 oz. silver and 39.7% iron.

The **O. K. mine**, 7 claims, formerly the principal producer, has a 500' three-compartment shaft, with a vein up to 20' in width, development being mainly on the 300' and 400' levels. This mine has over 500,000 tons of low-grade ore blocked out, in what apparently is a stockwerk, up to 250' in width, carrying stringers of high-grade ore. The O. K. mine was idle 1915, but will be under lease in 1916.

The **Harrington-Hickory** group of 27 claims, partly fractional, shows numerous fissure veins, intersected by cross veins, both approximately vertical, and, in addition, has a series of bedded veins, presumably following bedding planes, dipping at 30 to 35°, giving 3 separate intersecting systems of orebodies. Development is by a 600' two-compartment vertical main working shaft, with drifts on the 500' level, where there is a body of high-grade ore, assays from which have given 1% copper, 37 to 55% lead, 18 to 22 oz. silver, and about \$1 gold per ton.

The **Vicksburg** group of 4 claims, a lead-silver mine, formerly worked for gold, has 3 practically vertical fissures, of 2 to 20' width, with mineralized cross-fissures, developed by a 200' 2-compartment working shaft, a 150' incline shaft and numerous shallow shafts and pits. It is said that high-grade ore has been encountered at a depth of 150' in this mine. Worked by lessee and 20% royalty paid to company on gross proceeds.

The **Hoosier Boy**, a silver-lead mine, about 3 miles from the Horn Silver mine, is now under development.

Equipment: includes 6 gasoline and 1 steam hoist. Electric power, for lighting and pumping, is taken from the Beaver River Power Co.

Mines closed down from Aug., 1914, to May, 1915, but operations now being pushed rapidly.

MAJOR EVANS MINING CO.**UTAH**

Office: 440 Boston Bldg., Salt Lake City, Utah. C. B. Felt, pres.; R. Leo Bird, sec. **Inc.** 1915 in Utah. **Cap.**, \$100,000; shares 10c par; assessable; treasury, 440,000 shares. Listed in Salt Lake City.

Property: 42 claims in American Fork mining district, said to show copper-lead-silver ore. Is a prospect.

MAJOR MINING & MILLING CO.**ARIZONA**

Absorbed 1916 by Sheldon Mng. Co.

Fred Bowler, Phoenix, Ariz., supt. In 1915 company acquired the Eureka mine, Walker district, also several groups of claims, including the Sheldon group, and leased the 20-stamp mill and 8,000' tunnel of the Poland Mining Co., connecting the Big Bug and Lynx Creek basins. Company planned to do extensive development work and at last accounts had made several shipments of gold-silver ore.

MALONEY-BLUE LEAD COPPER MG. & SM. CO. SOUTH DAKOTA

Sheridan, Pennington Co., S. D. Company out of funds, and property idle. Claims show copper ore in limited amount, but property is believed to be without merit as a copper producer, despite extensive workings. See Vol. XI, Copper Handbook. Letters neither answered nor returned.

MAMMOTH COLLINS MINE.**ARIZONA**

c/o Young Bros., Shultz, Arizona. See Great Western Copper Co.

MAMMOTH CONS. MINING CO.**CALIFORNIA**

Office: 312 Sellwood Bldg., Duluth, Minn. Mine near Bakersfield, Hamilton Co., Calif. **Officers:** R. P. Burgan, Pittsburgh, Pa., pres.; J. W. Norton, Duluth, v. p.; Wm. D. Underhill, treas.; preceding, with B. Silberstein and A. F. Becker, directors; H. E. Grieser, sec.; Frank Enzensperger, supt. and purch. agt. **Inc.** June 9, 1910, in Minn. **Cap.**, \$800,000; shares \$1 par; nonassessable; 465,000 issued. Annual meeting, 2nd Tuesday in January.

Property: 22 claims, 100 acres, 20 miles from the railroad, is said to show silver-gold ore in quartz. Undeveloped in 1913, but planned driving tunnel to reach orebody. Letters neither answered nor returned, 1916. Property not favorably regarded.

MAMMOTH COPPER MINING CO.**UTAH**

Office: 219 Judge Bldg., Salt Lake City, Utah. Edward Bardsley, pres.; B. D. Lyon, sec.-treas. **Inc.** in Utah. **Cap.**, \$10,000; issued, \$6,000; shares 1 ct. par; assessable. Listed in Salt Lake City. Owns 240 acres in Millard Co., 15 miles from Milford, said to show a vein of copper ore in monzonite. Development is surficial only, and property is a prospect.

MAMMOTH COPPER MINING CO. OF MAINE.**CALIFORNIA**

Is a subsidiary of the U. S. Smelting, Ref. & Mng. Co., 55 State St., Boston, Mass. Mine office: Kennett, Shasta Co., Calif. A. P. Anderson, gen. mgr.; C. W. Metcalfe, mgr.; R. E. Hanley, supt., Mammoth mine; J. H. Kervin, supt., Mammoth smelter; D. G. Stuart, cashier.

Inc. Aug. 2, 1904, in Me. **Cap.**, \$2,500,000; shares \$25 par; 60,000 issued, all owned by U. S. S. R. & M. Co.

Property: the Mammoth group which is the principal property, comprises 1,117 acres, patented, and 434 acres, unpatented, 3 miles N. W. of Kennett, on the Shasta route of the S. P. R. R. The orebodies consist of a series of long, flat lying lenses, occurring irregularly in a rhyolitic zone of pre-Devonian age, ore occurring mainly as replacements of porphyry in fissure and shear zones. Occasionally quartz phenocrysts are distinguishable, but usually little or no trace remains of the original rock. Ore as mined averages 4% copper and \$2 in gold and silver.

Development: consists of 5 tunnels, No. 5, the lowest serving as haulage tunnel. It is 10' wide, 8' high and supplied with 3' gauge track, 56-lb.

rail and electric haulage. The current production of 2,500 to 4,000 tons of ore daily comes from between the 600 and 2,100' levels, the 600 yielding a few cars of 17% ore each month.

Equipment: compressor plant with 4,960 cu. ft. capacity per min., supplies air for drills and two 175-h. p. motor generators supply electric motors with direct current. There is a full surface equipment and quarters for 600 men. Precipitating tanks are located below the tunnel to catch mine water and recover from it its contained copper in the shape of copper cement which is reduced at company's smelter into blister copper.

Production: was 251,907 tons copper and 44,766 tons zinc ore in 1915. Mining costs averaged \$1.56 per ton and exploration and development costs \$0.59 per ton.

In addition to the Mammoth mine proper, the company owns the following properties:

Friday Lowden group: 150 acres patented, 188 acres, unpatented, adjoining the Mammoth on the south, was acquired in 1915. Crosscut tunnel being driven is expected to cut the Mammoth ore zone 400' below No. 5 tunnel at 4,000' in. Was 1,500' long, May, 1916.

Spread Eagle group: 22 claims, 163 acres unpatented, 15 miles S. W. of Kennett, was bought in 1913. Shows large bodies of pyrite carrying low copper values. Exploration work being carried on and although no ore has yet been found, indications said to be favorable.

Stowell group: 10 claims, 188 acres, 128 patented, $\frac{1}{2}$ mile W. of the Spread Eagle group, was bought in 1916 was \$78,000. Exploration work has yielded a reserve of 48,100 tons of 3.71% copper ore carrying \$1.50 in gold and silver per ton. Transportation facilities will be provided and ore shipped to the smelter at Kennett.

Sheridan group: 45.7 acres, patented, belonging to the Balaklala Central Mng. Co., in which the Mammoth Co. owns 60% interest, is undeveloped, though surface indications are favorable.

Anderson group: 15 claims, 260 acres, unpatented, 4 miles N. of Kennett, was located 1914. Group covers an ore bearing zone and is being prospected. No ore of commercial grade has yet been found.

Butters section: 2,719 acres, patented, 2 miles N. of Kennett, in the Shasta county. copper belt, adjoins the Mammoth and Anderson groups. Is being prospected.

Little Mammoth group: 57 acres, patented, in the Old Diggins mining district, Shasta county, 6 miles N. of Redding and 6 miles S. of Kennett, was acquired to supply silicious ore for the Kennett smelter. Mine was formerly producer of gold bearing quartz, but ore now in sight is too low-grade to pay. Idle.

Buchanan Mine: 57 acres, patented, 7 miles from Raymond, Madera county, Calif., purchased 1909, contained a small vein of ore running high in copper, gold and silver. Ore was extracted and shipped and mine closed down.

Company also owns 195 acres, patented smelter site, $\frac{1}{2}$ mile N. of Kennett; 184 acres, patented town site and 657 acres additional tracts.

The Mammoth Co. also owns the Taylor iron mine, 14 miles from Nevada City, Nevada Co., Calif., comprising mineral rights to the Robinson and Sanford ranches. Orebody estimated to contain 188,047 tons of 1.65% copper ore carrying small gold-silver values and 47% sulphur. Ore is a heavy iron pyrite, low in silica, valuable for sulphuric acid manufacture. Property lacks railroad facilities.

The Mammoth Copper Mining Co. owns and operates a copper smelter at Kennett. The plant has 5 furnaces, 3 of which are in operation. The

plant has a capacity of 450,000 tons of charge per year. The smelter is equipped with a converter plant from which the blister copper is shipped to the refinery of the United States Metals Refining Co. at Chrome. Besides drills, etc., with complete electrical equipment.

the usual auxiliaries, the smelter is supplied with a large baghouse, the purpose of which is to render the emissions of the smelter harmless to agricultural interests. By reason of this baghouse it is the only one of the smelters in Shasta county which is permitted to operate; such permission having been obtained by a decree of the United States Court. As a by-product of the baghouse a fine dust is obtained which carries high values in various metals, and steps are being taken to recover the values, which it is expected will add materially to the revenues of the company. The smelter treats the whole output of the operating mines and is easily accessible from any of the mining territory in Shasta county which the company is exploring. The smelter is also treating custom copper ores originating in northern California and silicious ore from California, Nevada and Oregon. There are frequently found in the Mammoth group of mines copper bearing ore bodies that carry high percentages of zinc. The smelter is equipped with a sorting plant for these ores which turns out a high-grade zinc product. The smelter is equipped with a power plant, machine shop, boiler shops, round house, etc., to allow an uninterrupted and economical operation.

The ore is brought from the Mammoth Mines to the smelter by the company's system of transportation operating in 3 sections: 1st. It is drawn from the mine chutes into narrow gauge railroad cars and taken over a 2-mile electric railroad, equipped with two 25-ton locomotives, six 25-ton gondola cars and nine 10-ton flat cars, to a set of ore-bins. 2nd. From these bins the ore is taken down a steep inclined gravity railroad in skips to another set of bins. The gravity railroad has a length of 4,000' and a drop in this distance of 1,700'. The skips have a capacity of over 23 tons of ore and travel at a speed of 2,000' a minute. 3rd. From these lower bins the ore is taken to the smelter over a steam railroad operated with three 40-ton locomotives and 22 standard steel railroad cars. The capacity of the transportation system is ample for 1,500 tons of ore per day.

An electrolytic zinc plant to cost \$350,000 is to be built on Backbone creek a mile above the smelter, using same process as that in operation at Winthrop by the Bully Hill Copper Co. The new plant has 25,000 tons of baghouse dust to start with, that carries 23% zinc beside gold, silver, cadmium, bismuth and antimony.

Company employs about 1,200 men and the new construction work will require 50 more.

MAMMOTH MINING CO.

UTAH

Office: 409 Hooper Bldg., Salt Lake City, Utah. **Mine office:** Mammoth, Juab Co., Utah. **Officers:** Samuel McIntyre, pres. and gen. mgr.; Samuel McIntyre, Jr., v. p. and supt.; Col. R. M. Wilkinson, sec. **Inc.** 1881, in Utah. **Cap.,** \$10,000,000; shares \$25 par. Reincorporated Dec. 5, 1906, in Nevada. **Cap.,** \$1,000,000; shares \$2.50 par. Controls the Cleveland Mining Co., through ownership of 70% of capital stock.

Dividends: to end of 1915 were \$2,340,000, last one of 5c declared May, 1916. As a result of 9 years' litigation, a judgment in favor of the Grand Central Mining Co. was rendered, 1910, against the Mammoth Mining Co., and necessitated the levying of a 10c assessment, 1910, the first in the history of the company. Annual meeting, first Tuesday in February.

Property: 19 claims, in Tintic district. Mine opened about 1870, is developed extensively and has a 2,300' main shaft, the deepest in the Tintic

camp. Irregular shoots and chimneys of lead and copper ores occur, values being mainly in silver and lead.

Equipment: includes complete plant, installed 1910, 30-stamp mill and all necessary buildings. Produced about 20,000 tons, 1915. Shipping tailings from old dumps, 1916. Mine considered valuable.

MAMMOTH NO. 2 MINING & MILLING CO.

UTAH

Office: 409 Hooper Bldg., Salt Lake City, Utah. Mine at Mammoth, Juab Co., Utah. **Officers:** Wm. H. McIntyre, pres.; Samuel McIntyre, v. p. and treas.; Isaac Jennings, sec. **Inc.** 1900, in Utah. **Cap.**, \$300,000; shares \$1 par. assessable; fully issued. **Property:** 2 claims, patented, adjoining the Mammoth Mining Co., shows lead and copper ores. Idle several years.

MANGAS DEVELOPMENT CO.

NEW MEXICO

Office: Silver City, N. M. **Mine office:** Tyrone, Grant Co., N. M. **Officers:** Hon. Norman W. Haire, pres. and gen. mgr.; Jos. E. Saint, v. p.; M. W. Porterfield, sec. **Inc.** Oct. 2, 1909, in New Mexico. **Cap.**, \$500,000; shares \$5 par, of which 50,000 shares were issued, fully paid, in part payment for property, and 50,000 shares, half paid, rendered full paid by a \$2.50 assessment, levied 1910. First National Bank, Calumet, registrar. Annual meeting, second Tuesday in March.

All options have been surrendered and company owns only the Porterfield-Robinson and Midway Groups, which lie near the Chemung and Savanna mines, on the N. E. slope of the Burro mountains, 12 miles S. W. of Silver City.

The Porterfield-Robinson group of 22 claims, 353 acres, lies near the extreme S. W. edge of the favorable area of the district, the northern part being the more promising, showing iron stains, with some copper stains, and slip zones.

The Midway group of 15 claims, 10 fractional, 254 acres, carries the N. W. continuation of the ore zone of the Chemung Copper Co., and also lies near the Burro Mountain mine, with conditions markedly similar to those existing on these adjoining properties, on which large quantities of ore have been developed.

The orebodies are a combination of stockwerk and impregnation deposits, carrying values mainly along a series of small intersecting veinlets, with occasional masses of solid chalcopyrite up to several inches in size, but ore occurring mainly as minute particles of chalcocite, in veinlets, and as films on gangue rock. See Geology of the Burro Mts. Copper District by R. E. Somers, Bull. Am. Inst. Min. Eng., May, 1915, p. 957.

MANHATTAN BIG FOUR MINING CO.

NEVADA

Harry B. Ruhl, sec., Goldfield, Nev. L. K. Koontz, pres.; J. H. Thatcher, v. p.; C. Wilson, treas., with W. G. Saunders, directors. **Inc.** 1906, in Nevada. **Cap.**, \$1,000,000; outstanding, \$784,000; shares \$1 par. Listed on San Francisco Stock Exchange.

Property: 60 patented claims at Manhattan, Nye Co., Nev. **Development:** to 500' level by shafts. High-grade ore was extracted by early lessees and the ore remaining is exceedingly low-grade. About the only way to treat it profitably would be to mine the entire Big Four hill by steam shovels and even this method is uncertain. At last accounts Mushett and Wittenberg were trying to find the extension of the high-grade orebody.

Owens 100-ton mill, closed down 1913.

MANHATTAN COPPER MINING & MILLING CO.

NEVADA

Pioche, Lincoln Co., Nev. Company succeeded the Manhattan Gold & Copper Mining Co. and is owned by the Cons. Nevada-Utah Corporation, successor of the Nevada-Utah Mines & Smelters Corporation.

Property: 7 claims, one in the Ely mining district, developed by 120' shaft, showing manganese, iron, silver, lead ore. The other 6 claims are at Stampede Gap in the Highland district of Pioche and show small veins of silver-lead and copper ore. Developed by 130' shaft.

MANHATTAN DEVELOPMENT CO.**ARIZONA-MEXICO**

Office: Postoffice Blk., Houghton, Mich. A. O. Koppes, supt.; J. H. Rice, pres.; W. G. Rice, sec.-treas. Inc. March, 1905, in Arizona. **Cap.**, \$200,000; shares \$10 par; \$5.50 paid in.

Property: 37 claims, 600 acres, owned in fee, in the California district, near Paradise, Cochise Co., Ariz., carries upwards of 2 miles of the outcrop of a mineralized zone lying W. and N. of the holdings of the Chiracahua Development Co. **Development:** by several shallow shafts, deepest 80', and a 450' crosscut tunnel, latter showing leached ore and a little high-grade ore, with indications of permanent values at greater depth.

In 1913, company purchased the Arnold Mining Co. property, near Santa Cruz, Sonora, for \$88,000. This property is developed by a 300' shaft and has shipped 12% ore to the Camanea smelter. The company's previous operations have been mainly in the Yaqui region of Sonora.

MANHATTAN DEXTER MINING CO.**NEVADA**

Manhattan, Nev. **Officers:** A. G. Raycraft, pres.; C. F. W. Henberg, v. p.; Percival Nash, sec.-treas. Inc. in South Dakota. **Cap.**, \$1,500,000; shares \$1 par. Stock listed on San Francisco Exchange. **Property:** 1 patented claim, at Manhattan, Nye Co., Nev., operated intermittently by lessees in 1915-16.

MANHATTAN EXPLORATION CO.**MEXICO**

Office: 52 Broadway, New York. Mine at Hermosillo, Sonora, Mex. **Officers:** John M. Bishop, pres., Washington, D. C.; A. H. McCarthy, v. p.; T. Addison Bell, sec.-treas.; preceding with Gen. Jas. S. Clarkston and Wm. Tierney, directors. Inc. Feb. 6, 1909, in Maine. **Cap.**, \$2,000,000 shares \$100 par; \$1,806,000 outstanding. Company is a close corporation.

Property: 18 titled properties near La Dura in the Yaqui River district, central Sonora. Two of the properties, the Promontorios, silver-lead and the Mesita, copper-silver-lead ore, had just reached the shipping stage when the Mexican revolution stopped all operations, May, 1912. Company expects to resume operations as soon as country is once more safe.

MANHATTAN MINE.**NEW MEXICO**

Operated by R. J. Doyle and associates. **Property:** 10 patented claims, 200 acres, near Pinos Altos, Grant Co., N. Mex. **Ore:** containing gold, silver and copper, occurs in a fissure vein in diorite-porphry, 18" to 5' wide, strike N. 15° E.; dip almost vertical. Average assay said to be \$20 per ton. **Development:** 900' tunnel and 200' shaft below tunnel level. Claims to have shipped 1,200 tons of \$20 ore in 1915 and to have received \$26,000 from ore sales.

Preliminary development was undertaken by churn drills, with holes put down at 200' intervals. Drilling was suspended, 1910, but in 1911 an exploratory shaft was started on the eastern side of the Tulloch group, in high-grade carbonate ore, and reached sulphides at comparatively shallow depth. The Midway group when taken over, had 2 shallow shafts and a few pits, showing a little carbonate and silicate ore on the dumps.

Insufficient funds limited company's development plans, but management is good and property has a fair chance of developing into a large mine. Reorganization being planned, 1916.

MANILA MINING & MILLING CO.**WASHINGTON**

Keller, Ferry Co., Wash. **Property:** the Manila mine, 4 claims, with 20-acre reservoir and mill site, well timbered, in the San Poil district, 7

miles from the Columbia river and 4 miles W. of Ferry, the nearest rail station. The Manila mine is on the summit of a mountain and shows a large deposit of disseminated chalcopyrite ore, traceable 1,000'.

Development: by tunnels, the oldest 100' below the apex, another 150' lower. Said to be diamond drilling, 1916. Mine was under option for \$60,000 to the Keller Indiana Co., now bankrupt, which put up a smelter in 1906, but failed to develop mine and property supposedly reverted to Farr Bros. Has 20,000' saw mill.

MANITOU HILL COPPER CO.

ARIZONA

Office: care W. H. Brown, sec., 110 S. Third St., St. Joseph, Mo. **Mine office:** Globe, Gila Co., Ariz. **A. T. Hammons,** pres. and mgr. **Inc.** 1911. **Cap.,** \$1,250,000; shares \$1 par. Company is a reorganization of the Pinto Creek Mining & Smelting Co., and by consolidation later acquired the property of the Five Points Copper Mining Co.

Property: 70 claims, at the head of Pinto creek, about 10 miles S. W. of Miami, shows pre-Cambrian schists cut by granite and granite porphyry. Ore is low-grade.

The Pinto Creek group is developed by the 570' Yo Tambien shaft, showing a fair body of sulphide ore, the 70' Manitou shaft, and 8 tunnels, longest 2,200', with upwards of a mile of workings.

The Five Points group, some distance down the valley, is developed by the 150' Solace incline shaft, and the 350' Crackerjim shaft, sunk 1,500' apart. Property shows malachite near surface with some chalcocite at shallow depth.

Equipment: includes small steam plant and hoist at the Five Points mine, 6-h. p. gasoline hoist, 6-drill air compressor, and 250-ton concentrator at the Pinto Creek mine. Assessment work done, 1914. Company endeavoring to raise \$25,000 for sinking shaft to prove ore in commercial quantities.

MANSFIELD MINING & SMELTING CO.

ARIZONA

Office: 303 Midland Bldg., Kansas City, Mo. **Mine office.** Patagonia, Santa Cruz Co., Ariz. **Officers:** Frank D. Reasor, pres.; H. A. Sutermeister, v. p.; C. E. Sweet, sec.; Chas. L. Cookson, treas.; preceded with Harry J. Richards, A. W. Safford, and A. E. White, directors.

Inc. May 26, 1906, in Arizona. **Cap.,** \$8,000,000; shares \$1 par, nonassessable; issued \$7,156,905. Bonds, \$100,000 authorized, at 6%, all outstanding. Annual meeting second Monday in January. Company owns no mining property, but in the reorganization proceedings, 1914, acquired stock interests in the Ruby Copper Co. and Southern Arizona Mining Co. See Vols. VIII and XI, Copper Handbook, for early history.

MARBLE BAY MINE.

BRITISH COLUMBIA

Owned by Tacoma Steel Co.

MARIA MINING CO.

MEXICO

Office: 516 Providence Bldg., Duluth, Minn. **Officers:** Joseph Backno, pres., Virginia, Minn.; Jas. A. Butchart, sec.-treas., with Thos. F. Brady, Martin Trewhella, and Thos. A. Armstrong, directors. **Cap.,** \$500,000; shares \$1 par.

Property: the Carmen mine, in Arizpe mining district, Sonora. **Ore:** silver, gold, in veins in andesite and rhyolite. **Development:** by shaft; greatest depth 350', with 3,000' of underground workings. Has been idle since the revolution started, but reported March, 1916, that operations would be resumed.

MARICOPA MINES CO.

ARIZONA & NEVADA

Office: B. of L. E. Bldg., Cleveland, Ohio. **Earl G. Hill,** agt., Austin,

Nev. **Mine offices:** Morrystown, Maricopa Co., Ariz., and Austin, Lander Co., Nev. In process of reorganization, March, 1916.

Property: 33 claims, 611 acres, along the north contact of the Austin mineral belt. Principal property, 17 claims, at Austin, Nevada, shows four fissure veins in quartzite, ranging from 3' to 20' in width, traceable 1,400', and said to carry average values of about 4% copper, 50 oz. silver and \$2.80 gold per ton.

Development: by 4 shafts, deepest 800', and 5 tunnels, 2 longest being 2,000' and 830', with total underground openings of about 12,000'.

The Prosperity group, 16 claims, in the Wickenburg district, Arizona, shows granite and limestone, the ore occurring in fissure veins in porphyry. There are 6 known veins of 8 to 30' average widths, developed by numerous shafts, with about 1,800' of workings. Ore is mainly chalcocite, claimed by the management to carry average values of 9% copper, 11 oz. silver and \$11 gold.

Equipment: includes 2 small steam hoists and an air compressor at the Arizona property and a 75-h. p. gasoline hoist, 2 air compressors, machine shop, and necessary mine buildings on the Nevada property.

The 100-ton concentrator, in New York canyon, near Austin, has a Blake crusher, 2 rolls, 9 Card tables, 6 slime tables and a small cyanide plant.

New management reported to plan extensive work at Austin, extending main tunnel eastward toward Patriot, a crosscut tunnel 450' to cut three veins, and a drift on the Patriot in virgin territory. Sixteen men will be employed.

MARIE MINING CO.

ARIZONA

Breckenridge, Colo. Is a reorganization of the O'Reilly Gold Mining Co. Inc. 1915, in Arizona. **Cap.**, \$1,500,000. Owned by Haverhill, Mass., capitalists. **Property:** 51 acres on North Star Mtn., 10 miles S. of Breckenridge, Colo., said to show Witch Hazel and other veins of gold ore. **Development:** by 763' adit, expected to cut vein at 1,100', at depth of 1,000' below apex.

MARION MINES & MILLS CO.

COLORADO

Office: 850 Equitable Bldg., Denver, Colo. **Mine office:** Rye, Colo. **Officers:** Henry E. McElwain, pres.; John H. McElwain, v. p.; Jos. Gredlartz, sec.-treas.; preceding with John S. McElwain, Frank H. Bulkley and Clarence A. Brandenburg, Denver, directors. **Cap.**, \$300,000, increased from \$200,000, fully paid by \$100,005 cash, balance in property. Outstanding debts, Feb., 1916, \$96,262.

Property: the Greenhorn group, 19 claims, includes the Sam Davis claim, 10 acres, patented, 154 acres held by location, 11 acres under lease and bond and 7 acres mill site, a total of 185 acres mineral land in the Hardscrabble district, Custer county, Colo.

Development: by tunnel showing a vein of zinciferous copper and lead ore with small gold and silver values. Has water power, compressor and 100-ton concentrating mill. Erected a 100-ton flotation plant to treat tailings, 1915. Is a small producer.

MARIPOSA COMMERCIAL & MINING CO.

CALIFORNIA

Office: Alaska Commercial Bldg., San Francisco, Calif. Owns several mining properties near Mariposa, Mariposa Co., Calif.

The Green Gulch quartz mine, 1 patented claim, in Secs. 12 and 13, on the Mariposa Grant, 12 miles from Bagby; shows a 3' vein in slate. **Ore:** gold. **Development:** 300' shaft, and 550' tunnel, total underground workings about 2,500'. Equipped with hoist and compressor. At last accounts was being worked by lessees.

The Guadalupe quartz mine, Sec. 32, Mariposa Grant, 17 miles from Bagby, shows an 18" vein in granite; worked by lessees.

The Mariposa quartz mine, 1 patented claim, in Sec. 23, 16 miles from Bagby, formerly a large producer, is idle. In 1914 a roasting furnace and cyanide plant was being built to treat concentrates at the mine.

In Dec., 1915, suit was brought against the company by G. W. Langan for \$1,500,000, involving title to Mt. Bullion property, the Mariposa mine, and the town site of Ophir, alleging that company failed to fulfill contract to sell the properties after agreements to this effect had been arranged and the first payment made.

MARJORIE-STEWART MINING CO.

MISSOURI

Plater Bros., Joplin, Mo., owners. **Property:** a 20-acre lease on Raymond land at Porto Rico, Jasper Co., Mo. **Ore:** lead, zinc, in sheet ground formation at a depth of 165', assays 3 to 4% zinc. **Equipment:** includes 250-ton mill, completed 1915. At end of 1915 the property was producing steadily.

MARS CONSOLIDATED CO.

ARIZONA

Address: care F. J. Webber, Colorado Springs, Colo. Company is the successor of the Heckley Gold & Copper Mining Co. **Property:** 13 claims, in 3 groups, on Copper hill, in the Black Rock district, 6 miles N. E. of Wickenburg, Maricopa Co., Arizona, shows 3 veins of 6', 10' and 25' claimed average width, developed by a 268' tunnel, said to carry ore assaying up to 28% copper. Letters unanswered. Probably idle.

MARSH MINES CONS. CO.

IDAHO

Reorganized July, 1916, as Marsh Mines Consolidated Co. All stock will be exchanged for stock of the new company share for share. In addition, for each three shares of Marsh, a stockholder may subscribe for one share of new stock at 15c a share. One of the chief reasons given by the Board for shutting down the mines was that litigation with the Federal Mining & Smelting Co. threatened. The latter company owns mining properties to the south and west of Marsh, and at the time the mine was shut down and for some time previous, Marsh had been mining certain orebodies which extended underneath the surface of the Federal Mining & Smelting Co. ground. Marsh contends that it is the rightful owner of these orebodies under the apex laws. The operations were at a depth of 900' below the main tunnel level and approximately 1,300' below the surface. An exact examination of the rights of the Marsh Co. under these conditions cannot be determined without a great deal of exploration work and survey. The Federal Co. threatened Marsh with an injunction and with a suit for damages for removing the ore. This controversy has been settled. Since the annual meeting the following results have been accomplished by the new trustees:

1. Of the \$28,000 indebtedness outstanding on June 1st, \$20,000 have been placed with Duluth interests friendly to the company and will be carried until July, 1917, on the payment of interest only.

2. Under the agreement with the Federal Mining & Smelting Co., Marsh is given a lease for a period of 10 years on the Mono, Russell and O'Neil mining claims of the Tiger-Poorman group, which include the vein in controversy. This agreement provides for a complete settlement of all claims for alleged trespass.

3. Marsh is the owner of 75% of the capital stock of the Green Mountain Mining Co., the owner of 5 lode mining claims, all patented and adjoining Marsh ground. Negotiations to have these claims deeded to the Marsh Co. and the outstanding 25% stock interest delivered in exchange for treasury stock of the new company are pending.

4 Exploration work on the "Got-em-now" vein, exposed in the Gertie tunnel, which traverses the Marsh property, has been commenced. This vein was cut 512' from the portal of the Gertie tunnel and at a depth of 350' to 400' from the surface. It is a promising fissure vein. In the event that ore is encountered, it can be quickly mined by utilizing the present working shaft of Marsh now 900' deep and splendidly equipped to handle a large output.

Office: 601 Empire State Bldg., Spokane, Wash. **Mine office:** Wallace, Idaho. **Officers:** W. M. Lee, pres.; Edw. Pohlman, v. p.; W. T. Smith, treas.; Jos. McCarthy, sec.; W. Earl Greenough, mgr.; preceding are the directors. Is the successor of Marsh Mining Co., which was inc. 1909 in Washington. **Cap.**, \$1,500,000, increased to \$2,000,000 at time of reorganization in June, 1916; shares \$1 par. Stock of the old company convertible share for share for stock in the new company, and the unissued capital, 550,000 shares, offered for subscription. Company owns 310,000 shares **Queen Mountain Mining Co.** stock, controlling the company. Annual meeting June 13. Stock listed on Spokane Exchange and New York Curb. Assessments 1911-1915 aggregate \$150,000. Ore receipts \$507,977; 30,000 shares treasury stock sold 1916 at 30c. Deficit Jan. 1, 1916, \$75,332, reduced March 1, 1916, to \$32,000.

Property: 7 claims, about 100 acres in O'Neil gulch, N. E. of Burke and adjoining the Tiger Poorman mines. Claims show simple fissure veins in quartzite. The vein is 2' wide in the upper 175' tunnel, averaging 5' on the 5th level. It carries silver-lead ore with zinc in shoots, the orebody thus far developed being 300' long and 4½' wide. The shoot is short, limited by a fault, and must be developed in depth to get tonnage.

Development: includes a main working tunnel and 940' shaft with levels at 399, 550, 687 and 904'. Tunnel cuts the vein at 625' and a drift follows it for 475'. The vein runs north 70° west and dips 78° south. According to late reports, the ore on the 900' level is 200' long and contains but 75% as much ore per foot as level above, showing 1,300 sq. ft. stoping area averaging 4.3% lead, 4.3% zinc and 2.9 oz. silver per ton.

Equipment: includes 1,150' Ingersoll-Rand and 690' Franklin compressors, 300-h. p. Nordberg electric hoist, 40-h. p. Lidgerwood and two Ottumwa hoists, Gould and Cameron pumps, Ingersoll, Waugh & Wood drills, etc., with complete electrical equipment.

Company leases and operates the California or Pittsburg mill in Nine Mile canyon, 2½ miles from Wallace. Freight on Northern Pacific costs 15c a ton. The mill, remodeled at cost of \$34,000 in 1915, handles 150 to 225 tons daily, saving 90% of the lead and 85% of the silver. It contains 2 sets of 14"x30" rolls, 7"x10' tube mill, trommel lines, 4 Wood screens, 7 new concentrating tables, Pachuca agitator, Callow flotation cells, two 24"x10' Dorr thickeners, etc.

Ore is shipped to the International Smelting Co. at Tooele, Utah, under contract to April, 1917.

Production: 1914 was 2,931 tons ore and concentrates of \$61.01 gross value p. t. In 1915, 3,993 tons, averaging \$67.05 gross, or \$39.97 net value, smelter deductions being \$10.49 and freight and treatment charges \$20.59 per ton. Shipments averaged 44.83% lead and 23 oz. silver and realized 5.024c per lb. for lead and 50c per oz. for silver. Net returns from ore shipments have been as follows: 1911, \$30,313; 1912, \$114,648; 1913, \$139,429; 1914, \$81,944; 1915, \$143,640. The Marsh mine and mill were closed down about June 1 after operating a little more than 4 months in 1916, and producing 17,828 tons ore, which yielded 1,699 tons concentrates; net smelter returns said to be \$96,399.

The poor showing and pessimistic outlook of the manager's report is

probably due to disappointment over the showing on the 900' or 6th level. As expenditures of \$122,348 for capital account made in 1914-15 balanced ore sales, the property has really done fairly well, and if the orebody extends downward the mine will be profitable from now on.

MARSHALL & RUSSELL GOLD M. M. & T. CO. COLORADO

Idle. Office: 347 West Broad St., Columbus, Ohio. **Mine office:** Empire, Clear Creek Co., Colo. W. A. Miller, pres.; O. N. Marihugh, sec. and gen. mgr., at last accounts. **Inc. May, 1901, in Colorado. Cap., \$8,000,000; shares \$1 par, nonassessable; issued, \$7,000,000.**

Property: reported as 120 claims, with a 50-acre mill site. **Development:** by a 5,300' tunnel, planned to be driven for 12,000', piercing Miller, Covode and Red Elephant mountains. The tunnel shows veins with auriferous and argentiferous copper ores. **Equipment:** includes water power and 300-ton ore bins.

Property leased by directors for 100 years, but validity of lease is being questioned by some of the stockholders; legal proceedings were instituted in 1914.

MARY McKINNEY MINING COMPANY. COLORADO

Address: Colorado Springs and Cripple Creek, Colo. **Officers:** Chas. Castello, pres.; Daniel Thatcher, v. p.; John L. Nichols, sec.-treas.; preceding with John T. Hawkins and W. H. Spurgeon, directors. Dave Buckles, supt., Anaconda, (Cripple Creek) Colo.

Inc. 1892, in Colo., renewed March, 1912. Cap., \$1,500,000; shares \$1 par; outstanding February, 1916, \$1,309,252. Transfer office: 306 Exchange Bank Bldg., Colorado Springs. Colorado Title & Trust Co., Colorado Springs, registrar. Annual meeting, second Monday in February. Listed on Colorado Springs Exchange.

Treasurer's statement for 1915 shows: receipts practically all from ore sales, \$261,102; expenses and treatment charges, \$233,585; net income, \$27,517; compared with \$56,334 in 1914 and \$116,956 in 1912. Cash on hand end of 1915, \$92,132. All taxes paid and no liabilities. **Dividends:** to 1916, \$1,169,306; last dividend paid July 25, 1914, \$26,185.

Property: several claims, 144 acres patented, on west slope of Raven Hill, at Cripple Creek. First claim was discovered in 1891. In 1906, the property of the Anaconda Gold Mining Co. was purchased. **Ore;** gold, in LeClair and Mary McKinney quartz veins in phonolite. Ores carry tellurides in flourite, quartz and altered wall rock. (For geology of the Cripple Creek district, see U. S. G. S., Prof. Paper No. 54.)

Development: shafts to the 1,100' level; shaft being sunk to the 12th level. Total underground workings, about 13 miles. In 1915, 4,939' of new work was done, compared with 3,949' in 1914. Reported in May, 1916, to have cut an ore shoot on the 12th level, supposed to be the extension of the one cut on the 11th level in 1915.

Equipment: includes two plants, one with steam hoist, the other with 100-h. p. electric hoist, 200-h. p. electric compressor, boiler plant, machine shop, etc.

Company employs 40 men. There is also considerable work done by lessees; in 1915, 37% of output was result of leasing operations.

Production: gross to end of 1915, was 8,375,942. Output in recent years has been: 8,245 tons of ore in 1914; gross value \$214,657; in 1915, 11,408 tons, gross value, \$258,530.

Property is well managed. While yearly net income has been on the wane the last few years, the prospects of opening new ore reserves on the lower levels look good. A new ore shoot was discovered July, 1916, on the deepest (12th) level south, where a 10" streak of \$250 ore was found.

MARY MURPHY GOLD MINING CO.**COLORADO**

Offices: 420 Boston Bldg., Denver, and Romley, Chaffee Co., Colo.
Officers: Chas. C. Parson, pres.; Geo. E. Collins, v. p. and gen. mgr.; H. W. Robinson, sec.; John W. Hudston, treas., with Louis F. Eppich, directors.
 C. H. Swanton, mine supt.; H. L. King, mill supt.

Inc. May 20, 1909, in Colorado. **Cap.**, \$1,850,000; shares \$5 par; Jan. 1, 1916, outstanding \$1,790,500. Bonds authorized \$350,000; outstanding \$227,000. Majority of stock and bonds are said to be held in England. Stock transferred at company's office. Continental Trust Co., Denver, registrar. Annual meeting second Monday in March.

Comparative general balance sheet, year ending Dec. 31.

Total expenses.....	365,702	353,821	327,230
Profit	\$281,196	\$ 49,888	\$ 72,428
Deprec., interest, discounts.....	60,781	28,784	70,043
Net credit to profit and loss.....	\$220,415	\$ 21,104	\$ 2,385

Dividends: two of 7c per share each, paid in 1915. There was set aside in 1915, \$95,000 for acquisition of new property.

History: the Mary Murphy mine, discovered 1874, was not extensively worked until acquired by a St. Louis company in 1880. The yearly output 1880-1885 averaged about \$300,000 net from ores sold to smelters. The gross value was about three times as much. One third of the gross value of the ore was received by the mine, the remaining two-thirds being absorbed by smelting and refining charges, and by railway freight.

The first mill was erected in about 1886. Subsequently the property was leased and operated with varying success until about 1906. The lessees built mills at Romley and St. Elmo, and a smelter at Buena Vista. All of these plants were destroyed or dismantled, and the mine practically abandoned in 1906.

In 1909 the Mary Murphy G. M. Co. was organized; in 1910 active development work was commenced, and sufficient new ore opened up to justify the erection of a mill in 1912.

Property: 42 claims, mostly patented, 350 acres in Chalk Creek district, Chaffee county. **Ore:** contains gold, zinc, lead, silver and copper, in order of value, in a complex network or system of nearly vertical fissure veins in quartz-monzonite; the Mary Murphy is the main vein. Veins vary in width from 6" to 12', and contain shoots and irregular lenses of ore. Average assay of milling ore: 0.2 oz. gold; 2.7 oz. silver; 4.4% lead; 7.9% zinc; 0.5% copper. Owing to the erratic occurrence of the orebodies no estimate of ore reserves is possible.

Development: by tunnels with a shaft connecting the tunnel levels; length of principal tunnels, No. 7, 750'; No. 14, 1,500'; Golf, 4,350'. Total

underground workings about 7 miles; greatest depth of workings, 1,975' vertical from surface. In 1915 new work totaled 7,248' at an average cost of \$7.22 per foot. Shrinkage stoping is used.

Equipment: includes small hoist, 3 air compressors, 2 aerial tramways, and 175-ton concentrating mill. Steam power is used.

In the mill wet concentration is used followed by flotation of slime, using General Naval Stores oil; there is a 25-ton electrostatic separation plant for the zinc-iron middlings.

Production: in 1913, 14,428 oz. gold; 2,233,037 lbs. zinc; 3,321,313 lbs. lead; 146,606 oz. silver; 152,000 lbs. copper. Figures for 1914 and 1915 are not available.

Recent costs have been:

	Tons			Tram-		
	Milled	Mng.	Mlg.	ways	Gen'l.	Total
1915.....	55,880	\$3.20	\$1.99	\$0.12	\$0.25	\$5.56
1914.....	48,526	3.08	1.96	0.13	0.21	5.38
1913.....	34,271	3.45	2.04	0.24	0.30	6.03

Note: mining costs are distributed over a slightly larger tonnage than tons milled.

The Mary Murphy mine has seen its best days. At the beginning of 1916 available ore was considered sufficient to keep the mill operating for 6 months or a year as the tonnage opened up in 1915 did not make up for amount extracted. In view of these conditions the company created a reserve fund, which in 1915 amounted to about one-half the net profit; to be expended in the acquisition of new mining property, with the object of prolonging the life of the company after the exhaustion of the Mary Murphy mine.

MARY NEVIN GOLD MINING COMPANY. COLORADO

Cripple Creek, Colorado. **Officers:** W. G. Danford, pres.; R. S. Ellison, v. p. and sec.; H. J. Gehm, treas. **Cap.,** \$1,500,000; shares \$1 par. In treasury, Jan. 1, 1916, 38,000 shares. Listed on Colorado Springs Stock Exchange.

Property: the Mary Nevin and Hibernia patented claims, 10 acres, on Rosebud Hill. **Development:** by a 385' shaft on the Hibernia claim and a 200' shaft on the Mary Nevin claim; some drifting has been done. **Property** is under lease and is being operated through the Henry Adney shaft.

MARYANA MINING & LEASING CO. COLORADO

Cripple Creek, Colorado. W. A. Matlock, mgr. Inc. in 1914. In 1915 company had a lease on the Mary McKinney mine from the 8th level down.

MARYSVILLE GOLD MINING CO. MONTANA

Marysville, Mont. Is a proposition fathered by M. L. Hewitt, of Helena, Mont., assisted by Maurice Eisenberg, backed by Seligman & Co., 61 Broadway, New York. **Property:** 30 claims, near Marysville, which will be developed through the Spokane tunnel. Is not favorably regarded.

MASCOT COPPER CO. ARIZONA

Office: Harris Trust Bldg., Chicago. **Mine offices:** Dos Cabezas, R. V. Dixon, A. J. Baldwin, J. A. Street, J. W. Phillips and H. H. Evans, directors. T. N. McCauley, mgr.; J. W. Prout, Jr., supt.

Inc. July, 1907, in Arizona. **Cap.,** \$15,000,000; shares \$10 par; nonassessable. Outstanding 1,000,000 shares.

Property: 48 claims, 20 patented, 1,100 acres, about 300 acres being classed as mineral lands, in the Dos Cabezas district. Company also owns a town site near Dos Cabezas, and miscellaneous lands, including 3 placer claims, total holdings over 1,100 acres.

Property shows limestone near a granitic area, intruded by diorite dikes and quartz porphyry with a covering of rhyolite, on part of the ground.

The limestone shows in the lower hills on the south. Granite constitutes the two pillars known as Dos Cabezos.

The ore occurs largely in lenses in contact deposits between altered lime and porphyry and generally within a mineralized zone of from 300' to 400' in width. Ores carry chalcopyrite in a gangue of contact minerals with 3 to 20% copper, the average being 5%, and small gold-silver values.

Development: by the 450' Oregon shaft, and 2 tunnels, longest the 1,800' Consolidated tunnel, connecting with the shaft at the 4th level. Total underground openings aggregate 25,000', and ore in sight is estimated at about 500,000 tons. About 20,000' of diamond drilling has been done in various parts of the property. **Ore reserves:** said to be 500,000 tons, averaging 5% copper.

Equipment: includes a 250-h. p. distillate engine, a 12-drill air compressor, machine shop, electric lighting plant, smithy, telephone system and boarding house, with about 80 buildings. About 125 men are employed. In June, 1915, the company finished building the Mascot & Western R. R., a 15-mile line connecting the town of Mascot with the S. Pac. R. R. at Wilcox, Arizona, and at last reports was making shipments to El Paso.

The mine management is good and property is reliably reported as promising, though the company's advertising was lurid and its campaign of stock selling was regarded unfavorably in past years.

MASCOT MINING CO.

ARIZONA

Last address: 1318 Majestic Bldg., Detroit, Mich. Company not favorably regarded. See Copper Handbook, Vol. XI, for full description of properties. Letters neither answered nor returned.

MASCOT MINING & MILLING CO.

IDAHO

Offices: 212 Brooks Arcade, Salt Lake City, Utah, and Hailey, Idaho. **Officers:** Chas. Peter, pres.; John W. Choate, v. p.; J. M. Stevens, v. c. treas.; M. Barnett, asst. sec.; with W. R. Calvert and Paul Valtinke, directors. A. Rammelmeyer, supt.

Inc. March 6, 1915, in Idaho. **Cap.**, \$1,000,000; shares \$1 par; outstanding \$650,000. Annual meeting 1st Monday after 1st Tuesday in Oct.

Property: 8 claims, 4 patented, 150 acres, at Peter, near Hailey, in Warm Springs Creek mining district, Blaine Co., Idaho, said to show gold, silver and lead ore. **Development:** 110' vertical shaft and 400' tunnel. Management states that development work will be pushed in 1916, and a hoist and mill added to the equipment.

MASCOTA COPPER CO.

MEXICO

Office: 513 Germania Life Bldg., St. Paul, Minn. **Mine office:** Ameca, Jalisco, Mex. **Officers:** Chris D. O'Brien, Sr., pres.; J. M. Bowler, v. p.; Byron J. Mosier, sec.-treas.; Chris. D. O'Brien Jr., gen. mgr., at last accounts. **Inc.** June, 1908, in Arizona, as successor of Independence Mining & Smelting Co. **Cap.**, \$1,500,000; shares \$1 par.

Lands: 46 hectares, said to include an antigua mine, in the Guachinango division of the Mascota district, 24 miles from the Mexican Central line. The claims show an 8' fissure vein in porphyry, said to be traceable about 2,000' and proven to depth of 486'. The ore is reported to average 5% copper, 7 oz. silver and 6 grams gold per ton.

Development: includes 300' shaft and 375' tunnel, with 4,825' of workings, estimated to show 40,000 tons of ore, with 28,000 tons blocked out for stoping. **Equipment:** includes 50-h. p. steam plant, with 3-drill Sullivan air compressor, a 25-ton wooden stamp mill, with 10 Allis-Chalmers gravity stamps, and a small concentrator, equipped with 2 Overstrom tables, a vanner, 4 slime tables and a sizer. No recent information received. Probably closed down.

MASON VALLEY EXTENSION MINING CO. NEVADA

Idle. **Office:** 420 Boston Bldg., Salt Lake City, Utah. **Mine address:** Mason, Lyon Co., Nev. **Officers:** C. W. Reese, pres.; A. G. Gutheil, v. p. and gen. mgr., Price, Utah. G. M. Sullivan, sec.-treas.; preceding with R. S. Wimmer and J. H. Reese, directors. **Inc.** 1907, in Utah. **Cap.**, \$100,000; shares 10c par, assessable; issued \$80,000. Annual meeting, second Monday in May.

Property: 14 claims, patented, 180 acres, shows limestone, porphyry and granite, carrying fissure veins and contact deposits between limestone and porphyry. Developed by shafts and tunnels with about 1,000' of workings.

MASON VALLEY MINES CO. NEVADA

Office: 14 Wall St., New York. **Mine office:** Thompson, Lyon Co., Nev. **Officers:** W. H. Aldridge, pres.; Frank W. Holmes, v. p.; H. F. J. Knobloch, sec.; Henry E. Dodge, treas.; preceding with John F. Alvord, W. Mont Ferry, L. Timmerman, David E. Thomas and H. A. Gray, directors.

Inc. Jan. 4, 1907, in Maine. **Cap.**, \$2,500,000; shares \$5 par; increased March 14, 1910, from \$1,000,000, shares \$1 par; issued \$778,750. Bonded debt is \$869,500 in authorized \$1,000,000 first mortgage, 10-year, 6% gold bonds in \$500 bonds convertible previous to April, 1915, into stock on the basis of \$10 per share and redeemable on 31 days' notice at 102½ and accrued interest.

The mortgage contains a sinking fund provision, by which the company is required to pay to the trustee within 60 days after Jan. 1, each year, beginning 1912, 20c for each net dry ton of ore treated during the year preceding, with a provision whereby the sinking fund payments may be reduced proportionately, as outstanding bonds are retired. The directors were authorized by vote of shareholders, March 14, 1910, to issue any part of the unissued stock for acquisition of additional property.

Guaranty Trust Co., New York, and United States Trust Co., Boston, registrars. Bankers Trust Co., New York, and Boston Safe Deposit & Trust Co., transfer agts. Shares listed on Boston Stock Exchange.

Annual report of Dec. 31, 1914, gave cash on hand \$43,285, and total current assets \$310,831, with current liabilities \$43,106. The report shows a deficit of \$40,275 for 1914, which deducted from the surplus leaves a net credit to that account of \$307,186.21. Charges to Profit and Loss Account for 1914 include:

Depreciation	\$61,033
Int. on bonds and floating indebtedness.....	71,130
Expenditure on properties optioned, 1914 and relinquished..	43,801
Development of company's mine.....	26,791

Property: 7 claims, patented, 140 acres, and a fractional claim of 10 acres, known as the Spragg mine, lying south of the Bluestone and about 1½ miles west of Mason. Company also owns a smelter and 1,320-acre smelter site near the railway; also 320 acres of ranch lands. Claims show the strong outcrop of a contact deposit between limestone and andesite, partly covered by rhyolitic tuffs. The latter rocks are comparatively soft and have been eroded into steep escarpments and sharp gulches. Ore is of contact metamorphic character, being in altered limestone of 30' average width. Surface ore shows malachite with a little cuprite, succeeded, at about 100' depth, by cupriferous pyrite, largely massive, with copper in the form of chalcopyrite. The mine is said to have some ore averaging 10% copper, but the average tenor is about 3.5% copper. An average analysis shows 16 to 17% iron, 16 to 18% lime, 12% sulphur and 38% silica.

Development: has been done by means of crosscut tunnels driven from

the surface to the ore bearing zone. Drifts have been run N. and S. following the general course of the orebodies. Crosscuts have been extended E. and W. from the main drifts. The workings reach a depth of about 550'. The mine has been worked by the shrinkage stope system and good results have been obtained by this method.

The mine has developed a very considerable tonnage of low-grade carbonate and sulphide ores, with a smaller quantity of high-grade ores. Actual development work was begun March, 1907, and workings aggregated 23,107' on Dec. 31, 1914.

A 6,250' tramway, with drop of 600', of 100 tons hourly capacity, connects the mine with the Nevada Copper Belt railway, which line connects with the company's smelter 16 miles distant.

The smelter, built at a cost of approximately \$600,000, is about 2½ miles from Wabuska, on the Southern Pacific railway and about 16 miles from the mine. The plant consists of a sampling mill for custom ores, extensive storage bins, a blast-furnace building, with two furnaces of 1,800 tons daily capacity, a sintering plant, power house, machine shop, plate shop, smithy and carpenter shop. Two stands of 12' converters of the Great Falls type, were installed, 1913.

The smelter was blown in Jan. 16, 1912, and one furnace was in continuous operation to Oct. 20, 1914; during that period 290,586 tons of ore from the company's mine and 321,288 tons of custom ore were smelted from which there were produced 39,787,987 lbs. copper, 22,392 oz. gold and 392,304 oz. silver.

Custom smelting has been a feature of the company's operations and these shipments were almost entirely discontinued in August and September, 1914. Economic conditions made it inadvisable to operate upon Mason Valley ore alone and the plant was closed down in October, 1914. Still idle, 1916.

MASS CONSOLIDATED MINING CO.

MICHIGAN

Office: 79 Milk St., Boston, Mass. **Mine office:** Mass, Ontonagon Co., Mich. **Officers:** John W. Linnell, pres.; Theo. O. Nicholson, v. p.; Wilfred A. Bancroft, sec.-treas.; Elton W. Walker, supt.; preceding with Francis L. Maguire, Wm. F. Fitzgerald, Jas. B. Hill, D. Allison Carrick and Fred J. Schultheis, directors. E. Fenner Douglass, mill supt.; A. P. Bennetts, mg. capt.; Jos. Bice, master mechanic.

Inc. 1899 in Michigan. **Cap.**, \$2,500,000; shares \$25 par; issued, 97,317 shares; paid in \$23; \$8 paid on organization, balance in 10 installments; assessment \$2, levied May, 1911; \$1 in April, 1915. In treasury, Jan. 1, 1916, \$213,361. Company has paid off \$27,000 notes out of 1915 profit and now has no debts except current bills. Old Colony Trust Co., Boston, transfer agt. Gross earnings, 1914-15, \$852,338; operating expenses, \$684,864. An initial dividend of \$1 a share was paid Aug. 15, 1916.

Property: about 5,500 acres, lying in a very irregular but fairly compact tract, in Secs. 33, 34 and 35, T. 51 N., R. 38 W., in Secs. 4, 5, 6, 7, 8, 9 and 16, T. 50 N., R. 38 W., and in Sec. 1, T. 50 N., R. 39 W., holdings being bounded on the N. by the Union, Adventure and farm lands, on the E. by the Adventure and Toltec, and on the S. by various small holdings, and on the W. by the Flint Steel, Adventure and St. Mary's Mineral Land Co. Holdings include 4 old mines, the Ridge, Evergreen, Mass and Ogima, also 2 old prospects, the Merrimac and Hazard, joint production of which, under previous managements, was 11,131,023 lbs. fine copper. These 5 properties are described, in detail, in Vol. II, Copper Handbook.

The Mass tract carries 6 of the 7 cupriferous amygdaloidal beds of the Evergreen belt, these varying greatly in width from point to point but aver-

aging about 10', with a sharp bend in their strike, which varies from N. 32° E., on the north, to N. 37° E. at the southern boundary. The dip of the beds varies from 38° at the Ridge to 47° at the old Mass mine. The copper-bearing beds of the Evergreen belt on the lands of the Mass Consolidated are as follows, from north to south:

1. Knowlton. Carries heavy copper and stamp rock.
2. Mass. Lies 140' south of the Knowlton, and carries a little heavy copper and stamp rock.
3. North Butler. Lies about 75' south of the Mass bed, is wide and fairly mineralized in places.
4. Butler. Lies about 200' south of the North Butler, is 12' to 35' wide, carrying mainly stamp copper with occasional masses.
5. Ogima. Lies about 100' south of the Butler. Carries mainly stamp copper with some barrel-work, being 5' to 10' wide and showing some good ground.
6. Evergreen or Ridge. Lies about 250' south of the Ogima and is one of the best beds of the property, ranging 4 to 40' in width and usually being richest where widest. Is very bunched but shows some excellent stopes yielding heavy copper and stamp-rock of good grade.

7. New Mass. This bed which is the lowest of the series of the Evergreen belt and brings the number of cupriferous beds to 7, corresponding with the number in the adjoining Adventure property, lies about 120' under the Evergreen bed and was opened by crosscuts from "A" shaft on the 15th and 18th levels. The bed averages about 12' in width carrying considerable epidote and is very showy, but the copper is exceedingly fine, most of it being of a flaky nature, very deceptive to the eye. A mill test of the rock from this bed, 1909, gave a recovery of only 18 lbs. of mineral per ton.

Development: the Mass has openings on all its copper-bearing beds, and rock is hoisted through the nearest shaft, workings on each level being connected by crosscuts. The Mass carries the outcrop of the copper-bearing beds of the Evergreen belt for about 1½ miles. Shafts "A" and "B" are connected on the Butler lode down to and including the 10th level. The mine as a whole is notably rich in mass copper and carries silver values, but the ground is exceedingly bunched, ranging from very rich to absolutely barren. Considerable rock selection is made underground, bringing the average contents of stamp rock to about 16 lbs. per ton. About 50% of the rock broken is hoisted and about 25% of the recovery is in mass copper.

"A" shaft, 1,757' deep, with two compartments, sunk on the Evergreen bed has been abandoned.

"B" shaft, 875' S. W. of "A" has 3 compartments, and is bottomed at 1,857'. Levels are at variable intervals; those at considerable intervals permit a large saving in drifting through poor ground and sub-levels can be run where needed.

"C" shaft, 2,148' S. W. of "B" and bottomed on the 13th level, at the beginning of 1913, is the old Ogima shaft, sunk on the Butler bed, but the Evergreen bed is opened by a 400' crosscut on the 5th level. Some high-grade ground was opened in the 3rd, 5th, 7th and 9th levels west on the Butler bed during 1912. The company has concentrated work upon the Butler though work was also done on the Ogima and Knowlton beds, tributary to "C" shaft, in 1910, results on the whole being promising.

"D" shaft, 150' deep, is idle.

Considerable diamond drilling has been done south from the Evergreen bed into the horizon traversed by the so-called Adventure lodes, cut by diamond drills on the Adventure property, and also north of the Knowlton bed. Diamond drilling was done, 1910, in the N. E. ¼ of Sec. 5, to test

amygdaloidal and conglomerate strata outcropping at that point, which is quite a distance under the hypothetical horizon of the so-called Adventure lodes, with distance to the eastern sandstone undetermined.

The shaft rock house at "B" is equipped with a steam hammer, Blake crusher and a 12x24" Nordberg engine; "C" shaft has a steel shaft rock house; both have been equipped with devices permitting automatic handling of rock.

The central power house has a 24x48" Allis-Chalmers duplex hoist good for one-half mile depth. The power plant includes a 50-drill Rand 2-stage cross-compound air compressor, a 75-k. w. dynamo for electric light, and two 250-h. p. Stirling water-tube boilers.

In addition to the usual mine buildings, there are about 60 good dwellings. The company also has a town site, Mass City, which is the terminus of the Mineral Range railroad, and a station on the C., M. & St. P. railway; the village having a considerable population, with a number of hotels and business houses.

The Mass mill is at Keweenaw bay, on an arm of Lake Superior, at the junction of the Mineral Range and Duluth, South Shore & Atlantic railways, 16 miles S. of Houghton and 34 miles N. E. of the mine. Equipment includes 2 Nordberg stamps, 1,350 tons daily capacity.

The mill boiler house contains one 350-h. p. and two 200-h. p. Stirling water-tube boilers. Ashes and cinders are washed into the lake through a launder.

The pump house has a 16,000,000-gal. Nordberg vertical pump, connected with a tunnel running 300' under the bed of the bay to the intake.

Cost of mining was 14c per lb. in 1914 and 14.35c in 1915.

Ore reserves: 2,000,000 tons, Jan., 1916.

Production: begun 1899, with an output of 42,800 lbs. fine copper, gradually increased to 2,576,447 lbs. in 1903, decreasing thereafter, through loss of the Evergreen bed. Recent production has been as follows: 2,007,950 lbs. fine copper in 1905; 2,106,677 lbs. in 1906; 2,078,677 lbs. in 1907; 1,766,930 lbs. in 1908; 1,723,436 lbs. in 1909; 1,321,885 lbs. in 1910; 1,326,898 lbs. in 1911; 2,045,006 lbs. in 1912; 1,213,545 lbs. in 1913; 2,955,952 lbs. in 1914; 4,638,452 lbs. in 1915.

Rock being mined in 1916 averages 15 lbs. copper per ton, and production is about 450,000 lbs. monthly compared with 390,000 lbs. in 1915.

The Mass Consolidated has had every sort of misfortune that befalls mines, but, through the acquisition of the Evergreen Bluff property, has been placed in better mining position than ever before. The experience of 14 years has given a thorough knowledge of the vagaries and possibilities of the 7 cupriferous beds of the Evergreen belt; though bunchy, two of the number are of real promise, the Evergreen and Butler. It is probable that other beds can be worked occasionally, but the future of the mine rests on the Evergreen and Butler beds. There also is the possibility of locating and developing other and richer beds to the southward of the main workings, in the horizon of the Lake and Adventure beds. Earnings for 1916 will approximate \$450,000, or about 50% yearly on the current price of stock. Company is reported, July, 1916, to have \$350,000 cash in the treasury, which with further earnings will enable the management to open a new shaft and continue exploration of the property. The management is both progressive and experienced.

MASSEY STATION MINING CO., LTD.

ONTARIO

Office: 25 St. Vincent St., Toronto, Ont. Mine near Massey, Ont.
Officers: Wallace, Nesbitt, pres.; S. H. P. Pell, v. p.; Britton Osler, sec.; preceding, with Robt. Means Thompson and Miss I. M. Innes, directors.

Inc. April 24, 1901, in Ontario. **Cap.**, \$300,000; shares \$100 par; nonassessable; fully issued. Company is said to have expended about \$300,000 on development and equipment.

Property: 840 acres, crown granted, including 480 acres timber land, in Salter township, Sudbury district, about 3 miles from a railway. Lands show schist and quartzite carrying lenticular orebodies in E.-W. zones with 75° dip. There are 3 parallel lenses, 2 developed averaging 10' in width in an ore zone traceable about a mile. Ore carries finely disseminated chalcocite and gray copper ores in quartzose gangue changing in depth to bornite and that in turn to chalcopyrite, estimated by management to average 3 to 5% copper and \$1 to \$2 gold per ton, with about 50,000 tons in sight.

Development: by a 600' shaft and 150' tunnel. **Equipment:** includes a 200-h. p. steam and electric plant, with 2 Lidgerwood hoists, a 6-drill compressor and 15 buildings.

The ore not being adapted to wet concentration, owing to excessive sliming, a 50-ton experimental mill was built, using the Elmore vacuum oil flotation process, with Blake and centrifugal crushers and 3 Jenckes and Wilfley tables. Property closed down in 1909 owing to failure of mill to make expenses.

MATAHAMBRE MINE.

CUBA

Manuel Luciano Diaz, owner, Apartado 1795, Havana, Cuba. C. L. Constant & Co., 42 New St., New York, engineers. Shipping point, port Santa Lucia. The mine is located in the western end of the island in Pinar del Rio Province.

Production began in Dec., 1913, and by April, 1914, company had shipped over 8,000 tons ore, averaging 18% copper and 1.5 oz. silver per ton. In 1914 nearly 6,000,000 lbs. copper were shipped. In 1915 production was about 40,000 tons of 12% ore. Developed to 300' depth, and employs about 300 men.

Plans building a concentrator to treat second-class ore.

MATHESON LEAD CO.

NEW YORK

Is a subsidiary of the National Lead Co. **Office:** 11 Broadway, New York. Works at Long Island City, N. Y. **Officers:** W. J. Matheson, pres.; R. P. Rowe, v. p.; E. J. Cornish, treas.; with W. W. Lawrence, R. A. Shaw, directors; M. D. Cole, treas. **Inc.** in New York. **Cap.**, \$1,000,000; shares \$1 par. Entire stock issue owned by the National Lead Co. Authorized bond issue, \$1,000,000, 5% bonds, due April 1, 1929. Operates a 10,000-ton plant for the manufacture of white leads and oxides.

MAVERICK COPPER CO.

ARIZONA

Florence, Pinal Co., Ariz. Geo. Lobb and Eugene Woodbury, managers. **Property:** known as the Iron Spring mine, shows a strong outcrop, carrying finely disseminated chalcocite, estimated to average 3% copper. **Development:** by a shallow shaft and a number of prospect pits and shafts. Annual assessment work only has been done since 1910, when the Copper Queen Co. relinquished its \$100,000 bond on the group.

MAXFIELD MINE.

UTAH

Operated by Boston Development Co.

MAY DAY MINING & MILLING CO.

UTAH

J. C. Dick, gen. mgr., P. O. Box 1418, Salt Lake City. Mine at Eureka, Juab Co., Utah. **Officers:** John Dern, pres.; M. P. Braffet, v. p.; A. Reeves, sec.; W. S. McCornick, treas.; with J. C. Dick, directors.

Inc. 1896 in Utah. **Cap.**, \$200,000; shares 25c par; assessable; all outstanding. Stock transferred at company's office. Annual meeting, first Monday in April. Listed on Salt Lake City Exchange.

Financial report for year ending March 31, 1916, shows: cash on hand March, 1915, \$21,656; received for ore, etc., \$188,340; total, \$205,996; of this amount dividends absorbed \$96,000 and expenses \$80,035, leaving cash on hand March 31, 1916, \$29,961. **Dividends:** paid to April 1, 1916, \$252,000. Last dividend, 2c per share, paid May 25, 1916.

Property: 6 claims, 5 patented, 60 acres, in the Tintic mining district. **Ore:** zinc, silver and lead in limestone. **Development:** by 1,100' vertical shaft and 1,500' tunnel. The mine has been practically out of ore several times; at one time the supply was so low the stock dropped to 1c per share: the larger part of its dividends has been paid since then.

Equipment: includes 50-h. p. electric hoist and compressor, capacity 250 cu. ft.

Production: for year ending March 31, 1915, 1,786 tons lead ore, valued at \$60,088; silver ore at \$4,342; 447 tons zinc ore, and 1,313 tons lead ore from contiguous leased territory, valued at \$27,065. The output for 1915-1916 is not available, but earnings are said to be \$10,000 monthly. Regular shipments are being made, but production is not large.

Development work is being carried on with the hope of finding new orebodies, though it is said the present rate of production can be maintained for some time even if none are found. Part of the property is leased, and company itself leases part of the Chief Consolidated ground.

MAYFLOWER MINING CO.

MICHIGAN

Office: 705 Sears Bldg., Boston, Mass. Mine office: Houghton, Houghton Co., Mich. **Officers:** Chas. J. Paine, Jr., pres.; Geo. P. Gardner, v. p.; preceding, with Harry F. Fay, Geo. E. Clarkson, A. L. Dickerman, F. W. Nichols, directors. Arthur E. Coe, sec.-treas.; Geo. S. Goodale, supt. Inc. 1899 in Michigan. **Cap.,** \$2,500,000; shares \$25 par; \$10 paid. St. Mary's Mineral Land Co. owns 25,000 shares of the capital stock. American Trust Co., Boston, transfer agent. Old Colony Trust Co., Boston, registrar. Company had \$53,020 cash on hand, Jan. 1, 1916. Expenses were \$52,990 in 1915. Annual meeting, third Wednesday in March.

Property: 840 acres, near Calumet, Mich., between the Kearsarge and Old Colony mines and east of the South Kearsarge and Wolverine mines. Lands comprise Secs. 7 and 8. T. 56 N., R. 32 W. Prospecting, begun in 1899, was continued 5 years. No. 1, or Faull shaft, 400' deep, has considerable drifting on the 1st and 2nd levels and a crosscut opens 2 parallel cupriferous amygdaloids, showing occasional patches of copper, but nothing of promise.

Development: four shafts. No. 2, or Isle Royale shaft, 160' deep, has several hundred feet of drifting and shows a bunchy amygdaloid, 10 to 12' wide, carrying more or less copper in a 2' streak next to the hanging wall. No. 3, 60' deep, in a badly broken amygdaloid. No. 4 shaft, 580' deep, starts from surface on an unnamed amygdaloid, lying approximately 2,000' east of the Kearsarge bed and at a depth of 425' runs into a parallel amygdaloid lying 90' to the eastward of the first bed. The copper showing is poor.

A fairly complete geological cross-section has been obtained by diamond-drill borings and exploratory work was resumed July, 1909, after 3 years' idleness. Up to date 41 holes have been put down which, together with the holes on the Old Colony tract, prove up a big and well mineralized amygdaloid bed, called the Mayflower lode, for a distance of 6,000' and a depth of 1,500'. The lode lies on the extreme eastern side of the copper range, near the Eastern sandstone. In 1915 only 800' of drilling was done; hole No. 42 was bottomed at 2,569'. Hole No. 2, started north of No. 41, had reached a depth of 1,500', June, 1916.

Thirteen holes on the Mayflower and 10 on the Old Colony ground

showed commercial ore; hole No. 20 showed 101' of 1.65% rock; hole No. 22, nearby, showed 100' of 1.2% copper ore, 60' of which carried 1.9%; holes Nos. 16 and 17, in this locality, showed 87' and 95' widths.

Company had about \$50,000 cash in Jan., 1916, with which to continue drilling.

MAZAPIL COPPER CO., LTD.

MEXICO

Office: 47 Peter St., Manchester, England. Mine address: Aptdo. 64, Saltillo, Coahuila, Mex. **Directors:** Alfred Crewdson, chairman; John Seacombe Burrows, W. A. R. Heaven, Jacob Higson, Chas. Hopkinson and Jas. Wm. Purcell. **Inc.** Feb. 18, 1891, and reincorporated April 21, 1896, in Great Britain. **Cap.** increased 1903 to £300,000, shares £10 par, and again increased 1912 to £500,000, shares £1 par; issued, £422,490. Debentures, £120,000, at 6%. Has paid several dividends: 20% in 1910; 20% and a 5% bonus in 1911.

The company is a private concern and does not care to give details concerning its mining operations. Company owns and operates the Coahuila and Zacatecas railway, running from Saltillo to Concepción del Oro, 2 smelters and various mines, employing over 4,000 men normally. Operations were suspended June, 1913, by the Mexican revolution, and property is still idle.

Property: about 850 hectares of mineral land in 4 principal groups. The Aranzazú and Cabrestante mines, carrying copper ores, are the most important; the San Eljío, Naranjera, Cajón, San Francisco and Protrero mines, carrying silver-lead ores, and the Promontorio group, producing mainly fluxing ores. Copper ores occur in irregular masses, in limestone, near granite-porphry contacts.

The various mines of the company have 83 different shafts and tunnels, many of which are small and worthless, remaining from old operations, with upwards of 25 miles of workings.

The smelters are at Concepción del Oro and Saltillo. The first named, of about 800 tons daily capacity, has 4 copper furnaces. The Saltillo smelter, built 1906, has a lead plant of 300 tons daily capacity and does a general custom business, as well as treating ores of the company. There are 3 blast furnaces and 1 reverberatory furnace. Transportation is by 4 aerial trams.

The Ferrocarril Coahuila y Zacatecas has 166 kilometres of main line. **Production:** 1912, was 13,556,208 lbs. copper, 15,024,485 lbs. lead, 8,463,536 lbs. zinc, 1,572,012 oz. silver and 15,560 oz. gold.

MAZATAN COPPER & GOLD MINING CO.

MEXICO

Letter returned from 60 State St., Boston, Mass., Dec., 1915. Mine at La Colorada, Sonora, Mex. Fully described Vol. XI, Copper Handbook. Probably closed down.

McALPINE MINES CO.

CALIFORNIA

Coulterville, Mariposa Co., Calif. **Officers:** Frank R. Whitcomb, pres. and gen. mgr.; C. L. La Rue, v. p.; A. L. D. Barnard, sec.; Fannie W. McLean, treas.; with M. C. Hassett, directors. **Cap.**, \$1,500,000; shares \$1 par; fully paid and nonassessable.

Company was formed by California people to reopen the old McAlpine mine on the Mother Lode, Tuolumne Co., near the line between Tuolumne and Mariposa counties. The mine was a well-known producer in the 60's.

Property: 120 acres, covers 2,100' on the strike of the Mother Lode, including the water rights of Moccasin Creek. The new management plans to sink the shaft from its present depth of 456' to 500' and to develop that level in addition to reopening part of the old workings.

Equipment: includes a Fairbanks-Morse hoist, a 55-h. p. motor and a

5-drill air compressor. Electric power is obtained from the Pacific Gas & Electric Co.

McCONNELL MINES CO.

NEVADA

Office: Yerington, Nev. **Mine office:** Mason, Lyon Co., Nev. O. H. Sonne, pres.; S. B. Elbert, sec. and mg. engr.; preceding, Mrs. O. H. Sonne and Mrs. S. B. Elbert, directors. **Inc.** Sept. 14, 1912. **Cap.**, \$500,000; shares \$5 par; issued, 40,002 shares.

Property: 10 claims, 160 acres, patented, adjoining the Yerington Malachite mine on the west. Claims show limestone, shale and granite with argentiferous contact deposits in the contact zone near the granodiorite. Property has 4 orebodies, 2 under development averaging 25' in width and carrying about 3.5% copper.

Development: by 400' shaft and 3 tunnels. **Equipment:** includes a 25-h. p. hoist, 7-drill air compressor and 8 buildings.

Production: 1912, was 1,074,289 lbs. fine copper, secured from 16,284 tons of ore smelted and at a total cost of about 14 cts. per lb. No later information received. Property regarded as good.

McDONALD-ELY COPPER CO.

NEVADA

Office: Boyd Park Bldg., Salt Lake City, Utah. **Mine address:** J. P. Turner, supt., Ely, White Pine Co., Nev. **Officers:** D. C. McDonald, pres. and gen. mgr.; Col. Enos A. Wall, v. p.; Geo. W. Parks, sec.; Frank Knox, treas.; preceding, with Frank J. Westcott, Geo. W. Lamb and Hon. Thos. Kearns, directors; E. P. Jennings, cons. engr. and mgr. **Inc.** Nov., 1906, in Utah. **Cap.**, \$1,000,000; shares \$5 par; nonassessable; issued, \$790,000. Debentures, \$100,000, at 6%, maturing Nov. 15, 1915. Shares are listed on the Salt Lake Stock Exchange.

Property: 28 claims, patented, 325 acres, 19 claims held under bond and lease. Property, on the lime belt, in the N. E. part of the Ely district, carries 4 contact deposits, between porphyry and limestone, showing prominent iron outcrops. Management estimates veins as 20' wide carrying oxidized ores, assaying 1 to 40% copper, and about 80 cts. gold per ton.

Development: is by the 415' Wall tunnel, showing 21' of heavy iron. The mine as a whole has about 3,000' of workings.

Equipment: includes a 25-h. p. gasoline hoist, 40-h. p. steam hoist, and a 6-drill Ingersoll-Sergeant air compressor. There are 6 buildings, including necessary shops. A pumping plant and pipe line supply water from a spring at nearby ranch.

An old 50-ton mill, with rolls and cyanide plant, remains from a former ownership. The 100-ton concentrator has a gyratory crusher and 3 trains of rolls. In May, 1914, drifting was in progress. Ten men employed. Property considered promising and management good.

McINTYRE EXTENSION MINES, LTD.

ONTARIO

Office: Traders Bank Bldg., Toronto, and Schumacher, Ontario. **Officers:** Alex. M. Hay, pres.; L. J. Pashler, sec.-treas.; preceding, with W. J. Sheppard, J. B. Tudhope, Sir H. M. Pellatt, J. P. Bickell, Alex. Fasken and C. M. Bushnell, directors; R. J. Ennis, supt.

Inc. July 16, 1915, in Ontario to take over the property of the Pearl Lake Gold Mines at Porcupine. **Cap.**, \$2,500,000; outstanding Feb. 10, 1916, \$2,000,001; shares \$1 par. Controlled by McIntyre Porcupine Mines, Ltd. Trust & Guarantee Co., Ltd., Toronto, transfer agent and registrar.

Payment was made by the McIntyre Co. of \$47,733.30 in satisfaction of all claims of creditors of the Pearl Lake Co. (except claim of B. E. Cartwright), for which the McIntyre Co. received 1,020,000 shares of the McIntyre Extension Co., Mr. Cartwright receiving 980,000 shares in satisfaction of his claim of \$175,000.00 for money advanced by him to the Pearl

Lake Co. as admitted and passed by the assignee. A further payment of \$2,500 was made to Mr. Cartwright for 25,000 shares of the Extension Company at 10c per share to enable him to satisfy certain claims which would have delayed the deal and involved a serious loss of time.

The McIntyre Co. has agreed to expend \$18,000 at the rate of \$1,000 per month, for which it gets treasury shares of the Extension Company at 10c per share.

Property: 4 claims, patented, 127 acres, adjoining McIntyre-Porcupine Mines, Ltd., Tisdale Twp., Sudbury district, carries gold ore. (See McIntyre Porcupine Mines, Ltd., for geology.)

Development: 3-compartment vertical shaft, completed in April, 1916, to a depth of 1,000'; shaft was continued to 1,083' depth in order to make provision for ore and waste pockets below the level. This shaft will be the central hoisting shaft on the north side of the McIntyre property. A cross-cut has been started on the 1,000' level, towards McIntyre No. 5 shaft, in order to intersect at this depth the orebodies said to have been proven at 750' depth by diamond drilling; this crosscut was to be finished in June, and a raise started to connect with No. 5 shaft at the 700' level.

Equipment: includes electric hoist and electrically-driven air compressor.

McINTYRE-JUPITER MINES, LTD.

ONTARIO

Office: Traders Bank Bldg., Toronto. Mine near Schumacher, Ont.
Officers: Geo. E. Drummond and K. F. Mackenzie, directors, representing the Jupiter Co. Inc. 1915 in Toronto to take over property of Jupiter Mines, Ltd. **Cap.**, \$2,000,000; shares \$1 par. McIntyre Porcupine Mines, Ltd., subscribed for 955,000 shares of this stock at a price of \$152,000, of which \$60,000 was paid by end of 1915, the balance payable at the rate of \$5,000 per month as working capital for the new company. Stock is issued to McIntyre Porcupine Mines, Ltd., as paid for; 380,000 shares being delivered against the payment of \$60,000, the remaining shares deposited in escrow with the Toronto General Trusts Corp., to be delivered to McIntyre Porcupine Mines, Ltd., monthly in proportion to amount paid. Jupiter Mines, Ltd., received 943,893 shares in capital stock of the new company, and the sum of \$60,000.

An agreement was made between the 3 companies by which the McIntyre company agreed to mill the ore of the new company for \$2 per ton net weight, guaranteeing an extraction of 95%.

Property: 79 acres on the north shore of Pearl Lake and adjoining Porcupine Mines, Ltd. **Ore:** gold occurs in veins in a belt of schistose rocks, which are largely altered volcanics. Occasional bands of schistose quartz-porphry are found in the mine. Veins are lenticular in structure and often consist of interbanded quartz and schist.

Development: vertical shaft to 475' level. The mine had been idle for some time; in 1914 it was worked under option by McKinley-Darragh-Savage Mines, Ltd., but option was allowed to lapse. By May 1st the shaft was in operation to the 300' level. Ore will be conveyed to No. 5 shaft on the McIntyre and from there by aerial tramway to the McIntyre mill.

It is proposed to run a drift from the 600' level of the Pearl Lake shaft across the full width of the Jupiter property 12,500', to connect with the existing shafts. The new company has the advantage of the McIntyre organization, in addition to being able to minimize overhead expense.

McINTYRE PORCUPINE MINES, LTD.

ONTARIO

Office: Traders Bank Bldg., Toronto, and Schumacher, Ontario.
Officers: Alex. M. Hay, pres.; Sir H. M. Pellatt, v. p.; with J. P. Bickell, I. J. R. Muurling, C. B. Flynn, W. J. Sheppard, J. B. Tudhope, directors; P. Vander Woort, sec.; R. J. Ennis, mgr.

Inc. March 16, 1911, in Ontario. **Cap.**, \$3,000,000; shares, \$1 par; outstanding, \$2,986,985. Toronto General Trusts Corp. and Security Transfer & Registrar Co., New York, transfer agents and registrars. Annual meeting, first Monday in February. No dividends paid to 1916. Traded in on New York Curb.

Funded debt: first mortgage 7% 5-year gold bonds, due Aug. 15, 1918; interest February 15 and August 15, at office of the trustee, Toronto General Trusts Corp. Coupon, \$500, registrable as to principal. Authorized \$250,000; redeemed, \$100,000; unissued, \$62,500; purchased \$56,500; outstanding \$31,000. One-fifth of issue may be redeemed at par and interest at end of first year, and the whole or any part of the balance of outstanding bonds at 105 and interest at end of second year.

Company owns a majority stock interest in the McIntyre-Jupiter Mines, Ltd., and in the McIntyre Extension, which two companies control the Jupiter and Pearl Lake properties.

Comparative General Balance Sheet: year ending March 31st—

Assets:	Plant &	Capital	Inv'mts.	Disc. on	Current	Total
	Equip.	Devel.		Sec. Sold		
1916.....	\$2,921,991	\$209,508	\$175,036	\$211,992	\$151,963	\$3,670,490

Comparative Operating Account: year ending March 31—

	Receipts	Disbursements			P. & L. Acct.
		Mine	Mill	Miscel.	
1916.....	\$775,821	\$265,622	\$102,389	\$80,286	\$327,524
1915 (a).....	749,234	319,203	101,354	95,923	232,752
(a) 15 months, ending March 31.					

Property: located on the south, west and north sides of Pearl Lake, Tisdale Twp., comprises 145 acres, of which 113 acres are under Pearl Lake and Gillies Lake. The McIntyre Extension Mines, Ltd., and Jupiter Mines, Ltd., both adjoining McIntyre Porcupine on the north, are described, the first under its title, the latter under McIntyre-Jupiter Mines, Ltd. This consolidation was part of a general plan to strengthen the position of the McIntyre Co. by extending its operations on orebodies worked within its own boundaries to extensions on adjoining properties.

Geology: the north and south sections of the property show areas of altered volcanic schist, basalt and associated lavas; between them there is a broad band of schistose quartz porphyry. Veins are classified in the following systems: veins in the basalt and gray schist and veins in the contact between the quartz porphyry and gray schist on the south side of Pearl Lake; No. 5 vein and veins in the contact zone paralleling the north contact between the quartz porphyry and the basalt on the north side of Pearl Lake, veins in the quartz porphyry.

Exploration has shown that the best deposits of gold occur in the altered volcanic schist, at or near the contact with the quartz porphyry; development in the quartz porphyry away from the contact has not shown much gold. Orebodies are lenticular in form and very irregular; the ore shoots consist of quartz more or less interbanded with mineralized schist. The location of orebodies has been rendered difficult by the presence of compression faults which have displaced portions of the ore as much as 130'.

Development: by shafts; No. 1, 300' deep; Nos. 2 and 3, each 90' deep; No. 4, 600' deep; No. 7, 700' deep. No. 4 will be sunk to the 700' level in the near future. The Pearl Lake shaft, 1,083' deep, located 400' from the Jupiter line and 300' from the McIntyre line, will be the main working shaft for that part of the property. Development work during last fiscal year totaled 6,534' in addition to 5,787' of diamond drilling, compared with 4,879' new work and 3,046' diamond drilling during previous year.

Ore reserves: due to form and occurrence of orebodies, it is impracticable to attempt to block out ore in the usual manner.

Date—	Tons	Aver. Value	Total Value
Mar. 31, 1916.....	201,920	\$11.12	\$2,247,128
1915.....	109,693	7.79	854,436

In the Jupiter workings, there is said to be a considerable tonnage available for stopping.

Equipment: property is well equipped with hoisting and milling facilities, the latter including a 450-ton cyanide plant. The ores yield a larger per cent of their gold content to the simple treatment of grinding in cyanide solution and giving them a short period of agitation.

From the beginning of operations to March 31, 1916, the property produced \$1,800,241 in gold bullion, the result of milling 237,891 tons ore, average value \$8.10.

Production:	Tons		Rec. %	Costs per Ton—			Profit per Ton
	Milled	Val. per T.		Mine	Mill	Tot. Optg.	
1916 (a).....	105,758	\$7.71	95.6	\$2.51	\$0.96	\$4.28	\$3.09
1915 (b).....	85,654	8.87	94.4	3.72	1.18	6.02	2.35
1913.....	31,979	7.85	89.8
1912.....	14,500	7.00	75.0

(a) Year ending March 31. (b) 15 months, ending March 31.

Mine development during the past two years has shown steady improvement. The lower levels so far as opened up have proven to be as productive as the upper levels, while lateral development on the upper levels has cut new orebodies. The results of the underground work, in addition to the control of the adjoining properties, assures a productive life to the company.

McKINLEY-DARRAGH-SAVAGE MINES, LTD. ONTARIO

Offices: Canada Life Bldg., Toronto, and Cobalt, Ont. **Off ers:** J. R. L. Starr, pres.; Thos. W. Finucane, v. p.; J. H. Spence, sec.; Harper Sibley, treas.; Jos. S. Hunn, asst. treas.; with H. W. Sibley and G. L. Thompson, directors; T. R. Finucane, mgr. **Inc.** 1906 in Ontario. **Cap.**, authorized \$2,500,000; issued, \$2,247,692; shares \$1 par. Traded on New York Curb.

Comparative General Balance Sheet:

Assets:	McK.-D.		Reserve			Total
	Mine & Plant	Sav. Mine & Plant	Bennett Claim	Current	Inv., Etc.	
1915.....	\$1,385,728	\$689,104	\$100,000	\$444,166	\$7,731	\$2,626,729
1914.....	1,402,798	694,168	100,000	447,852	7,716	2,652,534

Liabilities:	Capital Stock	Surplus	Govt. Tax	Current	Total
1915.....	\$2,247,692	\$280,299	\$2,500	\$96,238	\$2,626,729
1914.....	2,247,692	313,935	4,000	86,907	2,652,534

Comparative Statement of Operations:

	Gross Oper. Profit	Deductions	Net Oper. Profits	Interest	Total Net Profits
1915.....	\$260,424 (a)	\$28,991	\$231,433	\$5,224	\$236,657
1914.....	328,850 (b)	30,876	297,974	9,678	307,652
1913.....	816,025 (c)	53,098	762,927	8,560	771,487

(a) McKinley mine, \$238,216; Savage mine, \$22,208. (b) McKinley mine, \$320,367; Savage mine, \$8,483. (c) McKinley mine, \$649,205; Savage mine, \$166,820.

Dividends: 2% in 1907; 9% in 1908; 10% in 1909; 15% in 1910; 50% in 1911; 50% in 1912; 32% in 1913; 18% in 1914; 12% in 1915; 3% to date in 1916.

Property: 1' claim, 40 acres, the McKinley-Darragh mine, located at southern end of Cobalt Lake; 1 claim, 40 acres, the Savage mine, on the east side of Cart Lake; 40 acres in Bucke Twp., the Bennet claim. The McKinley-Darragh, which adjoins the Nipissing and La Rose holdings, has been the most important producer; deepest workings are at about 300', where the contact with the Keewatin formation is exposed. Thus far no values have been found in the Keewatin here, though in other parts of the district it has furnished good ore.

Ore reserves: Jan. 1, 1916, 35,000 tons broken ore, containing 1,871,000 oz. silver, compared with 2,132,000 oz. Jan. 1, 1915. Reduction in reserves is apparently due to the fact that the Savage mine has not responded to development as well as formerly. Development work at the Savage mine totaled 1,572' in 1915, 2,846' in 1914; at the McKinley, 2,965' in 1915, compared with 4,392' in 1914. Company employs 125 to 150 men.

A year ago the McKinley-Darragh was thought to be fast approaching the end, but ore reserves were maintained during the year, as it was found practical to carry stopes wider than contemplated. The extension of the Blind vein to the 250' level added a large tonnage to the reserves; on the 250' level this vein is reported to have a maximum width of 55', average 30', with milling value about 15 oz. per ton.

Costs at the McKinley-Darragh mine:

	Tons Milled	Mines	Costs		
			Mill	Mktg.	Total
1915.....	50,912	\$1.78	\$0.93	\$1.01	\$4.71
1914.....	45,098	2.22	1.44	1.70	6.99
1913.....	48,761	2.44	1.39	1.88	7.37

Per cent extraction on all ore milled: 86.9 in 1913; in 1914, 85.1 on McKinley ore and 64.1 on Savage ore; 80.9 in 1915.

	—Ounces Silver Shipped—			Cost per Oz.	Profit per Oz.
	McK.-D.	Savage	Total		
1915.....	803,717	256,419	1,060,136	\$0.2871	\$0.221
1914.....	1,051,925	208,121	1,260,046	.313	.231
1913.....	1,672,431	556,066	2,228,497	.223	.369

Total ounces silver shipped to Jan. 1, 1916: McKinley, 12,443,155; Savage, 2,740,506; total, 15,183,661.

There is still a tonnage of mill rock at the mine which more than pays expenses, but if other oreshoots are not soon found, property will have to close down; it has been so thoroughly prospected that the chance of discovering an orebody of great importance is very slight. It is a liquidating proposition.

McKINLEY GOLD MINES CO.

IDAHO

M. F. Smith, sec., 506 Gumbel Bldg., Kansas City, Mo. Inc. in Ariz. Cap., \$1,000,000; \$1 par. Has spent \$75,000 without return.

Property: 700 acres on Jupiter Mountain, Boise Basin, 6 miles from Idaho City, Idaho, shows a big vein carrying erratic values. **Development:** a crosscut tunnel which has not yet reached the vein. Idle 1915 for lack of funds.

McKINLEY MINES, LTD.

BRITISH COLUMBIA

Office: Rossland, B. C. Mine near Franklin, Boundary district, B. C.

Officers: B. Lequime, pres.; H. W. Warrington, v. p.; A. M. McKenzie, sec.; C. L. Hammond, managing director. **Property:** 4 claims, on the North fork of Kettle river, about 34 miles north of Grand Forks and 18 miles from the Kettle Valley railway terminus.

Orebodies occur as sulphides and oxides of iron carrying gold and copper. Several tunnels on property. Results of extensive diamond drilling not reported. Claims were under bond and lease to the British Columbia Copper Co., 1912, and a long tunnel driven. James Breen, of Spokane, owns 75% of the stock. The company was promoted by P. A. O'Farrell, who spent \$30,000 supplied by F. A. Heinze, in diamond drilling, before Heinze abandoned the proposition. Property is too inaccessible to work its low-grade ore profitably.

McKINLEY MINING CO.

WASHINGTON

Dissolved Dec. 31, 1913. Claims relocated Jan. 1, 1914, by some of the old stockholders and the Vulcan Mining Co. was organized. Obligations of old company were not assumed. Described under title of Vulcan Mining Co.

McKINLEY MINING & DEVELOPMENT CO.

ARIZONA

Prescott, Ariz. A. M. Gough, pres.; Chas. E. McKinley, gen. mgr. Inc. 1906 in Arizona. Cap., \$1,000,000; shares \$1 par.

Property: 38 claims, 760 acres, in the Copper Basin district, 11 miles south of Prescott. The Dixie group of 6 claims has veins of 5 to 15' width, carrying copper ore. The Peacock group has a vein of 60' claimed width, carrying surface ores said to average 3.7% copper, developed by the Peacock shaft, planned to be sunk to 700', showing sulphide ore giving assays up to 15% copper, 5 oz. silver and \$6 gold per ton.

Equipment: includes power plant with hoist good for 1,000' depth. No returns securable 1915, but reported to be working 2 shifts.

McMAHAN GROUP.

ARIZONA

Zonia, via Kirkland, Yavapai Co., Ariz. Owned by C. H. McMahan and brothers. **Property:** the Zonia mine and a group of 9 claims, unpatented, south of Zonia, shows irregular bedded veins in micaceous schists, carrying small and bunched shoots of high-grade oxidized ore. Small shipments of 5 to 6% ore have been made. Property was under option to Shannon Copper Co. interests in 1911, but was relinquished.

Development: consists of several shallow shafts. Assessment work only done in 1915. Planning to sink a 450' vertical shaft. See Old Vesuvius mine.

McMILLAN ZINC CO.

WISCONSIN

Offices: Platteville and Hazel Green, Grant Co., Wis. **Officers:** A. C. McMillan, pres.; Henry Hornischfeger, v. p.; H. B. Morrow, sec.-treas.; preceding, with L. C. Dagenhardt and C. M. Echols, directors; L. C. Dagenhardt, supt., Hazel Green.

Inc. Aug. 3, 1914, in Wis. Cap., \$100,000; shares \$1 par. Annual meeting, August 14. Operating expenses for 1915 are given as \$34,536 with no income, due to fact that the company was putting the property in shape to produce.

Property: 100-acre lease, at Hazel Green, said to show zinc and lead sulphides occurring in a disseminated deposit in Galena limestone formation. **Development:** 180' vertical shaft.

Equipment: includes steam hoist, 300 cu. ft. air compressor, pumps and a mill, capacity 400 tons per 20 hours.

Operations in 1915 consisted of sinking the shaft 160', building concentrator and surface plant. The only output was that obtained from shaft sinking.

McMILLEN-STONEWALL MINING CO.**ARIZONA**

Globe, Gila Co., Ariz. V. Y. Smith, pres. and gen. mgr.; C. N. Lightle, sec.-treas. Inc. March 27, 1907, in Arizona. **Cap.**, \$1,000,000; shares \$1 par.

Lands: 34 claims, in the Richmond basin, 16 miles N. E. of Globe, carry 3 miles of the strike of the Stonewall Jackson vein, of 25 to 35' average width. Property includes the Stonewall Jackson mine, worked 1876-83, with an estimated production of about \$500,000 of silver ore, of high average grade.

Development: by the 300' three-compartment McMillen shaft and the old 600' Stonewall Jackson shaft, latter showing no stoping down below 230'. The mine is said to have considerable ore carrying 5 to 50 oz. silver per ton, with about 40,000 tons of discarded silver ore on the old dumps.

Equipment: includes an old stamp mill and a small cyanide plant. A full and favorable report on the property was made, May, 1912, by R. B. Wagner.

In 1914 property was bonded to G. H. Hayes and explored by diamond drilling, which proved unsatisfactory owing to the broken nature of the ground. Shaft sinking is now proposed.

MEADOW MINING CO.**MICHIGAN**

Idle. **Office:** c/o C. A. Wright, sec., Calumet, Mich. Mine near Copper Falls, Keweenaw Co., Mich. Inc. 1898 in Michigan. **Cap.**, \$1,500,000; shares \$25 par; \$252,813 outstanding; 37,500 shares were given in payment of property. Is a reorganization of the Meadow Mng. Co., inc. 1863, under special Michigan charter. Is controlled by the Keweenaw Copper Co.

Property: 364 acres, adjoins the Humboldt and Phoenix mines and carries the Ashbed lode, which was first opened 1851, with a little mining previous to 1860. Where the Ashbed is crossed by transverse fissures, bunches of ore occur and such places usually show pits of prehistoric miners. Fully described Vol. II, Copper Handbook.

MEDIA MINING CO.**MISSOURI**

Webb City, Mo. Has a lease on Guinn land, north of Webb City, covering the site of the old Hold Out mine. **Ore:** zinc sulphide, in sheet ground formation at a depth of 230', with ore faces 9' high. Company recently completed one of the largest mills in the Missouri-Kansas-Oklahoma district, capacity 600 tons per ten hours. Equipment of mill includes two 18" crushers, 3 sets of 42" rolls, two 48"x96" trommels, jigs and tables. Mill can treat 2% ore profitably. Concentrates assay about 59% zinc, with only a trace of lead. Steam power is used.

MELCHER MINING & MILLING CO.**IDAHO**

Office: 409 Hooper Blk., Salt Lake City, Utah. Mine office: Albion, Cassia Co., Idaho. Samuel McIntyre, Sr., pres., gen. mgr. and treas.; R. M. Wilkinson, sec. and purch. agt.; P. McIntyre, supt. Inc. in Utah. **Cap.**, \$1,000,000; shares \$2 par; issued, 410,000 shares.

Property: 37 claims, including former holdings of the Cumora Mining Co., bought 1912, in the Stokes district, 38 miles from a railroad. Country rock is schist, granite and quartzite, orebodies occurring as fissure veins in both schist and granite. The vein developed runs N. 10° E. and dips 68° west.

Development: by two shafts and 3 tunnels, one 3,290' long. Shows a 3' vein of chalcopyrite and galena and lead carbonates said to average about 1% copper, 10% lead, 5 oz. silver and \$5 gold per ton.

Equipment: includes 200-h. p. steam and water power plant, 5-drill air compressor and 6 small buildings. Company developing vein in Giant tunnel and driving the Melcher crosscut tunnel to crosscut the 3 veins, at last accounts.

MELTZER MINING CO.**MEXICO**

See Copete Consolidated Copper Co.

MELONES MINING CO.**CALIFORNIA**

Office: 131 State St., Boston, Mass. **Mine office:** W. G. Devereux, mgr., 800 Powell St., San Francisco, and Melones, Calif. **Officers:** W. E. C. Eustis, pres., Boston; A. H. Eustis, sec.-treas.; C. Minot Weld, James Parker, Frank Lyman, W. B. Devereux, T. H. Watkins and W. C. Ralston, directors. **Inc.** in West Virginia. **Cap.,** \$400,000; shares \$1 par; nonassessable; 275,000 issued. Bonds authorized \$500,000, \$400,000 outstanding; no interest has been paid on bonds since 1906. State St. Trust Co., Boston, Mass., transfer agent. Annual meeting, 3rd Wednesday in March.

Property: 16 claims, 152 acres, on Carson Hill, has been steadily operated since 1898. **Ore:** gold, occurs in a quartz vein in schist with N. W.-S. E. strike and a dip of 70° N. E.

Development: by 5 tunnels to the 1,100' level, the main working level, which is 5,000' long and cuts the vein at 4,000' from the portal. At this point a 3-compartment shaft has been sunk on the vein to the 1,350' level, below which the vein dips 50° and the shaft continues in it to the lowest level, at 1,750'. There are about 3 miles of underground workings. Above the 1,100' level the ore is mined by glory holes; below, shrinkage stoping is used. Ore is trammed from mine to mill in 8-ton cars hauled by a d. c. 500-volt locomotive.

Equipment: includes double-drum electric hoist, driven by 250-h. p., 220-volt induction motor, hoisting 3½ ton skips at the rate of 1,000' per minute, and air compressor.

Mill: 120 stamps, weight 1,050 lbs. each, dropping 7", 102 drops per min., crushing 5 tons ore per stamp through 20-mesh screen; outside amalgamation is used; battery pulp from sluices to classifying cones, and concentrated on Wilfley tables and Frue vanners; middlings elevated, reclassified and reconcentrated; concentrates to a 20-ton cyanide plant, capacity 600 tons per month. Concentrates assay \$30 to \$50 per ton. Value of ore milled is \$2 to \$2.50 per ton; extraction 83%; loss in tailing is \$0.25 per ton. Cyanide plant makes a 92% extraction. Total operating cost is about \$1.60 per ton. Production figures not available; 201,150 tons said to have been treated in 1915 with gross value of \$716,000. See Mines & Mining Resources of Calaveras Co., Calif. State Mineralogists' Report, 1915, pp. 93-96.

MEMPHIS & IDAHO SPRINGS GOLD M. & M. CO. COLORADO

Idle. Mine near Idaho Springs, Clear Creek Co., Colo., J. J. Williams, pres.; Wm. M. Slack, sec.-treas., at last accounts. **Inc.** in Colorado. **Cap.,** \$1,500,000; shares \$1 par, nonassessable.

Property: 14 claims, patented, carry veins with lead, copper and zinc sulphides. Mine is developed by shafts of 125', 250' and 460' and is tapped at depth of 2,350' by the Newhouse tunnel. **Equipment:** includes 22-h. p. electric hoist and air compressor. Was leased to John Kuykendall of Denver in 1915.

MEMPHIS MINING CO.**NEW MEXICO**

Office: 204 Mills Bldg., El Paso, Texas. **Mine office:** Organ, Dona Ana Co., N. M. **Officers:** J. I. McCullough, pres.-mgr.; W. N. Small, v. p.; Jas C. White, sec.-treas., with T. S. Semple, Chas. E. Head, directors. **Inc.** 1911, in Arizona. **Cap.,** \$1,000,000; shares \$1 par; 650,000 shares outstanding. Gross earnings in 1915 amounted to \$27,841, all from ore sales.

Property: 5 claims, 100 acres, is the old Torpedo, or Memphis copper mine. Developed by 4 shafts, showing veins 1-25' wide, said to carry copper ore assaying 10% copper, 6 oz silver, \$3 gold per ton. Worked under

lease 1914-15 and ore shipped to El Paso, Tex. Reported taken over by Phelps, Dodge & Co. in 1916.

MENDHA-NEVADA MINING CO.**NEVADA**

Office: Commercial Bldg., Salt Lake City, Utah. **Mine office:** Pioche, Lincoln Co., Nev. T. J. Osborne, pres.; M. C. Godbe, sec. **Cap.** \$1,000,000; shares \$1 par.

Property: is said to have produced \$500,000 under its former ownership. The mine is reported to have a vein 3 to 15' thick, averaging 6', practically vertical and showing silver and gold-bearing lead and copper ores on 700' level. Development is by a 900' incline shaft.

MERCER SILVER MINES, LTD.**ONTARIO**

Offices: 103 Bay St., Toronto and Cobalt, Ont. **Officers:** Harry Worth, pres.; F. W. Zoller, v. p.; R. F. Segsworth, sec.-treas., with R. F. Robertson and W. E. Segsworth, directors. A. C. Bailey, supt.

Inc. July, 1915. **Cap.**, \$1,000,000. Company is closely identified with the Seneca Superior Mines, Ltd. Has a 10-year lease from the Peterson Lake Co., on property adjoining the Seneca-Superior, formerly leased by Gould Cons. Mines, Ltd. The Peterson Lake Co. will receive 25% royalty on smelter returns.

MERCHANTS FINANCE CO. (Western Metals Co.) CALIFORNIA

Address: Los Angeles, Calif. Company in 1915, built an antimony smelter at Industrial Harbor, Los Angeles, operated antimony mines in Calif. and Nev. and bought ores from the Western States, Alaska and foreign countries. The largest production was made from deposits of antimony ochre and stibnite near Wild Rose Spring, on the N.W. slope of Telescope Peak in the Panamint Range, Calif. These deposits known for many years, have been too far from transportation to be profitably worked until the high prices of antimony in 1915 and the completion of a railroad to Trona on Searles Lake, 25 miles from the property made their exploitation possible. The company also worked deposits 30 miles N.E. of Mojave, Kern Co., Calif.

MERCURY MINING CO. (Quicksilver).**NEVADA**

G. D. Abbott, sec., 1022 Crocker Bldg., San Francisco, Calif., **Mine office:** Ione, Nye Co., Nev. **Officers:** F. B. Bradley, pres.; M. L. Requa, v. p.; G. D. Abbott, sec.-treas.; preceding with John H. Mackenzie, W. E. Goldsworthy, supt.

Inc. May 7, 1910, in Nevada. **Cap.**, \$1,000,000, all outstanding; shares \$1 par. Annual meeting second Wednesday in January.

Balance sheet for 1915 shows assets: \$48,517, which include: property and plant, \$32,489; supplies, \$1,902; stock, \$5,950; cash, \$5,308; surplus, \$2,868. Liabilities include operating accounts, \$44,945; reserve account, \$3,572.

Comparative Operating Statement:

	Gross Earnings	Operating Expenses	Operating Profits
1915.....	\$44,127	\$26,299	\$17,828
1914.....	16,110	17,868	1,758 (d)

(d) Deficit.

No dividends have paid.

Property: 10 patented claims near Ione, Nevada, said to show cinnabar ore. Company has one 25-ton Scott furnace in operation.

Production: in 1911-12, 9,467 tons ore, 2,480 flasks mercury; in 1913, 7,715 tons ore, 1,013 flasks mercury; in 1914, 2,100 tons ore, 384 flasks mercury; in 1915, 5,375 tons ore, 417 flasks mercury. Flasks contain 75 lbs. mercury.

MERGER MINING CO., LTD.**IDAHO**

Purchased property of the Mizpah Copper Mining Co., Ltd., paying for same in stock. **Address:** J. C. Northrup, Palouse, Wash. **Mine office:** Harvard, Latah Co., Idaho. **Officers:** J. C. Northrup, pres. and gen. mgr.; C. E. Frederick, v. p.; W. E. McCroskey, sec.; G. A. Weldon, treas. **Inc.** Oct. 15, 1913, in Washington. **Cap.**, 3,750,000 shares; \$1 par; nonassessable.

Property: 18 claims, 318 acres, known as the Hoodoo mine, well watered and timbered, on Copper mountain, near the Palouse river, in the Hoodoo district, Latah county, almost 40 miles from Palouse, with a 20-mile wagon-road to Harvard, and 10 miles from the Puget Sound railway. The property shows quartzite and schist, with 8 fissure veins in quartzite, serpentine and schist, having a N. E. strike, and a dip of about 40°. Two veins, partly developed, are estimated by the management at 40' average width, carrying cuprite, malachite, chalcocite and chalcopyrite, latter associated with pyrrhotite, with quartz and limestone gangue, said to average 6% copper, 2 oz. silver and \$2 gold per ton. The veins are traceable 2,000' on the company's lands by outcrops showing carbonates and there are intrusive porphyry dikes.

Development: includes 5 tunnels and a shallow shaft, with about 2,000' of workings, estimated by the management to show 100,000 tons of ore.

Equipment: includes 60-h. p. gasoline power, with a 3-drill air compressor. There are 16 buildings. Idle in 1914-1915. Planning to resume operations, 1916.

METAL DE COBRE; COMPANIA MINERA.**MEXICO**

Mine near San Antonio de la Huerta, Ures, Sonora, Mex. **Inc.** in Mexico as holding company of the Rio Yaqui Copper Co.

METALINE LEAD & ZINC CO.**WASHINGTON**

Controlled by Lewis P. Larsen and Jene Jensen, of Metaline Falls, Wash. **Property:** the Josephine mine at Metaline Falls, Pend Oreille district, was the only zinc producer in Washington in 1915. Mine is being prospected by diamond drilling. Equipped with 250-ton ball concentrating mill and aerial tram.

METALINE ORIOLE MINING CO.**WASHINGTON**

Metaline, Pend Oreille Co., Wash. Fred N. Davis, pres. and gen. mgr.; Thos. R. L. Harris, sec.; Joseph Lancaster, mg. eng. **Inc.** Dec. 30, 1910, in Washington. **Cap.**, \$1,500,000; shares \$1 par, assessable. Total calls to end of 1912, \$30,000.

Lands: 5 claims, 100 acres, and a 5-acre mill site, unpatented. Property has a fissure vein in quartzite 6 to 8' wide, carrying about 1% copper, 12% lead, 25% zinc, with silver and gold values. **Development:** by 200' shaft and tunnels of 50', 400' and 750'. A 100' incline shaft sunk on the vein from the lower tunnel shows ore throughout a 70' drift. **Equipment:** includes steam power, with small hoist and 3-drill air compressor. Company planning to erect a 50-ton mill in 1916.

METALLURGICAL COMPANY OF AMERICA.**UNITED STATES**

Office: 61 Broadway, New York. **Officers:** C. M. Loeb, pres. and gen. mgr.; B. Hochschild, v. p.; Otto Sussman, treas.; preceding with Richard Merton, Theo. Sternfeld and Edw. Randolph, directors; Julius Goldman, sec. **Inc.** May 19, 1904, in New Jersey. **Cap.**, \$100,000; shares \$100 par; issued for the purpose of exploiting mining and smelting enterprises. Annual meeting second Tuesday in April, at Jersey City, N. J.

METALS CHEMICAL CO.**ONTARIO**

Welland, Crowland Twp., Ontario. **Officers:** C. S. Richardson, pres.; J. H. Charles, sec.-treas.; K. S. MacLachlan, supt. Operates a plant for

the treatment of cobalt ores, near Welland. **Equipment:** includes one small blast furnace, one roasting furnace, one reverberatory furnace, 15 leaching vats, 7 filter presses, one crystallizing plant, 2 bag-houses. Electric power is used. Company employs 35 men. Output is silver, arsenic, oxides of cobalt and nickel, and various cobalt and nickel salts.

METALS MNG. CO. See Sheldon Mng. Co.

METEOR SILVER MINING CO., LTD.

ONTARIO

Cobalt, Ontario. **Officers:** D. Crawford, pres.; D. D. Flanagan, v. p. and gen. mgr. In 1915, company was developing its property on the side of Diabase mountain, near the Savage mine. In 1914, 310' of new work was done. Fifteen men employed.

METHOW GOLD & COPPER MINING CO.

WASHINGTON

Winthrop, Okanogan Co., Wash. **Officers:** W. D. Scott, Spokane, pres.; W. G. Traub, v. p.; J. N. Tewinkel, sec.-treas.; W. D. Scott, W. B. Traub and N. O. Baldwin, directors. Inc. 1889, in Washington. Cap., \$1,500,000; shares \$1 par.

Property: 8 claims, patented, 150-acres, shows fissure veins in Algonkian rocks. The sulphide ores assay 9% copper, 2 oz. silver and \$5.50 gold per ton. **Development:** includes 3 tunnels, longest 564', and a 52' shaft. Has available water power and timber. Idle, except for annual assessment work, on account of lack of transportation.

MEXICAN EXPLORATION & MINING CO.

MEXICO

Controlled by Pacific Smelting & Mining Co.

MEXICAN GOLD AND SILVER MINING CO.

NEVADA

Offices: 265 Russ Bldg., San Francisco, Calif., and Virginia City, Nev. **Officers:** H. L. Slosson, Jr., pres.; Herman Zadig, v. p.; with Whitman Symmes, directors. Chas D. Olney, sec.

Inc. 1874, in Calif. Cap., \$201,600; shares \$1 par; assessable; all issued. In Jan., 1916, assessment No. 103, 10c per share, was levied. No. 2 was levied Dec. 6, 1910. Stock transferred at company's San Francisco office. Annual meeting, first Tuesday in December. Listed on New York Curb and San Francisco Exchange.

Property: 1 claim and 5 fractions, patented, on the Comstock lode, at Virginia City. During the height of the Bonanza excitement the stock sold for over \$100 per share in spite of the fact that not a ton of pay ore was found. Owing to its favorable location at the north end of the Comstock, it was always a favorite stock and levied and collected upward of \$4,000,000 in assessments. In 1911, the present management obtained control from the stock brokers who formerly mismanaged things so badly on the Comstock, and having resolved to prospect the hanging-wall for fractures, were rewarded by finding an orebody yielding over \$1,400,000 which enabled them to build a modern mill, equip the mine, contribute heavily toward the pumping of the Comstock lode, and pay two dividends aggregating nearly \$200,000.

The Comstock lode is a great fissure vein filling a fault plane. The main body of the lode is a belt of quartz and vein matter, 10,000' long and several hundred feet broad with a general strike N. 15° E. At each extremity of this main fissure the lode ramifies into diverging branches. The east or hanging-wall is diabase throughout the entire 10,000' of the main lode, and for some distance on the S. E. and N. E. branches; it is in an extreme state of decomposition. The foot wall of the main fissure is diorite for more than $\frac{3}{4}$ of its length, but at the southern end is chiefly composed of metamorphic slates; it is much less altered than the hanging. Accompanying the vein for half its length is the narrow dike of younger diabase called the "black dike". Contents of the vein are simple, on the

whole consisting of country rock in fragments varying from very small to several thousand feet in length, clay, quartz, and argentiferous minerals. With few exceptions all of the orebodies of any importance were found close to the diabase, while the Gold Hill bonanzas rest upon metamorphic rocks. The geology is described in detail in U. S. G. S., Monograph, No. 3.

Development: the principal mining now being done is on the 5 north end mines; from north to south these mines are the Sierra Nevada, Union Mexican, Ophir and the Cons. Virginia. At present ore is being extracted on the 2,500' level and above in the Union and Sierra Nevada; the Union, producing approximately \$1,000 per day for the first four months of 1916. Ophir is beginning to extract low-grade ore above the 2,500' level near the old stopes from which about \$4,000,000 has been taken in the last ten years; also exploring the 2,700' level. Cons. Virginia and Mexican are also prospecting on the 2,700' level. The Mexican orebody which yielded about \$1,400,000, was worked out two years ago; search is now being made for the downward continuation of the shoot. A recent report states that good ore has been found below the 2,700' level, which will necessitate unwatering the Northend mines to the 2,900' level. This is not serious as the flow of water below the 2,500' level is less than 1,000 gallons per minute.

The ore now being mined comes from the contact and hanging-wall fissures: it has a quartz gangue, with lead-zinc-silver-copper sulphides, zinc predominating, and carries free gold and argentite. Average value of shipping ore about \$35 per ton; of milling ore \$10 per ton.

Equipment: includes 3 electric hoists of 25-h. p. 112-h. p and 150-h. p; electric pumps; two compressors, 75-h. p. and 100-h. p. each; and an 80-ton all slime cyaniding plant effecting an extraction of 93.2%.

Recent production has been: 19,396 tons in 1912; 29,365 tons in 1913; 11,150 tons in 1914; 3,404 tons in 1915.

MEXICAN LEAD CO. See *Mexicana, Cia. Met.*

MEXICAN METALS CO.

Office: 35 Congress St., Boston, Mass. **Officers:** Geo. E. Keith, pres.; Geo. H. Woodman, v. p.; Sumner M. Teele, sec.; Harold C. Keith, treas., with William Brocken and Eldon B. Keith, directors. August Fritsche, gen. mgr.

Inc. Aug. 16, in Arizona. **Cap.,** \$5,000,000; shares \$5 par; assessable; \$2.25 paid. Company succeeded the Arizpe Mines Co. and holds title to property through the Moctezuma-Arizpe Development Co., legalized in Mexico. Old Colony Trust Co., registrar; Federal Trust Co., transfer agt. Annual meeting, second Monday in September.

Mexican property near Cananea, Sonora, Mex., closed down in autumn of 1914. After geological survey of property made by J. M. Little, checked by A. H. Rogers, Boston and Franklin W. Smith, of Bisbee, it was decided to sell or abandon such property as directors considered unworthy and to invest capital in stock of Cananea M. & D. Co., or to purchase new properties. Fully described Vol. XI, Copper Handbook.

MEXICAN MILLING & TRANSPORTATION CO. **MEXICO**

See Guanajuato Development Co. (Pinguico Mines Co.)

MEXICAN SMELTING & REFINING CO. **CALIFORNIA**

Office: 82 Beaver St., New York. A subsidiary of the Compania Metalurgica Mexicana and holds title to the Blue Ledge mine in Siskiyou Co., Calif., which see.

MEXICANA; COMPANIA METALURGICA. **MEXICO**

Offices: 82 Beaver St., New York, and No. 26, Ave. 16th de Septiembre,

Mexico City, D. F. Mine offices: Sierra Mojada, Coahuila, Mex., and Concepcion del Oro, Zacatecas, Mex. Works office: San Luis Potosi, S. L. P., Mex. **Officers:** D. C. Brown, 1st v. p.; C. J. Peabody, 2nd v. p.; R. E. Safford, sec., asst. treas., preceding with H. H. Dean, G. F. Peabody and R. H. McCarter, **directors.**

Inc. 1890, in New Jersey. **Cap.**, \$4,000,000; shares \$100 par; fully issued; in \$1,000,000 cumulative 8% preferred stock, \$1,250,000 guaranteed 6% second preferred stock, and \$1,750,000 common stock. \$3,000,000 first-mortgage 5% bonds authorized, due July 31, 1931, with a 2% annual sinking fund. bonds being subject to call at 110 and accrued interest; issued, \$2,774,700. Company is not a dividend payer. Guaranty Trust Co., New York, registrar. Annual meeting, first Monday in June.

The company's interests are extensive, including control of numerous subsidiary mining, transportation and land companies, among the more important being the Sombrerete Mining Co. and the Mexican Lead Co., at Sombrerete, Zacatecas, Tex., the Montezuma Lead Co., Alvarez Lead & Timber Co., Mexican Mineral Railway Co., and Potosi & Rio Verde Railway Co.

The Veta Rica mine owned outright at Sierra Mojada, is an important silver-lead producer. Development is by a 600' main shaft and values are mainly in lead and silver.

Other important producers are the silver-copper mines at Concepcion del Oro, developed by tunnels. The San Pedro and San Pablo mines at Monterey are also important producers of lead and the mines of the San Pedro district at San Luis Potosi are heavy producers of silver, gold and lead ores.

The smelter, treating about 1,000 tons daily, has a modern equipment, including 12 furnaces for the reduction of gold, silver and lead ores, and a special copper department of 100 tons daily capacity. The works have steam and electric power, and employ about 1,000 men. In addition, there has lately been completed the Carmen 250-ton cyanide plant for cyanidation of lower grade ores from the San Pedro mines.

The company is a large producer of lead and silver, with outputs of copper and gold, secured mainly as byproducts, and is active and enterprising in the rejuvenation of old properties and the development of new mines.

Companies controlled by Compania Metalurgica Mexicana.

Mexican Lead Co.

Office: 82 Beaver St., New York. **Officers:** C. J. Peabody, v. p.; R. E. Safford, sec.; with W. F. Gillesby, Acosta Nichols, D. C. Brown, and G. F. Peabody, **directors.**

Inc. July 31, 1899, in New Jersey. **Cap.**, \$5,750,000 common and \$1,250,000 7% cumulative preferred; all outstanding; \$100 par. Stock transferred at company's office. Annual meeting, third Tuesday in February.

Property: lead mines located near Monterey, Mex. Idle at present on account of the revolution.

Montezuma Lead Co.

Office: 82 Beaver St., New York. **Officers:** same as Mexican Lead Co. **Inc.** Dec. 30, 1899, in New Jersey. **Cap.**, \$2,500,000 Com. and \$500,000 7% cumulative Pfd.; shares \$100 par. Annual meeting third Tuesday in February.

Property: lead mines in State of Chihuahua, Mex. Idle at present on account of the revolution.

MEXICANA MINING CO.

MEXICO

Is the operating subsidiary company of the Keystone Mng. Co., of Shamokin, Pa., which see.

MEXICO MINES OF EL ORO, LTD.

MEXICO

Offices: 2 St. Helen's Place, London, E. C., and 18 Rue Laffitte, Paris. **Directors:** E. M. Clarke, Don Guillermo de Landa y Escandon, F. J. Fourmier, H. Higgins, and Sir R. J. Price, M. P. F. L. Allan, resident manager, El Oro, Mexico; J. Vincent, asst. mgr.; C. R. Pinder, cons. engr.

Reg. Oct. 14, 1904, in England. Cap., £210,000; shares £1 par; increased from £180,000 in July, 1914; 180,000 shares issued and fully paid; 30,000 to be issued for acquisition of the Nolan properties.

Financial statement for year ending June 30, 1914, issued July 30, 1915, showed receipts, £320,262 with profits of £169,421, balance forward, £247,340; dividends absorbed, £162,000; permanent improvements, £2,109; tax reserve, £7,702; leaving £75,529 carried forward.

Financial statement for year ending June 30, 1915, issued in Paris, Feb., 1916, shows profits of £24,811; balance forward, £100,341; absorbed by improvements, £2,214; tax, £7,000; leaving £91,127 carried forward.

Dividends: including bonuses—

Property: company was formed to acquire by agreement with the Exploration Co., Ltd., 26.63 hectares, 65.79 acres, total with surface rights, 75 acres, adjoining the Esperanza mine, near the town of El Oro, Mex. The land, formerly held by the Mexico Venture Syndicate, Ltd., includes the Mexico gold and silver mine.

The properties of the Compania Miniera de Oro Nolan were acquired in Jan., 1915, for 30,000 fully paid shares.

The ore is gold-silver, occurring in fissure veins. **Development:** by shafts. The North shaft is 1,547' deep, the South shaft, 1,687'. **Equipment:** includes a 40-stamp mill, 7 tube mills, and a cyanide plant.

Milling operations started in Oct., 1907, were suspended in April, 1914, owing to revolutionary conditions. In year ending June 30, 1915, the mill worked 5 months. At the end of 1915 the mine was producing a limited tonnage, but supplies were rapidly becoming exhausted, with little prospect of obtaining transportation for more.

MEXICO MINING, REFINING & EXPLORATION CO. MEXICO

Office: 501 I. W. Hellman Bldg., Los Angeles, Calif. **Officers:** Wm. T. Calderwood, pres. and gen. mgr.; Dr. Chas. B. Nichols, v. p.; F. C. Lamb, sec.-treas.; preceding with E. B. Lovie, C. A. Neil, L. A. Davis and A. A. Snodgrass, directors. B. A. Ogden, supt.; A. Wainwright, engr. **Inc. 1905, in Arizona. Cap., \$5,000,000; shares \$1 par; nonassessable. Annual meeting, second Monday in April, at Nogales, Ariz.**

Property: 260 acres, El Creston de Cobre mine, about 35 miles west of

Hermosillo, shows dolomite and granite and is an *antigua* dating from the eighteenth century. The property carries 4 orebodies, of which 2, reported by company as of 30' average width, and traceable 1,400', carry copper ores averaging 4% copper, 8 oz. silver and \$1 gold per ton. **Development:** by 8 shafts, deepest 300', and 4 tunnels with 1,000' of workings, estimated by the company to show 100,000 tons of ore.

La Cobriza mine, at Soyopa, is said to show a 16' vein with a 7' pay-streak, carrying copper-silver ore.

Equipment: includes 235-h. p. steam plant, 2 hoists, 6-drill air compressor, and 20-ton mill. Company was planning, 1913, to erect a 100-ton smelter. No recent information secured. Probably idle owing to conditions in Mexico.

MIAMI COPPER CO.

ARIZONA

Office: 61 Broadway, New York. **Mine office:** Miami, Gila Co., Ariz. **Officers:** Adolph Lewisohn, pres.; J. Parke Channing, v. p.; Sam A. Lewisohn, treas.; preceding with Hermann Sielcken, J. H. Susmann, Wm. H. Nichols, Walter T. Rosen, F. W. Estabrook, B. Hochschild and Theo. L. Herrmann, directors. Herman Cook, sec.; B. Britton Gottsberger, gen. mgr.; F. W. MacLennan, asst. mgr.; F. W. Solomon, mill supt.; W. F. Williams, chief clerk; Arthur Stonham, auditor.

Inc. Nov. 30, 1907, in Delaware. **Cap.,** \$3,000,000; shares \$5 par; increased Nov., 1909, to \$3,500,000, and again increased Aug., 1910, to \$4,000,000; issued, \$3,735,570. Of this last increase in capitalization, 60,000 shares were offered to stockholders at \$18 per share. Of the issued stock, 300,000 shares were given, Nov., 1907, in payment for lands; 200,000 shares were issued April, 1908, at \$5 per share; 100,000 shares were issued Aug., 1908, at \$10 per share; 60,000 shares were issued Aug., 1910, at \$18 per share, and of the balance, 88,236 shares were set aside for conversion of bonds, and 52,886 shares remain unissued. Debentures, \$1,500,000 first-mortgage 10-year 6% gold bonds have been retired.

The company is controlled, through stock ownership, by the General Development Co. Mechanics & Metals National Bank, New York, and Old Colony Trust Co., Boston, registrars; Bankers Trust Co., New York, and American Trust Co., Boston, transfer agts. Shares are listed on the New York and Boston Stock Exchanges. Annual meeting, third Wednesday in April.

(a) Premium on shares, less expense of issue.

Dividends: started in 1912, were paid regularly until Oct., 1914; resumed in May, 1915, at rate of 50 cts., and increased 25c each quarter since: \$1.50 per share in 1912; \$2.00 in 1913; \$1.50 in 1914; \$2.25 in 1915; \$2.75 (to May 15) in 1916.

Property: 222 acres, mining claims, patented, 555 acres held for the mill and power plant and 345 acres for water rights, in the Miami district, 6 miles west of Globe. Claims show an area of silicified schist at and near a contact with a great intrusive body of granite, known as Schultze granite. The altered schist belt averages about 1,200' in width and has a generally

E.-W. direction. The granite merges into granite porphyry at its borders, and this and offshoots, or dikes of the granite in the schist, are mineralized along the ore belt. This is seen in a dike with E.-W. strike, of 40 to 60' width, mineralized in the same manner as the schist.

The schistose area is netted with contraction fractures and later fissuring due to metasomatic changes of volume, accompanying mineralization and alteration. The ore belt is marked by silicification and intense alteration of the schist, a change that fades out into natural gray schist a few hundred yards north of the Miami and Inspiration mines. The ore zone is oxidized and leached to an average depth of 210', this part containing small seams and veinlets of oxidized ore. Below this leached belt a few feet of mixed ore is succeeded by the zone of disseminated glance, a rather soft, much altered rock specked with tiny glance grains and films.

Development: has been by extensive underground operations, supplemented by churn drilling. Up to the end of 1914 drill holes of 605' average depth had been drilled to the number of 73. Drill holes were put down at the corners of 200' squares and practically all of them cut ore, carrying from 110 to 210' in thickness and ranging from 2 to 2.5% in copper tenor. Drill borings in the vicinity of the mine have shown commercial ore to at least 115' additional depth below the 720' level of the mine.

The mine is worked by a very large main shaft with 3 others sunk during prospecting operations and development. The latter are known as the Captain, Red Springs and Red Rock shafts. The Red Rock shaft with 3 compartments is 720' deep, and is sunk in about the center of the mineral deposit. All of the ground around this shaft has been mined practically to the 370' level and use of shaft has been discontinued. The Red Springs shaft, 2,150' N. W. of the Red Rock, has 3 compartments and is 422' in depth, sunk through surface capping into ore. The Captain shaft, the first shaft put down on the property, was stopped at 210', but in 1913 was deepened to 420' and a tramping level prepared for stoping and ore extraction.

The Miami, or main workings, 5-compartment shaft, equipped for ultimate production of 5,000 tons of ore daily, is sunk outside the proven mineral zone in order to be immune from caving and is bottomed in granite at depth of 720', the first 450' being through conglomerate. It is 12x16' inside of timbers with 15x19' outside dimensions and framed with Louisiana long-leaf yellow pine, preserved by the use of 12 lbs. of creosote per cubic foot. The timber was creosoted after framing by the International Creosoting & Construction Co., of Galveston, Texas, at a charge of \$20 per 1,000' board measure.

As the mine has a solid orebody, the upper levels are opened in the ore zone at only 50' intervals, with sub-levels between each, giving ore developed in slices of only 25' vertical depth. Ore is blocked out horizontally by 5x7' drifts, with centers spaced 100' apart, while on the upper levels there are drifts with centers spaced at 50' intervals, blocking out ore in cubes of various sizes, but with all dimensions that are multiples of 25'. On account of the thickness of the ore, it is planned to extract it in two sections, the upper one consisting of the ore above the 270' level, from which point a transfer will be made through specially prepared raises to the main tramping level, the 420' level. The 420' and 570' levels have 1,000-ton loading pockets. Ore is hauled in trains of twenty 2½-ton ore cars by 6½-ton electric locomotives.

Development: work in 1915 amounted to 21,746', as compared with 22,865' in 1914. Total amount of underground workings at close of 1915 amounted to 248,560'. There being practically no waste in the mine, within the limits of the ore zone, the most serious problem was to devise a method

by which the greatest amount of ore could be extracted with the least waste. The system used is an adaptation by N. O. Lawton of the auxiliary raise and sub-level stoping method, by which about 60% of the ore will be mined in rooms and the remainder extracted by top-slicing and sub-level caving methods. This gives minimum timbering and the compactness and uniformity of the orebody make it well adapted to this plan of extraction. During 1914 an improvement in mining work was made by the addition of an artificial ventilating system, consisting of a pressure fan of 70,000 cu. ft. capacity.

Ore reserves: Jan. 1, 1916—	Tons	% Copper
High-grade sulphide ore.....	18,140,000	2.40
Low-grade sulphide ore.....	17,000,000	1.21
Total	35,140,000	1.82

In addition there are 6,000,000 tons partially developed mixed sulphide and oxide ore of an approximate grade of 2% copper. These figures are reliable, because of the unusually thorough manner in which the ore has been developed and blocked out and the well-known conservatism of the management. A very large part of this ore is actually blocked out underground, and the estimated average percentage is based upon thousands of careful assays, made of samples taken at 5' intervals, throughout the workings. There remains a considerable portion of the mineral ground yet to be tested, of which a large aggregate area should have ore. It is probable that further development of the mine will develop more or less additional ore, possibly above what is considered the present payable limits, probably below, and almost certainly in the lateral extensions.

The power house is on the flat below the mine and reached by side-tracks from the main line of the Gila Valley, Globe & Northern railway. Power generates compressed air at 90 lbs. initial pressure, and a 25-cycle alternating current at 6,600 volts. There are three 4-cylinder triple-expansion engines taking steam at 185 lbs. pressure, with 100° superheat, direct-connected to three 1,000-k. w. 3-phase 25-cycle generators. There are two 4-cylinder triple-expansion air compressors with capacity of 4,000 cu. ft. of air per minute, at 90 lbs. initial pressure. Electric current is used for the mill, shops, pumps and underground traction, and compressed air is used for power drills and hoists.

The boiler house has five 600-h. p. Edgemoor water-tube boilers, generating steam at 200 lbs. pressure, equipped with Green fuel economizers and Foster superheaters, burning petroleum, and a 500,000-gal. storage tank is to be built for oil storage. The boiler plant is so designed that coal can be used with automatic stokers.

The main shaft has 2 Nordberg hoists, the larger for raising ore having 2 drums of 10' diameter with 55" face, capable of handling 1,000' of 1 $\frac{3}{8}$ " rope. An auxiliary hoist has 16x16" cylinders with a drum of 8' diameter and 6' face for hoisting the man cage. Both hoists are operated by compressed air, reheated. The ore hoist raises two 7 $\frac{1}{2}$ -ton skips which are dumped directly into the pockets of the crusher building. No. 4 shaft is planned and equipped to handle 2,000 tons of ore in 8 hours, giving a maximum productive capacity of 6,000 tons per diem.

The crusher building, at No. 4 shaft, of 6,000 tons daily capacity, has Chalmers-Williams crushers, breaking ore to 1 $\frac{1}{4}$ " size, the product being fed through two 4x10' trommels to four 62x18" rolls that crush oversize to half-inch cubes. Ore then goes by belt conveyor, Miami type, heavy duty Traylor, to the mill bins.

The concentrator, capacity 1,000 tons, designed by H. Kenyon Burch,

is located on a hillside, south of the ore deposit, permitting gravity handling, and with a large acreage nearby, available for tailings. The mill is of steel and stands on a foundation of about 15,000 cu. yds. of concrete. Ore is delivered from the crusher house, at the main shaft, by 300' belt conveyors leading to six 1,000-ton ore bins, 1 at the head of each section of the mill. Each bin is made of steel, has 30' diameter and 30' height, capacity 1,000 tons, with automatic weighing and sampling devices. The sections being similar, a description of one answers for all save the sixth unit.

From the bin ore goes by conveyor to a set of rolls, reducing pulp to $\frac{1}{8}$ " size, after which it is classified by 22-mesh screens, oversize going to Hardinge conical mills replacing the Chilean mills used at first, mill having 30-mesh. The product, with the undersize from the 22-mesh screens, goes to classifiers, the coarse product from which goes to sand concentrating tables and the finer material to slime tables, there being 22 sand tables and 30 Deister tables to each section. Concentrates go through a tunnel having 6 concrete settling tanks, in which they are dried by vacuum pumps and then taken by belt conveyors to storage tanks above the railway. Concentrates leave one side of the mill, and tailings the other.

The Chilean mills were replaced in 1915 by Burch fine crushing rolls, because the product gave an extraction of 4 lbs. of copper more than formerly, mainly due to finer grinding and additional table treatment. Capacity of mill is now 4,200 tons daily.

A 20-ton experimental plant treats mixed sulphide and oxide ores by a new process consisting of: (a) coarse crushing and removal of fine dust; (b) rough water concentration to take out coarse sulphide matter; (c) roasting of tailings from above; (d) leaching with sulphuric acid solution; (e) precipitation of copper by electrolysis and regeneration of solution with sulphurous acid gas, solution then being used again for leaching.

Concentrates formerly shipped to the Greene Cananea Copper Co., at Cananea, Mex., have been shipped to the International smelter at Miami since April 9, 1915.

The water supply of the mill comes from Pinal creek, and from 3 wells, each producing 500,000 gals. daily at the lower end of the Miami wash. Water is taken from Pinal creek by a 25,000' pipe line of 14" diameter. In addition the company buys from the Old Dominion Copper M. & S. Co. 2,000,000 gals. of water daily. Water from the Old Dominion flows to McLean's ranch, near Pinal creek, whence it is pumped by a Nordberg electric pump of 1,500 gals. capacity per minute, to a 50,000-gal. storage tank at the concentrator, and thence distributed through the works in 12" cast-iron mains.

Buildings include machine shop, warehouses, steel change house, store, boarding house, bunkhouse and upwards of 150 frame dwellings for employes, all lighted by electricity. There is a substantial office building, erected at a cost of \$15,000, a club house and recreation hall, and a hospital owned jointly with the Inspiration Consolidated Copper Co.

The mine is served by the Gila Valley, Globe & Northern railway, with standard gauge, having an excellent average grade and light curves, so that favorable freight rates are given the mine and mill.

In the Miami district the scale of wage for miners varies from \$3.50 when copper sells at 13c to a maximum of \$5 when the price is 25c per lb.

Production: begun March, 1911—

(a) Smelter returns. Production for 1st quarter 1916 was 12,092,936 lbs. with net earnings approximately \$1,230,000.												

In 1914 the Mineral Separation Co. brought suit against the company for infringement of patent. The Miami is a property of demonstrated worth and the management is thoroughly experienced and capable. The stock is a first-class investment, with an assured long life for the mine.

MIAMI NEEDLES COPPER CO.

ARIZONA

Globe, Ariz. D. R. Williamson, pres.; F. Beston, v. p.; F. W. Ham, sec.-treas.; the above and Geo. J. Stoneman, directors. Inc. 1912. Cap., \$500,000; shares \$5 par.

Property: 11 claims on Needle mountain, about 5 miles west of Miami, slightly developed, shows altered schist and Schultze granite, the former with evidences of mineralization along narrow belts. Much of the group is covered by barren Gila conglomerate.

Is apparently succeeded by Inspiration Needles Copper Co., which see.

MICHIGAN & ARIZONA DEVELOPMENT CO.

ARIZONA

Office: 905 Metropolitan Life Bldg., Minneapolis, Minn. Mine near Helvetia, Pima Co., Ariz. C. C. Prindle, pres.; R. M. Bennett, v. p.; Chas. W. Sexton, sec.-treas. This company reorganized the Helvetia Copper Co. under a plan explained Vol. V. Formerly owned a considerable share interest in the Helvetia and about 40 undeveloped claims adjoining the Helvetia. Reported idle.

MICHIGAN COPPER MINING CO.

MICHIGAN

Office: 15 William St., New York. Mine office: Rockland, Ontonagon Co., Mich. **Officers:** John R. Stanton, pres.; Geo. W. Drucker, sec.; F. McM. Stanton, treas.; preceding officers, Jas. S. Dunstan and Alfred M. Low, directors. Samuel Brady, supt.; Henry Stubensky, clerk.

Inc. Jan. 5, 1899, in Michigan. Cap., \$2,500,000; shares \$25 par; fully issued; \$21 paid in. Last assessment levied July 19, 1915, brought the company \$76,727. The company ended 1915 with a deficit of \$117,907 compared with \$156,172 in 1914. Income, 1915, \$77,104; operating expense, \$31,253; interest and taxes, \$7,997; surplus, \$38,265. Old Colony Trust Co., Boston, registrar; American Trust Co., Boston, transfer agent. Annual meeting, first Tuesday in May. Listed in Boston.

Property: the Minnesota, Rockland and Superior mines, 4,870 acres of mineral territory, 1,466 acres of timber and miscellaneous lands and a 150-acre mill site, giving total holdings of 6,686 acres, mineral lands being in Secs. 1, 2, 3, 9, 10, 11, 13, 14, 15, 16, 17, 21, 22, 23, 24, 25, 26 and 27, T. 50 N., R. 30 W.

The main tract is 3 miles east and west by $4\frac{1}{2}$ miles north and south, in addition to which there are 4 scattering tracts to the westward, 1 of 40 acres, 2 of 80 acres each and 1 of 160 acres, all carrying the outcrop of the Calico amygdaloid. The Superior mine produced 567,331 lbs. fine copper, 1856-69 and 1876-79. The Rockland, lying next east of the Minnesota, was operated 1853-70, making 6,210,309 lbs. fine copper from the Minnesota contact vein which averaged about 2' width and carried considerable silver in that mine. The old Minnesota mine, opened 1847, closed 1870, made 34,704,668 lbs. fine copper and paid dividends of \$1,820,000. The Minnesota mine is fully described Vol. II, Copper Handbook.

The Michigan tracts carry the following known copper-bearing beds of the Evergreen belt: Calico, Contact, Minnesota, Branch, North Contact, Knowlton, Mass, Butler, Ogima, North Amygdaloid and South Amygdaloid, and presumably the other parallel beds, in addition to various other unidentified copper-bearing beds of the Keweenaw series. The Knowlton, or northernmost of the Evergreen belt of parallel beds, lies about 1,000' south of the old Minnesota shafts and the 7' amygdaloidal bed supposed to be the Butler, opened to some extent in Peninsula bluff, 2,000' south of

"B" shaft, shows some heavy copper and stamp rock. There are 3 old shafts on the Butler bed and a tunnel cutting several parallel copper-bearing strata. There also are cupriferous amygdaloidal outcrops north of the Calico bed on which no work has been done.

The Michigan mine has 3 shafts on the Calico bed and about 10 miles of workings. "A" shaft is 2,133' deep; "B" is bottomed at the 14th level, and "C" at the 11th level. The lode grew steadily poorer with depth and showed a tendency to pinch, being only about 5' wide on the 16th level of "A" shaft, though well charged with copper. The mine was closed down Oct., 1909, continuing about 25 men in exploratory work until the end of 1910, when the property was turned over to tributors, who continued to scram the mine with some profit to themselves and the company until May, 1913, when all work was stopped.

In July, 1915, work was resumed in the old "E" shaft, 265' deep, on the Butler lode; it was sunk to the 6th level, where drifting east and west is said to have opened a lode 7' in width, containing good copper values.

Buildings include a machine shop, smithy, carpenter shop, warehouse, office and changing house.

The mill, construction of which was begun April, 1906, is about 1 mile north of the Mass mill, on Keweenaw bay, with ample water frontage. Construction was suspended, 1907, though perhaps no more than \$10,000 would be required to complete the mill, on which about \$175,000 has been expended.

Production: 1900-1905, 6,113,500 lbs. copper; 2,875,341 lbs. copper in 1906; 2,665,404 lbs. in 1907; 3,000,206 lbs. in 1908; 1,979,305 lbs. in 1909; 36,682 lbs. in 1910; 327,773 lbs. in 1911; 162,590 lbs. in 1912. The mine in the past has proven a disappointment, and untoward financial conditions have restricted the exploratory and development work that are clearly called for. The property is very fully described in Vol. X, Copper Handbook.

MICHIGAN COPPER & GOLD MINING CO. UTAH

Mine office: Frisco, Beaver Co., Utah. **Officers:** Lawrence Green, pres.; Sam S. Porter, v. p.; Geo. Winsness, sec.; Rodney T. Badger, treas.; preceding, with H. M. Dinwoody, H. G. Williams and R. P. Morris, directors; E. Rummelmeyer, cons. engr. Inc. Dec., 1902, in Utah. **Cap.**, \$300,000, increased, 1911, to \$1,000,000; shares \$1 par. Assessment of $\frac{1}{4}$ c levied Feb., 1914.

Property: 6 claims, patented, including the New York group, near the Horn Silver mine, 1 mile east of Newhouse, in the San Francisco district and $\frac{3}{4}$ mile from the railway. Claims said to show 12 parallel veins intersecting the main contact. **Development:** by shafts of 80', 100' and 200' and a 50' tunnel. The mine has a paystreak carrying ore giving assays of 13.3% copper, 2.1% lead and 7.5 oz. silver per ton. Was developing with contract labor, at last accounts.

MICHIGAN MINING & MILLING CO. COLORADO

Office: 502 Majestic Bldg., Denver, and Kokomo, Summit Co., Colo. W. R. Benzie, sec.-treas.

Company has 5-year lease, with option to purchase, on 8 claims in the Kokomo district. Property is an old one, extensively developed, and has produced considerable quantities of gold-silver ore, but was forced to close down several years ago due to the heavy zinc penalty on the ore. Since that time it is said bodies of zinc and lead ore have been opened up and shipments started early 1916. In March, company was planning on a daily output of 50 tons.

MICHIGAN SMELTER CO. MICHIGAN

Office: 82 Devonshire St., Boston, Mass. **Works office:** Houghton,

Houghton Co., Mich. **Officers:** Wm. A. Paine, pres.; John R. Stanton, v. p.; Frederic Stanwood, sec.-treas.; Frederick I. Cairns, supt., and Chas. A. Snow, directors; John Mugford, asst. supt.

Inc. 1903 in Michigan. Cap., \$500,000; shares \$25 par. The entire stock issue is owned by 6 mining companies, the Copper Range group holding 12,000 shares and the Stanton companies 8,000 shares, holdings in shares being as follows: Champion, 4,400 shares; Trimountain, 4,400; Baltic, 3,200; Mohawk, 3,200; Wolverine, 3,200; Atlantic, 1,600. No dividends have been paid, profits having been turned back into improvements. Annual meeting, second Monday in January.

Company owns and operates the Michigan smelter, 3 miles west of Houghton, near the old Atlantic stamp mill, with frontage on Portage lake. It was designed by Frank Klepetko and is the largest and most modern smelter in the Lake Superior district, with a capacity of 90,000,000 lbs. fine copper yearly.

The plant is terraced throughout, permitting automatic handling of material. The copper ore (locally mineral) is delivered in 40-ton bottom-dumping steel cars by the Copper Range railroad, which also hauls away the refined copper for shipment from the Copper Range wharves in Houghton.

The 3,000-ton storage bins hold 10 days' supply for the works. Mineral is dehydrated in rotary dryers by water gases from the furnaces, taken to the furnaces in tram cars and dumped into hoppers on the charging floor. Coal trestles, on an upper level, hold 15,000 tons of hard and soft coal, with tunnels underneath through which fuel is taken in tram cars, descending by gravity to the furnaces and boiler rooms. There also are separate storage bins for charcoal, sand and limestone.

The reverberatory furnace buildings has three 5-ton traveling cranes and 6 furnaces. Alternating with the larger reverberatories are one 300-h. p. and two 200-h. p. Stirling water-tube boilers, heated by waste gases from the furnaces. After leaving the boilers the gases are drawn through a 6x8' subterranean flue, with arched roof, up the hill to a 150' smokestack, with base 100' above the furnace building.

The blast-furnace building has 2 blast furnaces. Blister copper is cast, mechanically, in moulds upon a circular casting table, cooled in water, and carried by a link elevator to the loading platform. Slags are carried mechanically to the sampling mill and reduced in a 30-ton crusher of 1,000 tons daily capacity for resmelting. The slag from the final fusion is granulated by water and discharged through launders to low ground northward for grading.

The combination machine shop and power house has a complete equipment driven by an independent engine, and a 300-h. p. Nordberg horizontal tandem-compound engine, driving a 200-k. w. generator, actuates the rotary blowers for the blast furnaces. Electric power is used for operating the drying plant, cranes, casting machinery and lighting. There are 3 specially designed Jeffrey electric locomotives.

Miscellaneous buildings include office, laboratory, warehouse, barn, etc. Water is obtained from the old Atlantic dam, on Cole's creek, through a 4,300' flume with capacity of 5,000 gals. per minute, leading to a 50,000-gal. storage tank, 100' above the works, giving good pressure at all points. The plant is well planned and well handled.

MICHIGAN-UTAH CONSOLIDATED MINES CO.

UTAH

Office: 412 Dooly Blk., Salt Lake City, Utah. Mine office: Alta, Salt Lake County. **Officers:** Norman W. Haire, pres. and managing director; H. R. MacMillan, v. p.; C. A. Gillette, sec.; L. H. Farnsworth, treas.; with

Duncan MacVichie, Frank B. Cook and N. A. Robertson, directors; A. O. Jacobson, gen. mgr.; Henry Barney, supt.

Inc. April 26, 1915, in Utah, as a reorganization of the bankrupt Michigan-Utah Mining Co. Cap., 1,500,000 shares; 25c par; assessable; 1,092,614 shares issued. Listed on Salt Lake Exchange. Columbia Trust Co., registrar. Annual meeting, 2nd Monday in February. Gross earnings in 1915 were \$29,901, all from ore sales.

Property: 72 claims, 42 patented, 1,200 acres, including a millsite, in the Big and Little Cottonwood mining districts. Claims show Paleozoic sediments cut by granite, the ore occurring in fissure veins in limestone, and as contact metamorphic deposits between limestone and granite, having a general strike of N. 65° E., and a dip of 32°. There are 5 distinct and parallel veins showing average widths of 2½' and traceable 5,000', reported to carry copper, lead, zinc, silver and gold values, averaging \$25 per ton. Ores are carbonates at and near surface, succeeded below by sulphides.

Development: principally by tunnels, all workings being in the oxide and carbonate zones, but sulphides are proven to occur in depth by workings of the Columbus Consolidated Mining Co., near by. Total underground openings aggregate 50,000', about one-half being represented by tunnels, drifts and crosscuts that are all in ore, raises and winzes aggregating 10,500' additional. Ore is transported by aerial tramway to Tanners flat, 5 miles from the mine, and thence by wagon road and railway to the Midvale smelter. The tram has a maximum capacity of 200 tons daily.

Equipment: includes two 90-h. p. hoists, and a 12-drill Ingersoll-Rand air compressor. A small concentrator is run by a 200-h. p. steam plant, but mine uses electric power throughout.

Buildings include machine shop, carpenter shop, several dwellings and a smithy, located underground as a measure of protection from snowslides, which are of frequent occurrence in this region.

Production: from July to December, 1915, 67,404 oz. gold, 43,135 oz. silver, 99,066 lbs. copper, 515,296 lbs. lead; total gross value, \$65,182.

Property considered promising and management reported Feb., 1916, that company has been financed, part of its debts paid and sufficient money is in the treasury to continue development work.

Triangle Leasing Co. is reported to be shipping 50 tons of ore daily from a lease on a portion of company's property.

MICHOCAN RAILWAY & MINING CO., LTD. MEXICO

Address: G. A. Mitchell & Co., secretaries, 2 Suffolk Lane, Cannon St., London, E. C., England. Mine office: Anganguero, Michoacan, Mex. Works office: Ocampo, Zitacuaro, Michoacan, Mex. G. A. Mitchell and C. H. Potter, directors.

Inc. Jan. 29, 1889, in Great Britain. Cap., £105,364; shares £1 par, in £21,015 "A" noncumulative 7% preference shares, £12,190 "B" noncumulative 7% preference shares, £70,745 ordinary shares, and £1,414 founders' shares; issued £99,370. Debentures, £27,090 of 5% prior lien bonds, and £103,000 of 4% mortgage bonds. Is £47,380 in arrears of interest on mortgage bonds. The railway rights originally held have been disposed of to the Michoacan & Pacific Railway Co., in which the company has a £60,000 share interest in addition to £18,600 bonds held.

Property: 537 hectares known as the Anganguero silver mines, opened by tunnels and variously reported to have 14 to 30 kilometers of workings, was leased, 1909, for 10 years, to the American Smelting & Refining Co., and this lease has been extended until July, 1933, at a minimum annual rent of \$50,000 (Mexican) and ½ the net profits. No reports issued 1914-15 owing to revolutionary conditions in Mexico. Cash balance Dec., 1913, £18,518.

MID-COLORADO MINES CO.**COLORADO**

Georgetown, Colo. **Officers:** Abraham Plank, pres., Wooster, Ohio; O. H. Kniffen, v. p.; L. A. Lang, sec., Denver; I. E. O'Hail, treas., Wooster; preceding, with Geo. B. McFadden, directors.

Inc. March, 1915, in Colorado. **Cap.**, 600,000 shares; \$1 par; 400,000 outstanding. Annual meeting, second Tuesday in July. Operating expenses in 1915, \$1,200 monthly. Indicated earnings in 1915, 10c per share, used for development work.

Property: 13 claims, 11 patented, on Republican Mt., ½ mile W. of Georgetown, including the Mineral Chief mine, was purchased in 1915. **Ore:** gold, silver, lead, zinc in fissure vein in porphyry, said to assay .09 gold, 16 oz. silver, 18% lead, 7% zinc.

Development: by 7 shafts ranging in length from 140' to 1,100', with total workings of 1½ miles. **Ore reserves:** said to be 50,000 tons. Company has a 50-ton mill equipped with crusher, rolls, jigs and tables. Electric power is used.

Production: previous to 1915 said to be 190,000 tons. The output in 1915 came from development work and had an average value of \$15 per ton. Company intends driving a new tunnel 100' below the 6th level.

MIDAS COPPER CO.**ALASKA**

Property now owned by Granby Cons. M., S. & P. Co., which see.

MIDDLEMARCH COPPER CO.**ARIZONA**

Office: 212 Henne Bldg., Los Angeles, Cal. Mine office: Middlemarch, Cochise Co., Ariz. Mine formerly owned by Gird Bros. and M. M. O'Gorman, of Los Angeles, Cal. **Inc.** April 26, 1907, in California. **Cap.**, \$1,000,000, increased March 28, 1906, to \$3,000,000; shares \$100 par. Absorbed the Cobreloma Consolidated Copper Co., about 1907. Annual meeting, first Monday in April. Reported to be under option for about \$50,000 to Geo. Mitchell, Jr., Los Angeles, Cal.

Property: 68 claims, 1,360 acres, in the Dragoon mountains, showing several contact deposits between limestone and granite-porphyry, with a general N. W. strike, and dip of 42 to 54°. The 2 orebodies under development, said to be 30 to 80' wide, show oxidized ores succeeded by chalcopyrite, with some chalcocite.

Development: by 9 shafts, deepest 210', and 6 tunnels, total workings being about 2 miles, estimated by management to show 200,000 tons of ore, with 100,000 tons blocked out for stoping in the Missouri mine, with ore in other properties, though not extensively developed.

Equipment: includes a 300-h. p. steam plant, 50-h. p. hoist and 4-drill Laidlaw air compressor. There are 12 buildings, including engine house, boiler house, machine shop and smithy.

MIDLAND LEAD & ZINC CO.**WISCONSIN**

Platteville, Wis. **Officers:** John Zimmerman, pres.; Wm. S. Perrigo, sec., both of Beloit; R. E. Davis, supt., Platteville. **Inc.** in Wis. **Cap.**, \$25,000; shares \$1 par.

Property: 80 acres, 5 miles south of Platteville, said to show lead-zinc ore in limestone. Developed by 120' shaft. **Equipment:** includes steam hoist and 100-ton concentrator. Company is a small producer of lead-zinc concentrates.

MIDNIGHT MINE.**ARIZONA**

Office: care St. Charles Bros., owners, Kingman, Ariz. Mine near Chloride, Mohave Co., Ariz., has a deposit of gold-copper ore developed by 200' shaft. **Equipment:** includes 10-stamp mill and concentrator.

Under option, 1916, to G. H. Holmes, Salt Lake City. Reported to be drifting on 200' level and planning to sink shaft deeper.

MIDWAY SUMMIT MINING & MILLING CO., LTD. IDAHO

Office: 419 Chamber of Commerce Bldg., Spokane, Wash. Mine near Burke, Shoshone Co., Idaho. Geo. Herron, mgr. Inc. 1911 in Idaho. Cap., \$1,500,000; shares \$1 par. Applied for patents on 11 claims, 1914, in Lelande and Hunter districts.

Development: over 6,000' of work has been done on property, without disclosing ore in commercial quantities. Drifting on 1,100' level, 1915.

MILDRED GOLD MINING CO. ARIZONA

Mine near Congress Junction, Yavapai Co., Ariz. Dan B. Genung, supt., Stanton, Ariz. **Property:** 14 unpatented claims said to carry gold, silver, lead ore. Developed by about 3,000' of shafts, drifts, etc., and equipped with 2 hoists, 10-stamp mill, pump, etc.

MILITARY MINING & MILLING CO., LTD. IDAHO

Fred Bergen, pres.; L. H. Hays, sec. Cap., \$1,000,000; shares \$1 par. **Property:** 2 claims near Burke, Shoshone Co., said to show a 5' vein, traceable 2,000', carrying copper with quartz and quartzite gangue, developed by a 57' shaft. Was under option to F. Cushing Moore, Wallace, Ida., for \$100,000 in 1914, but option was not exercised. Assessment work only done, 1915.

MILLER HILL MINING CO. UTAH

Idle. Office: Knight Block, care Knight Bros., Provo, Utah. Mine office: American Fork, Utah Co., Utah. **Officers:** Jesse Knight, pres.; J. Wm. Knight, v. p.; W. Lester Mangum, sec.-treas. Cap., \$100,000; shares 10 cts. par. Shares are listed on the Salt Lake Stock Exchange. Stock selling at 20-24c.

Property: 33 claims, 30 patented, adjoining the Mineral Flat mine, are developed by shaft and tunnel with about 400' of workings. Company purchased the adjoining Mountainedell property in 1916.

MILLER MINING & SMELTING CO. UTAH

Office: P. O. Box 7, Salt Lake City, Utah. W. A. Wilson, gen. mgr. **Property:** 10 claims, patented, 56 acres, in American Fork canyon. Ore carries a little copper, with mainly gold, silver and lead values. Management reports production of \$1,600,000 to end of 1912. Company inactive at present, but property reported under examination, Jan., 1916.

MILLERTON GOLD MINES, LTD. ONTARIO

See Hollinger Cons. Gold Mines, Ltd.

MILLER LAKE O'BRIEN MINE. ONTARIO

K. D. Woodworth, mgr., Gowanda, Ont. Is a privately owned property and has been one of the leading silver producers in the Gowanda district. Developed by shafts; No. 2, the deepest, 450', at last accounts. In 1914 underground work totaled 2,552'.

Equipment: includes hoists, 20-drill compressor, and a mill; a hydro-electric plant between Gowanda and Burke Lakes is equipped with 2 turbines and a 900-h. p. generator.

In 1914 the mill treated 2,348 tons, producing 46 tons of concentrates. Power difficulties, caused by shortage of water, necessitated curtailed production for several months during winter of 1914-1915.

MILLTOWN EXTENSION GOLD MINING CO. COLORADO & NEVADA

Cripple Creek, Colo. Inc. in Nevada. Cap., \$1,500,000; shares \$1 par; in treasury, 800,000 shares. Company was organized in 1915 to secure title to the Louise Fraction and Milltown Extension claims at Goldfield; also owns 2 claims in Pioneer, Nev., has a lease on the Pioneer Extension property, and a half interest in the lease on the Jerry Johnson mine at Cripple

Creek; this lease, owned by the Cripple Creek Deep Leasing Co., is from the 650' level down.

The 2 claims at Goldfield are being explored on the 700' level by a cross-cut being run from the Yellow Tiger Co.'s shaft to the property of the Red Lion Cons. Mng. Co., which lies on the opposite side of Milltown Ext.

Work at present in the Jerry Johnson mine is on the 850' level. Management states that since shipments started in 1915, to May, 1916. 22 carloads of ore have been shipped, ranging in value from \$6.30 to \$28 per ton.

Property holdings of the company do not look attractive.

MINA MEXICO CO.

MEXICO

Is the operating and Mexican company of the Chicago Exploration & Development Co., operating the Mexico mine, 45 miles from Tonichi, Sonora, Mex. W. E. Pomeroy, mgr.; Geo. B. Squire, supt. of smelter; Chas. Gercken, mine supt.

Veins are very narrow, from a few inches to 2' in width, and values vary from a few ounces to several hundred ounces silver per ton. Mine is very wet. Has 85-ton charcoal-burning smelter. Was working 1914, but all American officials left Mexico and placed mine in charge of Mexican foreman.

MINE LA MOTTE CO.

MISSOURI

Mine La Motte, Madison Co., Mo. A. J. Meier, pres.; J. F. Thompson, supt. Inc. about 1903 in Maine. Cap., \$200,000.

Mine reported leased to National Lead Co. for 10 years from 1913 on a 10% royalty basis, with option to buy at \$800,000.

Controls about 37,000 acres of land in the disseminated lead ore district of southeastern Missouri. For geology, see Kemp's "Ore Deposits," p. 228, also Mo. Geol. Survey, Vol. IX, Report 4, p. 48. The property is said to have been worked for lead since 1720.

Development: by a number of shafts, average depth 125'. The shallow surface diggings, which were first worked, were followed down 100-125' and from this level the ore has been coming that for 50 years has supplied the mill and smelter. In recent years the copper and nickel-cobalt sulphide ores, which occur in bunches and masses in the lead ore, have not been mined, owing to the difficulty of smelting them. In 1915 four shafts were operated and much of the ground was reworked with steam shovels. The mill, practically new, treats 800 tons per day with Hancock and Hartz jigs and tables. Much carbonate of lead is recovered. Production in 1915 was largest in history of the mine, but figures cannot be given, as the company gives out no information.

MINERAL DEVELOPMENT CO.

MEXICO

See Proprietary Mines Co. of America.

MINERAL FARM MINING CO., LTD.

IDAHO

Offices: Paulsen Bldg., Spokane, and Mullan, Idaho. **Officers:** L. C. Jaquish, pres. and mgr.; Wm. Sellars, v. p.; C. D. Miller, sec.-treas.; above, with John Kamerer, J. H. Pelletier and J. H. Greiner, directors.

Inc. 1904 in Idaho. **Cap.**, 1,500,000 shares; \$1 par; assessable; outstanding 670,000. Annual meeting, first Monday in September. Listed on Butte Exchange. Treasurer's report for period Oct. 25, 1913, to May 10, 1916, shows receipts of \$4,450, with disbursements of \$2,618, leaving balance of \$1,832.

Property: 9 claims, 8 patented, 170 acres, 1 mile west of Mullan, has a fissure vein in Revett and Burke quartzite, on which work was started in 1908. **Development:** 3 tunnels, 60', 800' and 1,445' in length, with 3,700' of underground workings. Mine was idle in 1915. Management resuming operations, 1916.

MINERAL FLAT EXTENSION MINING & MILLING CO. UTAH

Carbonate, Juab Co., Utah. **Officers:** Jos. I. Bullock, pres.; F. E. Brown, sec.; Wm. H. Horner, supt. **Inc.** March, 1909, in Utah. **Cap.**, \$50,000; shares 5 cts. par; assessable.

Property: 2 miles south of Alta, in Little Cottonwood district, White Pine canyon, shows a 3' vein of copper ore, giving assays up to 50% copper, also silver-lead ores. Developed by tunnel and shaft, with drifting on vein. Company has kept up assessment work on its unpatented claims. Tunnel in 300' early in 1916.

MINERAL FLAT MINING CO. UTAH

Office: Provo, Utah. Mine office: American Fork, Utah Co., Utah. Jesse Knight, pres.; J. C. Jensen, mgr. **Inc.** in Utah. **Cap.**, \$100,000; shares 10 cts. par; assessable. Shares listed on Salt Lake Stock Exchange.

Property: 22 claims, partly patented, 25 miles from a railway, carries lead and copper ores. Developed by shaft and tunnels of about 1,500' aggregate length, upper levels showing occasional bunches of good ore, but without continuity of payable mineral. **Equipment:** includes a hydro-electric plant, with a 9,000' pipe line and several buildings. Worked by lessees 1914-15 and reported to be shipping high-grade lead carbonate ore.

MINERAL MILL CONSOLIDATED COPPER CO. ARIZONA

Office: 331 Fourth Ave., Pittsburg, Pa. Mine office: Tucson, Pima Co., Ariz. **Officers:** M. S. Isherwood, pres.; Boon Ingells, v. p.; E. B. Reeser, sec.-treas. and gen. mgr. **Inc.** March, 1904, in Arizona, as successor of Azurite Copper & Gold Mining Co. **Cap.**, \$3,000,000; shares \$1 par.

Property: the Azurite mine with 26 claims, 12 patented, 520 acres, in the San Xavier district, 18 miles S. W. of Tucson, said to have produced \$550,000 worth of ore under former ownership. Company's lands also include the American group of 8 claims and the Mineral Hill group of 5 claims. The mine is claimed to have a large body of sulphide ore averaging about 3.5% copper.

Development: by 74 pits and open cuts, 8 tunnels, longest 250', and 48 shafts, deepest 345', mine having a total of about 1 mile of workings. Company operated in 1912, but closed down in Sept., 1913, and apparently still idle, 1916.

MINERAL HILL CONSOLIDATED MINES CO. NEVADA

Mineral Hill, Nev. **Officers:** S. C. Pratt, pres.; Dan'l Pratt, v. p.; L. A. Squires, Brooklyn, N. Y., sec.; J. S. Wilcox, treas. **Inc.** 1906 in Ariz. **Cap.**, \$1,000,000; shares \$1 par; nonassessable; 713,000 issued; \$100,000 6% bonds authorized; issued, \$2,500.

Property: 11 claims, 3 patented, 135 acres, in Mineral Hill district, Eureka Co., Nev. Mine discovered 1869 was worked from 1871 to 1878, when it was closed because of the drop in silver; reopened in 1906.

Ore: occurs in dolomitic limestone and carbonaceous shale. Commercial orebodies, usually confined to the limestone, are found in fracture zones which correspond to strike faults. Principal ore is silver, which occurs as argentite with some gray copper, galena and gold. There is about 2,000' of underground development.

Samples of over 4,000 tons varied from 3.8 to 177 oz. silver and 0.5% to 0.7% lead, averaging 53.5 oz. silver and 0.04 oz. gold.

MINERAL HILL MINING CO. NEW MEXICO

Office: 13 Arch St., Philadelphia, Pa. Samuel P. Hanson, pres. Is the successor of the Donna Dora Mining Co. **Property:** on the eastern slope of the Organ Mts., near Organ, Dona Ana Co., N. M., is developed by 400' tunnel and shallow shaft sunk on a 5' vein containing copper, lead, silver and gold values. No recent returns received.

MINERAL HILL TUNNEL & COPPER MINING CO. WASHINGTON

Address: F. E. Houghton, Room 1140 Old South Bldg., Boston, Mass. Mine office: Danville, Ferry Co., Wash. Lewis A. Crosby, pres.; A. L. Bradley, gen. mgr. Inc. 1906 as successor of Minnehaha Copper & Gold Mining Co. **Cap.**, \$2,000,000; shares \$1 par.

Property: 700 acres, in 8 groups, about 5 miles from the Granby smelter, in the Curlew district, Ferry Co., Wash. Idle and in process of reorganization. Letters neither answered nor returned. See Vol. XI, Copper Handbook.

MINERAL LANDS COMPANY.**UTAH**

Idle. Office: 36 Exchange St., Portland, Me. Mine address: Bingham Canyon, Utah. J. A. Waterman, treas. Inc. 1913 in Maine. **Cap.**, \$500,000; shares \$5 par. Company owns entire capital stock of the Markham Gulch Mining & Milling Co.

Property: the Red Wing and Butler-Liberal mines, with about 300 acres in Markham gulch, formerly owned by the North Utah Co., of Bingham, Utah. The claims carry the Florence and Erie fissures, latter having been a good producer in the upper levels. **Development:** mainly by tunnels, with about 5 miles of workings, showing ores carrying lead, silver, copper and gold values, in about the order named.

Equipment: includes 200-h. p. electric hoist and 12-drill compressor. No recent returns received.

MINERAL POINT ZINC CO.**WISCONSIN**

(Subsidiary of New Jersey Zinc Co.) Concentration works at Mineral Point, Wis. Operates the Kennedy, Red Jacket, Franklin, Black Jack, Coker, New Coker, Fox and Penna-Benton mines, in the Wisconsin zinc field. The concentration plant at Mineral Point is equipped with a new multihearth roaster treating 150 to 200-ton charge. The pyrite is removed by magnetic separating machines and the jig concentrate raised from 37% to about 59%, with 90% recovery and a cost of \$2 per ton.

MINERAL ZONE MINING CO.**IDAHO**

G. L. L. Baskett, supt., Elk City, Idaho. **Property:** known as the Parr group, includes the Mineral Zone gold mine near Elk City. In April, 1916, a clean-up of a 15 days' run is said to have yielded \$2,300. **Development:** is by tunnels. There is a 3-stamp mill on the property. Ten men employed.

MINERALS SEPARATION, LTD.

Sec. and offices: A. O. Williams, 62 London Wall, E. C., England. **Directors:** J. Ballot, chairman and managing director; J. H. Curle, F. L. Gibbs, Dr. S. Gregory, H. A. Krohn, W. W. Webster. Inc. in 1903 to carry on metallurgical operations. **Cap.**, £50,000; shares £1; all issued and fully paid.

Annual report for 1914, submitted Dec. 29, 1915, shows a profit of £11,925; balance forward, £35,177; cash, £8,861; investments, £69,672; creditors, £12,901; debtors, £25,969; share premium account, £21,266.

Company owns 30,430 A and 200,000 B shares in Minerals Separation American Syndicate (1913), Ltd. The chief assets of the company are a number of patents for flotation processes and machines for recovery of concentrates from silver-lead, zinc and copper ores. The use of this process has been as great an advance in the treatment of zinc and copper ores as the cyanide process has been for gold ores. It is heartily recommended where applicable.

MINES COMPANY OF AMERICA.**MEXICO**

Office: 111 Broadway, New York City. **Officers:** John Lambert, pres., Chicago; W. E. Reis, v. p.; W. H. Aldridge, 2nd v. p.; A. T. Black, 3rd v. p.;

H. S. Black, treas.; J. D. Tooker, sec. and asst. treas.; preceding, with W. L. Fillwood, W. B. Thompson and W. H. Smith, directors; Chas. Biesel, gen. mgr., El Paso, Texas.

Inc. Dec., 1902, in Me., as a holding company. Owns entire capital stock of the **Creston Colorado Co.**, 99% of capital stock of **Dolores Mines Co.**, 99½% of capital stock of the **El Rayo Mines Co.**, and 33⅓% of the **La Dura Mill and Mining Co.**, of which company the Dolores Mines Co. owns 33⅓% and the El Rayo Mines Co. 33⅓%. Also owns the **Chihuahua-Esperanza Gold Mining Co.** and the **Consuelo Mining, Milling & Power Co.**

Cap., \$9,000,000; outstanding, Dec. 31, 1915, \$8,376,583; shares \$10 par. Authorized capital stock increased 1910 from \$2,000,000, and par value shares from \$1. Of the new stock \$4,000,000 was set apart to acquire the \$2,000,000 stock of the Dolores Mines Co., and \$2,499,100 was appropriated to acquire the \$714,040 stock of the El Rayo Mines Co. U. S. Mortgage & Trust Co., New York, transfer agent. Guaranty Trust Co., New York, registrar. Annual meeting, first Wednesday after first Saturday in November, at Augusta, Me.; books close 10 days in advance. Stock listed on New York Curb.

Dividends: total paid to Dec. 31, 1915, amounted to \$4,958,600, including a dividend in 1906 in stock of the Dolores Mines Co. No dividends were paid in April, July or Oct., 1912, owing to revolutionary conditions in Mexico; in January, 1912, 1½% was paid. Dividends resumed in January, 1913, with payment of 1¼%, which rate was also paid in April and July, 1913; no payments since.

Comparative Cons. General Balance Sheet, Dec. 31

Assets:	Prop. & Investments	Plant & Equip.	Claims Against Mex. Govt.	Current Assets	Total
1915.....	\$7,911,712	\$1,050,660	\$392,859	\$732,089	\$10,087,322
1914.....	7,951,718	1,041,639	382,920	960,848	10,337,126

Liabilities:

Cap. Stock Outstanding	Sub. Co.'s Stock Out.	Suspense Account	Cur. & Wk'g Accts. Pay.	Surplus & Res.	Total	
1915..	\$8,376,583	\$23,604	\$302,202	\$56,358	\$1,328,573	\$10,087,322
1914..	8,376,583	23,624	291,314	90,743	1,554,861	10,337,126

Operating receipts for 1915 were \$955,953; operating expenditures, \$884,915, leaving an operating profit of \$71,037, compared with \$84,062 in 1914. Adding interest \$8,908 and deducting general expenses and taxes, \$31,400, leaves a profit for 1915 of \$48,546, as compared with \$56,050 for 1914.

Ore reserves: on Jan. 1, 1916, estimated total ore reserves of the company's properties were 418,016 tons, with a gross value of \$4,414,393. During 1915 the company milled 164,919 tons ore, having a total value of \$963,310.

Companies controlled by Mines Company of America:

Chihuahua-Esperanza Gold Mining Co., Mexico.

Owned by Mines Company of America. **Property:** adjoining that of the Dolores Mines Co., Chihuahua, on the west, consists of 3 claims, 304 acres. Company also owns 10,000 acres of timberland 5 miles north of Dolores.

The formation is similar to that of the Dolores. No development work has been done on the property; its value is prospective, but as the Dolores main vein dips toward the Esperanza east side line, the future lower levels of Dolores will probably be in Esperanza ground.

Consuelo Mining, Milling & Power Co., Mexico

Control owned by Mines Company of America. **Property:** adjoins that of the Dolores Mines Co., west of Madera, in Chihuahua, on the south and east, and consists of 77 pertenencias, 190 acres, and a half interest in 9

pertenencias; 22 acres, also a water right on the Tutuaca River. The formation is similar to that of Dolores. No systematic development has been done; the value of the ground is prospective.

Creston Colorado Co., Mexico

Controlled through entire stock ownership by Mines Company of America. Mine office: Torres, Sonora, Mex. **Officers:** John Lambert, pres.; W. E. Reis, v. p.; A. T. Black, 2nd v. p.; H. S. Black, sec.-treas.; J. D. Tooker, asst. treas.; John Lambert, W. E. Reis, J. H. Hoyt, H. A. Kelly, G. von den Steinem, directors. **Inc.** February, 1902, in Ohio. **Cap.**, authorized and outstanding, \$100,000; par \$100. Annual meeting, 1st Saturday in November.

Property: 27 claims, 828 acres, commonly known as "Minas Prietas" (Black Mines), in Sonora, at La Colorada, a station on the narrow-gauge Mexico Union Ry., 12 miles east of Torres, on the Southern Pacific R. R. of Mexico, and 200 miles south of Nogales, Ariz. The mines have been worked for 100 years and have produced regularly during the last 33 years. Gross production estimated at over \$112,000,000.

The property is divided into 4 different mines: the Creston, Colorado, Amarillas-Grand Central and Verde. The claims contain a number of producing veins, and cover the latter for 8,000' along their strike. Company also owns surface rights to 7,000 acres land, including the mining claims. It also owns a water right on the Matape River.

Ore: veins have a general E.-W. strike, dip N. 55° to 90°, and vary in width from 3' to 40'. Larger orebodies occur principally in diorite, metamorphic rocks and quartz porphyry. The Creston ore, or east end ore, is a highly fractured quartz. The Colorado is a harder quartz. Sulphides of silver, iron, lead and zinc occur from the surface down. Streaks of high-grade sulphide shipping ore are occasionally found. The Verde ore is a hard quartz, at times very refractory. The Amarillas-Grand Central ore is a highly oxidized quartz, containing free gold in places. Average values in ores, as milled, are said to be 60% gold and 40% silver.

Development: in 1915 totaled 2,578', compared with 8,470' in 1914. Work was divided as follows: Creston mine, 2,048'; Colorado mine, 161'; Amarillas-Grand Central mine, 369'. **Ore reserves:** estimated Jan. 1, 1916, as 200,300 tons, average assay \$4.89 per ton, or a gross value of \$981,350, as compared with 272,700 tons, average assay \$4.73 per ton, the previous year; gold figured at \$20 per oz., silver at 50c per oz. The Amarillas-Grand Central mine has one dump of tailing containing 280,000 tons which will be retreated.

Equipment: at the Creston mine includes steam hoisting and compressor plant, foundry, etc.; a large Gates crusher receives the ore from the mine; at the Colorado includes electrically-driven crushing and hoisting plants, also a 350-ton steam operated cyanide plant, which receives Creston ore over a 3,200' aerial tramway, and the Colorado ore over an 800' incline tramway; at the Amarillas-Grand Central mine includes steam operated hoisting and compressor plants, also a 350-ton cyanide plant, which receives ore partly over a branch of the Creston mine tramway and partly over a short aerial tramway from the collar of the Amarillas shaft. A pumping plant, 18 miles from the mines, on the Matape River, supplies water for all purposes through a 5" pipe line.

Mill and cyanide plants: in 1915 extensive shut-downs were in order, due to revolutionary disturbances. The Colorado unit was operated 151 days and treated 58,750 tons of ore; the Amarillas-Grand Central unit was operated 227 days and treated 72,600 tons ore. Extraction amounted to 77.2%, 19.3% by concentration and 57.9% by cyanidation.

Prod'n— Year	Creston Mine, Tons	Colorada Mine, Tons	Am.-G. C. Mine, Tons	Old Tail- ing, Tons	Total Tons	Value per Ton
1915....	98,662	18,854	10,365	3,469	131,350	\$4.80
1914....	94,655	18,090	10,887	3,243	126,875	4.67

The Colorado mine is under water below the 400' level, but will be unwatered as sampling disclosed ore a short distance below the level.

Dolores Mines Co., Mexico

Controlled through ownership of 99% of capital stock by Mines Company of America. Same directorate. Inc. Nov., 1903, in Mex. Cap., authorized and issued, \$2,000,000; full paid and nonassessable; par \$5. No bonded debt. U. S. Mortgage & Trust Co., New York, transfer agent. Guaranty Trust Co., New York, registrar. Annual meeting, first Tuesday in December. Listed on New York Curb.

Entire capital stock of this company was formerly owned by an English company called Dolores, Ltd.; dissolved Feb. 25, 1908, by exchange of stock, share for share, of Dolores Mines, Ltd. The company owns 33 $\frac{1}{3}$ % of the La Dura Mill & Mining Co.

Property: 17 contiguous claims, 250 acres, in Chihuahua, west of Madera, a station on the Mexico Northwestern Ry., about 250 miles S. W. of El Paso, Texas, and 200 miles N. W. of the city of Chihuahua. Mines are reached over a 45-mile trail, requiring 5 to 7 days' time for pack trains. Company also owns 2 detached mineral claims, 126 acres, near Dolores, and all surface rights to 12,500 acres, also a water right on the Tutuaca river. The main group, as shown by developments to date, contains 4 main vein systems, known as the Alma, San Francisco, West San Francisco, Washington and Arco Iris dikes, covered for 8,000' on the strike of the Alma vein system, 4,000' on the San Francisco vein system, 3,800' on the West San Francisco, 1,000' on the Washington, and 2,600' on the Arco Iris vein system.

Geology: vein systems consist of rhyolite dikes in andesite; the veins are fissures in these rhyolite dikes, strike north and dip 55° to 90°. Ore-bodies occur at or near intersections of side fractures and within the boundaries of the dike. The Dolores ore is a very hard quartz, containing about 2% sulphides of iron, silver and occasionally lead and traces of zinc. Values in ore are approximately 40% gold and 60% silver.

Development: in 1915 totaled 2,833', as compared with 1,145' in 1914; all done by hand and above the 500' level. The 600' and 700' levels are under water.

Ore reserves: were estimated Jan. 1, 1916, as follows—

	Tons	Value per Ton	Gross Value
Ore in place.....	114,298	\$13.94	\$1,593,015
Broken ore.....	12,365	14.21	175,678
Total	126,663	\$14.00	\$1,768,693

Compared with 111,116 tons of \$14.09 ore with gross value of \$1,565,513 on Jan. 1, 1915. Values are based on \$20 per oz. for gold and 50c per oz. for silver.

Equipment: includes steam-operated crushing, concentrating and cyaniding plants, also compressor and hoisting plants, machine shops, etc. A steam driven Reidler pump, 2 $\frac{1}{2}$ miles east of the mine on the Tutuaca river, supplies all necessary water. Electrical equipment to supplant steam power is in place. A 30-mile transmission line connects Dolores with Madera; line is designed to carry 3-phase, 60-cycle current of 33,000 volts. Power will be furnished by a generating plant built near Madera, to consist

of three 320-k. w. generators, driven by 3 Diesel type oil engines of the "Snow" make. It is the intention to double the capacity of the milling plant, which now has 25 stamps and four 5' Bryan mills.

The milling plant was not operated in 1915 on account of the revolution. When operating, extraction is about 87%, 18% by concentration and 69% by cyanidation. Bullion is marketed in Maurer, N. J. Concentrates are shipped to the El Paso smelter.

Company employs about 365 men under normal conditions, only 17 being Americans. The small amount of development work done in 1915 gave good results; an orebody of good size and grade was opened up on the 400' level in new ground. What is thought to be the same orebody was recently cut 130' lower on the 500' level. On this level an intermediate vein between the former and the Dolores was also found. Several small orebodies were found on the West San Francisco vein. Management expects to reduce power costs by over 300% when the plant is running by electricity and to double the milling capacity. The future of Dolores looks promising.

El Rayo Mines Co.

Mexico

Controlled through ownership of 99½% of capital stock by Mines Co. of America. Same directorate. **Mine office:** Santa Barbara, Chihuahua, Mex.

Inc. Feb. 13, 1906, in Maine. **Cap.**, \$1,000,000; outstanding \$714,040; shares \$2 par. No bonded debt. Annual meeting, second Tuesday in February. Listed on New York Curb. Company is the American holding company for the El Rayo Mining & Development Co., S. A., a Mexican corporation. Owns the Descubridora Mining & Development Co., and Bueno Vista Gold Mining Co., also 33½% of the La Dura Mill & Mining Co.

Property: 21 claims, 766 acres, in the State of Chihuahua, S. W. of Santa Barbara, the terminal of a branch line of the Mexican Central Railway. Mines can be reached from Santa Barbara over an 8-mile trail. Company also has a 14-year lease on about 12 square miles of timberland, adjoining the mining property. El Rayo is at an elevation of 7,200' above sea level. The mining claims cover the N. S. strike of the producing veins for over 2 miles.

Ore: gold, silver in fissures in rhyolite. Veins dip from 50° to 90° and the filling varies from a friable and oxidized quartz at the north end to a harder sulphide-bearing quartz at the center and south end of the property. The north end contains about 4% sulphides, chiefly iron, with traces of lead and zinc. Copper sulphides are found occasionally. Values in the ore as produced during 1915 are, approximately 74% gold and 26% silver. The orebodies consist of a number of irregularly shaped lenses, greatly varying in width and values. They occur principally at the intersection of side fracture with main fracture.

Development: total underground workings amount to 78,986'. In 1915, 3,989' was done during the limited time of operations; divided as follows: Adela mine, 2,747'; El Rayo mine, 595'; Descubridora mine, 647'. The Adela mine covers 4,700' of the vein system at the north end. The El Rayo mine covers 2,300' of the vein system and adjoins the Adela on the south. The Descubridora mine covers 5,000' of the vein system on the extreme south end of the property. A promising body of \$13 ore was found on the bottom level of the Adela mine. A crosscut to the Richmond vein exposed a narrow vein of high-grade ore. The waste filling system of stopping is used.

Ore reserves: were estimated Jan. 1, 1916, as follows—

	Tons	Value per Ton	Gross Value
Ore in place.....	61,710	\$10.42	\$643,283
Broken ore.....	13,328	10.77	143,542
Total	75,038	\$10.48	\$786,825

Compared with 751,161 tons of \$12 ore with gross value of \$901,000 on Jan. 1, 1915. Values are based on \$20 per oz. for gold and 50c per oz. for silver.

Equipment: includes a 1,950 cu. ft. steam operated compressor plant. A 2-mile aerial tramway furnishes the necessary fuel, lumber and mining timbers.

Mill: includes 160-ton crushing, concentrating and cyaniding plants. From the storage bin at the portal of the 1,100' level of the Adela mine the ore is trammed 1,300' in 6-ton cars to the mill storage bin. Course of ore through plant is as follows: from bin through 9"x15" Blake crusher, set at 1" discharge; undersize by conveyor belt to bin, by Challenge feeder over conveyor belt to one set of 16"x36" Traylor rolls, discharge to 2 sets of 14"x30" Traylor rolls; to classifier; overflow to flotation, oversize in closed circuit returned to 7"x14' tube mill; discharge to classifier, overflow to flotation, oversize in closed circuit returned to tube mill. Flotation rougher cell concentrates to cleaner cell, finished product to Kelly press for dewatering. Flotation tailings discharges to Wilfley tables; Wilfley tailing to elevator to Dorr Thickener and cone for dewatering; dewatered pulp is treated by cyanide solution. Resulting bullion and also the concentrates are marketed in the U. S.

Power: electrification of entire plant is under way. Electricity will be furnished, under contract, by the Cia. Agricola y de Fuerza Electrica del Rio Conches, S. A., from their plant at La Boquilladam, about 70 miles from El Rayo.

Extraction has been as follows:

Year	Conct. & Flotation	Cyanidation	Total
1915.....	20.7%	63.3%	84%
1914.....	(a) 14.0%	66.0%	80%
1913.....	(a) 12.0%	77.0%	89%

(a) By concentration alone.

Flotation by the Callow system was proven a success. During the last month's operations recoveries were 42.7% by cyanidation and flotation and 47.6% by cyanidation.

Due to revolutionary conditions the property was closed down Sept. 9, 1915, to be reopened when practicable. Work has been carried on under most adverse conditions, but at a profit. When operating under normal conditions the company employs 15 Americans and about 385 Mexicans.

La Dura Mill & Mining Co.

Office: 111 Broadway, New York City. **Mine office:** La Dura, Sonora, Mex. **Cap.,** outstanding, \$1,000,000. The Mines Co. of America, Dolores Mines Co. and El Rayo Mines Co., each own $\frac{1}{3}$ of the capital stock.

Property: 4 individual mines—Gloria-Fortuna and La Dura, on the east bank of the Yaqui river, Sonora; California and Prieta, $1\frac{1}{2}$ miles N. E. of the former. The mines are near La Dura station on the Cananea, Yaqui River & Pacific Ry., which leaves the main line of the Southern Pacific of Mexico at Corral station, 325 miles south of Nogales, Ariz. Mines are connected with railroad by aerial tram.

Ore: silver, copper, lead, in 5 main veins; the California, Prieta, Gloria-Fortuna, West Floria and La Dura veins. The Prieta and Gloria veins, from 6" to 4' wide, occur in andesite, strike N. W.-S. E. and dip 30° S. W. Ore is a white quartz containing sulphides of silver, copper, lead, iron and zinc. It occurs in lenses in terraces formed by frequent faulting. Most of the ore requires milling. **Ore reserves:** estimated Jan. 1, 1916, as 14,832 tons, average grade \$58.17 per ton.

Only the Prieta and Gloria mines have been operated since they were acquired by the company. The Prieta has a 3-compartment shaft, 1,040' deep. The Gloria is operated through a 1,600' incline shaft and a 700' vertical shaft, connected with the former, on the 500' and 700' levels.

Equipment: in 3 units as follows: the Prieta-Gloria steam-operated compressor and hoisting plants; the Gloria-Fortuna-La Dura steam-operated compressor, hoisting, milling and generating plants; pumping plant, stores, offices, and shops located half way between the two groups of mines. A transmission line from the Gloria-Fortuna plant furnishes power for pumping.

The mines employ under normal conditions, 8 Americans and about 225 Mexicans. Owing to the revolution the property was closed down in September, 1913, but will be reopened as soon as it is safe to do so. Accumulated products are stored in the bottom of the mine under water.

MINES DEVELOPMENT CO:

MONTANA

C. J. Stone, mgr., P. O. Box 3, Butte, Mont. **Officers:** J. J. O'Mara, pres.; J. P. Brown, v. p. and sec.-treas. **Inc.** 1913, in Montana. **Cap.**, \$50,000; outstanding \$10,000; shares \$1 par. Annual meeting, July 1. Operating expenses in 1915, \$10,000; earnings, nil.

Property: 6 claims, patented, 62 acres, in Tobacco Root Range, 12 miles from Twin Bridges, Madison Co., including the Moffit mine, operated under bond and lease.

Ore: gold, silver, copper, in orebodies said to be 80' to 125' wide; average assay, 1.5% to 2.5% copper; 0.5 oz. silver, 40c gold. **Development:** a 1,000' tunnel with total workings of 1,125'. Management claims 500,000 tons blocked out, which seems excessive for the small amount of development work done.

Equipment: includes compressor and gas engine. Plans continuing tunnel 500', also driving a 1,500' tunnel 400' lower. Was shipping ore June, 1916.

MINES DEVELOPMENT CO. OF NEVADA.

NEVADA

Lovelock, Humboldt Co., Nev. **Officers:** John T. Reid, pres.; treas. and gen. mgr.; Paul G. Reid, sec. and supt.; preceding with R. C. Moore, J. Thies, Peter Ancher and E. B. Loring, directors. **Inc.** Sept. 1, 1904, in Arizona. **Cap.**, \$750,000; shares \$1 par; issued, \$450,696.

Property: 5 claims, 100 acres, in the Juniper Mountain district, said to show various fissure veins, alongside of quartz porphyry dikes, intrusive in monzonite. Veins run N. 10° W. and are nearly vertical. The vein developed averages 5' wide, is traceable for 2,000' and proven to 170' depth. Small seams of ore found at or near surface show chalcocite, bornite and tetrahedrite, giving average assays of 2% copper, 11 oz. silver and \$3.50 gold per ton. **Development:** by a 30' shaft and 365' tunnel. Idle several years.

MINGUS MOUNTAIN COPPER CO., LTD.

ARIZONA

Office: 516 Grant Bldg., Los Angeles, Cal. Mine near Jerome, Yavapai Co., Ariz. W. W. Thomas, pres.; A. Gleason, sec., and E. R. Jeffrey, directors. **Inc.** June, 1900, in Arizona. **Cap.**, \$3,000,000; shares \$1 par; issued \$2,400,000.

Property: 5 claims, 100 acres, in the Black Hills district, 12 miles south of Jerome, the nearest railroad point, has good surface showings of carbonate ores. Assays from 2,800' vein traversing property, N. E.-S. W., are reported to show .02 oz. gold, \$1.45 silver and 6.39% copper S. W. and .17 oz. gold, 6.5 oz silver and 4.10% copper, N. E. Orebody claimed to be 45' in width with dip of 60° E. but ore has only been found in bunches and streaks.

Development: by 4 shafts, deepest 430', with several tunnels, giving a total of 4,240' of workings. **Equipment:** includes 50-h. p. steam plant, with 2 hoists, good for 1,000' each, and several mine buildings. Out of cash and idle some years.

MINING CORPORATION OF CANADA, LTD. ONTARIO

Office: Traders Bank Bldg., Toronto. Is the Canadian and operating company of the Canadian Mining Corporation, which see. April 1, 1914, the Mining Corp. of Canada acquired the mining properties formerly operated by the Cobalt Townsite Mng. Co., Ltd., Cobalt Lake Mng. Co., Ltd., City of Cobalt Mng. Co., Ltd., and the Townsite Extension Mines, Ltd., total area, 183½ acres, at Cobalt. In 1915, the property of the Little Nipissing Mining Co., 40 acres, was acquired.

Officers: Sir H. M. Pellatt, pres.; J. P. Watson, 1st v. p.; W. P. P. Parker, 2nd v. p., with G. M. Clark, R. E. G. van Cutsem, D'Arcy Weatherbee and Graeme Watson, directors. W. W. Perry, sec.; C. E. Watson, mgr., Cobalt; M. F. Fairlie, mill mgr.

Inc. March 20, 1914, in Ont. **Cap.**, \$2,075,000; shares \$1 par; all issued; 1,911,319 shares are held by the Canadian Mining Corp., Ltd. For last 9 months of 1914, the net profit was \$752,106, leaving balance carried forward after payment of dividend, \$492,731. On Nov. 16, 1914, company declared a 12½% dividend, \$259,375. In 1915 dividends totaled \$518,750.

Owens entire capitalization, \$250,000, of Cobalt Reduction Co., Ltd., operating a 300-ton mill and 140-ton cyanide plant. The profit of this company for 9 months ending Dec. 31, 1914, was \$114,599, making with balance brought forward, \$161,908, of which dividends absorbed \$133,678 and \$28,230 was written off capital expenditure.

Ore: silver, occurs in narrow calcite veins in Huronian conglomerate and Keewatin formation. The high-grade ore assays about 2,000 oz. silver per ton, the mill ore, 20 oz. to 30 oz. silver per ton. **Development:** by shaft to a depth of 500'; total underground workings about 16 miles. **Ore reserves:** estimated Dec. 31, 1914, at 94,026 tons on the Townsite and City properties, containing 3,209,000 oz. silver and 24,000 tons on the Lake property, containing 800,000 oz. silver.

Production: for last 9 months of 1914, 107,384 tons ore, yielding 3,185,124 oz. silver; in 1915, 97,300 tons ore treated, yielding 4,181,000 oz. silver. Concentrates averaged 2,200 oz. silver per ton. The company is, next to Nipissing, the largest producer in the Cobalt district.

MINNEAPOLIS COPPER CO. MEXICO

Office: 525 Plymouth Bldg., Minneapolis, Minn. **Mine address:** Cumpas, via Nacozari, Sonora, Mex. **Officers:** J. W. Christy, pres.; James Thompson, sec.; F. A. Guice, gen. mgr. **Inc.** June, 1906, in South Dakota. **Cap.**, \$1,000,000; shares \$10 par, nonassessable; also inc. in Mexico as Minneapolis Copper Co., S. A., the South Dakota corporation being a holding company. Is operated in the United States under the title of Minneapolis Copper Development Co., the reason for which has not been explained.

Property: 277 hectares, about 30 miles S. E. of Cumpas. Property carries several fissure veins, in andesite, with N. E. strike, of which 4, under development, are of 5' to 8' estimated average width, carrying tetrahedrite,

estimated by company to average 10% copper, with traces of lead and zinc, 5 to 40 oz. silver, and \$1 and upwards in gold, with occasional very high assays. The property has been under development continuously with a small force, since the company took it in 1906. The 155' Fryer shaft develops a 4' vein carrying ore said to average about 9% copper and 20 oz. silver per ton. The Archipelago mine, the principal property, has a 250' incline shaft, and the mine as a whole has about 8,000' of workings, mostly in ore.

Equipment: includes a 35-h. p. gasoline hoist and 5 buildings. There is also a 75-ton smelter, built in 1912. Transportation is by wagon-road to Cumpas, freight being carried in two 90-h. p. gaso-electric trucks.

In 1914 holdings were attached by a Douglas, Ariz., bank, but management was changed and bills are being paid off. Said to be ready to resume operations in 1916.

MINNEAPOLIS & TEXADA COPPERITE CO., LTD.

BRITISH COLUMBIA

Offices: 1311 Washington Ave. N., Minneapolis, Minn., and Vanada, Texada Island, B. C. **Officers:** C. F. Stremel, pres.; E. E. Rorem, 1st v. p.; John Kraft, 2nd v. p.; A. E. Barker, sec.; Wm. Bofferding, treas.; above with Eden Schmidt, Hilmer Olson, B. F. Laffin, and W. H. Curtis, directors. Inc. in Ariz. **Cap.**, \$1,000,000; shares \$1 par.

Property: 5 claims, 225 acres, on Texada Island, 47 miles N. W. of Vancouver, said to show 2 main veins, the Swan and the Paxton, containing copper ore with gold and silver. Paxton vein is said to be traceable 1,500' on surface.

Development: 200' shaft, with 300' of drifting; also a number of test pits. Value of property is entirely prospective.

MINNESOTA-NEVADA COPPER MINES CO.

NEVADA

Formerly the Wabuska Copper Mines Co. Near Wabuska, Lyon Co., Nev. **Property:** the Minnesota group, 13 claims, 16 miles from Yerington, said to show a contact deposit, between limestone and granite, of about 20' average width, carrying sulphide ore assaying 1 to 30% copper.

Development: by 2 shafts, 1 of about 500' depth, showing ore said to average better than 3% in copper tenor.

MINNESOTA NEVADA INVESTMENT CO.

NEVADA

Office: 436 Endicott Bldg., St. Paul, Minn. Mine near Fairview, Churchill Co., Nev. **Officers:** Alf. Patterson, pres.; O. S. Deringer, sec.; M. P. Ryan, treas.; A. A. Day, gen. mgr.; Chas. A. Peet, mg. engr. **Inc.** Aug. 6, 1906, in Oklahoma. **Cap.**, \$1,000,000; shares \$1 par; issued \$690,000. Annual meeting, Aug. 6.

Property: 28 claims, 160 acres placer ground, total about 750 acres, on Chalk mountain, 3½ miles north of Fairview. Claims said to show several orebodies, of which 3, under development, are 6' average width and proven to depth of 126', showing 2% copper, 32% lead, 26 oz. silver and \$8 to \$20 gold per ton.

Development by 3 shafts, deepest 126'. Management reports a shipment of 3 cars of 12% ore, 1915. Company succeeded to the property of the Corinthian Mining Co. and Chalk Mountain Copper Co.

MINNIE MOORE MINES CO.

IDAHO

Officers: I. E. Rockwell, Bellevue, Idaho, pres.; J. A. Blomquist, v. p.; Lalla Rookh White, sec.-treas. **Cap.**, \$500,000; shares \$1 par.

Property: at Bellevue, in the Mineral Hill district, Blaine Co., was bonded to Chas. M. Schwab interests but relinquished by them in 1906 when ore was found to be cut off by complex faulting.

In June, 1912, all the property of the Idaho Cons. Mines Co. was

bought at receiver's sale and in 1914 the Mill Side and Onyx lode claims were bought for \$5,000. Lead and zinc concentrates were being shipped, 1915.

MINONG COPPER CO.**MICHIGAN**

Office: 122 Winder St., Detroit, Mich. **Louis O. Broadwell**, pres.; **Hugh A. McPherson**, sec. **Inc. Dec. 16, 1874. Cap., \$1,000,000; shares \$25 par.**

Property: 1,455 acres in Secs. 22, 23, 26, 27, 34 and 35, T. 66 N., R. 35 W., lying at the head of McCargo's Cove on the Isle Royale, shows a line of ancient pits, largest 400' and about 1½ miles long. Idle since about 1881.

MISSOULA COPPER MINING CO.**IDAHO**

Mullan, Shoshone Co., Idaho. **Officers:** **Henry Billberg**, pres.; **C. A. Barnes**, v. p.; **R. J. McLeod**, gen. mgr.; preceding with **Harry Cheney**, **J. N. Thennes** and **John Brown**, directors. **Inc. 1901, in Idaho. Cap., \$100,000; increased 1907, to \$1,500,000; shares \$1 par, assessable; issued, \$1,350,000. Shares listed on Spokane and Vancouver Stock Exchanges. Annual meeting, first Tuesday in November.**

Property: 10 claims, about 175 acres, at the head of Deadman gulch, adjoining the Lucky Calumet, and about 1½ miles N. W. of the Snowstorm, in the Hunter district. Property has a strong fissure vein, of 85' maximum width, in Revett quartzite, carrying native copper, cuprite, azurite, malachite, bornite and chalcopyrite, with values mainly in sulphides, ranging from about 1%, on the hanging wall, to 8% on the foot-wall, ore averaging about one-half oz. silver per unit of copper. The property also carries some argentiferous galena.

Development: consists of a 1,400' upper tunnel and a 2,800' lower tunnel, with a connecting shaft and nearly 1 mile of workings. The main tunnel runs N. 30° E. for 1,900', then N. 70° E. for 700', passing from purple St. Regis slates at the portal into Revett quartzite. (Geology described U. S. G. S. Bull. 540, E. p. 48, 1913.)

Equipment: includes a 100-h. p. electric plant, with an 8-drill air compressor and necessary mine buildings.

March 1, 1914, ten of the largest stockholders formed an ironclad pool with 650,000 shares, deposited with Union Trust & Savings Bank of Spokane to March 1, 1916. In April, 1914, a lease and bond was given to Snowstorm M. Co. at \$600,000, said agreement calling for expenditure of \$2,000 for each month the option ran. Snowstorm expended \$36,000, and option was canceled on Sept. 12, 1915, claiming that development and values were disappointing.

Missoula stockholders assert that property contains apex of National vein. The Missoula vein is flat, dipping about 37° S. and towards National vein which was struck in long crosscut at vertical depth of 1,400', and is said to show dip similar to Missoula's. It is said that National Co. feared to raise lest it prove apex in Missoula ground. Property should be consolidated with the National Co. Both companies are failures at present, but if combined might succeed.

MISSOURI COPPER MOUNTAIN MINING CO.**MISSOURI**

Office: 323 West Seventh St., Sedalia, Mo. **Works office:** **Sullivan**, Franklin Co., Mo. **Officers:** **L. M. Barnard**, pres.; **W. D. Scoble**, v. p.; **Wm. H. H. Myers**, sec. **Inc. Jan., 1903, in Arizona. Cap., \$1,500,000; shares \$1 par; issued, \$1,396,000.**

Property: about 7,000 acres in Crawford and Washington counties, Missouri, including some farm lands. The Copper Hill mine, 32 acres, worked in a small way before 1850, shows an orebody with a good gossan in magnesian limestone. **Development:** by a 140' shaft and about 1,200'

of tunnels. An opencut, 40' wide and 200' long at base of hill, is said to show 30' of ore running as high as 36.3% copper. Ore deposit shows carbonate and sulphide ores, with a hematite gangue claimed by the company to average about 12% copper. The lands are also claimed to carry iron ore, lead, nickel, zinc and coal.

Equipment: includes a 60-h. p. steam plant, with 2 hoists good for depth of 300'. The reduction plant includes a mill and smelter, former having a Blake crusher, 18" and 22" rolls, 4 New Century jigs, a Card table and hydraulic classifiers. The smelter has a 30-ton Allis-Chalmers blast furnace and a Connersville blower.

Company plans to work its large iron deposits open cast, to do which it will be necessary to first remove an overburden of 70 to 120' thickness. Letters unanswered 1915-16.

MIZPAH CONS. COPPER & GOLD MINING CO. NEVADA

Office: East Ely, Nev. **Eastern office:** 913 Crozier Bldg., Philadelphia, Pa. **Mine office:** Mizpah, Elko Co., Nev. **Officers:** Robt. T. Seagrave, pres.; Harry Darlington, sec. and gen. mgr.; Wm. L. Bassett, treas.; John F. Crow, Supt. Inc. April 7, 1907, in South Dakota. **Cap.,** \$1,000,000; shares \$1 par, nonassessable; issued \$751,250. Annual meeting, third Monday in January.

Property: 23 claims, unpatented, 460 acres in the Dolly Varden district, 5 miles east of Mizpah, on Nevada Northern railroad. Claims show several fissure veins in granite and contact deposits between granite and rhyolite, one of which is estimated by the management at 200' width, carrying mainly bornite and chalcopyrite ore.

Development: by 70' two-compartment shaft, showing a 3' orebody, said to give maximum assays of about 15% copper, 8 oz. silver and \$18 gold per ton, which are not to be considered as average ore values. At last reports company was driving a tunnel, 1,365' long, expected to cut ore at about 1,400'.

MIZPAH COPPER MINING CO., LTD. IDAHO

Property sold to Merger Mng. Co., which see.

MIZPAH EXTENSION MINING CO. NEVADA

Offices: Bullitt Bldg., Philadelphia, Pa. and Tonopah, Nev. **Officers:** John F. Braun, pres.; Chas. E. Knox, v. p. and gen. mgr.; Wm. P. M. Braun, treas.; Chas F. Griffith, sec., with M. B. Cutter, Harry W. Davis and Lambert Ott, directors.

Inc. in .Del. Cap., 2,000,000 shares; in treasury, 344,318 common and 280 shares preferred stock. Listed on San Francisco and Salt Lake City Exchanges; traded in on New York Curb:

Property: about 400 acres at Tonopah, adjoining the Tonopah Mining and Tonopah Belmont properties on the N. E. A 2-year option has been taken on the property by the Tonopah Mining Co. and development work was assumed by the latter on Jan. 7, 1915. Under the terms of the option, if exercised, a new company is to be organized with a capitalization of \$2,000,000, shares \$1 par, of which Tonopah Mng. Co. stockholders will receive 60% and Mizpah stockholders 40%.

Ore: silver. For geology see U. S. G. S. Prof. Paper 42, Geology of the Tonopah Mining District, by J. E. Spurr.

Development: 1,000' shaft, with a winze from the 1,000' to the 1,155' level, now being sunk deeper. Work during the year has been mainly on the 1,000' and 1,155' levels with no startling developments. Mining was recently started on the flat vein discovered in 1915. This ore is low-grade, but management wishes to determine if it will pay to mine it; stoping width 2'-2½'.

MOCTEZUMA COPPER CO.**MEXICO**

Office: 99 John St., New York. **Mine office:** Nacozari, Moctezuma, Sonora, Mex. **Officers:** Dr. Jas. Douglas, pres.; Arthur Curtis James, v. p.; C. H. Dodge, v. p.; Geo. Notman, sec.-treas.; J. S. Williams, Jr., gen. mgr.

Inc. 1896, in West Virginia. **Cap.**, \$3,000,000; issued, \$2,600,000. Is controlled through entire stock ownership by Phelps, Dodge & Co., Inc., and holds direct title to lands through Moctezuma Copper Co., S. A. **Inc.** Feb. 4, 1896, in Mexico. **Cap.**, 500,000 pesos. **Dividends:** were 77% or \$2,262,000, 1902-07; none in 1908; \$988,000 in 1909; \$468,000 in 1910; \$754,000 in 1911; \$2,118,569 in 1912; \$1,950,000 in 1913; \$1,170,000 in 1914.

Property: about 2,500 acres of mineral land in the Moctezuma and Arizpe districts of Sonora, including the Pilares de Nacozari mine 6 miles east of Nacozari. Company also owns the Juarez and Nicolas ranches of about 35,000 acres, which carry considerable valuable timber.

The Pilares mine lies in a high and precipitous country near the divide of the Yaqui and Oposura rivers. The ore deposit is a large pipe, or chimney, of rock breccia cemented by ore. The rock fragments are angular, of all sizes up to masses over a ton in weight and consist of creamy-tinted, hard but altered fine-grained felsitic, rhyolitic porphyry. The orebody has an elliptical cross section 2,000' long and 600' wide. The ore carries chalcopyrite with pyrite and some bornite, the ore being mostly of concentrating grade, averaging 2.3% copper as mined. The deposit has no clearly-defined footwall and the hanging dips at an angle of about 80°. There is a small outcrop of rich carbonate ore, but croppings are mainly red-stained porphyry, carrying considerable low-grade hematite. The leached zone is about 20' in depth only, with payable ore coming in at depth of about 60'.

In addition to the Pilares mine, the company owns a number of other properties that have been operated for several years past by lessees, including the Churunibabi, Bella Union, Fortuna, San Francisco, El Vaquero and San Pedro. The Bella Union has high-grade ore, including oxides and native copper, shipments assaying up to 39% in copper tenor, with small gold and silver values. The Churunibabi property, operated by Col. Norton Hand for several years, yielding \$100,000 worth of silver ore, will hereafter be operated by the company, a rich gold-silver-copper orebody having been struck July, 1913.

Development: 4 shafts; three 3-compartment main working shafts, the Guadalupe 1,100', Pilares 1,285' and Esperanza 1,265' deep. A new shaft, the Margarita, 239' deep, early in 1916 cut a stringer of 8% copper ore which widened to 3' and a shaft will therefore be sunk to the 500' level.

The mile long Porvenir tunnel taps the deposit 600' below surface; 25-ton narrow gauge railway cars run from Nacozari into the tunnel direct to the mine ore chutes. The tunnel has storage bins in a 25x100' chamber to which ore is milled down from the upper workings, no ore being hoisted, all ore as broken being sent in chutes to the tunnel.

The mine employs 2 methods of ore extraction, the room-and-pillar with waste filling as work progresses, and shrinkage stoping with waste filling after all the ore has been extracted.

The mine has some enormous stopes, No. 4 stope, on the 3d level, having been 85' high, 125' wide and 150' long. The ground stands very well and the systems of extraction used give minimum timber requirements at a cost of only a few cents per ton of ore mined. Costs are about 3 pesos per metric ton for ore loaded on the tram cars. No water is hoisted above the Porvenir tunnel level and very little water is raised from the workings below. The mine is well ventilated and is equipped with electric lights.

The Pilares orebody is one of the largest in the world and is comparable, in many respects, with that of the Rio Tinto. The orebody shows no decrease in value at 110' depth. **Ore reserves:** estimated Jan. 1, 1916, 3,220,000 tons, a decrease of 255,700 tons for the year. The Pilares is the main working shaft. Plans for the proposed cyanide plant are held in abeyance on account of the revolution.

Equipment: includes new electric hoists and a 25-drill air compressor. There is an emergency steam plant at the mine having 2 boilers held in reserve in case of accident, but electricity is used throughout.

The power plant, at Nacozari, built in 1908, has four 435-h. p. Stirling water-tube boilers, equipped with Green fuel economizers, Foster superheaters and Rooney stokers, burning New Mexican coal, having a 196' reinforced concrete stack. The plant has three 1,000-k. w. Curtis turbo-generators giving a 6,600-volt current, and an auxiliary 50-k. w. steam turbine generator set is used as an exciter. Current is transmitted at 6,600 volts to the mine and mill and at the mine is stepped down to 230 volts for the pumps, while the hoists and electric locomotives use a 250-volt direct current. An old gas engine plant is described Vol. X.

The mine is connected with the mill by a 6-mile 20"-gauge railway. Rolling stock includes four 60-ton locomotives and twenty 30-ton Ingoldsby steel side-dumping cars.

The 2,000-ton concentrator, designed and built by H. Kenyon Burch, at a cost of about \$1,000,000, is one of the most complete and efficient in existence. The crushing plant receives ore from the mine in 6,000-ton bins, whence it is fed by 2 automatic ore feeders, of special design, to grizzlies, with bars set 2½" apart, oversize going to a No. 8 gyratory crusher, and undersize to a belt-conveyor, meeting material from the crusher, and going by belt conveyor to two 4x10" manganese trommels, with 1½" perforations. Undersize from the trommels goes to belt conveyors and oversize from the trommel goes to No. 5 gyratory crushers, breaking the material to 1" cubes, which joins the material from the trommels and is sent by belt conveyors to 4,000-ton storage bins.

Each 1,000-ton unit of the mill is equipped with 6 coarse and 12 fine jigs, 3 sets of rolls, Swain classifiers, Callow screens, 44 Wilfley tables and 72 Johnson vanners. From the storage bins the ore is fed by a portable ore feeder to a belt conveyor, passing over an automatic weighing machine and sampler, delivering it to an 18-mm. trommel. This trommel screens the ore, the coarse pieces going to bull jigs and undersize to 11-mm. trommels; the latter feed oversize to coarse jigs and undersize to 7-mm. trommels. These trommels in turn feed oversize to intermediate jigs and undersize to 4-mm. trommels, whose oversize goes in its turn to 2-mm. trommels; oversize from latter goes to fine jigs. The undersize from the 2-mm. trommels goes to 22-mesh Callow screens and thence to Wilfley tables handling oversize and undersize.

Slimes from the Wilfleys go to the vanner settling tanks and middlings from the Wilfleys go to the Chilean mills by elevators. Tailings from the bull jigs, coarse jigs and intermediate jigs go to either of 3 sets of 42x16" rolls, then by elevator to the mixing-box at the head of the trommels. Tailings from the fine jigs go to dewatering machines, and overflow from dewatering machines goes to vanner settling tanks, dewatered material going to the jig tailings bin and thence to Chilean mills, crushing to pass a 2½-mm. screen and thence to Callow screens of 22-mesh. Product is a concentrate of about 12% copper tenor, about 85% of the assay value being saved.

An aerial tramway carries tailings from the concentrator to a dump on the hillside, far above the river level.

Water is pumped from a well sunk at the side of the river by 1 triplex and 3 Worthington pumps, of 500 gals. capacity per minute, to 500,000-gal. tanks at the mill. Wash water from the concentrates is settled and re-used. A large dam 3 miles east of Nacozari, 90' in height, stores water sufficient for 2 years steady operation of the mill.

The old 600-ton concentrator is available for use on immediate notice.

The company built and owns the town of Nacozari, and a town at the Pilares mine. At Nacozari the company maintains both English and Spanish schools for the children of employes, and a well-equipped hospital and a free library, and amusement hall.

Forces normally are 1,300 men at the mine and mill, of which the great majority are Mexicans, with a few Japanese, no American labor being employed at the mine aside from shift-bosses and timbermen. Mining is performed under contract at 7 to 11 pesos per foot, and the larger part of the tramming is done by contract also, the mine proper employing about 200 miners, 80 carmen and 75 contractors.

In 1915 the mill treated 424,027 tons of 3.4% copper ore; concentrates averaged 13.32% copper; extraction 83.6%; ratio of concentration, 4.71; 861 gal. fresh water used per ton of ore milled. Operations at the property in 1915 were suspended entirely for 4 months and interrupted frequently during the remainder of the year.

The Moctezuma is one of the world's really great copper mines and the management is of the best.

MODOC MINES CO. CALIFORNIA

Highgrade, Modoc Co., Calif. Officers: Wm. Wrigley, Jr., pres.; Jas. C. Cox, sec.-treas., Kesner Bldg., Chicago; N. E. Guyot, v. p. and mgr., Oatman, Ariz., directors.

Inc. May 1, 1909, in Ariz. Cap., \$1,000,000; all outstanding; shares \$1 par. Annual meeting July 1. Is a close corporation.

Property: 259 acres, patented, and 60 acres, unpatented, in High Grade mining district, in the extreme N. E. corner of Modoc Co., being the only operating mine in the county. Ore: gold, silver, in a vertical quartz vein in rhyolite; vein has an average width of 10", and is said to be proven for 150' in length downward to the 200' level. The ore in 25-car lots is said to assay \$23 per ton.

Development: by 210' vertical shaft, with 1,800' of underground workings.

Equipment: includes 6"x10" hoist. Steam power is used. In 1915 about 100 tons of \$23 ore was shipped. Working conditions are bad, due to the heavy winter snow and to the opposition of the ranchers in that section. For geology of the High Grade district, see U. S. G. S. Bull. 594, pp. 38-48.

MODOC MINING & MILLING CO. COLORADO

Cripple Creek, Colo. Wardner Williams, pres., Pueblo, Colo. Operates the Modoc mine between Battle mountain and Bull Hill, which has been a constant producer of high-grade ore for many years. Output said to be 150 tons monthly, yielding \$40 to \$50 gold per ton. Mine is developed to the 16th level at 1,230' depth. Shaft sinking resumed, Jan., 1916.

MOGOLLON GOLD & COPPER CO.**NEW MEXICO**

Dead. Entire holdings bought at public sale. Aug., 1915, by Socorro, M. & M. Co., which see. Company paid \$22,500 in dividends from 1901-1915.

MOGOLLON MINES CO.**NEW MEXICO**

Mogollon, Socorro Co., N. Mex. **Officers:** Frank H. Hitchcock, pres.; Alfred Levinger, sec.; J. H. Hoban, treas., all of New York City. **Directors:** Frank H. Hitchcock, Eugene Meyer, Jr., and J. W. Sebinus. Sidney J. Kidder, gen. mgr.

Inc. Dec. 6, 1912, in Maine. **Cap.**, \$1,778,410; all outstanding; shares \$5 par, New York Trust Co., New York, registrar. Annual meeting, 2nd Monday in October. On June 30, 1915, the Mogollon Mines Co. absorbed the Ernestine Mining Co., which was organized Nov. 18, 1902.

Gross earnings, 1915, \$508,502; **operating expenses**, \$428,025. Paid a 2% dividend in July, 1915; prior to this dividends had been suspended for some time, earnings having been devoted to development and betterment of property.

Property: 16 claims, 12 patented, 216 acres, at Mogollon. **Ore:** gold and silver sulphide, in quartz veins in andesite and rhyolite, said to average \$12-\$15 per ton. Main vein, known as the Last Chance, strikes S. E.-N. W.; dips 60° to 70° and is 10'-26' wide.

Development: incline shaft 700' below main tunnel, which is 2,972' long; greatest depth of workings, 1,430'; underground workings total 22,530'. Shrinkage stoping is used.

Equipment: includes electric hoist; Ingersoll-Rand compressor; De La Vergne oil engines; electric power; 40-stamp mill and cyanide plant, capacity 160 tons daily.

Production: 51,862 tons of ore treated, 1915. Output is gold-silver bullion.

MOHAWK MINING CO.**MICHIGAN**

Geo. W. Drucker, sec., 15 William St., New York. **Mine office:** Mohawk, Keweenaw Co., Mich. **Mill office:** Gay, Keweenaw Co., Mich. **Officers:** John R. Stanton, pres.; F. McM. Stanton, treas., with Jas. S. Dunstan, Wm. A. Paine and F. W. Denton, directors. Theo. Dengler, supt.; John Trevarrow, Jr., mng. capt.; F. Wm. Hartmann, engr.

Inc. Nov., 1898, in Mich. **Cap.**, \$2,500,000; shares \$25 par; all issued; assessable; paid in \$18. Stock listed on Boston Exchange. Boston Safe Deposit & Trust Co., registrar; American Trust Co., Boston, transfer agt. Annual meeting last Tuesday in March.

Dividends: (paid semi-annually, Feb. and Aug.) \$5 in 1906; \$9 in 1907; \$2.50 in 1908; \$3 in 1909; \$2 in 1910; \$1.75 in 1911; \$3.50 in 1912; \$5 in 1913; \$1 in 1914; \$6 in 1915; \$10 to Aug. 1, 1916; a total of \$4,875,000.

Property: 800 acres, in an irregular tract, having its axis on the strike of the Kearsarge amygdaloidal bed, in Secs. 27, 28, 33 and 34, T. 57 N., R. 32 W., about 4 miles N. E. of Calumet, with the Ahmeek and Seneca mines on the north and Ahmeek to the west. In May, 1916, purchased 900 acres near Dollar Bay, lying between Torch and Portage lakes, with a long strip of shore on each side, thus acquiring an excellent millsite on Torch lake.

Geology: property carries the Kearsarge amygdaloidal bed, which ranges from 15' to 18' in average width, or about the same as at the Wolverine, and the upper workings carry about the same percentage of copper as in the Wolverine mine, but the lower workings are by no means so rich. The Kearsarge bed is crossed at approximately right angles by a number of narrow fissure veins, with nearly vertical dip, that are yielding a considerable amount of mass copper and in addition there are 3 cross-fissures carrying copper arsenides, including mohawkite, keweenawite, mohawk-

whitneyite, and stibio-domeykite, the first two being peculiar to this district and first found in this mine. The fissures carrying mohawkite range 3" to 3' in width, are well mineralized where crossing the amygdaloidal bed and for an indefinite but usually short distance on either side, the mohawkite and allied arsenides occasionally occurring massive, but commonly being disseminated in an arenaceous gangue. Values in the arsenides decrease with depth and recent production has been small. There also are other cupriferous amygdaloidal beds in the stratified series that may be given attention later.

Development: 6 shafts, numbered from north to south, of uniform size, 8x18' inside of timbering, with solid cribbing through the overburden and with identical equipment. No. 5 shaft has a concrete collar 10½'x23'x100' deep, and No. 6 is concreted for a depth of 90'. The skipways are laid with concrete stringers, which prove very satisfactory. The mine is equipped with Richmond electric signals and operates about 65 power drills. About 10,000' of new openings are made annually.

No. 1 shaft, about 1,500' south of the northern boundary, is bottomed at the 22nd level and is 2,379' deep. No. 1 hoist, in the central power plant at No. 2 shaft, operates two 4-ton skips in counterbalance. No. 1 shaft has a combination shaft rock house, equipped with a 12x24" Nordberg engine and crushers.

No. 2 shaft is 2,364' deep. Like No. 1, it had good ore near surface with impoverishment at depth, followed by improvement below the 12th level. The power plant at No. 2 shaft, serving both Nos. 1 and 2, includes an engine house and boiler house. Hoists are Nordberg double-conical-drum duplex-cylinder engines, good for 6,000' depth, each handling two 4-ton skips in counterbalance. The boiler house has 2 locomotive firebox boilers, with foundations for 3 additional boilers, and the engine house has 2 Ingersoll-Sergeant air compressors, of 40 drills aggregate capacity.

No. 3 shaft is 1,600' deep, and has been abandoned, as the ground tributary to No. 3 can be reached to better advantage through shafts Nos. 2 and 4. No. 4 shaft is 2,194' deep, developing good average ground from surface. Equipment includes a steel shaft rock house with 3 crushers and a steam hammer. The engine house has a Nordberg double-conical-drum hoist, good for 6,000' depth. A compressor plant, at No. 4 shaft, has a 60-drill Nordberg and a 60-drill Ingersoll-Sergeant cross-compound 2-stage compressor.

No. 5 shaft is 1,620' deep. Equipment includes a new all-steel shaft rock house and a Bullock hoist good for 2,000' depth.

No. 6 shaft, the southernmost and newest, is about 2,600' south of No. 5 and 2,600' from the Ahmeek boundary, commanding about three-fourths of a mile of the strike of the Kearsarge bed under about 160 acres, or approximately as much ground as the entire Wolverine mine. This shaft, located about 60' in the foot wall rock, is 1,250' deep, and can be sunk to a maximum of 4,000'.

The mill, near the mouth of the Tobacco river, on Traverse bay, Lake Superior, opposite the mill of the Wolverine, is 178x206' in size, of steel frame sheathed with iron, on foundations of sandstone. A steel trestle, 350' long and 50' high, leads into the mill, loaded cars being pulled up the incline by a winding engine. The mill has 4 stamps, all compounded, giving a daily capacity of 2,800 to 3,000 tons. The mill has a Chilean mill and 3 sets of auxiliary crushing rolls, with fixed bearings, to reduce oversize material from the mortar boxes of the heads, this averaging 20 to 25% of rock stamped. Mineral from the wash discharges automatically and is sluiced into the basement, where shoveled into 1½-ton mineral cars, having 14 mesh

perforated steel bottoms that allow the drainage out of water, after which the cars are weighed, then lifted by a cage elevator and dumped into bins. The bin house has 4 compartments, each with cement floor and steam-pipes underneath, for drying the remaining moisture from the wash. The mineral is taken from the bin house, in self-dumping steel mineral cars to the Michigan smelter at Houghton for reduction. Tailings from the mill are dewatered, then raised by bucket elevator, and stacked by belt conveyor, some distance from the mill.

Water for both the Mohawk and Wolverine mills is furnished from a joint pump house, standing near the Tobacco river, from which water is taken. The pump house has a 20,000,000-gal. triple expansion Snow pump, supplemented by a 9,000,000-gal. Nordberg pump, giving an ample water supply for both mills.

A 30x300' wharf, on Traverse bay, a short distance from the mill, with 14' of clear water alongside, is fitted with coal hoists and storage sheds, ample for the needs of both mills. Employs about 700 men.

Yield of fine copper, per ton of rock stamped, averaged 15.79 lbs. for the decade ended 1912.

Production:

(a) Includes construction. (b) Includes strike expense.

The mine was closed from July, 1913, to April, 1914, due to the Western Federation of Miners' strike. Toward the close of 1915 recovery amounted to over 21 lbs. copper per ton of rock, and costs were down to about 7½¢ per lb. Production, 1916, is at the rate of 18,000,000 lbs. per year.

Finlay in 1911 estimated 176,000,000 lbs. extractable copper, and a life of 15 years further. Our present estimate is 260,000,000 lbs. and a life of 23 years.

The Mohawk, while a much lower grade mine than was anticipated at the beginning, is a fine property with an assured future and has the benefit of a strong, honest and thoroughly economical and competent management.

MOJAVE TUNGSTEN CO.

CALIFORNIA

Office: 165 Broadway, New York. Mine office: Nipton, Nev. Officers: Pierre de P. Ricketts, managing director; William A. Kerr, v. p.; Geo. B. Read, sec.; James T. Anyon, treas.; with Wm. W. Cohen, John J. Cone, Julian Codman, John T. Smith, R. M. Whitman, directors. Ricketts & Co., Inc., 80 Maiden Lane, New York, mgrs. F. S. Naething, supt.; L. L. Draper, asst. supt.

Inc. Nov. 23, 1915, in Del. Cap., \$1,000,000; par value \$2; nonassessable; all outstanding. Traded on New York Curb. Transfer offices: The Corporation Trust Co., Jersey City; American Trust Co., Boston. Registrars: Empire Trust Co., New York; State Street Trust Co., Boston. No financial data regarding operations are available, since work did not begin until Dec., 1915. Company is the resurrected United States Tungsten Co., which failed several years ago.

Property: 12 unpatented claims in the Clarke mining district, San Bernardino Co., Cal., 19 miles from Roach, Nev., the shipping point. Tungsten occurs chiefly as wolframite in a quartz vein in gneissoid granite. The vein is practically vertical with course N. W.-S. E. Pay ore occurs in shoots of which there are said to be several from 20' to 60' long.

Development: two claims, Jack No. 4 and Jack No. 3, are developed by

shafts, 165' and 60' deep, respectively. Water level in No. 1 shaft is at 105' and the flow per 24 hrs., about 4,000 gal., is sufficient for all purposes, including concentration of 100 tons of ore. Total underground workings, about 550'.

Distance between the two shafts is 1,500', and trenching along the outcrop is said to show a continuation of ore. It is planned to join these two shafts on the 150 or 200' level.

Ore claimed to average 4% tungsten trioxide, and to be suitable for concentration, recovery being calculated at 85%. No ore reserves given.

Equipment: hoist, steam drill, pumps, etc. Company will increase its equipment as work progresses to provide for an output of 300 to 400 tons of ore per month.

Ricketts & Co. have examined the property and report that, with an expenditure of \$10,000 to \$12,000 for surface and underground work, 300 tons of 4% ore and 5 tons of 30% ore can be mined per month with about 20 men. In May the company acquired the Bracken group of 6 tungsten claims at Boulder Falls, Boulder, Colo. Is a curb promotion.

MOLLIE GROVES MINING & MILLING CO. COLORADO

Office: 328 New York Life Bldg., Kansas City, Mo. **Operating office:** 420 Ernest & Cranmer Bldg., Denver, Colo. Mine near Parshall, Grand Co., Colo.

Property was not regarded favorably by the late Horace J. Stevens, owing to its alleged preposterous claims. Letters neither answered nor returned. Fully described Vol. XI, Copper Handbook.

MOLOLOA MINING CO., LTD. MEXICO

Hostotipaquillo, Jalisco, Mex. **Officers:** W. G. Miller, pres.; F. G. Stevens, managing director; W. M. Mathews, treas. and gen. mgr.; Edw. Fenley, supt., at last accounts. **Inc.** 1908 in Canada. **Cap.**, \$250,000.

Property: 130 hectares, include antiquas opened by the Spaniards in the 16th century, reopened in 1904. Said to have been abandoned by former owners because of vein faulting. Several fissure veins in andesite carrying gold-silver ore were worked in 1914 and shipments made to the El Favor mill.

MONARCH MINE. MONTANA

Lease and bond given to C. E. Fryberger, Helena, Mont., 1916. **Property:** near Elliston, Powell Co., Mont., shows andesite intruded by quartz monzonite, cut by fissure veins carrying galena, blende, pyrite and arsenopyrite. A 3 to 5' vein of copper sulphide ore yielded considerable copper in the past. Developed by 265' shaft and 1,200' tunnel. Shipment of one car recently reported to have run 3½% copper, 35 oz. silver, 10% lead and \$5 gold per ton.

MONARCH MINING & SMELTING CO. ARIZONA

Wickenburg, Ariz. **Officers:** W. O. Donovan, Vidalia, Ga., chairman; J. H. Mulholland, pres.-gen. mgr.; Jas. R. Vaughan, v. p.; J. B. Everidge, v. p.; Geo. A. Sharpe, sec.-treas.; officers are directors. A. D. Akin, cons. engr. **Inc.** Aug., 1904, in Ariz. **Cap.**, \$1,000,000; increased to \$1,500,000 in 1913 and to \$3,000,000 in 1914. **Bonds:** \$100,000 1st mtge., issued 1913; \$57,400 outstanding. Assets of company given as \$62,523 over liabilities, Jan., 1915.

Property: 6 claims, patented, 100 acres, known as the Ryland or Three, Black Buttes group, in the Black Rock or White Picacho district, 9 miles S. E. of Wickenburg, shows diorite and schist carrying oxidized ores changing at shallow depth to chalcopyrite and occasional bornite, said to assay 2 to 20% copper and estimated by management to average 1 to 3 oz. silver and \$3 to \$15 gold per ton.

Development: several shallow shafts and tunnels of 600 and 360', with about 1,500' of underground workings and several thousand feet of surface trenching.

Equipment: includes a 50-h. p. distillate engine, 5x8" Rumsey triplex pump, and a 4-drill Sullivan compressor. There are about 26 buildings, all owned by the company. Water is taken from the Hassayampa river through 7 miles of 4" pipe.

Development has proved surface ores to be badly broken, not continuous and occurring in pockets. Former management counted on raising funds for deep development by milling surface ores, but with wet concentration process used in 100-ton mill, major part of oxides and carbonates was lost in the tailing. Mill was therefore closed down after trial run and shaft is being sunk deeper, 1916.

MONARCH PITTSBURGH MINING CO.

NEVADA

Tonopah, Nev. **Officers:** H. C. Brougher, pres., 6150 Harwood St., Oakland, Calif. W. J. Douglass, v. p.; R. B. Govan, v. p.; E. J. Erickson, sec-treas.; with W. Brougher, directors. B. H. Smith, supt.

Inc. in Nevada. **Cap.**, \$1,500,000; shares \$1 par; fully paid; assessable; assessment No. 4, 1 ct. per share, levied May 15, 1915. Stock transferred at company office. Listed on San Francisco Exchange.

Balance sheet for 1915 shows assets \$1,555,978, which includes: mine property, \$1,484,150; treasury stock, \$70,146; supplies, \$132; cash on hand, \$1,550. Liabilities include: assessments paid, \$54,304; unpaid accounts, \$1,673. Receipts for 1915, \$23,854; of which assessments furnished \$13,911. and cash, Jan. 1, 1915, \$4,619. Disbursements were: labor, \$10,876; vouchers, \$11,428.

Property: 3 patented claims at Tonopah, adjoining Tonopah Extension on south and west. Claims show veins with silver ore. **Development:** by vertical shaft, 1,100' deep. Work in 1915 was confined mainly to the 850' and 1,000' levels, amounting to 1,806' at a cost of \$9.91 per ft.

No commercial ore has been found to date.

MOND NICKEL CO., LTD.

ONTARIO

Secretary's address: Hugh Hughes, 39 Victoria St., London, S. W., England. Mine office: Victoria Mines, Algoma, Ont. Works office: Clydach, Glamorganshire, Wales. **Directors:** Sir Alfred Mond, chairman; Dr. Bernhard Mohr, gen. mgr.; E. J. Griffith, Saxton W. A. Noble, Sir Robert Hadfield, Emile S. Mond, Robt. L. Mond, Dr. Carl Langer, Robt. Mathias and Sir Edmund Walker. C. V. Corless, mgr. Oliver Hall, supt.; A. Sharp, supt. Garson mine.

Inc. Sept. 20, 1900, in Great Britain. **Cap.**, £600,000, increased July, 1908, to £850,000; in £500,000 cumulative 7% preferred shares, £5 par; £300,000 ordinary shares, £1 par, and £50,000 deferred shares, £1 par; total issued capital, £750,000. Reorganized July 22, 1914, with authorized capital of £2,400,000, in shares of £1; 500,000 being in 7% cumulative preferred shares, 1,000,000 in 7% noncumulative preferred shares, and 900,000 ordinary shares. All except £520,000 of the noncumulative shares has been subscribed and called up; £375,000 5% first mortgage debenture stock and £500,000 6% redeemable debenture stock has been issued. For fiscal year 1915, profits were £300,296.

Dividends: 7% has been paid regularly on preferred shares; dividends on ordinary shares: 6% in 1905; 10% in 1906; 12½% in 1907; 15% in 1908, 1909 and 1910; 16¼% in 1911 and 1912; 21¼% in 1913; 35% in 1914; 20% in 1915 on new capital. Dividends on deferred shares were 18% in 1906; 33% in 1907; 48% in 1908, 1909 and 1910; 55% in 1911 and 1912; 85% in 1913. Reserve fund, £100,000. Cash balance, April, 1915, £134,011. **Net profits:**

£111,320 in 1909; £114,107 in 1910; £140,803 in 1911; £146,650 in 1912; £191,047 in 1913; £248,088 in 1914; and £285,282 in 1915.

Property: about 14,000 acres in the Sudbury district and mining rights on about 12,000 acres near to and including Bruce Mines. Mines in the Sudbury district include Levack, Garson, Victoria, Worthington, Frood Extension, Kirkwood and North Star. Only the first four named worked at present. Mines in the Bruce Mines area consist of several openings grouped under the general name of Bruce Mines. The former group produces copper-nickel ore and the latter quartz-copper ore, used as flux in the converters. For geology of the Sudbury nickel-copper deposits, see Eng. & Min. Jour., Vol. 101, No. 19, and Vol. 102, No. 2.

The Levack mine, purchased in 1913, is being opened up by a 5-compartment shaft, 400' deep, early in 1916. The present deepest level is at 350'.

Garson mine has a 3-compartment 800' shaft. Present deepest level is at 600'. Extraction to date has been almost exclusively from the upper 400', where a large tonnage still remains to be extracted.

Victoria mine is one of the deepest mines in Canada. The bottom level is over 2,300' vertically from the shaft collar, and the 3-compartment shaft, the sinking of which is nearly continuous, is now over 2,400' deep.

Worthington mine, now about 500' deep, produces a mixture of very high-grade ore and rock, which is subjected to close sorting. The orebody is a brecciated basic dike and not typical of the Sudbury deposits. For geology see Economic Geology, Vol. X, No. 6. The Worthington is developed by a 3-compartment shaft.

The purchase and opening of the Levack mine, 1913, caused the closing down of several properties, including Frood Extension mine, which had been opened up to a depth of 1,000' by a 4-compartment shaft.

The copper-nickel ratio of the ore from these mines differs quite widely, but the production from the various mines is usually so arranged as to give close to an evenly balanced copper-nickel matte.

The old smelter, near the mines, has been abandoned, and a new 1,500-ton smelter, erected 1912, at Coniston, Ont., was blown in May 15, 1913. **Equipment:** includes 2 Allis-Chalmers water-jacketed copper blast furnaces, 50" x 240", and 2 Peirce-Smith basic converters with shells 10' in diam. and 25'-10" long. Ores are smelted and bessemerized to a copper-nickel matte averaging about 82% copper and nickel, which is shipped to the company's refinery at Clydach, in Swansea Valley, South Wales, where the metals are separated and the nickel is refined by the Mond Process.

The copper-nickel matte from the smelter is dead-roasted and treated with dilute sulphuric acid, which permits the extraction of about 65% of the copper and 2% of the nickel. The residue, after drying, assays 45 to 60% nickel, and is treated in charges of 500 kgs. with water-gas, in a reduction tower, at a temperature of about 300° C. This tower has shelves and the ore is moved from shelf to shelf by automatic rakes, the lower shelves being cooled. After treatment in the reduction tower the charge is transferred to a volatilizing tower and treated with carbon monoxide at a temperature of about 100° C. The residue therefrom is returned to the reducing tower and the charge goes forward and back between the 2 towers for 10 to 15 days, and when 60% of the nickel has been volatilized, as nickel carbonyl, the residue of the charge is returned to the roasting furnace. The nickel carbonyl is treated in a decomposing apparatus, wherein the metal is recovered in granules, assaying 99.4 to 99.8% nickel, and the copper is turned out as bluestone.

All the Canadian plants are up-to-date and operated electrically by power from 3 hydro-electric plants, two of which are the property of the

Lorne Power Co., a subsidiary of the Mond Nickel Co. The growth of the company's operations within the past 5 years has been phenomenal.

The mine output for 1911 was 163,352 tons, 117,658 tons in 1912 and 408,638 tons in 1915.

Production is not reported by the company, but unofficial estimates two years ago placed the annual output at about 4,000,000 lbs. fine copper and 5,000,000 lbs. nickel, with a possible maximum production of 10,000,000 lbs. copper and 15,000,000 lbs. nickel.

MONETAIRE MINING CO.

UTAH

Office: 405 Newhouse Bldg., Salt Lake City, Utah. **Officers:** D. J. Williams, pres.; N. V. Jones, v. p.; B. F. Cummings, sec.-treas.; with W. H. King and D. W. Cummings, directors. **Inc.** Sept. 19, 1912, in Utah. **Cap.**, \$250,000; shares 25 cts. par; assessable; 885,000 shares outstanding. Annual meeting, third Tuesday in January. Listed in Salt Lake City.

Property: 2 patented claims, 6 acres, in Little Cottonwood mining district, said to show lead-zinc ore, with some molybdenum, in fissure veins in limestone and quartzite. Veins strike E. W. and dip almost vertical. Ore shipped said to have returned \$17 per ton. No recent shipments reported.

Development: 127' vertical shaft and tunnels, with about 1,000' of workings. Claim to have 20,000 tons of ore blocked out. **Equipment:** includes an electric hoist. No operations in 1915. Plans resuming work in 1916. Mine is a prospect.

MONITOR BELMONT MINING CO.

NEVADA

Belmont, Nye Co., Nev. Norman E. Smith, mgr. **Property:** 21 claims at Belmont, a number of which were extensively worked years ago. Claims show silver ore developed by 3 shafts, 600', 750' and 1,100' deep. There is said to be a considerable tonnage of milling ore in the old workings in addition to the dump ore. In Oct., 1915, company completed a 10-stamp 150-ton mill, equipped with a tube mill and flotation plant.

MONITOR CONSOLIDATED COPPER MINING CO.

IDAHO

Stockholders sold property to Montana-Idaho Copper Co., 1914, for \$102,000, payable in shares of new company at par, stock to be exchanged April 17, 1917. See Mont.-Idaho C. Co.

MONITOR SILVER, LEAD & ZINC MINING & MILLING CO.

NEW MEXICO

Offices: 115 Broadway, New York, and McLaughlin Bldg., Sante Fe, N. Mex. **Officers:** Chas. E. Berner, pres.; Chas. W. Berner, v. p.; Gustave F. Ettensperger, sec.-treas.; with Sidney H. Hirsch and Francis C. Wilson, directors.

Inc. Feb. 5, 1916, in N. Mex. **Cap.**, \$1,000,000; issued, \$753,025; shares \$1 par. Security Registrar & Transfer Co., New York, transfer agent and registrar. Listed on New York Curb. Financial statement, April, 1916, shows cash and accounts receivable, \$24,560.

Property: 5 groups, 30 claims, near Hermosa, Palomas mining district, Sierra county. Groups are ½ to 2 miles apart. Said to show lead, zinc, copper ores in a contact deposit in limestone; the intrusive is andesite.

Development: 200' Antelope shaft, inaccessible at present, 170' Austrian shaft, 390' Slater tunnel and the 480' Willow Creek tunnel. **Equipment:** includes a 20-stamp mill, hoist, air compressor, saw-mill, 2 boilers of 35-h. p. and 60-h. p. Property long idle before acquisition by new company. Management intends opening up the mine. Examined in 1916 by Ricketts & Co.

MONROE COPPER MINE.

ARIZONA

Address: John Curran, owner, Walker, Yavapai Co., Ariz. Mine, once owned by the Monroe Cons. Mines Co., long dead, is near the junction of Knapp gulch and Lynx creek, near Prescott. Formerly worked as a gold

mine and said to have a 50' dike carrying copper ore on the 300' level. Development work consists of various tunnels.

MONTANA-ARIZONA COPPER CO.

ARIZONA

Idle. W. D. Greenough, mgr., Greenough Bros., Spokane, Wash. **Property:** 26 claims, 520 acres, 30 miles north of Wenden, Yuma Co., Ariz., is said to show 5 veins of 3 to 100' width, traceable 7,000', one vein carrying gold values. **Development:** 300' two-compartment shaft and a considerable number of trenches. **Equipment:** includes 60-h. p. gasoline hoist.

MONTANA-BINGHAM CONSOLIDATED MINING CO.

UTAH

Office: 66-West Broadway, Salt Lake City, Utah. **Mine office:** Bingham Canyon, Salt Lake Co., Utah. **Officers:** W. E. Hubbard, pres. and gen. mgr.; G. G. Schliep, v. p.; G. W. Kling, sec.-treas.; with V. Eckman, John Schneider and C. E. Adderley, directors. M. T. Miller, supt. **Inc.** July, 1910, as successor of Bingham-Butte Consolidated Mining Co. **Cap.**, \$1,500,000; shares \$1 par; issued, 938,026 shares. Owns 125,000 shares of Bingham Amalgamated C. Co. stock. Debentures, \$200,000, at 6%, due June 1, 1918; \$45,400 outstanding. Total assessments to date, \$18,164.

Property: 4 claims, patented, 60 acres, includes the Puritan and Eddie groups, carrying the Quinn fissure, near the Starless mine. Company was organized mainly for the purpose of driving a long tunnel known as the Montana-Bingham, or Miller tunnel, which will be the main transportation and drainage tunnel and eventually develop the eastern section of the camp. The tunnel was in 4,048', Feb., 1916, and has cut 5 veins.

The Congor vein, cut at 3,941', is said to show ore assaying 5.8% copper, 5.4 oz. silver, \$1.20 gold and 33% iron. The Cleveland vein, said to be 100' wide, mostly milling ore, is being developed.

Company has contracts with Bingham Amalgamated C. Co. and will receive 10% of net proceeds on all ore shipped through the tunnel; from Keystone Extension Mng. Co. 25c per ton of ore and 10c per mine car of waste; from Bingham-Congor C. Co., 15c p. t. of ore or waste; from Fortuna Mng. Co., 25c p. t. ore and 10c per car of waste; also an agreement with Col. E. A. Wall to handle Starless ores when drift from tunnel has been extended on one of Montana-Bingham veins into Starless ground; 220,000 gallons water per day is flowing from tunnel, which is valuable for milling, etc. When completed tunnel will cut 10 veins at 1,000'-2,200' depth on their dip and will drain them, allowing cheap mining. Tunnel mouth is near the D. & R. G. railway sidings.

MONTANA-CLINTON COPPER CO.

MONTANA

Office: Helena, Mont. **Mine office:** Elliston, Powell Co., Mont. **Officers:** E. H. Brandegee, pres.; W. K. Armstrong, v. p.; C. L. Friederichs, sec.-treas. and gen. mgr.; preceding, with Wm. Pope and C. O. Price, directors; John A. Friederichs, supt.; Arthur Ireland, mg. engr.; Fred Halroyd, purch. agt.; Goodall Bros., assayers.

Inc. April 16, 1909, in Montana. **Cap.**, \$1,500,000; shares \$5 par; assessable; issued, 142,874; 55,000 shares outstanding, \$1.55 paid, last call being 15 cts., Nov., 1912. First National Bank, Laurium, registrar and transfer agent.

Property: 7 claims, unpatented, 140 acres, known as the Julia mine, on Telegraph creek, 8 miles south of Elliston. Country rock is granite. There are numerous veins, 1 being 14' wide with a paystreak ranging from 6" to a maximum of 4', developed for 500'. Ores are mainly galena, sphalerite and tetrahedrite, with a high silver content. Surface ores carried considerable gold, decreasing with depth, while the silver content has increased.

Development: 210' shaft and 600' tunnel. **Ore reserves:** estimated at 2,000 tons, said to average 4% copper, 4% lead, 8% zinc, 35 oz. silver and

\$10 gold per ton. **Equipment:** includes 80-h. p. boiler, 30-h. p. steam hoist and 3-drill Rand air compressor. There are about 10 buildings.

Closed down Oct., 1914, and property will eventually revert to original owner, according to secretary's advice, 1915.

MONTANA CONSOLIDATED COPPER CO.

MONTANA

Operating address: M. K. Rogers, Boulder, Mont. **Office:** 51 Wall St., New York. **Officers:** Crawford Blagden, pres.; E. B. Haas, v. p.; Thos. F. Lee, treas.; W. E. Doyle, sec. **Inc.** 1902 in Utah. **Cap.**, \$1,000,000; shares \$1 par.

Property: includes the Comet and Grey Eagle mines, Deerlodge and various placers, millsites, etc., comprising 699.73 acres. The first named mines about 7 miles N. W. of Boulder, Jefferson Co., Mont., have been idle several years, except for work done by lessees. **Ores:** are mainly galena and sphalerite with associated pyrite and chalcopryrite, and the Comet is popularly credited with having yielded a gross output of \$13,000,000. **Ore reserves:** said to be 1,350,000 tons, averaging \$20 per ton.

In 1915 M. K. Rogers, of Los Angeles, Calif., took an option on 75% of the capital stock and began an active rehabilitation of the mine and mill. Soon afterwards the New York brokerage firm of Baruch & Co., since dissolved (bankrupt), acquired minority holdings and began advertising the venture; they succeeded in driving the stock up to nearly \$2 a share, in the belief that Rogers stock was securely escrowed, when suddenly a large block of stock was thrown on the market and quotations dropped to negligible levels.

The mine is not yet reopened, but doubtless will be, as the crosscuts from the 976' shaft have on the lower levels never been driven far enough to reach the main vein. The mill, now remodelled, is working steadily on the tailings concentrates being shipped daily.

The vein is a large one and the property promising enough to warrant deep development. Clark, Dodge & Co. are still interested in the property, but have publicly disclaimed any interest whatsoever in the stock on the market.

The company's holdings were acquired and exploration undertaken in 1907, on the report of A. A. Blow, in which the hope was expressed that copper ores in paying quantity would be found in depth. The present activity is the result of the abnormal price of zinc, and work at the mine is subordinated to the retreatment of the 100,000 tons of tailings from the old mill, for extraction of their zinc content. The geology is described in Bull. 527, U. S. G. S., p. 114, 1913.

The property has a speculative value as a mine, but the minority stock cannot be recommended as either an investment or a hopeful speculation.

MONTANA CONTINENTAL DEVELOPMENT CO.

BRITISH COLUMBIA

J. E. Oppenheimer, c/o Symons Dry Goods Co., Butte, Mont. Company leased and operated main holdings of Rocher Déboulé Copper Co., built tramway, equipped property and turned it over to the latter company in Jan., 1916. See Rocher Déboulé.

MONTANA COPPER-SILVER CO.

MONTANA

Idle. **Address:** E. R. Purnell, supt., Helena, Mont. Mine in Scratch Gravel hills, Lewis & Clark Co., Mont., 8 miles from Helena, shows quartz veins in quartz-monzonite, carrying ores with pyrite and chalcopryrite and gold-silver values. **Development:** by shaft and drifts. Equipped with hoist. Is not favorably regarded.

MONTANA CORBIN COPPER CO.

MONTANA

Reorganized as Corbin-Copper King Mining Co.

MONTANA-IDAHO COPPER CO.**IDAHO**

Office: 1325 Dean Ave., Spokane, Wash. **Mine office:** Saltese, Missoula Co., Mont. **Officers:** H. F. DeBowers, Chicago, pres.; W. J. Kirby, Spokane, v. p.; J. L. Dirks, sec.-treas., directors. Otis Hill, gen. mgr. **Inc.** 1914 to take over holdings of Monitor Cons. C. M. Co. on basis of \$102,000, payable in shares of Mont. Idaho C. Co. at par, to be exchanged April 17, 1917. **Cap.**, 6,000 shares; \$100 par. Stock listed on Spokane Exchange.

Property: 10 claims, patented, 6 miles west of Saltese, was the first copper location in the eastern Cœur d'Alenes. A fissure vein of 10 to 30' width, with N. E. strike and nearly vertical dip, has a paystreak carrying mainly massive chalcopryite ore, balance of vein carrying disseminated chalcopryite, mainly of concentrating grade. Occasional native copper is found. Shipment of selected ore returned 17 to 22% copper, 7 oz. silver and \$1.50 to \$2 gold per ton. The bottom levels of the mine, which is quite wet, show good ore. Owns 9 additional claims.

Monitor mine was closed down 1910 after the entire plant had been destroyed by forest fires. New company is driving tunnel 1,000' below 700' level of old shaft.

MONTANA-ILLINOIS COPPER MINING CO.**MONTANA**

Office: 450 Phoenix Blk., Butte, Mont. **Mine address:** Jefferson Island, Madison Co., Mont. **Officers:** J. W. Brown, pres.; Benj. W. Wilson, v. p.-sec.; W. G. McCormack, treas.; preceding, with L. H. Stanhope, Wm. Meyer, H. Sultzer and A. D. Clark, directors. P. E. Peterson, mine supt. **Inc.** 1907 in Montana. **Cap.**, \$2,000,000; shares \$1 par; nonassessable; issued \$2,000,000. **Bonds:** \$100,000 authorized, at 12%; issued, \$80,000. Annual meeting, first Thursday in July.

Property: the Bismark mine, 20 miles south of Jefferson Island, in the Ruby mountains; 10 quartz claims, patented; three 5-acre mill sites; a water right and 320 acres placer ground, contested by the forest reserve, total of 550 acres, including part of the former holdings of the Bismark Copper Mining Co. Claims show granite and gneiss carrying 3 fissure veins, under development, with N.-W. strike of about 4' average width. Veins carry chalcopryite and bornite estimated by management to average about 5% copper, 2 oz. silver and \$1 gold per ton.

Development: by tunnels of 400', 200', 500' and 1,900', with about 3,000' of workings.

Equipment: includes a 5' Pelton wheel and a 10x12" two-drill air compressor. There are 12 mine buildings. A concentrator, completed in 1914, has a Blake crusher, Chilean mill, rolls, 6 Wilfley tables, 4 vanners and a slime table.

In June, 1915, a 3-year lease on the property was taken by the Iowa Mont. Dev. Co. This company re-equipped the mill, installing a 100-ton flotation plant and started operations, but was soon compelled to shut down on account of insufficient water supply. Oil burning engines are now being installed and company expects to be producing early in 1916.

MONTANA MORNING MINING CO.**MONTANA**

A Spokane company, inc. by Andrew Laidlaw. **Cap.**, \$300,000; shares 20c par. Company took over the Montana Morning group of lead-silver-zinc claims, 6½ miles from the Great Northern R. R. at Troy, Mont., said to show a vein of lead ore from 1' to 4' wide. Reported to be doing development work.

MONTANA OREWAY MINING CO.**MONTANA**

Office: 522 Postal Telegraph Bldg., Chicago. **Mine office:** Briston, Beaverhead Co., Mont. **Officers:** W. P. Jahnke, pres.; J. B. Scott, v. p.; Fred W. Scott, sec.; J. D. Rankin, treas.; preceding, with Frank Kimball

and B. F. White, directors. Inc. 1909 in Arizona. Cap., \$1,000,000; shares \$1 par; issued, 950,000.

Property: 5 claims, patented, 100 acres, and a 25-acre mill site, known as the Straight Tip group, in the Big Hole basin. Claims show several fissure veins averaging 10' thick in quartzite and contact deposits between quartzite and serpentine. Opened by a 3,025' tunnel driven to cut a mineralized diorite dike carrying copper oxide ores, with lead and small silver and gold values.

Equipment: includes a 35-h. p. steam plant, with 1-drill air compressor. There are 6 small buildings.

MONTANA RADERSBURG MINING CO. MONTANA

Townsend, Broadwater Co., Mont. **Officers:** A. E. Spriggs, pres., Helena; Fred Allen, v. p. and supt., Townsend; B. E. Mathews, sec.-treas.; with Hugh Broderick, C. A. Whipple, Sol. Genzberger and L. A. Sarecky, directors.

Inc. Nov., 1914, in Mont. Cap., \$300,000; shares \$1 par; \$100,000 stock donated to treasury. Annual meeting, in November. Operating expenses in 1914-1915, \$10,000; receipts, none.

Property: 5 claims, unpatented, 100 acres, in Broadwater county, said to show gold, silver, lead, zinc ore in a fissure vein in lime and quartzite. Vein has a N.-S. strike, dips 20°, and is said to be 12' wide, with average assays per ton of \$2 gold, 50 oz. silver, 20% lead, 2% zinc.

Development: 500' incline shaft with 1,500' underground workings. **Equipment:** includes a 40-h. p. electric hoist. Management states the company is preparing to erect a mill.

Ore reserves: management claims 200,000 tons with 100,000 tons already blocked out. **Production:** none in recent years. Claims \$300,000 in gold and silver was produced up to the close-down of the property eight years ago.

MONTANA SCOTCH BONNET COP. & GOLD MG. CO. MONTANA

Idle. **Office:** 603 Jamieson Blk., Spokane, Wash. Mine office: Cooke, Park Co., Mont. **Officers:** S. A. Gibson, pres. and gen. mgr.; C. E. Mallette, sec.-treas. Inc. March, 1902, in Washington. Cap., \$300,000; shares 10 cts. par; nonassessable; fully issued.

Property: 17 claims, partly fractional, 200 acres, in the New World district, 65 miles from a railway. **Development:** by tunnel with about 1,500' of workings developing oxidized and sulphide ores of lead and copper, said to give small copper assays, an average of 3.7% lead, 4 to 5 oz. silver and \$3.10 gold per ton.

Under option early 1916 to John H. Wourms, Wallace, Idaho, chief counsel for the Day interests.

MONTANA SILVER-LEAD MINING CO. MONTANA

Jos. K. Williams, mgr., Libby, Mont.; H. G. Lougee, pres.; Commercial Bldg., Portland, Ore. Inc. in Wash. Cap., \$1,000,000; shares \$1 par.

Property: 6 claims on Leigh Creek, about 12 miles S. of Libby, said to show lead-silver ore with a little gold and copper in a fissure vein in limestone and quartzite; width of vein 4' to 6'; average assay 30-40 oz. silver, with good values in lead. **Development:** by tunnels; upper tunnel, 1,300', and one 1,100' below it, 900' long. Developing in 1915 and reported that a mill might be erected in 1916.

MONTANA-STATES MINING CORPORATION. MONTANA

Office: Bailey Blk., Helena, Mont. Mine office: Alhambra, Jefferson Co., Mont. **Officers:** R. A. Bell, pres. and gen. mgr.; R. Horsky, v. p.; Edward Horsky, sec.-treas. Inc. May, 1911, in Montana. Cap., \$5,000,000; shares \$5 par; issued, 80,000 shares.

Property: 38 claims, partly patented, 700 acres, in the Warm Springs district, 6 miles from a railroad. Country rock is a quartz monzonite of the Boulder batholith, cut by rhyolite dikes and showing quartz veins with mineralization along the walls.

Development: by numerous shallow shafts, and short tunnels, with about 2,300' of openings. Ores are mainly galena, sphalerite and tetrahedrite; with a chalcadonic quartz gangue reported by management to carry up to 22% copper, 10% lead, 8% zinc, 16 oz. silver and \$16 gold per ton.

Mine has no equipment. Idle in 1914 and 1915.

MONTANA-TONOPAH MINING CO.

NEVADA

Tonopah, Nev. **Officers:** Chas. E. Knox, pres., 300 First Nat. Bank Bldg., San Francisco; Henry D. Moore, v. p.; M. E. McCrate, sec.-treas.; with Hugh H. Brown, Dudley Baldwin, E. B. Waples, J. M. Wynn, Thos. J. Lynch and A. H. Lawry, directors. A. H. Lawry, supt.

Inc. in Utah in 1902, re-incorporated Jan. 31, 1912, in Del. **Cap.**, \$1,000,000; shares \$1 par; outstanding, 998,942. Seven dividends paid to April, 1914, total \$530,000; none since. Company is one of the oldest of the Tonopah district, and has had a very checkered career.

Property: 15 claims, about 190 acres, traversed by the Mizpah fault and showing silver ore. **Development:** 865' shaft and over 15 miles of workings. Mine was closed down and the 40-stamp mill ceased operating on Nov. 15, 1914, due to exhaustion of ore reserves. Since then a number of lessees have been working in the mine. Management controls the Commonwealth Mining & Milling Co. of Arizona.

MONTANA UNITED MINING CO.

MONTANA

J. G. Kirby, pres., Willimantic, Conn. **Cap.**, 150,000 shares; \$1 par; all issued. **Property:** 240 acres, patented, 9 miles east of Deer Lodge, adjoining the Emery mine, shows a fissure vein varying from a streak to 7', average width 3-4'. **Ore:** gold, silver, lead, zinc and much antimony. Said to have 20,000 tons ore blocked out that will average \$20 per ton, including zinc.

Equipment: includes 50-h. p. hoist, 300-cu. ft. compressor, and all necessary boilers, buildings, etc. The mine is idle, needing money for a mill and further development.

MONTANA YERINGTON CO.

NEVADA

Yerington, Lyon Co., Nev. **Property:** a group of claims said to show ore bodies in porphyry with 4-7% copper, unlike other Yerington deposits. **Development:** 400' shaft. The 160' level east was run 500' to daylight, making a main working tunnel. Crosscut on 400' level said to encounter ledge 6-7' thick, showing shipping ore in face. Under option to Geo. Wingfield, Goldfield, Nev., 1913, and Mason Valley Mines Co., in 1914, but was relinquished. Is being worked by Messrs. Archer, Ehrman and Kremmel, 1915-16. Reported shipping 25 tons ore daily, 1916.

MONTE CRISTO MINING & MILLING CO.

ARIZONA

Chief owner, Ezra W. Thayer, Phoenix, Ariz. Chas. B. Brann, supt. **Property:** Monte Cristo silver mine and the Arizona Copper Belt mine at Constellation, Yavapai Co. Recently bought the adjoining Torrette group. The Monte Cristo mine is said to show high-grade silver ore in addition to copper ore. Developed by 950' shaft with over 6,000' of workings, at last accounts. Company plans to develop to 1,100' level, and then erect a mill.

MONTE RICO MINING & MILLING CO.

NEW MEXICO

Office: 428 Washington Trust Bldg., Washington, Pa. Mine office: Lordsburg, Grant Co., N. M. **Officers:** Lawrence R. Boyd, pres.; F. B. Theakson, v. p.; Jas. V. Boyd, sec.-treas. **Inc.** in Arizona. **Cap.**, \$500,000; shares \$1 par; nonassessable.

Lands: 9 claims, 120 acres, on Lee's peak, in the Pyramid mountains, Virginia district, 4 miles S. W. of Lordsburg.

Geology: property shows diorite cut by andesite, and there is said to be a dike 100 to 200' wide mineralized throughout and forming the center of a network of veins. Ores at and near surface carry azurite and malachite, succeeded at depth by chalcopyrite, and there are also silver, lead and copper ores with small gold values.

Development: mine is reported to have upwards of 2,000' of workings, with ore in sight estimated by the company at 500,000 to 1,000,000 tons, which is probably as true as the statement that its ores can be mined and milled at an expense of \$1.50 to \$2 per ton. In 1916 a tunnel was being driven.

The prospectus of the company is replete with misinformation and untruths, and among other things states that "this formation, as well as the character of the ore, is identical with that found in the great copper mines at Bisbee, Globe, Jerome and Cananea," but as is well known, the orebodies of those localities differ greatly in occurrence. In view of the many questionable statements made, and the unreasonably large profits promised in the prospectus, the company must be regarded with much suspicion.

MONTEREY MINING, SMELTING & REFINING CO., S. A. MEXICO

(Compania Minera, Fundidora y Afinadora, S. A.) Monterey, Nuevo León, Mex. Juan M. Weber, general manager. Cap., \$8,000,000; shares \$100 par.

Property: includes the Ocampo and Santa Elena mines, at Mineral de la Mula, carrying gold, copper and lead ores; La Cruz y Anexas mines, at Pánuco de Coronado, carrying silver-lead and copper ores; the Cinco de Mayo group at Lampazos, Nuevo León, producing iron fluxing ores; and a mine at Naica, Chihuahua, Mex.

Company operates a lead smelter and silver-lead refinery, in direct competition with the American Smelting & Refining Co., at Monterey. The smelter also handles small quantities of copper, which is disposed of in the form of matte. **Production:** 1912, was 13,919,107 kgs. lead, 238,555 kgs. silver and 3,158 kgs. gold. Probably idle since revolution started in Mexico.

MONTEREY SMELTING & REFINING CO. MEXICO

Monterey, Nuevo León, Mex. Controlled by American Smelting & Refining Co., which see.

MONTEZUMA COPPER MINING CO. ARIZONA

Property sold to Southwestern Miami Development Co. See Vols. VII and IX, Copper Handbook.

MONTEZUMA & THE WHIZZERS MINE. SOUTH DAKOTA

Deadwood, Lawrence Co., S. D. J. T. Gillmore, manager. **Lands:** 13 claims, patented, 118 acres, on the divide between Deadwood and White-wood Cañons, and on Deadwood Creek and West Gold Run, near Lead City, S. D. Property shows Algonkian schists, slates and quartzite, and carries a strong gossan, of 45' estimated average width, traceable 3,000'. Principal claims are the Spiegel No. 1, formerly known as the Whizzers, and Brownie No. 5, carrying 2 parallel quartzite reefs, about 300' apart. The first named has chalcopyrite in a gangue of hornblende schist, surface ores carrying 0.5 to 1.5% copper, up to 1 oz. silver and \$1-\$2 gold per ton.

Brownie No. 5 claim has 2 tunnels, one 650' long, and has produced about 50,000 tons of low-grade fluxing ore, sent to smelters at Deadwood and Rapid City, until the latter were closed down. A 22' winze, below the water-level, gave picked samples assaying \$16.80 gold per ton.

The Montezuma claim, near West Gold Run, has 2 short tunnels, show-

ing ore assaying up to 1 oz. silver and \$53.70 gold per ton. Though low in average grade, the property is considered promising, because of the enormous tonnage assured, but needs big capital to develop. Examined and reported favorably on by Geo. Huston, of Mullan, Idaho, and Nicholas Treweek, of Salt Lake City.

MONTEZUMA LEAD CO. See *Mexicana*; *Cia. Metallurgica*.

MONZONITE SILVER & COPPER CO.

UTAH

Officers: S. S. Pond, pres.-gen. mgr.; D. Rigby, sec.; Geo. Baglin, treas. **Cap.**, \$50,000; shares 5 cts. par; assessable. In treasury Jan., 1916, 400,000 shares; bills receivable and cash, \$2,500. Stock listed in Salt Lake City.

Property: 7 unpatented claims, near Milford, Beaver Co., 6 miles from the railroad, surrounded by the Leonora, Hoosier Boy and Paloma Extension mines. **Ore:** silver and copper. **Development:** 100' shaft with 50' of crosscutting. Is a prospect.

MOONLIGHT MINING CO.

IDAHO

Burke, Idaho. **Officers:** Eugene R. Day, pres.; Jas. J. Murphy, v. p. and mgr.; E. Hedin, sec.-treas.

Property: 9 patented claims, adjoining the Hercules mine on the East. The main tunnel through which the property has been worked is an extension of the old Trade Dollar tunnel, 600' below the upper workings and 900' below the outcrop. The vein was cut in 1914 and drifting was started, but vein was found to be cut off by a fault. A crosscut was then started 1,400' back. About 800' of drifting has been done, but little ore has been found. Working, April, 1916.

MORGAN ARGENTINE MINING CO.

UTAH

Office: 22 E. Broadway, Salt Lake City, Utah. Mine at Peterson, Morgan Co., Utah. Herbert Pembroke, pres.-gen. mgr.; A. B. Pembroke, sec.-treas.; Earle R. Pembroke, engr. Inc. 1900 in Utah. **Cap.**, \$50,000; shares 1c par.

Property: 14 claims, 8 patented, 220 acres, in Argenta district, shows fissure veins in limestone carrying silver-lead ore. Annual assessment work done and company exploring in hopes of finding ore in commercial quantities.

MORNING GLORY MINE.

ARIZONA

Chas. B. Wilson, owner and manager, Patagonia, Santa Cruz Co., Ariz. **Property:** 11 claims, 220 acres, 12 miles from a railway, in the Harshaw district of the Patagonia mountains. Claims show a 6' fissure vein in limestone and porphyry, carrying sulphide ore, estimated by owner to average 3% copper, 3 oz. silver, 60c gold, 35% iron and 35% sulphur per ton. A shoot of zinc ore is also reported.

Development: 2 shafts of 80' and 200', with about 1,475' of workings, are estimated by owner to give 50,000 tons of 3½% copper ore blocked out for stoping. Ore is hand-sorted. **Equipment:** includes a small hoist. **Production:** 10,000 tons to date. Developing only in 1915, but plans to ship ore, 1916, and extend 400' crosscut tunnel 400' further. Mine has been worked for over 30 years.

MORNING GLORY MINE.

COLORADO

Jas. Harbaugh and A. B. Harbaugh, owners, Pitkin, Teller Co., Colo. **Property:** 12 claims, 120 acres, at the head of north fork of Quartz Creek, said to show a number of veins from 4' to 35' in width, developed by tunnels. A 400' tunnel is said to cut a 10' vein assaying up to \$107 per ton in gold and silver. An 800' tunnel is said to cut a 35' vein that will assay 4% copper, in addition to 4' of molybdenum ore, while a third tunnel 190' long cuts a 4' vein assaying \$8 per ton in copper, lead and zinc.

Lessees working on property and some shipments being made.

MORNING STAR MINE.

Owned by Curtz Consolidated Mines Co.

CALIFORNIA**MOROCOA MINING CO.****PERU**

Entire stock issue owned by Cerro de Pasco Corporation, and property described under that title.

MOSCOW MINING & MILLING CO.**UTAH**

Offices: 1020 Boston Bldg., Salt Lake City, and Moscow, Beaver Co., Utah. **Officers:** Matthew Cullen, pres.; J. L. Rawlins, v. p.; Athol Rawlins, sec.; L. H. Farnsworth, treas.; G. S. Wilkin, supt. Inc. May, 1907, in Utah. **Cap.**, \$1,000,000; shares \$1 par; assessable; issued, \$900,000. Listed on Salt Lake Exchange. Dividends: \$67,686 to 1916. Company does not reply to requests for information.

Property: 7 claims, including the Moscow mine in the Star district. 7 miles from a railroad, covers about one-half mile of the strike of an ore zone 50' to 60' wide. Ore mainly silver-lead, with some copper and zinc. The Moscow mine is one of the oldest in the district, having been worked over 30 years ago.

Development: tunnels and shaft to the 1,100' level. In 1914 a new shaft with collar 300' below the old was completed to the 800' level. Work was resumed in Jan., 1916, and it is the intention to sink to the 1,000' level with the hope of cutting the ore below the latest fault; the shaft was down 950', April, 1916.

Shipments: have been fairly consistent during the past year. In March, 1916, output was about 250 tons, while 200 tons were shipped during the first half of April.

Company employs 60 men. Electric power is used.

MOTHER LODE COPPER MINES CO. OF ALASKA.**ALASKA**

Offices: 45 Broadway, New York, and 902 Lowman Bldg., Seattle, Wash. Mine supt., W. Bertram Hancock, Kennecott, Alaska. **Officers:** Jas. J. Godfrey, pres.; J. W. Robinson, v. p.; C. L. Warner, sec.-treas.; with J. H. Rhodes, Edwin N. Ohl, Isaac Starr and Chas. M. Eaton, directors; Geo. E. Baldwin, gen. mgr.

Inc. Nov., 1907, in Washington. **Cap.**, \$5,000,000; shares \$1 par; 4,750,000 issued. Stock listed on New York Curb.

Property: 70 lode and placer claims, about 1,300 acres, including the Smith-Haglund-Sall group, adjoins the Bonanza and Jumbo mines of the Kennecott Copper Corporation, in the Copper River district, Kennecott, Alaska. Mine is 14 miles by wagon road from the railroad. Ore carries a high copper content with gold and silver values.

Geology: conditions at this property, according to Herman Keller, are similar to those of the Bonanza mine. The base of the mountain is formed of amygdaloidal basalt, highly altered and called the Nicolai greenstone. This is covered by thick beds of Chitina limestone, dipping north. The ore shoots occur in the limestone, and exploration has shown that, contrary to general belief, the ore does not occur along the greenstone contact, but in a favorable bed 90' above it, and then only in connection with the Bonanza fault, or shear zone. This shear zone, 20 to 24' wide, cuts both greenstone and limestone and the ore is found in chimneys and as irregular bunched masses along the zone and as impregnations in the limestone walls. The ore consists of nearly pure glance with minor and unimportant amounts of covellite and very little malachite, etc. Like the Bonanza ore, it carries gold and silver.

Development: by tunnels, known as the South, North, Regal, Marvelous and Pittsburgh; principal work is at the Marvelous tunnel. Development aggregated 5,401', Jan. 1, 1916.

Equipment: includes Sullivan air compressor, Otto gasoline engine, Lidgerwood hoist and a 7,300' aerial tramway, connecting main tunnel with the wagon road. Buildings include office, boarding house and several other log structures.

New work planned for 1916 includes crosscutting on 300' level of Bonanza incline; raise and winze from 200' Pittsburgh level.

Ore reserves: management estimates 49,501 tons ore developed with 10,684 tons in sight and in stopes, averaging 30% copper and 7 oz. silver; 21,367 tons of milling ore, 15% copper and 4 oz. silver, and 17,000 tons of ore on dump carrying 8% copper and 2 oz. silver per ton. This is exclusive of 23,000 tons probable ore estimated at 15% copper and 4 oz. silver per ton. Cost of mining is about \$3.50 per ton.

Production: March 4, 1914, to Feb. 9, 1915, 934,170 lbs. copper and 14,016 oz. silver. Shipments of 1,226 tons high-grade ore to Tacoma smelter, from March 4, 1915, to Feb. 9, 1916, averaged 48½% copper and 13 oz. silver per ton, with net smelter returns of \$124,477.

Company can pay expenses with its high-grade ore, but shareholders must look to the milling ore for dividends. The present problem appears to be how to get the \$500,000 needed for mill construction and mine development, when the treasury holds but 250,000 shares, whose market value May, 1916, was approximately \$80,000.

Property has been fully and favorably reported on by Herman A. Keller and by Arthur W. Jenks, and is a prospect of considerable merit.

MOTHER LODE SHEEP CREEK MINING CO.

BRITISH COLUMBIA

Sheep Creek, B. C. **Officers:** Alex. L. Smith, sec., transfer agent and registrar. Cornwall, Ont.; John McMartin, pres.; with L. H. Timmins, Duncan McMartin, John K. Erskine and Wm. Watson, directors. J. R. Rutherford, gen. mgr.

Inc. Feb. 1 in Maine. **Cap.,** \$1,250,000; shares \$1 par. A dividend of 11% was declared in Dec., 1915.

Property: at Sheep Creek, West Kootenay district, B. C., shows gold ore in an orebody said to have a maximum width of 35' on 6th level. **Equipment:** includes 10-stamp mill and cyanide plant, connected with the mine by a 3,600' aerial tram.

In 1914 ore mined and milled amounted to 20,000 tons; bullion recovered reported as \$100,000. Owing to lack of power the mine has been operating only about 9 months of the year.

MOUNT ANDREW IRON & COPPER CO.

ALASKA

Office: Empire Bldg., Seattle, Wash. W. J. Rogers, supt. **Property:** held under lease from the Mount Andrew Mining Co., on Kasaan peninsula, Prince of Wales island, Alaska. **Geology:** ore carries chalcopyrite disseminated in magnetite, with hornblende gangue, and is practically unaltered at surface, masses of sulphide ore even showing glacial striations. Ore averages about 3.75% copper and \$1 to \$1.60 per ton in combined gold and silver values. The orebody has been stripped for about 2 acres and developed by tunnels of 300' and 700', with a 70' blind shaft from the tunnel, and 10 small glory-holes, opened upwards to surface from the tunnels.

A 4,600' aerial tram of 40 tons hourly capacity leads from a 50-ton loading bin at the mine to a shipping bunker 500' from tide water. **Equipment:** includes two 50-h. p. boilers, with 5-drill and 7-drill Ingersoll-Sergeant air compressors. Buildings include office, boarding house, bunk house and smithy.

Under option, 1913, to Granby Cons. M., S. & P. Co., Ltd., but relinquished. Reported working 1914.

MT. CHAMPION MINING CO.**COLORADO**

Address: 60 India St., Boston, Mass., and Leadville, Colo. **Officers:** C. H. Huff, pres.; C. Q. Adams, v. p.; W. E. McKee, sec.; A. A. Wentworth, treas.; F. S. MacGregor, asst. treas.; all of Boston. Lucien Smith, mgr. Company is a close corporation, inc. in Maine, 1910.

Property: 10 patented, several unpatented claims, 500 acres, at Lackawana Gulch, near Leadville. **Ore:** principally gold with silver and a small amount of copper and lead in fissures in granite. High-grade ore is said to assay \$70 to \$100 per ton; milling ore, \$8.50 to \$10.

Development: by tunnels, almost entirely in ore, with 10,000' of workings. **Ore reserves:** said to be sufficient for 10 years' operations at present rate of production. **Equipment:** includes Ingersoll-Rand compressor, electric power and 75-ton amalgamating and concentrating plant.

Production: 4,615 tons ore treated in 1914, 8,137 tons in 1915. High-grade ore shipped in 1915 averaged \$77 per ton; concentrates \$100 per ton. Property is handicapped by its distance from the railroad.

MOUNT GAINES GOLD MINING CO.**CALIFORNIA**

Hornitos, Mariposa Co., Calif. Said to be financed by Los Angeles and Chicago capital. **Officers:** Wm. B. Davidson, pres.; A. L. Irish, v. p.; D. J. Hoge, sec.-treas.; with A. E. Rutherford and P. B. Ellis, directors; Samuel J. Paul, mgr. **Cap.**, \$150,000; shares 10c par. The new company has paid for the mine partly in stock and given a first mortgage trust deed for \$66,000.

Property: 200 acres patented and 300 acres unpatented land in Sec. 35, T. 4 S., R. 16 E., 4½ miles E. of Hornitos, on the west vein of the Mother Lode, said to show gold ore. **Development:** by 1,350' incline shaft with 11 levels and about 8,000' of workings. At present the mine is full of water, but old records are said to show a 5' vein assaying \$7 per ton.

Equipment: includes electric hoist, air compressor and 20-stamp mill with amalgamation and concentration tables. Electric power is obtained from the San Joaquin Power & Light Co.

Mine has been idle since 1910, but the new company, which came into full possession on May 10, 1916, plans to unwater it and put it in the producing class.

MOUNT ST. HELENS CONS. MINING CO.**WASHINGTON**

Office: 516 Selling Bldg., Portland, Ore. Mine office: Spirit Lake, Skamania Co., Wash. **Officers:** Thos. Prince, pres.; H. P. Christiansen, v. p.; E. L. Harmon, sec.; Dr. Henry Waldo Coe, treas. and managing director; Andrew Olson, supt.; Geo. W. Lilly, engr. **Inc.** 1902 in Oregon. **Cap.**, \$1,800,000; shares \$1 par.

Property: 65 claims, patented, 1,300 acres, estimated to carry 45,000,000' of standing timber, on the North fork of the Toutle river and on the shores of Spirit Lake, 50 miles from Portland. It includes the former holdings of the Sweden Copper Co., Calumet Copper Mng. Co., Bronze Monarch Mng. Co., Chicago Mng. Co., Yellow Metal Mng. Co., Earl Mng. Co. and Cascade Copper Mng. Co. The company also owns a three-fourths interest in the United mines. In addition to copper ores the tract contains gold veins, an ochre bed, a granite quarry and a deposit of pumice stone.

Claims are said to show syenite, diorite and slate with fissure veins carrying about 20 orebodies ranging from 5 to 100' in estimated width. The ores carry chalcocite, bornite and chalcopyrite and vary from 2 to 25% copper, some lead, 2 to 50 oz. silver and \$1 to \$40 gold per ton.

Development: by 5 tunnels, longest 2,300', and 50' shaft, with about 5,500' of workings, estimated by the management to show 125,000 tons of medium and high-grade ores with a greater tonnage of milling ore.

Lands are owned outright and the company has no bonds or debts, but the property has been practically idle for some years awaiting the construction of a much-needed railway. Mines fully described Vol. XI, Copper Handbook.

MOUNT SICKER & B. C. DEV. CO., LTD. BRITISH COLUMBIA

Idle. Office: 30 George Square, Glasgow, Scotland. Fred I. Smith, chairman; John D. Steel, sec. Inc. Oct. 20, 1898, in Great Britain. Cap., £125,000; shares £1 par. Lands are on Mt. Sicker, Vancouver Island, B. C.

MT. THOMPSON GOLD M. & M. CO. MONTANA

Officers: E. S. Rinehart, pres.-mgr., Stevensville, Ravalli Co., Mont.; J. W. Franks, v. p.; W. H. Rager, sec.; C. C. Franks, treas.; with Jos. Hunter, directors. Inc. Oct., 1909, in Mont. Cap., \$1,000,000; shares \$1 par; outstanding, 700,000. Annual meeting, February 10. Operating expenses for 1915 given as \$5,000.

Property: 10 claims, 200 acres, near Basin, in the Cataract district, Jefferson Co., 30 miles from Butte, said to have a vein 5' to 7' wide in granite. **Ore:** claimed to assay 8 oz. silver, \$1.50 gold, 8% lead, 1% copper and 22% zinc. **Development:** 900' tunnel, with 1,200' of workings, claimed by management to block out 30,000 tons ore. Plans continuing development work.

MOUNTAIN COPPER CO., LTD. CALIFORNIA

Secretary's address: 3 Lombard St., London, E. C., England. Operating office: 332 Pine St., San Francisco, Cal. Mine office: Keswick, Shasta Co., Cal. Works office: Martinez, Contra Costa Co., Calif. Capt. F. B. Lawson, chairman; Sir Andrew Noble, Henry J. Wenham, J. T. Middleton, E. T. McCarthy and A. N. Frewer, directors; Wm. F. Kett, gen. mgr.; W. L. Cole, mine supt. Jardine, Matheson & Co., Ltd., 74 Wall St., New York, American sales agents.

Inc. Dec. 1, 1896, in Great Britain, and reorganized May 10, 1902. Cap., £250,000; shares £1 par. In 1899 the company changed its capitalization of £1,250,000 into £250,000 in shares and £1,000,000 in 6% debenture stock; shares £4 par, on which a first payment of £1 per share was made Jan. 16, 1905, leaving £750,000 of stock outstanding. The change in 1899 was practically a complete amortization.

Dividends: before reconstruction. 1897-1901, aggregated 58½%. Profits were £150,255 in 1907; £28,112 5d in 1908; £24,557 12s 4d in 1909; a deficit of £3,042 in 1910; profit of £55,069 in 1911; £81,686 in 1912; £53,456 in 1913; £35,562 in 1914.

Property: is extensive, including the Iron Mountain and Hornet mines, 10 miles N. W. of Redding. The Iron Mountain mine was opened, 1880, for silver, and was given a 20-stamp mill, 1884, working the gossan in a small way for some years.

The Iron Mountain mine had a gossan of 100 to 300' width, covering a lens of ore, 100 to 400' wide, 800' long and 500' deep, in a shear zone of meta-rhyolite. The ore carries chalcopyrite associated with pyrite, averaging about 5% copper, 2 oz. silver and slightly under \$1 gold per ton. The orebody was worked pillar-and-stall, and stopes filled with waste, but pillars have been robbed and the mine now shows little high-grade sulphide ore, though there are reserves of 500,000 tons of silicious ore averaging 4 to 5% copper. The old orebody being pyrite, there was trouble from fires, but the application of the plenum system of ventilation, by Mr. Wright, restored normal conditions. Considerable cement copper was secured from the charged waters coming from the fire zone.

The Hornet mine, lying to the north of the Iron Mountain, developed about 5,000,000 tons of pyrite ore, averaging only about 1% in copper tenor, with patches up to 2.5% copper, and carrying 47 to 50% sulphur. Gold and

silver values are very small but the ore is valuable for the manufacture of sulphuric acid, saving the small copper and precious metal values as by-products.

The mines are connected with Keswick by an 11-mile narrow-gauge steam railway, traversing a rugged country, with an average grade of nearly 4%, the elevation gained being 2,000'.

In Dec., 1915, the company was said to be shipping about 12,500 tons of ore a month from its mines to the Martinez smelter. Employs about 400 men at the mines and 175 at the smelter.

The Keswick smelter, fully described in Vol. VIII, Copper Handbook, has been dismantled. A 250-ton oil flotation mill started operating in March, 1915.

The 350-ton Martinez smelter, on San Francisco bay, has one of the most extensive and best planned acid works in existence, built at a cost of approximately \$1,250,000. The Hornet ores, low in copper but rich in sulphur, are burned, the sulphur fumes collected in lead-lined chambers and transformed into sulphuric acid by the Meyer chamber process, the cinder remaining after the roasting is smelted for its copper contents. The acid is sold crude and also is used as the basis of commercial fertilizers for which there is a considerable demand in the rich fruit and agricultural districts of California and the other Pacific coast states. The Martinez works also do a general custom business and are fully equipped with steam, electric and pneumatic power.

Production: Dec., 1915, was at the rate of about 400 tons daily from the mines at Iron Mountain, and 200 tons daily from the Hornet. At one time, only a decade ago, this company was among the largest copper producers of the world, but has since greatly declined in output, production having been 29,727,040 lbs. fine copper in 1901; 19,116,160 lbs. in 1903; 6,814,000 lbs. in 1907; 3,638,619 lbs. in 1908; 2,775,197 lbs. in 1909; 2,987,815 lbs. in 1910; 5,400,000 lbs. in 1911; 5,614,000 lbs. in 1912; 6,890,000 lbs. in 1913; 5,454,000 lbs. in 1914.

Company has been managed with great prudence and marked success, both financially and technically and notwithstanding the depletion of an originally rich mine, has been able to make a successful change of base by which low-grade pyrite ores are utilized for the manufacture of acid.

MOUNTAIN DELL CONSOLIDATED MINING CO. UTAH

American Fork, Utah. Mine sold at sheriff's sale, 1914, to R. N. Baskin, former mine supt., for \$7,597. See Copper Handbook, Vol. XI, 1913-14.

MOUNTAIN KING MINING CO. CALIFORNIA

Office: 244 Kearney St., San Francisco. **Officers:** W. S. Miller, pres.; H. T. Harper, sec.; A. McMillan, managing director; B. C. Austin, supt., Mountain King, Mariposa Co., Calif.

Property was taken over some years ago and an assessment of \$60,000 levied within a year. Report for year ending March 31, 1916, shows the company had canceled an indebtedness of \$73,700, built a power plant and had a balance of \$36,229. An initial dividend of 3c per share was paid May 15, 1916. Net earnings for the year were \$87,303.

Property: 16 claims, patented, on the north fork of the Merced river on the Yosemite Valley R. R., in Sec. 31, T. 3 S., R. 18 E. **Ore:** gold in veins of quartz and slate from 1' to 12' wide, with slate walls, strike N. W.-S. E. and dip 54°. Average assay \$7 per ton. **Development:** 3,000' of tunnels with total of 9,500' of underground workings; greatest depth 1,100'. Development work done in 1915 amounted to 3,765'. **Ore reserves:** claimed to be sufficient to supply 20 stamps for two years.

Equipment: includes air compressor, hydro-electric plant, built in

1915, and a 30-ton stamp mill, with 20 stamps in operation. Power plant has one 350-kva. 3-phase, 4,000-volt generator direct connected to a turbine running at 600 r. p. m.

Production: for year ending March 31, 1916, 28,145 tons of ore. Extraction, 93.16%. Average value of ore crushed, \$6.86 per ton; total yield per ton, \$6.39.

MOUNTAIN LAKE MINING CO.

UTAH

In 1916 merged with Great Western Gold & Copper Co. and Thor Mining Co., under title of Great Western Mines Co., which see.

MOUNTAIN MINING CO.

COLORADO

See Salida Copper Co. Property is the Griffith mine.

MOUNTAIN MONARCH GOLD MINING CO.

CALIFORNIA

Office: 319 Yuba St., Redding, Cal. **Mine office:** Shasta, Shasta Co., Calif. **Officers:** W. F. Aram, pres. and gen. mgr.; J. H. Hunter, sec.; C. E. Armstrong, treas., at last accounts. **Inc.** Nov. 25, 1905, in California. **Cap.**, \$75,000; shares \$1 par, in \$25,000 preferred and \$50,000 common stock.

Property: 11 claims, unpatented, 220 acres, in the Whiskeytown district, north of Redding, 10 miles from the Southern Pacific railway, shows fissure veins in rhyolite, the main one said to be 140' wide, traceable 2,500'. Ore carries malachite, bornite and chalcopyrite associated with pyrite, and averages 7% copper, 1.5 oz. silver and \$3.40 gold per ton. **Development:** by tunnels of 200' and 750', with 1,200' of workings. **Equipment:** includes steam and gasoline power with a 6,000' sawmill and 5 mine buildings. Idle.

MOUNTAIN SILVER, LEAD & ZINC CO.

NEW MEXICO

Ricketts & Co., mgr., 80 Maiden Lane, New York. **Officers:** C. E. Berner, pres.; C. W. Berner, v. p.; G. F. Ettensperger, sec.-treas.; above with F. C. Wilson, Sidney H. Hirsh, directors. **Cap.**, \$1,000,000; shares \$1 par; 200,000 shares in treasury. Stock listed on New York Curb.

Property: 500 acres in Palomas mining district, Sierra Co., N. Mex., includes several silver producing mines. **Equipment:** includes concentration mill, steam power, hoist and compressor, sawmill, shops and houses.

MUDERSBACH MINE.

ARIZONA

Near Bouse, Yuma Co., Ariz. See Record Mines Co. Was under option to Clara Consolidated Co., but relinquished and has reverted to original owners.

MULOCK MINE.

MICHIGAN

Idle. **Office:** care R. P. Mulock, owner, Colfax, Ia. **Mine** near Matchwood, Ontonagon Co., Mich. **Property:** 240 acres, the N. W. $\frac{1}{4}$ of Sec. 9 and the N. W. $\frac{1}{4}$ of N. W. $\frac{1}{4}$ and S. W. $\frac{1}{4}$ of S. W. $\frac{1}{4}$ of Sec. 15, T. 49 N., R. 41 W., one-half mile N. W. of the Norwich mine. Exploratory work, 1903-05, showed 4 cupriferous anygdaloidal beds, of which two, about 400' apart, averaging 6' and 15' in width, were opened by several pits, showing copper.

MULTNOMAH MINING, MILLING & DEV. CO.

WASHINGTON

Idle. **Office:** 405 Kuhn Bldg., Spokane, Wash. **Officers:** M. J. Hills, v. p. and sec.; Dr. F. O. Hudnutt, asst. sec. and gen. mgr. **Inc.** 1901, in Washington. **Cap.**, \$2,000,000; shares \$1 par.

Property: about 600 acres, in 4 groups, including the River group of 260 acres, patented, carrying placer gold; the Mineral Hill group of 100 acres, 3 miles west of Nespelem, Okanogan Co.; the Ramsey group of 60 acres, adjoining the Nespelem Central Mining Co., 5 miles west of Nespelem, and the Multnomah group of 180 acres, 4 miles west of Nespelem, with a tunnel of about 1,100', said to cut a 15' vein, showing argentiferous lead ore. There are 5 buildings, and a dam built across the Nespelem river.

MUMME MINING CO.**ARIZONA**

Office: 1502 S. Flores St., San Antonio, Tex. **Mine office:** Patagonia, Santa Cruz Co., Ariz. **Officers:** T. E. Mumme, pres. and gen. mgr.; E. J. Mockert, v. p.; H. P. Mockert, sec.; Geo. F. Wieland, supt. **Inc.** Sept. 20, 1910, in Arizona. **Cap.**, \$100,000; shares \$1 par; issued 61,000 shares. Also has \$10,000 debentures authorized, but unissued.

Property: 7 claims, patented, in the Harshaw district, 6 miles from Patagonia, shows 2 veins of about 7' average width, carrying ore said to average 9% copper, 22 oz. silver and \$4 gold per ton. **Development:** 50' shaft and 3 tunnels, longest 320'. Mine has no power equipment.

MURDOCK MINING & MILLING CO.**ARIZONA**

Oatman, Mohave Co., Ariz. Officers: S. R. Porter, pres., treas. and supt.; L. P. Hansen, v. p.; D. Gibson, sec.; with F. L. Porter and C. W. Herndon, directors. **Inc.** Dec. 3, 1915, in Ariz. **Cap.**, \$1,000,000; shares \$1 par; outstanding 630,000. **Transfer office and registrar:** Security Transfer & Registrar Co., New York. Listed on New York Curb as a prospect.

Property: near Oatman, shows a vein in andesite. Ore is gold bearing and of the usual dense quartz type.

MUTUAL CO-OPERATIVE MINING CO.**COLORADO**

Office: 409 Exchange Bldg., Denver, Colo. **Officers:** H. R. Steele, pres.; H. R. Adams, v. p.; Frank E. Wire, sec.; L. E. Johnson, treas.; W. F. Headley, supt., with A. M. Startzell and F. E. Gibson, directors. **Inc.** 1912. **Cap.**, 1,500,000 shares; \$1 par; 1,085,000 issued. Balance in treasury, Dec., 1915, \$814.

Property: 10 claims in Gold Hill district, Boulder Co., including the Hoodoo and Columbus claims, 2¼ miles from Salina. **Development:** by 600' of tunnels and an old shaft on the Hoodoo which was cleaned out and retimbered in 1916. Quantities of milling ore are said to exist in old workings and vein reported to be over 2' wide, carrying 2% copper with lead and gold-silver values. Driving a 140' drift S. W. on vein on the 55' level of the Hoodoo shaft.

NABOB MINING CO.**IDAHO**

Kellogg, Idaho. Officers: D. W. Price, pres.; Harry A. Holland, v. p.; Harvey M. Ross, sec.-treas.-mgr., with E. J. Lippert and W. Y. Clark, directors. **Inc.** April, 1897, in Idaho. **Cap.**, \$1,500,000; shares \$1 par; assessable; 15c called to date; 1,150,000 shares outstanding. Stock listed on Spokane Exchange. Annual meeting third Monday in May.

Property: 22 claims, about 440 acres, near Wardner, Shoshone Co., 2½ miles W. and S. of Bunker Hill and Sullivan mine, shows silver-lead-zinc ore in quartz vein, running E. W. and dipping about 85°. **Developed** by 2,000' tunnel and 100' vertical shaft, sunk from 500' level. **Equipment:** includes electric power, Cameron No. 6 pump, compressor and air hoist. Management estimates 30,000 tons of ore blocked out. Shaft being sunk to 600' in 1916. Extensive development work has so far failed to disclose ore of commercial value.

NACO CONSOLIDATED COPPER CO.**ARIZONA**

Idle. Unfavorably regarded. Described in Copper Handbook, Vol. XI.

NACAZARI CONSOLIDATED COPPER CO.**MEXICO**

Address: P. O. Box 64, Douglas, Ariz. **Mine address:** Pilares de Nacozari, Sonora, Mex. **Officers:** John G. Alexander, pres.-gen. mgr.; R. R. Humphrey, v. p.; B. R. Russell, sec.; Roy Hiatt, treas., with Geo. S. Howard, Geo. Motz and Y. Soto, directors. Swan Ferguson, mine supt. and purch. agt.; E. W. Evans, mill supt. **Inc.** July, 1907, in Arizona. **Cap.**, \$3,000,000; shares \$5 par; fully paid and nonassessable; issued, 490,000;

25,000 shares sold for \$1 each in Sept., 1913. Annual meeting, second Monday in July.

Property: 15 claims, 360 acres, lying in 2 groups, adjoining the Pilares mine of the Moctezuma Copper Co. on the S. E. The Galera group shows andesite and brecciated rhyolite cut by several veins carrying complex sulphide ores with gold-silver, lead and zinc values. The Copper King group, which adjoins the Pilares mine, shows a big red reef, 400' wide, of brecciated, silicious vein matter outcropping on the Copper King claim and supposed to be an extension of the Pilares deposit.

The Galera group is opened by a long tunnel driven on the vein developing narrow streaks of high-grade shipping ore. Company has spent much of its money on the main, or No. 1 tunnel (2,500' long, in Nov., 1915), driven towards the Red Hill to undercut the Copper King outcrop.

Development: to date, is 9,800', including 3 shallow shafts and a number of prospect tunnels. Management estimates 50,000 tons of ore blocked out with an average content of 1% copper, 12% lead, 8% zinc, 10 oz. silver and 50c gold per ton.

In Feb., 1914, company completed construction of a 250-ton concentration mill and in March, 1916, was planning to build a 500-ton smelter, claimed to be warranted by the ore developed, also to sink a 500' shaft on the San Pablo claims. Shipments of high-grade ore, said to average over \$100 per ton, were being made in March.

Property is in an excellent location, has promising ground and, apparently, will become a steady producer.

NAILDRIVER MINING CO.

UTAH

Is a subsidiary of the Ontario Silver Mng. Co., 163 So. Main St., Salt Lake City, Utah. **Officers:** W. Mont. Ferry, pres.; Herbert Cohen, sec-treas. Inc. Oct. 2, 1902. **Cap.**, \$600,000; shares \$2 par; assessable; 287,450 shares issued. Stock listed on the Salt Lake Exchange.

Property: 13 claims in Park City mining district, Summit Co., Utah, shows silver-lead-gold-copper ore, developed to depth of 600' by shaft and drifts. Shipped 120 tons of lead-silver ore in 1903-05, netting \$8,543. Developing in 1915.

NAPOLEON MINE.

CALIFORNIA

Idle many years. Mine near Copperopolis, Calaveras Co., Cal. Peyton Chemical Co., Mills Bldg., San Francisco, owner. This is the oldest copper mine in California and was a considerable producer in 1865. The property shows a 100' ore channel, ranging from diabase to talcose schist, with lenticular orebodies up to 20' in width, carrying mainly copper sulphides. **Development:** by a 430' new main shaft and a 325' old shaft, to the eastward.

NAPOLEON MINING CO.

MISSOURI

Joplin, Mo. Inc. in Missouri. **Cap.**, \$10,000. Operates a lease on 40 acres of mineral land owned by E. N. Perry in S. 22, T. 28, R. 33., Joplin, Jasper Co., Mo. Developed by 2 shafts to depth of 200'. Production in 1915 came from the 180' level. **Equipment:** includes 250-ton concentrating plant, 450' aerial tram, steam power, pump and hoist. Output is lead-zinc concentrate. About 35 men employed.

NASSAU COPPER CO.

CALIFORNIA

Office: 339 Bush St., San Francisco. **Property:** 2 patented claims, 40 acres, and 1,560 acres of agricultural lands, 4 miles north of Copperopolis, Calaveras Co., Calif., covering a length of 15,840' on the lode. Ore occurs in lenses and streaks as copper sulphides, pyrite, gold, silver and zinc in a 10' vein running N. 35° W. and dipping 65° N. E.

Development: by 280' shaft with 1,000' of drifting N. and S. on the

95' level and 1,100' of drifting N. and S. on the 200' level. Two oreshoots are under development. Ore is shipped to the Selby smelter from Angels. Total freight charges from mine to smelter are \$4.50 and smelter charges \$2.50 per ton. Shipments average 17.90% zinc, 5.22% copper, 4.60 oz. silver, 0.20 oz. gold, 11.90% iron, 39% silica. About 12 men employed.

NATICK COPPER CO.**MICHIGAN**

Office: Leopold Bldg., Houghton, Mich. Mine near Copper Falls, Keweenaw Co., Mich. W. Nichols, resident mgr. **Property:** 180 acres, the N. E. $\frac{1}{4}$ and E. diagonal $\frac{1}{2}$ of E. $\frac{1}{2}$ of N. W. $\frac{1}{4}$ of Sec. 28, T. 58 N., R. 31 W., surrounded by holdings of the Frontenac Copper Co. Property slightly explored in early days, has been idle many years.

NATIONAL BELL MINE.**COLORADO**

Property at Red Mountain, near Ouray, Ouray Co., Colo., is a small producer of copper-silver ore. Operated by 3 sets of lessees in 1916.

NATIONAL CONSOLIDATED MINING CO.**ARIZONA**

Presumably idle. Described in Vol. XI, Copper Handbook.

NATIONAL COPPER CO.**NEW MEXICO**

Idle. Chas. P. Laughlin, sec., Tyrone, Grant Co., N. M. Inc. Feb., 1902. Cap., \$1,200,000; shares \$100 par.

Property: 22 claims, 10 patented, 4 miles from the Chemung Copper Co., in Whitewater canyon, Burro Mountain district, has a fissure vein, in granite, of 60' estimated average width, carrying mainly chalcocite, opened by a 200' shaft and a 360' tunnel having a 214' blind shaft. The mine shows considerable bodies of copper ore, mainly in disseminated sulphides of 2 to 3% copper tenor, with some ore carrying up to 15 and 20% copper. **Equipment:** includes steam power and a Norwalk air compressor. Described in Copper-Handbook, Vol. XI.

NATIONAL COPPER MINES CO.**IDAHO & OREGON**

Office: 926 Chamber of Commerce, Portland, Ore. Mine at Cuprum, Idaho. **Officers:** L. C. Mackay, pres.; Wm. Trevor, v. p. and fiscal agent; Edward H. Hayes, sec.; W. F. Coffey, treas., with Dr. J. R. Marsh. Capt. Jas. Wolfs, Capt. Fred Hagstrom, directors. Inc. in Oregon. Cap., \$3,000,000; shares \$1 par; 1,500,000 shares "placed in treasury."

Property: 31 claims, surveyed for patent, in Cuprum Basin, Seven Devils district, Adams Co., Idaho; also the Gold Barr mine and Coad placer mine, in southern Oregon. The Idaho claims are near Cuprum, a few miles from Homestead on the Northwest, (Snake River) R. R. The ore, which contains gold and silver values as well as 5-17% copper, occurs in contact deposits, developed by over 3,500' of tunnels, shafts and opencuts. In 1915, 200 tons of ore were mined.

NATIONAL COPPER MINING CO., LTD.**IDAHO**

Address: August Paulsen, pres., Spokane, Wash. Mine at Mullan, Shoshone Co., Idaho. A. P. McCrae, v. p.; Chas. McKinnis, sec.-treas.; Jas. F. McCarthy, mgr.; foregoing with Harry White, H. H. Stambaugh and R. C. Steese, directors.

Inc. Sept. 22, 1906, in Wash. Cap., \$2,500,000; shares \$1 par; increased from 1,250,000 shares in July, 1913; 1,800,000 issued; 800,000 shares treasury stock were sold at 50c. Assessments of 17 $\frac{1}{2}$ c per share have been levied to date, a total of \$315,000. Deficit of \$11,064 at end of 1915. Stock listed in Spokane.

Property: 9 patented claims, 180 acres, in Deadman gulch between Mullan and Larsen, on the north side of the Coeur d'Alene valley. It is about 1 $\frac{1}{2}$ miles west of and in the same belt as the Snowstorm copper property, which it closely resembles in character. Ore occurs in a fault vein in thickly-bedded white Revett quartzite with talcose slips bordering

the ore. The vein runs nearly E.-W. and dips steeply to south. The surface gives no indications of the great orebody 1,700' beneath it and in fact the ore-bearing quartzite does not show in the upper workings.

During the "boom" days of 1906-07, the company sank a 400' shaft and drove an adit tunnel developing a fissure vein and a strong fault, but found no ore in commercial quantity. Dec., 1912, a large body of silver-bearing copper ore was cut at a distance of 4,800' from the portal, about 1,000' lower than the old tunnel and shaft. The crosscut tunnel is driven about 4,000' through very hard and tight Wallace slates and St. Regis quartzites to a fault separating the St. Regis from the more favorable Revett quartzite. This fault showed mineralization, but no commercial ore. Beyond this fault the beds of white Revett quartzite run N. W.-S. E., dipping steeply, 80° S. E. About 200' from the big fault zone just noted, there is a nearly vertical quartz vein, filling a fault in Revett quartzite, the beds north of this vein running slightly north of west and dipping at but 45° south. This vein carries copper ore and a drift east disclosed the orebody which gave the mine its shortlived prominence. A sample cut across the orebody where it was 85' wide showed an average value of 2½% copper, 5 oz. silver and 80c in gold.

Development: by a 1,200' upper tunnel, 4,800' lower crosscut tunnel with about 1,000' of drifting on the vein, a 400' shaft with 400' of drifting and a winze sunk to the 1,200' level. In Feb., 1916, company reported sufficient ore above the 1,200' level to run the mill 2 years. Leached areas on the 800' and 1,000' levels make the extent of orebody uncertain.

An estimate of 545,000 tons of ore available above the 1,000' level, made 1913, is now reported to have been changed to 170,000 tons, because of an unexpected barren streak.

A 500-ton concentrator, flotation plant, 2-mile trolley line and other works were completed in April, 1914. The dry crushing plant can handle 500 tons in 16 hours and crush the ore to ½". The storage bins have a capacity of 1,100 tons, receiving the ore over a 2-mile electrically driven railroad. The various motors at the mill total 615-h. p.

Mill was only operated in April and May, 1914. In Oct., 1915, operations were resumed, the mill crushing 4,243 tons of 0.83% copper ore carrying 1.99 oz. silver per ton; in Jan. making 22% concentrate valued at \$10,815, a loss of \$1,300 on operating expenses for the month.

Property represents an investment of \$400,000 without a dollar's profit, the mill having been built before a producing mine had been developed. Deep development alone can open up a large tonnage, but management announced this would not be done unless new work above the 1,200' level justified it. The mill is a costly blunder and the stockholders victims of bad advice.

In July, 1916, management decided to suspend operations, reasons stated by the secretary as follows:

"During June the property was given a fair try-out with the new equipment and under the best possible working conditions. The mining costs were low, but the milling costs were higher than expected, due principally to hard rock, which made machinery repair costs high.

"The decision of the directors is that the ore is too low-grade to pay a profit, even at the prevailing prices of copper. Different suggestions have been made by stockholders about sinking deeper, or driving a lower tunnel, on the presumption that richer ore might be found. No action has been taken on these suggestions.

"A complete statement of the June operations will be made to the

stockholders as soon as complete smelter returns are in, showing all costs in detail."

NATIONAL COPPER MNG. & DEVEL. CO. PENNSYLVANIA

Main office: Belvidere, Warren Co., N. J. Mine in Adams Co., Pa. **Officers:** Chas. O. Lane, pres.; Henry D. Deshler, sec.-treas. and gen. mgr.; Edw. March, Harry Bossard and John Paul, directors. **Inc.** Dec. 16, 1905, in New Jersey. **Cap.**, \$500,000; shares \$1 par, fully paid and non-assessable; issued, 118,985. Annual meeting, third Monday in March.

Property: 155 acres, said to show ore in veins in a schist formed from porphyry and marked by epidote; strike N. E.-S. W., with average dip of 85°. One vein under development said to average 16' wide, carrying 5% copper, 1.40 oz. silver and \$6.80 gold per ton. Development to date by open cut and shallow shafts. Presumably idle. Is unfavorably regarded.

NATIONAL GOLD & SILVER MINING CO. NEW MEXICO

M. H. Sherman, pres. **Property:** the Beck mine, near Steins, Grant Co., N. M., developed by 2 miles of workings with a 300' shaft, showing a 12-18" vein of gold-silver-copper ore. Has steam power and 5-drill compressor, hoist, and a 50-ton concentrator. Worked intermittently in 1915. Shipments made to the El Paso smelter.

NATIONAL LEAD CO. NEW JERSEY

Main office: 1 Exchange Place, Jersey City, N. J. Executive and transfer office: 111 Broadway, New York. **Officers:** Wm. W. Lawrence, pres., Geo. O. Carpenter, R. P. Rowe and E. J. Cornish, v. ps.; M. D. Cole, asst. to the pres.; Chas. Davison, sec.; Fred R. Fortmeyer, treas.; Chas. Simon, asst. treas. Executive committee: Wm. W. Lawrence, chairman, E. F. Beale, R. P. Rowe, E. J. Cornish and G. D. Dorsey. **Directors:** Edward F. Beale, Geo. O. Carpenter, Fred M. Carter, R. R. Colgate, E. J. Cornish, G. D. Dorsey, Chas. E. Field, Geo. W. Fortmeyer, E. C. Goshorn, Wm. W. Lawrence, R. P. Rowe, W. N. Taylor, Walter Tufts, J. R. Wettstein. G. W. Thompson, chief chemist; A. H. Sabin, cons. chemist; A. B. Hall, mgr. metal dept.

Inc. Dec. 7, 1891, in New Jersey. **Cap.**, \$25,000,000 common and \$25,000,000 preferred stock; shares \$100 par; \$20,655,400 common stock and \$24,367,600 preferred stock is outstanding. Listed on New York Stock Exchange. Bankers Trust Co., New York, registrar. Annual meeting third Thursday in April. Company has 6,788 stockholders.

The National Lead Co. owns all the capital stock of the following companies:

Carter White Lead Co., Heath & Milligan Mfg. Co., Magnus Co., Inc., Matheson Lead Co., St. Louis S. & R. Co., United Lead Co. It is a stockholder in the following companies: U. S. Cartridge Co., Baker Castor Oil Co., and River Sm. & Ref. Co. Company manufactures lead in various forms for commercial uses.

NATIONAL LEAD-SILVER CO.

WASHINGTON

Office: Hutton Bldg., Spokane, Wash. **Officers:** Geo. Ilse, pres.; J. M. Pelham, v. p.; E. H. Pattison, sec.; Albert H. Featherstone, treas., with John E. Orr, directors. **Inc.** 1915, in Wash., as successor to the Phoenix G. & C. M. & M. Co. **Cap.**, 2,000,000 shares; 5c par; assessable. Annual meeting, third Tuesday in Nov.

Property: 19 claims, known as the Anchor, Curlew and Panama groups, about 2 miles N. of Curlew, Ferry Co., said to show 4 veins carrying gold-silver-lead-copper-iron. Ore occurs as replacement deposits, in veins carrying quartz, lime and iron carbonate. The country rock is fine grained and syenite with large dikes of porphyry with strata of lime lying parallel, running nearly N. and S., with dip of 80° W. Ore was encountered on 3 different contacts in the first 500' of the tunnel. The first vein, about 40' wide was intersected 600' from the portal of the tunnel. A second vein cut 820' proved to be 5' wide.

Development: consists of a 1000' main lower tunnel, 225' Panama, and several shorter tunnels, numerous open cuts and prospect shafts. Property favorably reported on by G. Cleveland Taylor in 1914.

NATIONAL METALLURGICAL CO.

MEXICO

(A subsidiary of the American Smelting & Refining Co.)

Office: 165 Broadway, New York. Mine and smelter at Matehuala, San Luis Potosi, Mex. Geo. C. Kaufman, mgr. mining department of American Smelters Securities Co.; Samuel James, mgr. Matehuala plant.

Inc. Aug., 1901, in Colorado. **Cap.**, \$1,000,000; shares \$25 par. Debentures, \$500,000 authorized, at 6%; issued \$472,000. Annual meeting, last Tuesday in July. Holds title to property through the Compania Metalurgica Nacional, organized in Mexico.

The Dolores mine is situated a few miles from Matehuala, in the state of San Luis Potosi, Mex., in an isolated diminutive mountain range known as the Sierra del Fraile. The range runs N.-S., is less than 3 miles long and 1 mile wide and consists of Mesozoic blue limestone, which has been intruded by quartz-monzonite and the metamorphism and ore deposition in the range is connected with these intrusions. In the Dolores property the intrusive rock occupies a belt about 1,000 m. long. and 300 to 400 m. wide. Surrounding it, and lying between it and the limestone, is a practically continuous band of lime-silicate rock, plainly of metamorphic origin. Nowhere does this rock pass into the limestone far from the intrusion.

The ore deposits consist mainly of cupriferous pyrite, are intimately associated with the lime-silicate rock and occur largely at the very contact frequently with limestone as one wall. This cupriferous pyrite has usually a gangue made up largely of pyroxene and garnet. There are 2 intrusions, the Dolores on the south and the Cobriva on the north, the latter being irregular.

The company owns the ground about both of these intrusive masses and works the gold-copper ore in the Tiro General, Dolores, Trinidad, Azul, La Luz and El Angel mines. The copper ores as shipped average 5% copper, 50 to 80 grams silver and about \$2 gold per ton. The geology of the district is well described by Spurr, Garry and Fenner in *Journal of Geology*, Vol. VII, p. 444, 1912.

The principal mines are connected with the smelter by the 7-mile Matehuala narrow-gauge railway.

The smelter, connected by a spur with the Mexican Central railway, receiving ore by rail and burros, has 150-ton and 200-ton water-jacket blast furnaces for lead and copper, with a calcining furnace and a 30-ton reverberatory furnace used for flue dust. There also is a small sampling mill. Product formerly was matte, averaging 45% copper, 50 to 200 oz. silver and 1 oz. gold per ton, shipped to the Aguascalientes smelter for conversion.

Is a splendid property, well managed, with an adaptation of Mexican methods and labor to modern conditions. Mine development has utilized geological work to great advantage.

NATIONAL MINES CO.

NEVADA

Office: 39 Board of Trade Bldg., Chicago. Mine office: National, Humboldt Co., Nev. **Officers:** J. G. Snyder, pres.; L. G. Campbell, v. p.; C. V. Buckley, sec.; S. C. Scotten, treas.-mgr.; Perry G. Harrison, supt. **Inc.** in Wyoming. **Cap.**, \$1,000,000; shares \$1 par; nonassessable; 817,427 shares outstanding.

Property: 6 patented claims and a fraction at National, Humboldt Co., shows gold-silver ore in quartz fissure veins, traversing a rhyolite-andesite formation. Orebody runs N.-S. and dips 45-70° W. Geology and vein system fully described in U. S. G. S. Bull. 601.

Development: by 10 adits from 150'-2,500' in length and 3 shafts, 450', 350' and 800' deep. Underground workings, April, 1916, total about 7 miles.

Equipment: includes 2 electric hoists, aerial tram, 10-stamp mill for amalgamation and concentration of ore. Mill treated 4,463.4 tons of ore in 1912; 47.3 tons in 1913; 2,763.5 tons in 1914; 18,662.2 tons in 1915; a total production to date of 36,000 tons, or \$6,000,000, mainly from the National gold shoot, intercepted at depth of 40' below the surface and which averaged \$20-\$30 to the pound.

NATIONAL MINES, LTD.

ONTARIO

Operating, under lease, the King Edward mine, which see.

NATIONAL MINES & SMELTERS CO.

MEXICO

Office: Magee Bldg., Pittsburgh, Pa. Mine office: Magistral, Durango, Mex. **Officers:** S. H. McKee, pres.; Wm. L. Curry, v. p.; John S. Eberman, sec.-treas.; Renald Ailes, financial agt.; E. A. Kennedy, supt. **Inc.** 1911. **Cap.**, \$2,500,000; issued, 1,700,000 shares. Authorized \$400,000 collateral income bond issue; issued, \$375,000. Company owns all the stock of the Santa Maria del Oro Mines Co., which company purchased property of the Lustre Mining & Smelting Co. from old stockholders, paying for same in stock and bonds of the National Mines & Smelters Co.

Property: 32 claims, 441 hectares, 1,089 acres of mineral lands, 397 hectares of mill and smelter sites, besides miscellaneous lands and leasehold timber lands. The Magistral mine is developed by 3 tunnels and 9 shafts and has a large body of slightly cupriferous pyrite with quartz and limestone gangue, carrying 0.5 to 5% copper, probably averaging under 1% copper, 1 oz. silver and 15 to 20 grams gold per metric ton.

The Cocinera mine has been developed by the new company since July

1, 1911, opening up an ore shoot 1,000' long, 15' wide and said to average \$10 in gold and copper with a little silver. Depth over 600'. Ore reserves in this and the Azurite mines are estimated by the management at 190,000 tons, developed in new ground since 1911. The old company claimed reserves of 185,000 tons in other and entirely distinct orebodies, in 1910.

Equipment is complete, including a central power plant having two 360-h. p. Koerting and two 350-h. p. Crossley gas engines, one 200-h. p. and three 400-h. p. gas producers, a 2,300-volt 3-phase generator, two 6-drill Ingersoll-Rand air compressors and 10 hoists of 100 to 300-h. p. The 40-stamp mill, 750-lb. heads, has Huntington mills, 1 Ball mill and 10 Frue vanners.

The smelter has 6 blast furnaces, including two 150-ton hot-blast furnaces and three 200-ton furnaces, air for blast being heated by waste gases in a specially-designed MacDonald hot-blast heater. Shipping matte sent to the A. S. & R. Co. at Aguascalientes amounted to 8,000 tons, averaging 15-17% copper, \$155 gold and \$4 silver per ton.

The old company apparently spent a million dollars or so for installation before the mines were sufficiently developed to provide the ores necessary to keep the various plants running and in 1907-08 became financially embarrassed. The mines are not yet on a profitable basis, but with the new concentration plant, built in 1915, as the result of tests made by Henry E. Wood & Co., of Denver, it is expected that the property will yield a satisfactory return on the investment.

NATIONAL MINING CO.

MICHIGAN

Idle. Office: 6 Beacon St., Boston, Mass. Mine office: Rockland, Ontonagon Co., Mich. B. T. Morrison, pres.; Harry Highley, sec.-treas.; Chas. M. Baker, Harry M. Howard and W. S. Warn, directors. Inc. 1848, in Michigan; rechartered 1878, cap. increased later to \$2,500,000; shares \$25 par; issued, \$1,875,000, and rechartered 1908. Paid dividends, 1861-72, of \$320,000, and levied a 40c assessment 1909. The company has no debts.

Property: 1,852 acres, having the Michigan on the north and east and the Victoria on the south and west, carries the western continuation of the contact vein of the old Minnesota mine, now owned by the Michigan Copper Mining Co. The property showed, when work was begun, remains of ancient mining operations, including a shaft of 50' depth, timbered and scaffolded, with a nearly continuous sheet of copper extending down one side. The company had considerable litigation with the old Minnesota company over the title to 115 acres of land, the National finally winning. The company stopped work 1893.

NATIONAL MINING & DEVELOPMENT CO.

IDAHO

Placerville, Boise Co., Idaho. Inc. Sept. 23, 1911. Cap., \$1,000,000; shares \$1 par; divided into 600,000 common and 400,000 preferred shares. Property: the Mountain Chief mine at Placerville, Boise Co., Idaho, shows gold-silver ore in a fissure vein, 1-3' wide. Ore averages from \$20-\$25 per ton. Developed by 3 tunnels. Equipment: includes a 5-stamp amalgamation and concentration mill with cyanide unit.

Producing since 1912. Property promising. Geology described 17th Annual Report of the Mineral Industry of Idaho, 1915.

NATIONAL RADIUM INSTITUTE.

COLORADO

Officers: Dr. Howard A. Kelly, pres., Baltimore, Md.; Dr. Jas. Douglas, 99 John St., New York, sec. Inc. 1913, in Delaware. Company has a lease on 16 carnotite claims in Paradox Valley, Montrose Co., Colorado, owned by a subsidiary corporation of the Crucible Steel Co. of America, on a 15% basis.

NATIONAL RADIUM MINES CO.**UTAH**

Henry Schwartz, Denver, Colo., pres. Inc. in Colorado. Cap., \$400,000. **Property:** in Green River district, Emery Co., Utah, shows uranium and vanadium ore in a 5" vein, said to run as high as 20% uranium. Developing in 1916.

NATIONAL RADIUM PRODUCTS CO.**COLORADO**

George Kunkle, pres., Grand Junction, Colo. Reported in July, 1915, that carnotite holdings in Utah would be developed. Enlarging its experimental plant to 200 milligrams of radium per month.

NATIONAL SMELTING CO.**MEXICO**

Idle. Office: 2030 Land Title Bldg., Philadelphia, Pa. Mine office: Chalchihuites, Zacatecas, Mex. Company has been without working capital for several years and conditions in Mexico have made a refinancing impracticable. Fully described in Copper Handbook, Vol. XI.

NATIONAL TUNGSTEN CO.**ARIZONA**

Acquired by International Tungsten Corp., which see.

NATIONAL ZINC & LEAD CO.**MISSOURI**

Office: 53 State St., Boston. John J. Hanners, treas. Cap., \$500,000; shares \$1 par; 300,000 shares issued. Stock is listed on New York and Boston Curbs. Company has paid dividends of 9%, or \$45,000, from Nov., 1915, to March, 1916.

Properties at Dixie, Neck City, and Webb City, Mo., are developed by several shafts, 85'-225' deep, reported sunk in pay ore. Company also operates 4 zinc concentrators on ore from its mines..

NATIONAL ZINC SEPARATING CO.**WISCONSIN**

W. N. Smith, Cuba, Wisc., gen. mgr. Operates a roasting and magnetic separating plant at Hazel Green, Grant Co., Wisc., producing a 60% zinc concentrate.

NATIVE COPPER CO.**MICHIGAN**

Idle since 1855. Office: 68 Devonshire St., Boston, Mass. Mine at Delaware Mine, Keweenaw Co., Mich. Officers: Ashley Watson, pres.; Chas. E. Adams, sec.-treas.; Ashley Watson, Frederick Hoitt and Frank L. Van Orden, directors. Inc. 1849, and reincorporated March 29, 1880, in Michigan. Cap., \$1,000,000; shares \$25 par; fully issued. Annual meeting, first Wednesday in March.

Property: 480 acres, being the S. ½ of Sec. 3 and N. W. ¼ of Sec. 10, T. 58 N., R. 30 W., all on the Keweenaw trap belt. A little work was done, 1852-55, on a fissure vein crossing the Ashbed, the company levying assessments of about \$39,000.

NATIVE COPPER MINING CO.**CALIFORNIA**

Inc. in 1911, to develop the Copper King, Native Copper and other claims on Table mountain, Monterey Co., Calif. W. H. Kerr, Coalinga, Calif., pres.

NAUMKEAG COPPER CO.**MICHIGAN**

Office: 61 Broadway, New York. Mine office: Houghton, Mich. Officers: J. Parke Channing, pres.; Sam A. Lewisohn, v. p.; E. H. Westlake, sec.-treas., with Adolph Lewisohn, I. J. Sturgis, F. L. Van Orden, Theo. L. Herrmann, J. H. Susmann and Chas. J. Paine, Jr., directors. Sidney S. Lang, supt.

Inc. March 21, 1912, in Michigan. Cap., \$5,000,000; shares \$25 par; \$10 paid in; issued 102,000 shares. U. S. Mortgage & Trust Co., registrar. Annual meeting third Wednesday in March.

Company ended 1915, with a cash balance of \$26,858; investments \$142,254; development expenses, \$84,032.

Property: 1,200 acres, in Secs. 34 and 35, T. 55 N., R. 34W., and Sec. 3,

T. 54 N., R. 34 W., just west of Houghton, on the south shore of Portage lake, carries practically all of the Ashbed amygdaloidal beds, including the Atlantic and the Quincy-Pewabic lodes.

Development: property was slightly explored under former owners, but efforts were sporadic and altogether unimportant. Operations by present owners were begun July 10, 1912, in the horizon of the Hancock lodes. Drill borings yielded good showings of copper at depth of 513' in what is presumed to be an extension of Hancock No. 3 lode, and again at a depth of 1,301' where a 6" streak of coarse copper was encountered.

In 1914, the main, or Dakota Heights adit on the old Pewabic lode was extended 126', encountered the lode at 100', and drifts No. 2-A north and south were continued for 70' and 63'. A total of 1,936' of drifting was done during the year. This work indicated a lode, 6-8' wide, for 700', showing copper ore, but not of commercial value. During 1915 exploratory work was confined to the workings from the Dakota Heights, or No. 4 adit; a total of 1,172' of drifting on the Pewabic lode showed considerable copper on the No. 2 North drift. A 200' winze was sunk from this drift and 1602' of drifts and crosscuts driven from the lower level. About 1,000' of drifts and crosscuts were driven in crosscuts No. 4 East, No. 3 West and drift No. 2 South. No beds of value were found in the southern part of the property.

Equipment: includes hoist, compressor, pump and electric power.

The property is considered promising and the management is excellent.

NAVY GROUP M. & M. CO.

ARIZONA

Office: 1029 Higgins Bldg., Los Angeles, Calif. **Officers:** Dr. Geo. P. Waller, pres.; F. M. Townsend, sec.-treas.; R. E. Zuver, agent at Gold Road, Ariz. Inc. 1915. Cap., \$1,000,000; shares \$1 par.

Property: 3 claims, 48.26 acres, in Tom Reed-Gold Road district, Mohave Co., developed by 750' tunnel. A prospect.

NEBRASKA & ARIZONA COPPER CO.

ARIZONA

Paradise, Cochise Co., Ariz. W. K. Morrow, supt. at last report. Inc. Jan., 1910, and merged June 25, 1910 with the California & Paradise Mng. Co., in the California & Paradise Cons. Mng. Co. **Property:** 13 claims, known as the Morrow & Chamberlain group, developed by a shaft on the Malachite claim.

The old 200' Malachite shaft was deepened to 600' in 1913, and cross-cutting done on the bottom level without satisfactory result.

NEDERLAND-BEAVER TUNGSTEN MINING CO.

COLORADO

Office: Mining Exchange Bldg., Denver, Colo. **Officers:** D. D. Shirley, pres.; W. M. Scott, v. p.; R. Woodworth, sec.-treas. To be incorporated in Colorado with capitalization \$200,000; shares 10c par; nonassessable. Pre-organization certificates offered to public early in 1916, at 3c per share, with 5% discount for cash.

Property: company claims to own 8 claims, 80 acres, in Nederland district, Boulder Co., Colo., and that, "the surface showing is excellent and orebodies should be opened with a small amount of work. The stock is to be sold to provide a development fund to open the tungsten ore." Careful investors will certainly refrain from investing in this "Tungsten opportunity."

NEEDLES MINING & SMELTING CO. ARIZONA & CALIFORNIA

Is a subsidiary of the U. S. S. R. & M. Co. **Office:** 55 Congress St., Boston, Mass. Mine office: Chloride, Mohave Co., Ariz., Works office: Needles, San Bernardino Co., Calif. A. P. Anderson, gen. mgr.; D. R. Muir, mgr. of this and the Gold Roads Mines Co., Needles, Calif., and Gold Road, Ariz.

Inc. 1909, in Me., as successor of Arizona-Mexican Mng. & Sm. Co. Cap., \$5,000,000; shares \$5 par; entire stock issued is owned by United States Sm., Ref. & Mng. Co. Company does not publish a separate report.

Company owns the following properties:

First: the Tennessee mine, at Chloride, Ariz., the terminal of a branch line from Kingman on the main line of the Santa Fe R. R. The mine consists of the Empire No. 2, Tennessee, Great Lead and Tennessee South patented claims. The group has been operated since 1909 under a bond and lease running ten years.

The ore contains gold, silver, lead and zinc in varying proportions and occurs in a fissure vein between pegmatite and schist, striking north and south. The ore shoot averages about 300' in length and 6' in width and has been followed down to the 1,170' level. The ore is being extracted through a shaft which up to date has reached a depth of 1,400'. Indications are that the ore shoot will be followed in undiminishing strength to a much greater depth than has been yet achieved.

The mine is equipped with hoists run by steam power and is well equipped with shops, compressors and all necessary accessories.

The output is about 100 tons of ore a day, carrying 5% lead and 10% to 14% zinc, shipped to the company's plant at Needles where two products are obtained, a lead concentrate carrying gold and silver which is shipped to the company's smelter at Midvale, Utah, and a zinc concentrate which is under contract with the American Metals Co. The present output is about 800 tons of lead concentrates and 1,200 tons of zinc concentrates per month.

Early in 1916, the Empire mine was unwatered and the shaft deepened as exploration at the Tennessee has shown that the orebodies are persistent downward. The company is also operating the Comanche and Durango mines, the latter showing 7' of zinc ore in the bottom of a 70' shaft.

Second. Champion mines, 12 miles north of Kingman, consist of the following unpatented claims: Champion, Champion No. 2, and Primrose, 52.75 acres. These claims, like the Banner group, were acquired as a prospect and some development work was done which yielded a small tonnage of gold, silver, lead and zinc ore, which was shipped to the company's mill at Needles. They are now being worked by lessees.

Third. the Stockton Hill group of mines, at Stockton Hill, Mohave Co., Ariz., 290.5 acres. No work is being done on this group at present.

Fourth. the milling plant at Needles, Calif., a concentrating plant of 125 tons daily capacity, equipped with crushers, jigs, tables and a flotation plant, the latter for the recovery of zinc values from tailings. This plant treats mainly the ore from the above-mentioned Tennessee mine. It also treats small tonnages of custom ores. The plant is thoroughly modern and well-equipped for economic work.

NELLIE BLOOM MINING CO.

IDAHO

M. E. Hopkins, supt. Property: the Nellie Bloom mine, about 2 miles from Horse-shoe Bend, Boise Co., Idaho, shows a shoot of oxidized gold ore, 3-5' wide, 500' long at depth of 300', said to carry average milling values of \$10 per ton.

Equipment: includes a 10-stamp mill and electric power. Employs 16 men. Management estimated six months' supply of free milling ore blocked out Jan., 1916.

NELLIE MINING CO.

ARIZONA

Office: 538 Merchants Nat'l. Bank Bldg., Los Angeles, Calif., and Colorado Springs, Colo. Mine office: Oldtrails, Mohave Co., Ariz. Officers:

F. M. Woods, pres.; R. C. Wilson, v. p.; E. T. Walmsley, sec.-treas., with H. E. Woods and C. S. Buck, directors.

Inc. July 3, 1906, amended Aug. 4, 1915, in Ariz. **Cap.**, \$1,000,000; shares \$1 par; 605,000 shares in treasury. Stock is listed on the San Francisco and Salt Lake Exchanges. Registration Surety Co., 205 Russ Bldg., San Francisco, registrar. Annual meeting first Wednesday in June.

Property: 11 claims, 190 acres, in Tom Reed-Gold Road mining district, 5 miles S. of Oldtrails, shows a fissure vein in andesite and andesite tuff, with gangue consisting principally of fine grain quartz and adularia and calcite. The values are exclusively gold, although traces of copper stain are found in the 2 altered dikes which strike out from the main lode, having a general strike N. 52° W., with dip about 55° N. E. Assays said to average \$5.90 gold per ton. Developed by 85' 2-compartment vertical shaft, being sunk to 500'.

Equipment: includes 32-h. p. gas hoist, 55-h. p. compressor, 3,600' water pipe line, bunk and boarding houses. Property reported on by A. G. Keating.

NELLIE MINING CO.

IDAHO

Owned by Jack Alger and Capt. A. P. Horton of Osborn and O. R. Young of Wallace, Shoshone Co., Idaho. Ernest Kelly, supt. **Property:** 1½ miles from Osborn, on O. W. R. & N. R. R., has a fissure vein with gray copper ore (tetrahedrite) in quartz, the ore being said to carry 100 to 240 oz. silver per ton.

Developed by 3 tunnels, shafts and 10,000' of stoping and raises. In 1914 a crosscut on the 500' level opened up a vein 3' wide, showing good milling ore. Shipped 20 tons of high-grade ore in Sept., 1914, from leasing operations. Has water power plant for pumping and hoisting work, and a small mill, built in 1915. Company plans active development.

NELSON MINING CO.

ARIZONA

Office: 609 Land Title Bldg., Philadelphia, Pa. Mine near Crown King, Yavapai Co., Ariz. P. R. Brown, sec.; Geo. P. Harrington, supt. Property is half way between town of Crown King and mine of that name. Has fissure vein 3' wide, developed by 2 adits, 225' apart vertically, the lower one 3,000', the upper 1,000' long, and 300' incline shaft on vein. Assays of 2,000 lbs. samples in 1915 showed 25% zinc, 32 oz. silver, 7.40% copper, 3.51% lead and 0.90 oz. gold per ton. Reported in Dec., 1915, development work in progress and would soon ship.

Equipment: includes 25-h. p. gasoline hoist and air compressor. Company is reported to employ an average force of 15 men.

NENZEL CROWN POINT MINING CO.

NEVADA

Office: 702 Mutual Bank Bldg., San Francisco, Calif. Mine office: Rochester, Humboldt Co., Nev. **Officers:** Jos. F. Nenzel, pres.; Chas. E. Stevens, v. p.; Rudolf Nelson, sec.-treas.; with Jos. H. Hutchinson, directors. O. G. Stevens, supt.

Inc. Jan. 15, 1913, in Nev. **Cap.**, \$1,250,000; shares \$1 par; 395,117 shares held in trust. Registration Surety Co., San Francisco, registrar and transfer agent. Stock is listed on San Francisco Exchange. Annual meeting, second Wednesday in February.

Property: 7 unpatented claims, 110 acres, in Rochester mining district, shows gold-silver ore as contact deposit and in fissures traversing rhyolite and felsite formation. Orebody, from 4-12' wide, strikes N.-S. and dips westerly. **Development:** to depth of 180' by 430' tunnel and Stevens vertical shaft, which is said to have been in 4' of ore to depth of 107', reported to assay from \$12-\$75 per ton.

Equipment: includes 20-h. p. electric hoist, Cameron pump, and com-

pressor. **Ore reserves:** estimated at \$100,000, Feb., 1916. Management plans building flotation mill in 1916 and sinking shaft to 650' with crosscuts and drifts every 100'.

NEST EGG GOLD & COPPER MINING CO.

NEVADA

Letters returned from former office. Unfavorably regarded. See Copper Handbook, Vol. XI.

NESTOR MINING CO.

ALASKA

Dead. Land relocated by John Wick, Hadley, Alaska, includes the Nestor, Pelaska and other claims, about $1\frac{1}{4}$ miles from the Mamie and Stevenstown mines near Hadley, Ketchikan district, in southeastern Alaska. Property shows a copper-bearing contact between a diabase dike and limestone, whose garnet-epidote rock carries chalcopyrite. Developed by 2 tunnels at 110' and 180' above tidewater, with over 600' of work on Nestor claim.

NEVA MINING CO.

UTAH

Office: 400 Boyd Park Bldg., Salt Lake City, Utah. Mine office: Brighton, Utah. **Officers:** A. H. Rock, pres.; C. E. Cole, v. p.; Walter Steadman, sec. **Inc.** 1906 in Utah. **Cap.**, \$75,000; shares 15 cts. par. Last assessment $\frac{1}{8}$ ct. levied March, 1915. Stock is listed on Salt Lake Exchange.

Property: 5 unpatented claims, adjoining the Cardiff on the W., show silver-lead-gold ore in a fissure vein, running E.-W. along a quartz-lime contact and said to give assays of 45% lead, 30 oz. silver and 0.1 oz. gold. Developed by incline shaft and tunnel. Operations were resumed in 1915 and shaft is being sunk to intercept the Cardiff contact lode.

NEVADA-ARIZONA MINES CO.

ARIZONA

Office: 510 Odd Fellows Bldg., St. Louis, Mo. Mine office: Hackberry, Mohave Co., Ariz. **Officers:** John Schmoll, pres.; Chas. E. Hamilton, v. p.; A. E. Louis, sec.; J. Wm. Seller, treas.; with J. Phillips, Aug. Richter, Jr., C. D. Morley, Edw. J. Ryan and Wm. Burmeister, directors. F. G. Uthoff, supt. **Cap.**, \$1,500,000; shares \$1 par. Operating expenses for 1915 were \$51,717.

Property: 17 patented claims, about 340 acres, in the Music mountains, said to show gold and silver values. Ore occurs in fissure veins, 4-10' wide, in granite formation. Average assays reported at from \$10-\$50 per ton. **Development:** includes the 500' Lucknow shaft and 700' Roosevelt tunnel, latter in milling ore for 200'.

Equipment: includes compressor and gas hoist. Company has erected a small concentrator which started work in Oct., 1913. Operations in 1915 resulted in gross earnings of \$22,262 and a 95% recovery. **Production:** is at the rate of 25 tons per day. Management plans retimbering and deepening the Lucknow shaft in 1916.

NEVADA BONANZA COPPER CO.

NEVADA

Main office: 159 S. Main St., Salt Lake City, Utah. Mine at Morningstar City, Lyon Co., Nev. **Officers:** Freeman Morningstar, pres. and gen. mgr.; Sereno B. Tuttle, v. p.; Fred C. Dern, sec.-treas.; Walter C. Tuttle, asst. sec.-treas.; preceding, with Robt. J. Deighton, H. P. Clark, W. D. Mathis, Thos. J. N. Nippur, M. S. Woolley and P. L. Williams, directors. **Inc.** 1906. **Cap.**, \$2,100,000; shares \$1 par; issued, 1,448,000 shares.

Property: 12 claims, 7 patented, 250 acres, adjoining the Nevada Douglas ground, about a third of a mile from Ludwig, on Nevada Copper Belt railroad, in the Yerington district. J. C. Dick, E. M., of Salt Lake City, reports 3 fissure veins crossing property; the Green Dutchman vein being about 5' wide and assaying well in gold and copper. The vein on the Copper King claim has been developed by a 3-compartment, 115' shaft, said to show copper ore its entire depth.

Property is still in the prospect stage, but management plans further development.

NEVADA BRITISH MINING CO., LTD.**NEVADA**

Idle and probably dead. Cherry Creek, White Pine Co., Nev. See Copper Handbook, Vol. XI.

NEVADA-BULLION MINES CO.**NEVADA**

Address: Moe & Dougherty, San Francisco, Cal. Mine near Bullion, Elko Co., Nev. Company often called the Bullion-Nevada Mines Co., owns a group of claims adjoining the Nevada-Bunker Hill Mining Co. holdings and a half interest in the Kerr & Peterson lease on that company's ground.

Development: by a 1,970' tunnel, which will be extended 200' further to cut the vein opened in old mine workings. Lessees were shipping ore, 1916, but is now tied up in litigation.

NEVADA-BUNKER HILL MINING CO.**NEVADA**

Office: Elko, Nev. Mines at Bullion, Elko Co., Nev. **Officers:** J. A. McBride, pres.; R. H. Mallett, v. p.; John Henderson, treas.; Frederick Davis, sec.-mgr.; preceding, with W. W. Booher and Otto T. Williams, directors. Inc. April 28, 1905, in Nevada. **Cap.**, \$2,000,000; shares \$1 par; fully paid and nonassessable; 800,000 shares reserved in treasury for sale for development. Annual meeting, first Wednesday in May.

Property: 16 unpatented claims and two patented claims, owned by the company, and 7 patented claims under bond and lease for \$109,000 on royalty of 20% of net returns, which applies upon the purchase price of said mines. The country rock is a limestone, cut by intrusive porphyry dikes. The ore occurs in the dikes, on the contact, and also in chimneys at cross-fissuring in the limestone. There are 7 known orebodies, all of which are being worked by lessees above the No. 5 adit of Elk mine, which is 800' above level of main crosscut tunnel. This tunnel, 2,400' long, must be driven 600' further to cut the first known producing ore vein. Veins run nearly N. and S. and are cut by system of E.-W. fissures; veins are nearly vertical and are from 3 to 30' wide, are proven from 50 to 500' in length and to a depth of 600'. Smelter returns said to show average ore values of 3% copper, 15% lead and 30 oz. silver per ton. Camp is an old one, having been discovered in 1869 and worked in a crude way till 1893.

Development: by adits with connecting winzes and raises, aggregating over 15,000' of work, including the main working tunnel, driven for the purpose of opening the mines at an additional depth of from 500 to 800' below the present workings.

Production: during 1914 was 2,349 tons of gross value of \$50,821, on very low metal market; in 1915, 1,147 tons of gross value of \$40,145. Company claims production for 1916 will greatly exceed that of 1914-1915.

Company plans to complete tunnel to the 3,000' station as soon as possible, thus opening the Tripoli vein at an additional depth of 500'.

NEVADA-BUTTE MINING CO.**NEVADA**

Martin Benson, pres. Inc. 1913. **Cap.**, \$1,000,000; shares 25 cts. par. **Property:** 15 claims in Dolly Varden and Mizpah districts, Elko Co., Nev., 75 miles from Ely, said to be on the northern end of a great belt of mineralized porphyry and to carry fissure and contact deposits. **Development:** by several shallow shafts, shows mineralization, but property still in prospect stage. Drilling on neighboring areas has shown commercially mineralized porphyry.

NEVADA-CALUMET COPPER CO.**NEVADA**

W. H. Bray, mgr., Battle Mountain, Elko Co., Nev. F. D. Nowell, pres.; J. A. Beck, v. p.-sec. Inc. 1913. **Property:** the Boyd-Martin group, 30 claims, in heart of the monzonite-porphyry belt of Battle Mountain, shows

copper-stained patches thought to represent the outcrop of a big disseminated glance deposit.

NEVADA-CALUMET COPPER MINING CO. NEVADA

Office: 423 Banigan Bldg., Providence, R. I. Mine office: Wabuska, Lyon Co., Nev. Officers: Thos. Malcolm, pres.; John L. Washing, v. p.; with Arnold Schaer, John D. Kazar, William E. Blanchard, Chas. E. Hayes, Everett C. Elwood, Geo. E. Crawford, Thomas Malcolm, John L. Washing, J. Frank Cox, Francis E. Higgins and J. O. Brigham, directors; Philip J. Stacey, supt. Inc. May 4, 1907, in Arizona. Cap., \$2,000,000; shares \$5 par.

Lands: 17 claims, patented, 340 acres, 4 miles N. E. of Buckskin and 8 miles N. W. of Yerington. Property shows diorite, porphyry and silicious limestone, and has 3 contact deposits, .3-4' wide, showing cuprite, malachite, azurite, chalcocite and chalcopyrite, giving assays of 2-4% copper.

Development: by 2 main shafts, 1,200' apart, connected on the 500' level; No. 2 on the Yellow Metal claims, 60' deep, shows 9' of 2.75% ore. About 225' of laterals, on the 500' level, show small bunches and stringers of ore, in a leached zone, with fair indications of workable values at greater depth. Equipment: includes two 25-h. p. Witte gasoline hoists, and a 20-room boarding house. Property reported on by T. M. Hammond and Arthur Prill.

NEVADA CENTRAL COPPER CO. NEVADA

Office: Room 1012, 122 So. Michigan Blvd., Chicago. Mine office: Cedar, via Palisade, Eureka Co., Nev. Officers: at last accounts (all requests for information ignored): Robert L. Benson, pres. and treas.; Geo. Leighton, v. p.; A. F. Bordwell, sec.; Harold A. Linke, M. E., mine mgr. Inc. Dec. 20, 1904, in District of Columbia. Cap., \$1,000,000; shares \$10 par; in \$250,000 non-cumulative 7% preferred stock and \$750,000 common stock; issued, \$750,000 common. Annual meeting, second Tuesday in January at Washington, D. C.

Lands: 32 claims, about 700 acres, near Cedar, in the Antelope district. Litigation over titles was settled in the federal court of appeals, San Francisco, the Nevada Central securing clear title to the former property of the Whalen Consolidated Copper Co. Development: by a 900' incline shaft, with 1,000' drifts in Prince of Wales mine, said to cut an 8' vein on the 100' level, showing copper of good average assay tenor. Two carloads of ore gave returns of 11% copper. There is also a vertical double-compartment shaft on the Henry claim. Equipment: includes one 60 and one 12-h. p. gasoline hoist, air compressor and electric drill. Mine has been worked intermittently during past few years.

NEVADA CHAMPION COPPER CO. NEVADA

Office: 617 Pacific Bldg., San Francisco, Cal. Wm. Miller, pres.; C. N. Miller, sec.-mgr. Inc. 1907 in Arizona. Cap., \$1,500,000; shares \$5 par. Owns 130 acres patented land, 3 miles from Luning, Nev. Developed by a 3-compartment shaft, 400' deep. Claims to have large bodies of 3% copper ores and to be shipping 6% copper carbonate ore.

NEVADA CONSOLIDATED COPPER CO. NEVADA

Controlled by Utah Copper Co.

Office: 120 Broadway, New York. Operating office: McGill, White Pine Co., Nev. Mine near Ruth, White Pine Co., Nev. Officers: Silas W. Eccles, pres.; Col. Daniel C. Jackling, v. p.; W. E. Bennett, sec.; preceding, with S. R. Guggenheim, Judd Stewart, Murry Guggenheim, J. N. Steele, Col. Chas. Hayden, Wm. B. Thompson, Chas. M. MacNeill and W. Hinckle Smith, directors; C. K. Lipman, treas.; C. B. Lakenan, gen. mgr.; C. V. Jenkins, business mgr.; Robt. Marsh, Jr., gen. mine supt.; Geo. C. Riser, mill supt.; R. E. H. Pomeroy, smelter supt.

Inc. Nov. 17, 1904, in Maine, as a merger of the Boston & Nevada Copper Co. and White Pine Copper Co. Cap., \$10,000,000; shares \$5 par; non-assessable; original cap., \$5,000,000, increased Feb. 5, 1908, to \$8,000,000, and again increased Nov., 1909, to present figure. A former issue of \$3,000,000 first-mortgage 6% convertible gold bonds, due April, 1918, has been retired. Old Colony Trust Co., Boston, and Guaranty Trust Co., New York, registrars; Boston Safe Deposit & Trust Co., Boston, and D. A. Crockett, 120 Broadway, New York, transfer agents. Shares listed on the New York and Boston stock exchanges. Annual meeting, third Friday in April.

Dividends: Begun Oct., 1909, rate 37½ cts. per share quarterly; paid \$1.50 in 1910 and 1911; \$2 in 1912; \$1.50 in 1913; \$1.12½ in 1914; \$1.50 in 1915; \$1.25 in 1916, to July 1.

Company absorbed the Cumberland-Ely Copper Co., paying \$7,554,084 cash therefor, Aug. 30, 1910. Shareholders of the Cumberland-Ely were given the opportunity of exchanging stock on the basis of 3¼ shares for 1 share Nevada Consolidated. The Nevada Consolidated is controlled through stock ownership, amounting to 1,000,500 shares by the Utah Copper Co. The Nevada Cons. Copper Co. controls through stock ownership the Nevada Northern Railway Co.; also owns, through purchase and absorption, the physical assets of the Steptoe Valley S. & M. Co., which was dissolved Oct., 1914.

Property: 111 claims, patented, 1,379 acres, including the former holdings of the Cumberland-Ely, 48 claims, 523 acres. Holdings include the Copper Flat or Eureka group of 355 acres; the Ruth group of 455 acres; the Lane group of 46 acres; the Veteran group of 14 claims; the Jupiter group

25 Broad Street, NEW YORK

87 Milk Street, BOSTON

of 22 claims, and a group of 12 claims near the Giroux Consolidated. Mineral lands include properties formerly held by the White Pine Copper Co., Cumberland-Ely Copper Co., and sundry other corporations and individuals.

Geology: the geologic features of the property are somewhat similar to those of Morenci, Ariz., and Bingham, Utah. An area of Paleozoic limestone is intruded by a great mass of monzonite porphyry tilting the sedimentary rocks and forcing its way into them in dikes and sills, heaving them up in great irregular lacoliths. At the surface the monzonite porphyry, which is the principal ore-bearing rock, is sparingly stained with small quantities of copper carbonates, not exceeding 0.5% in copper tenor and 25 cts. in gold, hence is worthless. Below the thoroughly oxidized zone, varying from 20 to 162' in thickness, the rock is no longer leached, but carries specks of copper glance in white altered porphyry. This disseminated chalcocite also occurs in tiny seams in partially brecciated material and as patches disseminated through the rock mass.

The zone of payable ore extends 200 to 300' below surface and below that depth the chalcocite impregnations become too lean for commercial use, the bottom limits of payable ore depending somewhat upon commercial factors, mainly the market price of the metal, as there is a gradual shading out of ore values with depth. The altered limestone also carries occasional impregnations of chalcocite, of commercial tenor. One portion of the property shows an extreme width of about 2,000' of ore.

A considerable part of the property is covered by a rhyolite capping, part of a lava flow that poured out over the district long after the monzonite intrusion and subsequent faulting and erosion. Two orebodies are mined by steam shovels, at Liberty and Copper Flat pits. The capping between these two orebodies has been removed and in time they will be mined as one.

The Copper Flat pit, formerly called the Eureka mine, and the Liberty pit are now practically one mine working and extraction is all open-cast. This mammoth pit is now about 3,800' long, 1,400' wide and 500' deep, the ore being removed in benches of about 50' each. The ore is soft and friable, but requires blasting, holes being put down by churn drills to average depth of about 55', drilled at intervals of about 20' and fired singly or in series, each blast breaking tremendous quantities of ground. The Copper Flat property, including both Eureka and Liberty pits, is working 8 Bucyrus steam shovels, partly on overburden and partly on ore, these having capacities of $3\frac{1}{2}$ cu. yd. capacity, averaging about 5,000 tons of material per shovel per 24-hr. day.

The Copper Flat mine lies on a low rounded hill, with summit only about 150' above the flat through which the railroad enters the mine, and the rail line reaches the bottom of the pit by 4 spirals along the benches, having a length of about 5 miles. The railway track in the pit has a grade of 3 to 4%, and as depth is gained transportation becomes more difficult. The Copper Flat has four 60-ton and nine 45-ton locomotives, one 30-ton crane with 50-ton and 60-ton ore cars.

Carbonate ores from cappings of the Copper Flat pit are produced far in excess of the requirements of the Steptoe smelter, though a considerable tonnage is used for converter flux and a small amount is employed in the reverberatory furnaces, but the greater part of the carbonate ore is stored in a ravine northeast of the works, where a railroad fill of considerable size has been built entirely of ore to be leached at some future time. Water from the Copper Flat pit has been raised by a small electric pump.

The Ruth mine includes the Ruth and Star Pointer shafts, connected by a 2,700' tunnel, with an extensive electric haulage system hoisting

through the Star Pointer shaft. The Ruth shaft, $1\frac{1}{4}$ mile from the Copper Flat pit, is 610' deep, sunk at an angle of 45°, with 2 compartments, 200' of its depth being in limestone, with levels opened at 120', 310', 520' and 610', and is equipped with a small electric hoist. This shaft, now used for ventilation, has been replaced by the Ingersoll shaft, 445' deep, which corresponds with the 520' level of the Ruth shaft, with which it is connected on this level. Water is cared for by a 50-gal. pump. The average grade of ore in the Ruth mine is somewhat above that of the Copper Flat and the mine has developed about 14,000,000 tons of ore of 2.3% average grade, with small gold and silver values. The ore is soft and the mine is to be operated on the caving plan.

The Star Pointer, the main shaft of the Ruth mine, is located about 250' west of the lime-porphry contact, is 7' 6"x25' 6" in the clear and has 4 compartments. The shaft has a 140' steel headgear on concrete foundations. The main hoist is geared to a 300-h. p. General Electric induction motor, and has drums with 72" face running independently or in balance, raising 5-ton ore skips, working in guides, and there is a 200-h. p. geared electric hoist for the timber cage.

The Veteran mine, taken over from the Cumberland-Ely, is not producing, operations at this property having been discontinued indefinitely.

Miscellaneous holdings include a number of small mines and groups, on which more or less work has been done. The Kimberley group shows a promising area of mineralized porphyry, but is not extensively developed and the capping is too thick for opencast work. The Wedge mine has a shaft showing some ore of about 3.5% copper average assay tenor. The Jupiter mine has 4 shallow shafts showing ore assaying up to 9% copper, but with an average of probably about 3%. The Turkey shows a comparatively thin bed of cupriferous porphyry, apparently of no particular promise, and the August and Boss of Nevada groups have not given indications of much value.

Ore reserves: extensive churn-drill borings on the Copper Flat, Liberty, Veteran, Ruth and other properties, have proven a tonnage estimated Jan. 1, 1916, to be 50,525,289 tons of ore, averaging 1.65% copper and representing an ore supply of about 16 years, of which the major portion is in the Copper Flat and Liberty groups.

Comparative Table of Recoverable Developed Ore:

	Tons	Copper		Tons	Copper
Sept. 30, 1907....	14,432,962	1.97%	Dec. 31, 1912....	38,853,551	1.67%
Sept. 30, 1908....	20,000,000	1.94%	Dec. 31, 1913....	39,108,590	1.65%
Sept. 30, 1909....	29,000,000	1.94%	Dec. 31, 1914....	41,020,296	1.68%
Sept. 30, 1910....	40,360,823	1.70%	Dec. 31, 1915....	50,525,289	1.65%
Dec. 31, 1911....	40,853,371	1.66%			

Electric power is used throughout, current being brought from the Steptoe smelter, at 40,000 volts, and stepped down to 600 volts by seven 200-k. w. transformers in a concrete station.

Buildings include a machine shop and warehouse at the Copper Flat mine, engine houses at the various shafts and an office, boarding house and bunkhouse and numerous dwellings at the Ruth mine.

Ore is shipped to the Steptoe smelter, at McGill, separately described below, over a 27-mile standard-gauge railway, equipment including 400 self-dumping ore cars. This line is a part of the Nevada Northern railway, having a standard-gauge line of 168 miles in length, running from the mines and Ely to a junction with the Southern Pacific railway at Cobre station. The Nevada Northern Railway Co. controlled through stock ownership by the Nevada Consolidated, is capitalized at \$2,000,000, with a \$1,000,000 bond

issue, at 5%, the line doing a general business in addition to handling the traffic of the Nevada Consolidated Copper Co.

Costs: the cost of stripping overburden was given at 28.87 cts. per cu. yd. for the fiscal year ending Dec. 31, 1915, with actual mining costs for ore of 15.24 cts. per dry ton, with an additional charge of 15 cts. per ton made to cover stripping redemption at the Eureka pit, 22 cts. at Liberty pit and 30 cts. at the Hecla pit. Ore mined and treated during the fiscal year 1915 averaged 1.542% copper, by assay, with an average extraction of 70.18%. The cost of production for the fiscal year 1915 was given as 8.23 cts. per lb. of copper and 8.93 cts., covering all charges, including depreciation charges on Steptoe plant. It is not probable, however, although the Nevada Consolidated is one of the largest and best mines in the world, that the mine can continue to produce copper, for any great length of time, at much less than 8 cts. per lb., and, when all factors are taken into consideration and due allowance is made for the cost of improvements, that ultimately must be charged against costs, a net cost of 9 cts. per lb. for finished copper laid down at the seaboard, would be a fair estimate. Production is marketed through the American Smelting & Refining Co., on a 1% commission basis.

Production: was 33,283,348 lbs. fine copper in the fiscal year ending Sept. 30, 1909; 62,772,340 lbs. in the fiscal year 1910; 78,541,270 lbs. for the 15 months ending Dec. 31, 1911; 63,063,261 lbs. for the year ended Dec. 31, 1912; 64,972,829 lbs. in 1913.

Recent Production:

	Tons Treated	Cu. %	% Rec.	Ratio Conc.	% Cu. in Cncta.	Cost in p. Ton Mng.	Net Prod. Lb. Cu.	Cost p. Lb. Cts.	Sell. Price Cts.
1915.....	3,081,820	1.54	70.18	7.18:1	7.77	15.24c	62,726,851	8.23	17.65
1914.....	2,840,294	1.48	68.48	6.08:1	6.14	15.17c	49,244,056	9.82	18.89

Production of gold and silver amounted to \$615,605 in 1915, compared with \$455,810 in 1914. Copper production for first five months in 1916 amounted to 34,696,082 lbs.

The property has been splendidly developed and is being managed with ability and success.

Steptoe Smelter:

The ore reduction works, concentrating mill and smelter owned by the company are at McGill, White Pine Co., Nev. Lands cover 8 square miles, with water rights. The property is on the eastern side of Steptoe valley, on the slope at the foot of the Schell Creek range, 14 miles N. E. of Ely and 22 miles from the mines, on the line of the Nevada Northern railway. The smelter site proper comprises 320 acres, 1 mile long and one-half mile wide, on a hillside with 10% grade, permitting the works to be terraced, and handling material by gravity throughout. Lands carry water rights to Duck creek, and to the McGill ranch, estimated as capable, jointly, of furnishing water for a 15,000-ton plant.

The reduction plant is one of the largest and best in existence. The present average capacity is 12,000 tons daily, but the plant is so designed that it can be increased easily to a much greater capacity. All main buildings are of steel frame and the plant is built on the unit system, with allowance for expansion.

The ore bins of timber, about 800' long, are in four 6,000-ton units. Ore is drawn from the bottoms of the bins by belt conveyors, which carry it over automatic weighing machines and thence to distributing bins of 40-ton capacity, located at the head of each section of the mill.

The mill, nearly a mile from the smelter, is 378x756' in size. There are 8 sections, treating a total of nearly 11,000 tons of ore daily. Each section can be operated independently, but the plant is run in 4 units of 2 sections each.

The mill handles a moderately hard silicified altered porphyry ore containing tiny specks of chalcocite, pyrite and some chalcopyrite and averaging 1.5% copper. This is concentrated 8 into 1, with a recovery of about 70% of the assay value, the product containing 8% copper.

The ore treatment is as follows: From the distributing bin ore passes through a belt-driven feeder to a set of 36x15" rolls set for one-half-inch product and run dry, water being introduced underneath, washing the product to a pair of bucket elevators having 8x8x18" buckets. These elevators deliver to 2 trommels 42" diam. x 8' long, having 1 section of $\frac{1}{8}$ " and $\frac{1}{4}$ " perforations, the oversize of $\frac{1}{8}$ " returning to a second set of rolls, 36x14", which deliver to the same elevators. The undersize of $\frac{1}{8}$ " returns to a third set of rolls, 36x14", also delivering to the same elevators. The undersize of $\frac{1}{8}$ " passes to eight 2-mm. trommels, 36" diam. x 8' long. The oversize of 2mm. passes to a fourth set of rolls 36x15", set to produce a 2-mm. product and delivering to the same elevators as the preceding rolls.

The undersize of the 2-mm. trommels passes to 4 Yeatman hydraulic classifiers designed and made at the plant, each one delivering 5 spigot products and an overflow, each separate class of spigots feeding a separate group of Wilfley tables. The first spigot product goes to 10 Wilfleys, making finished concentrate, middlings, which are treated on 2 Wilfleys following, the reject of which is reground. The second spigot product is also treated on a group of 10 Wilfleys, making finished concentrate, middlings and tailings to waste. The third spigot product is similarly treated on another group of 8 tables, making products the same as those of the preceding group. Middlings from these 2 groups, together with all reject from the 2 tables treating middlings, also tailings from first group of Wilfleys, are reground in two 6-ft. Chilean mills. Several sections are fitted with 2 sets of 36x15" rigid rolls for this purpose, all reducing through .029" slot mesh wire screen.

The product of regrinders is elevated by a pair of 8x8x18" belt elevators to 4 classifiers of the same type as the preceding, but making 4 spigot products and an overflow. The first spigot product is screened through a pair of trommels 36" diam. x 8' long, with same screen as used on Chilean mills, as a guard against accidental leakage or breakage of screens on the latter. The oversize of these returns to the mills. The undersize joins the product of the second spigot and is treated on 10 Wilfleys making a finished concentrate, a middling and a tailing to waste. The product of the third spigot is joined with that of the fourth spigot of the primary classifiers and is treated on another group of 10 Wilfleys, making products similar to the preceding group. The product of the fourth spigot is joined by that of the fifth spigot of the primary classifiers and is treated on a group of 20 Wilfleys making a finished concentrate, middlings and tailings which are retreated.

The middlings of the first 2 groups of 10 tables each following the regrinders, are retreated together on 4 Wilfleys. All middling of the group of 20 Wilfleys following the regrinders, is treated on a group of 12 six-foot vanners. All tailing of the group of 20 Wilfleys following the regrinders is treated on a group of 16 six-foot vanners. All classifier overflows are treated on a group of 16 six-foot vanners. All feed to concentrating machines following the regrinders, is dewatered by cone tanks or by "Dorr" thickeners.

Automatic samplers are used to determine the grade of all material leaving the mill. All concentrates are sluiced to steel tanks having a capacity of approximately 225 tons, dried by suction through a filter bottom.

and loaded by means of a Blaisdell disc excavator, into cars running on a track underneath.

Water is secured from Duck creek, which has an average flow of 8,000 gals. per minute, water being collected in the hills in reservoirs and brought by gravity for 9 miles through a 32" iron-banded wooden pipe line and delivered at the highest point of the works under a pressure of 10 to 20 lbs. per sq. in. An electrically-driven pumping plant in Steptoe valley, immediately below the works, has a capacity of about 5,000 gals. per minute. By means of a system of settling tanks, ponds and pumps, approximately 10,000 gals. of water per minute is recovered from mill tailings for re-use. Approximately $4\frac{1}{2}$ tons of fresh water to 1 of ore are used in the process.

The smelter is about one mile from the concentrator, and is connected therewith by a standard-gauge railway line. The works have about 12 miles of railway track, equipped with 9 small locomotives, a switch engine and 100 cars.

The smelter includes separate buildings for calcining, reverberatory smelting, blast-furnace smelting and conversion, all of steel frame, with corrugated iron sheathing. Each department has independent flues and chimneys.

The roaster building, 250' in length, has 4 floors, with eighteen 18' six-hearth McDougal roasters, set in 2 rows. Concentrates are delivered to the calcining building in 8-ton standard-gauge cars, entering over a trestle built of timbers, the feed floor being on a level with the railway trestle. All the roasters have air-cooled rabbling arms, and center columns supplied with air under a pressure of about $3\frac{1}{2}$ " of water by a National Blower Co.'s fan of about 22,000 cu. ft. capacity. The roasters are driven by 30-h. p. electric motors. Hot calcines, carrying 7.5 to 10% sulphur, are discharged into hoppers beneath the roasters and trammed directly to the reverberatories, or to nine 150-ton calcine storage bins, built of brick and steel, which serve as a balance-wheel between the roasting and smelting departments. Each roaster discharges gases through two 32" elbows to a brick flue running between the 2 rows. This flue discharges fumes into the main flue, which is in 2 parts, each of 312' square cross-section, permitting either to be cut out for cleaning. The flue is 1,070' long, including the dust chamber, which is 150x50x30', and leads to a brick stack 250' high and of 18' internal diameter at the top. Dust from the flue in the roaster building is piped to the ground floor, for loading into cars, and for about 500' the flue has tracks underneath, permitting the collection of dust from steel hoppers in cars, which are hauled by small locomotives.

The reverberatory building has five 600-ton furnaces, each 19' wide x 111' to 130' long, fired with California crude oil, atomized by air at 40-oz. pressure from a Connersville blower and fed through 5 burners per furnace. From 250 to 350 bbls. of oil per day are used by each furnace, varying with the nature of the charge smelted. Each furnace is connected with two 400-h. p. boilers arranged in parallel, instead of tandem, in the flue between the furnace and the dust chamber. These boilers develop about 85% of their normal rated capacity under oil firing. Each furnace has bypasses with dampers giving a direct passage for the gases from furnace to dust chamber, when boilers have to be cut out. The equivalent of about 35% of the fuel value of the oil used in the furnaces, is recovered as steam by these boilers. As the gross oil used per ton of charge is about 0.543 bbl., the net, after deducting these waste heat credits, is about 0.35 bbls. per ton of charge.

The reverberatory furnaces are charged with calcines mixed with limestone, dumped through slide gates, from hoppers suspended from the

charge floor. Each furnace has 2 tap holes on one side, from one of which matte is drawn off into matte cars of about 30-ton capacity. These cars are tilted and contents poured into the converters by an electrically-driven mechanism mounted on the car frame. Slag is skimmed twice every shift, the skimmings going to a cast-iron box leading to a lined launder, in which a jet of water granulates the slag and washes it to the dump. Slags carry 40 to 45% silica, 6 to 12% calcium oxide, 25 to 35% iron oxide and 4 to 6% alumina. The reverberatory building has a dust chamber of 1,000' square section, 155' long, leading to a 300' brick chimney, 15' in diameter at top.

The blast-furnace building, located between the reverberatory and converter departments, has a single blast furnace, 42x240" at the tuyeres, and 84x240" at the shaft, with a capacity of 300 to 500 tons of charge per day, the furnace being so planned that it can be enlarged if desired to 80' in length. The furnace is 13' above the ground level, with a height of 16' from the tuyeres to the charging floor, operating with a 10' column charge and 40-oz. blast pressure. There are 4 steel water jackets on each side, and 1 at each end, and each side has 24 four-inch tuyeres, 10" apart, receiving blast from a 30" bustle pipe. The water jackets each have separate blast boxes and independent air and water connections, so that any jacket may be removed by breaking 3 simple connections. Charging is done by cars dumped pneumatically, matte is tapped into ladles on cars and slags granulated and sluiced, as in the reverberatory building. Fumes discharge through a 108" downtake to a 12x15x250' brick flue, terminating in the main roaster flue. The blast furnace is not in operation.

The converter building is about 600' from the reverberatory furnaces, and receives molten matte from cars, behind and above the converters, the contents being poured into a launder, while the shells remain in position for blast. The building has two 5-motor Shaw electric cranes, each with a hoist capacity of 60 tons besides 2 auxiliaries of 25 tons each. There are 2 of the old stalls with 96x150" shells of the barrel type built for acid linings, but now used with magnesite brick linings. There are also 2 Pierce-Smith barrel-type converters, both originally 25' 10" long by 10' diameter shell. One of these was lengthened at the smelter to 33' 11". They originally had 30 tuyeres each but these have been increased to 35 and 46, respectively. The blast pressure used is nominally 10-lb. gauge at an altitude of 6,327'. The Pierce-Smith converters produce about 60 and 50 tons of copper per day on 40% matte.

Blister copper is poured into ladles and transferred into a brick-lined steel cylindrical receiver. This is mounted on rollers and rotated on its own axis by an electrical motor, so that the molten blister copper is poured through a tilting pouring spoon into moulds on a horizontal straight-line chain and sprocket conveyor. These moulds discharge on a submerged apron conveyor which after traveling in the water horizontally for a few feet turns on an incline and raises the copper ingots out of the water and lands them on the loading platform. They contain 99.5% copper, weigh about 400 lbs., and after trimming and being weighed on accurate scales, they are shipped in box cars.

The converter's slag is taken back to the reverberatory furnaces in 10-ton side-tilting pots operated by compressed air. Flux for the converters consists of concentrator slimes and a silicious carbonate ore from the Copper Flat pit, mixed and dried in 2 oil-fired rotary driers at the converter building and handled and charged by boats. The hoods from the converters lead to a balloon flue running along over the charge floor for the extent of the converter building covered by stalls. It is then connected

by a circular flue 10' diam. to a brick dust chamber which in turn connects to a brick stack 100' from the ground, 10' diam. at top.

The power plant has 4 batteries of two 400-h. p. Babcock & Wilcox water-tube boilers each and one battery of two 600-h. p. Stirling water-tube boilers. Two batteries have Foster and 3 others have Babcock & Wilcox internal superheaters, and there is a separate Foster superheater for the steam supplied by the reverberatory waste heat boiler plant of ten 400-h. p. boilers. Steam is generated at 160-lbs. pressure and can be superheated 100° F. All boilers are fired by Green chain grate stokers, coal being fed from overhead bins by chutes direct to the stoker hoppers. Each double battery of boilers has a 9x40' steel stack with induced draught, furnished by 5 Sturtevant fans, each connected to a 30-h. p. Sturtevant slide-valve engine, running at 150 to 175 r. p. m.

Each battery of boilers is equipped with fuel economizers of about 3,360 sq. ft. heating surface, set between the boilers and the induced draught fan; they are dampered so that they can be cut out for cleaning while the boilers are in service. A 3,000-gal. capacity Kennicott water purifier supplies make-up water for all boilers.

The engine-room, main floor, contains the generating engines, blowers, 3 exciters and a switchboard, and the basement contains condensers, air pumps and oil filters. The electrical equipment consists of two 1,100-h. p. 22x48x48" Allis-Chalmers Corliss cross-compound engines, with 800-k. w. Bullock a. c. generators mounted on the shafts; two 2,000-h. p. 31x66x48" Nordberg Corliss cross-compound engines with 1,500-k. w. Bullock a. c. generator mounted on the shafts, and one 2,500-k. w. steam-driven Westinghouse turbo-generator. Current is generated at 600 volts and carried to a concrete transformer station, equipped with 7 200-k. w. Bullock water-cooled transformers, stepping the current up to 40,000 volts, for transmission to the mines; four 750-k. w. Westinghouse water-cooled transformers, and four 1,000-k. w. General Electric water-cooled transformers, stepping current up to 13,200 volts for transmission to the mills; 13,000 and 40,000-volt choke coils and lightning arresters.

The smelter blast plant, in the engine house, includes a 350-h. p. 14x28 x36" Nordberg tandem-compound engine direct-connected to a No. 10 Connersville blower with capacity of 300 cu. ft. of air per revolution, making 120 r. p. m. This is for the blast furnace. For the converters air is supplied at 10-lbs. gauge pressure by 1 Allis-Chalmers blowing engine, 16" and 24" diam. steam, 34" and 34" diam. air by 48" stroke of 6,000 cu. ft. capacity, 1 Nordberg 25" and 54" diam. steam, 52" and 52" diam. air by 48" stroke of 12,000 cu. ft. capacity, and 1 Nordberg 26" and 56" diam. steam, 54" and 54" diam. air by 48" stroke of 18,000 cu. ft. capacity. These are all of the cross compound steam, tandem, air and steam type.

A Laidlaw-Dunn-Gordon cross-compound air compressor with steam cylinders 11" and 21" diam. and air 21" and 12" diam. and 18" stroke of 1,080 cu. ft. displacement, compresses air to 100-lbs. gauge. This was originally for tamping converter linings but is now used for pneumatic tools of various kinds at the shops and the mill.

In connection with the works are a number of thoroughly appointed shops, including a boiler, machine and carpenter shop, foundry, warehouse and roundhouse.

The Steptoe works were started in April and the finished copper shipped in Aug., 1908. Nearly 1,500 men are employed at the plant.

NEVADA CONSOLIDATED MINES & SELLING CO. NEVADA

Idle. Mine address: Hawthorne, Mineral Co., Nev. Alex. Brown, pres.; Chas. L. Newton, v. p.; C. C. Matthews, sec.; F. G. Carey, treas. Lands: about 1,000 acres, including a gold property formerly owned by the

Huntoon Valley Mining Co., 45 miles south of Hawthorne, and copper claims 10 to 20 miles S. W. of Hawthorne. The copper property, developed by 3 crosscut tunnels to 440' below the outcrop, is said by the company to have a vein carrying disseminated pyrite and chalcopryrite, averaging 2½% copper and \$4 gold. This vein has apparently been lost in the lowest tunnel. Country rock is granodiorite. The mine has 1,500' of workings. Officers are said to stand well, but the company's past advertising is not liked.

NEVADA CO-OPERATIVE MINING CO. NEVADA

Goldfield, Nev. **Officers:** Chas. S. Sprague, pres.; R. M. Byars, v. p.; S. A. McCandless, sec.; J. K. Turner, cons. engr. **Inc.** 1913. **Cap.**, \$2,000,000; shares \$1 par; assessable; 1,500,000 shares in treasury. Company is a reorganization of Goldfield Mines Operating Co.

Property: 11 claims, 150 acres, including the Nevada Empress, in Gold Mountain mining district, Esmeralda Co., 37 miles S. E. of Goldfield, shows 3 well-defined quartz veins, from 1-6' wide with numerous quartz stringers, running N. E. The formation is Cambrian sedimentary rocks, quartz-monzonite porphyry, granite, rhyolite and basalt. **Development:** total work to June, 1915, was about 3,000', of which 2,000' is on the Central or Liberty vein. A crosscut tunnel, driven 800', exposed ore averaging \$8.17 across a width of 1½'. Drifts run from a raise on the hanging-wall from the 800' level, encountered a quartz vein, assaying \$26.40 gold and 54 cts. silver per ton. Management plans developing from surface. **Equipment:** includes several buildings and an old 10-stamp mill, which is to be re-modeled.

NEVADA COPPER CO. NEVADA

Office: 572 Bullitt Bldg., Philadelphia, Pa. **Operating office:** Tonopah, Nev. **Mine office:** Mina, Mineral Co., Nev. **Officers:** Jas. S. Austin, pres.; J. H. Whiteman, v. p.; C. A. Higbe, sec.-treas. Company is controlled by the owners of the Tonopah Mining Co. Owns the Dunlap mines, 12 miles east of Mina, which sec. Letters neither returned nor answered.

NEVADA COPPER CO. UTAH

Smyths, Beaver Co., Utah. A. J. McMullen, v. p.; A. D. McMullen, sec.-treas. **Inc.** April, 1907, in Utah. **Cap.**, \$1,000,000; shares \$1 par; assessable; issued, \$650,000. **Lands:** 14 claims, 4 patented, in the Beaver Lake district, show limestone cut by monzonite, with disseminated ore and replacements. The claims have several pits and shafts, deepest 175', with about 200' of laterals, said to show a vein assaying 8.5% copper and 111 oz. silver per ton.

Presumably dead. Described in Copper Handbook, Vol. XI.

NEVADA COPPER HILLS MINING CO. NEVADA

Office: 18 South Mulberry St., Mansfield, Ohio. **Mine office:** Luning, Mineral Co., Nev. **Officers:** at last accounts: A. H. McCullough, pres.; F. W. Lenhart, v. p.; T. J. Foster, sec.; Chas. Ritter, treas.; Rowland Lea, gen. mgr. **Inc.** Oct. 24, 1907, in Nevada. **Cap.**, 1,500,000; shares \$1 par; nonassessable; issued, \$745,000. Farmers Savings & Trust Co., Mansfield, Ohio, registrars. Annual meeting, first Monday in December.

Lands: 10 claims, 200 acres, in the Fitting district, 9 miles north of Luning. The property is reported, by Mr. Lea, to have replacement ore-bodies in limestone over a width of about 600', with N.-S. a strike, and a dip of 6°. **Ore:** oxidized, with occasional native copper and some bornite with chalcopryrite in the bottom workings. Orebodies average 2' thick and 28 of them are opened up for a length of 400' and a depth of 100', according to the company's secretary. Ore is stated to assay 1 to 70% copper, from a trace to 8 oz. silver and from a trace to \$3 gold per ton.

Development: by 225' shaft and a 330' tunnel. **Equipment:** includes a

25-h. p. hoist, and 6 buildings. Presumably pursuing a "watchful waiting" course; has ignored all requests for information.

NEVADA COPPER MINING, MILLING & POWER CO. NEVADA

Office: Tacoma, Wash. Mine at Contact, Elko Co., Nev. **Officers:** E. F. Messinger, pres., Tacoma, Wash.; Henry Smith, v. p. and gen. mgr., Contact, Nev.; E. S. Price, sec.-treas.; M. K. Price and C. Smith, all of Tacoma, directors. Inc. May 5, 1905, in Arizona. **Cap.**, \$1,500,000; shares \$1 par; nonassessable; issued, \$1,500,000.

Property: 52 claims, patented, in Salmon River district, better known as Contact district, shows Paleozoic sediments cut by granite with ore-bodies along the contact. Several hundred tons of high-grade ore are at the Alice mine awaiting shipment by auto truck to Rogerson, Idaho, 40 miles away. In 1915 a 100-ton flotation plant was erected, following extensive diamond-drill explorations. Property and geology fully described Bull 497, U. S. Geol. Survey.

NEVADA DOUGLAS CONSOLIDATED COPPER CO. NEVADA

A. J. Orem & Co., 79 Milk St., Boston, Mass. General office: 222 S. W. Temple St., Salt Lake City, Utah. Mine office: Ludwig, Lyon Co., Nev. **Officers:** A. J. Orem, pres.; James G. Berryhill, L. H. Curtis, vice-presidents; F. M. Orem, sec.-treas.; W. C. Orem, gen. mgr.; preceding officers, J. J. Corum, H. I. Moore, F. J. Curtis and J. G. Berryhill, Jr., directors; Archie J. Orem, supt.; H. L. Burbridge, mine supt.; R. M. Mitchell, Salt Lake City, purch. agt.

Inc. March 4, 1915, in Utah. **Cap.**, \$5,000,000; shares \$5 par; assessable; \$158,990 unissued. Bonds, \$2,000,000; \$404,600 outstanding. Federal Trust Co., Boston, registrar; Paul Revere Trust Co., Boston, transfer agt. Stock listed on Boston Curb.

The company is a reorganization of the Nevada Douglas Copper Co. at the time of its consolidation with the Moore Mng. Co. The new company assumed liabilities of the old companies, \$525,000 of Nevada Douglas and \$57,000 of Moore Co. Nevada Douglas stockholders received share for share in stock of new company and the Moore Co. received 10,000 shares of stock. To date 7 assessments of 10c a share have been levied, the last one in June, 1916. The old Nevada Douglas Copper Co. paid a dividend of \$125,000 in 1913.

The report of the old Nevada Douglas Copper Co., Feb. 28, 1915, showed a property investment of \$4,670,152, exclusive of the Ludwig leaching plant, \$51,992; current assets, \$35,060; profit and loss, \$581,660; current liabilities, \$101,905; accrued liabilities, \$17,150; deferred credit items, \$367,548.

Report of Nevada Douglas Cons. C. Co., dated Dec. 31, 1915, shows receipts \$494,407, inclusive of \$375,910 received from 4 assessments and \$36,073 from ore sold. Disbursements include \$147,151 for mill construction; \$138,350 loaned Nevada Copper Belt R. R. Co.; \$38,068 spent on development and equipment of mine; \$14,535 general and office expenses; \$26,657 interest on bonds; \$80,000 notes payable with sundry other items to balance.

Balance sheet shows \$163,209 current working and \$5,935 accrued (not due) liabilities.

Property: about 700 acres, with 2 mill sites, 80 acres, and miscellaneous lands, including water rights, giving total holdings of about 800 acres on the western slope of the Mason mountains. Lands include former holdings of the Ludwig Copper Mng. Co., the Douglas C. Mng. Co., which succeeded the Douglas M. & S. Co., the Nevada Douglas Copper Co. and the Moore Mng. Co. Holdings of the Nev. Douglas C. Co. consisted of 4 separate and distinct mines, the old Douglas mine, the Amalgamated group

and the Casting Copper mine, being the original holdings of the company, and the Ludwig mine. Country rock consists of limestone intruded by granodiorite with large contact orebodies and fissure veins. There is also one claim at Buckskin, 7 miles distant, which carries fluxing ore.

The Moore Mng. Co. owned the Moore group of claims, a prospect with about 450' of development work and "considerable oxidized ore blocked out in a way that it cannot be measured." It also had a bond and lease on the property of the old Western Nevada Copper Co., described in Vol. X.

The Ludwig mine, about 1 mile N. W. of the Douglas, includes 2 claims, on which the mine is opened, and a 40-acre tract in Smith Valley, on which there is a well and pumping station. The Ludwig was opened 1865, and was a shipper for some years of small quantities of high-grade ore, production including some very handsome malachite and azurite, a portion of which was sold to lapidaries, and considerable bluestone was produced also for the mines of the Comstock Lode.

The ore occurs in a fissure vein with a white limestone footwall and a silicious limestone hanging wall, which changes to a garnetiferous limestone, heavily impregnated with sulphides in places. Where crushing has permitted surface waters to work downward, large bodies of carbonates and copper glance ores are found as replacements in the footwall limestone. The vein proper has an average width of about 30' and has been developed along its course for 1,300' and to a depth of 800' by levels, along hanging wall, every 100'. The orebody on the 700' level is 50' wide and 300' long and runs 6% copper. The shoots, or pipes, of high-grade secondary ore, running from 16 to 30% in copper, form chamber deposits in the limestone near the porphyry contact, proven down to 800' level. Ore reserves are estimated at 200,000 tons of 2% copper ore.

In addition to copper ore, the Ludwig has a very large deposit of gypsum, on the footwall, said to be 3,000' long, 500' wide and 400' deep, which figures seem high. This deposit of gypsum is of commercial value, and some has been mined and shipped.

The Douglas mine is working a typical contact metamorphic deposit in which garnetized limestone carrying copper sulphides and their resultant oxidized ores occur in very irregular orebodies in limestone which have a tendency towards a horizontal rather than a vertical extension. The mineralized area is about 700' wide and 2,000' long with numerous parallel fissures which seem to control the mineralization. This mine has been developed by a main working tunnel and a deeper haulage tunnel with numerous crosscuts and drifts netting the property. The working tunnel, 4,290', has an average depth of 120' beneath the surface and the ore is in places continuous to the surface. Four 50' winzes show the downward extension of the ore. Claimed to have 75,000 tons of ore blocked out.

The Casting Copper mine shows a large area of garnet-epidote limestone constituting low-grade carbonate ore, which will be extensively mined. This mine has a vertical 350' shaft and a 500' tunnel. Claimed to have 100,000 tons blocked out. When shipments were being made to the smelter the ore averaged 5% copper as compared with 3% in the Douglas mine.

At the Amalgamated mine very little development work has been done, but the surface exposures indicate the existence of similar large contact metamorphic deposits.

Property as a whole has about 5,000' of workings.

Equipment: includes four 100-h. p. hoists, good for 1,000' depth each, with a 52-drill Imperial air compressor. Electric current is taken from the

Truckee River General Electric Co. Water is secured from artesian wells in Smith valley, brought to the mine by a 17,000' pipe line.

A 250-ton leaching plant, begun 1914, was in partial operation early in 1916. The sulphide and oxidized ores are treated separately and by entirely different methods. The chief value in the process lies in the fact that not only the copper, but the iron and sulphur as well, are made use of as valuable marketable products, and that in the treatment of 50 tons of sulphide ore, enough sulphuric acid is obtained at an abnormally low cost to treat 200 tons of oxidized ores.

A brief outline of the process is as follows: sulphide ores are submitted to an acid treatment under pressure in a closed receptacle, in which operation the sulphides of copper and iron are converted into the sulphates of the metals and taken into solution. This solution is then decanted off and passed through the electrolytic cells or over scrap iron, where the copper is removed. The remaining iron sulphate solution is then carried to an evaporating tower, where the water is evaporated off and the ferrous and ferric sulphuric crystals are allowed to crystallize out. These iron sulphate crystals are then introduced into a dryer and submitted to a temperature sufficiently high to drive off all the water of crystallization, after which the dried sulphates are submitted to a roast in the Wedge muffle furnaces; sufficient heat being applied to decompose the sulphates. The greater portion of the gases coming off in the form of sulphur trioxide, which is collected in the absorption towers and made into sulphuric acid to be used in the leaching of oxidized ores. The remaining residue of ferric oxide is then drawn off and prepared for market. The leaching of the oxidized ores is carried on in Pachuca tanks, where the ore is agitated with air and leached with the sulphuric acid obtained from the preceding sulphate roast. The solution is then decanted and passed through electrolytic cells, where the copper is taken out, after which the water is evaporated off and the sulphate crystals dried and roasted in the muffle furnace, as before outlined. The total cost per ton for mining and treating sulphide ores is \$5.18. As the general average of the ore to be treated is a little above 3% in copper, the ore will have a gross valuation of \$12 per ton in copper. The total cost of producing a ton of iron and sulphuric acid by this method should not exceed \$2, and with sulphuric acid at this price, oxidized ore running as low as 1% in copper can be treated as a profit. Company claims that there is blocked out, and available, on the property, about 550,000 tons of ore averaging better than 3% in copper. Development work during the last few months has been productive of excellent results, as some 30,000 tons of ore, averaging 5% in copper, have been added to the reserves already blocked out.

Production: last reported is for 1912, when 120,908 tons of 4.25% copper were mined, producing 9,020,640 lbs. copper.

Employs 175 men at the mines alone.

If the leaching plant is a success it will prove the salvation of the company. The policy of handling the property has not met with favor in the East and as a result financing and development have been slow. Management is believed to be competent and making every effort to put property on a dividend basis.

NEVADA GOLD MINES CO.

NEVADA

J. S. Madden, Austin, Lander Co., Nev., mgr. Inc. 1915, in Nevada. **Property:** 16 claims, including the Gold Park, La Crux, San Pedro, May-Do-So and Cottonwood groups, at Austin, said to show gold-silver-copper ores in well-defined veins. Systematic development work started Nov. 1915.

NEVADA HILLS MINING CO.**NEVADA**

Reno, Nev. Officers: Geo. Wingfield, pres.; H. M. Hoyt, v. p.; E. A. Julian, gen. mgr.; C. F. Burton, sec.-treas., with J. H. Carstairs, Chas. E. Knox and L. A. Gibbons, directors. A. H. Westall, supt. Inc. April 19, 1906, in South Dakota. Cap., \$6,250,000; shares \$5 par; 1,065,687 shares issued. Reno Nat'l Bank, registrar. Stock is listed on San Francisco Exchange.

The report for 1915 shows a net operating profit of \$39,142, against which there are charges totaling \$28,338, leaving a surplus for the year of \$10,803. The surplus for 1914 was \$147,457, making a total for the two years of \$158,261. Net resources at the close of the year were \$289,285; convertible assets approximately \$280,285, something less than 28c per share on the outstanding stock.

Property: the Fairview Eagle mine, about 107 acres, at Fairview, Churchill Co., Nev., shows several well-defined veins. The main or Nevada Hills vein, 1-15' wide, carrying argentite, stephanite, pyrite, chalcopyrite, galena, tetrahedite, sphalerite, silver and gold, runs N.-S.; dips 70° S.; has gangue of quartz, calcite and partially replaced andesite. This vein produced % of the year's tonnage. The Eagle vein, running parallel to the Nevada Hills vein, at a distance of 1,100' and averaging 16' in width, is practically worked out.

Developed: by the 580' Nevada Hills shaft, 935' Webber shaft, and 315' Eagle shaft. Total development work in 1915 was 1,812', at a cost of \$11,186. The mill averaged 179 tons per day, making an average extraction of 81.7%.

Production: for 1915—		Amount per Ton	
64,030 Tons ore milled.....	\$363,100.85	\$5.671	
1,418 Tons tailings milled.....	2,516.90	1.775	
<hr/>			
65,448 Tons milled.....	\$365,617.75	\$5.586	
Loss in tailings.....	66,790.75	1.020	
<hr/>			
Recovery	\$298,826.99	\$4.566	
Less ore purchased.....	1,095.49	.017	
<hr/>			
Production	\$297,731.50	\$4.549	
Net expenses.....	258,589.20	3.951	
<hr/>			
Net profit.....	\$ 39,142.30	\$.598	

The life of the mine is limited and the company a liquidating proposition unless new properties are acquired. The company has an option to purchase the property of the Oro Fino Development Co. at Railroad Springs, a few miles north of Lida in Esmeralda county, which is now being developed to determine the extent of the orebodies.

NEVADA HILLS MINING CO. (Tungsten).**NEW MEXICO**

Chas. Starr, mgr., Gage, Luna Co., N. M. **Property:** 8 claims, purchased in 1916 for \$15,000, in Victoria mining district, near Gage, said to show a vein 20' wide of tungsten ore in lime formation with quartz gangue, opened on the 40' level. Developed by 2 shafts, 130' and 90' deep. The property was formerly worked for silver values. Developing in 1916, and milling plant to be built.

NEVADA LINCOLN MINING CO.**NEVADA**

Reno, Nev. Officers: J. Parker Lewis, pres.; Murray K. Scott, v. p.; T. J. Flynn, sec.-treas.; Frank Wilson, supt., with Zeb Ray, directors. Inc. Dec., 1915. Cap., \$1,250,000; shares \$1 par; 750,000 shares were issued to Wilson and Scott for the property.

Property: 5 claims, covering 3,000' on the strike of the ore channel at Lincoln, Churchill Co., Nev., shows gold-silver ore in 3 veins traceable for over 400' on the surface. Developed by 500' crosscut tunnel. About 600' west of the portal a 6' vein is said to have been encountered, giving assays of from \$24-\$59 per ton. Ore occurs in bands and seams in a broken formation of quartz and talc. Company also owns a mill-site and water rights. Considered a promising prospect.

NEVADA NEW MINES CO.

NEVADA

Office: 146 No. Virginia St., Reno. **Mine office:** Rawhide, Mineral Co., Nev. **Officers:** E. W. King, pres.-gen. mgr.; Thos. J. Flynn, mine supt.; H. Davis, mill supt.

Company took over the property of G. G. Rice's promotions, the Rawhide Coalition M. Co., Rawhide Queen M. Co. and the Black Eagle M. & M. Co., in Regent district, said to carry free gold and ruby silver, in a 4" vein, opened on the 500' and 600' levels. Developed by shafts and crosscuts.

Equipment: includes 10-stamp amalgamation and concentration mill, 35-ton cyanide plant, compressor, and gasoline power. Reported treating 60 tons of \$22 ore per day in 1914. Recent production figures not available; company has not replied to requests for information.

NEVADA ORE COPPER CO.

NEVADA

H. H. Hill, supt., Acme, via Mina, Mineral Co., Nev. **Property:** a group of claims in the Fitting district, said to show copper ore in replacement deposits. Developed by shaft and extensive workings, opening up lead ores. Reported in April, 1916, that a mill would be built.

NEVADA PACIFIC MINES CO.

NEVADA

L. P. Patrick, pres., Goldfield, Nev. **Mine office:** Mina, Mineral Co., Nev. **Property:** the Mayflower group in New York canyon, N. E. of Mina, shows copper ore 150' wide, exposed by surface work, from which 15 tons daily were shipped to the Wabuska smelter in 1913. **Development:** work is in progress. Reported under bond and lease to the U. S. Smelter Co.

NEVADA PACKARD MINES CO.

NEVADA

Office: 998 Phelan Bldg., San Francisco, Calif. **Mine at Rochester, Humboldt Co., Nev. Officers:** Mark Walser, pres.-mgr.; R. L. Ray, v. p.; Frank Margrave, sec.; K. Freitag, mine and mill supt. **Inc.** 1913, in Nev **Cap.**, \$1,250,000; shares \$1 par; fully paid; nonassessable. Stock listed in San Francisco.

Property: 4 claims, about 80 acres, in the Rochester mining district, reported to show silver ore in silicified schist netted with quartz stringers. Ore occurs along shear zones in rhyolite, associated with quartz. Orebody said to be 46'x22' and 600' long. Average assays about \$10-\$15 per ton. Gold contents run from 80c to \$2 per ton.

Development: by 5 tunnels, longest over 600'. A 100-ton cyanide mill, erected at cost of \$65,000, started operations Dec., 1915, using Merrill precipitation system. Power obtained from Nevada Valleys Power Co., at \$8 per h. p. **Production:** reported to be over \$114,000 to 1916.

NEVADA PROGRESSIVE GOLD MINING CO.

NEVADA

Mine office: Wellington, Lyon Co., Nev. **Officers:** C. M. Woodbridge, pres.; F. H. Woodbridge, sec.-treas.; Ed. Parr, supt.

Property: 400 acres mineral land and 600 acres miscellaneous land at Wellington, shows gold-silver-lead ore, said to assay from \$10-\$147 per ton. Developed by 2 shafts, 100' and 300' deep. At last accounts, July, 1915, management planned systematic development at depth and addition of air compressor.

NEVADA QUEEN COPPER CO.**NEVADA**

Idle. **Office:** 405 Mining Exchange Bldg., Colorado Springs, Colo. Mine near Yerington, Lyon Co., Nev. **Officers:** Duncan Chisholm, pres.; John Matthew, v. p. and treas.; R. G. Riddett, sec.; preceding with H. Hironemous and D. P. Randall, directors. **Inc.** Oct. 5, 1906, in Colorado. **Cap.**, \$1,500,000; shares \$1 par; nonassessable; issued, \$1,107,350. Is operated as a close corporation. Annual meeting second Monday in October.

Property: 28 claims, patented, 467 acres, lying immediately north of the Nevada Douglas and Yerington Central Copper companies. Developed by shafts of 186' and 210', showing copper ore said to assay 1.5 to 28%. Management plans operating in 1916 if arrangements can be made with the Nevada Douglas Co. to treat the ore in its leaching plant.

NEVADA REGENT MINES CO.**NEVADA**

Provo, Utah. **Officers:** Jesse Knight, pres.; J. H. Miller, v. p.; W. Lester Mangum, sec.-treas.; P. H. O'Neil and A. S. Proskey, directors. **Inc.** June, 1915, in Utah. **Cap.**, 1,000,000 shares; 10c par. **Property:** in Regent district, Mineral Co., Nevada.

NEVADA SMELTING & MINES CORP.**NEVADA**

Has no operating property.

Office: Room 515 E., 30 Church St., New York. Mines near Tybo, Nye Co., Nev. **Officers:** Max E. Bernheimer, pres.; L. A. Dessar, v. p.; Werner Mueller, sec.; A. W. Joseph, treas.; preceding with M. Eisenberg, Chas. Lee, L. E. Marsden, N. P. Payne, H. Rawitzer, C. J. Roberts, directors. **Inc.** May, 1906, in South Dakota. **Cap.**, \$5,000,000; shares \$5 par. Stock listed on the New York Curb. Empire Trust Co., New York, registrar. Balance on hand, March 31, 1914, was \$860.

Company realized \$4,090 on 80,000 shares of Greenwater Copper Mines & Smelter Co. stock in 1914, retaining 272,000 out of the 3,058,775 issued shares of the Greenwater Co.; also owns a controlling interest in the Tybo Cons. Mining Co., owning silver-lead properties at Tybo, Hot Creek district, Nev.

NEVADA STANDARD COPPER CO.**NEVADA**

Officers: Wilbert E. March, pres., P. O. Box 24, Mina, Nev. C. E. Korthe, v. p.; L. H. Marsh, sec.-treas.; with B. H. Wyant and Matthew W. King, directors. **Inc.** 1912, in Nevada. **Cap.**, 100,000 shares; \$1 par; nonassessable; 75,340 issued.

Property: 12 claims and a mill site, in the Santa Fe or Luning district, Mineral Co., Nev., 8 miles N. E. of Mina, on the Goldfield branch of the S. P. R. R. Claims cover low rounded hills at about 6,000' elevation. The rocks are leached porphyries underlain at 20' depth by low-grade oxidized copper ores. Ore contains azurite, melaconite, malachite, cuprite, and native copper, and at 192' shows some chalcocite. Assays reported from 1.90 to 24% copper, with small gold and silver values.

Development: by 192' shaft on the Green Mystery claim, which at 45' cut a fault plane fissure that widened to 20' on the 104' level. Cross-cutting in 1915 on the 192 level to the North opened up 11' of low-grade copper ore. A level at 104' cut a 24' shear zone carrying low-grade ore. Management considers it a typical porphyry, or disseminated copper deposit, and is drifting on E. W. vein to intersection of N. S. vein series. **Equipment:** includes a 4-h. p. gasoline hoist, pump, blacksmith shop, and buildings for men. There are 3 springs, 2½ to 5 miles distant.

NEVADA STEWART MINING CO.**IDAHO**

Wallace, Idaho. **Directors:** A. J. Devlin, Dr. C. R. Mowery, Dr. Herbert Mowery, M. J. Sinclair and H. E. Huemann. **Inc.** Nov. 19, 1915, in Idaho. **Cap.**, \$150,000; shares 10c par.

Property: 7 claims in Pine Creek district, near Kellogg, Shoshone county, adjoining the Highland Surprise on the west, shows lead, silver, zinc ore in veins. A 500' crosscut tunnel is being driven, 1916. **Equipment:** includes electric power and air compressor.

NEVADA SUPERIOR MINES CO.**NEVADA**

Office: 625 Dooly Bldg., Salt Lake City. Mine office: Jungo, Nev. **Officers:** Otto Grantz, pres.; E. R. Reitsch, v. p.; John W. Geiger, sec.-gen. mgr.; Dr. Allen C. Eakin, treas., with D. R. Peterson, directors. Inc. 1905, in Utah. **Cap.**, \$300,000; shares \$1 par; assessable; 155,000 shares outstanding. Income for 1915 was \$164 from royalties.

Property: 21 claims, 420 acres in Humboldt Co., 23 miles from Jungo on the W. P. R. R., shows gold-silver-lead-zinc ore in fissure veins traversing schist and slate. The main orebody, from 2-20' wide, strikes N. W. and is said to give average assays of 8.6 oz. silver, 11.2% lead, 1% copper, 8% zinc. Shipments of crude ore made by lessees in 1915 ran \$15-\$24 per ton. Developed by 2 tunnels, 1,000' and 2,500' long, and 330' vertical shaft.

Equipment: includes 75-ton concentrating mill, steam power, compressor, pump and hoist. Company has been inactive since 1913 owing to lack of funds.

NEVADA TUNGSTEN MINES CO.**NEVADA**

Office: care G. S. Johnson Co., Clay Peters Bldg., Reno, Nev. E. W. Orr, pres.-gen. mgr. Inc. 1916, to operate a 2-year lease on the Beeson tungsten mine, about 125 miles from Lovelock. **Cap.**, 1,000,000 shares; 10c par; 300,000 shares issued to E. W. Orr for the lease and 700,000 shares in the treasury; 50,000 shares were offered to the public at 7½c, April, 1916, for development purposes. Property said to show a vein, 20-30' wide, all pay ore. A 50' shaft is being sunk.

NEVADA UNITED MINING CO.**NEVADA**

Oliver G. Jennings, pres.-treas., 49 Wall St., New York. An inactive corporation. Fully described Vol. XI, Copper Handbook.

NEVADA-UTAH MINES & SMELTERS CORP.**NEVADA**

See Consolidated Nevada-Utah Corporation.

NEVADA WONDER MINING CO.**NEVADA**

Office: 572 Bullitt Bldg., Philadelphia, Pa. Mine office: Wonder, Nev. **Officers:** C. A. Higbee, pres.; J. S. Austin, v. p.-treas.; J. H. Whitman, v. p.-gen. counsel, with C. A. Daniel, Barton Hooper, Jr., Chas. R. Miller and Wm. M. Potts, directors. P. S. Bickmore, sec.; J. A. Burgess, mine supt.; E. E. Carpenter, mill supt.

Inc. 1906. **Cap.**, \$1,500,000; shares \$1 par; 1,086,639 shares outstanding. **Dividends:** paid at the rate of 20% annually. Last dividend paid May 20, 1916.

Company owns the Wonder Extension, Hidden Treasure and Reorganized North Star Mining companies. Balance sheet fiscal year ending Sept. 30, 1915.

	Assets:	
Property and Plant.....		\$1,667,649
Total Stock Owned.....		251,760
Accounts Received, and Unexpired Insurance.....		440,608
Total		\$2,360,009
	Liabilities—	
Capital Stock.....		\$1,500,000
Accounts Payable.....		245,169
Surplus		614,840
Total		\$2,360,009
	Income Account—	
Gross Value Ore Milled.....		\$ 812,145
Expenses		503,335
Net Earnings.....		\$ 308,810

Combined and condensed cash receipts and disbursements of Nevada Wonder Mining Co. and Churchill Milling Co. for year ending Sept. 30, 1915, showed: cash on hand, Sept. 30, 1914, \$55,230; receipts, \$505,894, which included: loans, \$220,000, Selby Sm. & Lead Co., mill products \$188,145; total, \$561,124. Disbursements total \$550,851, including two dividends of 5%, \$140,808; cash on hand, Sept. 30, 1915, \$10,273.

In June, 1916, company acquired a 25-year lease on the Jack Pot mine, from Atlas Leasing Co.

Property: 328 patented and 73 unpatented acres at Wonder, Churchill Co., Nev., shows gold-silver ore in fissure veins 5-6' wide in rhyolite with occasional dacite. The gangue consists of quartz, feldspar and kaolin. The rock is mined by the waste-filling system as the walls in the lower levels are insecure, caving in large masses, thus making the shrinkage system of stoping used above the 400' level, inadvisable in the lower workings.

Development: by 1,300' shaft and winze 300' deeper. There is a total of 36,141' of underground workings, consisting of 1,948' of shafts, 22,122' of drifts, 7,024' of crosscuts, 4,701' of raises and 344' of winzes. Total work for fiscal year, 1915, was 6,224'.

The Jack Pot mine, recently acquired, extends the company holdings to the northward on the vein system.

Work during the past year was mainly confined to the exploitation of the Extension ore shoot on Last Chance No. 1 claim, which has been opened on the 300', 500', 800', 1,000', and 1,300' levels. A south drift on the 800' level showed 3' of \$20 ore. Exploration work below the 1,300' level is now under way through a new 3-compartment inclined winze, which had reached the 1,600' level, June, 1916.

Production: for 1915, was 58,124 tons of ore, yielding 1,199,245 oz. silver and 10,279 oz. gold, making a total value of \$812,119. Total cost for mining and milling was \$7.45 per ton as compared with \$8.94 the previous year. The average value of the ore was \$13.97, leaving a net profit per ton of \$5.70.

The 100-ton mill is operated by the Churchill Milling Co., whose entire stock issue is owned by the Nevada Wonder Co.

NEVADA ZINC CO.

NEVADA

L. N. Morrison, Tobar, Elko Co., Nev., gen. mgr. **Property:** the Polar Star group near Tobar, has a zinc-lead deposit, 40' wide and opened for 600' on surface. Ore said to average from 30-35% zinc and from 4-5% lead. Developed by tunnel and incline shaft. Producing at the rate of 600 tons per month in 1916. 70 men employed by company and lessees.

NEVERSWEAT MINE.

NEVADA

Owned and operated by E. C. Watson and C. F. Bachman of Luning, Nev. **Property:** 3 unpatented claims, about 50 acres in Santa Fe mining district, New York canyon section, Mineral Co., Nev., shows copper-silver ore in a contact deposit in limestone monzonite formation. The orebody from 2'-20' wide and from 50'-200' long, strikes N., dips W. and is said to give average assays of 9% copper and 1-7 oz. silver.

Development: to date consists of several shallow shafts. Property has been worked since 1914 with total production to date of 1,200 tons. Two men employed. Examined by engineers of the U. S. Sm. Ref. & Mng. Co. and Hayden Stone & Co. Considered promising prospect.

NEW ARCADIAN COPPER CO.

MICHIGAN

Houghton, Mich. **Officers:** Robt. H. Shields, pres. and gen. mgr.; Col. Sylvester T. Everett, v. p.; Wm. F. Miller, sec.-treas. **Directors:** Wm. B. Anderson, John Merton, John C. Shields, L. W. Killmar, Jas. W.

Shields, Allen F. Rees, R. H. Shields, S. T. Everett, and Herman W. Fesing, engr. Otto Lieber, mg. capt.

Inc. April 27, 1909, in Michigan. Cap., \$3,750,000; shares \$25 par; assessable; paid in, \$12.50. Last assessment, 50 cts., was paid Dec., 1915. This company succeeded the Arcadian Copper Co., a corporation organized in New Jersey that had nonassessable stock, and exchanged shares, *pari passu*, levying an assessment of \$1 per share, 1909. Property was transferred, by deed, from the old company to the new, May 30, 1909. Company owns 10,000 shares of stock of the New Baltic Copper Co. Boston Safe Deposit & Trust Co., registrar; American Trust Co., Boston, transfer agent. Annual meeting, first Tuesday in May.

Property: 3,500 acres, includes 5 old mines worked at various periods in the past. The Arcadian Copper Co., predecessor of present company, operated the property with great vigor, 1898-1901, and equipped it with machinery, and a 3-stamp mill at Grosse Point. Operations on the Isle Royale bed proving unsatisfactory, all work was suspended June 15, 1903; the hoist, machinery and shaft houses were sold to the Trimountain Mining Co., the stamp mill to the Centennial Copper Mining Co., and the property dismantled. The floating debt of the old company was liquidated by the sale of 800 acres of land, for \$750,000, to the Quincy Mining Co. The old mine and equipment were fully described in Vols. I and II of the Copper Handbook.

Development: exploratory work was resumed Oct., 1905, by the old company, on an amygdaloidal bed about one-fourth mile east of the Isle Royale amygdaloid previously worked, and crosscutting from the 200' level of the exploratory shaft disclosed 5 cupriferous beds in a distance of 110'. Work was suspended March, 1908, until organization, and was resumed Aug., 1909, by diamond-drill boring from the bottom of the 200' exploratory shaft, which is in the S. W. $\frac{1}{4}$ of Sec. 29. Exploratory work, 1910-13, included considerable trenching and test pitting, but was devoted mainly to securing 3 cross-sections, nearly 1 mile apart, by diamond drilling, and 26 holes, aggregating over 26,000', have been drilled. Drill hole No. 22 cut a promising amygdaloid lode, in the north area. A shaft started June, 1912, on this lode, was 1,250' deep in June, 1916, and is to be sunk to a depth of 1,500 to 2,000'.

Crosscutting was done on the 750' level to explore the 2 copper-bearing amygdaloid beds disclosed by diamond drilling, one 300' east, the other 150' west of the shaft. On this level an amygdaloid vein of great promise has been opened up 150' east of the shaft. Crosscuts and drifts have also been driven on the 250', 600', 900' and 1,050' levels and disclosed good copper contents. The 600' level has 600' of drifting on this lode. On the 900' level, No. 8, conglomerate was cut and found to be well mineralized at this point. During the year 1,245' of drifting was done and 980' of crosscutting.

Three mill tests were made during the summer of 1915 at the Franklin stamp mill. About 4,000 tons of rock were stamped yielding better than 20 lbs. of refined copper per ton.

Equipment: includes a steam plant, with boilers, a hoist good for 1,500', a 15-drill air compressor, and necessary mine buildings.

The plant is being superseded by a much larger one and the vein opened up extensively. Owing to its immense acreage on the mineral belt, the property is considered promising and management is good.

NEW BALTIC COPPER CO.

MICHIGAN

Houghton, Mich. R. H. Shields, pres. and gen. mgr.; Herman W. Fesing, v. p.; John Edwards, sec.-treas.; other directors, S. T. Everett, J. W. Shields and John Merton; Herman Fesing, engr. Inc. Dec. 14, 1909, in

Michigan. Cap., \$2,500,000; shares \$25 par, assessable; issued, \$1,750,000; \$9 paid. Beacon Trust Co., Boston, transfer office; American Trust Co., Boston, registrar. Company succeeded the New Baltic Exploration, giving stockholders therein share for share, giving 30,000 shares to the Edwards estate and 10,000 shares to the New Arcadian Copper Co., for lands, and selling 20,000 shares to the public, at \$8. Company began operations with \$120,000 cash, and in June, 1915, called an assessment of \$1; Dec. 31, 1915, had cash on hand, \$24,624. All officers with exception of general manager serve without pay. Annual meeting third Wednesday in April.

Property: 640 acres, Sec. 16, T. 55 N., R. 33 W., with mineral rights to the N. W. $\frac{1}{4}$ of the N. W. $\frac{1}{4}$ reserved by the New Arcadian Copper Co. Exploratory work, begun June 10, 1909, included extensive trenching in the horizon of No. 3 conglomerate, supplemented by boreholes put down by a Calyx shot drill, cutting a $3\frac{1}{2}$ " core, considerable trouble having been experienced in getting down stand pipes. No. 3 borehole, at a depth of 330', cut 2' of exceptionally good copper-bearing rock, with 6" of heavy copper, and a drill core fairly charged with copper was taken, Sept., 1909, from what was thought to be the western Baltic bed, at depth of 300'. In Nov., 1909, a drill hole pitched at an angle of 60°, cut an amygdaloidal bed estimated to pitch at 60° in opposition, giving cores of 105' aggregate depth, showing copper at various points, the final 7' being well charged with fine stamp copper and a considerable amount of very coarse stamp copper. The drilling also disclosed an unidentified amygdaloidal bed of about 75' width, carrying considerable copper in masses approaching barrel-work size. Deepest hole bored was 1,200'.

Ground was broken June, 1910, for an exploratory shaft, which was started about 35' in the footwall trap, and sunk to a depth of 500'. Although the shaft was started in the foot, the formation rolls so that the bed was cut at 3 points in the depth of 310'. At 200' the shaft cut the footwall of the amygdaloidal bed, carrying much calcite but devoid of copper. At depth of 310' the bed was cut again, carrying extremely heavy copper of a grade materially better than the average of the payable mines of the district. Drifts on the 350' and 500' levels disclosed exceedingly bunched ground, with occasional pockets of rich copper, and a crosscut on the 500' level showed further copper ground in an unidentified amygdaloidal bed underlying No. 4 conglomerate bed, distant about 1,500' from the shaft. This crosscut was continued to a point over 1,900' from the shaft. The company is now putting down a diamond drill hole, preparatory to sinking a shaft on the New Arcadian vein. Facts concerning this vein were obtained from work done on it by the New Arcadian, the adjoining property.

Equipment: includes a steam plant with hoist, good for 1,500', and a 6-drill Ingersoll-Sergeant air compressor. Property considered promising and management good.

NEW CANADIAN METAL CO.

S. S. Fowler, Nelson, B. C., mgr. **Property:** the Bluebell lead-silver mine and concentrating mill at Riandel, near Ainsworth, B. C. Operated intermittently.

NEW COPPER SILVER CO.

Helena, Mont. **Officers:** W. C. Bardon, pres.; Z. B. Melborn, v. p.; E. J. Dower, sec.-treas. Company acquired the holdings of the defunct Copper-Silver Montana Mining Company at receiver's sale in 1914.

Property: 7 claims, 130 acres, adjoining the Lexington and Sacajewea, in the Scratch Gravel district, 1 mile from Great Northern railway, and 5 miles north of Helena. Claims show granite and monzonite, reported to carry numerous fissure veins, dipping N. W. and S. E. All veins are re-

ported mineralized at surface, carrying melaconite, azurite and malachite. Mine has a 500' shaft, cutting at 300', a vein estimated to average 4.5% copper, 12 to 100 oz. silver, and \$1 to \$55 gold per ton. **Equipment:** includes a 30-h. p. steam hoist and a gasoline engine. Operations have not yet been resumed by the new company.

NEW CORNELIA COPPER CO.

ARIZONA

Gordon R. Campbell, sec., Calumet, Mich. Operating office: Ajo and Warren, Ariz. Same directorate as the Calumet & Arizona Mng. Co., with Dr. L. D. Ricketts and Geo. H. Augustine.

Inc. Sept. 28, 1909, in Delaware, as a reconstruction of the Cornelia Copper Co. **Cap.**, \$8,000,000; shares \$5 par; nonassessable; issued, \$6,000,000.

Company authorized an issue of \$4,000,000 6% 12-year sinking fund gold bonds, dated Sept. 1, 1915, maturing Sept. 1, 1927, convertible into stock at \$10 per share, to finance the purchase of necessary equipment and construction work. All subscribed at par. 76% of the stock and \$3,100,000 bonds owned by C. & A. Co.

History: company's early history and its experiments with new processes are fully described in Vols. VI, VIII and X, Copper Handbook. In 1910, the General Development Co. bought 20,000 shares of stock for \$20,000, spending the money under an option for a stock control, putting down 5 diamond-drill holes, deepest 188', which showed the ground to be oxidized to a depth of about 30', followed by sulphides, estimated by the company to average 2 to 2.75% copper. The option was forfeited 1910 and property was leased to H. C. Chamberlain who shipped concentrates from 800 tons of 4% ore to the Copper Queen smelter.

Property: 23 patented and 68 unpatented claims and 15 mill sites, near Ajo, 43 miles south of Gila Bend, Ariz. Eighty-four diamond drill holes of an average depth of 300', and other work on the property by the Calumet & Arizona Co. has proved the existence of 11,954,400 tons of carbonate ore carrying 1.54% copper and 28,303,600 tons of sulphide ore carrying 1.50% copper, or a total of 40,258,000 tons carrying 1.51% copper. The gold and silver values in the carbonate ore are negligibly small but the sulphide ore carries between \$0.30 and \$0.50 per ton in commercial values. Of this tonnage all of the carbonate ore and 20,526,800 tons of the sulphide ores are available for steam shovel mining. The occurrence of ore at the surface obviates stripping and loss of ore or vitiation of grade through admixture of ore with capping. Nineteen drill holes stopped in ore at from 400 to 600' depth.

Geology: claims cover an area of rhyolite, lava, breccia and tuff beds, intruded by a huge mass of monzonite porphyry which cuts and uplifts the rhyolite. There were subsequent intrusions of diorite and diabase porphyry, probably connected with the great mass of Tertiary basalt and andesite lava flows which cover the surrounding country. Mineralization has formed a low-grade disseminated deposit with high-grade veins in monzonite and narrow rich veins in the adjoining rhyolite. The disseminated orebody, covering about 55 acres, has a pear-shaped outline. The depth of the ore varies from less than 50' on the outskirts to more than 600' in the center of the orebody.

The original mineralization was chalcopyrite and bornite with comparatively little pyrite. Surface alteration has converted the primary sulphide minerals to malachite to a depth of about 20' below the deepest arroyos and 150' below the highest hills. The plane of demarcation between carbonates and sulphides is almost horizontal, agreeing with the present ground water level. Chalcocite is rare except in thin films just below the water level.

Equipment: a 40-ton experimental plant, completed Jan. 31, 1915, treated 12,222 tons of ore, to Dec. 31, 1915, attaining an average extraction of from 74-79%. A 4,000-ton plant to cost \$4,200,000 is being constructed, which is expected to put the mine on an annual production basis of 36,000,000 lbs. copper and should be completed by July, 1917. Equipment will include an electrolytic plant with 152 lead-lined tanks, a power plant, 126'x200', built of steel and concrete, with five 822.6-h. p. boilers and two 7,500-k. w. steam turbines, a leaching plant with 11 lead-lined leaching tanks, 88'x15', having a capacity of 5,000 tons of ore each, each tank having pumping equipment for circulating and advancing its solution at the rate of 8,000 gallons per minute.

The development of a water supply sufficient for the mill was accomplished by two deep wells drilled in the valley N. E. of the mine. Water in quantity was found in both wells at depths of from 550 to 750'. Property promises to make a big and profitable producer.

NEW CRYSTAL MINING CO.

WASHINGTON

Office: 8-9 Fall City Blk., Spokane, Wash. **Mine office:** Miles, Lincoln Co., Wash. **Officers:** John O'Connor, pres.; H. F. Snamiska, v. p. -treas.; C. L. Colby, sec., with John Gray, Ray E. Stevens, directors. C. S. Batchelder, mgr. **Inc.** in Washington. **Cap.**, \$1,500,000; shares \$1 par: assessable; 1,100,000 shares outstanding. Annual meeting May 12. Operating expenses in 1915 amounted to \$4,000.

Property: 2 patented claims, 40 acres, near Miles, an old time producer, shows gold-silver-copper-zinc ore in shoots, said to assay from \$15-\$50 per ton in lead and silver. Ore occurs as contact deposit or in fissure veins, from 4-7' wide, in granite formation. Developed by 1,000' of underground workings. Operations were resumed June, 1915, and management reported planning erection of a 50-ton oil burning smelter.

NEW CURRENCY MINING CO.

WASHINGTON

Organized to take over the property of the Jay Gould Mining Co., at Chewelah, Stevens Co., Wash., said to show copper-lead-silver ore.

NEW DOMINION COPPER CO., LTD.

BRITISH COLUMBIA

Office: 42 Broadway, New York, N. Y. **General office:** Greenwood, B. C. **Works office:** Boundary Falls, Boundary district, B. C. **Officers:** Lucius W. Mayer, pres.; Newman Erb, v. p.; C. A. Starbuck, v. p.; preceding with Hon. Warren W. Foster, John A. Sleicher and Chas. H. Burke, directors. H. B. Blanchard, sec.; R. H. Eggleston, treas.; Oscar Lachmund, gen. mgr.

Inc. June 9, 1909, in British Columbia. **Cap.**, \$1,750,000; shares \$5 par; issued, \$1,178,320; treasury holds \$499,800 in stock for conversion of like amount of bonds. Debentures: \$500,000 ten-year 6% gold income bonds, convertible into stock at par; outstanding March 31, 1914, \$483,650. Empire Trust Co., New York, transfer agent. Annual meeting, first Monday in June.

The annual report for the year ending March 31, 1914, last one issued, shows a loss on operations for the year of \$111,471. Cash in bank amounted to \$34,293, accounts receivable \$135,354 and accounts payable \$28,387. Company made payment of coupon No. 4 of its bonds in Oct., 1913, holders releasing company from payment of coupons Nos. 1, 2 and 3, as income was not earned.

This company is a drastic reconstruction of the Dominion Copper Co., Ltd., originally the Montreal & Boston Mining Co. The property was acquired at foreclosure sale for \$347,999.85. Is controlled, through ownership of about 155,000 shares, or 64% of the issued stock and one-third of the bond issue by the British Columbia Copper Co., Ltd.

The mines were operated by the British Columbia Copper Co. and the ore smelted by that company under a contract providing for the payment of actual smelting charges plus 50 cts. a ton for interest and depreciation. A change was made which provided for a fixed profit of 15 cts. a ton guaranteed by the British Columbia Copper Co., regardless as to whether such amount be realized from the ore or not.

Property: 15 claims, 500 acres, fractional interests in 94 claims additional, also a 32-acre mill site, an 80-acre town site, a water-power plant at Boundary falls and a 1,000-ton smelter. Mining lands are in 4 groups, in the Phoenix, Deadwood, Wellington and Summit camps. Country rocks are limestone and greenstone, orebodies occurring largely as replacements in greenstone. These deposits are all more or less developed, of about 25' average width, a generally N.-S. strike and average dip of about 40°. The ores are low in average grade and the mines, though showing large orebodies, have a comparatively small amount of ground blocked out.

The mines at Phoenix, 366 acres, include the Brooklyn, Idaho, Rawhide, Stemwinder, Montezuma and Standard mines.

The Brooklyn mine, which was for years the principal producer of the company, has a 430' main shaft, with a steam hoist and about 8,000' of workings, showing a 40' vein, estimated to average 1.43% copper, 25 cts. silver and \$1.32 gold per ton. The orebody was relatively high-grade, but is faulted or cut off by a cross fracture and not recovered beyond it.

The Idaho mine, connected with the Brooklyn on the 250' level, is developed by tunnel and shaft, latter having an electric hoist.

The Stemwinder mine, opened on a vein parallel with and about 1,000' east of the Brooklyn, has a 400' shaft, with about one-half mile of workings. Ore averages about 1.4% copper, 25 cts. silver and \$1 gold per ton.

The Rawhide mine adjoins the Gold Drop mine of the Granby. The property was thoroughly prospected by diamond drilling in 1913-14 and shipped ore averaging 1% copper, .27 oz. silver and 80 cts. gold per ton.

Development: by a 180' shaft, 6 tunnels and various open cuts; 1,700' of drifts and crosscuts, with 2,008' of raises, besides enlargement of former openings, was done in 1913-14 and 500' of diamond-drilling exploration. **Production:** 1913-14, 217,386 tons. Remaining available ore calculated to be 20,000 tons March 3, 1914, provided the mine does not cave, which is likely to occur at any time.

The Montezuma and Standard claims, but slightly developed, show low-grade ores similar to those of the other mines of the Phoenix camp.

The Deadwood group, 110 acres, includes the Sunset, Morrison, Crown Silver, Little Buffalo and C. O. D. mines.

The Sunset mine has shafts of 200' and 412', and large opencast workings. The orebody is valuable chiefly for flux as it carries excess of iron, silica and lime, with only small copper, silver and gold values. Reserves of positive and possible ore estimated at 80,000 tons.

The Crown Silver mine adjoins and is practically a part of the Sunset. Development is by a 265' shaft and an 880' tunnel.

The Morrison mine has a 364' shaft with 4,300' of tunnels, showing ore averaging about 0.6% copper, 1.5 oz. silver and up to \$4 gold per ton. Equipment includes a 110-h. p. steam plant with a 7x9" hoist and 5-drill compressor.

The Athelstan or Wellington group includes the Athelstan and Jackpot mines, 34 acres, showing a large outcrop of oxidized ore carrying very low values in copper, about 1 oz. silver and up to \$7.50 gold per ton, but expected to carry somewhat better copper values below the oxidized zone. The Jackpot was a considerable producer 1910, but was abandoned 1912. The

Athelstan mine produced 6,388 tons in the year ending March 31, 1912, but mine was shut down Dec., 1911, as vein is narrow and prospects for more ore are unpromising.

The Summit group includes a one-half interest in the Lancashire mine, having a vein carrying silver ore, and a three-fourths interest in the Mountain Rose mine. The Mountain Rose, developed by 2 tunnels, has a vein about 15' wide, carrying pyritic ore, low in silica, with small gold and silver values for fluxing purposes.

Equipment at the Brooklyn mine at Phoenix includes electric hoist and a 25-drill Canadian-Rand air compressor, driven by a 450-h. p. Canadian Westinghouse electric motor.

Ore was transported 4 to 25 miles by rail from the various mines to the smelter, at a freight rate of 17 cts. for Deadwood ore and 30 cts per ton on ore from the mines of the Phoenix and Summit camps.

The 1,500-ton smelter, 4 miles from Greenwood, is now idle. Described Vol. X, Copper Handbook.

Production:

Fiscal Year	Ore Tons	Copper Lbs.	Silver Oz.	Gold Oz.	—Rec'd per—	
					Lbs. Copper	Oz. Silver
1912-13.....	294,300	7,304,713	79,450	10,862	16.65c	61.74c
1913-14.....	210,394	4,565,402	57,613	8,252	12.22c	55.99c

Property is a low-grade deposit, workable when the price of copper is high. Its future depends upon the Canadian Copper Corp., which controls it through the British Columbia Copper Co.

NEW DOMINION MINES CO.

ARIZONA

Globe, Gila Co., Ariz. Inc. 1905. Cap., \$1,000,000. Lands: about a half mile north of the Gibson mine, are said to show a 12" vein in schist, opened by 240' shaft. After 2 years of work, this vein, carrying chalcopryite ore averaging 23% copper, was struck in a crosscut from the tunnel face. Idle. No recent returns.

NEW ELY CENTRAL COPPER CO.

NEVADA

Main office: 907 Market St., Wilmington, Del. Business office: 16 State St., Boston, Mass. Officers: John G. Gray, v. p.; Jonathan H. Brown, sec.; H. E. Lodge, treas., with J. Pearce Cann, directors. Inc. Feb. 19, 1912, in Delaware. Cap., \$8,000,000; reduced to \$2,500,000; shares \$5 par; fully paid, nonassessable; issued, 500,000 shares. Bonds authorized, \$500,000, 6%; \$175,000 issued. American Trust Co., registrar; Federal Trust Co., transfer agent. Annual meeting, second Monday in February.

This corporation was reorganized from the wreck of the Ely Central Copper Co. by about 1,600 of its stockholders. All the stock and bonds that have been issued are to the stockholders of the corporation which participated in the reorganization plan, except stock of the par value of \$5,550,000 which was issued in trust for treasury purposes.

At a special meeting of the stockholders held Dec. 20, 1913, it was voted to deed to the Consolidated Coppermines Co. the entire property of the New Ely Co., and in pursuance of this vote a deed was executed and delivered, the Cons. Coppermines Co. thereupon taking possession of all the property of the former company. The stock and bondholders deposited for exchange 464,182 shares of the 500,000 outstanding shares and \$164,000 of the \$175,000 outstanding bonds up to Dec. 31, 1915. The New Ely Central Copper Co. will be dissolved when all stock and bonds have been exchanged.

NEW EMPIRE GOLDFIELD MINES CO.

NEVADA

Goldfield, Nev. Officers: C. D. Terwilliger, pres.; Chas. Wittenberg, v. p.; Fred J. Amigo, sec.-mgr.; F. M. Manson, treas., with E. Marks, directors. Inc. 1915, in Nevada. Cap., \$1,500,000; shares \$1 par.

Property: 3 claims and a fraction, 50 acres, adjoining the Lone Star on the E. and Commonwealth property on the N. at Goldfield, formerly owned by the Empire Gold Mining Co. **Development:** by an old 150' shaft and 150' crosscut said to have disclosed a 16" streak of \$20 ore. Shaft is being sunk to 500' to reach the latite-shale contact. **Equipment:** includes electric power and 40-h. p. electric hoist.

NEW ENGLAND & CLIFTON COPPER CO.

ARIZONA

Sold to Phelps-Dodge interests Described in Copper Handbook, Vol. XI.

NEW ENGLAND EXPLORATION CO. (THE)

COLORADO

Office: 14 Ashburton Place, Boston, Mass. Controls the Smuggler Union Mining Co., Colo., which see, and has in the past conducted mine exploration and development work in Mexico and several of the western States. Company is controlled by Calumet & Hecla interests.

Officers: T. L. Livermore, pres.; Bulkeley Wells, v. p.; with R. L. Agassiz, H. L. Higginson, Q. A. Shaw, directors. T. E. Sherwin, treas.

Inc. 1898, in Maine. **Cap.,** \$2,000,000; shares \$100 par; outstanding, \$1,875,700. Annual meeting first Wednesday in June, at Portland, Me. Stock transferred at company's office.

NEW ENGLAND GOLD & COPPER MINING CO.

UTAH

Office: 67 Milk St., Boston, Mass. Mine office: Bingham Canyon, Salt Lake Co., Utah. **Officers:** Jas. S. Williams, pres.; E. E. Abercrombie, v. p. and managing director; Geo. F. Bradstreet, sec.-treas.; preceding, with Woodford Yerxa, Francis H. Dowse and Geo. Bancroft, directors. **Inc.** June, 1899, in Colorado. **Cap.,** \$2,000,000; shares \$10 par; issued, \$1,294,467 **Bonds:** \$500,000 authorized, at 6%; issued, \$390,000. Paid a 10% stock dividend, Oct., 1908. Federal Trust Co., Boston, registrar; Geo. F. Bradstreet & Co., transfer agents. Annual meeting, first Monday in June.

Property: the Bingham group of 9 fractional claims, 18 acres, in the Bingham, or West Mountain district, Utah, lying south of the Boston Consolidated, next to the Last Chance group and near the Utah Metals property. The company also owns a group of 4 claims at Goldfield, Nev.

The old Nast mine of the Bingham group shows porphyritic country rock carrying 3 fissure veins, of 30" average width, opened by the 1,600' Nast tunnel and the 1,670' Benton tunnel, both in ore, and 2 shafts, 1 of 159', with a total of about 6,000' of workings. Veins are said to widen at depth and ores are said to give average assays of 30% lead, 10% zinc, 15 oz. silver and \$4.50 gold per ton, with small and variable percentages of copper, some of the monzonite country rock carrying copper values that may prove workable at some later date.

Equipment: includes a steam plant with 2 hoists, 1 of 30-h. p., good for 800' depth. The concentrator has a 4x12" Sturtevant crusher, 2 rolls, 2 Hartz jigs and 1 Wilfley table, operated by commercial electric current.

Production: was 2,108 tons of lead concentrates and 165 tons of copper ore, 1907, but property was closed down, late 1907, and mine was worked on only a small scale, 1908 to 1910, securing 936 tons of ore, giving net smelter returns of \$36,986. In 1910, the Utah Metal Mining Co. sued this corporation for \$700,000 damages, alleging trespass and illegal ore-extraction. A survey proved that company was not guilty of trespassing and suit was canceled.

In 1911 the mine produced milling silver-lead ore, yielding 150 tons high-grade concentrates per month, netting the company \$25,874. In 1913 output was reduced to \$8,360 and the mine was shut down by reason of western creditors forcing their claims. The Trust Co. holding mortgage securing the bonds, foreclosed same, Dec., 1915, at request of the bond-

holders and a reorganization of the company is contemplated. Interest, amounting to \$46,800 on bonds has not been paid since Feb. 1, 1914.

NEW ENGLAND MINING CO.**MASSACHUSETTS**

Idle. Office: 35 School St., Greenfield, Mass. Mine office: Charlemont, Franklin Co., Mass. Othello A. Fay, pres.; E. Forrest Sweet, sec.; Capt. Geo. H. Davenport, treas. and gen. mgr., at last accounts. Inc. 1902. Cap., \$500,000; shares \$5 par.

Owens about 1,000 acres 2 miles west of the Davis pyrite mine. Vein traceable 700', is approximately vertical, conforming closely in dip and strike with the Savoy schist in which it occurs. Deposit apparently is a fahlband, lacking well-defined walls, ore occurring scattered through 15 to 20' of the schist, with 6 to 12" of quartz, well mineralized, on the south wall, and a heavy impregnation of chalcopryite, 1 to 2' wide, on the north wall. Property has been partly stripped, and vein trenched across.

NEW ENGLAND ZINC CORPORATION.**MISSOURI**

Joplin, Mo. Inc. in Connecticut. Cap., \$100,000. Operates a lease on 160 acres of mineral land owned by C. W. Edwards in S. 23-24, T. 28, R. 34, Joplin, Jasper Co., Mo. Developed by 3 shafts to depth of 150'. Equipment: includes 150-ton concentrating plant making a mill recovery of from 20-25% zinc; pumps, air drills, steam hoists, and compressor. Employs 11 men. Company also reported operating a lease on the Leckie land at Klondike, Mo. Output is lead-zinc concentrate.

NEW ERA MINES.**COLORADO**

Office: 31 State St., Boston, Mass. Mine office: Idaho Springs, Clear Creek Co., Colo. Officers: Benj. A. Howland, pres.; E. M. Sanger, sec.; Robt. H. McLaughlin, treas.; W. A. Gilman, mgr. Inc. Nov. 8, 1915, in Maine. Cap., \$500,000; shares \$1 par; 100,000 shares held in trust for treasury. Stock listed on Boston Curb. Paul Revere Trust Co., Boston, transfer agents. Annual meeting second Monday in January.

Property: 15 claims, 3 patented, about 75 acres, and a millsite, 5½ miles from Idaho Springs, formerly owned by the Trail Mining Co., and worked during 1913-14 by the Calumet-Corbin Mining Co.

Ore: consists of a mixture of coarse galena, chalcopryite and pyrite, containing gold-silver values, with a quartz gangue and much siderite. Gray copper is abundant, while zinc blende is occasionally found. Five veins have been developed, with main workings on the Great Western and New Era veins. Selected smelting ore averages from \$50-\$60 per ton, mainly in gold and lead values.

Mine is said to have the extension of the Lamartine and Oneida veins, and is credited with a lead and gold-silver production of 2,361,000 lbs. and \$650,000 respectively. Developed by 4,000' of tunnels, crosscuts and shafts. Benj. F. Hall in 1914 estimated 64,330 tons of ore in sight, valued at \$415,382, based on an 85% extraction. Property reported on by Forbes Rickard in 1914.

Equipment: includes 15-h. p. electric hoist and a 50-ton 10-stamp mill. Shipments: from Nov., 1910-1913, amounted to 4,219 tons of net value \$84,558, or \$20 per ton. About 40 men employed in 1916.

NEW GOLD KING MINES.**COLORADO**

See Gold King Leasing Co.

NEW GOLDEN WEST MINES CO.**SOUTH DAKOTA**

Mine near Rochford, Pennington Co., S. D. Officers: Otto E. Freund, pres.; S. T. White, v. p.; Geo. H. Williams, v. p.-gen. mgr.; Wm. Matthews, sec.; E. M. Pridmore, treas. Inc. Oct., 1915, in South Dakota, as a reorganization of the Golden West Mining Co. Cap., \$2,000,000, in \$1,000,000 7% preferred and \$1,000,000 common stock.

Property: in Black Hills district, near Rochford, is to be developed and fully equipped, as soon as necessary funds are available.

NEW GOLDFIELD SIERRA MINING CO. NEVADA

Office: 107 Boston Bldg., Denver. **Inc.** 1915 in Nevada. **Cap.**, \$1,500,000; shares \$1 par; assessable. Is a reorganization of the Goldfield Sierra Mining Co.; 750,578 shares of the old company were exchanged for stock in the new company.

Property: 3 patented claims, about 42 acres, at Goldfield, Esmeralda Co., Nev. Active development planned by management.

NEW GOLDFIELD SIMMERONE MINING CO. NEVADA

Harry C. Cutler, Reno, gen. mgr.; F. B. Knickerbocker, supt. Inc. 1915 in Nevada. Stock listed on San Francisco Exchange.

Property: the Simmerone Fraction at Goldfield, Esmeralda Co., and a 3-year lease and bond on the adjoining Blue Bell group, worked through the Simmerone workings. The Simmerone, acquired 1914 at sheriff's sale, is developed to 250'. A raise from the 100' level disclosed an 18" quartz vein in July, 1915, said to have assayed from \$42-\$117 gold per ton. Plans developing to the 500' level in 1916.

NEW HAVEN COPPER CO. CONNECTICUT

Property at Seymour, Conn., shows a copper-bearing band of hornblende schist, carrying chalcopyrite with some bornite. Operations have been carried on intermittently for several years, the last work being done in Oct., 1911. Company has power plant on the border of the Naugatuck river.

NEW IDRIA QUICKSILVER MINING CO. CALIFORNIA

Office: 141 Milk St., Boston, Mass. **Officers:** Edw. H. Mason, pres.; W. B. Buckminster, v. p., treas., gen. mgr.; H. C. Buckminster, sec.-asst. treas.; with Francis Flint, S. Harwood, Andrew Adie, K. Hass, Robt. B. Stern, I. H. Locke and Jas. E. Simpson, directors; H. W. Gould, supt. at Jamestown, Cal.

Inc. 1896 in Wyoming. **Cap.**, \$500,000; shares \$5 par; all issued. Stock listed on Boston Curb. American Trust Co., Boston, registrar. Annual meeting, third Wednesday in January, at Cheyenne, Wyo. Company has been a regular dividend payer since 1897, with total disbursements to date of \$19.60 per share.

Comparative Balance Sheet:

Assets:	Plant	Deprec.	Supplies	Cash	Quicksilver	Total

1907.....		7,675	89,650	25.50	41.50

Production in 1916 up to April, 1916, had been increased to 800 flasks per month. Employs 200 men.

NEW JERSEY METAL REFINING WORKS, LTD. NEW JERSEY

Elizabeth, N. J. See Mountain Copper Co., Ltd.

NEW JERSEY MINES CO.

NEVADA

Offices: 628 Hudson St., Hoboken, N. J., and Goldfield, Nev. **Officers:** Henry V. Broeser, pres.; L. A. Opdyke, v. p.; J. H. Stegman, treas.; Geo. H. Snyder, sec., Jersey City; above, with 14 others, form the directorate; Harry Ernest, mgr.

Inc. Jan. 15, 1912, in Nev. **Cap.**, \$1,250,000; shares \$1 par; outstanding, 1,010,850 shares; assessable 1c per share per year. Registrar & Transfer Co., New York, registrar. Listed on San Francisco Exchange and New York Curb as a prospect.

Treasurer's report for year ending March 31, 1916, shows receipts of \$14,314, which includes assessments, \$7,901, and 4 months' note, \$5,000. Disbursements amounted to \$9,207, leaving balance on hand, \$5,107.

Property: 5 claims, 3 patented, 53 acres, several miles N. E. of Goldfield, said to show gold-silver ore. **Development:** 507' shaft, with work done in 1915 on the 330', 400' and 500' levels. President's report for year ending April, 1916, states: "During the year our property has been developed to the stage of a preferred prospect; that is, we have everything toward a producing mine, minus the shoot or body. Values have been with us for the past year, and some marketable ore has been saved."

NEW JERSEY ZINC CO.

UNITED STATES

Offices: 810 Broad St., Newark, N. J.; 55 Wall St., New York. **Officers:** Edgar Palmer, pres.; A. P. Cobb, v. p.; J. E. Hayes, v. p. and gen. mgr.; C. W. Sexton, sec.; H. S. Wardner, treas.; with E. Palmer, C. W. Cox, E. S. Marston, J. J. Riker, W. P. Hardenbergh, August Heckscher, T. D. Jones, E. M. Squier and S. P. Wetherill, directors; H. G. Clopper, gen. sales mgr.; E. V. Peters, asst. gen. sales mgr.; A. H. Peck, sales mgr.; H. Hardenbergh, gen. purch. agt.; W. J. Lee, Jr., purch. agt.

Inc. Oct. 30, 1880, in New Jersey as the New Jersey Zinc & Iron Co. Name changed 1897 to present title and capital increased from \$3,000,000 to \$10,000,000. Stock increased to \$35,000,000 by payment of stock dividend of 250% July 7, 1915. **Cap.**, 350,000 shares; \$100 par; all outstanding. Transfer office: 55 Wall St., New York.

Bonded debt: the unretired balance of bonds authorized Oct. 1, 1901, due Oct. 1, 1926, First Gold, 4%. Original authorized issue, \$10,000,000, of

which \$4,000,000 were issued, the balance to be issued only for the purchase of new property, stock of new corporations, the erection of new plants, etc. Of the \$6,000,000 of unissued bonds, \$2,800,000 had been retired up to Jan. 1, 1916, leaving a present authorized amount \$7,200,000. The mortgage provides for the cancellation of \$200,000 of unissued bonds yearly on Oct. 1, beginning 1902, the authorized amount of bonds to be reduced accordingly, and after all such unissued bonds have been canceled, the company is required to pay to the trustee, annually, on Oct. 1, \$200,000 as a sinking fund for the purchase or redemption of outstanding bonds at not exceeding par and interest.

Dividends: paid regularly at rate of 20% per annum, and in addition in recent years extra dividends have been paid as follows: Jan., 1907, 5%; Jan. 1, 1908, 1909, 1910 and 1911, 10% each; Jan., July and Dec., 1912, 10% each; Jan., July and Oct., 1913, 10% each; Jan. and July, 1914, 10% each; Oct. and Dec., 1914, 5% each; Jan., 1915, 10%; July 15, 1915, 30% and 250% stock. In the first six months of 1916 a total of \$13,300,000 was paid in six dividends (38%), partly earned in 1915.

Statement, first quarter, 1916:

Net profits	\$8,561,385
Deduct:	
Bond interest	\$40,000
Res. to retire bonds.....	75,000 115,000
Surplus for quarter.....	8,446,385
Dividends paid	6,650,000
Balance	1,796,385

Property: the famous zinc mines at Franklin Furnace, N. J. The different original holdings were consolidated as a result of litigation and to effect better mine operations. It was upon the economies due to a single control of the great orebody and to the discovery by J. P. Westmill of a process for treating the manganese-zinc ores that the fortunes of the company were built. For geology of mine see Lindgren's "Ore Deposits," p. 709; also U. S. G. S. Geologic Folio, No. 161.

Company owns a controlling interest in the New Jersey Zinc Co. of Pa., with operating plants at Palmerton and Freemansburgh, Pa.; also 8 operating mines near Benton, Wisc. (Mineral Point Zinc Co.); also many other producing properties and reduction works, including the Empire Zinc Co. of Mo., not operating any property at present, the Empire Zinc Co. of Colo.

The Franklin mine in New Jersey produces the high-grade ore from which the White Seal, Green Seal, Red Seal, and Horsehead brands of spelter are made. The reserves are unofficially reported to be in blocked-out ore, sufficient for a thirty-year supply at the present rate. Custom ores are also bought for treatment. The products include oxide of zinc, spelter, spiegeleisen, sulphuric acid and lithophone.

Production: no reports are published, but it is known that the company has a yearly smelting capacity of 160,000,000 to 170,000,000 lbs. of spelter, and the 1916 production is estimated at 250,000,000 lbs. of zinc, besides sulphuric acid, zinc oxide, lithophone, pig iron and ink.

NEW KEYSTONE COPPER CO.

Company dissolved and now being liquidated. Property sold in 1915 to the Inspiration Cons. Mining Co. on basis of 9 shares New Keystone for 1 share Inspiration. Fully described in Vol. XI, Copper Handbook.

NEW MARIAN CONSOLIDATED MINING CO.

COLORADO

Office; 1408 Lord's Court, New York. Controlled through ownership

of 82.8%, or 41,404 shares out of 50,000 issued shares by Iron Silver Mining Co.

Property: 3 patented claims, the Devlin, R. A. M. and Cyclops, about 23 acres, adjoining the Proserpine and Cumberland groups of the Iron Silver Co., on the E. and N. Reported to have been a considerable producer of silver-bearing iron and lead sulphide ores as far back as 1890. The ore-bearing formation occurs over 1,000' below the surface and contains considerable water. The Iron Silver Co. plans unwatering the old workings and systematic development of the ground in 1916.

NEW MESCAL MINING CO.

ARIZONA

Jerome, Ariz. Is a reorganization 1914 of the Mescal Mining Co. L. C. Cherry, pres., State Bank Bldg., Little Rock, Ark. Inc. 1914, in Ariz. Cap., \$1,500,000; shares \$1 par.

Property: Owen & Allison group, 3 patented claims, a mile south of Jerome in Verde district, showing fissure veins in slate and diorite, one 3' average width, traceable 1,600' and workings show 1-2% copper with trace of gold.

Development: 1,200' of workings, with 900' tunnel and a blind shaft from 700' tunnel level.

Equipment: electric with compressor, etc. Property idle for several years past but prospects are good for reopening property 1916.

NEW MONARCH MINING CO.

COLORADO

Office: c/o J. C. Kortz, pres. Cuyahoga Bldg., Cleveland, O. Mine office: Leadville, Lake Co., Colo. Frank Fuller, supt., at last accounts.

Property: the New Monarch and Cleveland mines, carrying lead and zinc sulphides. Developed by shafts and crosscuts. A crosscut to the N. E. is being driven in virgin ground at the bottom of the Monarch shaft. **Equipment:** includes a steam plant, compressor, etc. Operated by lessees since 1914 and producing about 800 tons of ore per month, averaging \$20 in gold, silver, lead and zinc.

NEW PLANET COPPER MINING CO.

ARIZONA

Office: 61 Broadway, New York. **Officers:** Alex. Rae, pres.; Geo. S. Barton, v. p.; Herman Cook, sec.-treas., with Julius H. Susmann, S. S. Rosenstamm, Geo. Crompton, Jas. H. Satterfield and T. M. Lloyd, directors. Inc. July 13, 1909, in Delaware. Cap., \$4,000,000; shares \$5 par; non-assessable; issued 342,905 shares. Is a reconstruction of the Planet Copper Mining Co., stock of which was retired by exchange for 240,000 shares of New Planet stock. Farmers Loan & Trust Co., New York, registrar. Annual meeting, third Wednesday in June.

Property: the Planet mine with 39 unpatented claims, 800 acres, in the Harcuvar district, on the southern bank of the Bill Williams Fork river, 21½ miles from Bouse on the Santa Fe cutoff and about 6 miles from Swansea. **Geology:** copper occurs mainly as oxidized ore, though nuclear particles of sulphides mixed with specular hematite are seen in the deeper workings. The orebodies are replacements in limestone, the ore bed developed at the Planet shaft lying on the contact between this rock and underlying gneiss. This deposit is 3 to 20' thick and dips 15° south. Much high-grade ore has been shipped from other parts of the property in past years; it was found as crusts, or shells, about impure hematite in limestone, especially near bodies of amphibolic rock now altered to black gneiss. A deep-seated mass of granite is the not improbable source of mineralization, although later igneous activity is shown in a volcanic plug not far distant and in the basalt flows which cover the surrounding country. The geology is very fully discussed in U. S. G. S. Bul. 451, p. 47, written by Howland Bancroft.

The ore deposits show a heavy iron gossan, mainly of hematite, apparently of workable grade, and it has been estimated that the property shows about 500,000 tons of 60% iron ore. The main orebody developed in the Planet shaft is about 300' in width, has a thickness of 4' 3" and an average copper content of 5.9%, according to a report by A. H. Kellar.

Development: aside from open cut and tunnels, is mainly at the Planet shaft, an incline sunk on the ore bed at an average angle of 15° to a depth of 733'. There are drifts, crosscuts, etc., amounting to 2,500'. A vertical 350' shaft connects with these workings and gives ventilation.

The old workings include 8 tunnels, longest 225' and 12 vertical pits and shafts, of 25 to 325' depth. About \$150,000 was expended under the management of the General Development Co. in sinking the vertical shaft and putting down a number of churn-drill holes, 3 holes showing low-grade sulphide ore below the old workings.

The Planet mine is probably the oldest copper mine in Arizona. It was opened in 1864, worked in a small way until 1874, and reopened in 1884 when a 36" circular blast furnace was erected. The property was taken over 1902, by the predecessor of the present company. The mine produced, 1864-74, upwards of \$500,000 worth of high-grade ore, ranging from 15 to 40% in copper, which was presumably shipped down the Colorado river to Guaymas, and thence to Swansea, for reduction.

Equipment: includes a 75-h. p. gasoline plant, with two hoists and a 5-drill air compressor. Buildings include a carpenter shop, smithy, 2 shaft houses and 3 dwellings.

Property considered as still unproven, churn drilling being too limited to determine existence, or nonexistence of large orebodies, and the greater part of the area is unexplored. Property reported under lease to Northwestern Leasing & Development Co. in 1916.

NEW PROVIDENCE GOLD MINING CO.

CALIFORNIA

Office: 2041 Emerson St., Berkeley, Calif. J. F. Chapman, supt. **Property:** 5 claims, 90 acres, including the Providence and New Providence, about 2½ miles S. E. of Tuolumne, Tuolumne Co., Calif., said to show 2 parallel veins, 5' wide, in black Calaveras slate, running N. 8° E., with dip 45° E. Ore is gold, with galena and 2% pyrite.

Development: by 1,300' shaft with levels every 100'. **Equipment:** includes 10-stamp mill. Product is a concentrate said to run better than \$90 per ton. About 12 men employed.

NEW PURITAN MINING CO.

SOUTH DAKOTA

Galena, S. D. **Officers:** Wm. J. McGoffin, pres.-mgr.; Dr. Fred M. Ganty, v. p.; Judge John R. Russell, sec.; Chas. J. Searle, treas., with J. R. Richardson, directors. **Inc.** 1915, as a reorganization of the Puritan Mining Co. **Cap.**, \$1,500,000; shares \$1 par; non-assessable; 200,000 shares issued. Annual meeting in June.

Property: 60 patented acres, in White Wood mining district, Lawrence Co., S. D., shows an orebody, 28' thick in quartzite with gold-silver-lead values, said to assay \$3.60 per ton.

Developed by several shafts to depth of 165'. **Equipment:** includes steam hoist, 6-drill compressor, No. 5 Cameron pump, and a 250-ton concentrating mill with cyanide unit. Property has been idle for 3 years owing to litigation but management plans resuming operations in 1916.

NEW QUINCY MINING CO.

UTAH

Office: 202 Atlas Blk., Salt Lake City. Mine office: Park City, Summit Co., Utah. **Officers:** W. Mont Ferry, pres.; W. R. Hutchinson, v. p.; A. L. Thomas, Jr., sec., with W. S. McCornick, F. J. Hagenbarth, Frank

Cook and Herman Bamberger, directors. F. Sommer Schmidt, con-
enr. Peter Harrington, supt.

Inc. June, 1915. Is a reorganization of the Thompson Quincy Mining
Co. Cap., \$125,000; shares 10 cts. par; assessable; with assessments not to
exceed 3 cts. during the first year. Exchange of stock made on a share-for-
share basis, calling for distribution of 1,045,035 shares. Stock is listed on
Salt Lake Exchange. The New Quincy Co. assumed the obligations of the
Thompson Quincy.

The annual report for 1915 shows: receipts from assessment No. 1,
\$10,509; miscellaneous sources, \$519. Disbursements, \$8,767; cash on hand
Jan. 1, 1916, \$2,260; indebtedness of company on Dec. 31, 1915, was \$44-
335; circulation of capital stock, issued to stockholders, \$1,041,174; treasury
stock, \$208,826; total, \$1,250,000.

Property: 140 patented acres in Park City district, with rights of way
and easements from the Daly West; Daly and Ontario companies. The
claims supposedly carry the extension of the Quincy orebody of the Daly
West mine. Developed by a 625' two-compartment vertical shaft, a cross-
cut tunnel through the Little Bell mine, cutting a contact vein, said to
carry ore assaying up to 20% lead, 160 oz. silver and \$2 gold per ton, and
through the Ontario drain tunnel No. 2, which was extended to the Quincy
mine by the Ontario company. Work in 1913 under the former manage-
ment was mainly from the 900' level of the Daly and Ontario companies
and a shaft raised from the 900' Daly West level to the contact was com-
pleted.

In 1915, a 293' crosscut was run N. 31° W. across the Plumed Knight
ground. This crosscut is 84' above the 900' level, Daly West, and starts
from the Talbot raise; a raise was also driven on fissure No. 4 on a 43°
incline a distance of 250', giving a vertical height of 160'. The crosscut
intersected 9 fissures, all of which showed some slight signs of mineraliza-
tion.

The company's engineer advises as necessary for the proving of the
property further drifting west on the so-called Thompson-Quincy work-
ings, crosscutting south from the Talbot fissure another 400' until the
Thompson-Quincy fissure is intersected at a point about 700' west of the
old workings, thus opening up new territory; also crosscutting south on the
intermediate level to intersect other fissures known to exist.

NEW RELIANCE GOLD MINING CO.

SOUTH DAKOTA

Office: 206 South 4th St., Minneapolis, Minn. **Mine office:** Trojan,
Lawrence Co., S. D. F. C. Bowman, gen. mgr.

Property: the Reliance mine, at Trojan, shows gold ore in quartzite
formation. Orebody said to have an average width of 8' over a distance
of 1,000' and to assay \$4 per ton. **Equipment:** includes a 30-stamp mill,
treating slime by the continuous decantation, countercurrent system, drills
and air compressor. During fiscal year ending April, 1915, mill treated
23,088 tons of ore, an average of 63.1 tons per day. Bullion recovery re-
ported as \$3.12 per ton, or 91.8%.

NEW STATE MINING & REDUCTION CO.

ARIZONA

Office: 316 New England Bldg., Topeka, Kan. **Property:** near Amado-
ville, Santa Cruz Co., Ariz., 26 claims, showing veins said to carry lead-
zinc-copper ores, with gold and silver values.

Development: by 150' shaft with 950' tunnel. **Equipment:** includes
gasoline hoist and Ingersoll compressor. Was planning to erect a 100-ton
dry concentrator to treat low-grade ores, at last accounts.

NEW STOCKTON MINING CO.

UTAH

Office: Mankato, S. D. **Mine at Stockton, Utah.** F. M. Currier, pres.;

R. A. Dunham, v. p.; W. Z. Harrison, sec.-treas., 1172 E. 7th St. S., Salt Lake City. W. A. Wilson, cons. engr., 406 Dooly Block, Salt Lake City; C. B. Kennedy, W. D. Kimball and M. M. Ferguson, directors. Inc. in South Dakota by A. J. Eagle to operate a lease and bond on the Ben Harrison mine and sold to Wm. Mills and R. A. Campbell; control passed July 22, 1916, to present management.

Property: the old Ben Harrison mine at Stockton showing a vein with one to two feet of ore, which averages 10% to 45% lead, 5 to 40 oz. silver and 60c to \$7 gold per ton.

Development: by shaft with main work on 200' and 500' levels.

Production: \$70,000 in 1913-1914. As shipped the ore has averaged \$12 to \$15 per ton with silver-gold-lead values.

NEW UTAH BINGHAM MINING CO.

UTAH

Office: Suite 816, 30 Broad St., New York. Mine office: Bingham Canyon, Utah. **Officers:** Dr. F. S. Mason, pres.; C. W. Caffrey, sec.; H. A. Bellows, treas.; preceding with D. T. Stuart, J. W. Macrae, F. Harold Brown and H. K. Bellows, directors; P. M. McCree, supt.

Inc. April, 1912, in Maine. **Cap.**, \$1,375,000; shares \$2.50 par; \$2.45 paid; 195,917 shares outstanding. **Bonds:** authorized, \$100,000, 5-year, 7%, issued Sept. 23, 1911, and payable Sept. 23, 1916; \$14,000 outstanding, \$23,000 cancelled. Security Transfer & Registrar Co., New York, transfer agent. Stock is listed on New York Curb and London Stock Exchange. Annual meeting 3rd Wednesday in June. Company acquired property and assets of the Utah Bingham Mining Co. for \$1,182,550, giving the shareholders one new share, \$2.15 paid, for each \$5 share held.

Property: 20 claims, 19 patented, 149 acres adjoining the Telegraph mine of the United States Mining Co., in Bingham Canyon, Utah. Claims cover about 3,000' along the footwall portion of the Jordan limestone ore-bearing zone of Bingham. The large orebodies of this district are found in fissures within the limestone, or along limestone contacts, and the Jordan belt is the most productive of the 3 belts known in the camp; 16 fissure veins have been opened. Before the company acquired the property a number of promising veins carrying ore in the porphyry, but too narrow to be valuable, had been exposed. These veins pass into the limestone and are expected to have large orebodies at the contact. Ore is mainly silver-lead.

Development: consists of about 15,000' of work, mainly by 3 tunnels. In the Turngren tunnel, over 1,300' long, 8 veins from 1 to 4' thick have been cut, 7 showing ore and 2 of them worked. These two veins run north, are parallel and contain high-grade ore in the Spanish mine and along the outcrop in the company's ground. The Harrison tunnel, 600' long, is in quartzite and will crosscut the Rough and Ready veins, which are opened by 3 other tunnels higher up the mountain, all showing ore. Work on these veins has been discontinued and all work concentrated on the Giant Chief.

The Giant Chief vein is a fault fissure, developed by a 200' shaft from which further exploration is being conducted on the 150' level; 600' of drifts and crosscuts driven in 1915 from this point have at 800' depth in the sulphide zone cut 7 fissures encountered in the higher workings. These veins carry oxidized mineral matter, surrounded by a soft lime, and show porphyry mineralized with iron pyrites. A small vein of carbonate ore, running nearly 50% lead, has been opened; the Bonanza tunnel is being driven 400' to cut this vein where it crosses the contact, 150' deeper. Total development work in 1915 was 2,618' and to April, 1916, about 150' more was done, mainly on the Giant Chief,

Equipment: includes compressor, 180-h. p. electric plant, taking current from the Utah Power & Light Co., hoist and all necessary buildings. **Production:** recent shipments said to have assayed 17.33 oz. silver, 1.49% copper, 23.5% lead, 22.8% iron, 10.7% silica. 73 tons of ore treated in 1915 returned \$1,600.

Property is well adapted for tunnel work, has large blocks of virgin ground and is considered promising. Company is an intermittent producer.
NEW YERINGTON COPPER CO. NEVADA

Office: 817 Newhouse Bldg., Salt Lake City, Utah. Mine address: Yerington, Lyon Co., Nev. **Officers:** Chas. N. Strevell, pres.; Joseph E. Caine, v. p.; W. B. Outcalt, sec.; J. H. Paterson, treas., with S. V. Derragh, H. P. Clark, H. C. Edwards and Duncan MacVichie, directors. V. A. Gilles, supt. Inc. Aug., 1911, in Utah. **Cap.**, \$1,000,000; shares \$1 par; assessable, at rate not to exceed 1 ct. for each 90 days. Listed on Salt Lake Stock Exchange. Is a reorganization of the Yerington Copper Co., whose stockholders received 1 share of new for 2 shares of old stock, leaving 570,000 shares in treasury.

Property: 12 claims, 4 miles due east of Yerington, shows porphyritic granite cut by diorite dikes. There are 3 distinct, nearly parallel veins, 50 to 300' apart, following the dike contacts. The oxidized ores extend downward about 100' and are underlaid by enriched glance changing in depth to shoots of chalcopyrite and pyrite.

Development: chiefly on the middle, or Yerington vein by a 450' incline shaft. The 250' level exposes an ore shoot 1 to 3' thick from which shipments have been made intermittently. The east drift shows a soft vein carrying a narrow shoot 3 to 5' thick of chalcopyrite ore in an altered gangue. The west drift shows another shoot of 8% ore. The Marsal 520' tunnel on the same vein encounters another ore shoot at 340', that is 1½ to 3' wide and has 3% ore extending to top of 90' raise. In 1914 company did about 1,350' of development work on the main tunnel and on the 100-300' levels. Shipments thus far have not quite covered expenses. Shipments in 1914 averaged from 9-13% copper.

Equipment: includes a 40-h. p. gasoline hoist, 320-cu. ft. compressor run by a 60-h. p. gasoline engine and a pumping plant jointly owned with the Blue Jay Co. C. B. Grose and associates of Yerington leased the property in 1915. Property regarded as promising.

NEW YORK-ARIZONA GOLD & COPPER CO. ARIZONA

Morenci, Graham Co., Ariz. **Officers:** A. L. York, pres.; J. F. Cleaveland, v. p.; C. E. Tyler, sec.-treas.; John C. Molder, gen. mgr.; J. R. Wester, supt., at last accounts. Inc. April 15, 1907, in Arizona. **Cap.**, \$900,000; shares \$1 par.

Property: 30 claims, unpatented, 600 acres, and a 150-acre mill site, 4 miles west of Morenci, in the Copper Mountain district. Includes the Buzzard Shadow and adjacent groups. Claims show quartzite, shale and limestone cut by porphyry, with contact deposits, having orebodies, more or less developed, said to range from 10" to 4' in width.

Development: by tunnels, 100', 450' and 600' long and the Lillian tunnel, 1,800', claimed to show a vein carrying several ore shoots. There are 5 shafts, including the 260' Argentine shaft, said to show copper sulphides; the 80' Louise shaft, reported to cut an 8" vein showing ore assaying up to 15% copper, 180 oz. silver and \$20 gold per ton, and the 72' Jensen shaft near the Louise. The Buzzard Shadow group, at the eastern end of the property, shows a 2 to 4' vein carrying auriferous and argentiferous copper ore.

Equipment: includes a 15-h. p. Fairbanks-Morse gasoline hoist, 4 Nissen stamps and a tube mill. Does not reply to letters; evidently pursuing a "watchful waiting" policy.

NEW YORK BONANZA MINING CO.

UTAH

Park City, Summit Co., Utah. Reported in Dec., 1915, that a new company had been formed to operate the claims. Old company described in Copper Handbook, Vol. XI.

NEW YORK CONSOLIDATED MINING CO.

MICHIGAN

Charter expired and corporate existence of company being wound up by F. W. Nichols, receiver, Houghton, Mich., in 1915.

NEW YORK & HONDURAS ROSARIO MINING CO.

HONDURAS, C. A.

Office: 17 Battery Place, New York. Mine office: San Juancito, Honduras, C. A. **Officers:** W. S. Valentine, pres.; Sidney Abenheim, v. p.; J. M. De Hart, 2nd v. p.; Ernest Schernikow, treas.; M. F. Soto, sec.; J. Perlman, asst. sec. **Directors:** Sidney Abenheim, H. H. Babcock, Lewis L. Clarke, I. Heidelsheimer, J. C. F. Jacoby, M. F. Soto, Ambrose G. Todd, W. S. Valentine. **Executive committee:** Lewis L. Clarke, chairman; Sidney Abenheim, H. H. Babcock, J. C. F. Jacoby, Ambrose G. Todd, F. H. Mimard, cons. engr.; V. F. Marsters, geol.; A. R. Gordon, mgr.; A. G. Greeley, gen. agent.

Inc. Nov., 1880, in New York. **Cap.**, \$2,000,000; shares \$10 par; all issued. Stock is listed on the New York Curb. **Dividends:** to Jan. 1, 1916, total \$3,790,000. Payments in 1915 amounted to 12% or \$240,000. American Exchange Nat'l Bank, New York, registrar. U. S. Mortgage & Trust Co., New York, transfer agents.

Income Account:

	Income	Expenses	Net Income	Reserve Fund	Net Surplus
1915	\$1,200,743	\$847,276	\$353,466	\$117,324	\$236,142

Balance sheet: Dec. 31, 1915, shows assets, \$3,174,704, which includes property and plant, \$2,343,707; bullion in transit, \$271,735; cash, \$108,572; supplies afloat, \$36,374; loan to Government of Honduras, \$38,309. **Liabilities:** include accounts payable, \$59,026; balance surplus, \$990,509.

Property: owns 25 sq. miles of mineral-bearing land, including the Rosario mine, at San Juancito, Honduras, C. A., and prospecting rights over 400 sq. miles of territory on Chile Mountain.

Development: at the Rosario mine in 1915 amounted to 13,000' as against 15,701' in 1914. This mine has about 20 mineral-bearing veins, which have been or are now being worked. The San Miguel was the main producer in 1915, the ore coming from above the upper 550' level. Work continues on the lower 100' level and on the upper 250 and 550' levels. The Concepcion vein is being developed through the 100' lower adit level, jointly with the San Miguel. On the San Joaquin vein, 2,997' of work was done in 1915, which proved the orebody to within 50' of the 650' lower level. Production amounted to 12,288 tons. The Candelaria vein ranks third in production with 2,185' of underground work. 10,652 tons, practically all from pillars of old workings were extracted from the Rosario vein, making this the fourth largest producer. Several other veins were small producers, while the Jucua and Southwest seem to have dwindled down and disappeared.

Two crosscuts are being driven—the Pena Blanca-Esperanza, beginning at the S. E. end of the Esperanza No. 3 and running in a S. W. direction to develop the southern territory, and the Pena Blanca Southwest crosscut, starting at the juncture of the Southwest and Jucua veins

in Block 84 and planned to reach Jucuara gulch. When this connection is made, additional water power and cheap timber will be obtainable from the western side of the mountain. This crosscut was 900' long Dec. 31, 1915, with 1,900' to go.

The company spent 32,594 pesos for prospecting and development on the Chile Mountain Concession without very promising results. Three gold-silver veins showing low-grade values are being thoroughly prospected.

Ore reserves: estimated by the management, Jan. 1, 1916, at 343,716 tons, valued at \$9.76 per ton, gross value of \$3,353,098 (U. S. currency), as compared with 418,978 tons at \$10.75, gross value, \$4,380,446 at end of 1914.

Equipment: includes electric compressor, air-drills, 350-ton stamp mill, cyanide plant, 1,200-h. p. hydro-electric plant and hoists. The company maintains a school and hospital.

A Ball mill and Dorr thickener tank, to be added in 1916, are expected to increase the milling capacity to about 400 tons. The mill treated 117,790 tons of ore in 1915, as compared with 109,170 tons in 1914, with a total recovery of 1,999,652 oz. silver and 16,475 oz. gold, a recovery of 87.45% silver and 92.32% gold.

Total bullion production from 1882-1915 was \$21,172,967 (U. S. currency).

Recent Production:

	Tons Ore	% Extr.	Silver Oz.	Gold Oz.	Value U. S. Cur.
	Crushed				
1915.....	117,790	88.66	1,748,803	15,210	\$1,178,614
1914.....	109,170	89.63	1,834,361	14,298	1,203,144

Operating Costs (pesos):

	Total Cost				Cost Per Ton			
	Mng.	Mlg.	Admin.	Total	Mng.	Mlg.	Admin.	Total
1915.....	1,055,637	659,533	273,862	1,989,032	8.962	5.559	2.235	16.886
1914.....	1,087,231	551,326	248,582	1,887,139	9.963	5.050	2.277	17.290

NEW YORK & MONTANA COPPER MINING CO. MONTANA

Address: c/o E. J. Mathews, 1007 Hoge Bldg., Seattle, Wash. Mine near Corbin, Jefferson Co., Mont. **Inc.** 1903, in Delaware. **Cap.**, \$1,000,000; shares \$1 par. **Lands:** about 250 acres, including the Erickson, Scioto and Copper Gulch groups, opened by 3 two-compartment shafts, said to make a good showing of medium-grade ore. Idle many years, but pays taxes.

NEW YORK-SEATTLE COPPER MINING CO. WASHINGTON

Probably dead. Mine near Index, Wash. Described in Copper Handbook, Vol. XI.

NEWBURY MINING CO. ARIZONA

Presumably idle. Reported in 1914 that control had been acquired by Makeever Bros., Journal Bldg., Boston, Mass. Described in Copper Handbook, Vol. XI.

NEWHOUSE TUNNEL CO. COLORADO

See Argo Mining and Tunnel Co.

NEWRAY MINES, LTD. ONTARIO

Office: 55 Yonge St., Toronto, Ont., Canada. **Inc.** in Ont. **Cap.**, \$1,000,000; shares \$1 par. Imperial Trust Co., Toronto, transfer agent. Is a reorganization of the Rea Consolidated Gold Mines, Ltd.; shares exchangeable at the rate of 1½ shares in the new company for every share of Rea Consolidated stock.

Property: North ½ of lots 6 and 7, Concession III, about 320 acres,

comprises the Rea mine, at Porcupine, Ont., $1\frac{1}{2}$ miles from Schumacher, the nearest railroad station. Mine was operated in 1914 under lease by the Porcupine-Aurum Mng. Co. The veins are well-defined quartz fissures, strike N. E. and dip N. W.; ore-shoots occur as lenses in and along shear zones.

Development: 2 compartment vertical shaft, sunk 420' on vein, with levels at 200, 300 and 400'. On the 200' level 390' of drifting was done. The oreshoot is cut and displaced by a fault at depth of 240'; below the fault the vein is not of the same character nor does it show ore. The orebody above the fault was stoped out for about 300' in length, $4\frac{1}{2}$ ' wide, and 200' in depth and is said to have produced 19,500 tons of ore averaging \$11 per ton.

Equipment: includes 10-stamp mill, Sullivan hoist, 6-drill compressor, pumps and boiler. **Production:** mill treated 11,607 tons of ore yielding \$125,000 in bullion in 1915. The new company is exploring the ground with diamond drills, but has so far failed to locate any new orebodies of commercial value. Property reported on by C. H. Poirier, June, 1916.

NIAGARA COPPER CO.

ARIZONA

Presumably dead, and mine, near Bagdad, Ariz., idle. See Copper Handbook, Vol. XI.

NIAGARA MINING CO.

UTAH

Is controlled by United States Smelting, Refining & Mining Co.

NIBLACK COPPER CO.

ALASKA

Niblack anchorage, Prince of Wales Island, Alaska. A. A. Wakefield, agent. Property formerly worked by the Niblack Copper Development Co., afterwards the Niblack Copper Co., is reported to have reverted to the Geo. M. Wakefield Mineral Land Co. Fully described Vol. VIII, Copper Handbook. No work done on the property since 1912 and 1913 save annual representation. Niblack Copper Co. is said to still have a corporate existence.

NICHOLS COPPER CO.

NEW YORK & QUEBEC

Office: 25 Broad St., New York. **Works office:** Laurel Hill, Queens Co., N. Y. Employs about 1,500 men. **Officers:** W. H. Nichols, pres.; J. B. F. Herreshoff, v. p.; C. W. Nichols, v. p.; W. C. Webster, sec. and gen. mgr.; Edw. R. Nichols, treas.; M. E. Harris, auditor. **Inc.** May, 1905, in New York. **Cap.**, \$10,000,000; reduced 1912 to \$7,000,000; \$1,000,000 preferred stock issued 1914; shares \$100 par; bonds \$3,000,000. Is the successor of Nichols Chemical Co.

The Laurel Hill Works include a smelter and electrolytic refinery, with steam and electric power.

The smelter has 20 reverberatory furnaces, taking 40 to 250-ton charges, each furnace heating a tubular boiler with waste gases. There is 1 Herreshoff water-jacket blast furnace of 600 tons rated daily capacity. Matte and slag flow, in an uninterrupted stream, to a large settler, whence slag skims into pots and matte is tapped into an iron bed. Waste gases pass into a 1,000' main flue, of iron and brick, leading to a 300' chimney.

The electrolytic plant is operated on the series system, and has 550 tanks. Anodes are cast. The final product is cast mainly into wire bars. This company enjoys a deservedly high reputation for the purity of its product and the efficiency of its metallurgical practice. Is the largest electrolytic refining plant in the world; capacity about 40,000,000 lbs. of copper per month.

The works do a very extensive custom refining business, treating mainly ores and matte from outside producers in the smelter, and western blister copper in the electrolytic plant. The works handle all the bessemer copper

from the Phelps-Dodge properties, and from the Old Dominion, Calumet & Arizona, East Butte, Granby and Ducktown companies, and others. The mining properties at Capelton, Quebec, are operated by the Albert Copper Co., a subsidiary of the Nichols Copper Co.

NINETY-NINE COPPER CO.

NEVADA

Mine near Goodsprings, Nev. Described in Copper Handbook, Vol. XI. Company presumably dead.

NIPISSING MINES CO.

ONTARIO

Office: 165 Broadway, New York. Mine office: Cobalt, Ont., Canada. Officers: E. P. Earle, pres.; Richard T. Greene, sec., with W. H. Brouse, David Fasken, John L. Feeny, August Heckscher, Denis Murphy, R. B. Watson, directors. P. C. Pfeiffer, treas.; R. B. Watson, gen. mgr.; H. Cark, supt.

Inc. April 6, 1906, in Maine. Cap., \$6,000,000; shares \$5 par; all issued. Transfer agents: Bankers Trust Co., New York, Old Colony Trust Co., Boston and Toronto Gen. Trust Corp., Toronto. Registrars: Liberty National Bank, New York, State Street Trust Co., Boston; Toronto Gen. Trust Corp., Toronto. Annual meeting, last Monday in April. The Nipissing Mines Co. is a holding company, owning the entire stock issue of the Nipissing Mining Co., Ltd., which see.

The annual report, dated Dec. 31, 1915, shows total receipts, \$1,249,059, including \$1,220,000 dividends on stock of Nipissing Mining Co., Ltd., and expenditures, \$1,241,163, including \$1,200,000 paid in 4 quarterly dividends (20%). Assets, Jan. 1, 1916, total \$6,307,895, including capital stock, Nipissing Mng. Co., Ltd., \$6,000,000; dividends receivable from Nipissing Mng. Co., Ltd., \$300,000; cash, \$7,896. Dividends paid quarterly at rate of 5%.

NIPISSING MINING CO., LTD.

ONTARIO

Office: 165 Broadway, New York and Cobalt, Ont., Canada. Is controlled through ownership of entire stock issue by the Nipissing Mines Co., which see. R. B. Watson, gen. mgr. Inc. 1904, in Ontario. Cap., \$250,000; shares \$100 par; all issued.

Comparative General Balance Sheet:

	Assets				Total
	Property & Equip.	Investm's	Ore and Bullion	Other Current	
1915.....	\$689,974	\$33,430	\$ 944,932	\$784,892 (a)	\$2,453,228
1914.....	746,887	69,520	1,129,539	416,350 (b)	2,362,296

(a) Includes cash, \$776,854. (b) Includes cash, \$391,292.

	Liabilities					Total
	Capital Stock	Acct's Pay.	Accr'd Exp's	Divid. Pay.	Surplus

1914	250,000	190,522	18,998	300,000	1,602,776	2,362,296

Comparative Income Account:

	Income		Cost Production	Profit Net	Divid's	Surplus
	From Ore	Total				
1915	\$2,222,256	\$2,256,432	\$815,005	\$1,441,427	\$1,220,000	\$183,485
1914	2,516,065	2,558,733	971,112	1,587,621	1,235,000	343,715

Dividends paid to Jan. 1, 1916, total \$14,153,297.

Property: 8 claims, 846 acres at Cobalt, Ontario, Canada, has over 100 fissure veins, from ½" to 12" in width, occurring in Huronian conglomerate or Keewatin formation. The ore is silver with cobalt and arsenic.

Development: total work in 1915 amounted to 10,496' as compared with 12,148' in 1914. There are 10 working shafts on the property. The lowest

or No. 64 shaft, 1,003', is the lowest point yet attained in the Cobalt district. Extensive development in 1914 on vein 64, the largest vein on the Nipissing property, failed to disclose pay ore at depth and no further work was done on this vein in 1915. However, a crosscut is being driven N. from the second level to explore the large section of conglomerate lying between vein 64 and Bucke Township.

Shaft 63 develops the Little Silver veins, that produced steadily throughout the year. The main vein system is developed by shaft 73 and continues to be the largest producer. Vein No. 98, developed on the fourth level is 575' long. The conglomerate was proved to a depth of 150' below the fourth level and further development on vein 490 according to the management gives promise of opening up pay ore in commercial quantities. Vein 96, S. of the Little Silver vein, is developed by tunnel and winze. Ore on the tunnel level averaged 4,000 oz. for 95' in length and 1.5' in width.

Nipissing lot 402, north of O'Brien and east of Chambers-Ferland, is being explored by the O'Brien shaft and 500' of E. and W. crosscuts. The work so far has failed to disclose any favorable results.

The Cobalt Lake fault is being developed by shaft 81, down 485', May, 1916. The fault was encountered at 270', but contained no values.

Ore reserves: Jan. 1, 1916, 182,748 tons, assaying 48.8 oz. silver per ton, or 8,921,718 oz. in all.

The hydraulic plant, in operation from April 23 to Nov. 23, washed 111 acres lying E. of Cart Lake and S. of Peterson Lake. Results were disappointing.

Equipment: includes a high-grade mill, a low-grade 40-stamp mill, cyanide plant, air compressors, power house, hoists, tramway, etc. An experimental 4-unit plant, using the oil flotation process, has been built to treat the tailings. The low-grade mill ran 80.45% of the time and treated 77,183 tons, making an average extraction of 87.52%. Total cost per ton was \$3.913, about 7 cts. less than in 1914.

Recent Shipments:

	Ore Tons	Gross Oz. Silver	Gross Val. Silver, Cobalt, Nickel & Arsenic Paid For	Net Value Received
1916.....	191.9	*3,000,000	*\$2,039,800	*\$1,265,500
1915.....	434.2	4,623,958	2,422,791	2,381,463
1914.....	1,328.6	3,999,862	2,226,430	2,207,428
1913.....		4,844,169	2,945,335	2,920,714

*Estimated first half.

Total shipments to Jan. 1, 1916, were 28,276 tons ore, containing 41,209,238 oz. silver. Net value received, \$22,158,065. Operating costs in 1915, based on 77,904 tons ore milled were \$10.462 per ton, or \$.199 per oz. silver, compared with \$12.13 and \$.207, respectively in 1914, based on 80,037 tons ore milled. Company is largest and has best holdings of any of the Cobalt companies, but despite its large acreage the company has seen its best days.

NIPSIC MINING CO., LTD.

IDAHO

Office: 403 Columbia Bldg., Spokane, Wash. Inc. Feb. 28, 1908, in Wash. Cap., \$1,500,000; shares \$1 par. Property sold to the Cons. Interstate-Callahan Mining Co., for \$111,200. Sale confirmed at a meeting of the shareholders of the Nipissic Mining Co., June 24, 1916. Management states net returns to stockholders will be 7 to 8 cts. per share. Company dissolved Aug. 25, 1916.

NISI PRIUS CONSOLIDATED MINING CO.

COLORADO

Controlled through stock ownership by Iron Silver Mining Co. Geo.

O. Argall, treas. Leadville, Lake Co., Colo. Property worked by two sets of lessees in 1915. **Development:** work amounted to 1,607' in 1915, and production was 107 tons of ore, netting the company \$84. Surplus Dec. 31, 1915, was \$608.

NIXON NEVADA MINING CO.**NEVADA**

Office: 50 Congress St., Boston, Mass. Mine office: Reno, Nev. **Officers:** Chas. F. Daniels, pres.; W. E. Brown, treas., with Jas. J. Coughlan, Geo. H. Allen, John F. McDonald, Joel Beau, T. F. Gagen and R. J. Jefferson, mine supt., directors.

Inc. 1915, in Maine. **Cap.**, \$750,000; shares \$1 par; fully paid and non-assessable; 670,985 shares issued. Stock is listed on Boston Curb.

Property: 635 acres in Hartlesville Township, known as the Granite Hill mine, 14 miles N. W. of Reno and 50 acres at Big Mouth Canyon, 50 miles N. E. of Reno, Washoe Co., Nev. The Granite Hill group of 4 claims is traversed by 4 parallel veins within a distance of 900'. **Development:** by shafts, crosscuts and drifts. A vertical shaft on vein No. 1, 100' deep, Jan., 1916, is being sunk to 300' level, with drifts on the 55' level for 100' and in excess of 100' on the 100' level. A double compartment shaft, 185' deep, Jan., 1916, is being sunk on the vein, at a higher point than the vertical shaft. A third shaft being sunk on No. 4 vein, was down 25', Jan., 1916.

Ore reserves: estimated by management as 72,000 tons, Jan. 1, 1916.

Equipment: at the Granite Hill includes engine, hoist, pump, office, dwellings and mine buildings. Carload shipments from development work averaged 19.47% copper and \$12.13 gold and silver per ton.

1916 shipments: 75 tons in June aggregating about \$7,500. First class ore about $\frac{1}{3}$ of the total, carried 40% copper, \$13.80 per ton gold and 26 oz. silver per ton. Second class ore carried 10% copper, \$8.80 per ton gold and 6.96 oz. silver per ton.

Developments at the Big Mouth Canyon property consist of numerous open cuts and several hundred feet of tunneling. No production to date, but showings of gold have been reported, and it was said January, 1916, that platinum had been discovered in doing assessment work. Mine is two miles from railroad. The veins are strong, of fair width, and carry shoots of exceptionally high-grade ore. Mr. Victor C. Alderson, E. M., has endorsed the property. It is thought that the property will make a good and profitable mine.

It was announced early in 1916 that the company had been financed for active development work through 1916 and 1917.

NOBE TUNGSTEN MINE**NEVADA**

Owned and operated by Atkins, Kroll & Co., San Francisco, Calif. Is a tungsten property, 11 miles from Sodaville, Mineral Co., Nev. The ore is reduced to a 50% product by wet concentration in the Del Monte mill, at Borns siding, 5 miles E. of Luning. The mill has Frue vanners and Deister slime tables. Production during first half of 1916 estimated at 50 tons of concentrates, valued at \$6,000 per ton.

NONPAREIL CONSOLIDATED COPPER CO.**WASHINGTON**

Mine near Index, Wash. Company presumably dead. Described in Copper Handbook, Vol. XI.

NONPAREIL COPPER MINING CO.**IDAHO**

Office: Wallace, Idaho. Mine near Mullan, Shoshone Co., Idaho. Amos M. Stroud, pres. and gen. mgr.; Jas. A. Wayne, sec. **Inc.** in Idaho. **Cap.**, \$1,500,000.

Property: 4 full and 3 fractional claims, on the west fork of Willow creek, across from the Carney mine, 3 miles S. E. of Mullan. **Development:**

by 4 tunnels. Surface ores have given assays up to 1.5% copper, and 8 to 19 oz. silver per ton. Has not replied to requests for information.

NOONDAY MINES CO.**BRITISH COLUMBIA**

Bruce White, mgr., Sandon. **Property:** the Noonday mine, near Sandon, B. C., is developed by several tunnels, said to have opened up an orebody 2-5' wide, averaging \$20 per ton in lead-silver. **Equipment:** includes compressor and 6 drills. Small shipments were maintained during 1915-16 from development work. A promising prospect.

NORFOLK SMELTER**VIRGINIA**

See Virginia Smelting Co., West Norfolk, Va.

NORFOLK SMELTING CO.**VIRGINIA**

A New York corporation; operates under lease on a royalty basis, the smelting department of Virginia Smelting Co.'s works, which see.

NORMAN MINES CO.**WASHINGTON**

Office: Columbia Bldg., Spokane, Wash. **Mine office:** Northport, Wash. **Officers:** J. A. Zeigler, pres.; Dr. W. B. Pickrell, v. p.; O. C. Moore, sec.; Sidney Norman, treas.-mgr., with C. D. Muxen, directors. Peter Porter, mgr.; C. C. Knutson, supt.; H. W. Newton, assayer.

Inc. 1914. Cap., \$100,000; shares 10 cts. par; assessable after treasury stock is sold; 450,000 shares issued. Company reported a cash surplus of \$6,000, May, 1916.

Property: 5 claims, about 100 acres, including the Great Western and Empire claims, patented, and Last Chance, unpatented, held under lease and bond, 7 miles S. E. of Northport, Stevens Co., Wash. Claims show a shear zone of lead-zinc carbonate ore in altered limestone, said to average 30% zinc, 13% lead, 4.6% lime, 1.1% sulphur, 5.5% iron, 2% insoluble.

Development: mainly on the Great Western orebody; with strike N. E. and dip 50° N. W., reported to measure 200'x150'x5' in width. The Empire vein, 25' at surface, has not yet been found in the lower workings. The old workings in the Last Chance group have been timbered and development work is being carried on, 1916. The Great Western group is developed by 325' tunnel and winze sunk to 200'. Management plans driving crosscuts and drifts on the 100' and 200' levels and adding a compressor plant.

Equipment: consists of a 2,000' aerial tramway at the Last Chance and a 600' surface railroad. Twenty men employed. Shipments of zinc carbonate ore made to Kulsa Spelter Co., Dewar, Okla., and lead-zinc ore sent to the Ozark Zinc Co., Coffeyville, Kansas.

NORSEMEN EXPLORATION CO.**BRITISH COLUMBIA**

Office: 424 Second Ave. So. Minneapolis, Minn. **Mine office:** Cap-sheaf, Vananda, Texada Island, B. C. **Officers:** E. E. Rorem, pres.; W. H. Curtis, v. p.; C. A. McKenzie, sec.; Allen T. Rorem, treas.; B. F. Laffin, A. E. Barker and Eden Schmidt, directors. Robt. Forbes, cons. engr.; Jas. Forbes, Sr., supt. **Inc. in Arizona. Cap., \$500,000;** shares \$1 par; issued, \$375,000.

Property: 23 claims, 1,200 acres, 730 patented, on Texada Island, B. C., is heavily timbered and shows contact deposits between limestone, granite and diorite. Copper occurs as chalcopyrite and bornite, with gold and silver values. The Cap-sheaf claim has an 80' vertical shaft, said to show 10' of ore, carrying 14% copper and \$11 in gold in samples reported as taken from surface down to 59'. Ore expected by manager to average 4% copper and \$6 gold and silver. The Cameron claim adjoining the Texada Iron mine has an iron capping of magnetite with irregular streaks and patches of chalcopyrite thought by management to average 4% copper. The Aladdin claim carries silver-lead ore. Has a 212' vertical shaft, with

175' of crosscutting. The Aladdin, De Ore and Blizzard claims are leased to the Minnesota & Texada Copperite Co., Ltd., of Minn., which is now doing development work.

Company's property is about 3 miles long, convenient to tide water and only 20 miles from a smelter. Property regarded as promising.

NORTON; A. O.

Office: 286 Congress St., Boston, Mass. **Mine office:** Suffield, Sherbrooke Co., Quebec. **A. O. Norton**, owner and mgr.; **W. Jenkin**, mine supt. **Property:** 600 acres, freehold, except 150 acres, title to which covers only mining rights, includes the Suffield, King, Silver Star and Marrington mines, in Ascot township, 7 miles from Sherbrooke, with railroads within 2 miles on either side.

The mines show 3 lenses, of 3 to 20' width, 1 proven to depth of 400', estimated by owner to average 4 to 5% copper, from a trace to 10% zinc, 5 to 25 oz. silver, and \$1.50 gold per ton. The King mine has a 165' incline shaft with about 500' of workings. The Suffield mine has a 245' shaft with about 1,200' of workings, showing ore with an average of about 4%, and combined gold and silver values of \$2 to \$12 per ton, with about 25% sulphur. The Marrington mine, 100 acres, 1½ miles from the Suffield, and about 1 mile from Capelton, is opened by a 260' shaft with about 400' of drifts, developing a lens about 75' wide at surface, said to carry at depth 5 to 7' of good ore. Little development work has been done since Aug., 1914, and no shipments have been made from the property.

Equipment: includes a steam plant, 100-h. p. boiler, a 50-h. p. double cylinder steam hoist and a straight-line air compressor. Property considered promising.

NORTH AMERICAN MINING CO., LTD.

Wallace, Idaho. Officers: John Presley, pres.-mgr.; L. B. Whitton, sec.-treas., with A. Schmit and B. Knutson, directors. **Cap.**, \$1,500,000; shares \$1 par.

Property: 880 acres, in Coeur d'Alene district, Shoshone Co., Idaho, adjoining the Bunker Hill & Sullivan, and believed to carry the continuation of the B. H. & S. main fissure. Developed by two tunnels and equipped with water power, compressor, drills, and surface buildings. Company is trying to raise necessary funds to continue the main tunnel another 1,200' by means of spectacular advertisements written by an "advertising agent."

NORTH AMERICAN ZINC CO.

Officers: Dr. J. W. Boyd, pres., Sarcoux, Mo.; Geo. Saunders, sec.-treas., with M. C. Goodwin, J. B. Gorman, directors. Operates a lease on 40 acres of mineral land at Wentworth, Newton Co., Mo., said to show a 30' deposit of zinc ore at 100'. Developed by 3 shafts to depth of 114'. **Equipment:** includes electric power, 250-ton mill, office and change room.

NORTH BINGHAM CONSOLIDATED MINING CO.

Office: Provo, Utah. **Mine near Bingham Canyon, Salt Lake Co., Utah.** Jesse Knight, pres.; Wm. W. Mathews, v. p.; W. Lester Mangum, sec.-treas., and J. Wm. Knight, directors. **Inc. June, 1907, in Utah. Cap.**, \$100,000; shares 10 cts. par; assessable; levied a one-half ct. assessment, 1910. Is controlled, through stock ownership, by the Knight Investment Co.

Property: 6 claims, in Barney Canyon, has a very wide ore zone, said to show leached ore carrying traces of copper and up to \$2.80 gold per ton. **Development:** includes a tunnel of about 1,000', and a 2-compartment shaft. Property is considered a good development proposition. Idle.

NORTH BUTTE EXTENSION DEVELOPMENT CO.

Office: 25 Broad St., New York. **Mine office:** O'Rourke Estate Bldg.

Butte, Mont. **Officers:** H. G. Bell, pres.; A. J. Ronaghan, sec., with I. A. Heilbronner, N. Bruce MacKelvie, Elbridge L. Adams, David Angus and C. W. Peters, directors. Inc. Oct. 10, 1908, in Maine. **Cap.**, \$1,500,000; shares \$1 par; issued, \$1,349,036. Is a reconstruction of the North Butte Extension Copper Mng. Co., which was a reorganization of the North Butte Extension Mng. Co. A controlling stock interest of \$800,000 was sold, March, 1910, to the Butte & Superior Mng. Co. Annual meeting in September.

Suit was instituted by the Butte & Superior interests against the promoters of the North Butte Extension Development Co. to recover shares of stock claimed to have been illegally issued and a proposal to return 50,000 shares was made and accepted by the company.

Apparently the company's only present property is the Overman claim, the Black Crow fractional claim of 2½ acres and the Clipper and Assay mill sites. **Development:** by a 700' shaft, planned to be deepened to 1,000'.

Most of the ground on which the various North Butte Extension companies were organized was held only under options which were forfeited. The Occidental claim was developed by a long crosscut from the Butte & Superior shaft, but nothing of importance was found and after payments of \$90,000 the claim was abandoned. Much of the original ground held by the company is now owned by the Rainbow Development and Butte & Superior companies.

According to the contract with the Butte & Superior, the latter company is driving a crosscut on the 1,200' level through the Four Johns claim and through the entire length of the Overman claim belonging to the North Butte Extension Co. The report issued by the company, March, 1916, stated that the development work being done by the Butte & Superior was expected to be finished during the first half of 1916. It has been reported that no ore of commercial value has as yet been encountered.

NORTH BUTTE MINING CO.

MONTANA

Office: 1400 Alworth Bldg., Duluth, Minn. **Mine office:** Norman Braley, gen. mgr., Butte, Mont. **Officers:** Thomas F. Cole, pres.; Charles A. Duncan, v. p.; Joseph B. Cotton, v. p. and gen. solicitor; preceding with W. J. Olcott, J. U. Sebenius, C. A. Congdon, G. A. Tomlinson, Chas. d'Autremont, Jr., John H. McLean, directors. Frederick R. Kennedy, sec.-treas.; Henry B. Paull, auditor. American Trust Co., Boston, Mass., transfer agent; Old Colony Trust Co., Boston, registrar. Stock listed on Boston Stock Exchange.

Inc. April 5, 1905, in Minnesota. **Cap.**, \$9,000,000; shares \$15 par; issued, \$6,450,000.

Comparative General Balance Sheet:

Assets	Property	Gr. Mt. Shaft	Invest.	Metal On Hand	Other Current	Total
1915.....	\$8,968,265	\$256,945	\$9,600	\$1,569,643	\$259,032	\$11,063,485
1914.....	8,921,783	228,239	9,600	1,074,819	88,357	10,322,798
Liabilities	Capital Stock	Current	Surplus Reserve	Total		
1915.....	\$6,450,000	\$731,067	\$3,882,418	\$11,063,485		
1914.....	6,450,000	731,027	3,141,771	10,322,798		

Comparative Income Account:

	Revenue	Operating Expenses	Net Income	Dividends	Surplus	Total Surplus
1915	\$4,155,522	\$3,027,875	\$1,127,646	\$387,000	\$740,646	\$3,882,417
1914	3,084,774	2,726,559	358,215	635,000 (D)	276,785	3,141,771
1913	5,182,674	3,744,897	1,437,777	820,000	617,777	3,418,556

(D) Deficit.

Dividends (paid quarterly): \$1.25 in 1905; \$7.25 in 1906; \$6 in 1907; \$3 in 1908; \$4 in 1909; \$1.10 in 1910; \$1.20 in 1911; \$1.70 in 1912; \$2 in 1913; \$1.50 in 1914; \$1.40 in 1915; \$1.75 to Aug. 1, 1916.

To give holdings more regular outline exchanges have been made between the North Butte and Anaconda companies, the Anaconda securing fractional interests in the Emily claim, adjoining the Berlin claim on the west, for cash, and concessions regarding the Edith May vein, preventing future controversy over the western extension of that vein. The North Butte secured a five-sixths interest in the Sioux Chief claim, giving up a small portion of the western end of the Gem and a part of the Adirondack claim.

Litigation with the Tuolumne Copper Mining Co. was settled Nov., 1910, the North Butte obtaining absolute ownership of the disputed part of the Jessie vein, and the Tuolumne obtaining absolute ownership of the ground formerly owned jointly on which the North Tuolumne vein apexed. The Tuolumne thus gained the eastern 412' of the Jessie vein, below the 400' level, while the North Butte secured title to the vein in the eastern 412' above the 400' level, as well as confirmation of its title to all of the Jessie vein lying west of the 412' tract, through the remainder of the Jessie claim, a distance of about 1,100'.

Property: on Butte Hill consists of the following claims—Edith May, Copper Dream, Miners Union, Jessie, Hancock, Ground Hog, Paul, Croesus, Snowball, Lynchburg, John Emmitt, Henry, Berlin, Leaf, Gustavus, Eva, Margaretha, Carlile, Jake, Midget, Protection, Kink Fraction, with fractional portions and undivided interests in the following claims: Speculator, Adirondack, Sioux Chief, East Gem, West Gem, Free Trade, Lone Star, Lillie May, Occidental, Granite Mountain, Sunset. The last named was acquired in 1912, during which year options and partial payments were made on a number of additional mining claims in the Butte district. A one-half interest in the Granite Mountain claim was acquired from the Lewisohns, the company to sink at its own cost the existing 500' shaft to a depth of 2,000' with connection on the 200' level. Title to the shaft remains with the North Butte.

East Side Holdings: in 1912-13 title was obtained to 50 lode claims, 525 acres, and fractional parts of 17 other claims, 214 acres, in the Butte East Side mineral area, 2 miles east of Anaconda Hill, between the bed of Silver Bow Creek and the Continental Divide, and adjacent to the A. C. M. Co.'s Tropic mine and the Pittsmtont mine of the East Butte C. M. Co. In 1914 this area was increased by the entire interests in 2 lode claims and fractional parts of 4 other claims. This large area in the East Side was obtained to provide for future mining operations of the company. In payment of land purchased in 1912-13 the company paid over \$850,000 cash and 20,000 shares of stock.

The Speculator group, or Butte Hill property is traversed by a number of fault veins, mostly belonging to the Blue vein series. These veins carry high-grade ores in shoots, which have thus far been remarkably persistent in depth. The ores carry much primary chalcocite, frequently massive, with considerable quantities of enargite and smaller proportions of other sulphides. All ores carry silver and lesser gold values. The veins are "heavy," requiring close attention and timbering with square sets, monthly timber used being about 1,000,000' board measure. No waste is hoisted, all being used for dry-filling. Waste is largely low-grade ore, a portion of which may be available for smelting at some future date and which can be extracted easily.

The exploration of the vein system has shown the necessity of thor-

ough drifting along the veins at considerable depth and development on the 2,200 to 3,000' levels has opened up profitable orebodies.

The principal ore supply comes from the following veins, named in their order of occurrence from the south boundary of the mine northward: Speculator, Edith May, Hancock, Jessie, Gem, South Croesus, North Croesus, Snowball, Berlin. Of these 9 veins, the Speculator, South Croesus and Snowball belong to the older vein system, the Hancock possibly so, and the others are well known members of the Blue vein, or Northwest fault vein series. The Edith May and the Jessie vein were the principal ore producers of the North Butte in the early operations of the company.

The Edith May is 18 to 42' in width above the 2,600' level, opened at 200' intervals from the 800' level downward. Below the 2,600' level the width of ore in the vein is 8 to 12. The vein was of little value until the 1,200' level was reached, after which there was a marked improvement, culminating in the 1,800' level, which developed a vein up to 42' wide, carrying a phenomenally high-grade ore, many of its stopes being practically all first-class ore for a distance of about 1,000' along the floor. The 2,000' level showed a slight decrease in average value, as well as in the length of the ore shoot, while on the 2,200' level the ore was of much lower grade and payable for only 300' in length as against a length of 1,000' on the 1,800' level.

Work on the 2,400' level has disclosed a 6' footwall band of 4.25% ore for 525'. Besides this the vein has a fine hanging-wall orebody which, on the 2,600' and 2,800' levels, shows 4½' of 4 to 4.5% ore for several hundred feet. On the 3,000' level the hanging-wall side of the vein is 2' to 2½' in width, containing 5 to 6% copper. The footwall side is about 3½' in width, assaying about 3.7% copper. The Edith May vein divides east of the shaft, showing no commercial ore in the south branch, but these branches unite some distance west of the shaft. On the 2,000' and 2,200' levels there are 2 fault planes, defining the limits of the better grade of ore, these faults diverging in their downward course.

The Jessie vein ranks next to the Edith May in production and promise. Where opened on the 700' level in the Gem crosscut, the Jessie showed a vein of about 10' width with bunches of 6% ore. The ore shoot found on the 1,200' and 2,200' level was high grade, 8' wide and nearly 1,000' long, changing in character below this depth and showing considerable sphalerite in the drifts to the west. On the 2,200' level, the vein is about 12' wide, showing some ore up to 5% in copper tenor, but averaging materially lower than the ore in the workings above. The west drift on the 2,000' level opened a 150' ore shoot, 6' wide, carrying 6% copper and 7.5 oz. silver. The 2,200' level shows low-grade ore only. The 2,600' drift west showed 4' of 3.5% ore displaced by a fault 15' from the crosscut and not yet recovered, while 300' of drifting east disclosed small bunches of high-grade ore. On the 2,800' level, vein where cut by a crosscut from the Granite Mt. shaft showed a total width of 6', with 3' high-grade ore assaying 11% copper and 10 oz. silver per ton.

The Croesus vein, called the North Croesus, is opened by drifts on the 1,800', 2,000', 2,200', 2,400' and 2,600' levels, developing a large and important orebody between the 1,600' and 2,000' levels. On the 1,800' level, the ore shoot is 8½' wide and averages 8 oz. silver per ton; on the 2,000' level the shoot is 300' long, averaging 10' thick of 3% copper and 6 oz. silver; the shoot is not yet cut on the 2,200' level, but on the 2,400' another ore shoot, 300' east of the one just noted, shows 2' of 3% ore with 7 oz. silver per ton; on the 2,600' level it has been opened by short drifts which show 3' of 4% copper ore.

The South Croesus vein has been mined from the 1,600' down to the 2,400' level, with the best showing on the 2,200' level. It has carried from 3 to 4' of ore in shoots, the longest being 270', averaging 5.5% copper and 5.5 oz. silver. On the 2,400' level east a 3' body of ore has been drifted on for 200', average grade 2.5%. On the 2,600' level west vein shows only low-grade pyrite.

The Gem vein showed no ore of commercial importance above the 1,600' level, and the 1,800' level had about 6' of 4.5% ore. It is developed to a small extent on the 18th, 20th, 26th and 28th levels, both value and width increasing with depth, the 2,800' level showing 12' of 5.3% ore carrying 2.2 oz. silver per ton. The vein is irregular in size and grade and where developed has been broken by cross faults.

The Adirondack vein, like the Gem, shows no commercial ore above the 1,600' level, but shows an ore shoot 60' long on the 1,800', 160' on the 2,200' and 300' long on the 2,400' level, widening proportionately. On the 2,400' level the orebody is 12' wide, 300' long and assays 5.25% copper and 3 oz. silver; on the 2,600' level the crosscut shows 7' of 3.5% ore and the drift shows 4' of 3% ore.

The Snowball vein has characteristically high silver values. It was first cut on the 18th level in 1910 and has been proven to carry several splendid orebodies by development work of recent years. On the 1,800' level it had 1¼' of 4% ore with 4 oz. silver for 100'; 2½' to 5' of 3% ore with 5½ oz. silver for 800' on the 2,000' level; 5' of 8% copper and 6 oz. silver ore for 740' on the 2,200' level, and 4½' of 5% copper and 7½ oz. silver ore for 750' on the 2,400' level east. Same shoot shows 175' of 3½% copper ore with width of 3' on 2,600' level. Reported in May, 1916, that a crosscut in new ground north of the Snowball vein, driven from the 22nd level of the Granite Mt. shaft, had cut 4½' of ore assaying 10% copper and 8 oz. silver per ton.

Development: is very extensive, aggregating many miles of workings. New development for 1915 amounted to 15,333' compared with 11,551' in 1914. The Granite shaft, since its completion to the 3,000' level, has been one of the 2 working shafts; sinking is to continue to the 3,600' level. A new electric hoist was put in operation May, 1915. It is the largest electrically-driven hoist in America, designed to handle 200 tons per hour from a 4,000' depth.

The Speculator, the other operating shaft, has been deepened to 2,800' with levels at 200' intervals, from and below the 1,400' point, developing all the veins worked in the mine. The Speculator shaft has a 128' steel head-gear standing on a 41x60' concrete foundation, equipped with self-dumping skips and pockets, with daily capacity of 1,500 tons of ore, no waste being hoisted, as it is used for underground filling.

The 500' Jessie, 700' Gem and 500' Adirondack shafts are idle and of no present value. The Granite Mountain shaft is connected with the main workings on practically all levels. Underground haulage is done with electric motors on the 1,800 to 2,800' levels.

Equipment: the main machinery plant and buildings are at the Speculator shaft. The engine house has a 20-ton traveling crane, and a 32x72" Nordberg Corliss duplex-cylinder hoist, operating 2 cages in counterbalance, with two 8-ton Kimberly skips swung under, and good for depth of 3,500'. An 18x36" duplex cylinder auxiliary hoist operates a double-deck cage, in a third compartment, for handling men, material and timber, and the shaft has a fourth compartment for ladders and pipes.

The compressor house has an air compressor with piston efficiency of 3,482' of free air per minute, reduced to a pressure of 70 lbs. per sq. inch,

capable of operating 40 to 50 rock drills; also a 4,000 cu. ft. compressor. The boiler house has two 500-h. p. and five 100-h. p. boilers. Miscellaneous buildings include a machine shop, smithy, carpenter shop, planing mill and a plate shop for repairing skips.

Employed an average of 720 men in 1915. The North Butte ore is smelted by the Washoe works of the Anaconda under a contract by which the company pays the smelter charges to the Anaconda Co. and the copper is turned over to the North Butte Co. and sold by its own agents, effecting a saving of \$150,000 or more a year.

Production:	Ore Tons	Copper Lbs.	Silver Oz.	Gold Oz.	Copper per Lb. Net Cost.	Sell. Pr.
1916 (a).....	255,040	11,814,193	*244,976	*365
1915.....	378,161	19,235,285	940,632	1,122	13.12c	16.70c
1914.....	337,372	18,421,761	1,092,300	1,107	11.50c	13.74c

(a) First half. * First quarter.

The North Butte had a spectacular rise as a heavy copper producer and a dividend paying mine of the first rank, and had an almost equally spectacular drop, due partially to the blighting effects of the 1907 panic, and also to the decrease in values in the Edith May vein, shortly after the panic.

Results in 1915 and early 1916 are disappointing. With copper averaging 3 cents higher in 1915 than in 1913, earnings were less in 1915, and production was much less. This was probably due to the grade of ore which has dropped from 61 lbs. copper per ton 5 years ago to 52 lbs., and to the net cost of production which has increased approximately 30% during the 5-year period.

Recovery for 1915 averaged 52 lbs. per ton, on an output of 495,275 tons, but for the first three months of 1916 was only 45 lbs. A report to the County Assessor for the year ending June 1, 1916, showed net profits of only \$1,229,339, or \$2.86 per share, and the cost per pound copper produced was about 13½c.

The company is mining much low-grade ore, which could not be profitably handled with lower copper prices, and it is evident that rigid economy would have to be exercised if the company had to operate with a 12c market.

Though it is currently reported about Butte that the present mines are near exhaustion, and the bonanza days are over, it is believed the mines can earn a profit for some years to come. The very moderate profits of 1916 should be conserved and used to develop and equip the East Side tract, which is expected to make a larger producer than the one now worked.

NORTH DOME MINING CO.

ONTARIO

Owned by Temiskaming Mining Co., Ltd., which see.

NORTH FORK MINING CO.

CALIFORNIA

Office: 405 Crocker Bldg., San Francisco, Calif. Mine office: Forest, Sierra Co., Calif. Geo. W. Stone, gen. mgr. Property: the North Fork mine, in Alleghany district, near Forest, shows a 2' quartz vein carrying arsenical sulphides and free gold. Developed by 1,000' crosscut in amphibolite, and a 200' incline shaft. Plan erecting 5-stamp mill and sinking shaft to 400' in 1916.

NORTH HOMESTAKE MINING CO.

SOUTH DAKOTA

Address: A. Maitland, Negaunee, Michigan, pres. and controlling owner; A. F. Maitland, v. p.; T. C. Jates, sec.; Jos. Fountain, supt. Inc.

in South Dakota. **Cap.**, \$6,000,000; shares \$5 par; 1,000,370 shares outstanding.

Property: 77 patented claims, 1,100 acres at Maitland, Lawrence Co., South Dakota, shows veins of quartz and sulphide ore, carrying gold and silver values. **Development:** by 750' vertical shaft and 600' drift on the 600' level with crosscuts E. and W. for 200' and 100', respectively.

Equipment: includes 125-ton cyanide mill, electric power, 4 electric pumps, 2 compressors and hoist. Mine is credited with a production of \$1,500,000 under former management. Development work carried on intermittently during past 5 years has so far failed to disclose new orebodies of commercial grade.

NORTH LAKE MINING CO.

MICHIGAN

Office: 60 Congress St., Boston, Mass. **Operating office:** Sheldon Bldg., Houghton, Mich. **Officers:** R. M. Edwards, pres. and gen. mgr.; Arthur C. Paine, v. p.; Henry Tolman, treas.; A. L. Wyman, sec.; with H. D. Forbes, S. L. Powers, directors. **Inc.** Aug. 26, 1908, in Michigan. **Cap.**, \$2,500,000; shares \$25 par; fully issued; \$9 paid in.

- Company paid \$144,000 for 360 acres of land, bought of St. Mary's Mineral Land Co., one-half in cash and one-half in 9,000 shares of stock at \$8, beginning business with \$300,000 cash in the treasury. The company suffered heavily by the failure of S. R. Dow & Co., Sept., 1912, losing \$160,188 in cash and interest unlawfully borrowed by its former president, S. R. Dow, and at the end of 1912 was \$19,000 in debt. This indebtedness was wiped out by an assessment of \$1 per share, levied April 18, 1913. Federal Trust Co., Boston, registrar; American Trust Co., Boston, transfer agent. Shares are listed on the Boston Stock Exchange. Annual meeting, third Thursday in April.

Annual report for 1915 shows total receipts of \$22,670 and expenses \$38,226, leaving a deficit \$15,556. Cash on hand, \$8,370; accounts payable, \$7,721. An assessment of \$1 per share, payable June 14, 1916, has been underwritten, thus making available \$100,000 for development work.

Property: 1,120 acres, in Secs. 28, 29, 32 and 33, T. 51 N., R. 37 W., lying immediately north and east of the Lake Copper Co. Property was supposed to carry about 7,000' of the strike of the Lake amygdaloidal bed, but apparently the Lake bed curves to the westward, rather than to the east. Property also carries the copper-bearing series of the Evergreen belt of amygdaloidal beds, and various other unidentified cupriferous strata. The company's lands are crossed by the Fire Steel river, and are traversed by both the Mineral Range and Copper Range railways.

Exploratory work has been planned thoroughly and systematically, the preliminary work consisting of diamond drilling to give 2 complete cross-sections, of about 8,500 and 9,500', respectively, to determine the strike and dip of all the strata on the property. These sections are about 1,000' apart, and the contact of the Keweenawan series with the eastern sandstone has been definitely located by drilling. Numerous drill holes have been bored, with depths ranging from 200' to more than 2,000'.

Diamond drilling was begun 1909, and ended 1911, with the No. 15 hole. Several cupriferous amygdaloidal beds were disclosed, and 2, underlying Nos. 6 and 8 conglomerates, have been correlated as extensions of Nos. 1 and 2 of the Adventure series of lodes. No. 1 bed, of about 33' width, showed 10' fairly charged with copper and No. 2 bed was lean. The formations above No. 8 conglomerate bed are practically unexplored, and excepting the work done in holes Nos. 3 and 7 remain entirely untouched. The results obtained from holes 3, 7 and 13, below this conglomerate bed, were very promising and a vertical shaft was therefore started July, 1913, in the

vicinity of No. 3. At a depth of 300' a crosscut to the N. W. was started. This cut through No. 8 conglomerate at 210' from the shaft. At 730' the crosscut broke through into overburden. A 200' winze, 30° incline, was sunk and 100' gained in depth. On the 400' level exploratory work for the lodes developed on South Lake property was continued, but with little success in finding commercial rock. At a distance of 1,050' N. W. of the shaft the crosscut broke through into the overburden. In the summer of 1915 shaft sinking was resumed, and by June, 1916, had been bottomed on the 800' level.

Equipment: includes a Nordberg hoist good for depth of 1,200', a small air compressor, boarding house and other necessary mine buildings.

The North Lake is an exploration company, but in view of the encouraging results secured by diamond-drill borings on this and adjoining properties, is considered promising and the present management is good.

NORTH LARAMIE PEAK COPPER MINING CO. WYOMING

Office: Esterbrook, Wyo. **Mine office:** Douglas, Converse Co., Wyo. H. C. Saul, pres.; L. V. Saul, sec.; W. A. Saul, treas. **Inc.** 1908 in Wyoming. **Cap.,** \$2,000,000; shares \$1 par; fully paid and nonassessable; 500,000 shares in treasury.

Property: 29 claims, 440 acres, patented, in the North Laramie Peak district. Claims show pre-Cambrian schists bordering granite contacts, on which 1,000' of diamond-drill work has proven existence of a flat body of disseminated chalcopryrite ore 40' wide. A shaft has been sunk 100' on a chimney of chalcopryrite ore said to assay 27% copper, 6 oz. silver and \$2 gold, for a total width of 5'. A second shaft, also in ore, will be deepened to 200'.

Equipment: includes 80-h. p. boiler with hoist, Cameron pump, steam power and a 3-drill compressor. Expects to start shipments in 1916. Is a close corporation, entirely owned and financed by Messrs. Saul.

NORTH MIDAS COPPER CO. ALASKA

Office: 50 Congress St., Boston, Mass. **Mine office:** Strelna, Alaska. **Officers:** Geo. Hale Brabrook, pres.; Allen T. Nye, Jr., v. p.; J. F. Crane, sec.-treas.; with A. W. Neal, Geo. M. Wheeler and O. J. Berg, directors. **Inc.** 1916 in Maine. **Cap.,** \$1,500,000; shares \$1 par. * Stock listed on Boston Curb. Old South Trust Co., Boston, registrar and transfer agents.

Property: in Kotsina-Chitina region, 15 miles from Strelna, on the Copper River and N. W. R. R., adjoins the holdings of the Alaska Cons. C. Co. Developed by 3 adits, totaling 1,600' in length, which have so far failed to disclose ore. A prospect.

NORTH MOUNTAIN MINING CO. NEVADA

Controlled by John Dern, Box 1,418, Salt Lake City, Utah. **Property:** 11 patented claims in Gold Canyon district, near Cherry Creek, White Pine Co., Nev. Idle many years.

NORTH PINAL MINING CO. ARIZONA

C. W. Cisncey, pres., 228 E. Jefferson St., Phoenix, Ariz. **Property:** formerly held by La Coronado Development Co., is in the Mineral Hill district, 10 miles from Price, Pinal Co., Ariz. **Development:** by a 300' shaft, shows a lens of copper ore at depth of 260' in the shaft, said to carry up to 70% copper. Ore is mainly bornite. **Equipment:** includes a 25-h. p. gasoline hoist and an air compressor.

NORTH STAR MINES CO. CALIFORNIA

Offices: 22 William St., New York; 15 Exchange Pl., Jersey City, N. J.; Grass Valley, Calif. **Officers:** Geo. B. Agnew, pres.; Sidney M. Colgate, v. p.; with Jas. Douglas, Wm. Hague and Wm. Church Osborn, directors; W. D. Pagan, sec.-treas.; A. B. Foote, gen. supt.

Inc. April 10, 1899, in New Jersey. Cap., \$5,000,000; shares \$10 par; \$2,500,000 outstanding. Stock is listed on Boston and San Francisco Exchanges. New York office and Old Colony Trust Co., Boston, transfer agents. Central Trust Co., New York, registrar. Annual meeting, second Wednesday in April.

Liabilities:		Capital Stock	Balance Dec. 31		Total
1915.....		\$2,500,000	\$1,008,808		\$3,508,808

Dividends: 2% in 1899; 5% in 1903; 6% in 1904; 8% in 1905; 10% in 1906 and 1907; 15% in 1908; 23% in 1909 and 1910; 17% in 1911; 12% in 1912 and 1913; 18% in 1914; 10% in 1915.

Property: the North Star mine, 1½ miles S. of Grass Valley, and the Champion mine, at Nevada City, Nevada Co., Calif.

The North Star, the main producer of the group, was discovered 1851 and operated continuously to date, with exception of 10 years, 1874-1884, first by the original locators and later by the North Star Quartz, the North Star Gold Mining Co., and the North Star Mining Co. The ore carries gold and silver in a quartz gangue, the precious metals occurring free or associated with pyrite, galena and sphalerite. The veins have a maximum width of 5', with ore shoots averaging 400 to 600' long and proven for 2,000' in depth.

Development: in 1915 amounted to 9,988', done on and above the 3,400' west level with favorable results. The extension of the east drifts on the 5,600' and 6,000' levels has thus far failed to locate the orebodies worked on the 5,000' and 5,300' level.

A promising new vein, intersected at 6,225', is under development at the 6,300' level in 1916. The discovery of this vein in 1915 led to an apex-suit brought by the Empire M. & Improvement Co., which claimed that the vein belonged to the Pennsylvania W. Y. O. D. vein system and asking for an injunction to restrain further alleged illegal extraction of ore. A counter-suit was brought by the North Star Co. asking \$15,000 damages for ore alleged to have been wrongfully mined by the Empire Co. The dispute was settled out of court in 1916 by an agreement giving each company practically an equal share of territory traversed by the vein in question.

The **Champion** mine, at Nevada City, is developed by the Providence shaft, 1,926' deep, with a total of 5,529' of underground work done in 1915. Nothing of importance was discovered and management plans development below the 2,400' in 1916. Operations at the Champion property resulted in a total operating deficit of \$143,384. **Equipment:** includes Laidlaw-Dun-Gordon air compressor, duplex hoist, electrically-driven tramway, 80 rock drills.

Milling Plants: company operates 3 mills, the North Star and Central

at Grass Valley and the Champion at Nevada City. The North Star and Central mills have 40-stamps of 1,050 lbs. each. The ore is hoisted from the Central shaft in automatic-dump skips to the bins and hauled in side-dump cars to the mill. It is dumped into 2 bins, each of 200 tons capacity, fitted with 1½" grizzlies, the oversize going to a 9" x 15" Blake crusher set with 1½". The crushers are run wet, discharging to the portion of the bin beneath the grizzly. The ore is fed to the crushers through a steel chute, fitted with vertical grizzly bars, which can be dropped to check the flow of ore, allowing the waste rock to be rejected, without going through the crushers.

The stamps are driven as 4 batteries by a 100-h. p. motor. From the batteries the pulp flows over eight 3'x20' amalgamation plates; the recovery by amalgamation is about 79%. The tailings from the plates go to 9 Dodd buddles, 8' in diam., making concentrates, middlings and tailings. The concentrates from the buddles go to a 2½" centrifugal pump, which elevates them to a 24" dewatering cone; the underflow of this cone goes to a 5'x10' tube mill driven by a 20-h. p. motor, is run over a 3'x6' amal. plate and thence to a 24" cone. The overflow goes to the cyanide plant, where it passes through 4 Merrill classifiers, Dorr thickeners, sand-vats (100-ton each), slime agitators, Oliver filters and Merrill presses. The average grade of ore milled is \$10 per ton, extraction is at the rate of \$10, and total operating costs are \$0.936.

Production: of the North Star mine in 1915 was 109,860 tons of ore, mainly from stopes above the 3,400, 4,000 and 4,400' levels, yielding \$9.92 per ton crushed, at a total cost of \$5.74 per ton. Of the total production about 80.37% was obtained in the mills by amalgamation and 19.63% by cyanidation. Management estimates that 97.4% of the total gold and silver values was recovered. Four hundred men employed.

NORTH THOMPSON (ASSOCIATED) GOLD MINES, LTD.

ONTARIO

Is a subsidiary of Associated Gold Mines of Western Australia. **Offices:** 20 Copthall Ave., London, E. C., England, and 310 Dominion Express Bldg., Montreal. Capt. H. B. Hooper, chairman; Dr. J. M. Bell, managing director; with Ed. Hooper, E. F. McCarthy, Herman Landau, F. H. Hamilton, A. H. Collier, B. Brookman, directors; R. Davidson, London, sec.

Inc. Nov. 26, 1914. Registered in London, Feb., 1915. **Cap.** £200,000; shares £1 par; 101,750 shares outstanding.

Property: the North Thompson mine, 40 acres, between the Vipond and Porcupine Crown mines, on the S. W. ¼ of S. ½ of lot 10, in Tisdale Twp., Cobalt, Ont. Mine has several lenticular veins of quartz, schist and iron pyrite, said to be 2½' wide and to show good gold values.

Development: by 300' 3-compartment shaft with about 400' of cross-cutting and drifting. The ground is also being prospected by diamond drilling. **Equipment:** includes air compressor, hoist, one 60-h. p. and one 40-h. p. boiler, power house, blacksmith shop and office buildings. Employs about 25 men.

NORTHERN CUSTOMS CONCENTRATOR, LTD.

ONTARIO

Office: Traders Bank Bldg., Toronto, Ont. A. J. Young, pres.; M. F. Fairlie, supt.; F. J. Bourne, cons. engr. Operates a 200-ton, 80-stamp concentrating mill north of the La Rose mine, at Cobalt, Ont.

NORTHERN LIGHT COPPER CO.

NEVADA

Yerington, Lyon Co., Nev. **Property:** 6 claims, 20 miles east of Yerington, said to have produced some 16.4% copper ore. No recent returns secured.

NORTHERN LIGHT DEVELOPMENT MINING CO. ALASKA

Latouche, Latouche Island, Alaska. Inc. about 1909 in Washington. Cap., \$1,000,000; shares \$1 par. Lands: 6 claims, on an island in Prince William Sound, opposite Latouche island, slightly developed by tunnels and by a blind shaft, sunk from a crosscut, showing 6' of auriferous and argenterous chalcopyrite. A 250' tunnel driven in 1914 said to show a 2' vein. No returns secured.

NORTHERN LIGHT MINING & MILLING CO. IDAHO

Office: Wallace, Idaho. Mine office: Kellogg, Shoshone Co., Idaho. Officers: John H. Nordquist pres.; Rush J. White, v. p.; Leroy Hooper, sec.-treas.; Benj. G. Harmon, gen. mgr.; with B. N. Barnett, directors. Sidney E. Harmon, supt.

Inc. Jan., 1915, in Idaho. Cap., 1,500,000 shares; 5 cts. par; assessable; first assessment of 4 mills levied Aug. 25, 1915; 576,000 shares outstanding. Annual meeting, May 10, at Wallace. Management reports \$8,000 expended on development work since June 1, 1915, and \$8,000 cash on hand, Dec., 1915.

Property: 5 claims, surveyed for patent, 50 acres, on Pine Creek, Coeur d'Alene district, about 5 miles W. of Kellogg. Mine has ore shoots 100' x 200' x 6' in width, in quartzite, running N. 70° W., with dip 65° S. Ore is sulphide, said to average 7% lead, 2.5 oz. silver, with some zinc.

Development: by 500' tunnel and 200' vertical shaft being sunk to 400' level. Equipment: includes air hoist, Ingersoll-Rand compressor, electric power, Gould triplex and Cameron pumps.

Management estimated reserves of 12,000 tons, Jan. 1, 1916. Systematic development work planned for 1916.

NORTHERN ORE CO. NEW YORK

Edwards, St. Lawrence Co., N. Y. Officers: T. I. Crane, pres.; W. S. Pilling, treas.; Justice Grugan, mgr. Inc. in New York and operated as a close corporation.

Property: 650 acres, extending over 12 miles in a N. E. direction from Fowler to Edwards, lies within a talc-zinc belt, showing highly metamorphosed pre-Cambrian crystalline rocks. Mine has limestone and serpentine formation with veins, 6" to 14' wide, of sphalerite and pyrite, striking N. E. and dipping 40-50° N. W.

Development: to depth of 500' by 2 vertical shafts and diamond drill holes. Equipment: includes steam and electric power, machine shop, power house and office building. The 150-ton concentrating mill started operations 1915. Ore is delivered from the mine over a trestle to the ore bins, where it is fed automatically to the rock crusher below. From the crusher the ore passes to rolls and jigs, and finally to James concentrating tables. Wet magnetic separators effect the separation of the zinc and iron sulphides.

Production: mill treated 12,000 tons of ore during 1915. Present shipments of pyrite concentrate are at the rate of 45 tons daily.

NORTHERN PYRITES CO. ONTARIO

Office: 25 Broad St., New York. Robt. K. Painter, gen. mgr.; H. V. Smythe, supt. Is a subsidiary of the General Chemical Co.

Property: the Northern Pyrites mine on Vermillion Lake at North Pines, Ont., Canada, shows veins averaging 45' in width for 1,000' in length, with strike N. E. and dip 55° N. W. Mine said to have the largest pyrite deposit under development in Canada.

Equipment: includes 2-mile Leschen aerial tramway, Lambert hoist, compressor and concentrating mill. Shipments to the United States are made via Graham on the Grand Trunk Pacific R. R. and the Great Lakes. Employs 130 men. Company does not publish financial or statistical reports. Property reported on by Walter Harvey Weed.

NORTHERN SIERRA MADRE MINING CO.**MEXICO**

Address: D. E. Alexander, Humboldt Savings Bank Bldg., San Francisco, Cal. Mine near Soyopa, Sonora, Mex. **Officers:** Chas. K. Blender, pres.; Carlo Giovannetti, v. p.; John O'Donnell, sec.; Fred Townsend, treas.; preceding, with D. E. Alexander, Fred Trevarrow and E. C. Curtis, directors; F. R. Luckhardt, gen. mgr. Inc. Aug. 2, 1901, in California. **Cap.**, \$300,000; shares \$1 par.

Property: 167 acres, including La Reina de Cobre and Providencia copper mines and El Colosus silver-lead mine, 25 miles west of Suaqui de Batuc. La Reina shows diabase, shale and limestone, carrying orebodies of oxidized and sulphide ores, with quartz gangue, estimated to average 15.5% copper, 20% lead, a trace of zinc, 73 oz. silver and \$8 gold per ton.

Development: by 633' of workings. Management estimates 4,854 tons of ore in sight, with 3,214 tons blocked out for stoping. Closed down owing to Mexican revolution.

NORTHERN VALLEY MINING CO.**MONTANA**

Officers: S. F. Mallette, pres.; Godfrey, Ill.; Walter K. Mallette, v. p.. Anaconda, Mont.; H. W. Wilson, sec.-treas., Twin Falls, Idaho. Inc. 1912 in Arizona. **Cap.**, \$1,000,000; shares \$1 par; 600,000 shares issued. Controlled by the American Metal Mining Ass'n of Arizona.

Property: consists of the holdings of the defunct Amazon-Montana Development Co. in Amazon district, Jefferson Co., Mont. Idle and no work contemplated in near future.

NORTHLAND COPPER-GOLD GROUP.**ALASKA**

Office: Ernst & Buddenborg, 518 Hinckley Bldg., Seattle, Wash. **Property:** 8 claims, in Ketchikan district, west coast of Prince of Wales island, S. E. Alaska, said to show a 600 to 800' mineral zone containing numerous veins, traceable for 3 miles. Claims show limestone and greenstone porphyry intrusions, with flat dipping veins alongside, that run N. E. and S. W. The veins are from 1 to 8' thick and contain lenses of ore with chalcopyrite mixed with pyrite, lying beneath the green stone hanging wall.

Development: by 70' crosscut tunnel and a 50' shaft, showing 3' of ore. A 112' tunnel taps this shaft and shows 18" solid 20% ore, according to owners. Shipments of 153 tons are said to have returned 10.05% copper, 26.3% iron, 14.2% silica, \$1.38 in silver and gold, or a total value of \$19.84 per ton. Smelting rate to Tacoma is \$1.50 per ton for this ore. No recent returns secured.

NORTHPORT SMELTING & REFINING CO.**WASHINGTON**

Northport, Stevens Co., Washington. **Officers:** J. L. Day, pres.; E. R. Day, sec.; with Edw. Boyce, E. R. Knight and F. M. Rothrock, directors; Sam. James, mgr.

Inc. Sept. 25, 1915, in Idaho, as a reorganization of the Northport S. & R. Co., Ltd. **Cap.**, \$1,000,000; shares \$1 par. Company owns the Northport smelter, built on the site of the old Le Roi Mining Co.'s plant. The new \$500,000 plant was blown in March 7, 1916. **Equipment:** 2 lead furnaces, 42" wide and 16' long, of 300 tons daily capacity, are now in operation and a third furnace is being added. Employs 150 men. Company is treating ores from the Hercules and Tamarack & Custer, but plans to do a general custom business.

NORTHWEST MINES DEVELOPMENT CO.**WASHINGTON**

Office: 204 Paulsen Bldg., Spokane, Wash. Mine office: Keller, Wash. **Officers:** Wm. E. Johnson, pres.-supt.; H. J. Lefevre, v. p.; Harry J. Neely, sec.-treas.; Wm. E. Malm, Keller, mgr.; preceding, with Henry Osterman, H. J. Earnest, directors.

Inc. Dec. 15, 1915, in Wash. **Cap.**, \$200,000; shares \$100 par; 500 out-

standing. Authorized bond issue, \$300,000; none issued. Annual meeting, 2nd Monday in January.

Property: 17 claims, 330 acres, surveyed for patent, 12 claims in Okanogan county and 5 in Ferry county, said to show zinc, gold, silver and lead ore in fissure veins and disseminations in granite. **Development:** by 2,000' of tunnels and diamond drilling, 140' vertical shaft with 480' of underground workings, of which 435' are claimed to be in ore averaging 1.83% copper, and 32' in copper-zinc ore, assaying 14% zinc for 10'.

Equipment: includes electric power and 150-ton smelter at Keller. Machinery to be installed in 1916. Only meagre development done to date. Secretary reports, June 13, 1916: "Ore reserves unknown, but immense."

NORTHWESTERN LEASING & DEVELOPMENT CO. ARIZONA

Reported operating property of the New Planet Copper Mining Co. under lease in 1916. See New Planet.

NORTHWESTERN METALS CO. MONTANA

Shared the fate of all Marcus L. Hewitt promotions. Bankrupt. Entire property reported sold by court for \$22,000, July, 1916. Fully described Vol. XI, Copper Handbook.

NORTHWESTERN MINING CO. IDAHO

Idle. Prof. W. B. Clark, Johns Hopkins University, Baltimore, Md., pres. Owns a copper mine near Lucile, Idaho Co., Idaho. Described in Copper Handbook, Vol. XI.

NORWEGIAN CONSOLIDATED MINING CO. CALIFORNIA

Office: Pacific Bldg., San Francisco, Calif. **Property:** the Norwegian mine, ½ mile S. E. of Melones, Tuolumne Co., Calif., has a 4" vein of quartz with rich tellurides in amphibolite schist. Vein strikes N. 12° W., with dip 54° E. Developed by 550' incline shaft.

NOVEMBER MINING CO. NEW MEXICO

W. H. Kinnon, mgr., Steins Pass, N. Mex. Inc. 1913, in New Mexico, to take over a group of claims, including the World's Fair and Louise, at Granite Gap, 12 miles S. of Steins Pass. Mine shows silver-lead-copper-zinc ore in veins in a contact between limestone and granite.

Development: by shafts, tunnels and diamond drilling. **Equipment:** includes compressor and tramway. Has been an intermittent shipper for several years.

NYMAN CONSOLIDATED MINES CO. CALIFORNIA

Office: 502 Humboldt Bank Bldg., San Francisco, Calif. Mine office: Jamestown, Tuolumne Co., Calif. **Officers:** A. L. Trowbridge, pres.; R. W. Barrett, v. p.; F. G. Mudgett, sec.-treas.; with O. H. Duncanson, directors; C. E. Shafer, supt.

Inc. March 19, 1915, in Calif. **Cap.**, \$200,000; shares \$1 par; assessable; 119,785 shares issued. Gross earnings in 1915 were \$22,117, and operating expenses \$20,994. Cash in banks, \$19,146 on March 31, 1916.

Property: 5 patented claims, 240 acres, on the Mother Lode, between Quartz and Stent, 2 miles S. of Jamestown, shows a contact fissure in amphibolite schist and greenstone formation. Main orebody from 10-25' wide has strike N. 35° W., with dip 58° E. Ore averaging \$10 per ton occurs in shoots and streaks, cutting Calaveras slates.

Development: by 12,500' of underground workings, consisting of 600' tunnel, 615' vertical shaft and 850' incline shaft, with levels at 400', 600' and 800', crosscut 200' E. on the 400' level with 500' S. drift and 400 crosscut W. on the 600' level. The mine was closed down in 1907, without ore reserves. In Jan., 1916, management estimated 150,000 tons above the 600' level and 25,000 tons blocked out.

Equipment: includes 2,000' double-drum hoist, 750 cu. ft. air com-

pressor, pumps, electric power and 200-ton 40-stamp mill, with Frue vanners for 20 stamps. Average grade of ore treated in 1915 was \$60.50 per ton, the mill making an extraction of 85%. Total cost was \$2.50 per ton.

Production: for 9 months ending May 1, 1916, was 5,525 tons, yielding \$31,092. Output to date about \$2,000,000. Management plans adding tube mills in 1916 and operating mill to capacity.

NYMO ZINC & LEAD CO., INC.

MISSOURI

Office: 34 Wall St., New York. **Officers:** Benj. L. Love, pres.; John L. Morrison, principal owner, v. p. and sec., Germantown, Phil., Pa.; above, with W. H. Johnson, Douglas Fenwick and Hugh T. Halbert, directors; E. R. Cowan, treas.

Inc. Feb. 25, 1916, in New York. **Cap.**, \$100,000; shares \$5 par; outstanding, \$50,000. Douglas Fenwick & Co., 34 Wall St., New York, transfer agent. Franklin Trust Co., New York, registrar. Listed on New York Curb. Dividends: 1%, paid April, 1916.

Financial statement of April 21, 1916, shows cash, \$1,865. Gross receipts from ore sales, \$7,004; cost of production, \$3,523.

Property: formerly known as the Brattleboro mining lease, 6 acres, in East Joplin mining district, has lead-zinc ore occurring at 65'-86' in depth, said to be proven by 6 drill holes. **Development:** a shaft with drifts east and west for only 30'. **Equipment:** includes hoist and 2 boilers.

OAKLAND COPPER BELL MINE.

NEVADA

Owens group of claims in the Pumpkin Hollow section of Yerington district, Lyon Co., Nev., developed by a 40' shaft showing 3' of ore, said to carry 7% copper with 5 oz. silver and \$2 gold. Made small shipments in summer of 1913. Presumably idle.

OAKS CO.

NEW MEXICO

Alma, Socorro Co., N. Mex. W. J. Weatherby, pres.; H. A. Hoover, sec. **Property:** the Pacific, Hub and a portion of the Johnson groups, 500 acres, in the Cooney, or Mogollon district, about 80 miles by daily stage from Silver City, the nearest railway point. Also has a bond on 200 acres additional, including the Eberle and McKinley groups. The company is developing its mines and shipping ore, also driving the Oaks tunnel, which will start at Mineral creek and crosscut the Gray Hawk, Socorro, Pacific and other veins in its 9,800' length. It will be used as a main drainage and haulage tunnel for the district. The Eberle, McKinley, Dewey and Johnson No. 7 mines are developing and ore is shipped intermittently to the Crown mills.

OATMAN CRESCENT MINING CO.

ARIZONA

Office: 25 Broad St., New York. Mine office: Oatman, Ariz. **Officers:** Geo. W. Peirce, pres.-gen. mgr.; W. T. Esser, v. p.; Gowan Peirce, sec.-treas.; with A. G. Reynolds, directors.

Inc. 1915. **Cap.**, 1,000,000 shares; 400,000 issued. Security Transfer & Registrar Co., New York, registrar and transfer agents.

Property: 9 claims, 170 acres, 4 miles S. E. of Oatman, said to show 3 strong veins outcropping at surface for 3,000' in length and giving average assays of \$6.13 per ton in gold. The veins strike N. W. and dip steeply S. The Highland Chief vein from 10-40' wide, consists of altered and brecciated wall rock, with quartz and calcite, associated with black oxide of manganese.

Development: by 112' crosscut tunnel, several shallow pits and openings. **Equipment:** includes 50-h. p. engine, compressor, jackhammers, etc. Management plans driving the tunnel to 500'. Is regarded as a promising prospect.

OATMAN GOLD MINING & MILLING CO. ARIZONA

Kingman, Ariz. Eli Hilty, pres.-mgr.; S. W. Klass, sec. Inc. 1915 in Arizona. Cap., \$1,000,000; shares \$1 par.

Property: 10 claims, about 160 acres, in the Tom Reed Gold Road mining district, shows several well defined veins with stringers of quartz and calcite carrying free gold.

The Kokomo vein is a fault fissure, 40' wide at surface, and said to show for 4,500' on company's ground, with strike N. 62° W. and dip 80° N. E., cutting the andesite, or occurring in a contact between rhyolite and andesite.

Development: a 500' shaft was sunk on the Kokomo vein in 1915 and crosscuts are being run N. and S. **Equipment:** includes compressor and 25-h. p. hoist. Management hopes to cut the main orebody within 90' of the shaft on the 500' level. A prospect. Reported on by E. W. Brooks.

OATMAN NORTH STAR MINES CO. ARIZONA

Oatman, Ariz. A. O. Parsons, pres., with C. E. Gilman, R. R. Moore and Lloyd Tevis, directors. Inc. 1915 in Ariz. Cap., \$150,000; shares 10 cts. par. Stock is listed on San Francisco and Los Angeles Exchanges.

Property: 17 claims, 250 acres, at Oatman, claimed to carry extension of Tom Reed vein system. Sinking a 400' shaft in 1916.

OATMAN PIONEER MINES, INC. ARIZONA

Oatman, Ariz. E. H. Dawson, mgr. Inc. in 1915. **Property:** a group of patented claims, including the Pioneer, formerly owned by the Pioneer Cons. Mines Co., 2 miles from Oatman, said to carry a vein, outcropping at surface from 10'-50' wide and proven to depth of 200'.

Development: by 400' main Pioneer shaft and several hundred feet of drifts. **Equipment:** includes 10-stamp mill, cyanide plant, 80-h. p. engine, compressor and 2 hoists. Messrs. Keith & Keith, of Boston, have taken a working option on the mine and are developing same, June, 1916, with view to purchase.

OATMAN SOUTHERN MINING & MILLING CO. ARIZONA

Oatman, Ariz. **Officers:** S. R. Porter, pres. and treas.; B. W. McCloskey, v. p.; with R. C. Curry, directors; Mrs. J. C. Garinger, sec.

Inc. Oct. 9, 1915, in Ariz. Cap., \$100,000; shares 10 cts. par; outstanding, 520,000. Security Transfer & Registrar Co., New York, transfer agt. and registrar. Listed on New York Curb as a prospect.

Property: 11 claims, 220 acres, in S. W. end of the Oatman camp, on the Black Range vein system. **Development:** 2 inclined shafts, 64' and 108' deep, on the veins, said to show bodies of low-grade quartz ore. Shafts are 280' apart, but said to be unfavorably located for development purposes, so a new shaft was started. In April, 1916, about 500' of development work had been done.

OATMAN SYNDICATE MINING CO. ARIZONA

Oatman, Ariz. **Officers:** J. L. McIver, pres.-mgr.; Geo. W. Long, v. p.; C. W. Herndon, sec.-treas. Inc. Oct. 29, 1915, in Ariz. Cap., \$100,000; shares 10 cts.; 500,000 shares issued. Valley Bank, Phoenix, Ariz., transfer agent. Operating expenses to March, 1916, were \$30,000.

Property: the Putney group, 11 claims, 4 patented, about 200 acres, 6 miles S. of Oatman, embraces about 3,500' on the main Black Range-Nellie Iode system. Mine shows a quartz contact deposit surrounded by andesite, rhyolite and granite, with N. W. strike and dip of 45°.

Development: by 400' vertical shaft. Drifts are being run both ways on the vein from the 400' level. **Equipment:** includes 40-h. p. hoist, 5-drill compressor and gasoline power.

OATMAN UNITED MINES CO. ARIZONA

Oatman, Ariz. **Officers:** Chas. S. Sprague, pres.; C. C. Spicer, v. p.;

C. P. Campbell, sec.-treas.; J. K. Turner, cons. engr. Inc. 1915 in Ariz. Cap., \$2,000,000; shares \$1 par; 750,000 shares in treasury.

Property: 150 acres, surveyed for patent, 1½ miles N. E. of Oatman, adjoining the Big Jim on the S. and the Tom Reed on the S. W., shows 3 well defined, gold-bearing fissure veins in andesite and along andesite-rhyolite contact. The ore is oxidized and occurs irregularly.

Equipment: includes 5-drill Ingersoll-Rand compressor, 40-h. p. hoist and 50-h. p. engine. Management plans sinking a 500' two-compartment shaft between the North and South veins. A prospect.

O'BRIEN MINING CO.

ONTARIO

M. J. O'Brien, Cobalt, Ont., owner. R. H. James, mgr.

Property: the O'Brien mine, a promising silver producer at Cobalt. **Development:** by 6 shafts to depth of 200', with considerable crosscutting, raising, drifting and stoping.

The mill treated 51,892 tons of ore in 1914. **Shipments:** 1,237,345 oz. silver. Royalty paid to government was \$5,898 in 1914, with total payments to date of \$700,966. Company reported to have acquired new holdings in the district in 1916 and is planning extensive exploratory work with diamond drills.

OCEANIC QUICKSILVER MINE.

CALIFORNIA

Murray Innes, owner and mgr., Cambria, San Luis Obispo Co., Calif. Thos. Knowles, supt. Gross earnings in 1915 were \$110,000 and operating expenses \$75,000.

Property: 3 patented claims, 500 acres, about 5 miles E. of Cambria, shows a contact deposit 800'x650'x20' in width running N. W., with nearly vertical dip, in serpentine and sandstone formation. The ore contains cinnabar and iron sulphide, assaying 0.4% quicksilver.

Development: to depth of 650' by 300' vertical winze and 1,500' tunnel. Underground workings total 5,000'. **Ore reserves:** estimated by owner at 300,000 tons with 150,000 tons blocked out, March 1, 1916. **Equipment:** includes 25-h. p. hoist, compressor, pump, ½-mile wire tramway and 20-ton concentrating mill.

Recent production: 1,125 flasks in 1913; 1,256 flasks in 1914; 1,213 flasks in 1915. Concentrates average 5% quicksilver. Average price received during 1915 was \$91 per flask.

OCTAVE MINES CO.

ARIZONA

H. C. Gibbs, pres., 60 State St., Boston, Mass. **Property:** the Octave gold mine, an old mine with a record of \$2,000,000 produced. Shows same geologic features as the Congress mine, 10 miles to east. The rocks are granitic, intruded by acidic and basic dikes, including some of post mineral age.

Development: to depth of 2,000' and for 1,400' along the vein; 500' of new work done in 1914-15, mainly E. of a fault that cut off the ore on the 8th level, has shown an orebody 270' long, 2.2' thick, averaging \$10 per ton, separated by 25' of lean vein from 90' of \$13.44 ore that is 4' wide. Property examined by J. Nelson Nevius, 1916.

OCTO MINING CO.

NEW MEXICO

Office: 112 East State St., Redlands, Calif. Mine at Lordsburg, Grant Co., N. M. **Officers:** N. W. Halt, pres.; G. S. Turrill, v. p. and sec.; C. S. McWhorter, treas.; A. G. Hubbard, F. L. Winsor and C. C. Reasoner, directors; E. K. Davis, gen. mgr.; Chas. Pickenbeck, mine supt. Inc. Nov. 15, 1912, in California. Cap., \$500,000; shares \$1 par; issued, 300,000. Annual meeting, third Thursday in December.

Property: shows a deposit of ore said to average 15% copper. A 2-compartment shaft is being sunk 500' in 1916. **Equipment:** includes 2 small hoists, air compressor and 50-h. p. boilers. Digitized by Google

O. F. & L. MINING CO.**MISSOURI**

Duenweg, Jasper Co., Mo. Inc. in Missouri. **Cap.**, \$30,000. Operates a sub-lease on 20 lots in Sec. 3, T. 27, R. 32, Duenweg, owned by the Boston Duenweg Mining Co. and held under lease by the Wilson Mines Co.

Development: by 185' shaft, 2 shallow shafts and drill holes, exposing 14% zinc blende. **Equipment:** includes 250-ton concentrating plant, boiler, pump, steam power, Freman crusher. Fifteen men employed. Is a steady producer.

OHIO & COLORADO SMELTING & REFINING CO. COLORADO

Office: 822 A. C. Foster Bldg., Denver, Colo., and 52 Broadway, New York. **Works:** Salida, Chaffee Co., Colo. **Officers:** J. C. Kortz, pres.; B. Hochschild, v. p.; Max Schott, sec. and gen. mgr.; C. M. Loeb, treas.; E. H. Laws, supt.

Cap., \$3,000,000. Is controlled, through stock ownership, by American Metal Co., Ltd. Company owns no mines, but owns and operates the Salida smelter of 1,000 tons rated daily capacity, doing a general custom business. The plant has a 300-ton sintering plant, a sampling mill, 6 lead blast-furnaces, 48x180", of 250-ton daily capacity, and handles mainly silver-lead ores. The only copper treated is that bought with lead ores, which is concentrated to about 40% tenor.

OHIO COPPER CO.**UTAH**

Liquidated and properties and assets transferred to the Ohio Copper Mining Co., which see. Old company fully described in former volumes.

OHIO COPPER MINING CO.**UTAH**

Office: 61 Broadway, New York. **Operating office:** Salt Lake City, Utah. **Mine and works office:** Lark, Salt Lake Co., Utah. **Officers:** W. O. Allison, pres.; M. Levy, treas.; R. Victor, D. G. Bogert and H. H. Boyesen, directors; Chas. W. Saacke, sec.

Inc. July 8, 1912, in Maine. **Cap.**, \$8,000,000; shares \$5 par, \$3 paid; issued, 1,300,000. Funded debt \$2,000,000, first mortgage convertible 6% bonds; \$1,246,000 outstanding, due Sept. 1, 1917, interest payable March and Sept. 1, with proviso for \$120,000 sinking fund each year, met July, 1913, by the novel, questionable, but apparently only available method, of cancellation of that amount of treasury bonds. J. L. Williams, 74 Broadway, New York, and David Fullam, Boston, transfer agents; Empire Trust Co., New York, and International Trust, Boston, registrars. Annual meeting, first Wednesday in June at Portland, Me.

Company went into receivers' hands Sept. 16, 1914. In August, 1915, the Empire Trust Co. filed suit to foreclose a mortgage given to secure \$2,000,000 worth of bonds. The company is now in charge of a trustees' committee, headed by H. T. Catrow and Chas. T. Lark, both large stock and bondholders.

The mine and mill were leased to the General Exploration Co., which company operated the mine, treating 2,000 tons of ore per day. The lease on the property ran to May 20, 1916, and called for a minimum royalty of \$6,250 a month, this amount covering the interest on outstanding bonds and current expenses.

Foreclosure of the mortgage took place Aug. 22, 1916, and the reorganization planned provides for consolidation of the Bingham Central Railway (owning Mascotte tunnel) in a new corporation with cap. of \$2,750,000 and \$2,250,000 6% cumulative repayment convertible bonds. Stockholders of Ohio company can subscribe for new bonds at par and bonds will be used on basis of \$75 new bonds for each \$100 old. If 75% of the B. C. Railway & Tunnel Co. bonds enter reorganization, the new company

will receive the railway free of debt for \$453,375 stock and an equal amount of bonds.

New stock will be pooled for 5 years.

Property: 14 claims, patented, 120 acres, bounded on the N. and W. by holdings of the Utah Copper Co., on the E. by the Fortuna Mining & Milling Co., on the S. by United States Mining Co., and on the S. W. by the Boston Consolidated. The Mascotte tunnel, controlled by the Heinze Estate, through the Bingham Central railway, exacts a toll of 15 cts. per ton on all ore extracted through that avenue, yielding a very considerable revenue to the owners. The mineral property was bought by the old company from the Columbia Copper Mining Co., for \$245,000.

Geology: property carries some ore in veins along a mineralized zone with E.-W. strike and dip of 45° N., consisting of a belt of quartzite of 500' width carrying 2 parallel veins, known as the What Cheer and All's Well. These veins are more than 500' apart, and separated by mineralized quartzite which constitutes the main orebody of the property, the ore averaging 1.015% copper. The quartzite, which adjoins the laccolithic mass of monzonite-porphry of the neighboring Utah Copper and Boston Consolidated properties, is much shattered and broken, with ore disseminations and impregnations along shatter and cleavage planes, in the brecciated material, ore being chiefly chalcocite and chalcopyrite, associated with pyrite, readily amenable to concentration, and lying above the level of the Mascotte tunnel.

Estimates of ore developed vary greatly, the former management claiming that ore had been developed under about 5 acres, the porphyritic orebody being estimated as 400' wide, 1,000' long and 600' deep. One estimate gave 3,746,165 tons of ore developed with 9,738,690 tons of probable ore and the average tenor probably about that of the ore milled, or 1.01% copper.

The 14,000' double track Mascotte tunnel, connecting with the shaft at depth of 1,100', cares for the large volume of water coming from the workings. Ore is blocked out in 100' squares, with extensive development on the 3rd, 5th and 7th levels, and the caving system is used in extraction. Ore is sent from the upper workings, through chutes, to a 4,000-ton ore-bin, 20' wide and 200' long, extending over both tracks, loaded in about 4 minutes from the bins into trains of 18 to 20 five-ton double-bottom steel cars, and hauled by electric locomotives, to the concentrator at Lark.

The mill, at Lark, 3,200' from the mouth of the Mascotte tunnel, is 317' long and 391' deep, in 4 units, built in 6 terraces. Three of the 4 units are in commission handling 2,000 tons, daily. The unusual feature of this mill is the absence of water classification, the only hydraulic classification being by the jigs, and concentration is entirely by jigs and tables, with a few buddles that treat the very finest feed, there being no vanners. Equipment includes 2 coarse and 4 fine Blake crushers, elevators, trommels, conveyors, 4 roughing and 8 finishing rolls, of Allis-Chalmers make, 16 Monadnock Chilean mills, 144 jigs, 288 Wilfley and James tables, and Callow classifying tanks. The installation includes 51 motors, ranging from 15 to 150-h. p.

Three systems of milling have been tried since the mill went into operation. Originally the ore, coarsely broken by Blake crushers, was ground in Chilean mills. The Wall rolls were tried in 1912, only to be removed in order to obtain better results.

Property is so low-grade, it can only be worked at a reasonable profit when copper prices are high. If the company did not have to pay royalty on the Mascotte tunnel, it could operate profitably.

OHIO KEATING GOLD MINING CO.

MONTANA

Address: care Symons Dry Goods Co., Butte, Montana. Mine at Radersburg, Broadwater Co., Mont. Officers: Jos. Oppenheimer, pres.;

Jack Cohen, v. p.; C. H. Smith, sec.-treas., with B. Calkins and W. M. Tuohy, directors.

Cap., \$800,000, increased Dec., 1910, from \$500,000. Company had \$113,924 debts, July, 1914, and property closed down, pending decision of stockholders to change the stock from non-assessable to assessable and payment of an initial assessment of 15 cts. per share. Controlled through stock ownership by Radersburg Consolidated Mining Co.

Property: a promising, though small gold mine, producing some copper from pyrite ores found as shoots in strong fissure veins in igneous rocks. **Development:** to 1,000' level, with about 3,800' of drifts and crosscuts. **Equipment:** includes electric and steam pumps, electric hoist, mining cars and tools.

Fred T. Green examined the property in 1914 and estimated probable ore in mine at \$486,151, about \$116,914 worth of ore blocked out (6,680 tons) and \$90,000 worth of \$4 ore on the dump.

OHIO LEAD MINING & SMELTING CO.

NEVADA

Idle. Mine near Wells, Elko Co., Nev. Described in Copper Handbook, Vol. XI.

OHIO MINES CO.

ARIZONA

Office: 314 Outlook Bldg., Columbus, Ohio. H. W. Whitaker, pres.; T. D. Brown, v. p.; J. F. Rogers, sec.-treas.; preceding officers, R. S. Barbee, J. M. Rittenour, Jacob Sebastian, Thos. M. Murphy, W. G. Brossman, and J. S. Jones, directors. Inc. Jan., 1909, in Arizona. **Cap.**, \$2,500,000; shares \$1 par; in \$200,000 preferred and \$2,300,000 common stock; issued 1,482,908 shares; \$40,760 first 7% mortgage notes, \$38,160 issued. Annual meeting, third Monday in January.

Property: 14 claims, partly patented, 400 acres, with a 5-acre mill site, and water-rights on the Agua Fria river, 6 miles from the mine, in the Big Bug district. Property was bought of the Jessie Mines Co., whose promoters managed to escape jail.

Development: by 3 shafts, 659', 206' and 200' deep, with 7,000' of workings, and the mine is said to have produced upwards of \$750,000 in gold, under an ownership previous to that of the Jessie Mines Co. Property under lease, 1915, to Chaparral Mining Co., which is doing some development work.

OJIBWAY MINING CO.

MICHIGAN

Office: 1400 Alworth Bldg., Duluth, Minn. Mine office: Ojibway, Keweenaw Co., Mich. **Officers:** Dr. Lucius L. Hubbard, pres.; Chas. A. Duncan, v. p.; preceding with Thos. F. Cole, Chester A. Congdon, Chas. d'Autremont, Jr., Oscar J. Larson, Capt. Jas. Hoatson, Capt. Thos. Hoatson and John D. Ryan, directors; Frederic R. Kennedy, sec.-treas.. Henry B. Paull, auditor.

Inc. June 8, 1907, in Michigan. **Cap.**, \$2,500,000; shares \$25 par; assessable; issued, \$2,100,000, \$15 paid. Levied a \$2 assessment Jan., 1910, payable \$1 March and \$1 Oct., 1910, and a \$1 assessment Dec. 10, 1912. Company began business with \$500,000 cash, and, on Dec. 31, 1912, last yearly report issued, had cash and accounts receivable of \$115,709, with \$9,808 accounts payable. Property was bought for \$459,919.29. Boston Safe Deposit & Trust Co., registrar; American Trust Co., Boston, transfer agent. Shares are listed on the Boston Stock Exchange. Annual meeting, first Tuesday in June.

Property: 1,560 acres, bounded on the north by the Cliff and on the south by the Seneca, includes the old Manhattan tract, Bacon & Jacob lands, bought of the Union Copper Land & Mining Co.

The Kearsarge bed was located, 1904, on the Miskwabik tract, about 4

miles N. E. of Mohawk No. 1 shaft, and was proven by 5 bore holes drilled across the formation at intervals of 1,200'. Four of these holes gave good cores, being especially rich well toward the northern limits of the tract. The drill holes showed the Kearsarge amygdaloidal bed to be divided into 7 alternations of amygdaloid and trap, immediately above the geological horizon of the Wolverine sandstone, the different cores each showing copper from either one or more of four horizons. Drilling indicates that copper values alternate from bed to bed, or layer to layer, if the cupriferous zone of the Ojibway be considered a single strata, only two of the amygdaloidal layers being well mineralized in a given cross-section, as a rule.

Development: by two 3-compartment shafts. No. 1, or north shaft, 1,500' from the northern boundary of the property, is 2,051' deep, disclosing copper from grass roots. Developments in this shaft show that the Kearsarge stratum is split in two, having distinct beds of 20' and 13' respectively, separated by 13 to 15' of trap. The 1,600' and 1,700' levels show good ore.

No. 2 shaft, 1,116' S. W. of No. 1, is sunk about 90' in the footwall, and is 1,954' deep, disclosing very little copper ground above 800', though a material betterment is noted below that depth, and a very marked improvement is noted below 1,500' depth. This shaft is sunk in unusually firm ground, requiring very little timbering. Work was suspended June 30, 1913, for lack of working capital, and generally discouraging results shown in development.

The mine is equipped for development to a depth of 2,000'. Development has been systematic, but the management planned making a mine upon 5-drill cores, which, as development has proven, gave rather too favorable an indication of the richness of the lode.

O. K. EXTENSION MINING & REDUCTION CO. UTAH

Office: 222 D. F. Walker Bldg., Salt Lake City, Utah. **Mine office:** Milford, Beaver Co., Utah. **Officers:** A. J. McMullen, pres. and gen. mgr.; T. M. Farrell, v. p.; Chas. A. Weaver, sec.-treas.; preceding with R. H. Greenhalgh, directors.

Inc. Nov., 1899, in Utah. Cap., 300,000 shares, 3 cts. par, assessable; issued, 125,000; total assessments to date, \$15,363. Annual meeting, second Tuesday in October.

Lands: 6 claims, 3 patented, 120 acres, near the Majestic mine, in the Beaver Lake district, show monzonite and quartz-porphry, carrying 2 fissure veins, of 5 to 24' estimated average width, traceable 150'. Opened by 7 pits and shafts of 15 to 510' depth, and a 150' tunnel, with 1,045' of workings, showing chalcopryrite estimated to average 2% copper. Inactive except for annual assessment work.

O. K. SILVER M. & M. CO. UTAH

David Keith, gen. mgr., Kearns Bldg., Salt Lake City, Utah. Thos. Kearns, pres.; W. G. Lamb, sec.-treas. **Inc. 1909, in Utah. Cap., \$100,000; shares 10cts. par, assessable. Property:** 33 claims in Erickson mining district, Indian Springs, Tooele Co., Utah. **Development:** by a 135' incline shaft, reported all in ore running better than 488 oz. silver and \$4.70 gold per ton. Developing and producing in 1916.

OKLAHOMA COPPER CO. ARIZONA

Mine near Florence, Pinal Co., Ariz. Company apparently out of business. Described in Copper Handbook, Vols. X and XI.

OLALLA COPPER MINING & SMELTING CO. BRITISH COLUMBIA

Office: Second National Bank Bldg., Paterson, N. J. **Mine office:** Olalla, Yale district, B. C. **Officers:** Robt. Gaede, pres.; Jos. Bamford, Jr., v. p.; John E. Tylee, sec.-treas.; preceding with Frank A. Blauvelt, Warren

N. Conant, Robt. Swinley, H. Chas. Royce and Frank E. Morrison, directors. Inc. Oct. 19, 1901, in Maine. **Cap.**, \$8,000,000; shares \$25 par. Annual meeting, first Monday in August.

Property: 32 claims, crown-granted, 1,183 acres, and a 92-acre mill, smelter and the Olalla town site, in the lower Similkameen and Keremeos camps, Osoyoos division, Yale district, 4 miles from a railway. Lands said to show contact deposits between diorite and felsite, with orebodies in both, but mainly in the felsite. Twelve claims adjoin the town site of Olalla, and the Dividend group, of 7 claims, is 17 miles distant. Vein under development is claimed by management, to carry bunchy replacement deposits of chalcopryrite, with garnetite and magnetite gangue, in limestone, near intrusive contacts, assaying 1.5 to 5% copper, a little silver and \$1 to \$7 gold per ton. **Development:** by a 70' shaft, and tunnels of 642', 600', 150' and 112', with 1,504' of workings. There is no power equipment. Property now idle, is leased, for 25 years, to the Yale Development & Construction Co., organized among the stockholders of this company.

OLD COLONY COPPER CO.

MICHIGAN

Office: 70 State St., Boston, Mass. Mine office: Houghton, Mich. **Officers:** H. F. Fay, pres.; C. J. Morrissey, sec.-treas.; preceding with W. F. Fitzgerald, W. A. Mosman, Rogers L. Barstow, F. L. Maguire, and John G. Stone, directors; Geo. S. Goodale, supt.; A. L. Dickerman, cons. engr.

Inc., 1898, in Michigan. **Cap.**, \$2,500,000; shares \$25 par, all issued; \$13 paid in. American Trust Co., Boston, transfer agent; Old Colony Trust Co., Boston, registrar. Stock listed on Boston Stock Exchange. Annual meeting, second Wednesday in December.

Receipts and Expenditures: (year ended Sept. 30, 1915) balance Oct. 1, 1914, 59,306; accounts receivable, \$154; less accounts payable, \$2,488; total, \$56,972. Receipts (rent, \$704; interest, \$2,163; assessment acct., \$15,982), \$18,849; total receipts, \$75,821. Payments: for diamond drilling, including superintendence, labor and supplies, \$27,657; taxes, \$4,408; general expense, including salaries, insurance, rent, etc., \$8,089; total, \$40,154. Balance Oct. 1, 1915: cash, \$36,939; accounts receivable, \$95; total, \$37,033; less accounts payable, \$1,367; net balance, \$35,666.

General Balance Sheet: (Sept. 30, 1915) assets: real estate, \$709,790; machinery and equipment, \$6,325; cash and debts receivable, \$37,034; profit and loss (general expense acct.) \$542,305; total, \$1,295,454. Liabilities: capital stock, \$1,294,087; accounts payable, \$1,367; total, \$1,295,454.

Property: about 1,200 acres on the Mineral Range, Houghton Co., Mich., in Sec. 17-18, T. 56, N., R. 32 W., east of the Calumet & Hecla, and south of the Mayflower mines. **Development:** a cross-section was secured, 1899-1901, by a tunnel driven about 3,000' and by diamond drill borings eastward to the western end of the tunnel; this cross-section showed upwards of 75 amygdaloidal and conglomerate beds, a number of which carried a little copper in the drill cores and where cut in the tunnel. There are 5 shafts, aggregating about 2,200' in depth, and over 6,000' of drifts and crosscuts, all of which have shown indifferent results. Work was discontinued in 1909, and resumed again in 1911 by diamond drilling. In April, 1912, the drills were moved to the north, and hole No. 14 was located between 400' and 500' S. E. of Mayflower hole No. 16, which has been called the "discovery" hole, and in which the so-called Mayflower lode was first cut on that property, disclosing a lode of unusual width and a high degree of mineralization. Two drills have been employed continuously in this work which has progressed in a general S. W. direction along the strike of the strata.

To date 25 holes have been drilled in 23 of which the lode has been located within an area of 3,000' N. and S. by 2,000' E. and W. and the general average of all the values shows it to have an unusual degree of mineralization. Hole No. 38 which encountered the lode in April, 1916, and which produced one of the richest cores, secured in these investigations, is located 3,000' S. of the boundary line between this property and that of the Mayflower.

This diamond drilling campaign has been entirely original exploration of an unprospected territory, and has met many puzzling geological problems but the work has been thoroughly and scientifically performed and is now practically finished. The company should soon be in a position to start a shaft to develop the mineral deposit which has been so persistent throughout the area covered by drilling.

OLD DOMINION CO.

ARIZONA

Office: 50 Congress St., Boston, Mass. **Officers:** Jas. Douglas, pres.; Chas. Sumner Smith, v. p.; Wm. M. Bradley, clerk; Chas. H. Altmiller, asst. clerk and treas.; preceding (excepting Wm. M. Bradley) with Cleveland H. Dodge, Jas. McLean, Arthur C. James, Chas. S. Smith and J. Waldo Smith, directors.

Inc., Jan. 15, 1904, in Maine. **Cap.,** \$8,750,000; shares \$25 par; \$7,333,825 issued and fully paid. Annual meeting, last Wednesday in January. Stock listed on Boston and New York Stock Exchange.

Dividends: 50c in 1905 and 1906; \$1 in 1907; 50c in 1908; \$1.50 in 1909, 1910 and 1911; \$4 in 1912; \$5 in 1913; \$4 in 1914; \$5 in 1915; a total of \$7,320,478.

The company is a securities-holding corporation only, organized to promote the operation of the Old Dominion Copper Mining & Smelting Co. and United Globe Mines properties. These two companies are operated individually, but with a free exchange, upon an equitable basis, of ores for smelting and fluxing. On Jan. 1, 1916, the Old Dominion Co. owned 155,353 shares or \$3,883,825 out of \$5,000,000 stock issued by the Old Dominion Copper M. & S. Co. and the entire stock, \$2,300,000, of the United Globe Mines. Income account for 1915 shows net income of \$1,389,396, and a surplus of \$355,696, as compared with \$832,434 and \$433,064 in 1914. Dividends paid in 1915 amounted to \$1,466,765, compared with \$1,173,412 in 1914.

The stock represents ownership in subsidiaries producing over 30,000,000 lbs. of copper annually, at a cost of about 8½ cts. a pound, equivalent to earnings for Old Dominion of \$7.75 per share on 15c copper and \$13.70 per share on 20c copper.

Old Dominion Copper Mining & Smelting Co.

(Controlled by stock ownership.) **Office:** 50 Congress St., Boston, Mass. Mine and works office: Globe, Gila Co., Ariz. **Officers:** Sumner Smith, pres.; Chas. G. Lund, v. p.; Chas. H. Altmiller, sec.-treas.; preceding with J. T. Herrick, E. P. Ricker, J. Waldo Smith and F. T. Bulmer, directors; P. G. Beckett, gen. mgr.; I. H. Barkdall, mine supt.; L. O. Howard, smelter supt.

Inc. July, 1895, in New Jersey. **Cap.,** \$5,000,000; shares \$25 par; issued, \$4,050,000. Stock listed on New York Exchange. Annual meeting, 1st Wednesday in April. Is controlled through ownership of 155,353 shares of the 162,000 shares of issued stock, by the Old Dominion Co.

Dividends: resumed July, 1907, after an intermission of 12 years, have been \$1.25 per share in 1907, \$1 in 1908, \$3 in 1909, \$3 in 1910, \$3 in 1911, \$4.50 in 1912, \$5 in 1913, \$2.75 regular and a special dividend of \$10 per

share in 1914; \$5 and a special dividend of \$1.50 in 1915; total to Dec. 31, 1915 (29 dividends), \$6,480,000. In 1916 has paid \$5.50 per share to July 1. Gross earnings for 1915 were \$2,854,846; net earnings \$1,337,086. Surplus Dec. 31, 1915, was \$726,852. Balance sheet of Dec. 31, 1915:

Assets		Liabilities	
Mines	\$3,421,806	Capital stock	\$4,050,000
Plant	3,406,529	Debts	463,874
Floating assets	1,687,206		
	<hr/>		
Total	\$8,515,543	Total debt liability.....	\$4,513,874

The surplus account consists of: reserve against "special" fund voted for dividend, \$128,144; reserve for plant renewals (neither asset nor liability) \$1,902,446; mine renewals, \$1,244,225; profit and loss, \$726,852; total surplus, \$4,001,668.

The company was engaged for years in litigation with A. S. Bigelow and the estate of Leonard Lewisohn, suing for recovery of secret promotion profits. This has been settled for \$900,000 by the Leonard Lewisohn estate and by a judgment for \$2,223,722 against A. S. Bigelow rendered by the Supreme Court. The securities turned over by Bigelow have yielded 2 "special dividends," the first for \$10, the second for \$2. There will be another and final one of not more than \$1.

Property: 38 mining claims and fractions, 5 mill site claims and 4 placer mining claims, all patented; included in these is the Old Dominion mine at Globe; the Old Dominion and Keystone claims, 3½ miles north of Globe and the Continental mine at the head of Webster gulch, about 18 miles west of Globe; also the Chicago & New York group of 60 acres and the Geneva mine.

Geology: at the Old Dominion mine, the principal ore zone occurs along a big fault vein having a N.-E. strike with sharp easterly dip. The hanging wall is limestone and quartzite, with footwall of diabase of more recent age, faulting evidently occurring both before and after the intrusion of the diabase. The ore favors the hanging wall, but also occurs in lenses along the bedding planes of the limestone and in shattered quartzite, the largest lens yet developed being 60x100x200' in size. The oxidized ores are mainly cuprite, associated with a little malachite and chrysocolla, in a gangue of iron oxides and quartz.

Sulphide ores first appear at a depth of about 350', as chalcocite, with gangue of pyrite and quartz, the lower workings also showing chalcopyrite. All ores are more or less argentiferous, and, as a rule, are highly silicious, requiring heavy lime and iron fluxes in smelting. The mine shows large sulphide ore shoots on the 14th level and below, and has improved wonderfully in the deeper workings opened up in the past few years.

The orebody under Pinal creek shows oxidized ores up to 20% in copper tenor, on the 8th, 9th and 10th levels, with chalcocite of even better tenor on the 11th level.

Development: principal mining developments of the past few years have been at the western end of the mine, which furnishes ¾ of the smelting ore mined. On the 15th and 16th levels the vein is broken and bunched. On the 17th and 18th it is 35' to 40' wide, but of concentrating tenor.

The east side workings on the 14th, 15th and 16th levels develop the Gladiator orebody, and production, nil in 1913, was 16,000 tons in 1915. Development, 1915; totaled 14,341' as compared with 15,665' in 1914 and 17,783' in 1913. Development in 1916 will be on the 17th and 18th levels,

Mine is now developed down to the 1,800' level, where the workings show a wider orebody both east and west than was found on the 1,400', with no sign of diminishing values or size below the bottom workings of the mine.

No important changes have been made in mining methods and the heavy wet ground on the west side is still worked by square sets and filling, while the more solid ground on the east side of the mine is stoped by cut and fill without timber.

The "A" shaft, or main working shaft, on the eastern side of Pinal creek, in the west section of the mine, is connected with the principal workings by underground trolley lines, including a line to handle the ore of the Gladiator mine, which has yielded a notable quantity of smelting ore, and large quantities of concentrating ore. Ore extraction on the east side is mainly from the 1,200', 1,400' and 1,600' levels, and on the west side from the 1,200', 1,300', 1,400', 1,500' and 1,600' levels. Large ore pockets have been cut in preparation for the new concentrator. "A" shaft has 5 compartments, 2 equipped for skip hoisting, 2 with cages for lowering men and supplies, and 1 for air and steamlines, water columns and electric cables. Ore and waste, hoisted to surface, is handled in skips.

Equipment at "A" shaft includes a steel engine house, built 1910, having a 17"x31"x48" Nordberg compound hoist, good for 2,000' depth.

"B" shaft, on the eastern side of Pinal creek, bottomed on the 14th level, has 4 compartments. "C" shaft has a 100,000 cu. ft. fan for ventilation, and is bottomed on the 14th level. "D" shaft, 300' deep, is located on the western side of Pinal creek, about 2,000' west of the most westerly previous workings. The "K" shaft, 1,400' deep, also has a ventilating fan. The Transit shaft is about $\frac{1}{8}$ mile east of "A". The Kingdon (1,200') and Grey shafts, main working shafts of the United Globe Company, are connected with the 1,200' level of the O. D. mine. The Grey shaft has a 75-h. p. Wellman-Seaver-Morgan electric hoist. Property has a number of smaller shafts and several tunnels, not in present use.

Pumping: the mine is very wet, the daily average amount of water pumped being between five and six million gallons. During March, 1915, as high as 14,000,000 gallons were pumped in 24 hours. Unprecedented heavy rains were the cause of the increase. The company sells part of the water pumped to the Miami C. Co., but receipts from this source reimburse it only to a slight extent for the pumping expense.

During 1915, 1,989.16 million gals. water was discharged through the drainage adit and 779.54 million gals. was pumped to surface, total 2,769.4 million gals. compared with 1,349.21 million gals. in 1914. The Miami Copper Co. bought 730 million gals. for use in its concentrator.

The mine is equipped with pumps of about 10,000,000 gals. capacity daily, these including a 1,500-gal. Prescott pump on the 10th level, having a 12" water column, discharging 30' above the collar of the shaft, into a launder on a trestle leading to a storage tank, whence water is drawn for use of the mill and smelter. There are 4 Nordberg steam pumps on the 12th level, having a rated capacity of 8,000,000 gals. per day, with 4 Gould electric pumps, 2 on the 10th and 2 on the 14th levels. On the 18th level two 1,200 gals per minute quintuplex Aldrich electric pumps have been added.

Mill and Smelter: the mine, mill and smelter are connected by a private railway, equipped with a Porter locomotive, and 50-ton ore cars.

A new crusher plant and sampling mill were erected in 1913. Capacity 150 tons per hour. In 1914, a 600-ton concentrator, using a 300-ton flotation

plant to extract copper from the slime, was completed. The old 300-ton concentration mill, erected 1909, will be maintained as a reserve for test purposes.

The smelter does custom work, and was formerly an extensive purchaser of sulphide ores for fluxing the oxidized ores of the Old Dominion and United Globe mines, but these mines have developed such quantities of sulphides. in the lower workings, that the amount of custom ore handled has been materially reduced and no sulphide ore is purchased at the present time.

The smelter has 8 double storage bins, holding 1,000 tons of coke, limestone and ore. Mixing, weighing and charging are done automatically, requiring a force of only 4 men. There are 5 blast furnaces, 3 being 44"x 198" at the tuyeres, and the other 2 being 44"x231", set tandem, with settlers between, charged automatically from side-dumping cars. The furnaces have a nominal capacity of about 2,400 tons daily, but one furnace is held in reserve.* Fuel is New Mexican coke, from the Dawson Coke Co. The smelter is served by an electric locomotive and three 3,000-lb. tilting cars for charging, with a steam locomotive and dump-cars for slags.

In the converter department acid converting was abandoned in Jan., 1913, and one stand of the basic converter type has handled all of the production since that time. The basic converter has been particularly successful at the Old Dominion plant. A shell recently removed from the stand had been there for 30 months without patching and had during that time produced over 70,000 lbs. of copper. Shells are handled by a 40-ton electric traveling crane. The converters take 50% matte, and turn out blister copper of 99.5% copper with small silver values.

The power plant at the smelter includes a 2,300-k. w. generator and two 750-k. w. generators, direct-connected to General Electric horizontal low-pressure steam turbines, utilizing exhaust steam. All machinery, except hoists and compressors, is actuated electrically. There is a 30-drill Nordberg compound air compressor, with intercooler and water-jacketed air cylinders, and a complete electric light plant. Within the last three years a 5,000-cu. ft. air compressor has been installed. Furnace blast is supplied by Connersville blowers of 45,000 cu. ft. per minute aggregate capacity, and an 18,000 cu. ft. Nordberg air compressor furnishes converter blast. Fuel oil is used for the boilers.

Production: smelter production is larger than mine production because the smelter treats ores of the United Globe and a considerable amount of custom ore.

*First half of year.

Production in 1915, included 2,937 oz. gold and 150,621 oz. silver compared with 3,308 oz. gold and 148,459 oz. silver in 1914. Increased milling costs in 1915 were due to heavy repair expenses and flotation work. Cost of converting per ton of fine copper produced in bullion, 1915, was \$5.36 compared with \$5.65 in 1914.

Monthly production compares as follows (in lbs.):

	1916	1915	1914	1913
Jan.	3,121,000	1,745,000	2,797,000	2,727,000
Feb.	2,823,000	2,074,000	3,066,000	2,381,000
March	3,277,000	603,000	2,997,000	2,953,000
April	3,290,000	1,338,000	2,779,000	3,040,000
May	3,405,000	2,868,000	3,303,000	2,749,000
June	3,843,000	2,744,000	2,937,000	2,511,000
July		3,199,000	2,962,000	2,526,000
Aug.		2,843,000	2,236,000	2,524,000
Sept.		2,538,000	2,121,000	2,679,000
Oct.		2,970,000	1,616,000	2,037,000
Nov.		2,443,000	1,924,000	2,170,000
Dec.		2,495,000	1,700,000	2,613,000

Ore reserves in the Old Dominion property are sufficient for at least 2 years production at the normal rate. It is not advisable to have reserves for a longer period than this as it is too expensive to keep the ground open. Ore has been found continuously and consecutively on all levels down to the 18th, 1,400' level, and company has found no difficulty in opening ore as required. Indications are that production will increase in the future rather than decrease. Management is exceptionally capable and efficient.

OLD EMMA MINES CO.

UTAH

Idle. Jesse Knight, pres., Provo, Utah. Fully described in Vol. X, Copper Handbook. **Property:** 5 claims, comprises the Emma, a famous old mine, whose orebodies were worked out after producing over \$6,000,000. In 1871 owned by Emma Silver Mining Co., Ltd., an English concern, succeeded by America Emma Mng. Co., later by present corporation.

Property reported leased for 14 months from July, 1916, to Old Emma Leasing Co. (George Graham Rice promotion), with 2,000,000, shares, 10c par; half of stock in treasury, 250,000 shares offered at 10c.

Being drilled in conjunction with the Emma Copper Mining Co., 1916, and stock active as result of market campaign on Emma Copper, its neighbor.

OLD EVERGREEN M. & T. CO.

UTAH

H. G. McMillan, gen. mgr., 649 E. South Temple St., Salt Lake City, Utah. **Cap.**, \$300,000; shares \$1 par; all outstanding.

Property: 12 patented claims, 3 miles N. E. of Alta, in the Big Cottonwood district, Salt Lake Co., was an old-time producer of gold-copper ore. Developed by 2,700' drainage and transportation tunnel. Idle. Reported in 1915 that operations would be resumed.

OLD GLORY GOLD MINING CO.

OREGON

C. L. Magnum, pres.-gen. mgr., Box 365, Grants Pass, Ore. **Property:** The Old Glory mine on Silver creek in western Josephine county, 4 lode and 2 placer claims, said to show a large lode of low-grade copper ore carrying gold and silver values. Management states property will be equipped with machinery in 1916, and development pushed.

OLD HUNDRED MINING CO.

COLORADO

Office: Room 706, Electric Bldg., Cleveland, Ohio. Mine near Silverton, San Juan Co., Colo. **Officers:** Howell Hinds, pres.; W. S. Briggs, sec.-treas.; preceding with H. H. Burgess, E. P. Price and Frank S. Whitcomb, directors; J. M. Elmer, supt. Inc. June, 1906, in Maine. **Cap.**, \$5,000,000; shares \$5 par.

The company has authorized \$400,000 of series "A" first mortgage 6% bonds, none issued. The mine was floated by Thos. Nevins & Sons, of

New York, who advanced the money for its equipment and development.

Property: 26 claims, patented, 500 acres, in Cunningham gulch, on Galena mountain, San Juan district, 5 miles north of Silverton. The Silverton & Northern railway runs to the mine. Claims show a quartz vein said to be 5 to 12' wide, carrying values in gold, silver, lead and copper, with increasing copper at depth, ore being claimed to carry average values of \$8 to \$12 per ton. **Development:** mainly by tunnel. Mine is claimed to have upwards of 4 miles of workings.

Equipment: includes steam and electric power, numerous buildings, including a store, and the mine has a tramline. The 200-ton mill has 40 stamps, crushers, rolls, jigs, Frue vanners, concentrating and slime tables.

The property was promoted in New York upon representation by engineers that the mine contained bodies of low-grade ore which could be profitably mined if a larger output and lower milling cost could be secured. Despite the new machinery furnished and development done, the mine failed to redeem the promises made and is still awaiting some one who can make it pay by right management and proper ore treatment. Stock regarded as of little value, but property likely to be reopened.

OLD IMPERIAL MINING & MILLING CO. NEVADA

Cherry Creek, White Pine Co., Nev. Advertised sold for \$125 delinquent tax, Jan., 1916.

OLD PUEBLO MINING & MILLING CO. ARIZONA

See Tucson Consolidated Copper Co.

OLD SUSAN MINING CO. UTAH

Office: 411 Felt Bldg., Salt Lake City, Utah. **Officers:** W. H. Simons, pres.; P. F. Thompson, v. p.; E. D. R. Thompson, sec.-treas.-mgr., with F. A. Druehl, directors. **Inc.** 1899, in Utah. **Cap.**, 400,000 shares; 10 cts. par; 257,572 shares outstanding. Annual meeting first Monday in January.

Property: 3 patented claims, 25 acres in Tintic mining district, Juab Co., Utah, shows gold-silver-lead ore in fissure veins in porphyry and monzonite. Developed to depth of 300' by 1,500' tunnel. The mine is now worked by lessees on a royalty basis.

OLD TOWN M., M. & TRANSPORTATION CO. COLORADO

Idaho Springs, Colo. **Officers:** Wm. L. Bush, pres.; Geo. K. Kimball, sec., treas. and mgr., with R. J. Davies, J. Ramsey Speer, and J. B. Phillips, directors.

Inc. 1910, in Colo. **Cap.**, \$1,000,000; shares \$1 par; 738,302 shares outstanding. Gross earnings in 1915 were \$58,628. Annual meeting, 1st Monday in February. Company succeeded the Old Town Consolidated Mining Co., which itself was the successor of the Old Town Mining & Milling Co., both defunct. Property had not been profitable and was sold for a debt of \$60,000 at sheriff's sale, June 15, 1910.

Property: 22 claims, patented, 39,877 acres, in Russell mining district, Gilpin Co., Colo., has the Wautauga vein, carrying a paystreak of 4' average width, with gold and silver-bearing copper ore. **Development:** 2,205' incline shaft with 4,326' of workings and tunnels. Operations in 1915 consisted of 600' of drifting. Management estimates 150,000 tons of \$6 ore blocked out. **Equipment:** includes hoist, pump, steam and electric power and Leyner air compressor.

Production: about 6,760 tons of ore, averaging \$8.40 per ton were treated in 1915, yielding 3,298.11 oz. gold, 5,684.61 oz. silver and 9,992 lbs. copper. Total production to 1916 under present management, \$218,467. Production was mostly from the 1,200 and 1,300' levels. Property worked by lessees.

OLD VESUVIUS MINE**ARIZONA**

Address: C. H. McMahan and brothers, owners, Kirkland, Yavapai Co., Arizona. **Property:** the City Group, known as the Old Vesuvius mine, 6 claims, unpatented, 9 miles S. E. of Kirkland. Shows 4 veins in schist, said to carry 1.2 to 2 oz. gold, 1 oz. silver and 0.8% copper. Developed by several shallow incline shafts. Small shipments made in 1914-19. Planning to retimber and sink one of the shafts.

OLD VETERAN MINING CO.**IDAHO**

Office: Barnard Blk., Wallace, Idaho. **Officers:** M. J. Farrell, pres. gen. mgr.; Allan G. Kennedy, v. p.; L. L. Brainard, sec.-treas.; with F. H. Harper and B. J. Farrell, directors.

Inc. March, 1915. Cap., \$150,000; shares 10 cts. par; assessable; 750,000 shares of stock were sold at 2 cts. per share, upon which assessments of 2 ct. are to be levied every two months.

Property: 7 claims, 2 miles above Burke, Shoshone county, shows several fault fissures. Developed by 1,500' of tunnels. No. 3 tunnel was being driven 300' at last accounts.

OLD YUMA MINE**ARIZONA**

Col. Epes Randolph, owner, Tucson, Ariz. Mine closed, Aug., 1916. **Property:** 40 unpatented claims, about 14 miles W. of Tucson, Pima Co., Ariz., shows a fissure vein, 40' wide in andesite, carrying gold, molybdenite and specularite. Ore occurs in 4 shoots, each about 300' long, and is said to average \$3 gold and 1¼% molybdenum. Developed by vertical shaft to depth of 320'.

Equipment: includes 15-h. p. hoist, pump, 400' tramway and 400-ton concentrating mill. Concentrates said to average 21% MoO₃. Promises to become an important producer of molybdenum ore.

OLIVIA GROUP**IDAHO**

Owned and operated by Hazlitt & Trader, Dixie, Idaho Co., Idaho. **Property:** 11 unpatented claims, 210 acres in Dixie mining district, shows gold-silver-copper ore in quartz fissure veins, 8"-40" wide, running N. W. with dip 60° N. E. The country rock is granite and gneiss.

Development: by 100' tunnel, 100' vertical shaft and drifts, totaling 1,000' of underground workings. **Equipment:** includes a new 10-ton Huntington mill, which ran only a short time in 1915. Plan driving tunnel on Ironsides claim to depth of 250' in 1916.

ONECO COPPER MINING CO.**MICHIGAN**

Office: 78 Devonshire St., Boston, Mass. Mine office: Hancock, Mich. **Officers:** John D. Cuddihy, pres.; John Brooks, sec.-treas.; preceding with F. L. Maguire, J. E. Fitz Gerald, Jr., directors; John L. Harris, gen. mgr.

Inc. Dec., 1898, in Michigan. Cap., \$2,500,000; shares \$25 par, \$5.50 paid in; issued, \$1,750,000 June 9, 1913. Levied a 50-ct. assessment Jan. 15, 1906, a \$1 assessment Feb. 21, 1910, and a \$1 assessment Oct. 10, 1912. Annual meeting, third Thursday in March. Stock traded on Boston curb. Company its own transfer agent; Federal Trust Co., Boston, registrar.

Property: 800 acres in Houghton county, all on the Keweenaw copper formation, in Secs. 2, 10 and 11, T. 56 N., R. 33 W., forming a main tract of 640 acres, and a smaller tract of 160 acres, adjoining diagonally on the N. E. corner. The property lies east of the Franklin Junior and Rhode Island mines, but is separated therefrom by a quarter mile of intervening lands.

Development: the mine was opened 1862, and exploring was done 1890 and 1898. Work was begun by the company June 26, 1899, on a 2-compartment shaft that was sunk 500'. Drifting on the upper levels showed a bed of fair width, carrying a little copper, and the shaft cut a narrow

fissure, rich in copper, this being of interest because it is one of the few productive crossveins found in the Portage Lake district. The bed on which the shaft was sunk has been variously identified as the Isle Royale, Grand Portage and Kearsarge amygdaloids, but is now termed the Oneco amygdaloid.

Work was suspended 1900 until Aug., 1909, when diamond drilling was begun, 10 drill holes being bored, cutting the Oneco bed on which the shaft is sunk, and an unidentified amygdaloidal bed, called the Torch Lake or Tomahawk lode, about 1,200' west of the Oneco, cores from both beds showing more or less copper. Drill holes were bored to depth of 1,000 to 1,700', locating the eastern sandstone and giving 2 complete cross-sections, 2,700' apart.

The mine was reopened Nov., 1910, and drifting resumed on the 4th level. The shaft has been sunk to a depth of 1,250' and extensive drifting on the 9th, 10th, 11th and 12th levels, both north and south, has shown the vein to be 10 to 20' wide and well mineralized. Mine has been idle since 1913, due to lack of funds.

ONEIDA-STAGG MINING & MILLING CO.

COLORADO

H. T. Rogers, mgr., Idaho Springs, Colo. Inc. 1914, as a consolidation of the Oneida and Stagg Mining companies. Mine at Freeland, 5 miles from Idaho Springs.

Development: by 1,000' tunnel and a 150' raise from the tunnel level, which cut a 5' vein of gray copper ore, said to assay as high as 4% copper, 10 oz. silver and .52 oz. gold. A 50-ton cyanide mill was erected in 1914 to treat the ore by the continuous decantation system, but was remodeled in 1915 to use the oil flotation process. Milling costs are placed at 85 cts. per ton of ore treated. Production from development work pays all operating expenses.

ONONDAGA COPPER CO.

MICHIGAN

Houghton, Mich. **Officers:** Reginald C. Pryor, pres., treas. and gen. mgr.; C. H. Lang, v. p.; Wm. Duffney, sec., with Ward B. Smith and D. L. Robinson, directors.

Inc. April 22, 1912, in Michigan. **Cap.**, \$3,750,000; shares \$25 par; \$4 paid; issued, 99,955. Stock listed on the Boston Exchange. Paul Revere Trust Co., Boston, transfer agent; State Street Trust Co., registrar. Balance sheet Feb. 1, 1916, shows \$46,585 on hand, as against \$74,675 on Jan. 31, 1914.

Property: 10,230 acres in Ontonagon county, Mich., near the White Pine mine of the Calumet & Hecla Co. The formation, a fine-grained sandstone, has been exposed by surface trenching at several points and found to carry flake copper in considerable quantity. The values appear to be patchy, but as the ore frequently averages 10% where cross-faults occur, a commercial average may reasonably be expected.

Development: is confined to diamond drill work. The first hole completed in Jan., 1913, has a depth of 1,912' and is apparently in the horizon of the Isle Royale-Arcadian lode. Hole No. 2 is 1,500' deep. Hole No. 5 driven in 1913 to 2,000' depth, failed to reach the contact. In 1914 holes Nos. 6, 7, 8 and 9 were drilled, making a complete cross-section from the S. E. corner of Sec. 14 to the N. W. corner of Sec. 4. None of the lodes cut in the holes gave cores showing copper in commercial quantities. Owing to unsettled conditions work was discontinued Sept. 21, 1914. Drilling near the northern boundary was started July, 1915, each hole exploring the territory farther south. In the extreme S. E. corner the lode was located at 1,100' depth, but revealed no copper values. Drilling is being continued in 1916.

ONONDAGA MINES CO.**COLORADO**

Office: 717 Onondaga Bank Bldg., Syracuse, N. Y. Mine office: Georgetown, Clear Creek Co., Colo. Arthur H. Osbor, mgr.; T. Kyner, supt.

Property: the Onondaga and Colorado Central-Aliunde group on Leavenworth Mountain, Georgetown. In the Onondaga, the Ruler vein, 18" wide, showing gold-silver-lead ore, is under development through the Capital tunnel. Drifts are being run eastward on the vein at 3 different points. The Aliunde group has about 30 miles of underground workings, including the Hall and Doric tunnels; the latter will be advanced to intersect the Ruler vein of the Onondaga. The Aliunde is reported to have produced milling ore which yielded 275 oz. silver per ton in former years.

Equipment: includes compressor, hoist and power plant. **Production:** from development work amounts to about 20 tons daily of \$9 ore, mainly from the 180' and 100' levels. Employs 30 men. Surface equipment was to be added in 1916.

ONTARIO MINING CO.**IDAHO**

Officers: M. A. Folson, pres.; Stanley A. Easton, treas. and gen. mgr. An apex suit brought by the Stewart Mining Co. was decided in favor of the Ontario Mining Co., giving the latter company a verdict for \$48,245.

Property: on Ontario Creek, adjoining the Stewart in the Kellogg-Wardner district, Shoshone county, shows quartz fissure veins carrying pyrite, sphalerite and galena ore, and proved to be the southern extension of the main Stewart orebody. The vein system is faulted, as in the Stewart, and the ore crushed, making mine operations troublesome.

Development: by 800' crosscut tunnel from which a shaft was sunk to 320' depth. **Equipment:** includes a 200-ton mill.

Profits in 1914 were \$239,175. **Production:** in 1915:

Tons Mined	Gross Value	Cost Extrn.	Cost Trans. & Red.	Net Profits
81,208	\$689,392	\$265,728	\$223,724	\$223,724

ONTARIO SILVER MINING CO.**UTAH**

Offices: 163 So. Main St., Salt Lake City, and Room 1208, 32 Broadway, New York. Mine office: Park City, Utah. **Officers:** J. E. Bamberger, pres.; Ernest Bamberger, v. p.-treas.-gen. mgr., with D. M. Hyman, John S. Critchlow, Wm. C. Osborne, H. G. McMillan and Walter Linforth, directors. Herbert Cohen, sec.; J. L. Tilton, New York, asst. sec. Newton A. Dunyon, supt.

Inc. 1887, in Calif. **Cap.**, \$15,000,000; shares \$100 par; all issued. Stock is listed on New York Exchange. Union Trust Co., New York, registrar. Annual meeting, third Monday in January. Was at one time the largest silver producer in Utah with a total production of about \$35,000,000 gross and a dividend record of \$14,932,500.

The annual report, Dec. 31, 1915, showed receipts from ore sales and royalties, \$72,682; disbursements, \$60,586; cash and bullion on hand, bonds and other liquid assets, \$312,574.

Property: the Ontario mine, 800 acres, patented, across the divide from the Emma Copper Co., at the head of Little Cottonwood canyon; also owns the Weber Coal Co., 811 acres coal land and the New Quincy and Naildriver Mining companies.

The Ontario is an old and very famous silver-lead mine in which the ore occurs in a great pipe and chamber deposit in limestone. Ore shows an increase in zinc content at depth. In December, 1915, the manager decided to reopen the Ontario mine below the 1,500', or Drain tunnel No. 2 level. The old workings were unwatered to the 1,700' level and work

is progressing on the 500, 1,000 and 1,500' levels in 1916, on company account.

Development: about 60 miles of old workings, includes two tunnels and a shaft 2,000' deep. From the 900' level to surface, mine is worked by lessees employing 70 men and reported shipping at the rate of 250 tons per month, 1916.

Equipment: includes 3½ miles power line, 2 electric pumps, hoist, compressor and 100-ton mill.

Stock believed to have a speculative value in addition to its liquidating value of about \$8 per share. Although the high-grade ore is mined out there is much low-grade ore left in the property which will yield a fair profit with silver at 64c or better.

ONWATTA MINE

ARKANSAS

W. C. Settles, supt. Mine in Dodd City district, Marion Co., Arkansas, shows lead ore with calamine, smithsonite and cadmium ore, occurring in fissures or fault breccias, the zinc ore averaging better than 60% metallic content. The formation is limestone. An intermittent producer.

OOM PAUL CONSOLIDATED MINING CO.

IDAHO

Office: Wallace, Idaho. **Mine office:** Burke, Idaho. **Officers:** Jas. F. McCarthy, pres.-mgr.-treas.; F. H. Richardson, v. p.-supt.; L. E. Hanley, sec., with E. H. Moffitt, J. B. Sloan and Walter Mackay, directors.

Inc. April, 1907, in Idaho **Cap.**, \$1,600,000; shares \$1 par; assessable; 1,397,598 shares issued. Stock listed on Butte and Spokane Exchanges.

Property: 10 patented claims, 200 acres in Coeur d'Alene district, near Burke, shows silver-lead ore in fissure veins traversing a quartzite formation. Driving a 3,000' crosscut tunnel, in 1,200', Jan. 1, 1916.

Equipment: consists of an Ingersoll-Rand compressor. A prospect. Company will eventually acquire control of the Central Mining Co., which is to be developed through the Oom Paul tunnel.

OPEX CONSOLIDATED MINES CO.

UTAH

Address: care Knight Investment Co., Provo, Utah. Mine near Robinson, Juab Co., Utah, leased to Emerald Mining Co. See Vol. X, Copper Handbook.

OPHIR GOLD MINES, MILLING & POWER CO.

COLORADO

Succeeded Oct., 1915, by Ophir Range Gold Mining Co., which see.

OPHIR HILL CONSOLIDATED MINING CO.

UTAH

Office: Miner Bldg., Butte, Mont. **Mine office:** Ophir, Tooele Co., Utah. **Officers:** Wm. A. Clarke, pres.; W. C. Siderfin, sec.; E. W. Clark, treas. and gen. mgr.; preceded with Chas. W. Clark, directors. A. G. Swanson, mine supt.; R. H. Dunstan, mill supt.; E. Bowman, engr. Company is managed as a close corporation.

Property: one-half mile north of Ophir, carries the 5' Top-vein, the 20' Big vein, the Middle vein 10', the Copper vein 8', and the Blue vein 6' thick, and from 10'-100' wide. **Ore:** contains argentiferous galena, with pyrite, averaging 8% lead and 10 oz. silver per ton; also some copper and zinc ores. Ores occur as replacements in argillaceous limestone and shale, in 3 clearly-defined shoots, known as the Wild Delirium, Miner's Delight and Western Stope. **Development:** an 1,800' incline shaft, with the usual levels and stopes, also a transportation tunnel nearly 1 mile long, through which all ore is taken. This tunnel intersected the vein on the 1,300' level; it also drains the mine at depth. **Equipment:** includes a steam plant, not operating, and a hoist; there is a gravity tramway from the mine to the 200-ton mill.

Production: averages about 100 tons daily of lead-silver ore, with a little gold and 2½% copper. Concentrates run about 10-12 oz. silver and

10-12% lead per ton. The property is an excellent one. A branch line of the S. P., L. A. & S. L. R. R. was built to the property in 1912.

OPHIR KING GOLD MINING CO.

UTAH

Mine near Ophir, Tooele Co., Utah. Inc. Nov., 1907, in Utah. **Cap.**, \$10,000; shares 2 cts. par, assessable. **Lands:** 30 acres, patented, 9 miles from railroad, adjoining the Ophir Hill and Cliff Mining Co.'s properties and carry auriferous and argentiferous copper and lead ores. Mine has 400' tunnel, with some crosscutting, and several shallow shafts. Property worked under lease in 1913. Property and equipment were sold at sheriff's sale in Nov., 1914, to John B. Holmes, for \$1,750, to satisfy a judgment obtained by Holmes.

OPHIR QUEEN MINING CO.

UTAH

S. Crawford, Cedar River, Mich., controls property.

OPHIR RANGE GOLD MINING CO.

COLORADO

Ophir, San Miguel Co., Colo. Company acquired the holdings of the Ophir Gold Mines, Milling and Power Co., Oct., 1915. W. P. Day, pres.; Peoria, Ill.; A. W. Wilson, sec.; W. H. Staver, mgr. Inc. July, 1915, in Colorado.

Operates a lease on the Suffolk mine, 300 claims, partly patented, at Ophir. **Ore:** gold-silver, in fissure veins, traversing andesite and noted for its pockets of free gold ore. **Development:** by several tunnels from 500' to 2,000' long, with a total of 20,000' of underground workings. **Equipment:** includes 300 cu. ft. air compressor, 5,270' tramway and 100-ton concentrating mill with 2 Wilfley tables.

Production: in 1915 amounted to 2,000 tons of ore. Concentrates averaged \$15 per ton in gold and silver.

OPHIR SILVER MINING CO.

NEVADA

Offices: 265 Russ Bldg., San Francisco and Virginia City, Nev. **Officers:** H. L. Slosson, Jr., pres.; Chas. D. Olney, sec. Inc. April 30, 1860, in Cal. **Cap.**, 201,600 shares; \$1 par; all outstanding. Listed on New York Curb and on San Francisco Exchange. Last dividend paid May 21, 1908.

Property: the Ophir claim, 675' along the Comstock Lode, includes the Ophir mine, at Virginia City, being operated in conjunction with the Mexican Gold and Silver Mining Co., which see.

Production: to 1908, said to be \$15,514,000.

OPHIR-UTAH MINING CO.

UTAH

Idle. Office: Salt Lake City, Utah. Mine near Ophir, Tooele Co., Utah. G. G. Schliep, pres.; C. L. Olson, sec.-treas. Inc. Feb. 13, 1909, in Utah. **Cap.**, \$250,000; shares 25 cts. par; nonassessable. **Lands:** 7 claims, 9 miles from railroad, show copper and lead ores. Has several buildings and a hoist.

OPOHONGO MINING CO.

UTAH

Office: Provo, Utah. Mine address: Samuel Cox, supt., Eureka, Juab Co., Utah. **Officers:** Wm. Hatfield, pres. and mgr.; J. H. Hatfield, v. p.; J. W. Hatfield, sec.-treas. Inc. 1908, in Utah. **Cap.**, \$250,000; shares 25 cts. par; assessable. Shares are listed on the Salt Lake Stock Exchange. **Dividends:** three 1-ct. and two 2-ct. declarations in 1911-12 and one of 2 cts. on Jan. 30, 1913, a total of \$80,907 to 1916. Stock is listed on the Salt Lake Exchange.

Lands: 3 claims, patented, in the vicinity of the Black Jack and Ajax mines. **Development:** by shafts and tunnels, with about 2,000' of workings, to depth of 1,000', with principal workings on the 500' and 700' levels. The mine is operated jointly with the Gold Chain, with which it is connected on the 300' level, and hoisting is through the Black Jack shaft. The 450' level shows an 18' orebody, said to give assays up to 10% copper and

\$60 gold per ton. The 700' level shows this same ore shoot. Present development is mainly in the main tunnel of Gold Chain mine, now being driven to cut the main vein. The 1,000' level shows the fissure in the east drift, but no ore, as the ore shoot has not been reached. Lessees are at work in the upper levels and are getting 7% copper ore on the 300-750' levels. The ore contains 7-10 oz. silver and \$1-\$2 gold per ton.

Machinery equipment, owned jointly with the Gold Chain, includes an air compressor. Production has been intermittent since it began in 1909.

OPPORTUNITY CONS. GOLD MINING CO. COLORADO

Office: 318 Century Bldg., Denver, Colo. Arthur Park, Jas. R. Hayes, L. W. Partridge, Francis B. Choate and D. L. Cubberly, directors. **Inc.** 1915. **Cap.**, \$500,000; shares \$1 par.

Has a 3-year lease and bond on the London Mine, comprising 12 claims, in Pine or Wisconsin district, Gilpin Co., Colo., said to show well defined veins of gold-silver ore. Developed by 204' shaft with 3 cross-cuts, 140', 250' and 132' in length.

Equipment: includes a 10-stamp, 50-ton amalgamating and concentration mill and boarding house. Plan adding electric power.

OPTIMO MINING CO.

WISCONSIN

Property at Linden, Iowa Co., Wisc., is the main producer of lead-zinc concentrates in the Linden district. Operates a 100-ton mill and produces concentrates averaging from 50-59% zinc. **Equipment:** includes electric power, drills and pump.

ORANGE COUNTY COPPER MINE

VERMONT

Strafford, Orange Co., Vt. J. B. Reynolds, mgr. and principal owner, 54 No. Main St., Rutland, Vt. Lovat Fraser, engr.

Lands: 900 acres, held under deed of mining rights, are near the Elizabeth mine, 13 miles from the Boston & Maine railway. Property carries a lenticular orebody, conforming to dip of the country rocks, which include gneiss, under garnetiferous mica-schist and above hornblende-schist, with strike of west of north, and average dip of about 45°. The lens, of 40' extreme width, but not mineralized for the full width, is traceable 4,000' on the property. Ore carries chalcopryrite, disseminated in massive pyrrhotite, averaging 2% copper.

Development: by 110' incline shaft, with about 70' of laterals on the 100' level. **Equipment:** includes steam boilers, a 3-drill air compressor and several mine buildings. Geology is described, Bull. 455, U. S. Geol. Survey. Owner writes Jan., 1916, that "mine is in transition state—new development anticipated."

ORE CHIMNEY MINING CO., LTD.

ONTARIO

Office: 100 Clyde Block, Hamilton, Ont. Mine office: Northbrook, Frontenac Co., Ont. **Officers:** A. E. Fletcher, pres.; J. D. Misener, v. p.; Chas. Narraway, sec.-treas.; preceded with Richard Haggerty, Chas. Zinn, S. A. Edick, J. M. Slater and John M. Fletcher, directors. W. G. Anderson, gen. mgr.

Inc. Oct. 11, 1909, in Ontario. **Cap.**, \$600,000; shares 40 cts. par; non-assessable. Annual meeting, last Tuesday in October. The property was bought of the president for 850,000 shares of stock.

Property: 6 claims, 300 acres, in the Eastern mining district, 50 miles from Kingston and about 11 miles from Kaladar, the nearest C. P. R. R. station. Claims show limestone, conglomerate and schist, and are reported by the management to have a vertical 20' quartz vein traceable 4,000' and carrying galena and chalcopryrite, the ore averaging 1.5% copper, 17% lead, 2% zinc, 68 oz. silver and \$6.60 gold. Development is by 260' shaft.

Equipment: includes two 100-h. p. tubular boilers, 6-drill compressor, hoist good for 500' depth. A 20-stamp mill, purchased in Nova Scotia, is to be erected on the property. Company's prospectus has been subjected to criticism on account of its inaccuracy and misstatements, but company is developing property and apparently successfully so.

ORE EXTENSION MINING CO., LTD.

ONTARIO

Vineland, Ont., Canada. **Officers:** David Fretz, pres.-mgr.; S. Spiece, v. p.; Geo. Laws, sec.-treas., with J. O. Moore and S. R. Lupton, directors. **Inc.** Nov. 1, 1913, in Ont. **Cap.**, \$1,500,000; shares 50 cts. par. **Transfer office:** 354 Hudson St., Buffalo, N. Y. Annual meeting, 2nd Thursday in January.

Property: 167 acres at Northbrook, Lennox and Addington counties, Ontario, said to show gold-silver-lead-zinc-copper ore, in six veins, from a few feet to 40' wide, in diorite and schist. Developed by a 2-compartment shaft 53' deep. Work retarded owing to lack of working funds. A prospect.

OREGON-ARIZONA COPPER CO.

ARIZONA

Mine near Superior, Pinal Co., Ariz. Has steam power. At last accounts was under bond and lease, and said to be controlled by Jack Newman, of Santa Monica, Calif., and associates.

OREGON & BRITISH COLUMBIA MINING & DEV. CO., LTD. B. C.

Office: 826 Northwestern Bk. Bldg., Portland, Ore. Mine at Copper Mountain, near Princeton, B. C. **Officers:** at last accounts, W. J. Peddicord, pres.; Walter T. Woodew, v. p.; G. Evert Baker, sec.-treas.-gen. mgr., with John Mock, directors. **Inc.** Jan. 6, 1906, in Oregon. **Cap.**, \$150,000; shares 10 cts. par; non-assessable; issued, 1,455,000 shares.

Property: 8 claims, crown-granted, 379 acres, well timbered, in the Yale district, B. C. Claims show diorite cut by diabase carrying patches, stringers and disseminations of chalcopryite, bornite and magnetite, without quartz. The ore carries from 1½ to 3½% copper and is said to show as high as \$4.50 gold per ton. **Development:** a 176' tunnel, reported to show 40' of mineralized ground, carrying chalcopryite and bornite, the last 8' of the tunnel said to show an 8' vein of solid ore, with 18" to 2' of talc gangue. Claims adjoin the Sunset mine and other properties of the British Columbia Copper Co. Management expects to resume development work.

OREGON-IDAHO INVESTMENT CO.

OREGON

Baker City, Baker Co., Ore. **Officers:** Jas. A. Howard, pres.; John Arthur, v. p.; Fred R. Mellis, sec.-treas. **Cap.**, \$50,000. Is a small, close corporation organized as a developing and holding company, but whose chief business since 1909 has been the operation of the Baker City, Ore., ore-sampling plant, burned April, 1911, but rebuilt later in the year.

Property: includes the Humboldt mine and Poorman group, 8 claims, 160 acres, surveyed for patent, on Balm creek, 25 miles N. E. of Baker. The group shows a copper-bearing vein for 2,000' that has a gossan cap 200' wide in places.

Development: by an 800' tunnel with several short crosscuts at depth of 100', showing 2.5 to 3.5% copper, present as chalcopryite. The Humboldt mine is being developed by shaft and crosscuts, said to be in good grade milling ore.

O'REILLY GOLD MINING CO.

COLORADO

Reported in 1915 that company was to be reorganized as the Marie Mining Co., and development continued. Owns the Bay State mine, near Breckenridge, Summit Co., Colo. Developed by a 300' tunnel, showing auriferous and argentiferous copper ore.

ORFORD NICKEL-COPPER REFINERY **NEW JERSEY**

Property of International Nickel Co., 43 Exchange Place, New York. Plant at Bayonne, N. J., treats nickel-copper matte from Sudbury smelter. Robt. C. Stanley, supt. of plant; A. J. Wadham, asst. supt.

ORGAN MOUNTAIN MINING CO. **NEW MEXICO**

Office: 204 Mills Bldg., El Paso, Tex. **Mine office:** Organ, N. M. **Officers:** J. I. McCullough, pres.; J. H. May., v. p.; F. W. Campbell, sec.-treas.; with J. C. White, O. J. Jolliffe and T. S. Semple, directors. Inc. 1913, in New Mexico. **Cap.,** \$2,000,000; shares \$1 par; fully paid and non-assessable; issued, about 1,225,000.

Property: 17 claims, 2 patented, 340 acres, 12 miles N. E. of Las Cruces and the A. T. & S. F. R. R. was formerly owned by the Bennett-Stephenson M. & M. Co. It includes the Stephenson, Henderson, Page and Bennett mines, showing 6 veins in carboniferous limestone, lying near or in contact with porphyry dikes. Veins are said to be from 5'-30' wide, with ore-shoots opened up from 50'-600' in length. Ores are mainly lead, silver, copper and wulfenite.

Development: consists of a 3-compartment shaft, 400' deep, 2,000' drainage tunnel and several thousand feet of drifting. Mine was discovered 1849, and closed 1911; is credited with a production to 1915 of about \$1,000,000.

Equipment: includes 200-h. p. plant at mine and 250-h. p. plant at mill; together with 3 hoists, pumps and 2 air compressors of 9-drill capacity combined. Mill includes 2 Joplin jigs, 3 Wilfley tables, 1 vanner and 2 slimers.

The American S. & R. Co. has taken a 10-year bond and lease (March 15, 1915) on the property. The option calls for a loan to the Organ M. M. Co. of \$20 000 for 3 years, 50% of net smelter proceeds and the expenditure of \$125,000 on development work. The purchase price is \$500,000, and royalties will be applied on the purchase price if completed within 4 years.

ORIENT GOLD MINES, LTD. **WASHINGTON**

Office: 511 Hyde Block, Spokane, Wash. **Mine at Orient, Ferry Co., Wash.** Frank Ansley, pres. and mgr.; E. E. Doan, v. p.; Thos. R. L. Harris, sec.-treas.; L. F. Hachess and Geo. Burness, directors; R. Strawhun, supt. **Cap.,** \$1,500,000.

Property: the White Elephant mine with 6 claims, located 3 miles south of the Canadian border, and an equal distance from Rock Cut. The mine is a gold producer, but contains gray copper ore. The mineral zone, 75' wide, lies between diorite and andesite.

Development: by a 225' incline shaft sunk on the vein with a dip of 70° E. Workings on the 100' level show disseminated pyrite ore carrying from \$3 to \$6 per ton, with occasional shoots of copper ore. **Equipment:** includes steam plant, compressor, sawmill, etc.

Property reported taken over by a Spokane syndicate, March, 1916, and cyanide plant to be erected.

ORIENTAL CONSOLIDATED MINING CO. **KOREA, ASIA**

Office: 15 Broad St., New York. **Mines and works:** Unsan district, Korea, Asia. **Officers:** H. C. Perkins, pres.; Leigh Hunt, v. p.; Frederic Bull, 2nd v. p.-treas., 34 Pine St., New York; with L. T. Haggin, Ogden Mills, J. S. Fassett, Wm. P. Palmer and H. F. Meserve, directors; George Kennaby, sec. **Officers in Korea:** Alf. Welhaven, gen. mgr.; Thos. W. Van Ess, asst. gen. mgr.; C. A. Crispin, auditor; E. S. Barstow, supt. of transportation; J. B. Lower, supt.; J. A. Vernon, asst. supt., of Tabowie, Taracol, Candlestick, Chintui & Prospects; F. W. Deal, supt. of Maibong & Kuk San Dong; W. H. Aldridge, mech. engr.; J. N. Fletcher, supt. of Fuel & C

Timber Ry.; A. B. Palmer, cashier; E. L. Power, M. D., physician; W. D. Townsend, agent, Chemulpoo.

Inc. Sept. 29, 1897, in W. Va., to operate mining concessions in Korea. Cap., \$5,000,000; outstanding \$4,293,900, and the balance is owned by the company; shares \$10 par. No bonded debt. Stock transferred and dividends paid at 15 Broad St., New York. Listed on London Stock Exchange.

Comparative General Balance Sheet: (June 30)

ORIENTAL GOLD MINING CO.

CALIFORNIA

A subsidiary of Croesus Gold M. & M. Co., 734 Fifth Ave., N. Y. City. Mine office: Alleghany, Sierra Co., Calif. W. S. Pearson, mgr. **Property:** the Oriental mine, on Kanaka creek, about 1½ miles W. of Alleghany, has 2 quartz veins in granite and schist, with strike N. 70° W., and dip 35° N. The ore contains pyrite, arsenopyrite and gold.

Development: by tunnel 4,150' long and several crosscuts. **Equipment:** includes 10-stamp mill with two 6' Frue vanners. Property was idle for several years, but control was acquired by the Croesus Gold M. & M. Co., and development work is now under way.

ORIGINAL AMADOR CONSOLIDATED MINES CO. CALIFORNIA

Office: 1225 Broadway, Oakland, Calif. T. S. O'Brien, supt., Amador City, Amador Co., Calif.

Property: 6 claims, covering 4,400' on the lode at Amador City, is said to carry a system of parallel quartz veins, from 12'-50' wide, with diabase hanging and Mariposa slate footwall. **Development:** by incline shaft to depth of 780'. The ore is mined by the shrinkage stope method.

Equipment: includes Ingersoll-Rand compressor driven by 100-h. p. motor, double-drum hoist, drills and 20-stamp mill for amalgamation and concentration of the ore, making an extraction of 90%.

The concentrates average \$80 per ton. The mill was remodeled in 1915 and is equipped with 4 trommels, 2 Dorr classifiers, two 8x3' Hardinge conical mills, 2 hydraulic classifiers with 3 spigots each, Deister double-decked sand and slime tables and a cyanide plant. Capacity has been increased from 90 tons daily in 1914 to about 300 tons in 1916. Operating costs reported at \$2.56 per ton. Employs 32 men.

ORIGINAL BANNACK MINING CO. MONTANA

Office: 302 D. F. Walker Bldg., Salt Lake City. **Officers:** Lorenzo Price, Jr., pres.; A. J. Bruneau, v. p.; E. F. Mobley, sec.-treas.; with W. L. Smith and Ambrose Nord, directors.

Inc. in Utah. Cap., \$1,000,000; shares \$1 par; assessable; 600,000 shares outstanding. Listed in Salt Lake City.

Property: 9 patented claims in the Bannack mining district, Bannack, Mont., adjoining the Bannack Gold Mining Co., and said to have the extension of the latter's ore zone. Credited with a production of \$350,000. Management claims there is an ore-shoot 1,800' long and from 50 to 125' in width, containing "hundreds of thousands of tons of ore, that will average \$11 per ton," values mainly in the gold content, with some copper, a statement that is a gross exaggeration.

Reported in June, 1916, that property had been equipped with new machinery, including a 325 cu. ft. compressor and a 25-h. p. gasoline hoist, and would be systematically developed to the 300' level.

ORIGINAL MINING & MILLING CO. CALIFORNIA

Merced, Mariposa Co., Calif. **Property:** the Original Quartz mine, 4 unpatented claims, at Merced, in Sec. 21, T. 3 S., R. 19 E., said to carry a 2' vein, with slate hanging and footwall.

Development: by 640' shaft and several thousand feet of workings. **Equipment:** includes compressor, electric hoist, machine drills, 10-stamp mill and several buildings. Employs 40 men.

ORION MINING & MILLING CO. ARIZONA

Office: 733 Central Bldg., Los Angeles, Calif. Mine office: Oatman, Mohave Co., Ariz. **Officers:** J. L. Humble, pres.; C. J. Rhodes, v. p.-gen. mgr.; Wm. H. Wise, sec.-treas.; F. F. Brush, mgr., Oatman.

Inc. 1915 in Ariz. Cap., \$1,250,000; increased March, 1916, to \$1,500,000; shares \$1 par.

Property: 170 acres, 70 patented, at Oatman, includes the Gold Dust group, one of the oldest gold producers in the district. **Development:** by several shafts from 100' to 550' deep, a 100' tunnel, crosscuts and drifts.

Equipment: includes 360 cu. ft. compressor, 75-h. p. electric hoist, 20-stamp mill and cyanide plant, mine buildings and dwellings. Developing in 1915.

ORIZABA MINING & DEVELOPING CO. NEVADA

Offices: Goldfield and Orizaba, Nevada. Company is controlled by the Diamondfield Black Butte Reorganized Mng. Co. **Officers:** L. K. Koontz, pres.; L. L. Patrick, v. p.; Harry B. Ruhl, sec.-treas.; with P. V. Rovnianek and A. V. Rovnianek, directors.

Inc. 1915. Cap., \$1,000,000; shares \$1 par; 700,000 issued.

Property: 6 claims, in process of patent, 120 acres, at Orizaba, Nye county, shows gold-silver-copper-lead ore in veins 2-7' wide, occurring on a contact between limestone and granite. The main vein strikes S. 20° E., with dip 70° S. W.

C. D. Wilkinson reported on the property in Oct., 1915, and estimated

1,500 tons of \$20 ore exposed in the mine and 1,200 tons of \$12 ore on the dumps. Developed by 95' shaft with 140' east drift on that level. A prospect.

ORO AMIGO PLATINO MINING CO.

NEVADA

Goodsprings, Nev. **Officers:** S. E. Yount, pres.; Geo. A. Fayle, v. p.; H. K. Riddell, sec.-treas.-mgr.; with N. B. Hunter and Fred A. Hale, Jr., directors.

Inc. Nov., 1914, in Nevada. **Cap.**, \$1,000,000; shares \$1 par; 465,450 shares issued. Annual meeting, Jan. 15th. Operating expenses for 1915 were \$8,500.

Property: 3 unpatented claims, 60 acres, in Yellow Pine mining district, Clark Co., Nevada, about 2 miles N. E. of the Boss mine. **Ore:** quartz and plumbogjarosite in fissure veins in limestone. Values are copper, gold, platinum and palladium, occurring in shoots 6'-4' wide. **Development:** by 2 tunnels, 70' and 150' long, with 500' total underground workings. Not yet producing.

ORO BELLE DEVELOPMENT CO.

ARIZONA

Address: Crown King, Yavapai Co., Ariz. Inc. in 1915 by C. C. Cowan to operate the Oro Belle and Gray Eagle gold mines, formerly owned by Tiger Gold Mining Co., now held under lease from Mrs. Hattie Barnes, care Theron Davis, 170 Broadway, New York.

Property: 10 patented claims, 172 acres, 5 miles S. E. of Crown King, Arizona, shows pyrite and chalcopyrite in fissure veins, 2'-15' wide. Veins strike N., dip 60° W. Ore is said to assay \$20 gold, 2 oz. silver and 1% copper per ton.

Development: by 8 tunnels, longest 1,000', and a 600' shaft. **Ore reserves:** estimated April, 1916, at 5,000 tons of \$20 ore. **Equipment:** includes a 50-h. p. steam hoist, compressor and 20-stamp, 60-ton mill.

Production: 19,010 lbs. fine copper, 9,937 oz. silver and 4,313 oz. gold in 1907; 3,639 oz. silver and 1,823 oz. gold in 1908; 4,802 lbs. fine copper, 2,725 oz. silver and 1,226 oz. gold in 1909. Property was idle until Oct., 1915, when company started operations. Mine credited with total production to date of \$700,000. Employs 20 men.

ORO BELLE MINES CO.

CALIFORNIA

W. B. Andrews, Duluth, Minn., pres.; H. W. Fesing, Houghton, Mich., sec.-treas.

Property: the Oro Belle Mine and millsite, in Hart Mining district, San Bernardino Co., Calif., about 14 miles W. of Searchlight, Nev. **Ore:** mainly gold, occurs in two veins. On the 700' level the vein is said to be 6' wide and to carry 4' of ore averaging \$8 per ton. The Woodward lode was cut on the 100' level, showing a width of 125' and giving assays of from \$5 to \$20.

Development: by 814' vertical main working shaft with levels at every 100', a total of 2,700' of lateral work.

On Feb. 10, 1915, the Oro Belle entered into an agreement with the Tonopah Belmont Development Co. whereby the latter should undertake the development and equipment of the Oro Belle mine under a 1-year lease and bond, and eventually pay the debts of the Oro Belle Mines Co. (not to exceed \$27,000), in consideration of which the Tonopah Belmont should receive 500,000 shares of stock in a new company to be organized to take over the mine, with an option on further 100,000 shares of treasury stock at par, \$1. The option was relinquished within the year and the Oro Belle is presumably idle.

ORO COBRA MINING CO.

ARIZONA

Address: Thos. Wilkinson, pres. and gen. mgr., 715 High St., Burling-

ton, Iowa. Operating office: Prescott, Ariz. Mine near Wenden, Yuma Co., Ariz. At last accounts, Judge John J. Hawkins, v. p.; S. M. Wilkinson, sec.-treas.; R. R. MacDonald, supt. Inc. Oct., 1901, in Arizona. Cap., \$1,500,000; shares \$1 par; nonassessable; fully issued. Annual meeting, second Tuesday in February.

Property: 14 claims, 280 acres, in the Tank Pass section of the Harcuvar mountains, Ellsworth district, 12 miles west of Wenden. The claims show diorite, schist, granite and porphyry, with several fissure veins, from a few inches to 20' in estimated average width, carrying oxidized ores near surface, said to assay 12 to 15% copper, and \$1.50 to \$80 per ton in combined silver and gold values, with chalcopyrite, at shallow depth. Mine is opened by shafts of 250', 150' and 40', and a tunnel of 110' with 700' of workings. Only assessment work done in 1915.

ORO FINO MINING CO.

CALIFORNIA

East Auburn, Calif. **Officers:** Geo. H. Hyde, pres.; J. B. Landis, v. p.; Haines Gridley, sec.-treas.-mgr. Inc. Aug. 29, 1913, in Calif. Cap., \$200,000; shares \$1 par; 189,865 outstanding. Annual meeting, 1st Monday in August.

Property: the Bellevue & Bullion mines, 7 claims, 4 patented, 80 acres, in Ophir Mining district, Ophir, Placer county. Shows a fissure vein, 1'-4' wide, running E.-W., with dip of 75°, between schist hanging-wall and grano-diorite footwall. Ore is quartz with some sulphides, assaying from \$7-\$10 per ton in gold and silver.

Development: by 340' vertical shaft, with a total of 2,000' underground workings. Management estimated 12,000 tons of ore blocked out, Dec., 1915.

Equipment: includes 50-h. p. electric hoist, Leyner compressor, electric pump, and 10-stamp, 35-ton mill. Mill started operating in Oct., 1915.

ORO GRANDE MINES CO.

ARIZONA

Office: Clinton, Ia. Mine near Wickenburg, Maricopa Co., Ariz. **Officers:** at last accounts, G. E. Lamb, pres. and treas.; Geo. B. Upton, v. p. and gen. mgr.; F. W. Ellis, sec.; and T. G. Norris, directors. Inc. 1901 in Arizona. Cap., \$3,000,000; shares \$10 par; nonassessable; issued, \$2,500,000. Is a close corporation, controlled by 6 shareholders. Annual meeting, second Tuesday in January.

Property: 9 claims, patented, 161 acres, in the Black Rock district of Yavapai county, shows contact deposits, between diorite and hornblende-schist. The one under development, with strike of N. 27° E. and vertical dip, is estimated by management as 170' wide, traceable 4,400', carries oxidized ores, bornite and chalcocite, with gold values estimated to average \$5.40 per ton. **Development:** by shafts of 320', 100' and 100', with about 8,000' of workings, and is reported to have blocked out 980,000 tons of ore.

Equipment: includes a 55-h. p. gasoline plant at the mine, with a 15-h. p. hoist and 5-drill Sullivan air compressor.

The 50-ton mill has ten 1,050-lb. stamps with a 40-h. p. gasoline engine; water is pumped, for milling, from Box canyon on the Hassayampa river.

The manager reports a saving by straight amalgamation of 99% of assay values and having made 60-day mill-runs with a total cost of \$1.87 per ton, for mining, milling, pumping and all expenses, which is interesting, if true. Idle since 1914.

ORO OLD GLORY MINE.

ARIZONA

G B. Williams, owner, 316 Meigg St., Rochester, N. Y. A. J. Fraser, supt. **Property:** the Old Glory, or Oro mine, 10 claims, unpatented, in the Oro Blanco district, 30 miles west of Nogales, Santa Cruz Co., Ariz. Mine shows a 16' fissure vein with a 5' paystreak of silicious sulphide ore carrying copper and lead with gold.

Development: carried on since 1911 consists of a 350' shaft with 2 levels

and ground opened for stoping. In 1915 \$1,000 was spent on the property. **Equipment:** includes pumps, tramway and mill. Mine has produced about \$50,000 worth of ore to 1916. Plan sinking winze and continuing drift on vein at 350' level.

ORO-PLATA MINE.**ARIZONA**

Address: O. B. Stanton, supt., Kingman, Mohave Co., Ariz., and 101 Wall St., N. Y. Property is a gold mine, producing lead-zinc ore, with gold and silver values. **Development:** by 280' shaft; equipped with gasoline hoist. Mine has mill with 2 Nissen stamps. Credited with production of \$500,000 in gold and silver.

ORONOGO MUTUAL MINING CO.**MISSOURI**

Guy H. Waring, Oronogo, Jasper Co., Mo., mgr. **Property:** 40 acres of zinc bearing land, includes the Old Judge mine on the Elliott land, the Hockaday tract, purchased from the American Z. L. & Sm. Co. and mining rights of city lots at Oronogo.

The Old Judge is developed by 2 shafts, 165' and 170' deep. **Equipment:** includes 16 air drills, 2 electric hoists, 2 compressors, Carterville crusher and a new 500-ton electrically driven concentrating plant with 2 sets of jigs, slime tanks and 11 tables.

Production of zinc concentrates was begun the latter part of 1914. About 85 men employed.

ORPHAN BOY MINING CO.**UTAH**

Idle. Milford, Utah. At last accounts, James R. Craig, pres.; W. D. Williams, v. p. and mgr.; Chas. A. Doe, sec.-treas.; foregoing, with M. R. Williams and Geo. H. Williams, directors.

Property: in Star district, 20 miles S. W. of Milford, Beaver Co., Utah, shows limestone, cut by quartz monzonite, with ore in veins and replacements. There are 11 claims, adjoining the Red Warrior and Mowitza mines, developed by 500' shaft with 1,200' of tunnels and workings from which considerable high-grade ore has been shipped. Vein, though narrow, has bodies of lead-carbonate ore carrying a little copper. Presumably doing annual assessment work.

ORPHAN COPPER CO.**ARIZONA**

Property sold under judgment in 1913 and since idle. Fully described Vol. XI, Copper Handbook.

OSBORN CONSOLIDATED MINING & MILLING CO.**UTAH**

American Fork, Utah. **Officers:** at last accounts, S. Osborn, pres. and gen. mgr.; W. D. Loveless, v. p.; Alfred J. Osborn, sec.-treas. Inc. July 17, 1907, in Utah. **Cap.**, \$125,000; shares 25 cts. par.

Property: 9 claims, in American Fork canyon, about 4 miles from Park City, shows veins of 5 to 8' width, carrying lead values near surface, developed by a number of shallow shafts and shaft tunnels. The 200' main shaft is sunk at an incline of 42°. Copper ores occur in depth in many of the adjacent mines and are expected here. Development meagre. Presumably idle.

OSCEOLA CONSOLIDATED MINING CO.**MICHIGAN**

Office: 12 Ashburton Place, Boston, Mass. Mine office: Osceola, Houghton Co., Mich. **Officers:** E. V. R. Thayer, pres.; Jas. MacNaughton, gen. mgr.; Wm. H. Dwelly, Jr., E. V. R. Thayer, J. M. Longyear, Wm. D. Calverly, D. S. Dean, Benj. Joy and Guy W. Currier, directors; C. H. Bissell, sec.-treas.; G. L. Osgood, asst. sec.-treas.; Frank H. Haller, supt.; A. Lincoln Burgan, mill supt.; Chas. D. Hohl, chief engr.; Jas. Rowe, mng. capt. Osceola branch: Jos. Discombe, mng. capt. North Kearsarge branch: Frank Lands, mng. capt. South Kearsarge branch: John T. Reeder, purch. agt.; Wm. Veale, chief clerk.

Inc., 1873, in Michigan, and reincorporated 1903 for a term of 30 years. Cap., \$2,500,000; shares \$25 par; issued, \$2,403,750. State Street Trust Co., Boston, registrar; American Trust Co., Boston, transfer agent. Shares are listed on the Boston Stock Exchange. Annual meeting, second Thursday in March. Company is controlled by the Calumet & Hecla Mining Co., through ownership of 32,750 shares. Balance sheet of Dec. 31, 1915, shows net earnings of \$1,610,860, and a surplus of \$2,166,646.

Dividends: company has paid 82 dividends, beginning 1878, to March, 1916, aggregating \$13,627,925. Recently dividends have been \$2 in 1904; \$4 in 1905; \$16 in 1906; \$7 in 1907; \$2 in 1908; \$14 in 1909; \$8 in 1910; \$7 in 1911; \$12 in 1912; \$7.50 in 1913; \$3 in 1914; \$8 in 1915; \$3 in Jan. and \$4 in March and June, 1916.

Net earnings were \$677,105 in 1908; \$1,070,645 in 1909; \$758,586 in 1910; \$664,628 in 1911; \$1,163,288 in 1912, equivalent to \$12.09 per share; \$381,967 in 1913; \$353,677 in 1914; \$1,610,860 in 1915.

Property: 2,120 acres, in 4 separate tracts, also an extensive mill site, in Houghton county, and miscellaneous lands in Houghton and Keweenaw counties, Michigan. Company's property includes the Osceola, North Kearsarge, South Kearsarge and Tamarack Junior mines.

The Osceola mine proper, 720 acres, lying next south of the Calumet & Hecla, was opened, 1873, on the Calumet conglomerate; this bed proving unremunerative, work was begun on the Osceola amygdaloidal bed, parallel and 730' east of the Calumet conglomerate. The Osceola amygdaloid has a strike of approximately N. 39° E., and is opened by six shafts numbered from north to south. Crosscuts have been sent from the Osceola workings to the Calumet conglomerate, at various depths, without encouragement, and diamond drilling was done, 1904, to locate and test the Kearsarge amygdaloid on the old Osceola tract, but the results were not encouraging. It is said that the company ceded the right to mine the Kearsarge bed on its property to the Laurium Mining Co., in exchange for certain surface rights.

The 4 northernmost shafts of the Osceola mine proper are abandoned. No. 5 Osceola shaft, 700' S. E. of No. 3, is 4,667' deep. No. 6 Osceola shaft, formerly known as the Opechee, 1,300' S. W. of No. 5, is 4,734' deep. This shaft shows some good stopes, especially on the lower levels in the southern drifts, toward the Tecumseh mine.

The compressor house is equipped with a 50-drill Nordberg 2-stage cross-compound air compressor.

Water is secured from Lake Superior through a 1½-mile line of 6" pipe, connecting with a stand pipe at the Tamarack mine, leading to a 130,000-gal. concrete reservoir between Osceola shafts Nos. 5 and 6.

The Kearsarge or North Kearsarge mine, 1,120 acres, lies north of the Wolverine, with which it has underground connections. Extensive diamond drilling, 1905-07, showed considerable good stamp rock in the foot and hanging walls, at points where the main bed was impoverished. Diamond-drill boring costs were \$2 to \$3 per foot, as against \$6 to \$8 per foot for drifting. The Kearsarge amygdaloidal bed ranges 16 to 20' in width, in this mine, and has proven very bunched, though with very good average values. The southern workings, approaching the Wolverine, have shown improvement, but the mine is richest near the Ahmeek, to the north. About 60 power drills are used in this branch.

No. 1 North Kearsarge shaft is 3,873' deep and has a Nordberg hoist good for 6,500' depth, operating two 6-ton skips in balance. No. 2 North Kearsarge shaft was abandoned at depth of 2,400', some years ago.

No. 3 North Kearsarge shaft, 1,825' N. E. of No. 1, is 3,403' deep and

develops a large area of good ground, especially in the northern drifts. No. 4 North Kearsarge shaft, begun 1907, sunk 75' in the footwall, is 1,622' deep. The shaft is lined with concrete for 185' from surface, and has large loading bins just below the 10th and 13th levels, to which rock is milled through chutes, from the levels above. Equipment of the rock house includes two 40-ton crushers, driven by a special Nordberg engine.

The steel frame boiler house at No. 4 has three 84" Pratt boilers, with room for 2 additional.

The North Kearsarge surface plant includes a stone compressor house and a 30-drill compressor at No. 1 shaft, where are located also the combination machine and carpenter shops, warehouse and office, all of wood.

The **South Kearsarge** mine, 160 acres, lying south of the Wolverine and east of the Centennial, was known formerly as the Iroquois. Development was begun Sept., 1899, and the best stopes are toward the Centennial line, the Kearsarge bed averaging about the same width as in the North Kearsarge and Wolverine mines, and being remarkably uniform in copper values. This mine is completely developed, both shafts and all but a few of the drifts having reached the boundaries of the property, and the mine is officially stated to have a life of but 2 years, at the present rate of extraction, without taking into account about 700,000 tons in the pillars and arches; the mining of these will be a slow operation and costs higher than at present.

No. 1 South Kearsarge shaft, the northernmost, is 2,820' deep, and practically at the boundary. The shaft rock house cares also for rock from No. 2 shaft, with which it is connected by an 1,100' trestle. Two skips are operated in balance. No. 2 South Kearsarge shaft is 1,992' deep.

The **Tamarack Junior** mine, 120 acres, lying between the Centennial and Calumet & Hecla, has 2 vertical shafts, on the Calumet conglomerate, No. 2 being 3,360' deep, with 12 levels opened. The Tamarack Junior has been idle since 1903, and apparently is dead, so far as the conglomerate is concerned, with indifferent prospects of finding other workable cupriferous beds on the tract.

Rock is transported from the various mines to the mills by the Hancock & Calumet railway, a branch of the Duluth, South Shore & Atlantic system.

Mill: is built in 2 sections, the main section being 176x213', of steel frame, with 4 Nordberg steeple-compound stamps. These stamps, which are now in very general use in the Lake Superior district, were invented by Mr. Nordberg as the result of some years of experimentation. The stamps have circular mortars, with $\frac{5}{8}$ " screens, and hydraulic separators, about 20% of the copper secured in milling coming from the mortar discharges and separators. The older section has 3 stamps with circular screens having $\frac{3}{8}$ " openings, and is otherwise a duplicate of No. 2 mill.

The wash department of the 2 mills are equipped with Woodbury classifiers and jigs with 6 round tables and 1 Wilfley table for each stamp. The Wilfleys taking headings from the round tables. An Allis-Chalmers Chilean mill reduces over-size material from the stamp mortars and there are crushing rolls and Hardinge mills. Stamping costs were 16.95 cts. per short ton in 1905, and only 11.71 cts. in 1907, the latter figure being the lowest ever reported by any mill for this work, and milling costs were 13.36 cts. per ton in 1908. No figures of stamping costs have been made public since the change in management.

The steel boiler house, adjoining the mills and furnishing power for both, has three 250-h. p. 72" boilers, delivering steam at 150-lbs. pressure,

and nine 250-h. p. 84" boilers operated under 105-lbs. pressure, all of the locomotive-firebox type.

The power plant has an Allis-Chalmers Corliss engine, operating a 100-k. w. Morgan-Gardner d. c. generator, furnishing current for 220-volt incandescent enclosed arc lamps.

The joint pump house of the Osceola and Tamarack mines has two 40,000,000-gal. triple-expansion Nordberg pumps having 22", 40" and 60" cylinders, with three 30" horizontal plungers of 52" stroke and 42" discharge. Water is taken through an 8' tunnel, running 1,275' under Torch lake, with 3" intake holes, guarding against clogging by ice.

Production:

	Tons R'k Treated	Lbs. Min. Prod.	Lbs. Cu. Cost		Lbs. Cu. Prod.	Total Cost per Lb.	Rec'd per Lb. Cts.
			per Ton R'k Stpd.	per T. (a)			
1916 (½ yr.)	9,791,439
1915	1,361,089	26,777,790	14.5	\$1.18	19,731,472	10.03	18.19
1914	1,108,447	20,997,900	13.5	1.29	14,970,737	10.79	13.14
1913	735,044	14,945,645	15.4	1.60 (d)	11,325,010	12.30	15.50
1912	1,246,557	24,282,312	14.8	1.23 (c)	18,413,387	10.36	16.63
1911	1,246,596	24,452,912	14.8	1.14 (b)	18,388,193	9.28
1910	1,217,720	25,669,913	15.9	1.28	19,346,566	9.37

(a) Includes mining, transportation, stamping and taxes per ton of rock.

(b) 63,449 tons No. Kearsarge rock stamped at Tamarack mills at a cost of 27.28 cts. per ton.

(c) 77,937 tons No. Kearsarge rock stamped at Tamarack mills at a cost of 24.32 cts. per ton.

(d) 13,379 tons No. Kearsarge rock stamped at Tamarack mills at a cost of 27.88 cts. per ton.

In 1915 the mine costs per ton at the different mines operated by the company were as follows: Osceola, \$1.46; North Kearsarge, \$1.17; South Kearsarge, \$1.04.

Strike conditions and inefficiency of green labor in 1913-14 and the outbreak of the European war later in 1914 contributed to low production and high costs during that time. From Sept. 1, 1914, to Feb. 1, 1915, the mines were operated on a three-quarters time basis. Osceola is a low-grade mine whose profitable operation is ensured by the efficient management of the Calumet & Hecla control.

OSHKOSH-WYOMING MINING CO.

WYOMING

Address: 55 High St., Oshkosh, Wis. Mine near Dillon, Carbon Co., Wyo. **Officers:** O. A. Koch, pres.; E. E. Meeleus, v. p.; H. O. Granberg, sec.-treas. and gen. mgr. **Inc.** June 20; 1904, in Wyoming. **Cap.**, \$1,000,000; shares \$1 par.

Property: 11 claims, 220 acres, in the Battle Lake district, is said to carry fissure veins in gabbro, of 22' estimated average width, opened by shafts of 32' and 72' and a 22' tunnel, showing chalcopyrite and oxide ores of copper. Idle, but company pays taxes and keeps a watchman at the mine.

OSTON LEASING CO.

COLORADO

I. J. Russell, supt. Operates under lease the 7 upper levels of the Thompson shaft on the Elkton Cons. Mining & Milling Co.'s property on Gibbons hill, Elkton, Teller Co., Colo.

Shipments resumed in March, 1916, amounted to 980 tons, estimated to average \$8 per ton. Ore is shipped to the Golden Cycle mill at Colorado City.

OTEGO MINING CO.**WYOMING**

Hecla, Wyo. **Officers:** Horace E. Adams, pres.; A. G. McGregor, v. p.; Ray E. Lee, sec.-treas. **Inc.** in Wyo. **Cap.**, \$5,000,000; shares \$1 par.

Property: 3 claims, about 60 acres, in Secs. 25 and 26, T. 14 N., R. 70 W., in the Silver Crown mining district near Hecla, Laramie Co., Wyo. The Arizona mine is said to show granite and schist cut by an extensively fractured dike of diorite, about 200' wide and 2,000' long, outcropping at surface over a considerable distance. Ore at surface is oxidized and carries principally malachite, succeeded at depth by copper sulphides and native copper. Gold values occur in small quartz veinlets.

Development: by 160' shaft with 102' crosscut at the 80' level, 260' of crosscuts and drifts on the 130' level, and a 100' tunnel. Mine has been reported on by C. E. Jamison, State geologist of Wyoming (1912), and by Prof. H. C. Beeler (1907).

OTERO COPPER CO.**NEW MEXICO**

Brice, via Oro Grande, Otero Co., N. M. **Property:** the Garnet mine group, showing deposits of copper-gold ore in fissures, replacements and contact deposits near monzonite porphyry.

Development: by 500' shaft with an ore-shoot on the 230' level said to run 5% copper and \$6 gold. The mine is equipped with a gasoline hoist.

Property reported, Sept., 1913, under bond and lease to an English syndicate, represented by L. Maurice Cockerill, with J. W. Camphouse in charge as manager. No returns.

OTIS MINING CO.**MISSOURI**

Joplin, Mo. **Inc.** in Missouri. **Cap.**, \$20,000. Operates a lease on 15 acres of mineral bearing land in Sec. 7, T. 27, R. 33, near Joplin.

Development: by 2 shafts to depth of 185'. **Equipment:** includes 300-ton concentrating mill, Carterville crusher, 8 Wilfley and Ripley tables, 11 air drills, steam power hoist and pump. About 60 men employed. Producing since 1914.

OURAY SMELTING & REFINING CO.**COLORADO**

Office: 403 Wyoming Bldg., Denver, Colo. Thos. B. Crawford, pres.; Wm. E. Kreamer, sec.-treas. **Inc.** in Colo. **Cap.**, \$750,000; shares \$1 par; divided into 185,000 7% preferred shares, 82,000 outstanding, and 562,500 common stock, 150,000 shares outstanding.

Property: 435 acres, patented, on the Uncompahgre river, 4 miles from Ouray, Colo. **Development:** by 250' shaft and 3,500' of tunnels and drifts. The company became financially embarrassed in 1914 and the mine was closed down. The 350-ton smelter at Ouray was leased to the Wanakah Mng. Co. and at last accounts was treating about 200 tons of ore daily. The Ouray Smelting & Refining Co. receives 22½ cts. per ton royalty on all ore treated.

OVERLAND MINING CO.**ARIZONA**

Mine near Winkelman, Ariz., adjoins the London Range mine of the London Arizona Copper Co. and "79" mine on the south and west. Claims carry an extension of the main dike system of the London range, showing metamorphic contact orebodies. Hayden Junction is the nearest railway point. Mine reported under lease to M. H. Murphy and W. E. Dunlap, of Kingman, in 1915.

Company has hoist, boilers, etc.

OVERSIGHT MINING & MILLING CO.**WASHINGTON**

Idle. Mine near Republic, Wash. Described in Copper Handbook. Vol. XI.

OWL HEAD COPPER CO.**ARIZONA**

Office: Cameron Holding Corporation, 299 Madison Ave., New York.

Mine near Red Rock, Pinal Co., Ariz. **Officers:** Nott E. Guild, pres.; R. V. Thompson, v. p.; John W. Estell, treas.; J. B. Wright, sec.; with G. F. Kitt, Wm. P. Michel and John B. Frilb, directors. **Inc.** 1910 in Arizona. **Cap.**, \$10,000,000; shares \$10 par.

Property: 24 claims, the Apache Princess group, in the Tortillita mountains, Owl Head mining district, 16 miles N. E. of Red Rock. Lands show a zone, 150' wide, of reddened schist with eruptive dikes, the conditions being said to resemble those of the "porphyry" or disseminated deposits at Miami and Ray. The workings show copper impregnations in the schist and to some extent in the adjoining granite, which is said to give assays of 0.5% to 3% copper and 1 to 3 oz. silver per ton.

Development: by shaft, 150' deep in May, 1916, to be sunk 200'. Cross-cutting and churn drilling is planned. Property considered promising. A $\frac{2}{3}$ interest in the Owl Head Co. is owned by the Cameron Holding Corporation, which is financing the development work. Geological report of O. Metchke must not be taken seriously.

OWOSSO MINING CO.

MISSOURI

H. H. Culver, mgr., 1409 Wall St., Joplin, Mo. The mine is owned by J. L. Harris, Daniel Fisher, Jas. Fisher, Jr., T. G. Shubert, all of Hancock, Mich., and H. H. Culver.

Property: a 10-year lease on 1 claim, 40 acres, on Baker land, in S. E. $\frac{1}{4}$ of Sec. 33, T. 28, R. 32, Jasper Co., Mo., carrying lead and zinc ore in sheet ground formation. This is a virgin mine in the sheet ground field in Duenweg between the Lincoln and Coahuila mines. **Development:** by 242' vertical shaft and 12 drill holes reported all in ore.

Equipment: includes compressor, 8"x8" steam hoist, 3 Gardner pumps and 200-ton concentrating mill with jigs, crusher rolls and tables.

Production: for 1915, begun in Sept., 1915, amounted to 4,240 tons of ore, or \$9,872. Concentrates averaged 58% zinc and 78% lead. Plan addition of electric power and opening up of further ground in 1916.

OXFORD CONSOLIDATED MINING CO.

UTAH

Eureka, Utah. James Crooks, pres.; Geo. Owens, sec.-treas.; C. H. Spriggs, mgr. **Inc.** June, 1909, in Utah. **Cap.**, \$25,000; shares 5 cts. par; assessable.

Lands: 9 claims, patented, show copper and lead ores. Levied an assessment of one-half cent, early 1911, to pay indebtedness incurred through litigation. No work has been done since patent to property was issued.

OXFORD COPPER MINING CO.

IDAHO

Company dormant or defunct. Mine near Pierce, Idaho. Described in Copper Handbook, Vol. XI.

OXIDE COPPER CO.

ARIZONA

Office: 85 Ames Bldg., Boston, Mass. Mine at Silver Bell, near Red Rock, Pinal Co., Ariz. Albert C. Burrage, pres.; Chas. D. Burrage, sec.-treas.

Property: 31 claims, patented, known as the Copper Prince group, in the Silver Bell district, 7 miles south of the Imperial mine, shows contact metamorphic deposits carrying argentiferous copper sulphides in limestone gangue.

Development: by a 500' shaft and a 350' tunnel, with about one-half mile of workings. **Equipment:** includes gasoline power and an air compressor. Churn drilling was done, 1910, to locate disseminated ores, but apparently results were not especially encouraging. **Production** was 49,676 lbs. copper and 103 oz. silver in 1908, and less than \$3,750 worth of ore in 1910; none reported since.

OZARK SMELTING & MINING CO. KANSAS & NEW MEXICO

Office: 601 Canal Road, Cleveland, Ohio. Mine office: Magdalena, Socorro Co., N. M. Philip Argall & Sons, of Denver, Colo., cons. engrs. Smelter: Coffeyville, Montgomery Co., Kans. Geo. A. Martin, v. p. and gen. mgr.; Oliver Box, asst. gen. mgr.; L. P. Pressler, supt.; W. S. Stevens, mill supt.; W. E. Cortis, smelter supt. The company is a subsidiary of the Sherwin-Williams Paint Co.

Property: includes the Graphic mine, 30 claims, 227 acres, with total holdings of 800 acres, in the Magdalena district, showing limestone, shale and quartz, carrying contact ore deposits between limestone and schist, of about 50' proven width, 500' length, and known depth of 500'. The upper workings show large quantities of lead and zinc carbonates, ores being mainly smithsonite and sphalerite, with some cerussite and argentiferous galena, and occasional cuprite and native copper. Ores are mainly low in grade, with principal values in zinc. The ore-shoot, of about 500' length on the 7th, 8th and 9th levels, is about 100' wide on the 9th level.

Development: is by a 300' shaft, and two 1,500' cross-cut tunnels, with about 8 miles of workings, the lower levels showing a slightly argentiferous sulphide complex of zinc, lead and copper. Property regarded as one of the largest zinc deposits of America.

Equipment: mill was erected, 1912, to treat the large tonnage of low-grade complex zinc-lead-iron sulphide ore already developed, by the froth flotation process, using it as an adjunct to older methods of concentration. A 50-ton mill does dry concentration on ores above 20-mesh, and wet concentration on ores below that size. Electric power is used.

Production: mainly zinc ore, is shipped to the works at Coffeyville, for the manufacture of lead and zinc oxides, as the base for pigments, of which the Sherwin-Williams Co., in control of this corporation, is one of the largest American manufacturers. Company has an option on the Kelly mine at Kelly, N. Mex., owned by the Tri-Bullion Sm. & Dev. Co., and is working same with much success.

PACHUCA; COMPANIA BENEFICIADORA DE. MEXICO

See Santa Gertrudis Co., Ltd.

PACIFIC COPPER CO. MICHIGAN

Office: 701 Sears Bldg., Boston, Mass. Mine office: Leopold Bldg., Houghton, Houghton Co., Mich. **Officers:** Geo. P. Gardner, pres.; Chas. J. Paine, Jr., sec.-treas.; preceding, with W. Cameron Forbes, Chas. E. Perkins, Chas. J. Paine, E. V. Thayer, Geo. P. Gardner, T. N. Perkins, Walter Hunnewell and R. G. Goodell, directors; F. W. Nichols, agt. **Inc. Aug., 1890, in Michigan. Cap., \$1,250,000; shares \$25 par; issued, \$1,000,000, \$2 paid. Is controlled, through ownership of about 20,000 shares, by St. Mary's Mineral Land Co. Paid a \$1 dividend Nov. 18, 1910. Ended 1914 with \$26,087 cash on hand.**

Property: 820 acres, the N. W. $\frac{1}{4}$ and the S. W. diagonal half of the S. W. $\frac{1}{4}$ of the N. E. $\frac{1}{4}$ of Sec. 4, and Sec. 5, T. 54 N., R. 34 W. Land lies just N. W. of the Atlantic mine, and supposedly carries the northern extension of the Atlantic ashbed, on which a little exploratory work was done previous to organization. Has done no mining work since 1890.

Of the \$40,000 originally raised by sale of 20,000 shares, one-half was spent in prospecting work. The timber on the lands has been sold at various times and 140 acres sold to the Naumkeag Copper Co. From these sales and interest on funds, company has distributed 40,000 cash and 4,000 shares of Naumkeag Copper Co. stock to its stockholders.

PACIFIC COPPER CO., LTD.**MEXICO**

Address: F. C. Stephens, P. O. Box 1656, Mexico, D. F. Mine office: Petatlan, Galena, Guerrero, Mex. **Officers:** Dr. W. S. Cockrell, pres.; Thos. Milan, v. p.; J. P. Taylor, sec.; H. J. Morden, treas.; F. C. Stephens, gen. mgr.; preceding, with J. N. Gilbraith and Carlos Eisenmann, directors.

Inc. May 16, 1906, in Mexico. **Cap.**, 10,000,000 pesos; shares 100 pesos par; nonassessable; fully issued. Company holds direct title to its property through the Compania de Cobre del Pacifico, and is in turn controlled through stock ownership by the Pacific Copper & Pyrites Co.

Property: 1,000 pertenencias, 2,471 acres, known as El Rey del Cobre group, near the Rio Murga, in La Union district, 10 miles north of Petatlan and about 28 miles N. E. of Zihuatanejo, the nearest port. The property shows contact deposits in metamorphic schist, the main lode having a N. E. strike, traceable 3 miles. No. 3 orebody, reported to have a maximum width of 197', carrying lenses of cupriferous pyrite, is developed by 2 crosscut tunnels, drifts and raises to depth of 234' below the outcrop. No. 5 orebody, about 1 mile to the S. E., has only been slightly developed; the nature of the ore in both is said to be identical. Ore is estimated to average 1.5% copper and 40c in silver and gold per ton, with 48% sulphur and 42% iron.

Development: by "A" shaft of 109', "B" shaft of 70', El Socavon drift tunnel of 400', No. 3 crosscut tunnel of 404', No. 4 crosscut tunnel of 486', No. 5 tunnel of 243', and No. 1 tunnel of 407', with a total of 3,050' of workings. **Ore reserves:** estimated at 3,000,000 tons of ore blocked out, Jan., 1916.

Equipment: includes a hoist, not installed, good for 1,000' depth, and a small air compressor. There are about 35 buildings. Property lies in a very rugged country and is reached only by trails.

The property has been under development several years. Development work continued without interruption from the warring factions in the present revolution until 1915. Company is planning to build a railway to Zihuatanejo and to add equipment at the mines. The mine, though of low grade, apparently contains large orebodies and is considered promising.

PACIFIC COPPER MINING CO.**ARIZONA**

Office: 415 Board of Trade, Kansas City, Mo. Mine office: Crown King, Yavapai Co., Ariz. John Kelley, pres.; W. J. Morse, sec. **Inc.** Feb. 8, 1907, in Arizona. **Cap.**, \$3,000,000; shares \$1 par; nonassessable; issued, \$2,397,616.67.

Property: 30 claims, 10 patented, 600 acres, including a mill and smelter site, 4 miles from Harrington and 9 miles from a railway, in the Silver Mountain district of the Bradshaw mountains. Claims show a hornblende phase of Yavapai schist, with an intrusive porphyry dike of 50 to 150' width, carrying contact deposits of 9', of 14' and of 25' estimated average width, traceable 3,000', with N.-E. strike. Gossans are much leached, carrying honeycombed hematite and limonite, with occasional copper carbonates. **Ores:** malachite and azurite, succeeded at 50' by secondary chalcocite, bornite and chalcopyrite. The management estimates ore to range from 3 to 15% in copper, with good silver and gold values.

Development: consists of 1,500' of work, with a 500' shaft and several prospect workings.

Equipment: includes a 120-h. p. plant, with an 80-h. p. 3-cycle vertical engine, connected to a 4-drill Sullivan air compressor, a 20-k. w. triplex pump, and a 40-h. p. gasoline hoist. Presumably idle.

PACIFIC COPPER & PYRITES CO.**MEXICO**

Office: 1429 Monadnock Blk., Chicago. John Howard McElroy, pres.; C. B. Greenleaf, sec.; Eugene Atkins, treas. **Inc.** 1913 in Maine. **Cap.**,

\$7,500,000; shares \$50 par. Is a securities-holding company, controlling the Pacific Copper Co., Ltd., through ownership of over two-thirds of that company's outstanding share capital.

PACIFIC GOLD MINING & MILLING CO.

UTAH

(See Fissures Exploration Co.)

Office: American Fork, Utah. **Officers:** J. L. Craig, pres.; Jas. Chipman, Jr., v. p.-treas.; H. C. Johnson, sec.-mgr.; with A. B. Stevenson, A. K. Thornton, directors. **Inc.** 1900 in Utah. **Cap.**, \$100,000; shares 10 cts. par; assessable; \$400,000 shares outstanding. Annual meeting, 1st Monday in Feb.

Property: 6 patented claims, 120 acres, in American Fork mining district, Utah Co., Utah, shows quartzite and limestone, carrying several fissure veins varying in width from 17" to 15'. Veins strike N. 30° E. and dip 50° N. W. **Ore:** lead-silver sulphide, estimated by management to average 50% lead, 25 oz. silver, .02 oz. gold, 1.5% zinc, 15% iron, 0.1% copper, 22% sulphur.

Development: by 3 tunnels, 300', 700' and 1,000' long, with about 5,000' of workings, estimated to show 100,000 tons of ore blocked out for stoping, Dec., 1915. The main fissure was cut at depth of 500'. A drift was run on the vein 100' S. and another 500' N.; at the end of the latter a crosscut made to the hanging-wall was reported, May, 1916, to have disclosed 18" of copper glance assaying 22.7% copper and 512 oz. silver. Three carload shipments in 1915 gave average returns of \$50 per ton or \$7,300. Total production to date about \$32,000. Property operated under a 5-year lease, from 1914, by the Fissures Exploration Co., on a royalty basis.

PACIFIC MINES CORPORATION.

CALIFORNIA

Offices: 120 Broadway, New York, and Cutler Bldg., Rochester, N. Y. **Mine office:** Stagg, San Bernardino Co., Calif. **Officers:** J. N. Beckley, pres.; David I. Walsh, v. p.; J. H. Hobbs, sec.-treas.; Josiah Antstice, asst. sec.-treas.; above, with Jas. M. Curley, Col. Sir Henry Mill Pellatt and D. C. MacDonald, directors; Frank W. Royer, mgr. **Inc.** 1910 in New York. **Cap.**, \$1,000,000; shares \$5 par; reincorporated May 2, 1916, in Maine. **Cap.**, \$1,000,000; shares \$1 par; 642,000 shares issued; 300,000 shares treasury stock offered to the public, May, 1916.

International Trust Co., Boston, and U. S. Corporation Co., New York, transfer agents; Federal Trust Co., Boston, and U. S. Corporation Co., New York, registrars. Company is a consolidation of the Bagdad Chase Gold Mining Co. and the Roosevelt Mining & Milling Co. **Dividends:** to end of 1912, \$205,440. Last payment of 2% paid July, 1916. Listed for 642,000 shares on Boston Curb.

Property: 15 claims, patented, about 300 acres, in Bullion Mountain district, 9 miles from Ludlow. Country rock is trachyte porphyry and quartz monzonite. Orebodies occur in a silicified breccia along an E.-W. fault line, and have an average dip of about 35° N. Ores carry malachite and oxides with a little chalcocite and average 1.5% copper, 1.56 oz. silver and 0.36 oz. gold per ton.

Development: by about 8,000' of workings, including three shafts, deepest 300', and several tunnels. **Ore reserves:** estimated at 100,000 tons of \$10 ore and 200,000 tons of \$5 ore, according to report of F. W. Royer.

Equipment: includes an 85-h. p. Union gas engine, 3 hoists and a 10-drill compressor. Company also owns the Ludlow and Southern 9-mile standard-gauge railroad, with 2 locomotives.

Production: to end of 1915 is estimated at \$3,000,000. Production in 1914 and 1915 was about 100 tons per day. Shipments made under contract to United Verde smelter at Clarkdale, Ariz., reported to show net profit

of \$4.49 per ton. Management plans increasing shipments to 200 tons in 1916 and erecting a mill to treat the low-grade ore on the property.

PACIFIC SMELTING & MINING CO. MEXICO

Office: 42 Broadway, New York. Mine and smelter office: Fundicion, Sonora, Mex. **Officers:** Melbert B. Cary, pres.; Geo. M. Ryall, v. p.; Nelson S. Haughwout, sec-treas.; preceding, with Ronald E. Curtis, Howard McWilliams and Charles E. Wetmore, directors; Thornton C. Kirkland, asst. gen. mgr.

Inc. Oct. 6, 1909, in Maine. **Cap.,** \$8,000,000; shares \$5 par, issued in \$1,787,850 convertible cumulative 7% preferred stock and \$6,212,150 common stock; all issued. United States Corporation Co., New York, registrar. Annual meeting, third Monday in January, at Augusta, Maine. Listed on New York Curb.

General balance sheet: Dec. 31, 1915, shows property and securities, \$8,409,848; furniture, etc., \$200, and cash and accts. receivable, \$161,505, last item showing \$838 reduction, the others identical with 1914 statement. Liabilities: \$8,000,000 for stock, \$237,972 accts. payable, compared with \$235,241 in 1914, and \$333,581 surplus compared with \$337,150 in 1914.

Holdings: company controls the Douglas Copper Co. and Mexican Exploration & Mining Co. by ownership of 98% of the capital of each company. These constituent companies hold practically the whole of the capital of 3 other Mexican companies. The subsidiary Mexican corporations are the Anita Mines Co., Yaqui Mining Co. and the following smelting companies: Compania Metalurgica y Refinadora del Pacifico, S. A., owning the Fundicion smelter; the Mexican American Smelting & Refining Co., S. A., owning the Guaymas smelter and the Sinaloa Smelting Co., holding the Mazatlan, or Sinaloa, smelter concession.

Anita Copper Mines Co., S. A., owns the Anita, Consolidated, Baroyeca, London, Julia and Maria claims, 330 acres, belonging to the Anita mine, 25 miles north of the Fundicion smelter and the station of that name on the Southern Pacific Railroad of Mexico. This mine has been developed to a depth of 900' on the dip of the vein and is said to show ore reserves above the 7th level, amounting to 55,000 tons, that average \$2.58 gold, \$1.17 in silver and 3.99% copper.

Geology: the Anita (or El Cobre mine), has a shear zone of 115' width, with a diorite foot and trachyte, or rhyolite hanging wall. The shear zone, traceable for several thousand feet, with N.-S. strike and dip of about 45° W., carries ore in 5 lenses, or chimneys, the principal one being opened from the surface down to the 8th level, branching into 2 parts at the 6th level. Faulting, cross-faulting and brecciation occurs with displacements up to 200'. The ore is partly metasomatic replacement of diorite, and partly a contact metamorphic deposit. It contains the usual oxide minerals succeeded in depth by chalcopyrite.

Development: consists of a 900' inclined main shaft, No. 1, with 9 levels opened and about 7,415' of workings. There are also 4 other shafts. The management plans further work as soon as enough basic custom ore is available to supply a suitable furnace mixture. Courtenay de Kalb reported that his examination showed about 55,000 tons of ore blocked out, with good indications for development of further orebodies.

The surface equipment consists of 2 cross-compound 2-stage Rand compressors of 3,000-cu. ft. combined capacity; a Risdon second-motion duplex hoist, 14x21"; three 150-h. p. boilers; generator for light and power; rock-crushers, picking tables, shops, assay office, office buildings, warehouses, dwellings, supplies, etc.

El Cobre ranch owned by the company has approximately 10,000 acres of wood and timber land.

The Pirita mine, of the Anita Copper Mines Co., embraces Pirita No. 2 and Pirita No. 3 claims, 81 acres, located 5 to 7 miles from Victoria station on the Southern Pacific Railroad of Mexico. The mines contain a considerable tonnage of pyritic ore having small values in gold, silver and copper, but the deposit has not been extensively developed on account of poor transportation, though in time it will become of value to the company for fluxing purposes.

Yaqui Mining Co., S. A. owns 10 mining properties in Mexico, which are as yet but partly developed. The Rosamond and Aurora mines each have about 800' of development work, exposing a fair tonnage of commercial copper-silver ore. The company also owns a number of slightly-developed prospects and some old mines nearby.

Compania Metalurgica y Refinadora del Pacifico, S. A. owns the Fundicion smelter and other properties. The smelter was built originally to treat the ores of the Anita mine and to do general custom business. The smelting plant has a capacity of 350 tons a day, but was designed and in part equipped for 3 times that amount. The plant has one 42x160" blast furnace, sampling mill, power house, shops, administration buildings, etc. A railway connects all departments. Electric plant furnishes current for both lighting and power purposes, and all machinery excepting yard locomotives is motor driven. The plant is of modern design and in excellent condition.

The mine is 23 miles from a railway, and ore is hauled to the smelter by Saurer motor trucks. The road is good for 18 miles and bad for 5 miles, frequently muddy, with grades up to 12%.

The L'Aime lime quarry, located 2 miles from the railway near Victoria station, has 75 acres of limestone forming a hill 250' high, 300' wide and approximately 3,000' long. The rock is an excellent smelting flux, averaging but 1.2% silica, with about \$1 in gold; it was because of this gold content, determined by a special Government commission, that the company secured it as mineral land.

The Fundicion smelter was in blast for 9½ days in May, 1908, treating 300-tons charge daily, but owing to tap jacket troubles, about 15% of the value of the tonnage smelted was tied up in cleaning. As a result of this run, 3 carloads of matte, amounting to 73.5 tons, were shipped to the Nichols Copper Co. for refining. The shipment contained, as per report, 27,868 oz. silver, 172.2 oz. gold and 67,993 lbs. of copper and returned a net value of \$26,869.12. Mr. W. B. Budrow, who was the smelter superintendent at the time, and who had been connected in a similar capacity with several of the Guggenheim smelters, referring to the operation of the furnace, stated: "The performance of the furnace during this operation was very satisfactory, both from a metallurgical and economical point of view. The matte produced was clean and averaged over 46% copper, and notwithstanding the fact that it carried high values in both silver and gold, the slag losses in those metals were quite low."

Mexican-American Smelting & Refining Co., S. A., owns the Guaymas smelter with 250 acres, at Batuecas, a suburb of Guaymas, on tide water, lying between the Bay of Guaymas and the Southern Pacific Railroad of Mexico. The plant was originally erected by William C. Greene, founder of the Greene-Cananea Copper Co., and not having been operated for some years will need extensive alterations.

The Sinaloa Smelting & Refining Co., S. A., owns a concession from the Government for a smelter at Mazatlan, or elsewhere in the state, for a

period of 20 years from the 27th day of April, 1906, and is particularly exclusive in its terms.

The smelters have been closed down since 1910.

Reported in May, 1916, that several carloads of ore, assaying 4-5% copper and \$4 gold per ton, had been shipped to El Paso.

PACKARD EXTENSION MINES CO.

NEVADA

Lovelock, Nev. **Officers:** Anton Lassen, pres.; W. R. Chadwick, v. p.; David H. Skea, sec.-treas. and cons. engr.; with R. H. Young, V. A. Twig, and F. J. Howard, directors. **Inc.** Jan. 6, 1916, in Nevada. **Cap.**, \$1,250,000; shares \$1 par; 750,000 shares issued.

Property: 5 claims, unpatented, 90 acres, in Rochester mining district, Humboldt Co., adjoining the Nevada Packard ground, shows a shear zone of rhyolite with fissure veins, said to be 3-15' wide, with N. E. strike and dip of from 20-30°. Veins carry silver chloride and free gold. David H. Skea, consulting engineer for the Packard Extension, reports that the claims owned by the company cover the actual extension of the Packard ore shoots on the downward rake in a course to the S. W., and that the great ore zone of the Packard mine should be found in Extension ground at a depth of about 250-300' beneath the surface. Company plans sinking a 300' shaft in 1916. Wm. Coyle is developing the Argentite No. 1, and Argentite Fraction under lease.

PACKARD NORTH EXTENSION MINING CO.

NEVADA

Lovelock, Nev. **Officers:** T. P. Ebert, pres.; Frank Margrave, v. p.; J. W. Kromer, sec.-gen. mgr. **Inc.** 1916, in Nevada. **Cap.**, \$1,000,000; shares \$1 par.

Property: 4 claims, adjoins the Nevada Packard ground, at Lovelock. **Management reports:** "Our property is so closely associated with that owned by the Nevada Packard Mines Co., that a description of their vein system is practically a description of ours. Their veins run N. and S. and presumably all enter our ground, though but one outcrops. It is on this vein we are working and upon which our lessee is working. It is our intention to drive a tunnel which will cut all veins at considerable depth." The vein was cut in tunnel B, about 250' from the portal and drifts run N. and S. for 125', in March, 1916. Property is still in the prospect class.

PALISADE COPPER CO.

NEVADA

Address: T. W. Smith, supt., Bullion via Elko, Nevada. Owen Goldsmith & Co., Elko, Nev., are largely interested, but company is controlled in Boston, Mass.

Property: the old Heckla & Silver King mines, 2 claims, patented, at Bullion, Nev., held under bond and lease. In May a large body of high-grade copper ore was found in cleaning out an old tunnel; four 40-ton cars of \$50 copper ore were shipped, May 22, 1916. Property is an old silver-lead mine, idle for many years.

PALO VERDE COPPER CO.

ARIZONA

Office: Akron, Ohio. C. H. Howland, Cuyahoga Falls, Ohio, mgr. **Officers:** Will Christy, pres.; J. P. Loomis, v. p.; I. M. Shively, sec., with Chas. Currie, E. E. Quirk and C. H. Howland, directors. **Inc.** in Arizona. **Cap.**, \$2,000,000; shares \$1 par; issued \$1,000,000.

Property: 8 claims, is a copper prospect about 40 miles west of Phoenix, in the Saddleback mountains, between White Tanks and Eagle Tails districts, Maricopa Co., Ariz.

Mine is opened by shafts of 50, 112 and 210' depth and a 130' tunnel. Surface ores said to contain 2 to 15% copper. Plans to resume work in 1916.

PALOMA EXTENSION MINING CO.

UTAH

Office: 218 Judge Bldg., Salt Lake City, Utah. Thos. Marioneaux, pres.; Lorin Hall, sec. Inc. in Utah. Cap., \$50,000; shares 5c par; assessable; 645,000 shares outstanding. Listed in Salt Lake City.

Property: 300 acres in Star mining district, Beaver county, shows N. E. fissures carrying silver-lead-copper ore. These fissures cross contacts between limestone beds running N. and dipping E., quartzite that runs E. and dips N., and a granite or quartz monzonite. Ore occurs where the contacts are crossed by the fissures.

Development: by a new shaft, to be sunk 200' in Summer of 1916. Property a prospect.

PALOMA GOLD AND SILVER MINING CO.

UTAH

Office: Judge Bldg., Salt Lake City, Utah. Mines and works: Moscow, Beaver Co., Utah. Officers: M. P. Braffet, pres.; Chas. W. Olson, v. p.; with W. Scowcroft, H. B. Cole and B. F. Caffey, directors. R. D. Pomeroy, sec.-treas.; W. B. Hall, supt.

Inc. in Utah. Cap., \$100,000; shares 10 cts. par; assessable, last assessment levied Aug., 1916. Stock is listed on the Salt Lake Exchange.

Property: 14 claims in Star district, near Moscow, said to cover 3,000' along a limestone-monzonite contact intersected by 2 fissure veins, carrying silver, lead and copper ore. In April 1916, management reported encountering what is believed to be the extension of the Hoosier Boy east-west fissure.

Development: by 500' of trenching and an old 400' incline shaft, which was being deepened in June, 1916, and will be used as a main working shaft.

PANDORA COPPER MINING CO., LTD.

IDAHO

Address: Box 170, Wallace, Idaho. Mine office: Larson, Shoshone Co., Idaho. Walter H. Hanson, pres.; John C. Weatherhead, sec.-treas. and gen. mgr.; preceding officers and C. M. Baillie, directors.

Inc. Oct., 1906, in Idaho. Cap., \$1,000,000; shares \$1 par; assessable; issued, \$450,000. Annual meeting, fourth Wednesday in October.

Lands: 10 claims, 150 acres, adjoining the Snowstorm mine on the east, and supposed to carry about 3,000' of the Snowstorm ore zone. Property shows St. Regis and Revett quartzites, with copper impregnations in the latter. Development: includes 1,700' main, or working tunnel, which has not yet crosscut the vein. Only assessment work was done in 1915.

PANDORA SYNDICATE

ALASKA

L. J. McAtee, sec.-treas., 104 8th St., Spokane, Wash. Property: the Pandora mine, on Knight's Island, bonded by Burns, Jordan & Welch Co. to this new syndicate for \$650,000, May, 1916. Mine has 40' ledge of copper ore said to run 2%-6% with \$2 gold.

PANTHER CITY MINING CO.

NEVADA

Office: c/o M. R. Sanguinet, sec.-treas., 1st National Bank Bldg., Fort Worth, Tex. Wm. Bryce, pres.

Property: 7 patented claims in 2 groups, the Panther City and Olinda, in Salmon River mining district, Elko Co., Nev. Ore said to carry copper, silver and a trace of gold. Plans to start development work in 1916.

PARADISE MINING CO.

ARIZONA

Paradise, Cochise Co., Ariz., is controlled through ownership of 60% of stock, by Bisbee-Sonora Development Co., which see.

PARAGON CONSOLIDATED MINING CO.

IDAHO

Office: 436 Sibley St., St. Paul, Minn. Mine office: Paragon, Idaho. Officers: Geo. S. Monson, pres.; M. O. Nelson, v. p.; F. O. Hammer, sec.-treas., with W. W. Dunn, Geo. J. Rank, R. C. Patterson, mgr. L. W. Stedman, supt., and N. A. Stockett, directors.

Inc. Nov., 1908, in Minnesota. **Cap.**, \$1,500,000; shares \$10 par; non-assessable; outstanding, \$1,203,680. Bonds: authorized \$100,000; outstanding, \$15,000. Annual meeting in November.

Balance sheet for year ending Nov. 1, 1915, shows total disbursements, \$14,461, of which development and operations took \$9,927. Sales of ore yielded \$10,663.

Property: 43 claims, 19 patented, about 850 acres, in the Coeur d'Alene district, shows fissure and contact orebodies. Values are in lead, zinc, silver and gold. Extent of workings, about 16,000'.

Ore is concentrated in a mill, capacity about 100 tons, leased from the Black Horse Co. Mainly zinc concentrates are shipped. Power is developed at water-fall nearby, but operations have been hampered by scarcity of water. The mine has been an intermittent shipper during the past few years.

PARAGON MINING CO.

COLORADO

Henry C. Demming, gen. mgr., 15 N. 3rd St., Harrisburg, Pa. Is successor of Tirbircio Gold Mining Co.

Property: 400 acres of lode and placer claims near La Plata, La Plata Co., Colorado, is developed by 1,500' of adits. **Equipment:** includes 1,000-ton rock crusher, a 50-stamp and a 10-stamp mill. Manager reports March 20, 1916, "The company expects to have in bank by 1st of May, about \$50,000 to pay for the necessary additions and improvements and to start up the mills as soon as the improvements have been made."

PARCIONERA CONSOLIDATED MINING CO.

MEXICO

Address: Jos. S. Qualey, pres., 25 Pine St., New York city. Mine office: Santa Eulalia, Chihuahua, Mex. Ernest Henderson, sec. Is a close corporation, shares \$100 par. **Property:** a silver-lead mine, with some copper. Idle on account of Mexican revolution.

PARK CITY MINES CO.

UTAH

Care of American Flag Mine, Park City, Utah. **Officers:** J. H. Leavell, pres.; H. R. MacMillan, v. p.; John Pingree, sec.-treas. Inc. in Utah. **Cap.**, \$1,000,000; shares \$1 par; 521,526 shares issued, 36,000 in treasury, June, 1916. Listed on Salt Lake City Exchange.

Company has bond and lease on the American Flag mine at Park City, for \$250,000 and owns 34,000 bonds and 65,000 shares of American Flag stock. **Development:** 1,150' shaft, with levels and drifts. Ore reserves estimated at 10,000 tons. Production to June, 1916, \$400,000, the ore averaging \$31 (\$20 net).

PARKER GROUP OF MINES

COLORADO

John H. Meager, owner, Silverton, San Juan Co., Colo. **Property:** 5 claims, about 2 miles N. E. of Silverton, said to show a fissure vein in andesite-lime-porphry formation, traceable at surface for several thousand feet. The ore is a sulphide, containing copper, silver, gold, iron and molybdenum.

Development: by several tunnels and crosscuts. A prospect.

PARRY SOUND COPPER MINING CO., LTD.

ONTARIO

Office: 500 Germania Life Bldg., St. Paul, Minn. Mine office: Parry Sound, Ont. **Officers:** Frank Johnson, pres.; Otto Monson, sec.-treas.; preceding with John Ogren, A. Linderholm, and F. X. Benning, directors. Inc. March 23, 1899, in Ontario. **Cap.**, \$5,000,000; shares \$1 par; issued, \$4,500,000. Liabilities are given at \$45,000 floating indebtedness, and a \$3,000 mortgage at 6% on 200 acres of land. Annual meeting, second Tuesday in August.

Property: 10 claims, 1,000 acres, one-half freehold and one-fifth held

subject to a \$3,000 mortgage, on the eastern shore of Georgian bay, property including the McGowan and Wilcox mines.

The Wilcox mine has outcroppings of 4 parallel veins in a width of about a quarter mile, with a 145' shaft on a 20' vein in granite-gneiss, traceable 1,000', carrying auriferous and argentiferous bornite, assaying 2.8 to 11% copper. There also is an opencut, 20x150', 18' deep, showing 3% chalcocopyrite.

The McGowan mine has shafts of 100', 100' and 250', and a 150' crosscut tunnel, showing bornite and occasional chalcocopyrite, with quartz gangue. A smelter shipment of 240 tons of selected ore returned 17% copper and \$5 per ton in combined gold and silver values.

Equipment: includes a 10-stamp mill, hoisting machinery and several buildings. Idle, but management plans further work.

PATAGONIA MINES & DEVELOPMENT CO. ARIZONA

Office: Schmid-Shattuck Bldg., Patagonia, Santa Cruz Co., Ariz. Thos. Ewing, pres. and gen. mgr.; John A. Campbell, sec.-treas.; D. W. R. Davis and Charles Wighard, directors. **Cap.**, \$1,000,000; shares \$1 par; 850,000 shares in treasury.

Lands: 4 claims, including the Santa Rita in Josephine canyon, Patagonia, the Oklahoma group of 8 claims, and the San Antonio mine, in the Sierra Azul mountains, 30 miles S. W. of Cananea, Mexico.

Shipments from Patagonia in 1914 to the Copper Queen smelter assayed 30 oz. silver, 13.72% copper, netting \$46.28 per ton. No returns reported since.

PATRIQUIN QUICKSILVER MINE CALIFORNIA

Owned by Louis and A. G. Patriquin, Parkfield, Monterey Co., Calif. Gross earnings for 1915 were \$60,000 and operating expenses, \$12,000.

Property: 6 claims, 110 acres, in Sec. 2, T. 23 S., R 14 E.; near Parkfield, is said to show cinnabar ore in veins and in chamber deposit in serpentine. Orebody said to be 3,000' long, with N. W. strike and dip of 60° N. E.

Development: by 360' tunnel and a total of 3,200' of workings. **Equipment:** includes a 2-ton Johnson McKay retort furnace. A 1-12" pipe retort furnace was under construction, March, 1916. About 1,800 tons of 5% ore were treated in 1915, yielding 340 flasks of quicksilver.

PATUXENT MINE IDAHO

Jas. F. Callahan, owner, Wallace, Idaho. **Property:** adjoining the Cons. Interstate-Callahan on the S., in the Coeur d'Alene district, near Wallace, reported to show a 4' vein of high-grade lead-zinc ore, cut in Dec., 1915, in a fissure zone 50' wide.

PAWNEE MINING CO. ARIZONA

Idle. Mine near San Simon, Cochise Co., Ariz. Described in Copper Handbook, Vol. XI.

PAY CAR MINES CO. ARIZONA

Dead. Stock worthless. Property, near Bouse, Ariz., held by United Mines Co. of Arizona.

PEABODY CONSOLIDATED COPPER CO. ARIZONA

Office: 111 Broadway, New York. Mine office: Johnson, Cochise Co., Ariz. **Officers:** Leo Schlesinger, pres.; Alex T. Wells, v. p.; I. Niner, sec.; J. Born, treas., with Jos. B. Mayer, Morgan J. O'Brien, Jr., Herbert R. Limburg, G. M. Minzesheimer and Jas. Muir, directors. John H. Banks, cons. engr. W. T. Eberhardt, mgr.

Inc. in Ariz. **Cap.**, \$1,500,000; shares \$5 par; fully paid and non-assessable. Empire Trust Co., New York, transfer agent. Listed on New York Curb.

Property: 12 claims, 5 patented, 230 acres, covering 2,000' along the ore belt at the Johnson camp, bought of the Bonanza Belt Copper Co., includes the Peabody mine, located 1879. Mine has a contact deposit between diabase and limestone and replacement veins, all within a 100' belt. Mine is credited with a production of about \$411,970. Ore is a mixture of zinc blende and chalcopyrite in a garnetized lime gangue and is oxidized to a depth of 200'. The ore shipped runs 4%-6% copper, with 5% iron, 15%-20% lime and 55% insoluble; silver averages ½ oz. to each percent copper.

Development: by a 300' shaft, with crosscuts on the 200' and 300' levels. On the 3rd level a crosscut is being driven toward the contact. No ore reserves reported.

Shipments: 300 tons per month are made to the Cons. Kansas City S. & R. Co. (El Paso smelter), a subsidiary of the A. S. & R. Co., under a 3-year contract.

Prospectus issued by company is regarded as rather unduly optimistic. Property is an old one, having been operated intermittently for 20 years. Company plans installing new hoist and 8-drill compressor, 1916.

PEARL LAKE GOLD MINES

ONTARIO

Bankrupt. Property acquired, 1915, by McIntyre Extension Mines, Ltd., a subsidiary of the McIntyre Porcupine Mines, Ltd.

PECOS COPPER CO.

NEW MEXICO

Office: the Arcade, Cleveland, Ohio. Mine office: Cowles, San Miguel Co., N. M. **Officers:** Alfred H. Cowles, pres.; I. C. Gifford, v. p.; Frederick W. Swan, sec. **Inc.** 1904, in Michigan. **Cap.**, \$100,000; shares \$25 par; fully issued and fully paid. The company has a floating debt of \$65,000, owed to stockholders, of whom there are only 5, the company being a close corporation.

Property: 15 claims, 268 acres, and 552 acres including valuable coal veins and placer ground, all patented, in the Hamilton district, 12 miles from Santa Fe. Holdings include water rights to the Pecos river for 2½ miles, with 2,000-h. p. available for development.

Lands show granite, slate and quartzite, underlying lower Carboniferous limestone in which the valley of the Pecos river is cut. The property carries a contact deposit, with ferruginous quartzite on the south, and granite to the north, the mineralized zone, ranging up to 225' in width, traced 1,000', carrying orebodies of 12' width. A brecciated intrusive diorite follows the vein. Ores contain massive chalcopyrite, sphalerite and occasional galena, said to give assays of 7.5% copper, 3-4 oz. silver, 3% lead per ton. The ore, being complex, is difficult of treatment.

Development: includes the 60' Katydid shaft and 370' Evangeline shaft, with 450' of tunnels, claimed to show 210,380 tons of ore, blocked out for stoping, of an estimated value of \$3,560,000. The mine, discovered 1881, was worked for a short time only owing to the zinc ores near the surface proving unworkable, and was taken over 1905, by the present company.

Equipment: includes a 165-h. p. steam plant, with 2 hoists, 1 good for 600' depth, and a 3-drill Rand compressor. Shipments in 1915 reported to have netted \$4.50 per carload. Requests for information ignored.

PECOS MINING CO.

TEXAS

J. Y. Canon and James Dougherty, of Van Horn, Tex., principal shareholders.

Property: the Pecos mine, 3 miles N. E. of the Hazel silver mine in El Paso county, 19 miles from Van Horn, shows a N. E.-S. W. vein in brown igneous tuffs, traceable 2 miles across the mountains to the Red Maverick mine.

Development: by a 105' shaft with a level at 90', showing seams a few

inches thick of copper-silver ore, said to assay 70% copper; the seams in places aggregate 2' in thickness. The mine was first operated in 1888, abandoned after working and relocated 1903, by Geo. Briggs and T. R. Owen, forfeited by technicality of Land Commission and located by J. Y. Canon. Presumably idle.

PEER GOLD MINING CO.**NEVADA**

Clyde Garrett, Gurney Gordon and Harry Cutler, chief stockholders, Reno, Nev.

Property: in Pine Nut range at Como, 8 miles south of Dayton, shows wide vein in andesite. High-grade ore discovered Jan., 1916, showed values of \$73 to \$150. Title to property was attacked 1914 by Dr. R. H. Hartzell and W. E. Vaughn, of Reno, for failure to do annual assessment work.

PEERLESS MINING & MILLING CO.**COLORADO**

Salida, Chaffee Co., Colo. H. F. Schnellker, pres. and gen. mgr.; I. W. Haight, sec.-treas. Inc. Nov., 1904, in Colorado. Cap., \$500,000; shares \$1 par; nonassessable.

Property: the North Pole group, 6 claims, 70 acres, with 10 acres timbered, on Cyclone mountain, in the Monarch district, 16 miles west of Salida, showing several fissure veins in granite. Veins have auriferous and argentiferous lead and copper sulphides, with lead values predominating. The mine has a 1,600' crosscut tunnel and a 65' shaft sunk on the vein. Company resumed operations in 1915 after an idleness of several years.

PELICAN MINING & MILLING CORPORATION.**COLORADO**

Office: 141 Milk St., Boston, Mass. Mine office: Lake City, Hinsdale Co., Colo. Mine is developed by tunnel and has electric power and air compressor. Reported producing in 1916.

PENN CANADIAN MINES, LTD.**ONTARIO**

Office: 1011 Chestnut St., Philadelphia, Pa. Mine office: Cobalt, Ont. **Officers:** Wm. J. Haines, pres.; R. B. Haines, sec.-treas.; with J. D. Haines, E. C. R. Laidlaw, S. D. Wright, A. S. Elliott, directors; B. Neilly, supt. Inc. 1912 in Ont. Cap., \$1,500,000.

Property: the Cobalt Central Silver mine at Glen Lake, in Cobalt district. **Development:** by 17,500' of drifts, crosscuts, raises and winzes.

Equipment: includes mill with 6 Wilfley tables, ball mills and a 75-h. p. motor. The mill treated 24,510 tons of ore during fiscal year ending April 15, 1915, and shipments to American and Canadian smelters amounted to 448 tons.

PENN MINING CO.**CALIFORNIA**

Office: 901 Foster Bldg., Denver, Colo. Mine and works office: Campo Seco, Calaveras Co., Calif. **Officers:** Chas. Loughridge, pres.; Wm. D. McIlvaine, sec.-treas.; Alfred P. Busey, Jr., gen. mgr.; D. C. Smith, metallurgist and smelter supt.

Inc. June 1, 1910, in Wyoming, as successor of Penn Chemical Works. Cap., \$250,000; shares \$1 par. Is operated as a close corporation.

Property: the Campo Seco, Hecla, Little Satellite and Satellite, patented claims, near Campo Seco, in the Foothill copper belt, 80 acres, with a 20-acre smelter-site and 2,305 acres of timber and miscellaneous lands, giving total holdings of 2,405 acres. **Ore:** the ore deposit, having a maximum width of 30' at depth of 400', lies between amphibolite schist and talcose shale, and north of the Campo Seco shaft splits into veins known as the East and West, which continue parallel. Ore is mainly chalcopyrite, associated with sphalerite, sometimes occurring in considerable quantities, and pyrite, and also includes occasional chalcocite and bornite. The average assay of ore smelted in 1914 was 5.5% copper, 2.75 oz. silver, 5% zinc, \$1.65

gold and 23% iron. The gangue ranges from talcose schist, through clay, to quartz.

Development: includes the 1,550' working shaft, No. 3, and a tunnel, also 4 other shafts, 2 on the East vein at the Campo Seco and Hecla mines and 2 on the West vein at the Satellite mine. No. 1 shaft, 300' deep, is useful only for ventilation; No. 2 shaft, 750' deep, at the Campo Seco mine, is the main working shaft, with a compressed air hoist; No. 3 shaft, at the Satellite mine, about 1,300' from No. 2, is 1,550' deep, with levels at 150' intervals, and has a steam hoist; No. 4 shaft, at the Satellite mine, 200' deep, is used as an air shaft and manway; No. 5 shaft, at the Hecla mine, 400' deep, is used as an air shaft. **Ore reserves:** estimated sufficient for two years.

Equipment: includes a 175-h. p. steam plant at the mine, with 50-h. p. and 125-h. p. hoists, good for 1,000' and 2,000', respectively. The smelter has a 400-h. p. steam and electric plant, ice plant, pumping plant and a Nordberg air compressor, capacity 1,400 cu. ft., to supply the mine and smelter. Fuel is crude petroleum, which also is burned in the locomotives. The Southern Pacific railway is 6 miles distant, at Valley Springs, and transportation between that point and the mine is by wagons, making one round trip daily. A short private railway connects the mines and works.

Smelter: the 300-ton smelter, a quarter of a mile from the mine, has a 75-ton 36x72" blast furnace and two 150-ton reverberatory furnaces, latter burning petroleum, and eight 16-ton McDougal calciners. The blast furnace, using semi-pyritic smelting, has not been in operation for several years. A 50% matte, made in two fusions, from the reverberatories goes to the American Metal Co., Ltd., for conversion and refining. The smelter railway, for charging and slags, has electric locomotives. Some cement copper is produced from mine water.

The company has experimented on the Thiogen process for elimination of sulphur. The smelter has been in continuous operation for over 16 years.

Production:	Tons Ore Treated	Lbs. Refined Copper
1915 (a).....
1914.....	42,928	4,007,149
1913.....	50,427
1912.....	51,163	5,175,875

(a) 1915 figures not reported, but management states production about the same as in 1914.

The company has been in litigation for 2 years with surrounding farmers, who claim \$200,000 damages from fumes. Suit was not brought voluntarily by the farmers, but at solicitation of a firm of San Francisco attorneys, who are reported to have offered to stand the expense and divide the spoils.

PENNIAC GOLD REEF MINES CO. CANADA

See Star Lake Gold Mines, Limited.

PENNSYLVANIA-COBALT SILVER MNG. CO. ONTARIO

See Temiskaming Mining Co., Ltd.

PENNSYLVANIA MNG., POWER & REDUCTION CO. COLORADO

Wm. Wright, pres., Boynton, Pa. - Leopold Sternberger, business manager, P. O. Box 972, Denver, Colo. Is presumably a reorganization of the Pennsylvania Mining Co.

Property: at Idaho Springs, Clear Creek Co., the Pennsylvania group, 356 patented and 60 unpatented claims, including several millsites and placers, covers about 2,000 acres. Shows fissure veins with complex lead-

zinc-copper ore, containing silver and gold, also uranium, molybdenum and tungsten.

Development: by shafts and tunnels, including the Lucania tunnel, over 8,000' long. **Equipment:** includes steam and water-power plants, air compressors, a new 10-stamp mill and 2 Wilfley tables. Mine operated by lessees.

PENOLAS MINING CO. (CIA. MINERA DE PÉNOLES). MEXICO

Office: 61 Broadway, New York. Smelting works and mines at Mapimí, Durango, Méx. H. S. Mulliken, mgr. Controlled by the Metallurgische Gesellschaft of Germany.

Cap., 4,000,000 pesos, increased 1910 from 250,000 pesos; shares 100 pesos par. Has paid \$6,500,000 in dividends. **Property:** the Ojuela mine with silver-lead ores in limestone, the San Juan mine, Paloma mines and options on the Cabrillas and Mariposa mines. Company produces iron, lead and silver, with a little copper as a byproduct.

Development: by shafts and tunnels to depth of 3,000', showing porphyry, diorite, lime and shale. The main veins strike N. W. with 45° dip. Twenty-two veins are traceable at surface, showing only carbonates or oxides of iron of little value down to 300'. **Equipment:** includes steam and electric power, hoist, a 5-mile narrow-gauge railroad connecting the mine with Mapimi and a 1,500-ton smelter.

PENNUVA COPPER CO.

UTAH

J. R. Austin, pres., Salina, Utah; G. D. O'Conner, v. p.-mgr.; W. R. McPherson, sec.-treas.; W. N. Beatty and Jas. Spelman, directors. **Inc.** 1916 in Utah. **Cap.,** \$25,000; shares 2c par.

Property: 10 claims, unpatented, and 2 under 10-year lease, situated on Promontory Point, next to the Lakeview zinc mine and 2 miles from Salina on the S. P. R. R.

Development: 100' shaft on quartz shale bed showing bunches of chalcocopyrite ore assaying 20-30% copper.

PEREGRINA MINING & MILLING CO.

MEXICO

Controlled by Guanajuato Dev. Co., which see.

PERTH AMBOY SMELTER.

NEW JERSEY

Owned by American Smelting & Refining Co. at Perth Amboy, which see. Has 600-ton copper-lead smelter, 200-ton lead refinery and a 300-ton electrolytic copper refinery, employing about 2,000 men.

PETERSON LAKE SILVER COBALT MINING CO., LTD. ONTARIO

Offices: 420 Traders Bank Bldg., Toronto, and Cobalt, Ont. **Officers:** Col. Sir Henry M. Pellatt, pres.; Hugh Plain, 1st v. p.; J. W. Scott, 2nd v. p.; with Alex. M. Hay and J. A. Murray, directors; C. H. Manaton, sec.-treas.; R. B. Lamb, cons. engr.

Inc. 1906 in Ontario. **Cap.,** \$3,000,000; issued, \$2,401,820; shares \$1 par. Trusts & Guarantee Company, Ltd., Toronto, transfer agent. Listed in Toronto and on New York Curb.

Comparative General Balance Sheet: (year ending April 30)

Assets—	Property	Dev. Expl.	Plant Supplies	Current	Total
1915.....	\$2,309,323	\$136,666	\$16,897	\$223,920	\$2,686,807
1914.....	2,463,507	136,666	19,701	177,033	2,642,723
Liabilities—	Capital Stock		Current	Surplus	Total
1915.....	\$2,401,820		\$7,610	\$277,377	\$2,686,807
1914.....	2,401,820		8,690	232,213	2,642,723

Comparative Income Statement:

	Royalties on Ore	Miscel. Income	Total Expend.	Profit
1915.....	\$296,498	\$6,685	\$89,892	\$213,291
1914.....	191,156	9,826	60,557	140,424

Dividends: fiscal year ending April 30, 1915, Nos. 1 to 4 inc., \$168,127; April 30, 1916, Nos. 5 to 8 inc., \$168,127, at rate of 1¾% quarterly.

Property: 200 acres underlying Peterson Lake at Cobalt, almost surrounded by holdings of the Nipissing Co. Is operated chiefly as a leasing company. The most important lease was that of Seneca-Superior, on the Cart Lake portion of the property. Ore reserves were practically depleted by end of fiscal year, and development not having disclosed any new ore-bodies, the lease was closed down in April, 1916. The Gould lease was taken over by a new company, the Mercer Silver Mines, Ltd., and one shipment made up to May 1, 1916.

Development: the Peterson Lake area has been prospected through shafts Nos. 2 and 3 and the Nova Scotia territory opened up; several veins have been found here, but to date commercial ore has not been found in paying quantities. During the year new work in the Peterson Lake mine totaled 4,479', at a cost of \$13.79 per foot. In February, 1916, company took an option on the Reliance Claim, adjoining the Nova Scotia area; this is being prospected.

Recent production: (ounces silver)

	Seneca-Sup. Lease	Gould Lease	Mercer Lease	Pet. Lake Mine	Total
1915.....	2,148,297	81,998	2,230,295
1914.....	1,507,805	73,889	26,856	1,608,550
1913.....	1,170,511	60,221	1,230,732

The company's territory has been well prospected outside of the area held by the Mercer, and results have not been encouraging. It is very evident Peterson Lake has seen its best days; while development work may open up new orebodies, it is doubtful if these will be of great importance.

PHARMACIST GOLD MINING CO. COLORADO

Officers: L. G. Carlton, pres.; Thos. J. Ward, v. p.; V. H. Mann, sec.-treas.

Inc. Jan. 3, 1912. **Cap.**, \$15,000; shares 1 ct. par. In treasury Jan. 1, 1916, 55,000 shares and \$672 cash. Stock listed on Colorado Springs Exchange. Paid dividends to Feb., 1910, \$7,500; none since.

Property: 10 patented acres on Bull Hill, Cripple Creek district, Teller Co., Colo. **Development:** being carried on from the 500' level of the Isabella Mines Company shaft in 1916.

Production: in 1915 was \$10,694. Operated by lessees.

PHEODORA SILVER-LEAD MINING CO. IDAHO

Kellogg, Idaho. **Officers:** Wm. Schaefer, pres.-gen. mgr.; Geo. Moison, v. p.; W. W. Papesch, sec.-treas.; with Elmer Brown and Chas. Bollinger, directors. **Officers,** with exception of vice-president, reported to have resigned June, 1916.

Property: 12 lead-silver claims, adjoining the Jack Waite, in Eagle district, near Murray, Shoshone Co., Idaho, has been under development since 1909.

PHELPS, DODGE & CO., INC. UNITED STATES & MEXICO

Office: 99 John St., New York. **Officers:** Dr. Jas. Douglas, pres.; Cleveland H. Dodge, Arthur Curtiss James, Jas. McLean and Walter Douglas, vice-presidents; Geo. Notman, sec.-treas.; preceding, with Geo. B. Agnew, Francis L. Hine, Wm. Church Osborn and E. Hayward Ferry, directors; S. W. French, gen. mgr.; A. V. Dye, asst. gen. mgr.; J. Millard Jones, British agent.

Company was organized as the successor of the firm of Phelps, Dodge & Co., which had a history of nearly a century, its founder, Wm. Earle

Dodge, having been one of the great pioneer merchants of America and a noted philanthropist.

Inc. Dec. 14, 1908, in New York. Capital stock: authorized, \$50,000,000; outstanding, \$45,000,000; shares \$100. The capital stock was issued for the purchase of the entire stock of the Copper Queen Consolidated Mining Co., at \$135 for each \$10 share, \$27,000,000; Moctezuma Copper Co., at \$307 9-13 for each \$100 share, \$8,000,000; Detroit Copper Mining Co. of Arizona, at \$150 for each \$25 share, \$6,000,000; Stag Canon Fuel Co., at \$800 for each \$100 share, \$4,000,000; held for future issue \$5,000,000; total, \$50,000,000. Stock listed on New York Stock Exchange. Annual meeting, first Tuesday after first Monday in April, at 99 John St., New York. Books close 10 days before and reopen day after annual meeting. Stock transferred at office of the company. Farmers' Loan & Trust Co., New York, registrar.

Comparative General Balance Sheet:

	Assets—	Property & Equip.	Deferred	Cash	Other Current	Total
1915.....	\$38,550,942 (a)	\$2,130,583	\$5,889,305	\$11,375,526	\$57,946,356	
1914.....	49,392,281	264,076	4,891,697	4,687,999	59,236,053	
	Liabilities—	Capital Stock	Current	Surplus	Total	
1915.....	\$45,000,000	\$4,608,492	\$8,337,864 (b)	57,946,356		
1914.....	45,000,000	7,224,944	7,011,109	59,236,053		

(a) After deducting \$6,853,466 for depletion of ore and coal and \$4,850,-854 for depreciation. (b) Balance Dec. 31, 1914, \$7,617,388; earnings for 1915, \$10,981,512; deduct ore depletion and plant depreciation, \$1,261,037; and dividends, \$9,000,000.

Earnings: \$6,025,740 in 1909; \$9,099,910 in 1910; \$7,283,509 in 1911; \$10,411,535 in 1912; \$9,581,494 in 1913; \$6,891,651 in 1914; \$10,981,512 in 1915.

Dividends: company pays a regular quarterly dividend of \$2.50 per share and also extra dividends; these were \$2 each per share in 1909, 1910, 1911; \$5 in 1912; \$6.50 in 1913; \$4 in 1914; \$10 in 1915; \$7 to July, 1916. Total dividends to July, 1916, \$51,071,527.

Company controls through personal holdings of its officers, the Old Dominion Co., Old Dominion Copper Mining & Smelting Co., United Globe Mines and Commercial Mining Co. Members of the old firm also control the El Paso & Southwestern railway, a road that, while built originally as an outlet for the Copper Queen mine, has expanded steadily and bids fair to develop eventually into a transcontinental trunk line. The same interests are very large shareholders in the Rock Island and Great Northern railways.

The company controls some of the richest and most productive copper mines in existence, all able to make copper at unusually low costs, as is evidenced by the great increase in dividends of subsidiaries in 1910 over 1909, in a year when decreased dividends were the rule with a great majority of the large copper producers of the world.

The company also controls the Burro Mountain Copper and Phelps-Dodge Mercantile Co.

In 1915 purchase was made of the Tombstone Cons. Mines Co. and others in the Tombstone district; these will be operated as a constituent company under name of Bunker Hill Mines Co. Reported in April, 1916, that company had taken a bond on a number of the principal properties in the Organ mountain mining district, New Mexico.

Production: comparative statement of total production from subsidiary companies' mines, years ending Dec. 31—

	Tons of Ore			Co. Ore Smelted	Copper Lbs.	Silver Oz.	Gold Oz.	Lead Lbs.
	Extr'd	Milled	Smelted					
1915....	1,588,364	800,600	1,129,766	1,016,746	140,478,008	1,655,669	31,696	9,525,584
1914....	1,777,243	1,046,728	917,204	855,594	131,662,324	1,769,626	28,518	8,986,074
1913....	1,976,892	1,122,372	1,085,367	856,520	155,665,712	1,870,162	81,141	8,701,628
1912....	1,898,244		1,061,315	863,741	148,678,889	1,689,152	27,687	
1911....	1,841,210	1,017,852	980,331	822,647	184,149,627	1,794,895	27,154	

Company also took over the metals selling agency of the old firm, and in addition to marketing the product of its own mines, acts as sales agent for the Calumet & Arizona and other producers.

Comparative Statement of Copper Sales:

	Total	Subsid. Comp's	Outside Product on Comm.	Domestic Trade	Foreign Trade	Aver. Price Cts.
1915....	194,925,668	139,351,785	55,573,883	97,122,436	97,803,232	16.079
1914....	188,687,378	134,553,404	54,133,974	80,978,884	107,708,494	13.57
1913....	201,489,796	151,080,018	50,409,778	83,552,432	117,937,364	15.37
1912....	192,297,374	139,759,515	52,537,859	98,267,037	94,030,337	15.51
1911....	180,301,965	131,327,002	48,974,963	69,483,782	110,818,183	12.36
1910....	194,138,698	139,297,409	54,841,289	100,819,254	93,319,444	12.826

Phelps, Dodge & Co., Inc., is one of the few new companies in the copper mining industry that is undercapitalized rather than overcapitalized, and this is but a detail in a general business policy that, while thoroughly progressive and abreast with the times, retains the fundamentally sound and conservative policies developed by the old firm in nearly a century of honorable and markedly successful business life.

PHILADELPHIA MINES CO.

COLORADO

Mine office: Montezuma, Colo. **Officers:** E. F. Pooley, pres.; F. P. Rosengarten, v. p.; W. F. Wagner, sec., 16th & Indiana Sts., Philadelphia, Pa.; W. B. Le Wald, treas.-mgr.; with T. W. Bunnell, directors; F. E. French, supt.

Inc. May, 1913, in Colo. Cap., \$1,250,000; shares \$1 par; \$755,760 outstanding. Reported gross earnings for 1915, \$8,000, and operating expenses, \$16,000.

Property: 75 claims, 16 patented, about 365 acres, in Montezuma mining district, Summit Co., Colo., carries a sulphide ore in fissure veins traversing Montezuma granite and porphyry, said to give average assays of 1.07 oz. gold; 8.7 oz. silver; 15.05% lead; 26.6% zinc; 40% copper. The main ore-body is reported to be from 8" to 8' wide and 900' long, running N.-W., with dip of 45°.

Development: by 6 tunnels, the 405' Jumbo, 150' Monitor, 450' Tip Top, 1,490' Philadelphia, 3,400' Colorado-Toledo and 112' Cross Lode, with total workings of 7,500'.

Equipment: includes Blaisdell compressor, electric power and 100-ton wet concentrating mill. About 1,000 tons of ore were treated in 1915 and shipments of concentrates, started in November, totaled 350 tons, averaging \$35 per ton. Plan adding Ball mill and flotation unit in 1916 to treat the slime.

PHILIPSBURG MINING CO.

MONTANA

Office: 821 Security Bldg., St. Louis, Mo. Mine office: Philipsburg, Mont. **Officers:** John P. Meyer, pres.; John H. Dieckman, v. p.; Jos. P. Hartnett, sec.; F. D. Fusz, treas.; with John L. Taussig, Max Kosany, L. M. Rumsey, Jr., H. S. Rumsey, E. S. Orr, A. L. Shopleigh, Louis Barkloje, directors.

Inc. 1910 in Missouri. Cap., \$30,000; shares \$1 par; all outstanding. Annual meeting, 4th Friday in March.

Property: 450 acres at Philipsburg, Granite Co., Montana. Ore occurs in contact deposit and quartz fissure veins between limestone and granite, carrying gold, silver, copper, zinc, lead and manganese. Company is successor to Hope Mining Co. Not operating.

PHOENIX CONSOLIDATED COPPER CO.

MICHIGAN

Controlled by Keeweenaw Copper Co.

Office: Calumet, Mich. Mine near Phoenix, Keweenaw Co., Mich.
Officers: Thos. F. Cole, pres.; Spencer R. Hill, v. p.; Chas. A. Wright, Jr., sec.-treas.; preceding, with Capt. Thos. Hoatson, directors; W. J. Uren, gen. mgr. Inc. April, 1899, in Michigan. **Cap.**, \$2,500,000; shares \$25 par; \$14.50 paid in. Is controlled by the Keweenaw Copper Co., through ownership of about 90% of the share capital, acquired by an exchange of shares on the basis of 10 shares of Phoenix for 1 share of Keweenaw.

Report for year ended Dec. 31, 1915, showed assets of \$1,640,171, which includes: real estate, \$505,208; development and exploration expense prior to 1915, \$962,732; exploration and development during 1915, \$96,149; cash, \$7,010. **Liabilities:** Keweenaw Copper Co., \$65,035; mine accounts and liabilities, \$24,897. Last assessment was \$2 per share, July, 1915.

Property: 2,505 acres, carrying 5 different fissure veins, on which more or less mining has been done, at various times. The old Phoenix mine, included in the present consolidation, is famous for having produced the largest mass of native copper ever found, weighing upwards of 500 tons. The Phoenix fissure, on which work was begun 1846, was opened to a depth of only about 90', yielding considerable mass copper and silver. There also are possibilities on the Ashbed lode, which has been slightly developed by an exploratory tunnel. The mine has extensive openings and a modern equipment, and was worked for 6 years without success, until closed down, June 15, 1905.

Diamond drilling on the Ashbed, 1910, gave encouraging results in 6 holes, covering 2,700' along the lode, 1 hole giving upwards of 60' of copper cores. A continuation of this work was begun late 1913, after several years of idleness, and 1,200' of diamond drilling in 1913 and 2,785' in 1914 on the Ashbed lode showed fair copper values.

In 1915 No. 1 shaft was sunk to 15' below the 12th level, a depth of 1,415', and 7,478' of new drifting and 583' of crosscutting was done, mainly on the 6th, 7th and 8th levels. Early in 1916 the shaft was deepened to 1,600', or the 14th level, each level above from the 3rd-10th showing good commercial rock. The Phoenix fissure, intercepted by an E. drift on the 7th level in April, 1916, is reported to show 26' of ore.

Equipment: at power plant at No. 1 shaft includes 3 boilers, 2 air compressors, hoisting engine and pumps. The stamp-mill is being overhauled preparatory to resumption of mill tests.

PHOENIX GOLD & COPPER MNG. & MILLING CO. WASHINGTON

Succeeded by National Lead-Silver Co., which see.

PHOENIX MINING CO.

MISSOURI

Not incorporated. E. N. Cunningham, mgr., Joplin, Mo. **Property:** 40 acres in S. W. $\frac{1}{4}$ N. W. $\frac{1}{4}$ Sec. 22, T. 28, R. 33, Jasper Co., Mo., carries lead-zinc ore in a soft limestone formation.

Development: by 176' vertical shaft and total workings of 600'. **Equipment:** includes steam power, hoist, pump and 150-ton concentrating mill.

Production: in 1913 was 3,222,450 lbs. zinc and 1,003,450 lbs. lead; in 1914, 5,524,310 lbs. zinc and 428,080 lbs. lead.

Mine was idle from Oct., 1914, to Dec., 1915. Diamond-drill exploratory work in progress in 1916.

PHOENIX MINING CO.

UTAH

See Utah Apex Mining Co.

PHOENIX MINING & MILLING CO., LTD.

IDAHO

Wallace, Ida. Norman Ebbley, pres.; Jos. Whelan, sec. **Cap.**, \$1,000,000; shares \$1 par; assessable; 800,000 shares outstanding. Annual meeting, 2nd Monday in May.

Property: 14 claims, in Coeur d'Alene district, near Wallace. Unproductive.

PHOENIX MINING, SM. & DEV. CO., LTD. BRITISH COLUMBIA
Phoenix. Boundary district, B. C. Inc. June, 1908, in British Columbia. Cap., \$1,000,000; shares \$1 par.

Property: 2 claims, 1 fractional, in the Wellington camp, about 3 miles from Phoenix, developed by a 60' shaft, on the Lucky Shot claim, and the Woodburn tunnel, showing silver-copper ore.

Letters returned and mine presumably closed down in 1916.

PICACHO MINING CO. (CIA. MINERA DE PICACHO). MEXICO

J. S. Douglas, Cananea, Sonora, and associates, owners. **Property:** 35 miles south of Cananea, has a deposit of cupriferous silver ore that has been under development since about 1909 and has been shipping ore to the Copper Queen smelter at Douglas.

PICHER LEAD CO

MISSOURI-OKLAHOMA

Merged, June, 1916, with the Eagle White Lead Co., of Cincinnati, and a new company organized called the Eagle Picher Lead Co., which see.

PIEDRAS VERDES y ANEXAS; COMPANIA MINERA. MEXICO

Alamos, Sonora, Mex. Angel Almado, pres., at last accounts. **Property:** about 15 miles N. W. of Alamos, and 2 miles north of the Rio Mayo, includes the Piedras Verdes, Union and Sonora mines, having a mineralized zone of about 1 mile width, and 4 miles length. Claims show red schists carrying copper carbonate stains at surface, with quartz dikes and numerous dioritic intrusions, the veins outcropping 10 to 40' in width and carrying considerable oxidized ore of good grade, with occasional native copper in masses of considerable size. **Development:** by a 350' shaft and a 375' tunnel. Some churn drilling was done by the General Development Co., 1910.

Equipment: includes steam power, and a small matting furnace. Presumably idle.

PIKE HILL MINES.

VERMONT

Office: Room 709, No. 82 Beaver St., New York. **Mine office:** Corinth, Orange Co., Vt. **Officers:** John H. Allen, pres.; John J. Coakley, sec.-treas.; preceding, with C. A. Andrews, George Marshall and D. S. Conant, directors; H. G. Hunter, mgr. **Inc.** Jan. 9, 1906, in Vermont. **Cap.**, \$200,000; shares \$100 par; outstanding, \$160,300.

Property: 101 acres, freehold, in the Corinth district, 14 miles from the Boston & Maine railway, shows mica-schist carrying lenses of chalcopryrite disseminated in pyrrhotite, of 3.5% estimated average copper tenor. The mine was worked in a small way at intervals during the nineteenth century.

Equipment: includes a 75-h. p. steam plant, held in reserve, and a power plant with 20-h. p. and 80-h. p. gas engines and a 25-k. w. electric generator.

The wooden concentrator has a 9x15" Blake crusher, 3 rolls and 2 magnetic separators, with roaster and dryer.

Production: 131,911 lbs.; fine copper in 1905; 304,377 lbs. copper and 1,698 oz. silver in 1906; 425,367 lbs. copper and 2,292 oz. silver in 1907. Inactive from Nov., 1907, until Oct., 1915, when experiments with the flotation process were started. Shipments from Oct., 1915, to Jan., 1916, about 210 tons, claimed to run 10% copper and 1 oz. silver per ton.

PILLEY'S ISLAND PYRITES CO.

NEWFOUNDLAND

Mine shut down on account of depleted ore reserves, equipment rotting and company is presumably dead. See Vol. XI, Copper Handbook.

PILOT BUTTE MINING CO.

MONTANA

Office: Daly Bank Bldg., Butte, Mont.

Property sold to Anaconda Copper Mining Co. for \$1,125,000 in 1916.

and cash distributed to stockholders. Company to be dissolved. Fully described in Vol. XI, Copper Handbook, p. 715.

PILOT KNOB GROUP.**NEVADA**

Property: 5 claims in Snake Creek range, 2½ miles S. of Osceola, White Pine Co., Nev., developed by 400' tunnel and 200' shaft. **Ore:** tungsten, occurs in quartz veins in limestone formation. Equipment includes a 20-stamp mill.

Reported, June, 1916, that Uvada Tungsten Co. was to be organized by A. V. Taylor, L. Jeffs and C. H. Thompson, of Salt Lake City, to take over the property.

PILOT RANGE MINE.**NEVADA**

Luning, Mineral Co., Nev. Mrs. Fermina Serrias, owner and mgr. Mine bonded 1913. **Property:** known as the Spanish Woman's mine, 40 claims, unpatented, 800 acres, in the Santa Fe district, 8 miles from the Southern Pacific railroad, shows syenite, andesite and limestone. **Ores** are azurite, malachite, bornite and chalcocopyrite, reported to average 6% copper, 2 oz. silver and \$2 gold per ton.

Development: by shafts and tunnels with total of over 750' of workings. **Equipment:** includes steam plant and several mine buildings.

Shipments of about 50 tons daily made to the Thompson smelter in 1914, and intermittently to Hazen, in 1916.

PINAL DEVELOPMENT CO.**ARIZONA**

J. C. Devine, mgr., Ray, Ariz. **Property:** the Renfro mine, adjoining the Troy-Manhattan, at Troy, 6 miles E. of Ray, Pinal Co., Ariz., said to show a good grade of copper ore. Developed by 1,200' tunnel and incline shaft. Management plans adding compressor and machine drills, 1916. Trial shipments made to Hayden smelter.

PINE CANYON & BINGHAM TUNNEL CO.**UTAH**

Officers: J. B. Moreton, pres.; Richard Savage, v. p.; Homer Benton, 2nd v. p.; Louis Levine, sec. **Inc.** July, 1916, in Utah. **Cap.**, \$1,500,000; \$1 par.

Property: 42 claims, 150 acres patented, covering apex of mountain, west of Bingham, shows two N. E.-S. W. fissures, a bedded contact deposit and the Star vein, all in quartzite, carrying limestone beds and cut by monzonite.

Plans driving tunnel from Pine Canyon to Bingham at 5,600' elevation. As the Great Western Mines Co. has a similar tunnel already well started, though at 300' higher elevation, the project seems unwise.

PINE CREEK DEVELOPMENT CO.**IDAHO**

Kellogg, Shoshone Co., Idaho. **Inc.** in 1916 by W. W. Papesh, Geo. H. McKinnis, J. A. Rock and others, to operate the Sherman group on Pine Creek, Kellogg, under 2-year bond and lease.

Property: 6 claims, owned by the Sherman Mining Co. and developed by 1,000' of underground workings, said to show zinc and lead values.

PINE CREEK MINING CO.**IDAHO**

Wallace, Idaho. **Inc.** April, 1916, in Idaho by Thos. M. Brennan, Harold Williams and O. W. Lewis. **Cap.**, \$150,000; shares 10c par.

Property: the Lee group on Pine Creek, adjoining the Hilarity, is to be prospected in 1916.

PINE MARTIN MINING CO.**COLORADO**

Office: 954 Gas and Electric Bldg., Denver, Colo. **Officers:** E. P. Young, pres.-supt.; B. F. Bachman, v. p.; Chas. B. Bovier, sec.; Wm. G. Krape, mgr.-treas.; with W. A. Sanders, directors.

Inc. March 27, 1915. **Cap.**, \$250,000; shares 10 cts. par; 1,139,400 shares issued. Annual meeting, 1st Wednesday in March.

Property: 10 patented claims, about 50 acres, at Red Cliff, Eagle Co., Colo., said to show a blanket quartz vein in porphyry-granite formation, carrying gold and silver values. The orebody strikes N. and is almost flat.

Development: by 8,000' of old workings, mainly tunnels. Management estimates 300,000 tons of ore developed and on dumps. Company endeavoring to raise necessary funds for new milling machinery in 1916. Operated by lessees in 1915.

PINGUICO MINES CO.

MEXICO

Controlled by Guanajuato Dev. Co., which see.

PINOS ALTOS MINING & MILLING CO.

NEW MEXICO

Pinos Altos, N. Mex. **Officers:** Ira L. Wright, pres.-mgr.; C. A. Layne, v. p.; I. J. Stauber, sec.-treas.-mgr.; above, with A. L. McCarty, W. D. Murray, W. S. Cox and T. L. Lowe, directors.

Inc. 1915 in New Mexico. **Cap.**, \$50,000; shares \$10 par; \$32,000 outstanding.

Property: a lease and bond on 14 claims, belonging to the Savannah Copper Co., in the Pinos Altos district, about 7 miles N. E. of Silver City. The claims show fissure veins, 2' wide, in diorite, carrying complex sulphide ores. The property was a producer under former owners and is said to have large bodies of copper and zinc sulphides, assaying 0.25 oz. gold, 8 oz. silver, 2.5% copper, 10% zinc, 2% lead.

Development: by 2 incline shafts, 300' long and several thousand feet of workings, to depth of 900'. **Equipment:** includes 25-h. p. gasoline hoist, pump, 50-ton concentrator with tables and Huff electrostatic separator.

Two products are made, copper and iron, containing gold and silver, which go direct to a shipping bin, and zinc, barite, manganese and waste. The high-grade zinc concentrate is sent direct from the Huff machine to shipping bins. The tailing is conserved for future treatment. There are 3 bins of concentrates: first, lead with gold and silver, valued at \$60 per ton; second, copper-iron, valued at \$60 per ton; third, zinc concentrates, valued at \$50 per ton. Final recovery is from 60-65% of the original value.

Fifty men are employed. Shipments of concentrates in 1916 average two cars of copper and one of lead and zinc per month. The zinc concentrate goes to Altoona, Kansas, all other shipments to El Paso.

PINTADO CONSOLIDATED COPPER CO.

NEW MEXICO

J. L. Matt, supt., Santa Rosa, Guadalupe Co., N. Mex. **Property:** covers a 12' layer of copper-bearing sandstone, overlaid by 6' of barren sandstone in Pintado canyon. Carload lots shipped to El Paso smelter averaged 3% copper. The ore will be quarried, and leached in a 100-ton leaching plant, under construction August, 1916.

PIOCHE-BRISTOL MINING CO.

NEVADA

Jos. J. Daynes, Jr., pres., 1542 S. Fifth St., E., Salt Lake City, Utah; John Stringham, sec.-treas.; Harry L. Parker, supt. **Inc.** Feb. 19, 1916, in Utah. **Cap.**, 1,000,000 shares; 5c par; 615,000 shares issued. Stock listed on Salt Lake Exchange.

Property: 6 claims, surveyed for patent, in the Jack Rabbit mining district, adjoining the Day Bristol, near Pioche, Lincoln Co., Nev. Claims said to show lead-silver-copper ore. Shipped 300 tons of ore 1915-16, reported to have netted \$15,000. Systematic development commenced in Spring of 1916.

PIOCHE METALS CO.

NEVADA

Address: F. B. Cooke, treas., 1009 Newhouse Bldg., Salt Lake City, Utah. Company levied an assessment of 1c a share in March, 1915. **Property:** at Pioche, Nev., has been shut down save for annual representation work.

PIONEER CHIEF GOLD MINING CO.**CALIFORNIA**

Office: 923 Monadnock Bldg., San Francisco, Calif. **Mine office:** San Andreas, Calif. **Officers:** N. J. Martin, pres.-mgr.; B. F. Marshall, v. p.; Judge W. F. Crist, sec.-treas.; with M. V. Van Fleet and G. G. Damon, directors; J. E. King, supt.

Inc. Aug. 26, 1915, in Calif. **Cap.**, \$300,000; shares \$10 par; assessable; 23,603 shares outstanding. **Transfer office:** 923 Monadnock Bldg., San Francisco, Calif.

Property: 15 patented claims, 200 acres, on the footwall belt of the Mother Lode, near San Andreas, Calaveras Co., said to show gold ore occurring in veins with slate hanging and diabase footwall. Veins have N. 30° W. strike and dip 65° E. Management reports pay ore in shoots 7' wide and 200' long, containing quartz, sulphides, chalcopyrite, pyrite and galena, with average assay of \$9 in gold.

Development: by 2-compartment, 350' shaft, being sunk to 500' in 1916. **Equipment:** includes electric power, 40-h. p. single-drum hoist and 600-cu. ft. compressor. Management plans erecting 100-ton mill.

PIONEER CONSOLIDATED MINES CO.**NEVADA**

Pioneer, Nev. Officers: Wm. J. Tobin, pres.-mgr.; Richard F. Tobin, v. p.; Chas. J. Clayton, sec.; with Roland G. Holt and J. K. Turner, directors; E. A. Danielson, supt.

Inc. May 5, 1909, in Wyo. **Cap.**, \$5,000,000; shares \$1 par; 3,881,562 shares outstanding, Jan. 1, 1916. Stock is listed on San Francisco Exchange. Central Sav. Bank & Trust Co., Denver, transfer agents. **Annual meeting,** Jan. 4th, at Cheyenne, Wyo. **Gross earnings** in 1915 were \$32,000 from ore sales.

Property: 12 claims, 8 patented, 180 acres, at Pioneer, Nye Co., shows decomposed rhyolite, porphyry and quartz. **Ore:** occurs as a contact deposit between quartzite and limestone, of 30' average width, reported by management to assay \$6 to \$20 per ton, values being in gold with a little silver. The mine has been operated since organization of the company, but results have been retarded owing to lack of sufficient funds and failure to pick up the main Pioneer vein, believed to contain high-grade ore. A cave-in destroyed the timbering of the Bonanza stope in Dec., 1914, and the mine was closed until May, 1915.

Development: by 430' vertical tunnel and 15,000' of workings. In 1915 development work totaled 615' of drifting and crosscutting, mainly on the 170' level. New work is progressing on the 100', 170' and 250' levels in 1916.

Equipment: includes electric power, 3-drill compressor, 40-h. p. hoist and 10-stamp 30-ton amalgamation and cyanide mill. The mill treated 2,000 tons of \$6 per ton ore in last 4 months of 1915, and in 1916 is reported treating sufficient \$6 ore to cover all operating expenses. **Recovery** by amalgamation is from 60-70%.

Total production to date reported at \$500,000.

Company plans enlarging mill in 1916. Lessees are operating on the 600' level of the Bi-Metallic No. 3 claim.

PIONEER EXTENSION MINES CO.**NEVADA**

Office: 109 Boston Bldg., Denver, Colo. **Mine office:** Pioneer, Nye Co., Nevada. **Col. A. J. Trone,** pres.-treas.-gen. mgr.; **Edwin S. Giles,** supt.

Inc. in Arizona. **Cap.**, \$1,500,000; shares \$1 par; 400,000 shares in treasury.

Property: the Jolly Jane claim, 20 patented acres, adjoining the Pioneer Cons., at Pioneer. **Development:** by 200' shaft. A crosscut is being driven from this level through rhyolite to prospect a contact 175' E. of the Jolly

Jane shaft. Mine reported under 3-year lease to Jolly Jane Leasing Co., from 1916. A prospect.

PIONEER MNG., MILLING, POWER & TUNNEL CO. COLORADO

Fred H. Thompson, supt., Apex, Gilpin Co., Colo. **Property:** 7 claims, 5 patented, said to have 2 veins from 2-8" wide, showing gold-silver-copper values, and averaging 20% tungstic acid, with porphyry hanging-wall and granite footwall.

Development: by 665' tunnel, reported to have cut the Martin vein, in May, 1916. **Equipment:** includes stamp mill and power house. Company also owns 3 miles of water rights on Pine and Clear creeks to generate electricity.

PIONEER MINING & SMELTING CO. ARIZONA

Offices: 1178 Broadway, N. Y., and Tucson, Ariz. **Officers:** Garret B. Kip, pres., Tarrytown, N. Y.; W. C. Moore, sec.-treas.; with G. H. Corwin and Edw. Benedict, directors.

Inc. Aug. 19, 1913, in Arizona, as a reorganization of the Pioneer Smelting Co., which went into bankruptcy in 1913. Cap., \$1,000,000; shares \$1 par; \$690,647 issued; nonassessable. Transfer office: 1178 Broadway, New York. Annual meeting, second Monday in May.

Property: formerly held by the Pioneer Smelting Co., 14 unpatented claims, 260 acres, including the Plumed Knight mine and control of the Gould mine, also a custom smelter.

The Plumed Knight mine, in the San Xavier district, 18 miles from Tucson, is opened by shafts to a depth of 335', showing ore rich in iron, lime and silica at and above the 100' level, succeeded by bornite at depth. Ore is said to average 4.25% copper, with small gold and silver values.

The Gould mine, 12 miles west of Tucson, idle several years, is said to contain good fluxing ores carrying about 3% copper. Development is by 2 shallow shafts.

The smelter, 1½ miles west of Sahuarita, and 20 miles south of Tucson, on the Twin Buttes railroad, is of 150 tons daily capacity. The plant has a 106x42" blast furnace, built by the Colorado Iron Works Co. The smelter was in blast for a short time in 1912, but has since been idle, as property could not pay expenses.

PIONEER SMELTING CO. ARIZONA

Went into bankruptcy 1913. Succeeded by the Pioneer Mining & Smelting Co.

PITTSBURGH CONSOLIDATED MINING CO. UTAH

American Fork, Utah Co., Utah. A. H. Tarbet, pres.-mgr.; H. H. Green, v. p.; J. G. Doolittle, sec.-treas.; with B. Snyder and P. S. Keoch, directors; J. Benton Leggat, cons. engr.

Inc. 1903. Cap., \$500,000; shares \$1 par; 300,000 shares issued.

Property: 19 claims, including the Pioneer group of 10 patented claims, and 6 claims that were in litigation with the Mountain Lake Extension Mining Co., ground being in both Salt Lake and Utah counties, mainly on the American Fork side of the divide. Ore occurs in fissure veins.

Development: by 3 tunnels from American Fork canyon, is on the Pittsburgh fissure. A 500' upper tunnel is credited with a production of 11,000 tons under former management. The tunnels are in 500' and are connected by winzes and raises. Operations were resumed in 1914 after an examination of the property by J. Benton Leggat. In No. 2 tunnel a 12' orebody of solid lead-zinc sulphide is said to have been exposed, assaying 25% lead, 34% zinc, 40c gold, 5 oz. silver, 26% sulphur and 5% iron per ton.

In 1915 the 3 tunnels were connected and drifts run along the several fissures. A fourth tunnel, started to top the Pittsburgh fissure 150' lower

than No. 3, will be driven 1,200' and is to serve as a means of transportation. A wagon road has recently been completed to Alta.

Equipment: includes necessary mine buildings and dwellings.

PITTSBURGH-DOLORES MINING CO. NEVADA

Yerington, Nev. **Officers:** H. S. McKee, pres., Pittsburgh, Pa.; A. Vignos, v. p.; R. J. Palmer, sec.; H. W. McIntosh, treas.; E. J. Schrader, gen. mgr.; J. B. Perry, mine supt.; C. R. Olson, mill supt.

Inc. 1912 in Arizona. **Cap.**, \$1,500,000; shares \$1 par; issued 1,000,000.

Bonds: authorized and outstanding, \$175,000. Annual meeting in March.

Gross earnings for first six months of 1915 were \$70,648; operating expenses, \$5,007; leaving a profit of \$20,577. Because of alterations the mill was operated only 70% of the time.

Property: 16 unpatented claims at Rockland, Mineral Co., 27 miles S. of Yerington, comprises the claims of the old Rockland mine, discovered in 1868. Ore was at first hauled to Pinegrove for treatment, but a 10-stamp mill was installed in 1870. Fire destroyed the mill soon after and the property remained idle until it came into possession of Gov. Blasdell, who erected another 10-stamp mill, which was in turn destroyed by fire. In 1902 the Nevada Chief Mining Co. acquired the property and began cyaniding the ore with indifferent success until in 1912 the present company took over the mine.

Ore: quartz, containing 1% pyrite with gold and silver values, occurs in a fissure vein from 1½ to 9' wide, with rhyolite hanging-wall and granodiorite footwall. Vein strikes N. E., dips 40° E., and carries pay ore in shoots. Ore treated averages about 0.44 oz. gold and 3.4 oz. silver, value about \$10.50.

Development: by tunnels, greatest depth of workings being 1,300' and horizontal extension about 13,000'. Ore is extracted by the fill method, stulls being used in timbering. A Sullivan Angle compressor furnishes air, and power for operating mine and mill is taken from the Truckee River General Electric Co.

The remodeled mill, using continuous counter-current decantation, with capacity of 60-100 tons daily, went into operation June, 1915. Blake crusher and Humphrey rolls prepare ore for treatment, trommels aiding in separation and distribution of sizes, and a 5'x18' Allis-Chalmers tube mill, driven by a variable-speed motor and silent chain drive, delivers the slime, crushed in solution, to the treatment tanks. The tube mill has Belmont ribbed liners and uses mine rock for pebbles. Three Dorr agitators and 5 thickeners, operated continuously, give time and treatment for extraction. Solution, after clarifying through vacuum filter leaves, is precipitated in zinc boxes, and the precipitates melted directly in a tilting Case furnace to bullion having a fineness of 850 to 900 in silver and 5 to 6 in gold. Extraction for the first 6 months was 92%.

Abundant water is piped from nearby springs. Milling cost for a recent month was \$2.69 per ton, including labor, superintendence, supplies and power. Owing to the distance of the property from the railroad, 27 miles, transportation of supplies is expensive, \$12 per ton.

PITTSBURGH-ELY COPPER CO. NEVADA

Idle. Ely, White Pine Co., Nev. **Officers:** H. P. Harder, pres.; Louis H. Bock, v. p.; J. A. Varney, sec.; Frank Straub, treas., trustee and gen. mgr. **Inc.** Dec., 1906, in Arizona. **Cap.**, \$5,000,000; shares \$5 par; non-assessable; 695,285 shares outstanding at last reports.

Property: 11 claims, unpatented, 220 acres, including the Keyboard group of 6 claims, 120 acres, near the Keystone mine of the Nevada Consolidated, and a small group near the Cumberland-Ely mine of the same

company. Lands show porphyry and limestone, and company reports having copper oxides and sulphides, assaying 3 to 12% copper. **Development:** by 2 shallow shafts and tunnels of 160' and 40'. **Equipment:** includes a 40-h. p. steam hoist. Inactive, except for annual assessment work, since 1907.

PITTSBURGH-IDAHO CO., LTD.**IDAHO**

Office: 223 Fourth Ave., Pittsburgh, Pa. Mine office: Gilmore, Idaho. **Officers:** A. S. Ross, pres.; Irvan Neckermann, 1st v. p.; Robt. B. Little, 2nd v. p.; W. A. McCutcheon, sec.-treas.; with H. S. Knight, J. S. Alexander, directors; F. A. Earles, supt.

Inc. in Idaho. **Cap.**, \$1,000,000; shares \$1 par; 809,407 shares issued. Authorized bond issue, \$150,000; \$23,000 outstanding. Commonwealth Trust Co., Pittsburgh, registrar; 223 Fourth Ave., Pittsburgh, transfer office. Annual meeting, 1st Monday in July. Stock listed on Salt Lake City Exchange. Balance sheet for 10 months ending Dec. 31, 1915, shows, operating expenses, \$59,167; gross earnings, \$105,634; net earnings, \$43,245.

Property: 25 claims, 5 patented, about 500 acres, at Gilmore, Lemhi County, said to show fissure veins in limestone, from 3 to 26' wide and 150 to 450' long. Veins strike N.-S., with dip of about 45°. Ores are carbonate-oxides, reported to carry 26% lead, 12 oz. silver and 75 cts. gold per ton of crude ore.

Development: to depth of 600' with productive levels at 400', 500' and 600'. **Production:** in 1915 was at the rate of 1,200-1,500 tons a month from company and lessees' operations.

PITTSBURGH-IDAHO MINING & MILLING CO.**IDAHO**

Office: Kamiah, Idaho. Mine office: Gilmore, Idaho. A. S. Ross, pres.-gen. mgr. **Inc.** Jan., 1903, in Idaho, as successor of Pittsburgh-Idaho Mining Co. **Cap.**, \$1,000,000; shares \$1 par.

Property: 19 claims, 380 acres, in the Lo Lo district, near the Montana line. Claims said to show 6 contact veins, between gneiss and quartz-porphyry, of which two, of 50 to 100' width, carry cuprite, malachite, bornite and chalcopryrite, giving assays up to 12% copper, 14 oz. silver and \$20 gold per ton.

Development: to 600' level by shafts and tunnels of 40', 290' and 600'. A winze sunk 50' from the 600' level on a 3' vein showed lead carbonate ore with high lead and silver values. Company employed 28 men in 1915 and granted 30 leases. Gasoline power is used.

Production: was at the rate of 2,000 tons per month in 1912; 800-900 tons in 1913; 200 tons in 1914.

PITTSBURGH-JEROME COPPER CO.**ARIZONA**

Office: 202 Fitzsimons Bldg., Pittsburgh, Pa. Mine office: Jerome, Yavapai Co., Ariz. **Officers:** Jos. K. Aikins, pres.; C. M. George, v. p.; E. F. Thompson, sec.-treas.

Inc. 1904 in Arizona. **Cap.** increased, March 9, 1906, to \$3,000,000; shares \$1 par; issued, \$1,482,699.

Property: 26 claims, 520 acres, lying 2. to 3 miles south of Jerome, nearly N. W. of the Black Hills property, and about midway between the United Verde and Equator mines. **Development:** by the 500' Pittsburgh shaft, said to show argentiferous and auriferous sulphide ore of about 4% copper tenor at 358' depth.

Equipment: includes a 50-h. p. Fairbanks & Morse hoist, and an Ingersoll-Rand 2-stage air compressor. Inactive most of the time from June, 1907, until Jan., 1916, when operations were resumed. Shaft was unwatered in March, and crosscuts are being driven south and west; the latter is said to show ore.

PITTSBURGH LEAD MINING CO.**IDAHO**

O. B. Wallace, mgr. **Directors:** Stanley A. Easton, Kellogg, Idaho; Henry L. Collins, G. B. Oberall, of Pittsburgh; W. M. Rumley and Christopher Murphy, of Chicago, and Senator A. Kerns. Merged with California Cons. Mng. Co. and Panhandle M. & M. Co., July, 1916.

Properties: of the three above named companies are in Nine Mile Creek section, or Placer Center district.

Pittsburgh property: formerly a shipper but idle several years, comprises a small group only. **California Consolidated:** the Black Cloud group, 4 patented claims, idle since 1901, but owns mill 2 miles above Wallace, leased and operated until recently by the Marsh Co.

Panhandle group: 2 patented claims on Nine Mile Creek.

PITTSBURG LIBERTY MINE**CALIFORNIA**

Masonic, Mono Co., Calif. **Property:** purchased at receiver's sale in 1914 for \$20,000 by the Stahl Bros., was formerly owned by the Pittsburg Liberty Mining Co. The mine, near Masonic, was located in 1902 and started shipping to Selby smelter in 1907, operated until 1910 with a reported production of \$600,000; idle until 1915 when work was resumed.

Ore: which carries gold, is found in 5 veins, occurring in metamorphic schist, quartzite and slate; the intrusive is granite. Veins strike N. 25° W. and dip to the east. **Development:** by 172' shaft and 2 adits, cutting the vein at 271' and 413' depth.

Equipment: includes 100-h. p. gasoline engine, and the 60-ton Pittsburg-Liberty mill, which was remodeled and equipped with cyanide plant and tube mill in 1915.

PITTSBURGH AND LORRAIN SYNDICATE**ONTARIO**

J. A. Rice, mgr. **Property:** the Currie Mine, adjoining the Wettlaufer, in South Lorrain, Ontario, Canada, said to show veins 6" wide, carrying silver and cobalt ore. **Development:** is by shaft. A prospect.

PITTSBURG MINE**COLORADO**

Owned and operated by Cashier Gold Mining Co., which see.

PITTSBURG MINING & MILLING CO.**ARIZONA**

Oatman, Ariz. **Officers:** L. P. Hansen, pres.-treas.; M. J. Walsh, v. p.; S. R. Porter, asst. sec.; above are directors; Jas. McLachlan, sec.

Inc. Jan. 31, 1912, in Arizona. **Cap.**, \$1,500,000; outstanding April 1, 1916, \$723,300; shares \$1 par. Security, Transfer & Registrar Co., New York City, transfer agent and registrar. Listed on New York Curb as a prospect.

Balance sheet of April 4, 1916, shows assets of \$1,500,000, which includes: mining claims, \$504,000; unissued stock, \$776,700; discount on stock, \$169,487; development and construction account, \$46,142; general expense, \$3,671.

Property: 11 claims, 220 acres, 1 mile W. from Goldroads and 1½ miles N. W. from Oatman, is said to show 3 distinct veins. The main vein strikes E.-W., dips N. 80° and has a width of 6' to 40' along an outcrop said to be traceable for over 5,000' in which distance it shows two faults. Vein filling is chiefly quartz with some calcite. Paralleling the main vein and 20' from it there is another vein 4' to 8' in width and nearly vertical, which is supposed to intersect the main vein. Near the center of the property these two veins merge and form one vein 40' wide. A third or footwall vein parallels the main vein and has a similar dip; at east end of property this vein is 200' back in the footwall; but is supposed to join main vein near center of property.

Development: 100' double compartment vertical shaft, sunk on E. end of Pittsburgh claim between main and hanging-wall veins; water prevented

sinking deeper; at this level 125' of work has been done, but to date the ledge where opened has been low-grade. **Equipment:** includes a 20-h. p. gasoline hoist.

PITTSBURGH & MOUNT SHASTA GOLD M. & M. CO. CALIFORNIA

Office: 403 Real Estate Savings Bldg., Pittsburgh, Pa. Mine office: Keswick, Shasta Co., Calif. **Officers:** J. J. Schneider, pres., Buffalo, N. Y.; R. Schmitt, v. p.; T. V. Scott, sec.-treas.

Inc. 1903, in West Virginia. **Cap.**, \$2,500,000; shares \$1 par. Bonded debt. \$130,000 (\$200,000 authorized) 6% first mortgage notes, due May 20, 1917.

Property: 10 claims, patented, 170 acres, known as the Bennington group, in the Flat Creek district, north of Redding, said to have been bought for \$18,000 cash and \$60,000 shares, also 23 unpatented claims, the Allegheny group. Company claims to have been working continuously, with exception of 3 months in 1913, since 1906 and to have made shipments of gold ore.

Development: has consisted of diamond drilling and several thousand feet of underground work. A 4,400' main tunnel and 2 other tunnels show a vein of gold and silver-bearing copper ore of varying tenor. **Equipment:** includes 15-stamp mill, carpenter shop, smithy, boarding house and 3 bunk-houses, with electric power.

PITTSBURG-SILVER PEAK GOLD MINING CO. CALIFORNIA

Office: 912 California Bank Bldg., Pittsburg, Pa. **Officers:** Wm. Flinn, pres.; Geo. T. Oliver, v. p.; T. J. Crump, sec.-treas.; Wm. A. Bradley, gen. mgr.; John Mocine, supt.; B. A. Rives, res. pur agt

Inc. May 25, 1906. **Cap.**, \$3,000,000; shares \$1 par; 2,793,733 shares outstanding. Annual meeting, first Monday in May. Stock is listed on San Francisco and Pittsburg Exchanges. Owns all the stock of the Silver Peak Gold Mng. Co., 99¼% of the stock of the Mohawk-Alpine Mng. Co., and all the stock of the Silver Peak R. R., running 17½ miles from Blair, Nevada, to the Tonopah-Goldfield R. R., at Blair junction.

The annual report for year ending Dec. 31, 1914, shows net earnings of \$73,970. Last dividend paid July 1, 1914, was 2 cts. per share, with total dividends to date of \$784,800 or 28%.

Property: about 2,000 acres of mineral-bearing land at Blair, Esmeralda Co., Nev., was formerly one of the largest producers of low-grade ore in the state. The orebodies became exhausted in 1914 and the property was abandoned. Company acquired the Rawhide gold mine near Sonora, Tuolumne Co., Calif., in 1915, and has moved the 120-ton mill and cyanide plant from Blair to the new property.

The Rawhide mine is developed by an old 1,800' shaft, which has been unwatered to the 500' level. Work progressing on the 300' and 400' levels.

PITTSMONT COPPER CO.

MONTANA

Controlled by East Butte Copper Co. Office: 1126 Farmers Bank Bldg., Pittsburgh, Pa. Mine office: Butte, Mont. **Officers:** R. H. Gross, pres.; J. H. Reed, v. p.; F. Ward Paine, sec.-treas.; R. T. Rossell, asst. sec.-treas.; Oscar Rohn, gen. mgr.; preceding with Wm. A. Paine, directors.

Inc. April 21, 1906, in West Virginia, as Pittsburg & Western Copper Co., and changed name, Jan. 21, 1908, to present title. **Cap.**, \$11,000,000; par value \$5, divided into 2,000,000 shares common stock and 200,000 shares 6% cumulative preferred stock. Of the authorized common stock 1,000,000 shares are reserved for retirement of its 6% bonds. \$2,500,000 authorized and \$1,286,258 outstanding Sept. 1, 1914.

The East Butte Copper Co. owns \$4,002,800 of the common and all the preferred stock. \$910,716 bonds outstanding Dec. 31, 1915, have since been retired. Annual meeting, first Monday in April, at Pittsburgh.

The 1915 report showed \$172 cash; \$163,468 accounts receivable; supplies \$218,696.

Company acquired the property of the Pittsburg & Montana Copper Co., under foreclosure proceedings, July, 1909, selling it to the East Butte Copper Mining Co., which agreed to purchase bonds enough of the Pitts-mont Copper Co., to fund its floating debt, aggregating at that time \$2,300,000, and also agreed, until these bonds were fully paid for, to advance all funds necessary for development and operation of the property and interest on the company's indebtedness. In consideration of this agreement the Pitts-mont Copper Co. contributed \$4,000,000 of its common stock to the East Butte Copper Mining Co., the latter purchasing \$1,000,000 of Pitts-mont preferred stock and \$110,000 of demand notes, issuing its own stock therefor.

Under this agreement made April 8, 1909, and renewed subsequently the East Butte Copper Mining Co. operates the company's property and the net proceeds have been paid as rentals to apply, deducting interest, in payment of the outstanding Pitts-mont Copper Co. bond issue. This debt is now entirely paid. See East Butte Copper Co.

PLACER CREEK MINING & MILLING CO.

IDAHO

Officers: F. C. Bailey, mgr., 2903 Sinto St., Spokane, Wash.; J. W. Westworth, pres.; Geo. Yancy, v. p.; Ray E. Bigelow, sec.-treas., with Elmer West and R. G. Mack, directors.

Cap., \$1,000,000; shares \$1 par; 400,000 shares treasury stock and 50% of the issued stock reported under 1-year option from April 18, 1916, to F. C. Bailey, who is developing the mine.

Property: 5 claims, on Placer Creek, 6 miles from Wallace, Shoshone Co., Idaho, developed by a 1,400' tunnel, said to cut the vein at a vertical depth of 600'.

PLATA-FINA MINING & DEVELOPMENT CO.

MEXICO

Office: Pomona, Kansas. Mine office: Alamos, Sonora, Mex. **Officers:** E. G. Swayze, pres.; Dr. L. R. King, v. p.; C. N. Emery, sec.; E. A. May, treas.; T. P. Brinegar, mgr.; above with J. M. Nolan, A. P. Elder and J. W. Churchill, directors.

Inc. March, 1911, in Arizona. **Cap.**, \$500,000, reduced to \$300,000; shares \$2 par; 110,000 shares issued.

Property: Plata-Fina group, 9¼ hectares; Cacharamba group, 8, and the Otilia group, a recent purchase, 10 hectares, about 67 acres in all, 4¾ miles from a railway, in the Alamos district, shows several contact veins between granite and porphyry, in a zone 40' wide.

Development: by 5 shafts, deepest 115', with about 3,000' of under-ground workings. Ore is said to show native silver in copper carbonate and chalcocite and is reported to assay from 2 to 20% copper, 6 to 5,000 oz. silver and \$1 to \$70 gold per ton, which figures are misleading. Development work is being done in spite of the revolution, about \$15,000 having been spent during 1914-1915. All drilling is done by hand.

PLATANOS, S. A.; CIA. EXPLORADORA DE LOS

MEXICO

Is the Mexican holding company of Los Platanos Mining Co.

PLATINUM MINING & MILLING CO.

WYOMING

Address: 912 Main St., Merrill, Wis. Mine address: Holmes, Albany Co., Wyo. **Officers:** Julius Thielman, pres.-mgr.; David Finn, v. p.; Robert Thielman, sec.-treas.; preceding with F. C. Sheldon and E. F. Hanf, directors. Leo von Rosenberg, cons. engr.; John A. Johnson, supt.

Inc. Jan., 1912, in Wyoming. **Cap.**, \$200,000; shares \$1 par, issued \$50,000. Annual meeting, second Monday in January.

Mine was located in 1870 for gold, relocated 1900 for copper and worked 1906 by Rambler Mining & Smelting Co., consolidated 1908 with New Lincoln Copper Co., as Rambler Copper & Platinum Co.

Property: the Rambler mine, held by 15-year lease, with 13 claims patented, 260 acres, in the Douglas district. Claims show a fissure vein reported as 20' wide in granite, running N. W. and dipping at 45° E. **Development:** includes a 200' vertical shaft with drifting on the vein on the 100' and 200' levels. Total amount of underground work is about 5,000'. Average assays give 2% copper and 0.25 oz. platinum.

Work was begun June, 1912, but neither mine nor mill was operated during 1913, as mill was being remodeled and a 50-ton Peck centrifugal concentrator installed. Operations were resumed in 1914, and in 1915, 2,000 tons of ore was treated. Company claims gross earnings for 1914-15 of \$19,650, with operating expenses of \$12,000. **Equipment:** includes a steam hoist. Planned to start the mill on Jan. 15, 1916.

PLENTIFUL MINING AND MILLING CO.

UTAH

American Fork, Utah. **Officers:** E. E. McBride, pres.; F. W. Wright, v. p.; W. S. McBride, sec.; E. J. Seastrand, treas.; with Alexander Cunningham, V. C. McBride, directors.

Inc. June, 1915, in Utah. Cap., \$30,000; shares 5 cts. par; 485,000 shares outstanding.

Property: 9 claims, 186 acres, near American Fork, Tooele Co., shows galena and carbonate ore in fissure vein cutting blue and gray limestone, with N.-S. strike and dip of 70° W. Pay ore reported to occur in shoots from 6" to 4' wide, running as high as 40% lead, 6 oz. silver, 2% copper and \$2 gold.

Development: by 3 incline shafts, deepest 193'. Management plans driving a 700' tunnel in 1916.

PLUMAS EUREKA MINES CO.

CALIFORNIA

Chas. D. Stark, Jr., mgr., Johnsville, Calif. Company was reorganized in 1915. **Property:** one of the oldest and most prosperous gold quartz mines of California, having distributed over \$2,800,000 dividends.

PLUTO GOLD & COPPER MINING CO.

WYOMING

Idle. **Office:** 55 High St., Oshkosh, Wis. Mine near Dillon, Carbon Co., Wyo. Ole Granberg, pres. and gen. mgr.; H. Thorsgaard, v. p.; H. O. Granber, sec.-treas.

Inc. Dec. 15, 1902, in Wyoming. Cap., \$1,000,000; shares \$1 par.

Property: 11 claims, patented, 220 acres, and a 40-acre mill site, in the Battle Lake district, near the Ferris-Haggerty mine, said to show both fissure veins in quartzite and contact deposits between diorite and quartzite, ranging from 2 to 30' in width, and carrying copper ore, with average assays of 1% copper, a trace of silver and \$3 gold per ton.

Development: by numerous pits of 10 to 20' depth, 5 shafts of 55 to 100' depth, and a tunnel of 1,004' with about 2,000' of underground workings. **Equipment:** includes a 40-h. p. steam plant and 3-drill air compressor. Inactive, except for annual assessment work, since 1907.

PLUTUS MINING CO.

UTAH

Office: care Knight Investment Co., Provo, Utah. Mine office: Eureka, Juab Co., Utah. **Officers:** Jesse Knight, pres.; Jacob Evans, v. p.; R. Eugene Allen, sec.-treas. **Inc. 1907, in Utah. Cap.**, \$100,000; shares 10 cts. par, fully issued; assessable. Last assessment of 1/5 ct. per share, delinquent Sept. 15, 1914. Absorbed the Tetro Mining Co., Jan., 1909. Shares are listed on the Salt Lake Stock Exchange.

Property: 14 claims, patented, including the Tetro group of 3 claims, from which the Tetro Mining Co. paid \$18,000 in dividends. Mine carries auriferous and argentiferous lead and copper ores, developed by a 600' shaft, about 3,700' of tunnels, and 1,250' of other workings. Under 2 years' lease to Fairbairn Exploration Co., a Colorado concern, operating the Godiva mine, immediately to the east.

Equipment: includes a 75-h. p. electric motor, hoist and air compressor. Buildings include necessary shops and an office.

PLYMOUTH CONS. GOLD MINES, LTD. CALIFORNIA

Office: 20 Copthall Ave., London, E. C., Eng. Mine office: Plymouth, Calif. Manager's office: Bewick Moreing & Co., 62 London Wall, London, E. C. Eng. Albert Burch, cons. engr., Crocker Bldg., San Francisco, Calif.

Officers: C. Wanklyn, chairman; C. A. Moreing, W. J. Loring, John Barry, J. P. and David Richards, directors. F. A. Crew, sec.; Jas. F. Parks, supt., Plymouth, Calif.

Inc. Jan. 15, 1914, in England. **Cap.**, £240,000; shares £1 par; all issued. Gross earnings for 1915 were \$846,491; operating expenses, \$500,257 and net earnings, \$273,253.

Dividends: in 1915, were 3s per share, or \$173,000. Balance brought forward for 1916 was \$12,000, as against \$1,060 in 1915.

Property: the Plymouth Consolidated group of 13 claims, partly patented, and a tract of agricultural land, about 500 acres, at Plymouth, Amador Co., Calif. The holdings cover 4,800' along the Mother Lode, showing 3 fissure veins in Mariposa slate. The veins run N.-S. with dip 60° E. Ore is partly sulphide, occurring in shoots 6'-30' wide and 150'-300' long, said to average 0.30 oz. gold and 0.14 oz. silver, per ton.

Development: by several incline shafts and 7,600' of workings to depth of 2,450'. The main or Pacific shaft is a vertical 3-compartment shaft, 2,450' deep, sunk in the footwall of the Empire-Pacific veins from the 1,600' level, with crosscuts every 100' from the 950' to the 2,450' level. Work in 1915 amounted to 4,517', mainly crosscuts and raises.

Equipment: includes electric hoist, 1,800 cu. ft. compressor, a 30-stamp 360-ton mill, for amalgamation and concentration of ores which makes an extraction of 90.58%. The mill is equipped with No. 5 Gates gyratory crusher, Hardinge mills, Richard classifier, tables and vanners. The concentrates averaging \$111 per ton, and the tailings run about 60 cts. per ton. Total cost per ton was \$3. Management estimated ore reserves at 90,000 tons of \$6.73 ore, Feb., 1916.

Production: 44,773 tons of ore in 1914, yielding 11,132 oz. gold; 129,500 tons of ore in 1915, yielding 31,193 oz. gold and 8,652 oz. silver, gross value \$846,491. Total production to date amounts to 174,273 tons.

The property is an old mine, for a long time dormant, but made into a successful producer through the able judgment and operating ability shown by Bewick Moreing & Co.

POCAHONTAS COPPER QUEEN MINING CO. ARIZONA

Office: Pocahtontas, Ark. Mine office: Mayer, Yavapai Co., Ariz. **Officers:** W. H. Skinner, pres. and gen. mgr.; T. J. Burns, v. p.; D. A. Chapin, sec.; Benj. A. Brown, treas.

Inc. 1906, as successor of Big Bug Gold & Copper Mining Co. **Cap.**, \$1,000,000.

Property: 14 claims, 4 miles N. W. of Mayer, in 2 groups, about 1,000' t. The smaller group of 4 patented claims carries gold-copper ore. Spar group of 10 claims has a vein up to 14' in width, carrying mainly

gold and silver-lead values, and the mine is said to have shipped 23 carloads of high-grade ore, under former ownership, that gave sufficient returns to pay the purchase price and the cost of development. The mine has a 200' two-compartment shaft and a 120' shaft. A level at this depth was being extended to develop 2½' of ore, said to assay \$49 in gold, silver, lead, cut in the bottom of the shaft, in 1914.

POCAHONTAS MINING CO.**CALIFORNIA**

Office: 112 Market St., San Francisco. **Mine office:** Lewis, Mariposa Co., Calif. **Property:** 326 acres, patented, including the Great Northern mine, in the White Rock district, shows several veins of cupriferous iron ore, between diorite, with altered diabase gangue. The main ore-body, about 100' in width, occurs in a mineralized zone up to 1,000' across, having an oxidized zone of about 100' depth, from which a limited production of high-grade ores was made many years ago.

Development: by a 300' shaft, 200' tunnel and 900' of drifting. **Equipment:** includes steam power and a hoist, and buildings include an office, laboratory, smithy and bunkhouses. Making small shipments to the Selby smelter. Property worked by lessees in 1915-16.

POCATELLO GOLD & COPPER MINING CO.**IDAHO**

Pocatello, Bannock Co., Idaho. H. W. Lockhart, pres. Inc. Dec. 1, 1902, in Idaho. **Cap.**, \$1,000,000; shares 50 cts. par.

Property: 7 claims, 140 acres, in the Fort Hall district, 12 miles east of Pocatello, shows a vein of about 3' average width, reported to give assays of 30% copper, 13.8 oz. silver and \$1 gold per ton, from bornite and chalcocopyrite ore. Ore is mainly of milling grade with a small paystreak of rich ore, from which shipments to the White Knob smelter gave returns of 17 to 30% copper and 15 to 18 oz. silver per ton. Development is mainly by short tunnels, with about 1,000' of workings. Presumably idle.

POLAND MINING CO.**ARIZONA**

Office: Room 514, 49 Wall St., New York. **Mine office:** Prescott, Ariz. F. M. Murphy, pres.; George D. Morris, sec.-treas.

Property: 37 claims, about 750 acres, extending through a highly mineralized mountain, lying between the Big Bug and Lynx mining districts, Yavapai county, about 35 miles from Prescott by rail, or 15 miles by wagon road. The claims cover a granite mountain intersected by a number of well-defined, persistent fissure veins, disclosed in a tunnel which goes through the mountain a distance of some 8,000'. Two of these veins, the Poland and Accidental, have been extensively developed.

The property is equipped with air compressors, drills, cars and tools, and a thoroughly modern 20-stamp 100-ton mill.

The tunnel will be of considerable value as a transportation tunnel when a railroad is built from Lynx Creek end, connecting the mines in the Walker district with the Prescott and Eastern Railroad at the Poland end of the tunnel.

Company's tunnel and mill are under lease to the Major Mining & Milling Co.

POLARIS MINING & MILLING CO.**ARIZONA**

Clifton, Graham Co., Ariz. **Officers:** C. A. Van Dorn, pres.; Sam. Abraham, v. p.; J. H. Kerby, sec.; J. R. Hampton, treas. Inc. March 15, 1902, in Arizona. **Cap.**, \$2,500,000; shares \$1 par.

Property: 40 claims, 700 acres, also a 70-acre mill site and 400 acres miscellaneous lands, in the Greenlee district, on the San Francisco river, about 7 miles from Clifton, the nearest rail point. The claims lie N. W. of the Clifton Consolidated and New England mines and show granite, with porphyry dikes at acute and right angles to the vein system, carrying ore

in contact deposits between limestone and igneous rocks, and as disseminated ores in porphyry. The orebodies are of 8 to 100' estimated average width, traceable 6,000', carrying oxide carbonate and sulphide ores, estimated to average 3% copper, 4 to 15 oz. silver and \$4 to \$15 gold per ton. The lower workings show mainly chalcopyrite.

Development: by the 105' Black Prince shaft, the 100' Nonesuch shaft, the 140' Golden Eagle shaft, the 560' Black Prince tunnel, the 320' Fraction tunnel, the 307' Golden Eagle tunnel and the 532' Phonolite tunnel, with about 2,500' of workings. The property was under lease to the Southwestern Development & Improvement Co., 1912. Idle.

PONAMONA ANTIMONY MINE

NEVADA

I. C. Bateman, Alameda, Calif., owner. **Property:** 4 claims, on Pass Creek in Pine Forest range, a few miles N. W. of Queen river crossing has been under development six years and ore shipped. Bought in 1916 and development started by new owner.

PONDERAY SMELTER

IDAHO

Sandpoint, Bonner Co., Idaho. Owned by Idaho Smelting & Refining Co., whose properties were sold at sheriff's sale to Union Trust & Bank Co., of Spokane. A new company will be formed by the bondholders.

PONSARDIN MINE

COLORADO

W. E. Bowden, mgr., Leadville, Colo. **Property:** on Yankee Hill, near Leadville. Lessees reported to have uncovered a body of sulphide ore, 70' long and 15' high, on the 430' level, containing 23-31% zinc, 19% lead, 6 oz. silver, and to be shipping at the rate of 50 tons daily in 1916.

PONUPO MANGANESE CO.

CUBA

Offices: 71 Broadway, New York and Santiago de Cuba, Cuba. **Directors:** Chas. F. Rand, pres.-treas., New York; Pedro Aguilera, v. p., Santiago de Cuba; Chas. F. Smith, sec.

Inc. in New Jersey. **Cap.**, \$30,000; shares \$100 par; all outstanding. **Gross earnings** in 1915, \$567,800, of which \$315,748 was from iron ore sales. **Operating expenses** in 1915, \$250,568.

Property: company owns iron, manganese and copper mines, the iron mines being the only ones operated at present. They are worked as open quarries. **Production:** in 1915, 72,387 tons ore, assaying 60% iron, silica 10%, phosphorus 0.015%. **Average value ore shipped**, \$4.44 in the U. S.

PORCUPINE CROWN GOLD MINING CO.

ONTARIO

Offices: Dominion Exp. Bldg., St. James St., Montreal, Que.; 59 Victoria St., Toronto and Porcupine, Ont. **Officers:** J. W. Carson, pres.; W. I. Gear, 1st v. p.; J. G. Ross, 2nd v. p.; James Cooper, sec.-treas.; John Reid, asst. sec.-treas.; J. W. Carson, W. I. Gear, J. G. Ross, C. A. Smart, J. W. Ross, A. G. Gardner, R. W. Redford, F. S. Meighen, Ziba Gallagher, James Cooper, directors. Samuel W. Cohen, Cobalt, Ont., gen. mgr.; M. W. Summerhayes, mgr.

Inc. in Oct., 1913. **Cap.**, \$2,000,000; shares \$1 par. Crown Trust Co., Montreal, registrar and transfer agent. Traded on New York Curb.

Balance sheet of Dec. 31, 1915, showed net profit for the year of \$299,116, making total with balance brought forward of \$516,310; dividends, 12%, absorbed \$240,000, other accounts \$6,333, leaving surplus of \$269,977. To 1916 company paid in dividends 24%, \$480,000.

Property: one patented claim, 40 acres, at Porcupine, Ont., shows quartz ore with free gold and sulphides in veins in schist. Orebody is 5' wide and 1,100' long. Vein strikes N. and has dip of 70° S.

Development: 500' vertical shaft with various levels. Ore mined by shrinkage stoping. **Ore reserves:** management reports 150,000 tons of ore blocked out with total reserves of \$1,250,000.

Equipment: includes 150-ton cyanide mill. Costs per ton for 1915 were: mining, \$2.93; hoisting and tramming, 32½ cts.; mill operations, \$1.09; power, heat and maintenance, \$1.23; general mine expense, 52 cts., administration, depreciation, insurance and taxes, 62½ cts.; total, \$6.72.

	Tons		Extraction	Net Value Bullion
	Treated	Value Per Ton		
1915.....	41,326(a)	\$14.46	97.70%	\$613,565
1914.....	40,857	17.18	97.26%	689,151

(a) In addition there was treated 5,093 tons from impounded tailing of the first amalgamation mill, assaying \$3.15 per ton, extraction 85.77%.

PORCUPINE EXCELSIOR MINING CO., LTD. ONTARIO

Porcupine, Ont., Canada. **Officers:** P. Cameron, pres.; Wm. Duncan, sec.; G. L. Wheeler, asst. sec. **Property:** claims, Nos. 13890, 13891 and 900 P. in Shaw Twp., Nipissing district, Ont., formerly owned by the Tommy Burns Mining Co.

PORCUPINE MINES SYNDICATE ONTARIO

Care Mark Harris, Mutual Life Bldg., Buffalo, N. Y. Is a new scheme of the above named promoter; will acquire the Cross Veteran location, 160 acres, in Tisdale Twp., Porcupine district. Not regarded favorably.

PORCUPINE PET GOLD MINES, LTD. ONTARIO

Bankrupt. C. L. Sherrill, pres., Timmins, Ont. Controlled by Porcupine Homestakes Mines, Ltd., a Buffalo syndicate. Inc. April 27, 1914, in Ont. **Cap.**, \$1,000,000. Property and 2-stamp Nissen mill shut down. Development work proved unsatisfactory. See Report Ont. Bureau of Mines, 1915, pp. 52, 57.

PORCUPINE PREMIER GOLD MINING CO., LTD. ONTARIO

Office: G. W. Fields, treas.-gen. mgr., 53 State St., Boston, Mass. B. M. Walton, supt. Inc. in Mass. **Cap.**, \$1,000,000; shares \$1 par. Traded on Boston Curb.

Property: 40 acres in Whitney Twp., 110 acres in Deloro Twp., Porcupine district, Ont., Can. Also said to own Standard group of about 110 acres, south of Dome Lake property. Is reported, 1916, to have bought the Virtue Mine near Baker, Oregon.

Development: on the Porcupine property consists of two 35' shafts on an 18" vein. Mines are in the prospect stage and are outside of the proven belt, but are regarded as worthy of prospecting. Company's promoter is treasurer and general manager, which is a handicap, to put it mildly.

PORCUPINE VIPOND MINES, LTD. ONTARIO

Office: 63 Wall St., New York. Mine office: Schumacher, Ontario, Canada. **Officers:** Henry H. Ward, pres.; H. A. Poillon, v. p.; Chas. C. Dickson, v. p.-treas.; H. F. Karst, sec.; C. H. Poirier, mgr., with L. A. Sorenson, and J. A. Carey, directors. H. W. Heine, supt.

Inc. April 29, 1914, in Ontario. **Cap.**, \$1,500,000; shares \$1 par; 900,000 shares outstanding Feb., 1916. **Bonds:** authorized, \$125,000 7%, 1-year; \$50,000 outstanding, due June 14, 1916. Annual meeting, first Monday in April. Security, Transfer & Registrar Co., New York, and Trust and Guarantee Co., Ltd., Toronto, registrar and transfer agents. Traded on New York Curb, and in Toronto.

Balance sheet of Dec. 31, 1915, shows: assets, \$1,014,484, which includes mine and plant, \$979,964; bullion on hand and in transit, \$23,211; liabilities: notes and acct's payable, \$37,380; surplus, \$26,204. Gross income for year ending March 31, 1916, from ore sales was \$248,312 and net income \$34,135.

Property: company owns outright the Vipond mine, 3 patented claims, 120 acres, in Porcupine mining district, formerly owned by the Porcupine

Gold Mines, Ltd. The purchase price was \$750,000, paid in stock of the Vipond company, at the rate of 3 shares of new for 8 shares of old stock. Also owns the Ward Porcupine Mines Co., Ltd., and has 3-year lease and bond from May 1, 1915, on $\frac{3}{4}$ interest in the Aitchison McDougal Cochenour group of 6 claims, also in Porcupine.

Ore: gold quartz occurs in fissure veins, said to be 3'-10' wide, which run N. E.-S. W. and are vertical. Payore occurs in a shoot 900' long. Formation is an amygdaloidal basalt.

Development: to April, 1916, 7,946', with 500' vertical shaft. In 1915 work amounted to 1,799', mainly drifting with 524' of diamond drilling. Drifts on the 200' level, extended to the West limits of the North Vipond tract, are reported to have proved the continuation of the ore-bearing zone. In 1915 a vertical 2-compartment winze was sunk on the Davidson vein, 220' below the 300' level and exploratory work in 1916 is being done on the 400' and 500' levels. Early in 1916 an ore-shoot 5' thick, was opened up for 135' in length on the 400' level, the ore being reported to run \$15 per ton.

Ore reserves: April 1, 1916, estimated at 68,145 tons in place, valued at \$8 per ton, and 22,850 tons already broken, but not pulled, averaging \$6.25 per ton, a total of 91,000 tons, valued at \$688,600.

Equipment: includes hoist, Sullivan compressor, hydro-electric and steam power, and 140-ton mill, which employs the continuous decantation process and is equipped with Buchanan crusher, 6' Hardinge ball mill, classifiers, Dorr agitators and Dorr thickeners.

The mill treated 35,899 tons of ore in 1915, with the following results:

Gold Bullion produced, 11,978.66 fine oz.....	\$247,598.56
Silver Bullion, 1,455.39 fine oz.....	713.73
Total value recovered.....	248,312.29
Total value lost in tailings.....	21,355.13
Gross value of ore treated.....	269,667.42
Average value p. t. treated.....	7.51
Loss p. t. treated (tailings).....	.59
Recovery p. t. milled.....	6.92
Extraction p. t. milled.....	92.1%
Cost per ton milled.....	5.47

Although the grade of ore milled was lower than in previous years owing to the narrowing of veins and complex faulting of the ore shoots, milling costs were only \$5.47 in 1915, as compared with \$6.44 in 1914.

The mill capacity has been increased from 3,000 to 4000 tons per month.

Production: for 3 months ending March 31, 1916, was 11,816 tons of ore, yielding \$5.24 per ton or \$53,348 in bullion.

PORTAGE LAKE & BISBEE MINING CO.

ARIZONA

Office: care John Funkey, Hancock, Mich. Mine address: Bisbee, Ariz. Chas. Lewis, treas. Inc. April, 1903, in Arizona. Cap., \$1,000,000; shares \$1 par; succeeding Portage Lake & Calumet Development Co.

Property: 12 claims, 3 fractional, 191 acres, several patented, 3 miles S. E. of Bisbee, showing country rock of limestone, with a porphyry contact. The mine has a 2-compartment 302' shaft, with a small air compressor, Worthington pump, 75-h. p. hoist, boarding house, bunkhouse and smithy. Inactive many years.

PORTLAND CANAL TUNNELS, LTD.

BRITISH COLUMBIA

E. J. Hearn, sec., P. O. Box 718, Victoria, B. C. **Officers:** R. I. Elliott, K. C., pres.; J. A. Mara, H. A. Munn, R. M. Stewart and J. R. Waghorn, directors.

Inc. Aug. 23, 1912, in British Columbia. **Cap.**, \$700,000; shares 25 cts. par.

Property: 10 claims. Crown granted, near Stewart, Portland Canal, B. C. Company was organized to drive a crosscut tunnel to intersect the vein series of Glacier Creek, previously worked in the Portland Canal and in the Stewart Mining Co.'s properties. The tunnel, over 3,000' long, has so far failed to disclose orebodies of permanent commercial values. Idle, owing to lack of funds.

PORTLAND CONSOLIDATED COPPER CO. WYOMING

Office: 20 Broad St., New York. **Officers:** Phil. S. Delany, pres.; Myer Newberger, v. p.; Thos. C. Delany, sec.-treas.; above with Herbert Frankenberger and Wm. H. D'Esterre, directors.

Inc. 1916, in Wyoming. **Cap.**, \$2,000,000; shares \$1 par; 1,015,000 shares outstanding; fully paid and nonassessable. Metropolitan Trust Co., New York, registrar; Company office, transfer office.

Property: formerly owned by the West Virginia-Wyoming Copper Mining Co. and the Portland Copper Mining Co., comprises 203½ acres, 153¾ acres patented, at Encampment, Carbon Co., Wyo., said to cover over a mile along a mineralized zone of diorite and limestone. The Portland group is reported to be traversed for 1,800' by a system of veins, which runs westerly into and through the West Virginia-Wyoming for another 1,800', veins said to vary from 12" to 40' in width, and to average 3% copper and some gold. Ore minerals are chiefly pyrite, chalcocite, bornite and malachite.

Development: 2,350' of underground workings, of which 1,400' are on the Portland, consisting of a 900' tunnel and 248' main shaft. Management estimates reserves blocked out at 300,000 tons of probable mill ore, containing 2-3% copper and 40 cts. gold and 50,000 tons probable smelting ore, containing 10-25% copper and \$1-\$6 gold per ton. Further development necessary to prove value of the property.

PORTLAND GOLD MINING CO. COLORADO

Office: 310 Mining Exchange Bldg., Colorado Springs, Colo. Mines at Victor, Colo. Mills at Colorado Springs and Victor, Colo. **Officers:** Irving Holman, chairman; Frank G. Peck, pres.; Dr. D. H. Rice, v. p.; Thos. F. Burns, sec.-treas.; above with Ira Harris, directors. Harry V. Holman, purch. agent. Frank L. Smale, mine mgr.; Fred Jones, mine supt.; O. A. Willson, engr.; Geo. M. Taylor, gen. mgr. of mills; Jas. B. Heffernan, mill supt. at Colo. Springs; Thos. B. Crowe, mill supt. at Victor. Hills & Willis, cons. engr.

Inc. 1894, in Iowa. **Cap.**, \$3,000,000; reorganized 1905, in Wyo., same capitalization; shares \$1 par; all issued. Colo. Title & Trust Co., registrar. Stock transferred at company's office. Listed on Colo. Springs Exchange. Annual meeting, 3rd Monday in February, at Cheyenne, Wyo. Controls the Amazon Mining Co.

Comparative General Balance Sheet:

Assets—Jan. 1st—

	Property	Equip.	Supplies	Sec't's, Ins. Furn., Etc.	Current	Total
1916.	\$3,823,771	\$165,915	\$189,522	\$68,628	\$564,303	\$4,812,139
1915.	3,717,408	184,509	141,702	40,344	592,883	4,676,846

Liabilities—

	Cap. Stock	Current	Surplus	Total
1916.	\$3,000,000	\$ 8,695	\$1,803,444	\$4,812,139
1915.	3,000,000	14,968	1,661,878	4,676,846

Comparative Profit and Loss Account:

	Net Optg.		Balance		Deduct's	Divid's	Balance
	Profit	Total	Jan. 1	Deprec.			
1916.....	\$798,460	\$799,739	\$1,661,878	\$298,172	\$360,000	\$1,803,444(a)	
1915.....	590,594	591,046	1,767,789	336,957	360,000	1,661,878(b)	

(a) Jan. 1, 1916. (b) Jan. 1, 1915.

Dividends: 16% per year, paid quarterly, from Jan. 15, 1907, to and including Jan. 15, 1909; April 15, 1909, 3%; July 15 and Oct. 15, 1909, 2% each; 1910, 1911, 1912, 8% each; 1913, 10%; 1914, 12%; 1915, 12%. Total dividends to 1916, \$10,177,080.

Property: the Portland and Independence mines, 253 acres, in Cripple Creek district, Teller Co., Colo., carrying gold ore in quartz veins. The Independence mine and mill, comprising 110 acres on Battle Mtn., were purchased from the Stratton-Independence, Ltd., a British corporation, in July, 1915, for \$325,000. The Independence mine has over 15 miles of workings and is credited with a gross production to July, 1915, of \$23,621,728.

Development: the Portland mine, worked continuously for 23 years, has a total of 55½ miles of underground workings. Total work in 1915 was 19,808', as compared with 15,592' in 1914.

For geology of the district, see U. S. G. S. Prof. Paper, No. 54, also Vindicator Cons. G. M. Co.

Mine is worked by 2 shafts, No. 2 sunk 154' in 1915, to 1,870' depth, or the 18th level. The mine is drained to 400' below this level by the Roosevelt tunnel. On the 17th level, 6,134' of work performed in 1915, including 5,816' of crosscutting, disclosed nothing aside from the main vein systems. Drifting on the 18th level exposed No. 1 vein for 1,480', showing 600' of shipping grade, 200' of possible ore, 350' of mill dirt and 330' of barren ground. The ground on this level is broken and fissured. The North vein is larger than on the 17th, but of lower grade; to the S. the vein splits, following the granite contact to the W. and the phonolite dike to the E. The East vein is reported to be 5' wide and shows \$25 ore. Management considers the showing on this level highly promising. The shaft was sunk to the 19th level and about 6' from the station the main Portland No. 1 vein was opened in May, 1916, showing 6' of ore and reported to assay from \$50-\$125 per ton. No. 1 shaft is being sunk on the Bobtail vein, said to show 5' of \$30 ore.

Production comes from every level in the mine workings. The 200' level and the territory above the adit tunnel level are being worked by lessees. These operations net the company 29% in royalties, above all expenses and all mill ore from development and reject from ore houses.

Company operates two mills at Victor, Colo., with a capacity of 1,200 tons daily, and reduction works at Colorado Springs, treating 400 tons daily. The Colorado Springs mill, which treats only high-grade ore, ran almost to capacity in 1915, treating 55,339 tons company ore, running \$24.68 per ton and yielding \$1,366,099 and 12,067 tons custom ores (lessee's operations) running \$22.75 per ton and yielding \$274,675.

The Independence mill at Victor, taken over in July, 1915, was completely remodeled into an oil-flotation plant for treatment of the low-grade ores and enlarged to 1,000 tons daily capacity. The mill treated to Dec. 31, 1915, 213,122 tons of \$3 ore, yielding \$646,724. Total production from both mills was 282,192 tons, with gross value of \$819,432. Costs per ton crude ore was \$1.7965; total mining cost was \$676,152; milling cost was \$12.2180 at Colorado Springs and \$2.5186 at both mills.

Production: from the Portland mine in 1912, 44,562,045 tons, gross

value, \$987,416; in 1913, 53,245,500 tons, gross value, \$1,380,713; in 1914, 62,997,538 tons, gross value, \$1,467,005; in 1915, 72,192 tons, gross value, \$1,710,277, with a grand total from April, 1894, to Dec., 1915, 1,384,061.287 tons, gross value, \$37,834,725. Total production to date from both mines is 3,653,969 tons of ore, with gross value of \$64,426,370.

Management estimates from 12-15,000,000 tons of low-grade ore in the mines and on the dump.

Company has a co-operative insurance fund and maintains a hospital at Victor jointly with the Vindicator company, for the benefit of the employees. The management is excellent and the outlook promising for many years of profitable operations and substantial dividends.

POWERS GULCH DEVELOPMENT CO.

ARIZONA

John Matson, supt. Property: 23 claims in Powers gulch, near Globe, Gila Co., is said to show a vein carrying bornite and chalcopyrite ore associated with pyrite. Mine, idle for a long time, was reopened in 1915 and a strike of tungsten ore reported in April, 1916. Development: by 2 shallow shafts and 2 short tunnels.

POZO GILPIN MINING CO.

COLORADO

Mine near Idaho Springs, Clear Creek Co., Colo., has lead-copper ore mined for its gold-silver values, by shaft and tunnel work. Company was idle during 1915, but the Engineering Mining Co. operating a lease on the property, sank a 100' shaft below the tunnel level. Work was suspended in Oct., 1915, pending addition of electric power to handle the water encountered in this work. Equipment: includes steam power plant with Ingersoll-Rand compressor.

PRECIOUS METALS CORPORATION

COLORADO

Office: 109 W. 26th St., New York. Mines in Mill gulch, San Juan Co., Colo. Officers: Chas. E. Force, pres.-treas.; F. W. Force, v. p.-sec.; and A. Fricke, directors.

Inc. Nov. 7, 1905, in Colorado. Cap., \$5,000,000; shares \$5 par; issued, \$4,250,000. Columbia Trust Co., New York, registrar. Annual meeting, third Monday in November. Company owned the entire stock issue of the East Canada Smelting Co., Ltd., which owned the McDonald copper-sulphur mine at Weedon, Quebec. The Canadian holdings were sold in 1915 to Weedon Mining Co., Ltd.

Company owns the Silver Crown group, 12 claims, 9 patented, and 4 mill sites, about 7 miles from Silverton; also the Forest and John mines, 9 miles distant, patented and freehold. Ore occurs in quartz veins in andesite, carrying lead and silver values. Developed by 2,500' of tunneling. Idle in 1915-1916.

PRESIDIO MINING AND MILLING CO.

TEXAS

Office: 255 California St., San Francisco, Calif. Mine office: Shafter, Texas. Officers: W. S. Noyes, pres.-mgr.; E. M. Gleim, mgr.

Cap., \$150,000; shares \$1 par; all issued. President controls the company through ownership of 97,933 shares. Operated as a close corporation.

Property: the Shafter Mine, at Shafter, Presidio county, has a production record of \$14,000,000 since 1883. Ore: mainly silver, with gold and lead values. Development: by about 25 miles of workings.

Equipment: includes 1 mile aerial tram, a 15-stamp 100-ton mill and a cyanide plant. The mill is equipped with 2 tube mills, Oliver filter, Pachuca tanks, Dorr thickener and 100-h. p. de La Vergne oil engine.

Production: in 1914 amounted to about \$300,000. In 1915 minority stockholders, representing 22,753 shares, filed a suit, asking for appointment of receiver and an accounting from the president, who is alleged to have so manipulated the company's finances as to obtain personal title to min-

ing property in Texas, which should belong to the company. This suit is presumably still pending.

PRESTON EAST DOME MINES, LTD. ONTARIO

Office: 7 Melinda St., Toronto, Ont., Canada. **Officers:** Lt. Col. D. M. Robertson, pres.; Gordon Taylor, sec.-treas., with C. L. Sherrill, R. L. Shellington and D. L. White, Jr., directors.

Inc. 1911, in Ont. **Cap.**, \$3,000,000; shares \$1 par; 2,500,000 shares outstanding. Stock listed on New York Curb. Toronto General Trusts Corp'n, Toronto, transfer agents.

Property: 3 claims; patented, in Tisdale Twp., Porcupine, Ont., adjoining the Dome Mines, Ltd. **Ore:** which occurs in narrow veins in quartz-porphry, carries coarse gold, associated with pyrite and zinc-blende. Company is idle, pending outcome of further development on the Dome Mines property. Secretary reports a small cash balance on hand, Jan., 1916.

PRICE MINING CO. UTAH

Office: 17 S. 7 W. St., Salt Lake City, Utah. **Officers:** Fred W. Price, pres.; J. C. Barnard, v. p.; D. C. Dart, sec.-treas., with John Brandborg and Wm. M. McCrea, directors.

Inc. April, 1915. **Cap.**, \$250,000; shares 25 cts. par. Stock is listed on the Salt Lake Exchange.

Property: 15 claims, 380 acres, in South Fork canyon, Alta-Cottonwood mining district, Salt Lake Co., Utah, believed to carry the Cardiff contact, which is intersected at right angles by several fissure veins. Samples taken at depth of 15' on the Nettie claim, reported to have assayed 64.2% lead, 50 oz. silver and \$12 gold per ton.

A tunnel is now being driven to intersect this orebody at depth of 200'. Plans adding electric power, compressor and drills. A prospect.

PRICKLY PEAR MINING CO. MONTANA

Office: care J. C. Murray, pres., Helena, Mont. Mine P. O.: Jefferson City, Mont. Lee Dever, v. p.; H. M. Brooks, sec.-treas. Company owns the Prickly Pear mine, 2 miles from Jefferson, opened by a 350' tunnel, showing gold and silver-bearing copper ore. Has no power equipment. Production not reported.

PRIMOS CHEMICAL CO. COLORADO

Primos, Delaware Co., Pa. Walter M. Stein, pres.; Gideon Boericke, sec.; Felix Boericke, treas. Operates its mining department as the Primos Mining & Milling Co.

Inc. Aug., 1912, in Colo. **Cap.**, \$500,000. Is the largest buyer and producer of vanadium, radium and tungsten ores in the United States.

Primos Exploration Co.

Subsidiary of the Primos Chemical Co.

Inc. Nov. 24, 1915, in Delaware. **Cap.**, \$200,000, to explore for ores and minerals. H. E. Latter, Norman P. Coffin, Wilmington, Del. and Clement M. Egner, Elkton, Md., incorporators.

Primos Mining & Milling Co.

Lakewood, Boulder Co., Colo. Is a close corporation controlled by Primos Chemical Co., the largest dealer in rare minerals in the world. **Officers:** Walter M. Stein, pres.; C. F. Lake, v. p.-mgr.; Gideon Boericke, treas.; Harold Boericke, sec.

Company owns many properties at widely scattered localities which are operated by different departments.

Vanadium Department.

The company owns at Vanadium, Colo., about 5,000 acres of roscoelite bearing land locally known as the Bear Creek property. At this place the company operates a 400' shaft, mining both on its own account and

through a large number of lessees who pay 25% royalty. About 65 men employed in the mine and 40 at the mill.

The output of this property and that at Placerville, Colo., also worked for vanadium, is treated in a mill and the concentrate reduced in the reduction plant to ferro-vanadium, which is shipped to the parent company at Primos, Pa.

Molybdenite Department.

This department operates the Young and Lively mine, A. H. Yale, supt., the first mine in America to be worked for molybdenite ore exclusively. The mine is in the Dailey district, about 11 miles above Empire, Clear Creek Co., Colo. The ore occurs in veins mined through tunnels and an open cut, the product being sacked and shipped to Pittsburgh. The mine is equipped with compressor and employs 40 to 60 men.

Tungsten Department.

The company has large and extremely valuable holdings in the Boulder Co., Colo., tungsten field adjacent to Nederland. **Property:** 1,680 acres distributed over 5 sq. miles in the northern part of the Nederland field. The rocks are gneissoid granite and a granitic schist which grades into quartz and mica-schist. These rocks are cut by dikes of pegmatite in which the ores occur as veins and streaks carrying ferberite, the black tungstate of iron, in a matrix of quartz and feldspar, and crushed rock. The veins run N.-S. and usually dip steeply, rarely as little as 45°.

The **Conger** is the principal mine, but two others are operated. At the Conger mine three veins are open, the Conger, Middle and East veins. The first two unite on the strike on the 450' level where a large orebody occurs. The ore-shoots are lens shaped and show rapid pinching and enlargement. On the 200' level the vein has been stoped for a total distance of 800' and a big ore-shoot has been stoped for 250' long, 90' high and 8' wide.

Development: the shaft is said to be 1,100' deep, making it the deepest tungsten mine in the world. Levels are about 100' apart and shrinkage stoping is employed. A working tunnel taps the shaft at the 150' level.

Equipment: includes a Hendrie-Bolthoff second motion hoist and a Norwalk 300 cu. ft. compressor. Two-mile tramway from mine to mill, hauls the ore in trains of 5 cars of 1½ tons capacity by a 3½ ton General Electric storage battery motor.

Company also operates the Reddig mine, 600' deep, the Lily mine, 160' deep, and the Crow mine, about 75 sets of lessees were working on these properties early in 1916.

The Quaker and Oregon mines about 4 miles from Lakewood, have a relatively small output which is delivered to the mill by wagon. The Lone Tree mine, half a mile from Lakewood, has a high-grade orebody 100' long, stoped for 70' high and as much as 20' wide. The Quaker shaft is 325' deep.

The **Primos mill** at Lakewood handles 60 tons daily of 3%-5% ore. It has a 100-ton bin for company ore and six 15-ton bins for custom ore. After sampling the ore goes over 1½" grizzlies, oversize to Blake crusher, to 10-stamp battery of 1,000 lbs. stamps, each stamp delivering 3½ to 4 tons 20-mesh pulp per 24 hours. Battery pulp goes to No. 6 Wilfley tables, making concentrates sent to settling tanks above Frue vanners, whose tails go through settling tanks, with discharge to Dorr classifiers and sand to Prosser tube mill, whose product with part of settlers' goes to Frue vanners. Tails of vanners go to canvas tables. Milling practice produces concentrates carrying from 40% to 65% tungstic acid, with recoveries ranging from 65% to 85%.

Arizona Mines. The Primos Co. operates a property at Wolfram, 5

miles from Johnson, Cochise Co., Ariz. Owen T. Smith, mgr. The ore, in part placer gravel and in part vein quartz, found in deposits in the low hills nearby, is treated in a 30-ton concentration mill, equipped with jigs and tables. The product is sacked and shipped to Clifton, Pa.

Company is operated as a close corporation and does not give out any information about its operations or the properties.

PRINCE ALBERT MINE

COLORADO

Formerly owned by the Prince Albert Cons. Mining Co., and purchased at foreclosure sale in Dec., 1914, by Frank Johannngmann, of Cincinnati, for \$31,496.

Property: on Beacon hill, near Cripple Creek, Teller Co., Colo., operated under 3-year bond and lease from 1916 by Frank Vetter, who is reported, July, 1916, to have organized the Albert Beacon Gold Mining Co. to take over the mine. Developing through the Hand tunnel.

PRINCE ALBERT MINING & MILLING CO.

ARIZONA

Mark Bradley, mgr., Groom Creek P. O., Yavapai Co., Ariz. **Property:** shows gold bearing veins in schist, developed by 200' shaft. Equipped with Fairbanks Morse hoist and Sullivan 240 cu. ft. compressor.

PRINCE CONS. MINING & SMELTING CO.

NEVADA

Office: 1118 Newhouse Bldg., Salt Lake City, Utah. **Mine office:** Pioche, Lincoln Co., Nev. **Officers:** A. H. Godbe, pres.; E. L. Godbe, v. p.; M. C. Godbe, sec.-gen. mgr.; John Pingree, treas.; above with Geo. F. Wasson and D. L. Wertheimer, directors. Jas. Quirk, supt.

Cap., \$2,000,000; shares \$2 par. Stock listed on Salt Lake Exchange.

Annual report for 1915 shows total receipts, \$311,234, which includes cash on hand, \$119,650; profit from operations, \$158,544; notes receivable, \$12,923; expenditures amounting to \$154,465, included development, \$69,379; notes payable, \$54,070; dividends No. 1-4, \$124,924. Net operating profit for the year was \$158,554. **Dividends:** to Sept. 1, 1916, total \$300,000; paid since July 1st, 1915.

Property: 14 claims S. W. of Pioche, in Ely mining district, contains large orebodies of iron manganese, outcropping on surface for 800', having an aggregate thickness of 120', width of 500' and proven for a length of 1,200'. The ore occurs in large deposits in Cambrian quartzite and in bedded planes of lime and shale and is reported to average 3-4% lead, 34% iron, 13% manganese, 3 oz. silver and some gold, 3% lime, 11% insol. and 14% silica, valued at from \$7.50 to \$9.50 per ton. Owing to large percentage of iron, the ore is especially valuable as a flux to the lead smelters, the iron commanding a bonus over the cost of smelting, with silver, gold and lead values coming in as a profit. From this source alone the ore yields \$3-\$4 per ton.

Company also owns the Pioche King group of 9 claims, has a $\frac{2}{3}$ interest in the adjoining property of the Virginia-Louise Mining Co., and about 1,000 acres of patented land at Dry Valley and Bullionville, 12 miles from Pioche, said to contain 120,000 tons of tailings on dumps, showing 5.34% lead, 10 oz. silver, 0.11 oz. gold per ton and estimated by C. F. Sherwood to average \$5 per ton. A 200-ton oil flotation mill was erected to treat these tailings in 1916.

The Prince mine is developed by 550' main shaft with several miles of drifts. A body of high-grade lead-silver sulphide ore, said to be 16' wide, is being prospected by diamond drilling on the 550' level and a 3-compartment winze sunk from this level to the 800' level. **Ore reserves:** estimated at approximately 1,000,000 tons.

Equipment: includes electric power, hoist, compressor and 9-mile rail-

way connecting with the Salt Lake route from Pioche. Freight rate is \$1.25 per ton.

Shipping 12,000 tons of ore per month in 1916. Employs 80 men. Present management deserves credit for putting the mine on a dividend paying basis, with large ore reserves and \$100,000 cash surplus in less than 3 years, although present high prices are largely responsible for augmented earnings of company.

PRINCE OF WALES MINING CO.

UTAH

Idle. Address: Walker Bros., Salt Lake City, Utah. Property: at Alta, 60 acres, has been idle since a snowslide destroyed its equipment in 1914. Mine has 950' incline shaft from which \$2,000,000 worth of ore was mined, 1870-1875, until the influx of water stopped operations. Alta T. & T. Co. tunnel will entirely drain the ground.

PRINCEMONT MINING CO.

IDAHO

Wallace, Idaho. Inc. Feb., 1916, in Idaho, by S. B. Holbert, N. B. Thrist, Chas. F. Briggs, W. J. Williams and A. G. Holms, of Pittsburg; E. F. Holbert of Fairmont, Pa., and W. H. Batting of Coeur d'Alene. Cap., \$2,000,000, shares \$1 par. Properties in Southern Idaho.

PRINCESS COPPER CO.

NEVADA

Address: C. W. Freed, pres., 1007 First Ave., Salt Lake City, Utah. Mine office: Ely, White Pine Co., Nev. F. J. Austin, sec.; H. P. Clark, treas.

Inc. 1911. Cap., \$1,000,000; shares \$1 par.

Property: 30 claims, about 550 acres, acquired of the Ely Resurrection Copper Co., in the Robinson district, lying a little north and east of Ely.

Mine has 2 short tunnels and a 140' shaft, said to show 18' of ore assaying up to 5% copper, with gold and silver values, and some high-grade ore assaying up to 46% lead and 110 oz. silver per ton, with gold values. Management plans resumption of development work.

PROGRESS MINING & MILLING CO.

COLORADO

Address: 120 E. Chestnut St., Leadville, Colo. Wm. B. Brooks, mgr. Property: the Wilson mine and mill at Robinson, near Leadville, developed by 1,400' shaft and said to have been a large producer of lead-zinc ore, under former management. Equipped with 250-ton concentrator, to be replaced in 1916 by a flotation plant. Operations to be resumed.

PROGRESSIVE MINING CO.

UTAH

Office: 229 South West Temple St., Salt Lake City, Utah. Mine near Milford, Beaver Co., Utah. Officers: L. B. Bohn, pres.; I. Lessing, v. p. and mgr.; C. T. Mixer, 549 Elizabeth St., sec.-treas. and cons. engr.; preceding with F. J. Nichols, C. C. Crismon and Jas. Barrett, directors.

Inc. Aug. 20, 1906, in Utah. Cap., \$250,000; shares 50 cts. par; assessable; fully issued. Total assessments to date, \$10,000.

Property: 6 claims, 80 acres, patented, in the Star district, 8 miles from a railway, carrying argentiferous copper and lead ores. The mine has a 150' incline shaft, with about 1,000' of workings, developing a 3' vein, said to carry ore assaying up to 8% copper, 35 oz. silver and \$1 gold per ton. A few small shipments have been made. Idle in 1915, but operations to be resumed.

PROMONTORIO CONSOLIDATED MINING CO.

MEXICO

Office: 99 John St., New York. Mine office: Lampazos, Moctezuma district, Sonora, Mex.

Property: 11 groups, 1,410 acres, 3 miles from the forks of the Yaqui river; also a 12,000-acre ranch and the Marguerite and Inez claims, adjoining the mineral lands. Includes the Promontorio mine, 35 miles S. E. of Moctezuma, and about 30 miles from the nearest railway at Tonichi, an

antigua, said to have produced the copper from which were cast the bells on the old church at Moctezuma, built 1640. During the American Civil War some bornite from this mine was packed on mules, 40 miles to Guaymas and shipped to Swansea for smelting.

The claim shows diorite, granite and limestone, carrying orebodies in a shear zone between granite and diorite, with high-grade bornite and low-grade disseminated chalcopyrite ore. The low-grade zone is upward of 200' in width, with a granite footwall, also carrying low-grade impregnations of copper.

The Inez mine shows a large gossan, mined for flux, underneath which is cupriferous pyrrhotite, carrying small gold and silver values, and the Inez is also said to have another orebody of promise, carrying auriferous and argentiferous copper ore.

Presumably closed down since 1913.

PROMONTORY MINING CO.

UTAH

Office: 54 Commercial Bldg., Salt Lake City, Utah. **Mine office:** Promontory, Box Elder Co., Utah. **B. D. Siegfus, pres. and mgr. Cap., \$600,000; shares \$1; issued, 450,000.**

Property: about 7 miles north of Promontory point, shows a contact deposit between dolomite and porphyry.

Development: by a 105' shaft, sunk on an 8' vein, showing copper ore with a paystreak said to give assays of 5 to 18% copper, 1 to 40 oz. silver and about \$9 gold per ton. A 6' vein of low-grade zinc ore reported under development in 1916. See Lakeview Mining Co.

PROPRIETARY MINES COMPANY OF AMERICA

MEXICO

Office: 15 Broad St., New York. **Officers:** D. C. Catlin, pres.; E. J. Page, v.-p.; Chas. E. Pope, 2nd v.-p.; C. W. Pope, sec.-treas.; above with Horace E. Parker, Wm. A. Robinson, Jr., Robt. V. Norris and W. B. Cogswell, directors.

Inc., 1907, in Nevada. Cap., \$3,000,000; shares \$5 par; \$2,250,500 issued. Bonds: authorized, \$750,000, 6% convertible; outstanding, \$703,400. New York Trust Company, registrar. Stock transferred at company's office. Annual meeting, second Monday in June. Is a holding company, controlling through stock ownership the Mineral Development Co., and the Proviencia M. & M. Co. of Guanajuato, Mexico.

Latest financial report available, year ending May 31, 1914, shows **assets:** property, \$2,249,000; stock, bonds and notes of subsidiary and other companies, \$560,542; accounts receivable, \$31,076; cash, \$5,427; furniture, \$313; accounts since organization of company, \$132,632; loss and gain, \$8,700. **Liabilities,** amounting to \$3,737,193, include outstanding stock, \$2,250,500; outstanding bonds, \$703,400; stock exchanged for Min. Dev. Co. shares, \$6,380; accounts payable, \$5,996; contingent, \$21,417.

The 1915 annual report contains a reference to necessary "additional financing" when the orebodies of the Nueva Luz mine have been more thoroughly developed and when political conditions in Mexico permit the reopening of the Tajo de Dolores mine.

It contains no figures and only indefinite and incomplete information as to progress and plans of the operating companies. Owing to disturbed conditions in Mexico, rail connection with Guanajuato was suspended in Spring of 1916, and the mines were closed down when supplies became exhausted.

Mineral Development Company.

H. Vincent Wallace, gen. mgr., Guanajuato, Mex. Cap., \$1,000,000; shares \$1 par; \$800,000 issued. Property: the Nueva Luz mine, the La Planta and Torre mines. La Nueva Luz mine, adjoining the Valenciana, is

developed by a 2,035' shaft and a 1,130' crosscut, driven through the Veta Madre, below the Valenciana workings, which cut 3 veins reported to be from 5' to 32' wide, and to carry iron pyrite, zinc blende, lead sulphide, chalcopryrite, silver and gold. The 3rd vein intersected 1,069' from the shaft was 5' wide, and assayed 480 grams silver, $\frac{1}{4}$ gram gold and 10% zinc, per ton. Management plans drifting on the lowest level and diamond drilling to ascertain dimensions of these orebodies. Although the general manager, an Englishman, remains at the property, it is doubtful if active development work can be continued at the present time.

Providencia Mining & Milling Co.

Cap., \$1,250,000, of which \$250,000 is 7% preferred, convertible at 110, and \$1,000,000 common stock, 250,000 shares common in treasury.

Property: the Tajo de Dolores mine at Guanajuato, Mexico. The mine was closed down in April, 1914, and the outlook for an early resumption of operations is not bright. The 200-ton mill and cyanide plant has been leased for 3 years to the Cubo Mining & Milling Company for a yearly rental of \$20,000 U. S. currency and an option to purchase at \$100,000. Interest at the rate of 6% is charged until the option is exercised, rent paid is credited to purchase price. The Cubo Co. agrees to mill Tajo de Dolores ore for a period of 7 years at cost plus 10% until exercise of option and at cost plus 20% thereafter. The lease becomes operative when supplies can be shipped into the camp.

PROSPERITY MILLING CO.

MISSOURI

Prosperity, Mo. Operates a lease on 40 acres of mineral bearing land belonging to W. E. Saum, in Sec. 21, T. 28, R. 32, at Prosperity, Jasper Co., Mo.

Development: by 5 shafts to depth of 175'. **Equipment:** includes 150-ton concentrating plant, 3 air drills, steam power, Carterville crusher and air compressor. About 25 men employed.

PROTECTORA y ANEXAS; COMPAÑIA MINERA LA. MEXICO

San Salvador, Mazapil, Zacatecas, Mex. Percy A. Babb; pres. and gen. mgr.; J. L. Miranda, sec.

Inc. 1907, in Mexico. **Cap.**, 100,000 pesos; fully paid. **Property;** 68 hectares, including La Protectora y Anexas and San Francisco mines carrying oxide ores, with copper, lead and zinc occurring as replacements in limestone. Low-grade ores average 2.5 to 5% and high-grade ores 12 to 19% copper. Mine has a depth of 100 meters with about 1,500 meters of workings. **Equipment:** includes a 15-h. p. gasoline hoist. Was working with about 200 men, early 1913, and shipping around 250 tons of high-grade ore monthly. No recent reports received and presumably closed down.

PROVIDENCE EXTENSION GOLD MINING CO. NEVADA

Office: Morris, Ill. **Officers:** I. F. Hatcher, pres.; W. F. Buck, v. p.; G. A. Leach, sec.-tres.; with Dr. O. M. Barker, directors.

Inc. 1908, in Nev. **Cap.**, \$1,500,000; shares \$1 par; 1,100,000 shares outstanding.

Property: 3 patented claims and a fraction at Seven Troughs, Humboldt Co., Nev., reported by management to show free milling quartz ore in fissure veins, 4" to 2' wide and to carry from \$14 to \$17 gold per ton. **Development:** by 170' vertical shaft. Idle, pending refinancing of the company.

PROVIDENCIA MINING & MILLING CO.

MEXICO

Subsidiary of the Proprietary Mines Co. of America and described thereunder.

PRUDENTIAL COPPER MINING CO.

ARIZONA

Idle. **Office:** 322 Federal St., Chicago, Ill. **Mine Office:** 35 Bank of

Arizona Bldg., Prescott, Ariz. H. H. Linney, agt., Geo. T. Clark, pres.; Shea Smith, v. p.; Geo. H. Jenkins, treas.; Fletcher B. Gibbs, sec.; Ernest A. Haggott, cons. engr.; preceding with Geo. T. Aimer and Alice R. Woods, directors.

Cap. is 500,000 shares and company is controlled, through the ownership of 422,778 shares, by the Estate of Maj. Shea Smith. Lands: 12 claims, patented.

PTARMIGAN MINES, LTD.

BRITISH COLUMBIA

Address: care H. H. Johnson, Victoria, B. C. Property: 8 claims near the mouth of Bear River, on Bedwell Sound, Vancouver Island. Considerable development work was contemplated on this property, but all work was suspended shortly after the outbreak of the European war.

PUEBLA SMELTING & REFINING CO.

MEXICO

Office: 35 Nassau St., New York. Mexican office: Isabella Catalica No. 33, Mexico City, Mex. Mine office: Cuyuaco, Pueblo, Mex. Officers: Harvey C. Garber, v.-p.; H. H. Nieman, sec.; B. P. Thom, treas.; preceding with P. W. Lupper, Wm. B. Reed, Jr., and I. W. Lofland, directors.

Inc. Oct., 1912, in Delaware. Cap., \$5,000,000; shares \$5 par; non-assessable. Debentures, \$1,000,000 at 6%. Guaranty Trust Co., New York, registrar. Owns a 72% stock interest in the Cia. Minera Explotadora El Magistral y Anexas, and also sundry lands acquired from the Bankers Mining & Development Co. for \$4,250,000 in stock and bonds of the Puebla Smelting & Refining Co.

Property: 28 claims, 1,600 acres mineral lands, 120 acres timber lands, 800 acres coal lands, a 25-acre smelter site and 100 acres miscellaneous lands, in the Majistral district.

Ore: property shows limestone porphyry and diorite, orebodies occurring as contact deposits between limestone and diorite, and as replacements in the limestone. Ores carry oxides and carbonates of copper with small quantities of silver bromides, sulphides and free gold in the oxidized zone. The deeper workings show chalcopyrite associated with hematite having a garnetiferous quartz gangue in the sulphide zone.

Development: by numerous tunnels of from 200 to 750', with about 6,700' of workings, showing ore said to average 3.5% copper, 70 grams silver and 1.5 grams gold per ton.

Equipment: company claims to have a power plant consisting of two 400-h. p. Babcock & Wilcox water-tube boilers, a 300-h. p. Allis-Corliss engine, a 200-h. p. Hughes-Philips Corliss engine, and a 225-k. w. Westinghouse generator.

Due to the revolution the property has not been operating since 1913.

PUEBLO SMELTER.

COLORADO

Is owned by the American Smelting & Refining Co., which see.

PUGET SOUND REDUCTION CO.

WASHINGTON

Everett, Snohomish Co., Wash. Is controlled, through stock ownership, by American Smelters Securities Co. The works have three 30x180" blast furnaces, 1 running on copper ores, making a 50% matte, which is blown up to blister copper in a reverberatory furnace and shipped east for electrolytic refining. Also includes an arsenic plant.

PURITAN MINE.

COLORADO

Geo. R. Stewart, owner, Alice, Colo. Property: 78 claims, 44 patented, 307.1 acres in Lincoln mining district, Clear Creek Co., said to show quartz fissure veins, up to 26' in width, in granite, porphyry, and schist. Ore: is a sulphide running high in silica, from 20-30% sulphur, with gold-silver-copper values in iron.

Development: by 2 tunnels, 1,320' and 150' long. Shipments to start in 1916. No equipment, but owner plans adding compressor and engine.

PURITAN MINING CO.**IDAHO**

Wallace, Idaho. **Officers:** Frank Boutin, pres.; Theo. Anderson, v.-p.; Jas. F. Callahan, treas.; Chas. A. Solberg, sec.; above with O. B. Olsson and John H. Robbers, directors.

Property: a group of lead-silver claims in Placer Center mining district, Shoshone Co., W. of the Tamarack & Chesapeake. **Development:** by 1,100' tunnel. Patent applied for in 1914. No recent information published.

PURITAN MINING CO.**SOUTH DAKOTA**

Address: Deadwood, S. D. Inc. Oct., 1915, in S. D. **Directors:** Wm. J. McGoffin, Dr. F. M. Gantz, J. R. Russell, Jas. R. Richardson. **Cap.**, \$1,500,000; 500,000 shares in treasury

Property: formerly owned by the Alta Mining Co. and the Puritan Mining Co., on Strawberry gulch, near Deadwood, said to show sulphide ore, carrying gold, silver and lead values. **Equipment:** includes cyanide mill and hoist.

PUZZLE LEASING CO.**COLORADO**

John W. Prout, mgr., Rico, Colo. Operates the Puzzle and Puzzle Extension mines at Breckenridge, Summit Co., Colo., said to carry a vein from 2 to 6' wide, with gold-silver-lead values.

Development: by 2,600' tunnel, winze, drift and an old 135' shaft. Equipped with electric hoist and pump.

Property: is credited with past production of \$300,000. Carload shipments made to Chamberlain sampler at Breckenridge in 1915-16. 20 men employed.

Q. S. COPPER CO.**WASHINGTON**

Office: 229 North Division St., Spokane, Wash. **Mine office:** Q. S. Ranch, Cuess, via Loomis, Wash. **Officers:** M. E. Jesseph, pres.; A. M. Dewey, v. p.-gen. mgr.; J. P. Heckert, sec.; A. F. Suksdorf, treas.; preceding with Wm. F. Harrah, Niles, Mich., trustees.

Inc. April 10, 1914, in Washington. **Cap.**, \$2,000,000; shares \$1 par. Is successor of the Q. S. Mining Co., which corporation was sold out by a Receiver appointed by the Washington courts. Property was purchased by the new corporation, which paid all the debts, amounting to more than \$25,000, and issued stock at 2 cts. a share to the old stockholders; forfeited stock was left in the treasury, which gave the corporation a majority of the stock. Bad management in 1912 wrecked the former company and led to a receivership, no annual meeting being held that year. Property was sold for taxes, but sale set aside by the courts when the receiver was appointed.

Property: 13 claims, with 10 acres of mill sites, and water rights on Sinlahekin creek, about midway between Loomis and Conconully, along the flank and crest of Æneas mountain, in the Salmon River district. The property shows fissure veins in diorite carrying mainly low-grade copper ores. The company claims an orebody 300' wide at surface, which has been cross-cut for 238' at a depth of 800' below the outcrop without reaching the wall, and traced by stripping for 6,000' on surface, showing a ledge of 212' width at the north, 300' in the middle and 285' at the southern end of the property.

Development: begun 1897, is by 2 open cuts at either end, a pit of 50x 150' in the middle, and a tunnel 1,063' long cutting the vein at depth of 800', with another tunnel, intended for the main avenue of extraction, 540' long, planned to cut the orebody at depth of 2,000'. One tunnel shows chalcocopyrite ore said to give assays of 11.4% copper and estimated to average 2 to 4% copper, with small and variable silver values and about \$1 gold per

ton. The company claims an average ore value of \$14 per ton from several hundred assays.

Assessment work only has been done since new company came into control.

Q. S. MINING CO.

Succeeded by Q. S. Copper Co., which see.

QUAKER GOLD MINES CO.

WASHINGTON

ARIZONA

Address: care H. M. Meriwether, New England Bldg., Kansas City, Mo.

Property: 10 claims, patented, the Gold Note and Richinbar mines, 12 miles from railway, in Harper district, Bradshaw Mts., Yavapai Co., Ariz., shows quartz vein carrying gold ores, reported to average \$8 per ton. **Development:** 5,000' of work, in shafts, levels and tunnels.

Equipment: includes 20-stamp mill, hoist, etc., with electric power. Is a big low-grade proposition.

QUALEY MINE.

NEVADA

See Excelsior Mtn. Copper Co.

QUATSINO COPPER CO.

BRITISH COLUMBIA

Address: care Maurice W. Bacon, Birks Bldg., Vancouver, B. C., and Old Nat'l Bank Bldg., Spokane, Wash. **Mine address:** Quatsino, Vancouver, Id., B. C. W. Clancy, supt.

Inc. 1915 in B. C. **Cap.,** \$5,000,000; shares \$5 par. Company to be reorganized, 1916.

Property: known as the Old Sport or Elk Lake group, comprises 27 claims, bonded for \$500,000 in 1913, by Messrs. Cullen and Bryant, who did extensive stripping, open cut work and diamond drilling. The claims of the Alert Bay Syndicate were bonded for two years for \$100,000 in the summer of 1915. Company holdings now comprise a total of 43 claims, all situated near Alert Bay, Quatsino Sound, Vancouver Id., 15 miles from the shore.

Ore: consists of magnetite, carrying pyrrhotite and chalcopyrite with accessory bornite, garnet, epidote and quartz, found in a "vein" in diorite traceable for 6,000' across the claims and said to be 4' to 33' wide. Limestone appears at surface, but is only surficial, both walls of orebody being diorite, as proven by the petrographic work of Harold Tomlinson.

Development: comprises 64 open cuts, 3 tunnels and 5 diamond drill holes, deepest 500' below surface and 100' lower than the tunnel. A 500' tunnel with 500' of drifting from it develops ore 14' wide on which systematic sampling is said to show an average of 2% copper with \$1.66 gold and 0.21 oz. silver per ton, the ore carrying 36% iron, 32% insoluble and 4-5% lime. Reports have been made by W. G. Norrie and Lavenasaler of the Tacoma smelter. (See Old Sport Group, Copper Handbook, Vol. XI.)

Experimental work shows that crushed to 40-60 mesh and treated with oil in Callow machines, a recovery of 90% of the copper is possible. Employing about 30 men, 1916. Wm. Clancy is quoted as estimating reserves at 400,000 tons of commercial ore, in 1915.

QUEEN COPPER MINING CO.

ARIZONA

Property sold to Magma Copper Co.

QUEEN GOLD MINING CO.

COLORADO

John Lind, supt., Cripple Creek, Colo. A close corporation, reported controlled by John T. Milliken of St. Louis. T. B. Burbridge, pres.; Thornton Brown, sec.-treas.

Property: 90 patented acres on Battle Mtn. and Raven hill, including the Eclipse mine, between the Elkton and Cresson mines, at Cripple Creek, formerly owned by the El Oro Mng. & Dev. Co., and purchased by present company in 1915. Mine is said to show 2 parallel veins, carrying \$15 gold ore.

Development: by 1,000' shaft, with levels every 100'. Equipped with machine drills, hoist, pumps and electric power. Shipping 2 cars of milling ore daily, April, 1916. Employs 8 men.

QUEEN ISABELLA MINES CO.

UTAH

Officers: Alex. Caldwell, pres., Eureka, Tooele Co., Utah; Alex. Ray Irvine, v. p.; S. R. Thurman, sec.-treas., with Daniel Caldwell and Bert Thurman, directors.

Inc. 1916 in Calif. Cap., \$50,000.

Property: 14 claims adjoining the Sharp mine, Tintic district, and carrying the extension of the Sharp vein. The Sharp mine while under 2-year lease and bond to Mr. Alex. Caldwell produced 15 carloads of silver-lead ore, netting \$15 to \$20 per ton, and 100 tons not yet shipped are said to have a higher value. The new company will develop the prospect.

QUEEN MINES, INC.

BRITISH COLUMBIA

Address: E. V. Buckley, mgr., Salmo, B. C. Company controlled by M. E. Cannon, pres., Appleton, Wis.

Property: the Queen, Yellowstone and Alexandria mines and a mill-site on Sheeps Creek, near Salmo, said to show several veins containing gold ore. Recent work has been concentrated on the Queen group, developed by 700' shaft with drifts run every 100'. **Equipment:** includes 20-stamp mill, handling 50 tons daily and reported making an extraction of 60% of the gold values.

Property under option to Tonopah Belmont M. Co., in 1916.

Mine credited with total production since 1908 of \$700,000 in gold.

QUEEN OF BRONZE MINE.

OREGON

Roy H. Clark, mgr., Takilma, Josephine Co., Oregon. Mine purchased for \$150,000 by Twohy Bros. and associates March, 1916.

Property: is in the Illinois Valley and near the Waldo Sm. & Ref. Co. holdings, 30 miles from Waters Creek on the railway. The new California & Oregon Coast Ry. will connect it will Grant Pass and Crescent City, Calif., 1916.

Mine has been a producer for 10 years, shipping ore with 9% to 20% copper and \$5 gold per ton, but with much ore of lower grade in the mine. See Waldo Mng. & Smelting Co.

A tramway installed 1916 carries ore from the working tunnel to loading bins, where 30 outfits are hauling it to railway.

QUEEN OF THE WEST MINES CO.

OREGON

R. G. Amidon, supt., Cornucopia, Oregon. **Property:** a gold mine, equipped with 50-ton stamp mill and cyanide plant, remodeled 1916.

QUEEN REGENT MERGER MINES CO.

NEVADA

Office: 337 Monadnock Bldg., San Francisco, Calif. **Officers:** J. D. Brown, pres.; H. B. Wade, sec.; J. E. Kerr, gen. mgr.

Inc. 1911, in Calif. Cap., \$2,000,000; shares \$2 par; 628,000 shares issued.

Property: 5 unpatented claims, bought June, 1915, for \$60,000, in Rand mining district, Mineral Co., Nev., 18 miles S. and W. of Rand. This tract is said to have 4,000' of the main contact fissure, which traverses the Rand district for 7 miles.

Development: by 235' main working shaft and 2 prospect shafts, each 100' deep. Crosscut on 1st and 2nd levels reported to have opened vein, 30-40' wide, between andesite footwall and rhyolite hanging wall, showing \$6-\$14 ore. Management estimated Feb., 1916, 5,000 tons of \$10-\$12 mill ore on the dumps and \$200,000 mill ore developed in the mine. Equipped with hoisting machinery good for depth of 1,000'.

Company purchased the Wheeler mine, a gold-copper property at Spenceville, Nevada Co., Calif., 15 miles from a railroad, in March, 1914, and is developing same by tunnels. Ore is principally chalcopryrite, said to average about 7% copper, and \$4 in gold and silver. Property reported to have 3,000' of the main contact vein. A 12-ton Partridge smelter was to have been started up March 1, 1916. It is expected to yield 1.5 tons of matte per day.

QUEEN VICTORIA MINE

BRITISH COLUMBIA

Owned by British Columbia Copper Co. Described Vol. VIII., Copper Handbook. Work suspended March, 1915. Costs were \$3 per ton and ore

averaged only 1.2% copper; 0.36 oz. silver; trace gold; 36.8% silica, 14% iron, so that no profit could be made. Shipments totaled 7,920 tons.

QUICK SEVEN MINING CO.

MISSOURI

Alba, Mo. Inc. in Mo. Cap., \$105,000. Operates a lease on 78 acres of mineral bearing land owned by J. Richardson, in Sec. 6, T. 29, R. 32, Jasper Co., Mo. Is reported to be the largest producer of zinc concentrate in the Alba district.

Development: by 3 shafts to depth of 150'. Equipped with 200-ton concentrator, pumps, drills, compressor and steam power. About 45 men employed.

QUICKSILVER INVESTMENT CO., INC. (THE) CALIFORNIA

Office: 45 Broadway, New York. **Officers:** Geo. H. Sexton, pres.; Robt. Gibson, v. p.; Harry A. Nichols, 2nd v. p.; Chas. A. Frank, sec.-treas.; A. Heyward McAlpin, asst. sec.-treas.; above with Ira Barrows and Wm. Herbert, directors.

Inc. 1915, in Virginia. Cap., \$1,061,900, in \$61,900—7% cumulative, 1st preferred, issued to noteholders of old company; \$421,300—7%, 2nd preferred, and \$578,800 common shares; shares \$100 par; \$461,900 outstanding. All stock is held in a 5-year voting trust; voting trustees: Chas. A. Frank, chairman, Robt. Gibson and Ira Barrows, N. Y. City.

Company has a 25-year lease from 1915 on the Almaden quicksilver mine of the Quicksilver Mining Co., through its subsidiary the New Almaden Co., Inc., and will pay 20% of its net profits to owners. Reported operating at a loss; indebtedness to noteholders, March 1, 1915, was \$61,900. More than \$60,000,000 has been produced by Almaden mine.

QUICKSILVER MINING CO.

CALIFORNIA

Offices: 45 Broadway, New York. C. T. Tracy, sec.-treas., New Almaden, Calif. **Officers:** M. E. Harby, pres.; Alfred H. Swayne, v. p.; above with L. L. Benedict, Jr., L. Crawford, H. Wallerstein, H. O. Talmage, W. B. Franklin, S. Y. Baylies, W. H. Landers, H. A. Nichols and W. Herbert, directors.

Inc. 1867 in New York. Cap., 10,000,000 shares; \$1 par, in 5,700,000 common and 4,300,000 preferred, 7% noncumulative. Annual meeting, 3d Wednesday in June, in N. Y. City. Stock listed on the New York Stock Exchange. Farmers Loan & Trust Co., New York, transfer agent; Equitable Trust Co., New York, registrar. In 1914, company defaulted on payment of notes, and was refinanced March, 1915.

Dividends: few and far between; none has been paid on the common since 1882 when 40c was paid. Payments on preferred: June, 1891, 4%; May, 1899, ½%; July, 1900, ½%; May, 1901, ½%; May, 1902, ½%; May, 1903, ½%.

Property: several thousand acres, including the New Almaden quicksilver mines at New Almaden, near San Jose, Calif. Mine is the oldest producer of quicksilver in the United States. Company has given a 25-year lease from Feb., 1915, on its mines to the New Almaden Co., a subsidiary of the newly organized Quicksilver Investment Co. and will receive 20% of net profits. Stockholders were offered voting trust certificates in new company on basis of one share of second preferred for 10 shares of old preferred in consideration of payment of \$3 for each share of old stock. New common was exchangeable for old common stock at same ratio plus \$1.50 per share of old common. Many of the troubles of the old company are said to be due to lack of efficient management in the last few years.

QUINBY MINING CO.

CALIFORNIA

Idle. **Address:** Quinby, via Burnt ranch, Calif. **Property:** 6 claims, on Quinby Creek, in Trinity Reserve, showing 4' vein of copper ore, developed by 2 tunnels, 100' and 400' long and 300' drifts. Oxidized surface ore was milled.

QUINCY MINING CO.

MICHIGAN

Office: 32 Broadway, New York. Mine and works office: Hancock, Houghton Co., Mich. **Officers:** Wm. Rogers Todd, pres.; W. Parsons

Todd, v. p.; Jas. L. Bishop, Chas. J. Devereaux, Isaac H. Meserve, Wm. B. Belcher, John M. Longyear and Otto Kirchner, directors; W. A. O. Paul, sec.-treas.; F. J. McLain, asst. sec.-treas.; Chas. L. Lawton, gen. mgr.; Jas. W. Shields, mill supt.; Alex. Laist, smelter supt.

Inc. March 30, 1848, under special charter from the state of Michigan. Cap., \$3,750,000; shares \$25 par; issued, \$2,750,000. Original cap., \$500,000; reincorporated March 6, 1878, for 30 years more with cap. \$1,000,000, increased, 1889, to \$1,250,000, again increased, 1896, to \$2,500,000, and once more increased, 1906, to \$3,750,000. Reincorporated 1908 for a third term of 30 years. Old Colony Trust Co., Boston, transfer agent. Shares are listed on the Boston Stock Exchange. Annual meeting, first Wednesday in June.

Comparative Statement: Assets and Liabilities exclusive of real estate, mine plant and supplies in use.

(a) After deducting \$226,250 paid Hancock Cons. Mining Co. for mineral land purchased.

(b) Balance, Jan. 1, 1913, \$1,233,278; also, deduct \$150,000 paid note given St. Mary's Canal Mineral Land Co.

Dividends: Quincy paid its first dividend in 1862, and profits have been disbursed to shareholders in every succeeding year except 1866 and 1867, giving the company a continuous dividend record of 45 years, from 1868 to date, rendering it the oldest dividend-paying American copper mine, and second only to the Tharsis Sulphur & Copper Co., Ltd., which has a record of continuous dividends since 1867, or 1 year longer than the Quincy's record. Recent dividends, by years, have been as follows: 1900-1, 36%; 1902, 28%; 1903, 22%; 1904, 20%; 1905, 24%; 1906, 50%; 1907, 54%; 1908, 18%; 1909, 16%; 1910, 20%; 1911, 16%; 1912, 21%; 1913, 15%; 1914, 2%; 1915, 32%; 1916, 28% to July 1. Total dividends to July 1, 1916, \$22,547,500.

A table of statistics, production, costs, etc., 1864-1905, is given Vol. X., Copper Handbook.

Property: is very extensive, the management having adopted the policy, many years ago, of expansion of territory as opportunities offered. Acquisitions include a purchase of the Arcadian Copper Co., 1907, at a price of \$750,000; the old Franklin mine, 1908, at a cost of \$170,000, and the acquisition, 1910, of Sec. 14 and the N. E. ¼ of Sec. 22, of 800 acres, from St. Mary's Mineral Land Co. bought for \$600,000; 80 acres under and to the S. of shaft No. 2 were bought from Hancock Mng. Co., July, 1915, for \$226,250.

The holdings of the Quincy now include lands formerly held by the Pewabic, Franklin, Mesnard, Pontiac, Arcadian and St. Mary's, in order named, from south to north.

Geology and development: property carries the Pewabic bed and a number of parallel copper-bearing amygdaloids, from the Hancock mine, on the northern shore of Portage lake, to the boundary of the Franklin Junior mine, or about half way from Hancock to Calumet. Through the acquisition of new territory, shafts Nos. 2, 6 and 8 can be sunk to practically unlimited depth.

The mine was opened 1848, on the Quincy amygdaloid, a bed lying some distance west of the Pewabic, but the Quincy bed was abandoned 1856, when the Pewabic amygdaloid was opened. There is a footwall branch, known as the Pewabic East lode, underlying and parallel with the

main bed, which occasionally yields good returns. The so-called West lode, about 300' west of the Pewabic bed, has been opened by shafts Nos. 4 and 7 through crosscuts on the 30th, 39th, 40th, 44th and 49th levels, and considerable stamp rock has been stoped therefrom. About 150' west of the West lode is another amygdaloidal bed averaging about 40' in width and carrying more or less copper, which probably may prove workable at some future time. About 1,000' west of the Pewabic bed is the Hancock amygdaloid, which is narrow but fairly mineralized, and which yielded an average of 21 lbs. fine copper per ton, after reasonable selection, when worked in the old Hancock mine, this figure being materially above the present average return from the Pewabic bed.

The Pewabic amygdaloidal bed, on which all shafts are sunk, has a strike of about N. 30° E., with an average dip of 52 to 54° at surface, flattening in the lowest workings at depth of more than a mile to approximately 37° 30', the shafts following the dip of the bed on catenary curves. The Pewabic averages about 20' in width in the upper workings, but is materially narrower at the bottom. The lower workings show decreased copper values with much less heavy copper than above, but the ore is more uniform in value. Part of the decrease in copper returns is due to mining rock that formerly would have been left as worthless and practically the entire Pewabic bed is now mined. There are copper courses, or shoots, that rake to the north with depth.

The Pewabic bed has good walls and the mine requires comparatively little timbering. Dry-walls are built of waste rock, in wide stopes, saving the expense of hoisting waste and also the cost of timber. Shafts are sunk mainly in the footwall. The Pewabic rock now runs 15 to 17 lbs. fine copper per ton, with some silver values. Previous to about 1890, about 40% of the copper was secured in masses. In 1912 the proportion of mass copper was about 15%. The southernmost drifts of the Quincy are about 3,000' below mean water datum of Portage lake, while the northernmost workings at No. 8 shaft are fully 2 miles from the southern breasts.

New work totaled 27,340' in 1915, and average about 6 miles yearly, the mine having over 100 miles of workings. Fire doors have been installed and every precaution is taken against fire. Miners are carried to and from work in man cars holding 30 men each, and hoisting cables are inspected frequently, with every care taken to prevent accidents.

The electric underground traction plant was installed by the General Electric Co., tram lines averaging about 1,800' each in length with gradients of 1.5% towards the shafts. The equipment includes 20 electric locomotives, each hauling 4 or 5 three-ton rock cars at a speed of 6 to 8 miles per hour, 1 man caring for each train. Tram cars are unloaded into 500-ton storage bins, built on the hanging-wall side of the shafts. This system of storage obviates the loss of time by either the tram lines or skips, and adds about 25% to the hoisting capacity of the mine, the property being equipped with hoisting and rockhouse capacity for a production of over 4,000 tons daily. About 160 rock drills are used in sinking, drifting and stoping, and extensive use is made of the diamond drill for exploratory and preliminary development work.

The Quincy has been much troubled by air blasts, violent disturbances brought about by the settling of superincumbent rock in the scores of miles of worked-out openings, causing violent compression of the air elsewhere throughout the mine. The most serious disturbances from air blasts, which are practically artificial earthquakes, felt for only a few miles distance upon surface, were experienced in Feb., 1906, and March, 1914, and there seems reason to fear that these troubles will prove intermittently continuous for the balance of the mine's life. The air blasts, while unpleasant, have caused more alarm than damage.

Owing to the absorption of adjoining mines, the Quincy shafts are numbered irregularly and are described hereinafter in order of occurrence, from south to north, rather than in order by number.

No. 7 shaft: the southernmost, planned and sunk by John L. Harris,

leaves surface at an angle of 53° and is bottomed at an angle of 37° 30'. The shaft was sunk 4,000', in 18 months, through very refractory rock, this speed being rendered possible by sinking and raising in 5 sections simultaneously. The shaft is bottomed at the 71st level, at a depth of about 5,500',

No. 7 shaft has a steel shaft rock house, with 750-ton bins, a steam hammer and two 24x36" crushers.

No. 7 shaft has an 8,000-h. p. Allis Chalmers Corliss hoist, with 52x84" cylinders and winding drums 28' in diameter by 11' 9" face, carrying 8,000' of 1½" steel cable, the main shaft weighing 120,000 lbs. This hoist can raise 6-ton skips from a depth of 1½ miles at a speed of 3,000' per minute, hoisting being limited to this rate by an automatic cutoff which also prevents overwinding. Starting a load of 6 tons from a depth of more than a mile, the hoist, if untouched, will check without damage after raising the skip only a few feet higher than the appointed place in the shaft house. There is a 1,300-gal. bailer in addition to skips.

No. 4 shaft is closed down.

No. 2 shaft: 585' next north of No. 4, is below the 75th level. Equipment includes a 1,300-gal. bailer for raising water and 30 to 40 power drills are operated normally.

No. 2 shaft has a shaft rock house, built 1908, by the American Bridge Co. Stamp rock from the shaft is dumped onto grizzlies, with wide bars, smaller material falling into circular bins, whence it passes by gravity to the crushers and thence into the main rock house bin. The smaller mass copper passes through the grizzly bars, is picked out by workmen and dropped into a chute carrying it to a steam hammer, there also being a chute for waste rock. The grizzlies allow large pieces of rock to fall into a bin of reinforced concrete in front of the steam hammer, where broken and sent to the main rock house bin through a chute, while mass copper is dropped into a steel tube leading to a circular steel bin, which loads into railroad cars through chutes with pneumatic gates.

No. 2 shaft has a special crushing plant for waste rock, between the collar of the shaft and the rock house. Poor rock is dumped into a circular bin and drawn by gravity to a crusher, going thence to circular storage bins, from which it is drawn off into wagons or railroad cars for use in railroad ballasting road building and concrete work. There are similar crushing plants at the other main shafts, except No. 7.

The surface equipment at No. 2 shaft is very heavy, being practically a duplicate of that at No. 7, including a powerful hoist and two 60-drill cross-compound 2-stage Corliss air compressors.

No. 6 shaft: 1,928' north of No. 2 and only 200' south of the Franklin line, is below the 73rd level. Equipment includes an Allis-Chalmers duplex hoist, with a 22' 6" straight-face drum, raising 8-ton skips; a 1,300-gal. bailer, a centrifugal feed-water heater being attached to one cylinder of the hoist, and a 100-drill 2-stage compound air compressor. The boiler house has four 250-h. p. Wickes water-tube vertical boilers, nine 100-h. p. locomotive firebox boilers, and a powerful fire pump.

The Franklin mine lies next north of No. 6. The Quincy bought the old Franklin mine, 160 acres, for \$170,000, taking possession Dec., 1908, and closing the mine immediately. It is doubtful if the old shafts ever will be used by the Quincy.

No. 8 shaft: the Mesnard, 4,168' north of No. 6, is at the 64th level. Levels in this shaft were opened at 135' intervals and former numbering made the 24th level of No. 8 correspond with the 42d level of No. 6. This lode was poor in the upper levels, but the lower workings, while by no means up to the Quincy average of some years ago in either quantity or quality of ore developed, show a bed wider and better mineralized than above, and the ground is of very satisfactory and profitable average, the improvement that began on the 10th level being very marked below the 20th level. The present average of the lode at the Mesnard shaft is nearly or quite up to the present average of the older workings, the 2,000' level showing a marked improvement above the general average for the Mes-

nard workings. This shaft is connected with the workings to the south on all levels, which at this depth are at 200' intervals, from the 41st, which was the first to pass under the old Franklin mine, to the 63rd inclusive. Production, begun 1907 from this shaft, was 1,600 tons daily. The power house at No. 8 has a Nordberg 32x72" duplex-cylinder engine, with double-conical drum, of 12' 6" minimum and 18' 6" maximum diam., good for 6,000' depth, and a 65-drill Nordberg 2-stage cross-compound air compressor. The boiler room has ten 250-h. p. Parker and Burt boilers. There is a large changing house of reinforced concrete at this shaft, and many well-built houses for employees.

No. 9 shaft: 2,600' north of No. 8 is the old 100' Pontiac shaft, given a concrete collar and cut down to 3-compartment size. The shaft is 2,900' deep, and at 2,600' cuts a drift from No. 8, giving ventilation; it is not in operation.

To the north of the Pontiac shaft there is a long stretch of ground, bought of the Arcadian Copper Co. and St. Mary's Mineral Land Co., carrying the extension of the Pewabic bed and available for later development.

The surface plant of the Quincy is very complete. Miscellaneous buildings at the mine include a large warehouse, general office, several hundred dwellings at the mine location and a considerable number of houses at the mills.

The Quincy has extensive holdings of land, in and adjoining the city of Hancock, and portions have been platted, from time to time, and sold at good prices.

Water for boilers and potable use at the mine location is taken from Portage lake, the pumps forcing water for a mile against a static head of 640'.

The company's private rail line, known as the Quincy & Torch Lake, built 1890, is 6 miles long, touching at all shafts and shops at the mine and at the boiler house, wharves and coal sheds at the mill. This line is connected with the Mineral Range, Hancock & Calumet and Copper Range railways. Equipment includes several locomotives, freight cars and nearly 150 hopper cars for rock, the latter having automatic couplers and air brakes.

Stamp mills: at Mason, on Torch lake, 6 miles from the mine, have 8 stamps, with combined capacity of about 5,500 tons daily, the stamps giving an average duty of about 700 tons. Two 36"x8' Hardinge ball mills were added in 1916. The results secured at the Quincy mills reflect great credit upon Superintendent Shields.

No. 1 mill, of wood, has 5 Allis-Chalmers 2-way stamps, taking steam at 100 lbs. pressure. There is an Allis-Chalmers Huntington mill for regrinding raggings, and the dressing machinery includes 92 Hodge jigs, and 32 Wilfley tables.

No. 2 mill, 630' north of No. 1, has 3 Allis-Chalmers heads, each set on foundations of heavy timbers and concrete, surmounted by a bottom plate of 22 tons, a middle plate of 18 tons and a top plate of 18 tons, all of solid iron castings, above which are the mortar boxes of the stamps. The stamps have 1" revolving screens for the mortar boxes, with hydraulic discharges, as have the launders leading from the mortars, these yielding about 60% of the copper secured. Finishing jigs and slime tables have been replaced by 24 Wilfley tables, 8 for each stamp, assisted by 3 Standard concentrators. Each stamp has 12 rough jigs, 6 Wilfleys for finishing and 2 Wilfleys and 1 Standard table for slimes. There is a settler from which slimes are taken to the Wilfley tables. Regrinding is done by a Trent Chilean mill, with 3 jigs and 3 Wilfleys as auxiliaries. By the adoption of hydraulic discharges and other improvements the capacity of the stamp-heads has been increased about 25%, while changes in the wash have given an increased capacity of 30%, with labor costs reduced 25% and loss in tailings cut down 40 to 50%. About 35% of the present product of the mill is No. 3 grade mineral, carrying very fine copper.

The mill power house at No. 2 mill, has four 250-h. p. Wickes vertical water-tube boilers. There is an electric light plant.

The mill and pump house has a 20,000,000-gal. centrifugal pump, and a 20,000,000-gal. Allis-Chalmers vertical triple-expansion pump, and the old pump house has 3 pumps with combined capacity of 21,000,000 gal. daily. Water is taken from a 7x7' 6" tunnel, driven 100' under the bed of the lake. A 6x6' 6" tunnel 440' long, connecting mills, boiler houses and pump houses, carries both water and steam pipes.

The tailings at the mills are very extensive, including millions of tons of stamp sand, and various experiments on reconcentration have been conducted by different interests at intervals since 1902. The companies that have attacked this proposition have bankrupted themselves with monotonous regularity, notwithstanding which, the successful results being secured at the regrinding mills of the Calumet & Hecla offer promise that the Quincy sands also may be retreated profitably at some future time.

Smelter: blown in Dec. 1, 1898, is at Ripley, on the shore of Portage lake, opposite Houghton, just east of Hancock and only a half mile from the mine.

One building has four 40-ton reverberatory furnaces, and a second building has 60-ton and 120-ton reverberatories, the latter having an automatic casting machine. On arriving at the reverberatory building the trucks carrying mineral are lifted by electric cranes and contents dumped into the furnaces, which are top-charged. An overhead trolley in the main building permits handling large bars and cakes, and a trolley dipping system is used for casting. Slags are trammed, in 3,000-lb. pots, to a 30' hydraulic elevator which raises the ladles and dumps their contents over the end of a trestle. The cupola building has 1 blast furnace only, for reverberatory slags. A briquetting plant has 2 boiler-iron retorts for briquetting low-grade mineral before smelting. Miscellaneous buildings at the smelter include an engine house, casting house, cooper shop, office, laboratory, machine shop, 50x100' warehouse, and a coal shed.

Production has remained nearly constant for several years but was seriously lessened by the labor strike of 1913. Silver production averages about 100,000 oz. yearly.

Recent Production:

	Tons	Lbs. Mineral Produced	Ref. Copper Lbs.	Lbs. Cu. per Ton	Cost (a) per Lb.	Sell. Price
1915	1,269,000	34,251,765	22,054,813	17.38	9.42c	18.01c
1914		22,612,460	15,356,380		11.51c	13.29c
1913	804,645	18,161,575	12,184,128	15.11	13.65c	15.59c
1912	1,309,258	30,040,360	20,634,800	15.76	11.09c	16.24c
1911	1,382,524	32,550,440	22,252,943	16.1	10.17c	12.72c

(a) Includes mining expense, smelting, transportation, etc., and taxes paid in Michigan.

Management is entitled to credit for following unswervingly a policy of expansion that is necessary to the successful operation of any large industrial enterprise. Finlay in 1911 estimated a life of 7 years and a further production of but 200,000,000 lbs. of copper. Additional acreage purchased since that year makes the probable production 1,000,000,000 lbs. of copper and a life of 50 years. The company has the longest record of continuous annual dividend payments of any American copper mine and bids fair to continue disbursing large profits for at least another generation or two.

QUINTERA MINING CO., LTD.

MEXICO

London secretary and Office: J. G. Mills, 8 Crosby Square, London, E. C., Eng. Paris office: 11 rue Boudreau, Paris, IXe, France. Mine at Aduana, Alamos, Sonora, Mex. Jacques F. Kulp, chairman; A. Dubois, S. Einhorn and Ernest May, directors.

Inc. May 4, 1888, in Great Britain. Cap., £52,000, increased Nov. 18, 1901, from £40,000; shares £1 par, fully paid; all issued.

Annual meeting in June. Shares listed on the Paris coulisse. Accounts for calendar year 1911, submitted July 8, 1912, showed £966 loss; total deficit, Jan. 1, 1913, £17,559; reserve fund, £26,623. Operations suspended since 1911, owing to Mexican revolutions.

Dividends: 25% in 1900; 22.5% in 1901; 17.5% in 1902; 17.5% in 1903; 7.5% in 1905; 11.25% in 1906, and 5%, or 2s. 3d. in 1907; none since.

Property: 26 claims, 134 hectares, in the Alamos district, Sonora, and in the Fuerte district, state of Sinaloa, Mex., with ranches of about 7,400 acres. The mining property consists of 4 groups, the Quintra and Libertad, Azulaques and Constanacia, Minas Nuevas, Cotera and Porvenir, and the Rosario group. Only the Quintra has been worked by the present owners.

Some 40 or 50 years ago a Frenchman owned this and the Rosario, a lead-silver property on Rosario mountain, where the states of Sonora, Sinaloa and Chihuahua touch. He had worked the Rosario extensively, the ore being a lead carbonate containing much silver, and finally went to Paris, mortgaged both properties to the Egyptian-Paris Bank for \$250,000 and skipped out to South America. He has never been heard from since. After the bank acquired the properties, for many years they sent engineers out each year to examine and report. Finally, about 30 years ago, after several had reported favorably upon the Quintra, work was commenced.

The vein is strong on the surface, 18 to 20' wide, and has granite on the east and dark andesite on the west. It showed low silver values on the surface and 2 to 3% lead. With depth the value of the ore improved and under efficient management, the mine paid \$50,000 to \$100,000 yearly in dividends, notwithstanding that the general mill management was expensive.

The ore is 20 to 30' wide in the deeper levels and assayed 40 to 50 oz. in silver, the lead being replaced by 8 to 9% copper ore as depth increased. This copper ore was sorted out and smelted on the ground using mesquite charcoal at a cost of one-half cent per pound. The mine is on a hill 700' above the mill, and an aerial tram was put in to bring the ore to the mill. A shaft 500' deep was sunk at the north end of the property, from which a drift was driven 1,300' south and a winze sunk, ultimately to a depth of 1,000' below the surface. All ore was hoisted twice and trammed 1,300', when an adit from the mill 2,000 to 2,500' long would have tapped the winze 200' below the long drift, and the ore could have been trammed in cars direct to the mill. Even when the new shaft was sunk from the surface, this was done near the old one, instead of raising from the winze on the 500' level. At 1,500', the vein split. One branch was followed to the east in the granite; it contains no ore of value. A few hundred feet north of the shaft the main vein enters the granite on both sides and becomes barren. At the south end of the property the ore-shoot appears to be dipping into the Promontorio. Property considered valuable, but in a remote section that is without even wagon roads, and mine is impossible to operate until peace is restored to the country.

In 1916, the secretary of the company writes that in consequence of the unsettled state of affairs in Mexico, the property is shut down indefinitely.

QUO VADIS GOLD MINING CO.

NEVADA

Las Vegas, Nev. Officers: Peter Buol, pres.; C. C. Ronnow, v. p.; Ed. W. Clark, sec.-treas.; above with F. A. Clark and J. B. Anderson, directors. Inc. Dec., 1915, in Nevada.

Property: the Quo Vadis mine at Las Vegas, Clark Co., Nev., said to show rich stringers of free milling gold ore in latite and andesite formation. Developed by 300' tunnel and a shallow shaft, which will eventually be sunk to 500'.

RADIUM COMPANY OF AMERICA.

COLORADO

Property: at Tidwell, 15 miles from Green river in Paradox Valley

district, Colo., comprises a number of claims covering carnotite bearing sandstones cut by quartz stringers. Carload shipments carry 2.24% uranium oxide and 3.87% vanadic acid. Described in U. S. Geol. Survey Bull. 530-K p. 163.

RADIUM MINES CO.**ARIZONA**

W. H. Mercer, mgr., Globe, Ariz. Property: 60 claims, 4 miles north of the Old Dominion mine, Globe, said to show vanadium ore in a vein or mineralized fault zone in diabase. The ore shows galena associated with iron oxide and manganese; vanadanite occurs as crystalline incrustations around other minerals, but has not yet been found in commercial quantities.

RAINBOW LODE DEVELOPMENT CO.**MONTANA**

Office: 1400 Alworth Bldg., Duluth, Minn. Mine office: 14 West Granite St, Butte, Mont. Officers: Edward C. Congdon, pres.; Chester A. Congdon, v.-p.; Frederic R. Kennedy, sec.-treas.; preceding with Thomas F. Cole, Joseph B. Cotton, directors. John D. Pope, gen. mgr.

Inc. Nov. 9, 1912, in Delaware. Cap., \$1,500,000, increased June 1, 1915, from \$800,000; shares \$10 par; issued \$800,000. Bonds: \$400,000, 5-year convertible 6% due June 1, 1920, convertible into stock at par. Annual meeting, first Tuesday in June.

Property: 10 claims, including the Third Sphinx, Michigander, Moral, Valley Queen, Carn Brea, Sarah, Wedge, Hidden Treasure and Wanda claims, with fractional interest in the Lone Star Claim. The group lies east of the Butte & Superior property and is supposed to carry an extension of the Rainbow lode.

Development: company is sinking a shaft on the Third Sphinx claim which was 1,500' deep in Nov., 1915. Lateral development has been done only on the 600' and 1,000' levels, and consists of crosscuts north from the shaft. The crosscut on the 600' level, showed 375' of leached lode matter. On the 1,000' level a vein that averaged 3% zinc for 8' has been cut.

Company has also acquired control of the Butte & London property under an agreement to deepen the 1,130' shaft of that company 500', cross-cutting on the 1,630' level the entire width of the property to develop the veins at that depth. In return for this it receives 51% of the Greendale Exploration Co.'s stock.

A crosscut, already 1,600' long, is being driven from the 2,000' level of the North Butte mine through the Overman claim. In about 2,000' more it will reach Rainbow Dev. ground and drain the lodes therein, and will thoroughly explore the Rainbow ledge in this tract.

Equipment: at Rainbow shaft includes a 300-h. p. double drum hoist good for 2,500', 2 electric hoists, air compressors, combined capacity of 1,650 cu. ft. per min., one 400 gals. and one 200 gals. pump, blacksmith shop, carpenter shop, change house and office.

Option expired. (Cannot locate this Co. in the field.)

RAINBOW MINE**OREGON**

Operated by U. S. Sm., Ref. & Mng. Co., 55 Congress St., Boston, Mass. Mine at Rye Valley, Baker Co., Ore. Howard S. Lee, mgr.; Frank W. Parker, supt.; Walter W. Duke, Jr., mill supt.

Property: a group covering the Rainbow vein, a brecciated zone 5'-50' wide made of rock fragments cemented by quartz.

Development: 500' shaft, with 1,500' of drifting on vein on 200' level. Operates 15-stamp mill, 100 tons a day with tube mill, Dorr classifier and thickener, Pachuca tanks, Kelly press and Merrill filter. See Min. Res., Oregon, Dec., 1914; Vol. 1, No. 8, p. 220.

RAINBOW MINING CO.**IDAHO**

Control under option to S. Edward Brown of Kellogg until July 25, 1916. Cap., \$1,000,000; shares \$1 par; 800,000 in treasury.

Property: on Little North fork of the Coeur d'Alene river shows quartz vein 10'-25' wide with silver, lead and zinc ore. Development will be by tunnels to cut lode at a depth of 450'.

RAINBOW MINING & MILLING CO., LTD.**IDAHO**

Wallace, Shoshone Co., Idaho. **Officers:** Hon. Herman J. Rossi, pres.; Abe Wyman, v.-p.; Geo. Austin, sec.-treas.-gen. mgr.; preceding with Therrett Towles, Sig Hofslund, and A. E. Bronson, directors.

Inc. June, 1907, in Idaho. **Cap.**, \$300,000, increased 1913 to \$500,000; shares 25 cts. par, assessable; issued \$250,000. Annual meeting, June 1st.

Property: 19 claims, 7 patented, 360 acres, in 2 groups. The original group of 15 claims, 3 miles west of Wallace, in the Evolution district, near the Grey Copper mine, has St. Regis and Burke quartzite similar to the Coeur d'Alene region, cut by a 1 to 12' fissure vein running N. 15° E. and traceable 1,800'. This vein carries grey copper ore with iron and quartz gangue, with an average of about 2 to 3% copper and 8 to 10 oz. silver per ton. Developed by 3 tunnels 110', 80', and 1,400' long respectively.

The second group, of 4 claims, bought 1910, is about 3 miles from the Handspike mine, and 15 miles from a railway, at the mouth of Bootjack creek, a tributary of the North fork of the Coeur d'Alene river, in Secs. 23 and 24, T. 31 N., R. 1 W., in an unorganized district. This property shows a vein of 12' estimated average width, traceable 6,000', carrying lead and copper ore, associated with iron carbonates, in a quartz gangue. Development to depth of 800' by several tunnels from 40-1,400' long, a total of 2,700' of underground workings.

Improvements include 5 buildings and an air compressor on No. 2 group. Property is three-fourths mile from O. W. R. & N. R. R. Company is developing steadily.

RAINBOW MOUNTAIN MINING CO.**ARIZONA**

Mine at Chloride, Ariz. **Officers:** C. E. Walker, pres.; G. E. McCarn, v.p.; B. F. Williams, sec.; H. L. McCarn, treas. and gen. mgr.

Inc. 1907, in Arizona. **Cap.**, \$1,200,000; shares \$1 par.

Property: 11 claims, unpatented, on Rainbow Mt., Wallapai mining district, Mohave Co. Claims said to show a vertical vein containing gold-silver-lead-ore opened by a 440' shaft in 1915. Much water was encountered at this depth. **Development:** work totals 4,000' including 780' of tunnels. Company claims to have blocked out 1,500 tons of ore, averaging \$20 in gold, 10 oz. silver and 6% lead. **Equipment:** includes an 80-h. p. hoist and a 2-mile aerial tram. Shipments have been made at different times to Needles smelter.

RALSTON MINING CO.**NEVADA**

Tonopah, Nev. **Officers:** Chas. E. Perry, pres.; Wm. Foreman, v.p.; T. A. MacDuff, sec.-treas.; J. H. Evans, R. J. Highland, directors.

Inc. July, 1916, in Nevada. **Cap.**, \$1,000,000; shares \$1 par.

Property: the K. C., or Gori McBride group, east of the Halifax and adjoining the East End mine. The property was paid for with 601,000 shares at 3c.

RAMBLER-CARIBOO MINES, LTD.**BRITISH COLUMBIA**

Address: Three Forks, B. C. **Officers:** A. F. McClaine, pres.; Alfred Coolidge, v.-p.-sec.-treas., with Dr. B. W. McPhee, Dr. John Benson, C. L. MacKenzie, Dr. Johnston Armstrong, and Rev. P. F. Hylebos, directors. A. E. Cable, asst. sec.; J. A. McPhee, asst. treas. **Cap.**, \$1,750,000; shares \$1 par; all issued. Listed on Spokane Exchange.

Balance sheet of April 30, 1916, showed total receipts of \$155,964, which included: balance forward \$5,325; ore in transit and at smelter, \$136,233. Disbursements for year ending April 30 were \$140,514, including \$13,384 for development, \$27,294 for mining and \$17,339 for milling expenses. Net earnings for the year 1915 amounted to \$123,500. On April 30, 1916, the company reported a cash on hand of \$16,508 together with 1,000 tons of zinc concentrates averaging 37% zinc and 25 oz. silver per ton, and 8 carloads of lead ore and concentrates at the smelter or in transit.

Dividends: of 1c per share were paid on Oct. 15, Dec. 15, 1915, April 15, 1916; 2c per share June 5, 1916. The company is reported as having paid 22c per share in as many consecutive installments prior to suspension of

dividends in 1903. Total dividends, including June 5, said to be \$472,500; while another report gives total to Oct., 1915, as \$250,000 to \$300,000; "exact records not available."

Property: 5 crown granted claims, at the head of McGuigan Creek, near Three Forks, Slocan mining district, has been operated for many years as a silver-lead-zinc mine and has been extensively developed at depth. On the 14th level a 5,000' crosscut was run, but development there has been disappointing, the orebody evidently not extending that far. Reported in April, 1916, that new orebodies had recently been found on the 7th, 8th, 9th, 10th and 12th levels, the ore carrying a higher percentage of zinc than in the upper levels, with silver content about the same, also "we have been producing about 150 tons each of lead and zinc concentrates and 30 tons of crude lead ore monthly for some time. The crude ore runs from 148 to 165 oz. silver and 50 to 58% lead, while the lead concentrates average from 70 to 100 oz. silver and 32 to 40% lead, and the zinc concentrates run 35 to 37% zinc, and about 25 oz. silver." Development work from May 1, 1915 to April 30, 1916, amounted to 1,360'. Ore reserves estimated as sufficient for 2 years operations.

Company has recently closed a contract with the Kusa Spelter Co. of Dewar, Okla., for its zinc concentrates. Employs 40 to 50 men.

The concentrator was operated 20 hours daily during 1915 and treated 21,000 tons of ore, producing 1,800 tons of concentrates that carried 1,292,644 lbs. lead and 142,066 oz. silver and 630 tons concentrate, yielding 14,689 oz. silver and 472,871 lbs. zinc.

Management is reported as "honest, efficient and extremely conservative" but gives out but little information.

RAMBLER COPPER & PLATINUM CO.

WYOMING

Office: Room 710, 145 La Salle St., Chicago, Ill. **Mine address:** New Albany, Albany Co., Wyo. Frank M. Wootton, pres.; Edw. White, v.-p.; Dorchester Mapes, sec.

Inc. Jan. 21, 1908, in Wyoming, as a merger of the Rambler Mining & Smelting Co., and New Lincoln Copper Co. **Cap.**, \$2,500,000, shares \$1 par; issued, \$2,029,463.

Property leased for 15 years, in 1912, to J. Thielman of Merrill, Wis., who transferred the lease to a new corporation called the Platinum Mining & Milling Co. (which see).

RAMSEY-RUTHERFORD GOLD MINING CO.

ALASKA

Valdez, Alaska. **Inc.** in Sept., 1913. **Property:** 10 miles N. E. of Valdez at an elevation of 3,500'; trail to the mine goes over Valdez glacier, making transportation difficult. **Ore:** free milling gold quartz in fissure veins in graywacke.

Development: at the end of 1914 consisted of a 162' shaft with 500' of workings. **Equipment:** includes several gasoline engines, air compressor, and a 5-stamp mill, which cannot be operated during the winter. In 1915 company employed 20 men and was reported to have considerable ore blocked out. See U. S. G. S. Bull. 622, pp. 159-161.

RAMSHORN MINE.

IDAHO

At Bay Horse, Custer Co., Idaho. Presumably belonging to Ramshorn Mining Co. Is the largest and most extensively dry-silver ore mine in Idaho. Shows well-defined fissure veins in black altered slate of igneous material. Vein varies from a few inches to several feet in width and carries quartz and spathic iron with ore shoots containing streaks and spots of tetrahedrite carrying high copper and silver values.

Examined 1913 by Frank Leland and said to be under-option to him.

RANDOLPH-GEMMILL DEVELOPMENT CO.

ARIZONA

Addresses: Crown King, Ariz., and Prescott, Ariz. **Officers:** M. P. Randolph, pres.; F. S. Viele, v. p.; David B. Gemmill, engr.

Property: the remodeled Crown King mill, in which 70-80 tons per day of the old tails from the mill are retreated. These tails are complex, carrying 0.3 oz. gold, 4½ oz. silver, 11% zinc, 0.8% copper, 10% iron,

53% insoluble; they are tailed, and treated by oil flotation making 4 to 1 concentrate. The bulk concentrate is retreated making 9 tons zinc and 16 tons iron concentrate from each 100 tons tails. Zinc product carries 45% zinc, 10% iron, 4½% copper, 13 oz. silver and 0.35 oz. gold; the iron product carries 0.8 oz. gold, 12 oz. silver, 3% copper, 15% zinc, 18% iron and 25% silica. These products yield a net profit of \$2.50 to \$3 per ton of tails treated after paying \$1.50 per ton royalty. The company plans a custom mill at Crown King.

R. A. P. SYNDICATE**ONTARIO**

E. M. Richardson and W. B. Albright of the Sherwin-Williams Paint Co., 52 William St., New York, and John Papassimakes, of Boston Creek, owners.

Property: 21 claims on Boston Creek, 51 miles by rail north of Cobalt. The district is a new one, discovered 1915, and has 2 other operating companies, the Miller Independence and Crown Reserve (McCrea claim).

Development: 180' of drifting on the 100' level shows 52' ore, including 20' high-grade. A 167' shaft cut 12' streak of high-grade.

RAPP MINING DEVELOPMENT & PROSPECTING CO. ONTARIO

Address: Boston Creek, via Krugersdorf on the Ont. Northern Ry.

Property: the original "find" at Boston Creek shows a gold-bearing quartz vein on which shaft has been sunk. **Equipment:** includes hoist, compressor, etc.

RARE METALS CO.**COLORADO**

Nelson Franklin, mgr., Rollinsville, via Nederland, Colo. Is a subsidiary of the Vindicator Consolidated Gold Mining Co. of Cripple Creek. Owns and operates a 75-ton custom tungsten mill at Rollinsville on the D. & S. L. R. R., 4 miles from Nederland, Gilpin Co., Colo.

RARITAN COPPER WORKS.**NEW JERSEY**

Owned by International Smelting & Refining Co., at Perth Amboy, N. J. A. C. Clark, supt.

RATTLESNAKE JACK MINING & MILLING CO. SOUTH DAKOTA

Galena, Lawrence Co., S. D. Owned by C. B. Harris of Galena and Wm. Sansone of New York.

Property: several claims, including the Rattlesnake Jack mine near Galena, said to show gold ore assaying \$15 to \$20 per ton. **Development:** 200' shaft and tunnels. A 10-stamp mill and cyanide plant, completed in Aug., 1915, ran for several months, when a shutdown was made to build a tailing dam; resumed operations in Jan., 1916, only to close down in April, due to a disagreement between the owners. The mine is being worked pending settlement of differences.

Reported that 1,800 tons of ore treated in February, 1916, yielded \$9,800 in gold, with a profit of \$5,200. Daily tonnage treated averaged 60 tons when the mill was running.

RAVEN & BEACON HILL GOLD MINING CO.**COLORADO**

Office: 39 Exchange Bank Bldg., Colorado Springs. **Officers:** W. W. Price, pres.; John T. Hawkins, v. p.; W. B. Price, sec.

Cap., \$170,000; shares 10c; in treasury Jan. 1, 1916, 328,000 shares stock and \$5,244 in cash. Listed on Colorado Springs Exchange.

Property: 17 acres of the Arequa townsite and 7 acres of the Cameron townsite, at Cripple Creek; crosscut by the Roosevelt Tunnel. Developed by 554' shaft. The mine has been blocked out for leasing; the Elkton Cons. M. & M. Co. operates Blocks 1 and 2 through the Elkton main shaft and at last accounts was shipping steadily ore of good average milling grade.

Gross production to date, \$85,691; none in 1915.

RAVEN COPPER CO.**MONTANA**

Property sold, Aug., 1915, to the Anaconda Copper Co., for \$65,000, and company is in process of liquidation. Fully described in Vol. XI., Copper Handbook.

RAWLEY MINING CO.**COLORADO**

Office: 25 Madison Ave., New York. Chas. E. Beckwith, mine supt., Bonanza, Saguache Co., Colo. **Officers:** A. Fillmore Hyde, pres.; Eugene

G. Foster, v. p.; E. V. Cox, sec.-treas.; preceding with John L. Cox, W. Hodges, Elmer Z. Burns and H. O. Hall, directors; Simons & Burns, cons. engr.

Inc. 1901 in Colorado. **Cap.**, \$2,500,000; shares \$1 par, non-assessable; 1,903,679 shares outstanding. Annual meeting third Monday in January.

Property: 64 claims, 400 acres, shows fissure veins in andesite, running N.-S., nearly vertical and of 5 to 6' width; they carry argentiferous galena, bornite and chalcopryrite, in a heavy sulphide smelting ore on the 12th level. The mine has 13,843' of workings, estimated to show 97,000 tons concentrating and 225,250 tons smelting ore. The 6,235' tunnel cuts vein on 1,200' level.

Equipment: includes an 8-drill Rand air compressor, steam power with 50-h. p. at the mine and 100-h. p. at the mill, fuel being wood. There are 24 buildings and a 100-ton mill. Property still in the development stage. Idle 1915-16.

RAY-ARIZONA COPPER CO.

ARIZONA

P. T. McGrath, pres. and mgr., Kelvin, Ariz. **Property:** 42 claims, on the south side of the Gila river, opposite Kelvin; shows schists cut by igneous rocks, with impregnations and veins carrying copper ore. **Development:** by shaft and churn drilling. F. L. Underwood is reported to have financed the company under an option on 51% of the stock for \$250,000.

Equipped with Leschen tramway. Lessees shipped a car of copper ore early in 1916 to Hayden smelter.

RAY CENTRAL COPPER MINING CO.

ARIZONA

Company conveyed by direct deed all assets to Ray Consolidated Copper Co. in June, 1912, but has not yet been legally dissolved.

RAY CONSOLIDATED COPPER CO.

ARIZONA

Office: 25 Broad St., New York. **Mine office:** Louis S. Cates, gen. mgr., Ray, Pinal Co., Ariz. **Mill office:** Hayden, Gila Co., Ariz. **Officers:** Sherwood Aldrich, pres.; D. C. Jackling, v. p. and managing director; Chas. Hayden, second v. p.; preceding, with Chas. M. MacNeill, Seeley W. Mudd and W. Hinckle Smith, executive committee; Eugene P. Shove, sec.-treas.; preceding officers, Spencer Penrose and A. Chester Beatty, directors. W. S. Boyd, supt. of mines; D. D. Moffatt, supt. of mills; Ed. Hiatt, mg. engr.

Inc. May 11, 1907, in Maine. **Cap.**, \$16,000,000; shares \$10 par; \$15,712,790 issued, Dec. 31, 1915. Original capital \$6,000,000, increased to \$8,000,000 in 1908, increased 1909 to \$10,000,000, increased May, 1910, to \$14,000,000. The increase to \$16,000,000, March, 1912, was to provide shares for the absorption of the Ray Central Copper Mining Co., giving 1 share of Ray Cons. for 8 of Ray Central. Company absorbed the Gila Copper Co., through exchange of stock, giving 1 share for 3. Company owns entire capital stock of the Ray & Gila Valley Railroad Co., cap. \$1,095,000. Bankers' Trust Co., New York, and Boston Safe Deposit & Trust Co., Boston, registrars; Guaranty Trust Co., New York, and Old Colony Trust Co., Boston, transfer agents. Fiscal year, formerly ending June 30, has been changed to end with the calendar year. Shares are listed on the New York and Boston Stock Exchanges. Annual meeting, formerly held 4th Tuesday in September, has been changed to 3rd Friday in April.

RAY CONSOLIDATED COPPER COMPANY

Our Statistical Department will furnish complete information on application.

HAYDEN, STONE & CO.

Members New York, Boston and Philadelphia Stock Exchanges.

25 Broad Street, NEW YORK

87 Milk Street, BOSTON

Comparative General Balance Sheet; Ray Cons. Copper Co. and Ray & Gila Valley R. R. Co.

Assets:						
	Property	Const. & Equip.	Devel.	Metals in Transit	Current Assets	Total
1915	\$8,917,573	\$7,373,768	\$4,076,250	\$3,823,834	\$1,253,492	\$25,444,917
1914	8,917,407	6,961,660	4,024,120	1,753,695	912,892	22,569,774

Liabilities:						
	Capital Stock	Bonds	Current	Reserves, Ins., Bond Redemp.	Surplus	Total
1915	\$15,712,790	\$160,500	\$709,132	\$974,078	\$7,888,417	\$25,444,917
1914	14,549,290	2,708,000	316,911	905,217	4,090,356	22,569,774

The bonds were called for redemption Jan. 1, 1916, outstanding March 16, \$30,000. 1915 surplus includes \$1,451,835 from securities sold; earned surplus was \$6,436,581; 1914 surplus from sale of securities, \$308,424; earned surplus, \$3,781,932.

Comparative Income Account, Ray Cons. Copper Co.						
	Operating Revenue	Operating Expenses	Net Optg. Profit	Total Income	Total Deduct's	Balance Dec. 31
1915	\$10,498,962	\$6,125,590	\$4,373,371	\$4,760,684	\$4,760,684	\$6,434,704

Net earnings for 1st 6 months, 1916, approximately \$5,273,000.

Earnings and Dividends on stock per share:						
	1916	1915	1914	1913	1912	1911
Earned		\$2.73	\$1.29	\$1.49	\$1.33	\$0.25
Paid	*\$1.00	1.25	0.75	1.125	nil	nil

Present rate, \$2 per share per annum, payable quarterly, March 31, etc., at Guaranty Trust Co., New York.

A sinking fund of 10 cts. per ton of dry ore treated was in effect from 1914 to 1916, increased to 20 cts. a ton after 1916. It seems improbable it will ever be needed.

Property: 126 patented claims, 2,143 acres of mining claims, at Ray, 130 acres at Ray Junction for railroad purposes; and a tract of 4,324 acres in Gila and Pinal counties, at Hayden and 21 miles from the mines, for milling and power plant and tailing disposal; 536.5 acres of this are leased to the A. S. & R. Co. for its smelter.

About 580 acres of the Ray property has been proven to be mineralized, and about 183 acres have been developed, with a certainty that more or less of the additional mineral ground will be found to carry workable values.

Geology: the property shows a flat orebody 150 to 400' thick, 1,000 to 3,000' wide and about 9,000' long, through the property. This zone consists essentially of a highly metamorphosed iron-stained granite, whose borders and tongues are also mineralized and cut by diabase dikes. A fault east of the orebody brings the orebody against quartzite and limestone, while unaltered schist is found to the west. The silicified and whitened rock is leached to a considerable depth, the oxidized zone being succeeded by impregnations and seams of chalcocite and pyrite. The ore deposit is almost identical with that of Miami, and genetically similar to those at Bingham, Ely and Morenci. Oxidized copper ores are found near surface, though in much of the ground the top of the belt is leached to depths varying from 30 to 400' and averaging 225', this leached zone being succeeded by ore carrying copper sulphides, greatly enriched by the secondary redeposition of chalcocite, latter constituting the main ore value. At the bottom of the orebody the transition from the ore to rock mineralized with primary sulphides takes place in a few feet. This primary mineralization averages about one-half of 1% copper, whereas an average sample of ore on the 50' level gave 2.4% copper, 3.4% iron, 2.6% sulphur and 90.3% insoluble matter.

*First six months.

The many drill holes bored have shown an average capping of 240' depth, succeeded by an average of 118' thickness of ore, on the Ray proper, with 315' of capping and 171' thickness of ore on the Gila ground. The Ray mine has been developed by both underground workings and extensive churn-drill borings. Six churn drills have been employed, averaging about 50' each daily, boring 340 holes to an average depth of nearly 400' each, with a total of 140,000' of drilling, holes being bored checkerboard fashion, in 200' squares.

Development: by shafts Nos. 1 and 2 about 4,000' apart, and No. 3, the Ray Central shaft, near No. 1. There are many less important workings. The ore supply now comes almost equally from the No. 1 and the No. 2 mines. The No. 3 mine furnishes a smaller tonnage of high-grade ore. No. 1 shaft is 400' deep and has 4 levels at 171' and each succeeding 100' in depth. The shafts are connected by a drift, on the second level, which is run for more than 1 mile, practically through commercial ore. By the side of each shaft is an incline shaft, with a series of stairs used by the men and a hauling way used for the handling of material, the main shafts being used solely for ore extraction. The greatest depth from which ore is to be hoisted will be about 300' for years to come, and the greater part of the tonnage will be taken from the 170' level and above for some years. The mine is operated on the Cates shrinkage-stopping system, the stopes being carried up 15' wide with 10' pillars. When the stopping is completed and ready for drawing the pillars crush and come down with the broken ore. This method gives a 92% recovery of the ore blocked out. The ore is trammed to 600-ton underground loading bins on each level of each shaft, and drawn therefrom into 12-ton skips through gates operated pneumatically. Ore is hauled underground in trains of 5-ton cars, drawn by 10-ton electric locomotives through the 4,000' 8x14' double-track main haulage tunnel, with which all shafts and working levels are connected. Three cars are dumped at a time into each ore pocket, by a revolving tippie.

The Ray mine, of which the Ray Central or Globe-Isabella mine is now an integral part, has been developed for a maximum width of 3,500' and length of 8,000'. Total underground workings Jan. 1, 1916, amounted to approximately 100 miles, of which mining operations have destroyed about 45 miles. In 1915 new work totaled 45,292', compared with 75,261' in 1914.

Ore reserves: calculated to Dec. 31, 1914, amounted to 74,765,789 tons, averaging 2.214% copper and underlying an area of 205.2 acres. This is exclusive of 7,061,821 tons, averaging 1.74% copper mined from inception to the end of 1914. The higher grade orebody developed by No. 3 shaft, contained Jan. 1, 1914 approximately 540,000 tons of ore averaging slightly over 5% copper. Ore reserves, Jan. 1, 1916, 71,911,475 tons averaging 2.235% copper. This tonnage ensures a life of about 82 years on basis of present production.

The mine is operated electrically throughout, taking current over a transmission line from Hayden to Ray. There is a crushing plant at the mine, reducing ores to about 1" size before shipping to the mill.

The company owns and operates its own railway, known as the Ray & Gila Valley, from Ray to Kelvin, the trains continuing over the tracks of the Arizona railway (S. P. R. R.) to Hayden Junction and thence over a branch line, belonging to the Ray & Gila Valley to the Hayden concentrator. The line between Ray and Kelvin is standard gauge and is operated as a common carrier. It has 80-lb. rails, Mogul locomotives and 60 ton steel ore cars. The company has a very favorable freight contract with the Phoenix & Eastern for the transportation of ores partially over that line.

The old concentrator at Kelvin, 6 miles from the mine, inherited from the English owners, was enlarged in 1907, to 300 tons daily capacity and extensive experiments were made until Aug., 1909, these resulting in the concentration of ores 17 into 1, with a 70% recovery of assay values.

Concentrator: occupies a 4,000-acre site at Hayden, about 16 miles from the mine. In its essential features it is a duplicate of the Garfield mill of the Utah Copper Co.

The mill, of 8,000 tons daily capacity, has eight 1,000-ton sections, and is so designed that it may be enlarged, on the unit plan. The crushing department has 16 sets of 42x16" rolls, and 24 six-foot Garfield Chilean mills. Sizing is done by 48 impact screens, and Janney classifiers, and concentration is effected by Garfield roughing tables, Harz single compartment jigs, Wilfley tables, and Isbell vanners. Water, derived from the Gila river and the adjacent hills, is sent to a 4,000,000-gal. reservoir at the mill site through a 30" pipe, by pumps having a capacity of 7,500 gals. per minute.

The mill started in March, 1911, treating an average of 850 tons of ore daily. The concentrates are well adapted to smelting, as regards sulphur and iron contents, only a small amount of limestone being required for fluxing. Concentrates are treated in the Hayden smelter, owned by the American Smelting & Refining Co.

The power plant at the mill site, of 10,000-h. p. capacity, supplies electric current for the operation of the entire property. The plant has water-tube boilers, burning oil and coal, and running four 2,500-h. p. Allis-Chalmers triple-expansion engines, direct-connected to four 1,750-k. w. electric generators.

	Production:			Cost per Ton		% Cu.		Lbs. Cu. in Rec. per T. Ore	Net Prod. Lbs. Cu.	Cost per Lb.	Sell. Cts.
	Tons Treated	Mine Cts.	Mill Cts.	Total	% Cu.	% Rec.	Cncts.				
1916	745,940	69.23	57.59		1.631						
1915	2,848,969	62.68	50.86	\$2.115	1.673	64.11	19.29	21.45	60,338,936	9.497	17.352
1914	2,427,700	62.42	49.88	2.174	1.760	67.88	19.25	23.89	57,004,281	8.839	13.267
1913	2,365,296	73.23	51.93	2.284	1.719	66.09	18.55	22.72	52,341,029	9.784	15.201
1912	1,565,875	77.55	46.88	2.334	1.677	68.28	18.94	22.9	35,861,496	9.828	15.762
1911	681,519	81.60	59.45	2.65	1.83	63.01	22.44	22.0	14,935,047	10.765	13.08

Mine cost includes coarse crushing and loading on cars at mine, from 3.1 to 3.7 cts. per ton. Total cost calculated from income statement, includes all operating charges. 1914-16 production of copper is from smelter returns from concentrates and high-grade ore shipments. Cost per pound does not include miscel. income, equal to about 0.1 ct. per lb. 1916 figures are for 1st quarter only. Output for first 6 months in 1916, approximately 35,582,000 lbs. Low recovery in 1915 due to construction work in mill improvements at a time when the price of copper made it more profitable to overload such sections as were not undergoing repairs. Ratio of concentration was 17.99 to 1 in 1914.

In 1915 No. 3 shaft supplied 1,737 tons of sorted ore, shipped direct to the smelter. In 1915 production of silver was 45,083 oz., sold at 49.445 cts. per oz. and 319 oz. gold at \$20 per oz. Reported in June, 1916, that daily production ore was averaging 9,500 tons.

The concentrator is now handling its full capacity of 8,000 tons a day, which it is expected will be crowded to 10,000 tons per day. This additional capacity and the better grade of ore that will be mined when the edges of the orebody now being mined are cleaned up, and the main portion of the orebody is worked, will still further increase the annual production of copper. With the mine and works running at full capacity on the average grade of ore, the management expects an annual production of at least 80,000,000 lbs. fine copper yearly. The management expects to lay down finished copper, on the seaboard, at a cost under 9 cts. per lb.; original estimates by the company's engineers were that a net profit of at least \$1.75 per ton of ore could be secured. The tonnage already developed places the Ray Consolidated among the great copper mines of the world, with a certainty that the present enormous ore tonnage will be increased, and a possibility that it may be doubled. The management is practically the same as that of the Utah Copper Co., the pioneer among the so-called porphyry mines of the world, and is thoroughly experienced, strong and capable.

RAY HERCULES COPPER CO.

ARIZONA

Office: 25 Broad St., New York. Mine at Ray, Ariz. Directors: Frank C. Armstrong, pres.; J. G. Hopkins, E. P. Earle, Geo. A. Huhn, W. F.

Bartholomew, F. C. Armstrong, August Heckscher, Jos. B. McCall. C. E. Addams, gen. mgr.; A. A. Wren, drill supt. and sampler.

Inc. 1915, in Maine. **Cap.**, 1,500,000 shares, \$5 par. Company owns 90% of the issued Arizona Hercules Copper Co. stock. When entire stock of holding company is issued, company will have \$1,000,000 cash. No bonded debt, no preferred stock. As the 500,000 shares sold at \$3.75 yielded \$1,875,000 and \$1,000,000 was put in the treasury, the difference must represent part of the purchase price.

Property: 207 acres, in the heart of the Ray district, at Ray, Ariz., surrounded by the holdings of the Ray Consolidated Co. Tract shows Pinal schist, in part capped by dacite, conglomerate and wash and invaded by diabase. Ore developed is an extension and part of the Ray Consolidated orebody. It is crossed by a fault with 350' drop to the east which fact long retarded development.

In September, 1915, Henry Krumb made an examination after drilling 27 drill holes; 17 drill holes showed ore averaging 73.6' thick over 13½ acres with a 257' capping. The total ore developed by these holes was 3,428,774 tons assaying 2.36% copper. The area S. E. and E. has since developed more ore and 4 drills are now working, putting down holes at 200' intervals. A total of the first 30 holes aggregating 89,000' cost \$2.90 a ft., including general expense. 52c, labor and supplies, \$1.55, sampling and technical data, 57c, grading roads and moving drill, 27c. Drills are run in three 8-hour shifts with 1 drill runner at \$6 per day, helper at 40c per hour and sampler at 50c per hour. Drills average 30' per day and consume 1½ tons of coal and 1,500 gals. of water.

Company is sinking a 700' shaft at N. W. corner of property and will mine orebody by methods formerly used by Supt. Addams at de Beers diamond mine in Africa. Company has authorized a 1,000-ton mill and figures a recovery of 33.44 lbs. copper per ton at 8½c total cost. If this is done company can earn \$540,000 at 13c copper.

Company is backed by big financial houses, has expert technical advisors, and is very favorably regarded. The stock has been kept down in price by the greed of various brokerage houses, but is understood to now be held largely by strong investment interests.

RAY JEFFERSON MINING CO.

IDAHO

Address: Daniel L. McGrath, mgr., Wallace, Idaho. **Officers:** E. R. Day, pres.; H. L. Day, v.-p.; with Geo. K. Garrett, directors.

In May, 1916, control passed to the Day interests, owners of the Hercules, Tamarack-Custer mines, and of the Northport S. and R. Co. Company sold treasury stock to finance construction of 250-ton mill and installation of electric haulage system, 1916. The company had \$100,000 in treasury May 1 and expected mill to start July 15.

Property: 38 claims, 600 acres in a compact group, adjoining the Consolidated Interstate-Callahan holdings and including the Hill group is reported to show the Interstate-Callahan, Amazon and Manhattan veins, one with an orebody 400' long. The Carlisle is a cross vein running northerly and intersecting the Interstate. The latter is supposed to be the Hercules vein.

Development: by the Blue Grouse and Carlisle tunnels. The Mountain Goat tunnel opens a shoot 300' long, showing 3' of shipping ore and 9' of mill ore on the Callahan vein. The Carlisle tunnel has 400' of drifting on the vein of this name, carrying 5' to 10' of mill ore for the entire distance. About 50 men employed. A 400-ton mill is under construction and a 30-drill compressor installed.

RAYMOND-ILLINOIS MINING CO.

UTAH

Office: 509 McCornick Bldg., Salt Lake City, Utah. **Main office:** Eureka, Juab Co., Utah. **Officers:** Frank J. Hagenbarth, pres. and gen. mgr.; J. M. Wheeler, v.-p.; J. C. Lynch, sec.-treas.; preceding and Thos. Kearns, directors.

Inc. 1905, in Utah. **Cap.**, \$150,000; shares \$1 par; assessable. Assess-

ments of one-half-cent a share fell due Oct. 11 and Nov. 28, 1913, and Jan. 15, 1914.

Property: 15 patented claims, in the Tintic district, shows fissures and replacements in limestone. Developed by about 1 mile of tunnels and a 1,500' vertical shaft, which as yet have shown but little ore. The bottom workings are wet. Diamond drilling was done, 1909-10, from the bottom of the shaft. Idle since 1914.

READY BULLION COPPER CO.

ALASKA

Office: 517 State St., Boston, Mass. Mine near Juneau, Alaska, developed by 2,200' incline shaft. Is reported starting new shaft to be sunk 2,400'.

REAL DEL MONTE Y PACHUCA.

MEXICO

Subsidiary of the U. S. Smelting Ref. & Mining Co., 55 Congress St., Boston, Mass. Mines at Pachuca and Real del Monte, Hidalgo, Mex.

Inc. 1854, in Mexico, with 2,554 capital shares; all but 20 owned by the U. S. Sm. Ref. & Mng. Co.

The first discovery of ore was made shortly after the Conquest of Mexico by the Spaniards, and several of the principal properties were in large production prior to 1780, and at the time of the visit of Baron Van Humboldt in 1790 constituted the most important silver operations in the Western Hemisphere.

Property: 180 mining claims, 1,736 hectares or 4,270 acres, and approximately 26,000 acres agricultural land, at Real del Monte, 7 miles from Pachuca.

Geology: of the district is extremely simple, as all veins are fissures in a uniform, deep-seated andesite boss which constitutes the entire rock mass for an area of over 100 square miles. While there are superficial capping rocks of other nature, they have no relation to the veins. Vein filling is quartz with a little calcite. The total mineral content of the veins is never more than four or five per cent. and aside from the silver and gold minerals is almost wholly composed of iron pyrite with insignificant sprinklings of lead and zinc sulphides.

Development: by over 150 shafts, and the tunnels, drifts, etc., now open and accessible, aggregate over 100 miles in length. Past workings have embraced over 50 operating mines on the company's property, but the principal operations at present are confined to eight, worked through 16 shafts extending to surface and numerous interior shafts devoted to handling of men and materials. The deepest workings extend to a depth of 625 meters (2,050') below the surface and the average depth from which ore is handled approximates 1,300'.

Ore Reserves: owing to the heavy expense of pumping, the reserves of ore actually blocked have been held for several years past at about 1½ years of full production rate. During the past year entirely new developments have importantly added to this ratio. The eight operating mines referred to embrace a relatively small proportion of the known mineral bearing territory and operations are assured for many years to come.

Ores are transported from the shafts by electric surface haulage or aerial tramways to two cyanide plants, one of 800 tons daily capacity in the Real del Monte district, the other 1,200 tons daily capacity for the Pachuca district. Approximately, 90% of the silver values and 96% of the gold are extracted by the cyanide process and by concentration. About 20% of the total recovered values are in the form of concentrates which are shipped to custom smelters; the balance in the form of doré bullion which is exported.

Production: during 1915 amounted to 390,000 tons of ore averaging 13.9 oz. of silver and \$1.48 gold per ton. The average cost for the first nine months of 1915 was \$4.16.

In spite of Revolutionary activities and the fact that during several periods the properties have been completely cut off by rail and telegraph from the outside world for months at a time, operations have never been

stopped and the entire organization, Mexican and foreign, has been held together. There have been no labor troubles of importance at any time and the only causes for cessation or reduction of operations have been due to difficulties in getting supplies on account of transportation causes. The plants are at present operating at a little over 80% of rated capacity.

RECORD LODGE MINING CO.**ARIZONA**

J. J. McCarthy, supt., Oatman, Ariz. **Officers:** Chas. A. Gehrman, pres.; Lee A. Meyers, v. p.; J. J. McCarthy, sec.; J. A. Small, treas.; L. L. Wallace, directors. **Inc. Jan., 1916, in Arizona. Cap., \$250,000; shares 25c par.**

Property: claims located on Hardy vein. **Equipment:** hoist, compressor, etc.

RECORD MINES CO.**ARIZONA**

Idle. Address: Mudersbach Mine, Bouse, Yuma Co., Ariz. Owns Mudersbach mine with 23 claims, 8 miles south of Bouse, on the main road to Quartzite, in the foothills of the Palomas mountains. The property covers the strike of a contact metamorphic zone showing gossans of specular hematite, underlaid by oxidized ores to shallow depth, succeeded by copper sulphides, an average sampling said to have given 4.5% copper. **Ore:** occurs as bornite, chalcopyrite, pyrite and hematite in a garnet-epidote gangue; it is an irregular bunched replacement, a few inches to a few feet thick, of limestone resting on schist, and altered by quartz monzonite.

The mine, which is one of the oldest locations in the district, was taken over, 1910, from the Excelsior Gold & Copper Mining Co., for a price reported to have been \$250,000. The main orebody has been opened at several points by a number of pits and shafts, of 10' to 50' depth, showing ore, and a shaft, No. 1, 190' deep.

Equipment: includes two 15-h. p. gasoline hoists, a gas engine and air compressor. The mine was developing, with a small force, at last accounts. Option given Clara Consolidated Co., 1913, has been relinquished.

RED BIRD MINING & SMELTING CO.**IDAHO**

Inc. 1913 to take over assets of Idaho Smelting and Mining Co. J. B. Jones, sec.-mgr.

Property: consists of extensive holdings near Clayton, Custer Co., 60 miles N.-W. of the Oregon Short Line terminal at Mackay, including the Ella group at Clayton, Red Bird group on Squaw Creek, Silver Rule group on Slate Creek, Skylark group at Bayhorse, and a 100-ton smelter at Clayton. The Red Bird mine is the principal property, containing lead-silver-copper-gold ore. Ore occurs in well-defined veins opened to maximum depth of 900' by shafts and crosscuts. The smelter was closed down, Nov., 1915, after an unsuccessful run of one month, during which it turned out 2,700 bars of bullion, containing good silver values. Development work has apparently also, been discontinued.

RED CLIFF MINING CO.**BRITISH COLUMBIA**

Idle. Bankrupt. Mine at Stewart, Skeena district, B. C. A. Erskine Smith, pres.; A. D. Tennant, v. p.; F. Wilcox, sec.; A. C. Ray, H. L. Lowndes, F. T. Chadwick and William Savage, directors. Inc., June, 1909. Cap., \$1,500,000; shares \$1 par; issued, 1,291,200.

Lands: on the Portland canal, said to be owned outright, show a main orebody claimed to be about 100' wide, carrying ore averaging 3 to 18% copper, 1 to 4 oz. silver and \$16 to \$24 gold per ton. Mine is developed by a 400' shaft with 1,240' of drifting and crosscutting on the 400' level and 800' on the 300' level. Shipments to the smelter of 1,249 tons in 1912 averaged but \$14.50 gross value with freight and treatment costs of \$8.76, leaving but a narrow margin for profit after mining costs are deducted.

The company had a promising prospect on which \$308,654 has been expended and all but 60,000 shares sold at par or better. Office expenses for 1912 were \$12,252; assuming similar sums for 2 previous years and adding that to mine development, leaves a balance of \$885,889 unaccounted for. Did it go into the pockets of the promoters, or the vendors? The

shares were boosted on optimistic statements up to \$2.05, or a valuation of \$3,000,000, a ridiculous figure for an undeveloped prospect. The people that invested in the company have lost their money, and one investor, brooding over his loss, has gone to the insane asylum.

Mine is shut down, treasury empty, property mortgaged for \$70,000, and a report by J. L. Parker states that there are 20,000 tons of ore available with a net profit of \$1 per ton, which means that property is not worth the mortgage.

RED LEDGE COPPER MINE

IDAHO

Address: care R. N. Bell, Boise, Idaho. Mine is 10 miles north of Landore, Adams Co., Idaho, in Deep Creek canyon, 2 miles from Snake river.

Claims cover a very large outcrop of red and yellow stained quartz porphyry, about 1 mile long and 2,000' wide, bordered by granular igneous rock on one side and greenstone on the other, which is permeated with a fine-grained cupriferous pyrite as well as stained with green carbonate of copper. Geologic examination indicates that the orebody is an anticline, or saddle fold of bedded porphyry schist, 100' thick.

Development: by 400' crosscut tunnel, reaching the ore zone at 200'. The orebody is 80' wide, with a 30' section of leached material averaging \$7 per ton in gold and silver, and a 50' section carrying 4.6% copper and \$5 per ton in gold and silver. The ore mineral is said to be a primary sulphide. The property appears to be a copper deposit which would warrant development if not so inaccessible, being 17 miles from railway terminal at Homestead, Ore. Construction cost to connect mine with railway would be around \$850,000.

RED LION CONSOLIDATED MINES CO.

NEVADA

Goldfield, Nev. A. P. Mackey, pres. Inc. in Wyoming. Cap., \$2,000,000; shares \$1 par. In treasury April, 1916, 700,000 shares. Listed on San Francisco Exchange. Control held by Yellow Tiger Mining Co.

Property: 6 claims, 97½ acres, patented, at Goldfield, adjoining the Milltown Extension and Yellow Tiger Mining Co.'s lands. Plans development by running a crosscut from the shaft of the Yellow Tiger Mining Co. across the property of Milltown Extension and then into Red Lion territory; this crosscut to be on the 600 or 700' level; the nearest point to reach Red Lion territory from the Yellow Tiger workings is 1,400'. As additional footage is required for any prospecting done in Red Lion ground the scheme does not commend itself as being attractive and the property must be classed as a decided prospect. At last accounts the Yellow Tiger shaft had not been unwatered.

RED METALS CO.

NEVADA

Last address: 16 Washoe Bank Bldg., Reno, Nev. A. W. Holmes, pres.; Geo. T. Milner, sec. and gen. mgr.; Jas. Howell, treas.

Inc. May 12, 1910, in Nevada. Cap., \$1,000,000; shares \$1 par; nonassessable; in \$50,000 preferred and \$950,000 common stock; issued, \$1,500 preferred and \$786,200 common stock. Annual meeting, first Monday in June.

Property: 16 claims, unpatented, 300 acres, on Peavine Mountain, Washoe Co., Nev. Claims carry lenticular deposits, between diabase and diorite, that are 1 to 12' wide, show copper carbonate and bornite ore, said to average 9% copper, 15 oz. silver and \$4.80 gold per ton. **Development:** by tunnel, 1,200' long. The mine was opened 1866, for silver, closed 1877, owing to the low price of that metal, and again reopened, 1908. See Copper Handbook, vol. XI.

Geology of this district is given in U. S. Geol. Survey Bull. 594, p. 194.

RED MONARCH CONSOLIDATED MINING CO.

IDAHO

Offices: 417 Hutton Bldg., Spokane, Wash., and Wallace, Idaho. **Officers:** Conrad Wolfe, pres., gen. mgr.; W. G. Collins, v. p.; Gale Smith, sec.-treas., with G. I. Toevs, Orris Dorman, F. R. Wolfe and Ralph Smith, directors.

Inc. 1915, in Washington. **Cap.**, \$2,000,000; shares \$1 par; assessable. Annual meeting, first Tuesday in April.

Property: 43 claims, about 800 acres, in Beaver Creek district, 9 miles north of Wallace, adjoins Cons. Interstate-Callahan on the west; claims are on S. W. slope of Sunset Mt. and on opposite side of the mountain from the Interstate. Said to show 5 well defined fissure veins of silver, lead, zinc ore in Prichard slate and Burke quartzite. Veins are parallel, strike N. 70° W., dip 80° to the S. W.

Development: up to the time acquired by the present company, Nov. 1915, consisted of 2,000' of prospect tunnels and open cuts. Ore had been found in one tunnel, 650' long, at a depth of 500'. Company is now driving two tunnels from Missoula Gulch, one north to attain a depth of 1,000' within a length of 1,000', and one south to attain a depth of 2,000' within a length of 3,000'.

Equipment: includes an Ingersoll-Rand compressor, capacity 2,000 cu. ft., operated by a 250-h. p. G. E. motor.

Management states that plans for a mill are being drawn, the intention being to have it completed by the Fall of 1916; oil flotation will be used. Property is considered promising.

RED MOUNTAIN COPPER MINING CO.

ARIZONA

Owens the Four Metals mine at Mowry, Santa Cruz Co., Ariz. Was worked unsuccessfully by Oscar A. Turner, 1914-15, and is now supposedly moribund.

RED MOUNTAIN DEVELOPMENT CO.

ARIZONA

Office: P. O. Box 3007, Lowell, Ariz. **Mine office:** Dragoon, Cochise Co., Ariz. **Officers:** Frank Briggs, pres., treas. and gen. mgr.; Wm. Hawley, v. p.; E. J. Briggs, sec.

Inc. Oct. 5, 1908, in Arizona. **Cap.**, \$1,000,000; shares \$1 par; non-assessable. Annual meeting, second Tuesday in September.

Property: 17 claims, 340 acres, crossed by the Southern Pacific railway, shows schist, porphyry and limestone, with a vein claimed to be 130' wide and traceable 2 miles, carrying copper and lead ores, including copper oxides and chalcopryrite. **Development:** consists of a 100' shaft. Idle owing to lack of funds.

RED MOUNTAIN MINING CO.

WASHINGTON

R. J. Bonnamarte, supt., Bellingham, Wash. Control purchased June, 1916, by George Wingfield and associates of Goldfield, Nev.

Property: in Mt. Baker district, Wash., shows a fissure vein containing an oreshoot developed for 175' and averaging 4' in width, of \$20 ore. **Development:** carried on intermittently since 1889, is by tunnels, the third or 700' level, showing high-grade ore. **Equipment:** includes a hydro-electric plant and a 10-stamp mill.

RED ROVER COPPER CO.

ARIZONA

Phoenix, Maricopa Co., Ariz. Dr. R. W. Craig, pres.; J. Apfield, v. p.; R. M. de Gex, treas. and gen. mgr.

Inc. July, 1909, in Arizona. **Cap.**, \$1,000,000; shares \$1 par.

Lands: 12 claims, known as the Red Rover Group, 12 miles north of Camp Creek and 50 miles N. E. of Phoenix, the nearest rail point. **Development:** by 10,000' of underground workings, including a 200' tunnel and a 370' incline shaft, showing a 10 to 16' orebody between limestone and porphyry, carrying a 3' paystreak estimated to average 10% copper, 6 to 60 oz. silver.

The Red Rover mine, discovered 1882, has shipped from shallow workings about \$200,000 worth of high-grade ore, running about 15 to 25% copper, with values mainly in silver chlorides, 1 carload of 20 tons netting \$41,000, with no allowance made for copper contents. **Production:** for 1913-14 was 440 tons of ore.

RED WARRIOR MINING CO.

UTAH

Office: Providence Bldg., Duluth, Minn. **Main office:** Milford, Beaver Co., Utah. **Officers:** Leonidas Merritt, pres.; Jas. T. Hale, v. p.; W. H.

Borgen, sec.; E. R. Ribenack, treas.; preceding with W. A. Kaake, John E. Merritt, Angus Buchanan and W. F. Acker, directors; Wilbur J. Merritt, supt.

Inc. Jan 25, 1908, in Minnesota. **Cap.**, \$250,000; increased Jan., 1911, from \$150,000, shares \$1 par; nonassessable; issued, 210,000. Shares are listed on the Duluth Stock Exchange and New York curb. Annual meeting, second Tuesday in January.

Property: a silver-lead mine comprising 8 claims, 1 patented, 95 acres, in the Star district, 8 miles from the S. P. L. A. & St. L. R. R. The claims show orebodies occurring along the bedding planes of limestone, the one under development said to have an average thickness of 6', width of 50' and proven depth of 600', and carries ore estimated by the management to average 21% lead, 1% zinc, 18 oz. silver and 25 cts. gold per ton. In the deeper levels the mine has shown ore assaying 12% copper, 1% lead and 3 oz. silver per ton.

Development: by an 812' vertical shaft with levels at 500' and 675' and a 200' winze sunk on the vein from the 500' level. There are also numerous old shallow shafts and tunnels, the mine having about 3,000' of old and 4,000' of new workings. These workings were estimated to show 20,000 tons of ore, with about 10,000 tons blocked out for stoping by the former management. The mine was operated from 1870 until 1889 and was reopened 1907, by this company. The shaft is to be deepened to 1,000'.

Equipment: includes a hoist good for 1,500' and a 3-drill compressor. It is understood that the mine has the same N.-S. ore channels mined in the Moscow mine, whose workings of equal depth are about 1,500' distant. Property a promising venture, but not yet a mine.

REDEMPTION COPPER MINING & MILLING CO. ARIZONA

Lost its property, 1914. Now controlled by John H. Ware, Trustee, Kingman, Ariz. **Property:** the Clyde mine, near Chloride, Mohave Co., Ariz., opened by shafts of 104' and 114', and tunnels of 125' and 195', a total of about 1,000' of workings. Said to show a vein of 2' average width, with a paystreak carrying about 3% copper, 25 oz. silver, \$2 gold per ton, and oxidized ores near surface. **Equipment:** includes gasoline power and a 25-ton concentrator.

REDLICH TUNGSTEN CO. NEVADA

Col. O. P. Posey, pres. Owns a group of tungsten mines, 16 miles south of Mina, Mineral Co., Nev., on which work was resumed May, 1916.

REDWOOD COPPER MINING CO. WASHINGTON

Dead. Mine at Chewelah, Stevens Co., Wash. **Development:** includes a 400' tunnel with several hundred feet of raises and winzes expected to expose copper at greater depth. Operations ceased in April, 1912, and property was lost under foreclosure of mortgage. Present owners are Chas. Stevens and others of Robinson Straus & Co., St. Paul, Minn.

REDWOOD COPPER QUEEN MINING CO. CALIFORNIA

Idle. Is a San Francisco corporation. E. R. Leach, pres.; Thos. Melersher, sec.-treas.

Property: 840 acres, patented, is 25 miles from Cloverdale, nearest rail point, Mendocino Co., Calif. Developed by tunnels and winzes. Vein, much broken by faults prominent on surface, has a 2 to 4' gossan capping, traceable for a mile. Country rocks are brecciated porphyry and sandstone. Ores include cuprite, melaconite, malachite, azurite, chalcocopyrite and tetrahedrite.

Mineralized zone is 300' long, 10-40' wide and 125' deep, carrying kidneys and lenses of sulphide ore with as much as 8-9% copper and small gold-silver values. High sulphur content and absence of arsenic make ore desirable for manufacture of sulphuric acid.

REED'S PEAK MINING CO. UTAH

Address: Box 902, Park City, Utah. **Officers:** W. D. Lewis, pres.; Henry Welsh, v. p.; W. J. Bardsley, sec.-treas., with Robt. Kimball, D. Scott, Frank Andrew and Thos. S. Mitchell, directors. Alex. McDonald, supt.

Inc. Feb. 14, 1907, in Utah. **Cap.**, \$30,000; shares 10c par; outstanding Dec., 1915, 210,000 shares; assessable. Listed on Salt Lake Exchange.

Property: 21 unpatented claims, 420 acres, 12 miles from a railroad, located on South Fork in Big Cottonwood mining district, Salt Lake Co. Claims said to show fissure veins in limestone carrying lead-silver ore. **Development:** by tunnels, upper 450' long, lower 825' long. Objective of lower tunnel is the intersection of the Birthday No. 1 fissure with a N.-S. fissure at a depth of 800' from surface; this intersection is expected to be reached within a short distance; Birthday fissures Nos. 1 and 2, said to have been productive of shipping ore on upper levels.

Equipment: includes a compressor, machine drills and electric power.

A few tons of ore have been shipped from development work; property is a prospect.

REGAL MINES CO.

ALASKA

Subsidiary of the Great Northern Development Co., which see.

Office: 77 Franklin St., Boston, Mass. **Mine Office:** Kennecott, Alaska.

Officers: Walter M. Briggs, pres.; H. I. Gaskill, sec.-treas.; James Phillips, Jr., C. Hartman Kuhn, Chas. S. Farnum, Mulford Martin, E. F. Gray, W. M. Briggs, J. M. Satterfield, directors. E. F. Gray, gen. mgr.

Inc. 1912 in Maine. **Cap.**, \$250,000; shares \$5 par; fully paid and non-assessable; issued \$28,011. Annual meeting, November 2.

Property: 17 claims, unpatented, 340 acres, near Kennecott, Copper River district. Developed by 115' shaft sunk on a contact between limestone and greenstone and showing copper glance ore. Assessment work only was done in 1914 and 1915.

REID-NEWFOUNDLAND CO.

NEWFOUNDLAND

St. Johns, N. F. Owns a copper property at New Bay, N. F., now idle.

Property was under development in 1907, but has never been a producer.

REINDEER QUEEN MINING CO.

IDAHO

Office: Wallace, Idaho. **Mine address:** Mullan, Idaho. **Officers:** A. B. Crawford, pres. and mgr., Mullan; J. C. Glahe, v. p.; J. H. Wixon, treas.; W. B. Heidfeldt, sec.; preceding with A. R. McRae, P. P. Weber and S. D. Le Mieux, directors.

Inc. Sept. 19, 1913, in Idaho. **Cap.**, \$200,000; shares 10 cts. par, assessable. Company is a consolidation of the Copper Queen and the Reindeer Queen companies, whose holdings are contiguous and cover extensive copper exposures. The new company assumed all obligations of the old corporation and exchanged stock, share for share. The consolidation makes possible the speedy development of the orebody already cut by the Reindeer tunnel, which has been extended as a drift along the vein into the ground heretofore owned by the Copper Queen.

Property: 15 claims in the Mullan copper belt, including the Stevens Peak (or Copper Queen) group and the Reindeer group of 6 claims, all at the head of Willow Creek. The outcropping shows a big copper-stained fissure vein, 5 to 20' wide.

Development: by a crosscut tunnel which has cut the vein at a depth of 800', showing bornite and chalcopyrite ore opened by a drift on the vein. Plans addition of electric power plant, 1916. Examined by Rush J. White, 1915.

RELIANCE MINING & MILLING CO.

MONTANA

Officers: D. M. Adams, pres., Box 386, Butte, Mont.; Frank Eichelberger, v. p.; P. H. Kenny, sec.; preceding with J. C. Lane and J. W. Higgins, directors.

Inc. April 17, 1913, in Mont. **Cap.**, \$150,000; shares 10c par; non-assessable; 1,325,000 issued. Control reported in hands of John C. Norvell, in 1916.

Property: 3 claims, in the Moose Creek section, Silver Bow Co., 18 miles south of Butte, show a vein of copper-silver-lead-zinc ore in carboniferous limestone, opened by a 180' shaft. Has produced 22 tons to date; net returns, \$2,611. Plans to deepen shaft and crosscut on 175' level, 1916.

RENO-YERINGTON COPPER CO.**NEVADA**

Officers: E. L. Brown, pres.-mgr., 944 West 6th St., Reno, Nev.; Victor Cokelair, v. p.; M. C. Brown, sec.; Farmers & Merchants Natl. Bank, treas.; preceding with Walter Harris, O. H. Sonne, Will McDonough, directors.

Inc. Jan. 25, 1907. **Cap.**, \$1,000,000; shares \$1 par; nonassessable; 750,000 shares outstanding.

Property: 5 unpatented claims, about 100 acres, north of the Blue-stone mine, at Yerington, Lyon Co., Nev., said to show sulphide ore in granite with easterly dip, averaging 3% copper.

Development: by 700' tunnel and 100' incline shaft sunk on the contact. **Equipment:** includes hoist and buildings.

Property was bonded, 1913, to Geo. Wingfield, but the bond was relinquished and property reverted to original company.

REORGANIZED BLUE BULL MINING CO.**NEVADA**

Office: P. O. Box 565, Goldfield, Nev. **Officers:** Geo. Wingfield, pres.; F. A. Favier, v. p. and asst. sec.; A. H. Howe, sec.-treas.; preceding with J. S. Henderson and K. M. Simpson, directors.

Inc. 1912 in Nevada. **Cap.**, \$1,500,000; shares \$1 par; outstanding, 1,309,000 shares; assessments totaling 4c called to end of 1915. J. S. Cook & Co., Goldfield, Nev., registrar. Annual meeting, third Monday in December. Company was organized to acquire title to the property of the Blue Bull Mining Co., sold at sheriff's sale June 14, 1912. Latter company's stock was exchanged share for share for new stock on payment of 1c per share.

Property: 8 claims, 148 acres, in the Goldfield district, Esmeralda Co., Nev. **Development:** by a 730' shaft with workings on the 500 and 700' levels opening up the Victor and Blue Bull veins. Crosscuts have been run into the C. O. D. Consolidated Mining Co. ground under a leasing agreement. Commercial ore was found on the 500' level, but not on the 700'.

Property is a prospect.

REORGANIZED BOOTH MINING COMPANY OF GOLDFIELD**NEVADA**

Goldfield Nevada. **Officers:** Geo. Wingfield, v. p.; A. H. Howe, sec.-treas. with F. C. Favier, W. E. Zoebel and B. J. Henley, directors. A. I. D'Arcy, mgr.

Inc. 1912, in Nev., as a reorganization of the Booth Mng. Co. Stock was exchanged, share for share, on payment of 1c. **Cap.**, \$1,000,000; shares \$1 par; assessable: \$999,957 outstanding. Annual meeting, third Monday in December. Listed on San Francisco and Salt Lake City exchanges; traded in on New York Curb. Stock transferred at company's office. John S. Cook & Co., Goldfield, registrar. Control is held by Geo. Wingfield. Five assessments, aggregating 7c, have been levied: the fifth, 2c per share, was in January, 1915.

Financial statement from Dec. 23, 1914, to Dec. 1, 1915, shows receipts of \$245,447, which includes: Assessment No. 5, \$19,973; realized from mine rights, \$15,000; dividends on stocks owned, \$19,275; sale of capital assets, \$187,316; balance Dec. 23, 1914, \$3,681; miscellaneous, \$202. Disbursements totaled \$47,988, leaving a cash balance Dec. 1, 1915, of \$197,458. Cash balance on hand April 27, 1916, after payment of dividend No. 3 was \$222,320.

Dividends: No. 1, 5c per share, paid March 6, 1916; No. 2, 15c, on April 6; No. 3, 10c, on April 26; No. 4, 5c, on June 6, making a total of \$349,984.95.

The company's treasury is built upon the apex suit filed Feb., 1915, against Jumbo Extension, which see; as a result of this suit it was proven that the Reorganized Booth Mining Co. was the owner of all the ores in the same vein throughout the entire sweep of the extralateral lines, which included the Laguna claims of the Goldfield Cons. Mines Co., a considerable part of the property of the Reorganized Kewanas Mining Co., a part of the property of the Spearhead Gold Mining Co., a small part of one

of the claims of the Lone Star Cons. Mining Co., a considerable part of the property of the Goldfield Merger Mines Co., and other miscellaneous claims and fractions.

As a result of this litigation an agreement was entered into with the Goldfield Cons. whereby subsequent litigation between them was obviated; the production from the Goldfield Cons. ground had been at a time so remote that recovery for the bulk of the proceeds was found to have been barred by the statute of limitations. From Jumbo Extension the Reorganized Booth Co. received \$15,000 cash and 300,000 shares stock; from the Reorganized Kewanas the company received 250,000 shares stock; from the Goldfield Merger 750,000 shares stock. With regard to the Lone Star Cons., the extended north end line of the Booth claim only touched one corner of the Lone Star, which happened to contain the working shaft of that company; a settlement was effected for a nominal consideration only. No settlement, as yet, has been effected with the Spearhead Gold Mng. Co.

By Dec. 1, 1915, the company had disposed of 135,400 shares of Jumbo Ext. stock in the market, for which it received \$187,316; up to the present time it is said to have disposed of at least 224,000 shares.

Property: formerly owned by the old Booth Mining Co., consists of one claim adjoining the Red Top and Laguna mines of the Goldfield Cons. In Sept., 1915, all development work was suspended and it was reported the management would endeavor to purchase another property.

The company is said to have the distinction of being the only non-producing mine that receives an income without incurring the slightest expense for operating.

REORGANIZED CRACKER JACK MINING CO. NEVADA

Goldfield, Nev. Geo. C. Kremer, pres.; H. G. McMahon, sec. and supt. Inc. Dec. 18, 1915, in Nev. as a reorganization of the Cracker Jack Mining Co. Cap., \$150,000; shares 10c par; assessable; 1,440,000 outstanding. Listed on San Francisco Exchange. On Dec. 21, 1915, a call of 1c per share was made, each stockholder in the old company being required to pay the assessment before receiving share for share of the new company.

Property: 40 acres, patented, at Goldfield, adjoining Sandstorm-Kendall on the east; said to have had \$50,000 expended on it for development. In Jan., 1916, the company purchased the adjoining 3 claims, 60 acres, formerly owned by the Adams Gold Mining Co., which had been sold for taxes. Adams group has a vertical shaft 320' deep with levels at 115' and 300' depth. Reported in April that company had purchased an electric hoist, compressors and drills and would begin work at the Adams shaft. Property is a prospect.

REORGANIZED KEWANAS GOLD MINING CO. NEVADA

Address: A. H. Howe, sec.-treas., Goldfield, Nev.; Geo. Wingfield, pres.; A. I. D'Arcy, mgr.

Inc. July, 1913, in Nevada. Cap., \$1,500,000; shares \$1 par; all outstanding; assessable. Assessment No. 2, 1c per share, delinquent, Aug., 1916. Listed in Salt Lake City; traded on New York Curb.

Company is a reorganization of the Goldfield Kewanas Mining Co., which became bankrupt in 1913. As a result of the apex suit filed in 1915 by Reorganized Booth Mining Co., which see, the latter company received 250,000 shares Kewanas stock.

Statement issued June 25, 1916, showed: receipts—assessment No. 1, \$14,508; misc., \$209. Disbursements: \$7,257, which includes mine development, \$6,195; bank overdraft, March 15, 1916, \$9,281; leaving overdraft, June 25, 1916, \$1,822.

Property: 2 claims and a fraction, about 40 acres, east of the Laguna group of the Goldfield Cons. at Goldfield.

Development: by means of the winze on the Kewanas ground below an east crosscut into it from the 700' level of the Laguna shaft of the Goldfield Cons. Work up to July, 1916, consisted of exploration of the vein exposed on the 840' level; 550' N. of the winze the vein split, one branch

strikes N. W., the other N. E., with shale between. Both branches have been explored about 700' N. of the winze and work said to have disclosed a large vein, giving "good assay returns in gold, silver and copper." Assay results not reported. Up to July, no "large bodies of commercial ore have been exposed, but with the size of vein and values that have been obtained from portions of the vein, and the amount of unexplored ground still available along the strike of the vein on Kewanas claims, it would seem that the possibilities of encountering bodies of good ore are very favorable." Property is a prospect.

REPUBLIC CONSOLIDATED MINES CORPORATION

WASHINGTON

Republic, Ferry Co., Wash. **Officers:** A. B. Willard, pres.; A. J. Langhan, sec.; J. P. Burson, treas.; Geo. S. Bailey, gen. mgr. Is a reconstruction of Republic Mines Corporation.

Inc. in 1914 to take over the Lone Pine, Surprise and Pearl claims in the Eureka mining district in Ferry County; these claims were worked in 1910-1913 by the Republic Mines Corp., which is said to have produced over \$2,000,000 in gold and silver during the last 2 years it operated and before it went into bankruptcy in 1913. The Republic Cons. optioned the property in 1914 to a new company, the Western Union Mines Co., which operated for a short time and passed tranquilly away in 1915; this company was soon succeeded by another new company, the West Virginia Mining Co., which purchased some new machinery, operated a few months, and, like its predecessor, suffered a painless death, in Oct., 1915. The property reverted to the Republic Cons. Mines Co., which has since been operating it.

In July, 1916, the property was reported as shipping 200 tons daily to Trail, B. C. Is planning sinking a 2-compartment shaft to a depth of 1,000'. The property is said to have merit and could be operated profitably under competent management. For geology, see U. S. G. S. Bull. 550, pp. 150-162. Employs 40 men.

In July, 1916, Geo. S. Bailey, trustee in bankruptcy of the Republic Mines Corp., gave a deed to the 3 claims named above, receiving \$82,000 in final payment. At the same time, the Republic Cons. Corp. gave a mortgage on the claims to Jerome J. Day of Wallace, Idaho, to secure a loan of \$93,000, payable July 17, 1917. This mortgage gives the Day Bros. control of mining operations.

REPUBLIC MINES CO.

NEW MEXICO

Office: 526 Exchange Bldg., Denver, Colo. **Mine Office:** Lucero, Mora Co., N. M. **Officers:** Felix J. Woodward, pres.; Walter Littlefield, v. p.; Marcus Finch, sec.-treas. and gen. mgr.

Inc. Dec. 8, 1903, in Colorado. **Cap.**, \$500,000; increased, 1909, to \$1,000,000; shares \$1 par. Reported that Guanajuato Cons. Mining & Dev. Co. owns \$1,000,000 of the \$2,000,000 capital stock of Republic Mines Co.

Property: comprises about 7,500 acres, patented, half freehold and half under bond and lease. Claims are 30 miles from a railroad, stretching for 8 miles along Coyote creek, from Mora river to the adjacent mountains, showing a series of 3 parallel cupriferous beds of slate and arenaceous shale, alternating with limestone, having an approximately N.-S. strike. The lands are said to include coal, limestone and iron ore deposits.

Geology: there are 3 main beds, of 3 to 8' claimed average thickness, with 3 minor beds, said to show considerable chalcocite, claimed to give average assays of 8 to 17% copper, with an estimated average tenor of 6%. The company's "expert," Prof. Tyler, is said to have estimated the values of its orebodies, to depth of 350', at \$45,000,000. Though the surface showings are said to be attractive, the geological character of the deposit does not warrant a belief that the property will ever support such a statement.

Development: by shallow pits, with a 50' shaft and several tunnels, longest 650', with about 4,000' of workings.

Marcus Finch, sec.-treas., writes in Feb., 1916: "We refuse to give

you any facts in relation to our property, believing you to be incapable of publishing a fair, unbiased statement of facts." Our readers know that the Handbook publishes absolutely unbiased and fair reports and may draw their own conclusions from Mr. Finch's attitude.

Property idle.

REPUBLIC SMELTING CORPORATION CALIFORNIA

Idle. Office: Parker, Ariz. Mine in Riverside mountains, southern California. F. C. Fenner, pres.; R. G. Munn, sec. Cap., \$7,500,000; shares \$10 par.

Property: various claims, mill sites and placer land in the East Riverside mountains, 8 miles from Calzona, Bendigo district, said to show veins in limestone, cut by dikes and carrying copper-gold ores. The company had options on the Calzona, Jack Knife, Silver Dollar, Ox Bow, Gold Dollar and Jack Knife Extension mines, but failed to make the payments due. None of these properties have extensive development, but the surface indications are good and the shafts down to 100' and 150' give favorable results.

Secretary wrote Sept., 1913, that company is "out of business," but independent reports indicate that corporation is intact and owns a group of claims along the same contact zone as the Corem, Steece and Calzona properties. The former vice-president of the company, using the name of John Chestnut, sold 40,000 shares of stock in a preceding corporation and is said to have kept the money and fled the country. This action effectually stopped all plans for financing the company, although it had been reported on by several able engineers and metallurgists.

REQUA-SAVAGE GOLD MINING CO. COLORADO

Subsidiary of the United Gold Mines Co. Address: 112 Tejon St., Colorado Springs, Colo. Officers: J. S. Geyer, pres.; J. Yeomans, v. p.; A. Schumacher, sec.-treas.

Reincorporated Nov., 1915, as original incorporation had expired by limitation. Cap., 1,250,000 shares; 1c par; 413,000 shares in treasury Jan., 1916; also note, secured for \$1,713. Stock listed on Colorado Springs Exchange. Total dividends, \$8,070.

Property: Roman, Savage and Trojan claims, on Beacon Hill, and 1 acre on Gold Hill, Cripple Creek district, Colo., under lease, 1916. Developed by several shafts, deepest 700' and a 100' tunnel. Production to date, \$161,378.

RESCUE-EULA MINING CO. NEVADA

Offices: 265 Russ Bldg., San Francisco, California, and Tonopah, Nev. Officers: Chas. D. Laing, pres.; Herman Zadig, v. p.; with J. W. Dorsey, Joe Joseph and Wm. Edwards, directors. Chas. D. Olney, sec.; J. W. Chandler, gen. mgr.; J. Thomas, supt.

Inc. in Nev. Cap., \$1,500,000; outstanding, \$1,300,000; shares \$1 par; assessable. Stock transferred at company's office. Registration Surety Co., San Francisco, registrar. Listed on San Francisco and Salt Lake City exchanges and traded in on New York Curb. Assessment No. 8 was levied in Jan., 1915; total assessments to that time, \$120,000.

Property: the Rescue, Eula, Last Thought and Maggie May claims, 80 acres, at Tonopah, said to show silver-bearing ore in veins. Developed by an 1,100' shaft. Early in 1916 a body of milling ore was opened on the 950' level, which in July had been drifted on for 170'; 4 raises, highest 130', are said to be in ore. The 800 level is said to be the limit of the orebody above the 950' level; it has not been opened up below this level.

Shipments have been made since the finding of the orebody; production in April, 1916, said to have been 800 tons, yielding \$16,000, with net profits of \$12,000.

REVERE COPPER CO. MASSACHUSETTS

See Taunton-New Bedford Copper Co.

REVIAS CREEK MINING & POWER CO. MONTANA

Letter returned marked "defunct," 1916. Mine near Dixon, Mont.; fully described in Vol. XI, Copper Handbook.

REWARD-ARIZONA MINE**ARIZONA**

Is a copper property near Tucson and close to the Lake Shore mine that is being diamond drilled, 1916, by 350' hole at 45°.

Property has a 400' shaft in which much water was encountered, and pumps will be installed before crosscutting to reach the orebody.

REWARD GOLD MINES SYNDICATE**CALIFORNIA**

Address: G. Miller, supt., Manzanar, Inyo Co., Calif. A. Burnett and J. A. Summers, local representatives.

Property: the Eclipse gold mine, equipped with stamp mill, 1853, and with a reported output of \$3,000,000, and the Reward, Brown Monster, or Hirsch mine, originally a silver-lead mine, until free milling gold ore was discovered. Vein is a bedded one 4' thick between dark siliceous limestones.

Development: at Reward mine by 750' working tunnel, known as 7th level. The mine and the geology thereof are fully described by A. Knopf, Min. Res. of Inyo and White Mts., Calif., Bull. 540 U. S. Geol. Survey, p. 116, 1914.

Mine was formerly controlled by J. Levering Jones of Philadelphia, who sold it to Alex McCone of Los Angeles and Wm. Lambert.

REX CONSOLIDATED MINING CO.**IDAHO**

Offices: 120 Broadway, New York, and Wallace, Idaho. **Officers:** M. J. Sweeny, pres. and gen. mgr.; Robt. Sweeny, v. p. and treas.; B. F. Taylor, sec.; above with J. O. Stewart, L. E. Whicher, R. M. Atwater and E. P. Howard, directors; N. C. Sheridan, supt.

Inc. July, 1915, in Del. **Cap.**, \$1,500,000; shares \$1 par; outstanding, \$1,206,000. U. S. Corp. Co., 36 Nassau St., New York, transfer office and registrar. Annual meeting, second Monday in January. Listed on Spokane and Butte exchanges, Boston Curb, and traded in on New York Curb.

Annual report for year 1915 shows assets of \$1,510,177, which includes property, \$1,039,985; stock discount, \$112,500; development and equipment, \$28,652. Current liabilities reported as \$10,177.

Property: 2 groups of claims in Nine Mile section, Coeur d'Alene, including the Sixteen-to-One mine, 7 claims, 100 acres, at Nine Mile Creek, near the Cons. Interstate-Callahan and Success mines held under bond and lease. Was extensively developed years ago by the Finch-Campbell interests of Spokane, but increase of zinc values at depth made operations unprofitable. About 4 years ago the mine was reopened by another company and much money spent in equipment for deep exploration. Present option calls for \$150,000 if paid within one year, or, \$200,000 within 5 years. In Dec., 1915, this company took an option on the property of the Black Bear Cons., which see; after paying \$10,000, the option was relinquished.

The claims are in the slate belt, long considered valueless as an ore formation, until W. H. Weed attacked this view and demonstrated its falsity by work at the Interstate Callahan. The claims contain 2 strong veins, the Rex and Okanogon, 480' S. of and parallel to it. The former has been extensively opened, with 65,000 tons blocked out and four times this indicated, of a value of \$7.50 per ton. A strike made Aug. 16 on the Okanogon vein shows 3' of ore, opened by 25' of drifting, still in ore. A foot of this ore assays 35% lead and 6.3 oz. silver.

Development: tunnels with a 730' winze from the lowest tunnel, making a total depth of 1,330' in the mine, with 6,000' of underground workings. Crosscuts have been run on 80', 120' and 150' levels; most of the work has been done above the lower tunnel level. Present management unwatered the mine and commenced development in Dec., 1915. There is said to be a considerable tonnage of zinc-lead ore remaining in the old workings, but no ore reserves are reported.

Equipment: includes an electric hoist, 15-drill compressor of 1,100 cu. ft. capacity, driven by a 250 h. p. motor, pumps, and a \$150,000 mill of 250-ton daily capacity with slimes filtering and oil flotation equipment.

The mill will begin treating Rex ore in September, the lease to the Cons. Tamarack-Custer Mng. Co. having been canceled.

Company is deepening the winze 300' and crosscutting the 3 ore-bodies found in the upper workings. Although the ore contains silver, lead and zinc, the metal content was sufficient to operate profitably under former conditions. A mile tramway from mine to mill has been built. With the mill treating 150 tons per day for 300 days, the management assumes earnings of \$1,125 a day, or \$337,000 per year, equivalent to 27c a share on the 1,250,000 shares of issued stock. This estimate is apparently based upon present abnormally high metal prices.

REXALL SILVER & COPPER MINING CO. UTAH

Idle. Office: 1023 Kearns Bldg., Salt Lake City, Utah. Mine near Alta, Salt Lake Co., Utah. Officers: M. R. Evans, pres.; John Gallacher, v. p.; B. D. Hammill, sec.-treas., preceding with F. A. Price, directors.

Inc. 1906 in Utah. Cap., \$125,000; shares 25c par; 446,317 issued; assessable 1c per year, with 6 assessments levied. Annual meeting, first Monday in June. Listed on Salt Lake Exchange.

Property: 7 claims, patented, about 60 acres, adjoining the Cardiff mine, on the south fork of Big Cottonwood canyon, 17 miles from a railway. Development: by several pits and shafts and a 900' tunnel. Mine has about 1,300' of underground work; an 80' shaft reported to show well defined quartz vein, but company must sink to reach the soluble white limestone in which the Cottonwood ores occur. Idle and negotiating in the hopes of raising funds for deeper development. Reported in July, 1916, that company would merge with the adjoining Columbus Extension.

REY DEL ORO MINING CO. MEXICO

Dead. Property owned by International Investment Syndicate, L. A. Investment Bldg., Los Angeles, Calif.

REYNOLDS-ALASKA DEVELOPMENT CO. ALASKA

Office: 45 W. 34th St., New York. Mine office: Latouche, Latouche Island, Alaska. Officers: Marvin F. Butler, pres.; H. M. Coffin, v. p.; J. Frank Birdsall, sec.-treas.; preceding with A. E. Austin, Hon. J. G. Brady, L. S. Conabeer, John Yule, O. C. McGilvara, Geo. K. Hinds and G. B. Wirgman, directors.

Inc. 1903 in Washington. Cap., \$3,000,000; shares \$1 par; in \$1,000,000 cumulative 6% preferred stock and \$2,000,000 common stock. Authorized March 3, 1908, a \$500,000 twenty-year 6% gold bond issue; issued, \$125,000. Annual meeting, first Tuesday in April.

Property: 102 claims, about 2,000 acres, in Valdez district, Prince William Sound, Alaska. Company was in receiver's hands until June, 1910, when discharged by court order. Former management fully described in Vol. X, Copper Handbook.

The Boulder Bay group of 31 claims, 620 acres, is on the mainland at eastern side of Prince William Sound. Claims show a contact deposit between greenstone and slate, carrying chalcopyrite said to assay up to 11% copper and \$3 gold per ton, but averaging 2 to 4% copper. Developed by 2 tunnels. Equipment includes a 60-h. p. boiler and a 5-drill Rand air compressor. The Copper Mountain group of 9 claims is on Landlock bay, near Boulder bay.

The Iron Mountain group of 62 claims includes the Duchess and Blue Fox properties, on Horseshoe bay, Latouche Island. The Blue Fox mine has a 4' vein of ore, formerly claimed to average 7% copper, slightly developed by a shaft now filled with water.

The Duchess mine, last worked in 1911, when 400' of drifting was done on the lower tunnel, is developed by 2 tunnels, the upper a 375' drift tunnel, and the lower having 500' of drifts on the orebody, which has an average width of 25'. This group shows massive sulphide ore, estimated by the management to average about 3% copper. Assessment work only has been done since 1911. Company plans resuming work in the Duchess tunnels and patenting claims on Latouche Island in 1916.

Equipment: includes a 200-h. p. hydro-electric installation, with a flume

and steel pipe leading from Big Falls creek to a Pelton wheel, direct-connected to two 40-kw. generators; a 50-h. p. hoist and 2 Rand air compressors, of 5 drills aggregate capacity, with 6 air drills and 10 Ingersoll-Temple electric drills.

RHODE ISLAND COPPER CO.

MICHIGAN

Subsidiary of the Franklin Mining Co.

Office: 60 Congress St., Boston, Mass. Mine Office: Demmon, Houghton Co., Mich. Officers: R. M. Edwards, pres.; Henry Tolman, treas.; Albert L. Wyman, sec.; preceding with S. J. Jennings, H. M. Howard, Carlos W. Van Law and C. A. Hight, directors.

Inc. Dec. 9, 1898, in Michigan. Cap., \$2,500,000; shares \$25 par; paid in, \$10.50. Assessment No. 2, of \$1, was payable Jan. 14, 1907, and assessment No. 3, of 50c, was payable June 15, 1910. The Franklin Mining Co. owns 99,030 shares or 99% acquired by exchange of 3 shares Rhode Island for one of Franklin. Annual meeting, second Wednesday in April. No bonded debt. American Transfer Co., Boston, transfer agent.

Annual report for 1914 shows rents and cash on hand, \$320; borrowed from Franklin Mining Co., \$8,980; insurance, total receipts, \$10,322. Expenses amounted to \$127 at mine, \$1,436 taxes, balance being interest and incidentals.

Property: 800 acres, immediately north of the Franklin Junior mine. The ground has been explored by extensive diamond-drill work showing cores from the Mesnard epidote, Allouez conglomerate, Pewabic amygdaloid, Kearsarge amygdaloid, and other copper-bearing beds. All the formations lying between the Kearsarge amygdaloid and the Calumet conglomerate were drilled by a series of holes, the Calumet bed showing traces of copper. The first cores from the Kearsarge bed showed copper in somewhat encouraging quantities from a bed of about 19' width.

No. 1 shaft, 500' deep, is sunk on the Pewabic amygdaloid. This lode is 8 to 10' thick, of which 2 to 3' near the hanging wall is well mineralized but spotty in the 4 levels opened.

No. 2 shaft, 1,227' feet deep, has 10 levels, with a 125' winze below the 10th. The workings are north of the shaft, except on the 8th, 9th and 10th levels, the latter 2,400' long. The 8th level south develops a fair stretch of copper ground toward the Franklin Junior, and a 1,400' drift on the 8th level north showed 25 to 75' stretches of payable ground. The Rhode Island property is being developed by the Franklin Mining Co., at a depth of about 2,000', where the Pewabic bed averages 8 to 10' width.

The Albany & Boston, or Allouez conglomerate, has been opened by crosscuts on the 500' and 1,000' levels, but the showing secured was discouraging. A crosscut of about 250' length on the 10th level, about 1,100' south of No. 2 shaft, has disclosed an amygdaloidal bed of some promise. The east crosscut on the 8th level, at depth of 1,000' cut 2 apparently valueless beds, one being the Mesnard epidote. The East lode, about 5' wide, carries a little copper, but nothing of promise. The West lode, 96' from the Pewabic, is 7 to 9' wide, carrying occasional bunched copper. The 4 amygdaloidal beds lying between the West lode and the Allouez conglomerate have been tested by N.-S. drifts, 3 proving barren.

Equipment: includes a frame shaft house at No. 2, with an engine house having a Nordberg hoist capable of raising 2-ton skips from a quarter mile depth, and a 12-drill Rand air compressor. Buildings include a machine shop and smithy, warehouse and 15 dwellings.

The Rhode Island is idle and the plan of developing at greater depth through the north drifts of the Franklin is a good one, since the Pewabic bed to the south of the Rhode Island has shown great improvement below a depth of 2,000' in both the Mesnard shaft of the Quincy and the main shaft of the Franklin.

RICHARDS COPPER CO.

ARIZONA

Office: 206 Magee Bldg., Pittsburgh, Pa. Officers: Wm. J. Crittenden, pres.; Peter Boyd, v. p.; A. A. Lappe, sec.; D. N. Richards, treas., with

Jas. W. McClure, all of Pittsburgh, and Harry B. Staver, Chicago, directors.

Property and equipment of the Black Hills Copper Co., Ltd., was acquired at sheriff's sale by the Richards Copper Co., which owns all property in fee simple and has no debts. No definite plans of development have been decided upon to date.

Property: 9 claims, 6 patented, 280 acres, in the Verde district, between the United Verde and Equator mines. **Development:** by shafts of 212' and 675' and tunnels of 60' and 90', with 2,500' of openings. Main shaft, at 382', cut a stringer of ore assaying up to 13% copper and 3 oz. silver. Has a 280-h. p. steam plant, with 125-h. p. tubular high-pressure boiler, duplex pump, hoist and power drills. Did some work, 1905-07; since idle, owing to lack of funds. Property is well located, and late developments in district make claims valuable. Favorably considered if put in charge of competent engineer.

RICHFIELD COPPER CO.

MEXICO

Office: 812 Mears Bldg., Scranton, Pa. **Officers:** Dr. J. K. Bentley, pres.; Dalbys L. Fickes, sec.; Otto Robinson, treas.; preceding with Harry Witter, R. H. Gay, Geo. Stark, John Hershberger, Philip Robinson, J. A. Schadt, R. E. Mikesell, W. O. Smith, J. H. Wood and Jacob Huffer, directors.

Inc. 1902 in Arizona, as successor of Richfield Mining Co. **Cap.**, \$5,000,000; shares \$1 par; issued, 4,000,000. Bonds, \$250,000, authorized, at 6%; issued, \$230,000. Scranton Trust Co., registrar. Annual meeting, second Saturday in October.

Property: 1,300 acres of mineral property, with timber and ranch lands, total holdings 26,512 acres in the Ures district. The Dos Naciones group, 12 miles east of Tuape and 35 miles from a railway, is said to have 7 contact deposits between granite and limestone, of 10 to 60' estimated average width. **Development:** includes about 10,000' of underground work, showing oxidized ores and chalcopryite, reported by present management to average 4 to 15% copper, 7 to 40 oz. silver and \$2 to \$5 gold per ton. A body of good ore was reported at a depth of 350'.

Equipment: includes two 25-h. p. hoists and a 5-drill air compressor, several mine buildings and an 80-ton water-jacket smelter.

Shipments to the American Smelting & Refining Co. and Phelps, Dodge & Co. ran 9 to 10% copper, 10 to 32 oz. silver and \$2 to \$5 gold per ton. Management has been prevented from operating during the last years owing to revolutionary disturbances in Mexico, but plans resuming work when able.

RICHMOND & ANACONDA CONSOLIDATED MINING CO. UTAH

See Uncle Sam Consolidated Mining Co.

RICHMOND-EUREKA MINING CO.

NEVADA

Address: P. O. Box 385, Boston, Mass. **Officers:** W. G. Sharp, pres.; C. G. Rice, v. p.; F. W. Batchelder, sec.-treas.; above with Albert Fries, A. J. Seligman, C. A. Wimpfheimer, Frederick Lyon, John Laurie, directors.

Inc. Sept. 28, 1905, in Maine. **Cap.**, \$3,600,000; shares \$10 par. Annual meeting, 4th Wednesday in Sept.

Property: at Eureka, Nev., has been practically idle since 1910, when shipments of low-grade ore were stopped, owing to increased freight rates, which condition still obtains. Though the railway was reopened for traffic during 1912, the new company put the freight rates at figures largely in excess of even the old rates, which were prohibitive.

In 1915 efforts were made to find higher grade ores, but as yet no considerable tonnage of such ore has been developed.

RICHMOND MINING, MILLING & REDUCTION CO. MONTANA

Office: care Martin Waldson, pres., Scandinavian-American Bank, Spokane, Wash. Chas. J. Heidenreich, v. p.-gen. mgr., Saltese, Missoula Co., Mont.; W. S. Norman, sec.; Thos. McGowan, treas., with Dr. E. Richter, directors. **Cap.**, \$1,000,000.

Property: the Richmond mine, 6 claims, near Adair, 3 miles S. E. of

Saltese, on C. M. & St. P. R. R. Mine adjoins the Monitor mine, and is developed by 3 shafts, one 375' deep, the others 125' deep and connected. Orebodies reported to have width of 5-10' and to show for 160' in shaft. **Equipment:** includes a gasoline hoist and compressor, installed 1913. Vein, parallel to the Monitor, shows a persistent streak of copper glance in the shaft.

The property was a small producer for some years and was reopened, Sept., 1913, after many years of idleness. Shipped 5 cars of ore late 1915 said to have assayed 7-10% copper, \$4-\$7 gold, 2-3 oz. silver per ton. Shipments have been made of 30% copper ore for several months. Employs 6 men. Plans installing a \$15,000 aerial tram, 800' long from mine to railway bins.

RICO ARGENTINE MINING CO. COLORADO

Office: Mackintosh Block, Salt Lake City. **Mine address:** J. C. Jensen, mgr., Rico, Dolores Co., Colo. **Officers:** Charles Read, pres.; A. E. Rykert, v. p.; J. H. Woodmansee, sec.-treas.; S. A. King, L. O. Hoffmann, C. D. Ray, Fred. W. Price, directors.

Inc. 1911. **Cap.,** \$100,000; shares 10c par; 766,334 issued; assessable; assessment No. 4 of 1c per share levied August, 1916. Company is its own transfer agent and registrar. Listed on Salt Lake Exchange.

Property: the Black Hawk and Argentine groups, 21 claims, 145 acres, mostly patented, adjoining the Rico-Wellington Mining Co. property. Claims show alternating strata of limestone and sandstone, dipping at angle of about 30° and cut by almost vertical fissures of great extent and persistence. Where these fissures cross the soluble limestone they contain flat replacement deposits of sulphide ores carrying copper, zinc and lead with gold and silver values. The ore shoots or bedded deposits are from 3-30' thick. These fissures and the limestone are identical both in character and occurrence with those which are producing in the Rico-Argentine property.

A new tunnel, 200' lower than former workings, is reported to have cut 3' of ore opened by a 60' drift, June, 1916, also a shoot of copper ore bearing an 8" streak of \$40 ore.

A new campaign of development was begun in 1915 and the property promises to become an important producer in the near future.

RICO CONSOLIDATED MINES CO. COLORADO

Owned by Jesse Knight interests of Provo, Utah. C. A. Jensen, gen. mgr., Rico, Dolores Co., Colo. Listed on Salt Lake City Exchange.

Property: adjoining the Rico Argentine on the N. E., is said to show a vein of copper-silver-lead ore 35' wide in the upper workings. Company is driving a tunnel to gain 140' depth; in April, 1916, this tunnel was in over 300', with only a short distance to drive. Company has been making shipments, but they are not reported.

RICO MINING CO. COLORADO

Office: 9 Wall St., New York. **Mine office:** Rico, Dolores Co., Colo. **Officers:** Henry Godet, pres.; Wm. R. Sainsbury, sec.; Geo. E. Hicks, supt.

Inc. Oct. 25, 1911, in Colorado. **Cap.,** \$3,500,000; outstanding, \$260,000 preferred, \$1,750,000 common stock and \$480,000 first mortgage bonds; shares \$10 par. Company owns properties of the Pro Patria Mining & Milling Co. and the United Rico Mines Co., both dead.

Property: 156 claims, 1,110 acres with 20 acres mill site and 320 acres coal land, in the Pioneer district of Colorado. Ore occurs in fissure veins as replacements of lime. Claims are reported to show veins averaging from a few inches to 15' in width, a mile long and proven to a depth of 700'. Ores in one mine carry 4% copper, 10% lead, 10% zinc and 10 oz. silver, the copper ore occurring as chalcopyrite associated with pyrite, sphalerite and galena in fluoritic gangue.

Development: by tunnels, 1,000 to 3,000' long. Equipped with 125 hydro-electric power at mine and 100-h. p. at mill. There are two 75-h. p. hoists, 2 compound air compressors, 10 air drills and 1 air electric drill; two 9x15 Blake crushers, 18 Wilfley tables, etc.

Production: to date estimated at 1,200,000 lbs. copper. Operating in a

small way through leasing. Expects to start operations in Autumn of 1916.
RICO WELLINGTON MINING CO. COLORADO

Address: Jesse Knight, pres., Provo, Utah; Chas. Read, v. p.; W. Lester Mangum, sec.-treas.; Knight Starr Jordan, asst. sec.-treas.; C. J. Jensen, gen. mgr., with J. Wm. Knight and C. R. Bates, directors. H. R. Trenholm, supt.; E. B. Hayes, mill supt.

Inc. in Utah, Aug., 1911. Cap., \$1,000,000; shares \$1 par; 51% of stock owned by Knight Investment Co.

Treasurer's report for year ended Dec. 31, 1915, shows assets \$258,666, which includes mining property, \$241,600; cash and accounts receivable, \$5,019; liabilities, \$18,403, which includes \$13,054 owing the Knight Investment Co. Receipts totaled \$106,602 from ore settlements and expenditures \$69,020, leaving a net gain for the year's operations of \$37,582 and a total gain to date of \$140,262.

Since the property was taken over by its present owners it has earned \$300,000, has invested \$50,000 in a mill and expended \$100,000 in development work. The debt of \$150,000 advanced for this equipment and work was reduced to \$3,000 in June, 1916.

Property: the Wellington mine, at Rico, which contains ore-shoots formed by replacement and contact metamorphism in the limestone beds of the middle member of the Hermosa formation. In 1914 a flat deposit of zinc-lead ore was cut, 400' long on the dip, 50' wide along the strike and 7 to 8' thick. It lies parallel to the Black Hawk fault. To the north the orebody is cut off by a cross fault parallel to the Nellie Bly fault, the orebody north of the fault being 170' below. Across the Black Hawk fault a copper deposit, replacing limestone and broken by several faults, has been opened, the ore carrying good copper and silver values.

Development: consists of about 15,000' of underground work, reported to expose large amounts of lead-zinc and copper ore. Development for 1915 amounted to 5,985'.

Equipment: includes a 2,500' tram to the Rio Grande railroad, handling 50 tons per hour at a cost of 23 cts. per ton. The 100-ton mill, formerly belonging to the Pro Patria Co. and leased for 5 years, has been remodeled at a cost of nearly \$30,000. A tube mill, 5 Deister tables, 6 Callow tanks, 2 Callow screens and electrical equipment have been installed.

Production: for 1915 was 11,903 tons copper ore, netting \$105,722; 18 tons lead ore, netting \$212, and 628 tons of iron sulphide ore, netting \$2,515.

Property is a good one and, being managed by Jesse Knight, the company is assured of skillful, economical and up-to-date operation.

RIDGE & VALLEY MINING CO. UTAH

Address: 723 Kearns Bldg., Salt Lake City, Utah. **Mine office:** Eureka, Juab Co., Utah. **Officers:** Wm. R. Wallace, pres.; Jackson C. McChrystal, v. p.-mgr.; H. S. Auerbach, treas.; J. E. Berkley, sec.; J. H. McChrystal, supt., above with Sarah H. McChrystal, directors.

Cap., \$1,000,000; originally \$250,000, increased 1915 to \$500,000 and in 1916 to present amount.

Property: 39 claims, 443 acres, adjoining the Gemini property, and operated through the Gemini shaft for many years. Ores carry lead-silver-copper-gold values. **Development:** by 1,700' shaft, and extensive workings. Lessees extracting ore reported to assay 49% lead, 16 oz. silver. Recent work consists of drifting on vein, reported to be 70' wide, and continuous for several hundred feet.

RIGHT OF WAY MINES, LTD. ONTARIO

Office: 17½ Elgin St., Ottawa, Ont. **Officers:** E. Seybold, pres.; A. W. Fraser, v. p.; E. A. Larmouth, sec.-treas.; with C. J. Booth, directors. D. H. Angus, mine mgr.

Inc. Sept. 11, 1909, in Ont. Cap., \$2,000,000; shares \$1 par; outstanding \$1,685,500. Transfer office: 46 Elgin St., Ottawa, Ont. Annual meeting in February.

Annual report for 1915 shows gross receipts \$56,836; operating expenses, \$44,583; leaving a net profit of \$12,253; with interest, \$409, and \$527 brought

forward; balance on hand Dec. 31, 1915, \$13,189. A dividend of $\frac{1}{2}$ of 1%, calling for \$10,000, was paid March 15, 1916. Balance on hand, including concentrates, estimated April 15, as approximately, \$40,000.

Stock selling around 5c per share, 1916, sold in the boom days as high as \$10.50. The company has paid 65% on the old capital of 500,000 shares and the new capital of 2,000,000 shares.

Property: $3\frac{1}{2}$ acres, adjoining La Rose mine in Cobalt and mining rights under $3\frac{1}{2}$ miles of the right of way of the T. & N. O. Railway. The production of silver for a few years was important, but during the last two years little rich ore has been mined or discovered. During the past few months some high-grade ore has been shipped from the 75' and 120' levels. Mine is opened up to the 365' level. Twenty men are employed.

RILLA MINING CO.

COLORADO

Address: Samuel Klous, gen. mgr., 50 Congress St., Boston, and Breckenridge, Colo. **Officers:** Wm. A. Irving, pres.; Edson W. Noyes, v. p.; Frank S. Sinnick, sec.-treas.; above with Samuel Klous and Geo. S. Sinnick, directors.

Inc. Feb. 18, 1915, in Colo. **Cap.**, 1,000,000 shares, \$1 par; 500,000 in trust, 177,000 shares listed on Boston Curb, Jan., 1916. Annual meeting, third Wednesday in January. Company is practically a reorganization of the O'Reilly Gold Mining Co., capital being reduced from \$2,500,000.

Property: the Bay State group, 13 claims, 65 acres, on the north slope of North Star Mt., 8 miles from Breckenridge, Colo., is said to show copper, silver and gold ore in fissure veins in diorite and porphyry. The Witch Hazel vein is 8' wide. Porphyry dike cut 1916 is said to carry \$4 values for 18' in width and 1000' in length.

Development: tunnels, 1,300', 200', 100' and 60' in length. In the 1,300' tunnel a 200' crosscut is said to have cut a 6' vein of copper ore. Management claims that \$125,000 has been spent on development work. No ore reserves given. **Equipment:** 330 cu. ft. air compressor, electric power. Future plans provide for 100-ton mill and 2 additional compressors.

Is one of a new crop of Curb promotions of Boston. It is a tunnel proposition and is favorably regarded as a speculative venture.

RIO DOLORES MINING CO.

COLORADO

Rico, Dolores Co., Colo. Controlled by J. W. Burns. **Property:** adjoins Rico Wellington mine, north of Rico, and is said to show a 3' vein, carrying ore assaying up to 8% copper. Reported ready for operations, 1916. Needs funds for development.

RIO GRANDE & DOLORES SILVER MINING CO., LTD. MEXICO

Office: 37 Old Jewry, London, E. C., Eng. **Mine office:** Mineral de Guadalupe, La Union, Guerrero, Mex. **Lieut.-Col.** A. B. Haig, C. M. G., and Brooke Mockett, directors; A. Kitching, sec.

Inc. Dec. 11, 1877, in Great Britain. **Cap.**, £17,000; increased, Aug., 1881, from £10,000; shares £10 par, in £10,000 ordinary shares and £7,000 cumulative preference shares, fully issued and fully paid. After the payment of a 10% dividend on preference shares, remaining profits are divided equally. **Debentures**, £10,000, at 10%.

Property: La Nava mine, at Guadalupe, carrying copper ore, with values mainly in silver, developed by shaft and tunnel. **Equipment:** includes steam and water power, with a 20-ton mill and leaching plant. Property employs about 100 men, normally, but for several years active operation has been prevented by the Mexican revolution.

RIO PLATA MINING CO.

MEXICO

Office: 654 W. 51st St., New York. **Officers:** H. W. Miller, pres.; Archibald Nesbitt, v. p.; Jas. H. Lee, sec.-treas., with Geo. F. Parker, Jos. J. Bonneau, L. Bonneau, John C. Hanson, W. E. Green, Jos. Coult, R. N. Brundage, L. O. Hedden, David W. Shanks, directors.

Inc. April 7, 1906, in Ariz. **Cap.**, \$2,000,000; shares \$5 par; outstanding \$1,872,590. Stock transferred at company's office. New York Trust Co., New York, registrar. Annual meeting in Jan. at Phoenix, Ariz. Protocolization of the company completed Oct. 15, 1910.

In 1911 company acquired control of the Trinity Cons. Hydraulic Mining Co. in California.

Comparative General Balance Sheet (Year Ending Nov. 30)

Assets:

(d) Deficit.

Dividends: initial dividend, 1½%, paid Dec., 1909; quarterly dividends, 2%, from March, 1910, to Dec., 1911, inclusive; none in 1912; Feb. 1, 1913, 1%; none since.

Property: the lands and reduction works formerly owned by the Cia Minera de Rio de Plata, S. A., of Mexico, includes 187 acres mining land, 2,700 acres ranch and timber lands and water rights, located 6 miles S. of Guazapares, Chihuahua, and 350 miles from El Paso. Holdings include the Santo Nino, David, Santa Teresa, Santa Barbara, Cleopatra, La Ultima and Enrique silver mines. The ore occurs in the Santa Barbara fissure vein, dipping 17°, with average width of 4 to 6'.

Development: by tunnels, with about 3,000' of workings. Claimed to have \$2,000,000 in ore blocked out. **Equipment:** includes hydro-electric plant and an auxiliary steam plant, 25-stamp mill, 60-ton concentrator and an 80-ton cyanide plant.

Operations have been greatly interfered with on account of the revolution.

RIO TINTO COPPER CO.

MEXICO

Office: Perry Payne Bldg., Cleveland, Ohio. **Mine and works office:** Terrazas, Chihuahua, Mex. James Corrigan, gen. mgr.; H. A. Eye, supt.; Capt. M. D. Murray, mine supt.; H. L. Schneider, smelter supt.; J. M. Baker, smelter foreman; F. W. Topken, master mechanic. Inc. in Ohio, holding property through a subsidiary Mexican company, and is operated as a close corporation under the control of Corrigan, McKinney & Co. The Rio Tinto Mexicano mine and works were bought 1908, for a price said to have been \$187,500, and this company also took over the property formerly held by the San Rafael Copper Mining Co.

Property: about 25 miles north of Chihuahua City, comprises a main tract of 153 hectares, and a smaller tract of 6 hectares, including nearly all the developed mineral property of the Terrazas camp, except a few lead mines. The larger tract includes the Rio Tinto mine, and properties formerly worked by the Rio Tinto Mexicano Mining Co., Boston & Mexican Mining Co., Dragoon Mining Co. and San Rafael Copper Mining Co. The principal properties are the Rio Tinto Mexicano, San Rafael, Promontorio, Verde and Colombia mines, all connected underground. The company also owns the Savanarola group, at Savanarola, about 50 miles south of Chihuahua and 35 miles west of Ortiz, carrying silver-copper and lead ores.

The Rio Tinto Mexicano mine was opened 1860, closed 1902, and reopened 1905, and has been owned and operated by a number of different mining companies until purchased by the present company from Messrs. Enrique and Juan A. Creel. **Geology:** the mine shows contact deposits between limestone and altered andesite, there being 5 known orebodies in a metamorphic zone traced 1,500 metres, the orebody, with a minimum of 2', maximum of 100', and average of about 20' width, being erratic but of very large extent. Ore also occurs between the bedding planes of limestone, near a large quartz ledge, and the orebodies, while erratic in size and occurrence, are connected and practically continuous. The limestone has an average dip of 45° N.-W., and the property has also some silver-lead ore. Ore near surface is mainly oxidized, but sulphides occur below. The oxidized ores range 2 to 5% in copper tenor, with traces of lead and zinc, with an average of about 3% copper, 2 to 4 oz. silver and 30 to 75 cts. gold per ton. The gangue is mainly limestone, somewhat garnetiferous. Extensive diamond-drill borings show good orebodies.

Development: by a number of shafts to a depth of 440'; has about 3 miles of workings. The ground is firm, breaking well and requiring no timbering, pillars having been removed to give chambers up to 100' square.

The San Rafael mine has 2 shafts, the deeper being a 440' two-compartment shaft, known as the Verde. The Promontorio mine has 2 new shafts, nearly 1,000' apart, the main Promontorio shaft being 350' deep, with a surface gravity tram to ore bins. The Promontorio also has 2 old shafts. The Colombia mine has a 275' shaft, with about one-half mile of workings. Miscellaneous shafts include the Bronce of 120', Pedernal of 180', San Martin of 100' and Vinagre of 100'.

Equipment: includes steam and gas power. The San Rafael main shaft has two 100-h. p. boilers and a 100-h. p. hoist, with 4-drill and 14-drill air compressors. There are 5 gasoline hoists of 6 to 22 h. p. at various other shafts.

Ore is carried from mines to smelter by a mile long narrow-gauge railway, equipped with a 6-ton Porter locomotive and 5-ton iron ore cars.

Smelter: at Terrazas, 1 mile from the mine, connected by a one-half mile spur with the main line of the Mexican Central railroad, has two 300-ton 42x192" blast furnaces. The converter department has 1 stand and 3 shells, with a 40-ton electric traveling crane and a relining plant. The power plant has a 250-h. p. compound engine, direct-connected to a No. 8 Connersville blower, and a 100-kw. generator supplies current for the other machinery.

Production: 1906-1910 inclusive amounted to 9,150,000 lbs. copper; 27,000 metric tons smelted averaged 2.5% copper, mining cost being \$3.50 per ton, and smelting cost \$3.50 per ton, or a cost for finished copper of 12.5 cts. per lb. The ore, though low grade, exists in large quantities, and the mine bids fair to become a producer, capable of making 1,000,000 lbs. fine copper monthly.

The mine and smelter operated more or less continuously throughout 1912 and 1913, despite the revolutions which stopped almost all mining operations in this part of Mexico, but the intolerable conditions since then have kept it closed.

RIVERSIDE MINING CO.

IDAHO

T. R. Mason, pres., Kellogg, Idaho. Owned in Kellogg and Spokane. Claims in National Forest Reserve, at headwaters of the North Fork of Coeur d'Alene river.

Property: shows a 7' vein with 18" of high-grade silver-lead ore. **Development:** 460' crosscut tunnel with 100' back.

ROB ROY MINING CO.

UTAH

Mine near Beaver City, Utah, at mouth of Indian Creek Canyon. T. P. Farnsworth, Salt Lake City, owner. Developed to depth of 300'. Reported about to resume operations, 1916. Mine has produced very rich gold ore, but was closed down several years ago when the vein was cut off by faulting. Tunnel will be driven south in hopes of finding orebody.

ROBERT EMMET COPPER CO.**MONTANA**

Idle. Mine at Amazon, Jefferson Co., Mont. Wm. Q. Ranft, pres.; at last reports; John J. Schmitt, sec.-treas. **Cap.**: \$3,000,000; shares \$5 par.

Lands: 6 claims, patented, 90 acres, carrying veins in granite, not far from the andesite contact. The main vein has a generally N.-E. strike, developed by a 500' shaft, showing a shoot of ore on the 350' level. A 1,200' tunnel having about 1,000' of laterals shows a 10' vein carrying copper, silver and lead ore.

Equipment: includes 10-drill air compressor, electric plant, with transformers, for 60,000-volt current, taken from the Montana Power Co., the Robert Emmet Co. furnishing power to the Comet mine.

ROBERT LEE MINE.**NEW MEXICO**

Address: Pyramid Camp, via Lordsburg, Grant Co., N. M. Owned by Dan. Breil and Harry Small, of Lordsburg, N. M. Mine was operated in 1885 and was later purchased by Dr. Bartlett, inventor of the Bartlett concentrating table, who erected a mill and milled \$97,000 worth of ore. The claims show a well-defined quartz-calcite vein running N. E.-S. W. and dipping S. E., lying in a zone of altered and chloritized diorite porphyry.

Development: includes the old shaft, 250' deep, which has been reopened and shows in the lower level a streak of ore 2' thick, carrying 30% copper and 500 oz. silver. Sinking winze, 1915.

ROBERTA MINING & MILLING CO.**IDAHO**

Mine near Gem, Shoshone Co., Idaho. **Officers**: Jos. Lutey, Jr., pres.; E. V. Moran, sec.; W. C. Orton, treas.; Thos. Roberts, mgr.; preceding with Curtis Lewis and Alex. Penaluna, directors.

Property: 12 claims, patented, well timbered, on Nine Mile creek, carry 4 known veins.

Development: by tunnels, lower 300' long, to be driven 2,000' to give a back of 800' and to cut 4 veins, one of which shows lead and copper carbonates at surface, giving assays up to 6% copper, 10% lead, 16 oz. silver and \$3 gold per ton. Company's holdings are in the lead belt of the Coeur d'Alene. Working 1916.

ROCHER DE BOULE COPPER CO.**BRITISH COLUMBIA**

Office: 419 D. F. Walker Bldg., Salt Lake City, Utah. Mine at Hazelton, B. C. **Officers**, John F. Cowan, sec.-treas. and gen. mgr.; M. S. Brown, pres.; A. Fred Wey, v. p., and S. A. Douglass, directors. D. J. Williams, mgr.; J. A. Cowan, supt. **Inc.** Oct 15, 1911, in Arizona. **Cap.**, \$1,000,000; shares \$1 par; non-assessable; fully issued, fully paid. Listed on Butte Exchange. Annual meeting, Oct. 20.

Property: 6½ claims, crown grant, 325 acres with 50 acres mill site and 100 acres other lands, in Hazelton district, 9 miles from the Grand Trunk Pacific railroad. Ore occurs in fissure veins in granite, veins having an E.-W. strike with dip of 60°. Five ore-shoots being developed have average width of 5½', are 3,000' long and proven to depth of 150', according to management.

Development: by shaft and 800' tunnel estimated to have blocked out 25,000 tons of ore averaging 15% copper, 5 oz. silver and \$1.50 gold per ton. Copper occurs principally as chalcopryite and bornite.

Mine was under lease to Montana Continental Dev. Co. from 1913 to Feb., 1916. Lessees shipped about 17,000 tons of ore, 1915, averaging 7% copper and \$2.50 gold-silver, according to reports.

Equipped: with 240-h. p. hydro-electric plant, aerial and surface tramways, compressor and saw-mill by lessees who worked mine on royalty basis. Is a good mine with rich ore.

ROCHESTER BUCK & CHARLEY MINES CO.**NEVADA**

Lower Rochester, or Manhattan, Nev. **Officers**: C. H. Moyer, pres.; Frank L. Reber, v. p., sec. and treas.; with John Fant, C. E. Bugg and Wm. Lane, directors. F. L. Reber, mgr.

Inc. in Nevada. **Cap.**, \$1,000,000; outstanding, \$750,000; shares \$1 par. Annual meeting first Wednesday in April.

Property: 8 claims, 150 acres, in Rochester mining district, shows contact deposits 6-16' wide between rhyolite and limestone, said to carry gold, silver and some lead ore. Was discovered in 1913.

Development: 220' tunnel, with 600' of underground workings. Property worked by lessees in 1915. Production about \$41,000. Management is planning to put in an electric hoist.

ROCHESTER ELDA FINO MINING CO.

NEVADA

Offices: 702 Mutual Bank Bldg., San Francisco, Calif., and Rochester, Nev. **Officers:** Jos. F. Nenzel, pres.; Clay Peters, v. p.; with O. G. Stevens, directors. H. W. Hartmann, sec.

Inc. Feb. 8, 1915. **Cap.,** \$1,500,000; shares \$1 par. Annual meeting, last Wednesday in April. Management states operating expenses in 1915 were \$9,500.

Property: 2 claims, 30 acres, adjoining Rochester Mines Co on the east, said to show contact deposit 4' to 5' in width between rhyolite and felsite, carrying gold-silver ore.

Development: 3 shafts, deepest 190', with 300' of underground workings. Claims 500 tons ore blocked out.

Equipment: includes a hoist. Property is a prospect undergoing development.

ROCHESTER MERGER MINES CO.

NEVADA

Lovelock, Nev. **Officers:** W. C. Pitt, pres.; H. G. Humphrey, v. p.; C. H. McIntosh, sec.-treas.; with J. E. McCreary, and B. R. Binns, directors.

Cap., \$2,000,000; issued \$1,377,100; shares \$1 par. Listed on San Francisco Exchange.

Property: 22 claims, 350 acres, in 4 groups; original Rochester, Rochester Belmont, Widow Florence and Crown Point Extension, 2 groups in the Rochester mining district, Humboldt county. **Ore:** gold, silver. The original Rochester and Rochester Belmont groups are contiguous and adjoin Rochester Mines Co. on the west.

Development: by two tunnels, the Friedman tunnel crosscutting Rochester Merger ground for 1,560' before entering Rochester Mines Co. property and the Pitt tunnel (900' long), 1,200' north of the Friedman, supposed to cut the Broughton vein at a vertical depth of 500' and horizontal distance of 1,200'. The Pitt tunnel is reported by the management to have cut 2 veins, one of which has been drifted on for 265', in ore for 130', width 50' and average assay \$15 per ton. The Friedman tunnel, 1,500' long, May 1st, will serve both the Rochester Merger Mines Co. and the Rochester Mines Co. It is said to have cut 10 veins, 12' to 15' in width and drifting is being done on a few of these veins. **Equipment:** includes a 12-drill compressor, recently added.

Property is a mining venture, in the prospect class.

ROCHESTER MINES CO.

NEVADA

Lovelock, and Rochester, Nev. **Officers:** L. A. Friedman, pres. and gen. mgr.; H. J. Murrish, sec.-treas.; with W. C. Pitt, J. P. O'Brien, Sam Platt, Richard Hartley, directors.

Inc. Dec. 17, 1912, in Nev. **Cap.,** 2,250,000 shares; \$1 par; outstanding May 15, 1916, 2,148,791 shares. Secretary, Lovelock, Nev., and Security Transfer & Registrar Co., New York, transfer agts. Stock listed on San Francisco and Salt Lake City Exchanges and on New York Curb.

Mortgage: 8%, trust deed to C. Uniacke and A. John for \$70,000, dated Nov. 9, 1914, to cover 14 notes for \$5,000 each.

General Balance Sheet (May 15):

Assets:					
	Prop.-Dev.	Equip.	Current	Miscel.	Total
1916	\$2,028,157	\$133,586	\$40,722	\$1,133	\$2,203,598
Liabilities:					
	Cap. Stock	Surplus	Current	Total	
1916	\$2,148,791	\$24,451	\$30,356	\$2,203,598	

The income report for May 1, 1915, to May 15, 1916, shows bullion

sales, \$433,605, which with royalties and custom ore treatment totaled \$533,186. Mining and milling costs totaled \$433,732, leaving \$99,454 excess of income over mine and mill expenses.

Expenses, which amounted to \$46,807, included the following items: salaries, \$8,510; office expenses, \$6,391; printing and advertising, \$20,594; auto expense, \$3,542; traveling expense, \$2,467; legal expense, \$2,069.

Property: 14 claims, 3 patented, on Nenzel Hill, in the Rochester mining district, Humboldt Co., includes Weaver Mining Co. property bought 1915. Ore on Nenzel Hill was first discovered a decade ago, but little work was done at that time. In 1912 large bodies of \$50 to \$60 silver-gold ore were found and shipments started in a small way; in the Winter of 1913-1914 these shipments attracted attention and the town of Rochester came into existence.

Geology: ore deposits of Nenzel Hill occur as replacement veins along fissures and shear zones in sheeted rhyolite; veins vary from a few feet to 40' in width and range from 100' to 3,700' in length; strike N. to N. 30° E., dip 60° W. The west vein is the main ore carrier, showing an orebody 750' long, the shoot being 20' wide and averaging \$21 per ton, at a depth of 300'. The east vein shows 6-7' of \$25 ore, and on the 250' level showed 2' of \$160 ore. For geology see U. S. G. S. Bull. 580, p. 342.

Development: 20,660' of work, mostly by tunnels. In Feb., 1916, work consisted of 950' of shafts, 2,800' of tunnels, 600' of winzes, and several thousand feet of raises and drifts, with estimated ore reserves of 118,000 tons. The Friedman tunnel, crossing Rochester Merger ground on the west for 1,560' will be used jointly with that company by the Rochester Mines Co. On May 1, this tunnel was within a short distance of the property line; it will cut the veins at a depth of 1,200' several hundred feet below the present workings.

In March, 1915, company completed an up-to-date 10-stamp and cyanide mill in Rochester Canyon, almost 3 miles from the mines, with which it is connected by the Nevada Short Line narrow-gauge road. Mill was designed to treat 100 tons ore daily, but has been treating 120 to 150 tons; stamps, weigh 1,550 lbs. each, drop 100 times per min., extraction reported as about 92.87%; continuous counter-current decantation is employed. This plant is to be enlarged to treat 200 tons per day, 1916.

Production: 1913 and 1914 reported as 52,282 tons, yielding \$1,015,345, chiefly in silver; average value for entire production, \$19.52 per ton. In 1915, the mill operated 205 days, treated 23,090 tons ore, lessee and company account, yielding 3,131 oz. gold, and 545,959 oz. silver; ore averaged about \$15 per ton.

Costs, per ton, 1916 (5 mos.): mining, \$3.221; milling, \$2.288; indirect, \$0.827. Power: electric, obtained from the Nevada Valleys Power Co. Reserves are large, being reported as sufficient for several years' operation, with 10,000 tons broken in stopes.

ROCHESTER RAVEN MINES CO.

NEVADA

Lower Rochester, Humboldt Co., Nev. **Officers:** J. J. Morely, pres.; Frank L. Reber, v. p.; T. J. D. Galter, sec.-treas. and res. agt.; preceding with E. S. Howard, Frank Towelly and C. F. Harley, directors. **Cap.**, 1,000,000 shares, 25c par.

Property: 3 claims, in Lower Rochester district, operated by lessees who are reported as shipping ore with values of \$34 per ton in gold and silver. Said to have shipped \$10,000 gross worth of ore in first few months of 1916. Geologic conditions are similar to those of district in general. See U. S. G. S. Bull. 580, p. 325.

Plans include driving tunnel to prove orebodies to depth of 600'.

ROCHESTER TREASURE MINING CO.

NEVADA

Address: J. E. McGovern, sec.-treas., Rochester, Nev.; J. C. Colligen, pres.; J. W. Kromer, v. p.; John Golden and Harry J. Murrish, directors.

Inc. April 14, 1913, in Nevada. **Cap.**, \$1,500,000; \$1 par; 500,000 issued.

Property: the Old Relief mine, 5 claims, 95 acres in Relief canyon in Rochester district, shows a silver-bearing quartz vein 15-20' wide, cutting

limestone and running S. E., dipping 55° west and varying from 1 to 15' in width, with a pay shoot 2' thick.

Development: by 350' tunnel on vein and 280' tunnel with 200' back. Is a prospect.

ROCHESTER UNITED MINES CO.

NEVADA

Rochester, Humboldt Co., Nev. **Officers:** G. S. Johnson, pres. Reno, Nev.; C. F. Spilman, v. p.; A. J. Wright, sec.-treas.; with O. H. Bru and E. W. Orr, directors. C. C. Higgins, mgr. **Cap.**, 1,500,000 shares, issued 600,000.

Property: two groups, 13 claims, 200 acres, at Rochester; one group of 11 claims, 175 acres, adjoins property of Rochester Merger Mines Co. and Rochester Mines Co. on the south. Literature sent out by the promoters states "that it is so located as to command the extensions of the veins of both the Rochester Mines and Rochester Merger Mines Companies' properties." A study of the map shows it is very improbable that the veins opened up on property of Rochester Mines Co. cross any claims owned by Rochester United Mines Co., and the extent and value of the veins under development on Rochester Merger ground remains to be proven. Up to May, 1916, little, if any, development work had been done.

ROCK ROSE MINING & MILLING CO.

MONTANA

Officers: J. M. Nilan, pres., Helena, Mont.; H. C. Krug, v. p.-treas., Butler, Pa.; Andrew Weisner, sec., Helena, Mont.; R. A. Weisner, asst. sec. Inc. in Mont.

Property; 6 claims, 3 patented, adjoining Fort Harrison on east, near Helena, Mont., and 3 claims under option. Dandy claim has 117' shaft with 400' drift and crosscut exposes 2 veins, one of silver-lead, the other of gold ore. Galena vein is 6" to 4½' wide, averaging 2½'. **Ore:** silver lead carrying \$14.07 to \$57.79 per ton. A total of 196 tons of ore shipped in July, 1906, June, 1907, July, 1908, yielded \$4,234 smelter returns.

Development: by 100' shaft with a 125' drift, exposing ore for 75', in part lead and in part copper ore that carries 4½ to 10% copper. The gold vein is 2-3' wide and reported to average \$25 per ton, though none has been shipped. The vein is traceable by 6-7 pits for 378' across the claim.

Equipment: 80-h. p. boiler, compressor, etc., complete. Buildings include engine house, ore sorting house, boarding and bunk houses. The freight rate is but \$1 per ton for team, R. R. and loading. Water is handled by 1-2 hours pumping each day.

Property adjoins and is east of Helena Mine & Christmas Gift. Although lessees only shipped 190 tons hand picked ore in 2 years, the mine is shallow and worthy of development. Said to have had an offer for sale of property March, 1916, and if stockholders approve, deal will be completed at once.

District is an old one, but ore-shoots heretofore developed have faded out in depth.

ROCKY MOUNTAIN GOLDFIELD MINING CO.

COLORADO

Denver, Colo., and St. Elmo, Colo. **Property:** the Hayden, San Diego, Little Johnny and Nellie claims, at Baron Mountain, Chalk Creek district, Colo., said to carry several veins whose outcrop is owned for 4,500'. The mine is near several producers, including the Mary Murphy, credited with a \$25,000,000 production.

Development: 600' tunnel and 80' shaft on Hayden vein, and shallow shafts on others. The Nellie has made shipments of \$40 ore. A new 150-ton concentrating mill at St. Elmo will treat the ores.

ROCKY MOUNTAIN MINES CO.

NEW MEXICO

Office: care G. L. Brooks, pres., Albuquerque, N. M. Mine at Cerrillos, Santa Fe Co., N. M. H. O. Brooks, sec.; and E. L. Grose, directors.

Inc. Apr. 4, 1913, in N. M., to work property formerly owned by the Sunset Mining & Smelting Co. **Cap.**, \$1,000,000; shares \$1 par; non-assessable; 470,000 issued.

Property: 9 claims, 100 acres, in the Cerrillos district, held under lease

and bond. Claims show orebodies in zone of crushed monzonite and andesite, averaging 2-5' in width. Vein said to be continuous for 700'.

Development: by former companies, includes 3 shafts, 60 to 175' deep, and 3 drift tunnels, 120', 361' and 442' long, said to show ore carrying 0.30% copper, 8% lead, 14% zinc, 7 oz. silver and \$0.03 gold per ton. The Tom Payne claim is the only one now worked.

Equipment: includes a 12-h. p. hoist, several buildings and concentrator with 1 Dodge crusher, one Hardy and 5 Wilfley tables, 2 slime tables. Smelter, 6 miles from the mine, has not been operated by present company, but management planning to improve mill and work continuously, 1916.

ROCKY POINT CONS. MINES CO.

CALIFORNIA

Bishop, Inyo Co., Calif. **Officers:** Gaylord Wilshire, pres., 422 Hollingsworth Bldg., Los Angeles; Mrs. Mary Wilshire, v. p.; H. R. Kearns, sec.-treas. E. W. Walter, supt.

Inc. in Ariz. Cap., 1,000,000 shares; \$5 par; in treasury, 500,000.

Property: referred to under various names, Bishop Creek Gold Mine, Bishop Creek Milling Co., and Wilshire Bishop Creek Gold mine, consists of 99 claims, 12 patented, located on headwaters of Bishop Creek, 16 miles from Bishop. Claims are said to show a silicified shear zone 800' wide in granite: strike N. 50° W., dip 60° S. The vein is in the center of this zone, running N. 76° W., with no definite walls. It contains dense, banded quartz carrying very fine gold with some arsenopyrite and pyrrhotite. The mine, idle for several years, was unwatered in April, 1915, and operations resumed.

Development: 300' shaft with 2 levels, 1,000' of workings in all, claimed to disclose an orebody 20' wide and opened up for over 100' with face still in ore. Ore reserves estimated at 13,138 tons.

Equipment: includes a 70-h. p. electric hoist; Sullivan 12-drill compressor, pumps, Bleichert tramway and a 50-ton 10-stamp and cyanide mill. Recovery is 85% on \$11.40 ore, \$5.76 as concentrate, \$4 as cyanide recovery and a loss on tails of \$1.70.

Production: for 1915 reported as 6196 tons of \$11.34 ore. The ore carries 86.3% insol., 4.67% iron, 1.80% alumina, 2.60% lime, 1.70% sulphur, and 1% arsenic. Recovery was 85%. Closed down in Oct. for the winter.

In a suit recently brought by a stockholder to get access to the company books, and secure the names and addresses of 6,000 stockholders, it is claimed that Wilshire holds control of the stock; that there has been no stockholders' meeting since 1913 in London, when no quorum was present; that no financial statement has been furnished or has been accessible to the stockholders since Nov., 1913, and that an assessment of 5c was levied in order to pay indebtedness less than the amount secured by assessment. Wilshire is reported to have answered that the books were available for examination, and that the actual purpose of the investigation is to secure a list of stockholders for the purpose of inducing them to pay to the investigators a fee of 2 cts. per share for adjusting the affairs of the company and winding up the corporation.

It is reported that Wilshire proposes to reorganize as the Cons. Wilshire Mining Co., raising funds for enlargement of the mill by an assessment of 6 cts. per share.

Both the company and its president frequently appear in print, and the stockholders appear to have a long wait before their officers get down to actual mining and an attempt to pay dividends.

ROMERO MINING CO.

NEW MEXICO

Margarita Romero, owner, Las Vegas, N. M. **Property:** the Santa Nino claim at El Porvenir, San Miguel Co., N. M., has a deposit of copper-gold ore, developed by tunnel and shaft work. **Equipment:** includes steam power and a 10-ton King mill and rolls for concentration work. Shipped molybdenite ore, worth \$1.50 per lb., 1914.

ROSALIE COPPER CO.**ARIZONA**

Address: Haddock & Shackelford, 424 Dwight Bldg., Kansas City, Mo. Mine near Mayer, Yavapai Co., Ariz. G. C. Meese, Los Angeles, Calif., pres.-gen. mgr.

Inc. in Arizona. Cap., \$3,000,000; shares \$1 par.

Property: 9 claims, patented, 180 acres, in the Copper Creek district, 25 miles S. E. of Mayer and 18 miles from Cordes siding, the nearest rail point. The mine has numerous pits and shafts, and a 1,000' tunnel, developing a 2 to 7' vein carrying native copper, in the oxidized zone, followed by bornite, chalcopryrite and occasional chalcocite ores, said to assay 4.15 to 7.3% copper, with small gold and silver values. **Equipment:** includes a 50-h. p. gasoline engine and air compressor. Suspended operations in 1907, but preparing to resume, 1915. Not favorably regarded.

ROSE CONSOLIDATED MINING CO.**MONTANA**

Oscar Nordquist, mgr., Wallace, Idaho, with Sidney L. Shonts and Harold Childs of Wallace, acquired control of company in May, 1916.

Property: a gold-tungsten mine near Libby, equipped with mill, was reopened, Aug., 1916.

ROSEMONT COPPER CO.**ARIZONA**

Office: 11 Broadway, New York. Mine at Rosemont, Pima Co., Ariz. Is controlled by Adolph Lewisohn and Lewisohn Bros. The mine has numerous orebodies in limestone, occurring under geological conditions superficially similar to those at Bisbee. Company also owns claims at Helvetia, and others adjoining the Tiptop mine, near Helvetia, but the bulk of its holdings are on the east side of the Santa Rita mountains, west of the Rosemont postoffice. Company has a small smelter, long idle. Property regarded as promising.

ROSS MINING & MILLING CO.**COLORADO**

Idle many years and probably dead. **Office:** Ross Bldg., Waynesburg, Pa. Mines at Silverton, San Juan Co., Colo. The company has had much financial trouble, like its predecessors and collateral relatives in the chain of promotions. Fully described, Vol. XI, Copper Handbook.

ROSSLAND KOOTENAY MINING CO., LTD. BRITISH COLUMBIA

Idle since 1904. **Office:** Salisbury House, London, E. C., Eng. **Mine office:** Rossland, Trail district, B. C. C. Williamson Milne, chairman; Dr. G. Schack-Sommer and Lionel W. Harris, directors; Bedford McNeill, cons. engr.; F. A. Labouchere, sec.

Inc. May 17, 1902, in Great Britain, as a reconstruction of Rossland-Great Western Mines, Ltd., and Kootenay Mining Co., Ltd. **Cap., £150,000; shares £1 par; issued, £148,607.**

Property: 171 acres, at Rossland, carrying auriferous and argentiferous copper ores, of low grade, and 113 acres placer at West Kootenay. The company also owns 2,615 shares of the Santa Eulalia Development Co., Ltd., owning the Nueva Chihuahua property at Santa Eulalia, Chih., Mex. Revolutionary conditions have prevented any work for several years in Mexico.

ROUND MOUNTAIN MINING CO.**NEVADA**

Offices: 1011 First National Bank Bldg., San Francisco, and Round Mountain, Nye Co., Nev. **Officers:** L. D. Gordon, pres. and gen. mgr.; J. R. Davis, v. p.; H. G. Mayer, sec.-treas.; with W. H. Weber and Thos. Keane, directors. R. H. Ernest, supt.

Inc. March, 1906, in Nev. **Cap., \$1,000,000; increased to \$1,500,000 in 1914; shares \$1 par; outstanding, \$1,266,591.** Stock transferred in company's S. F. office. American National Bank, San Francisco, registrar. Annual meeting 3rd Monday in May. Listed on San Francisco and Nevada Exchanges.

Dividends: said to total \$363,000; the last one, 4c per share, was paid in August, 1913.

Annual report for year ending March 31, 1915, shows assets of \$1,896,646,

which includes: properties and rights, \$1,638,422; equipment, \$163,080; stocks, \$23,672; supplies, \$21,798; current, \$49,672.

Operating statement for 6 months, April 1 to Oct. 1, 1915:

(25,345 tons ore milled)		
Total revenue from lode operations.....	\$145,161	or \$5.73 per ton
Mining and milling costs	103,836	4.10
Net operating income	41,325	or 1.63 per ton
Depreciation	7,473	.29
Net lode operating profits	\$ 33,852	or 1.34 per ton
Placer operations:		
Bullion sales (from 18,150 yds.).....	33,102	or 1.82 per yd.
Placer operating costs	8,923	.49
Net placer profits	\$ 24,179	1.33 per yd.

Total cost of the Jett Creek pipe line, water rights and placer equipment, amounting to \$192,888, has been paid, and the company has no debts. Cash on hand, Sept. 30, 1915, \$7,545.

In 1914 company took over the Round Mountain Sphinx Mining Co., thus ending several years of litigation involving apex rights in the Los Gazabo claim.

Property: 910 acres, 242 patented, at Round Mountain, 60 miles N. E. of Tonopah, the nearest railroad point, contains large low-grade gold-silver deposits mined both by lode and placer operations. The deposits are replacements along fissures and sheeted zones in rhyolite, with E. W. strike, dip 15°; average width of lode ore, 8'.

Development: 1000' incline shaft, with about 7 miles of workings. Management reports a large tonnage of \$2 to \$7 ore blocked out in the mine.

Company has several hundred acres of placer ground and estimates 8 years required to work it; 67 acres have been tested and show values of \$1 per yd. Two monitors are used, tearing down and sluicing 1,200 to 1,500 yds. a day; main tail race is 2,700' long with two 600' laterals. The high pressure pipe line is 45,000' long, is spiral steel, commencing with 30" and reducing to 20", 18" and 16"; head 600' with 400 miner's inches of water. Operations started in June, 1915.

Equipment: includes two 50-h. p. hoists, Ingersoll-Rand compressor, electric power and 180-ton stamp mill.

Output: 369,482 tons to 1916. In 1915, ore milled averaged \$6 per ton. Company has an efficient management and has made a good record.

ROWLEY COPPER MINES CO. ARIZONA

Office: Baxter Springs, Kans. **Mine address:** Gila Bend, Maricopa Co., Ariz. **Officers:** T. H. Goodwin, pres.; Mrs. Dora Rowley, v. p.; J. T. McRuer, sec.; J. O. Goodwin, treas.

Inc. July, 1909, in Arizona. **Cap.**, \$10,000,000; shares \$1 par.

Property: 6 claims, unpatented, 120 acres, about 28 miles north of Gila Bend, developed by an inclined shaft to 80' below water level; is reported to have disclosed 3 strong veins of copper-gold ore. **Equipment:** includes 100-h. p. boiler, hoist, compressor, etc. Property was bought for \$20,000 cash and \$1,000,000 in stock, in 1910. Company is heavily overcapitalized. Closed down 1914, but reported starting work, 1915.

ROYAL BASIN MINING CO. MONTANA

Office: Makeever Bros., 170 Broadway, New York, and Journal Bldg., Boston, Mass. **Mine office:** Maxville, Granite Co., Mont. Walter Neal, mgr. **Cap.**, \$2,000,000; shares \$1 par; fully paid and non-assessable. The Montana Phosphate Co., formed in 1915 to treat phosphate beds near Maxville, is controlled by same interests as Royal Basin.

Property: the North Star mine of 2 lode claims, 90 acres, in Wymans gulch, within the Missoula forest reserve and 3 miles east of the Drummond branch of the N. P. R. R. Also owns the Northern Bell mine, a silver property near Princeton. Claims show a fissure vein 15 to 40' wide, in 3 upper tunnels, 100' vertically apart. A new lower tunnel is being driven which cut the vein 800' in and at a depth of 700'. At this point the vein

carries concentrating ore 12' wide with a paystreak of sulphide ore, assaying 7½% copper and 5 to 70 oz. silver per ton. The smelter returns for over 1,100 tons shipped showed 5.14% copper.

Mine is equipped with a leaching plant using sulphuric acid to get the copper into solution and depositing electrolytic copper as cathode plates in tanks, direct from the solution, by electrolytic current. This plant was designed by J. D. Fields, who built a similar plant for Capt. A. B. Wolvin at the Butte-Duluth mine in Butte, Mont.

While we have no details of this plant, the process, though simple and doing all that is claimed for it in the production of electrolytic copper, is not a cheap one when acid and electric power have to be purchased. Property considered promising, but advertising matter of fiscal agents is not favorably regarded.

Reported leased for 5 years, from April, 1916, to Northwest Cons. Mines Co., Spokane, Wash., and shipping in July, 1916.

ROYAL CONSOLIDATED COPPER CO.

NEVADA

Letter returned, 1915, from St. Louis, Mo., address. **Mine office:** Hawthorne, Esmeralda Co., Nev. **Officers:** L. L. Crisp, pres. and gen. mgr.; G. L. Werth, v. p.; R. E. Drake, sec.-treas.; B. H. Martens, supt.; preceding with Robt. W. Alt and Albert Lawson, directors.

Inc. April 27, 1907, in Arizona. **Cap.**, \$2,500,000; shares \$1 par; non-assessable; issued, \$1,434,477. Dec. 31, 1910. **Bonds:** \$300,000, authorized, at 7%; issued, \$2,300, Dec. 31, 1910. Annual meeting, first Monday in April.

There are two companies of this title, 1 an Arizona, the other a Nevada corporation, the Arizona company apparently holding stock in the Nevada operating company.

Property: 10 claims, 1 fractional, 200 acres, 8 miles from Luning and 16 miles from Hawthorne and Mina. According to the company's former expert, the formation is "dyarite," porphyry and limestone, with large "burns" of iron gossan, the ore deposits consisting of copper, gold and silver, lying in a fissure "cutting" a contact of porphyry and lime, the orebody being claimed to be 250' wide.

The company's past literature contains some ridiculous and misleading statements. Fully described Vol. XI., Copper Handbook. Unfavorably regarded.

ROYAL COPPER MINING CO., LTD.

MONTANA

Office: Wallace, Idaho. Mine near Belknap, Sanders Co., Mont. John H. Nordquist, pres.

Property: 12 claims, patented, near Thompson Falls, shows a vein of about 18' surface width, traced 1,500' on company land, carrying copper and lead carbonates and sulphides, said to average 6% copper and 18% lead, with small silver values. **Development:** by prospect tunnels of 50' and 600'. The property is a prospect on which assessment work only has been done for several years past.

ROYAL COPPER MINING & MILLING CO.

WASHINGTON

L. J. Winslow, pres. **Mine address:** Chewelah, Stevens Co., Wash. **Property:** 7 claims said to show 3 parallel ledges having slate and granite contacts. **Development:** by 400' tunnel said to show values in copper, lead, silver and gold. Property is a silver-lead mine with small amounts of copper.

ROYAL GOLD MINES CO.

CALIFORNIA

Offices: 50 Congress St., Boston, Mass., and Hodson, Calaveras Co., Calif. **Officers:** F. H. Thayer, pres.; H. M. Burton, v. p.; E. A. Fordyce, sec.-treas., with Jas. E. Simpson and F. W. Page, directors. F. W. Page, mgr., Hodson.

Inc. May, 1914, in Maine. **Cap.**, \$1,500,000; shares \$5 par; issued \$1,000,000. **Transfer office:** 50 Congress St., Boston. Federal Trust Co., Boston, registrar.

Property: 9 claims, 7 patented, 108 acres, in Salt Spring Valley at Hodson, 3 miles N. W. of Copperopolis, Calaveras Co., is on the west belt of

the Mother Lode. The property was operated extensively from 1895 to 1905, when it was closed down and in litigation for several years; rehabilitation was started by the present management in 1914; in June, 1915, the mill started operating 40 stamps.

Ore: low-grade gold quartz, occurs in a series of large lenses in a diabase dike; also numerous quartz stringers and veins intersecting the main Royal vein, which strikes N. 50° W. and dips 30° N. E. Ore zone reported to be 500' wide and 5,000' long, but explored for 1,000' only.

Development: an 1,100' 30° incline shaft, with 5,000' underground workings. Present management claims reserves of 5,000,000 tons of \$3 ore.

Equipment: includes an 80-h. p. boiler and two 150-h. p. boilers; a 1,500 cu. ft. compressor driven by 100-h. p. motor. Also a 120-stamp mill equipped with 1,150-lb. stamps, that can treat 600 tons per day; Standard concentrators, Wilfley tables and Johnston vanners.

Reported in March that mill was operating 40 stamps and treating 190 tons daily, and that production would be increased within 90 days to 400 tons daily. Employs about 100 men. Also reported that "stock must be considered speculative, and is not suitable for a woman's funds."

ROYAL MOUNTAIN MINING CO.

MONTANA

Absorbed by the Cactus Copper Co.

R. R. R. COPPER MINE.

ARIZONA

Described under Three R Mines.

RUBY COPPER CO.

ARIZONA

Office: 303 Midland Bldg., Kansas City, Mo. **Mine office:** Patagonia, Santa Cruz Co., Ariz. **Officers:** H. A. Sutermeister, pres.; F. D. Reasor, v. p.; C. E. Sweet, sec.; Chas. L. Cookson, treas.; preceding with A. E. White, R. W. Pierce, Harry J. Richards, F. P. Greenwood, and Dr. Emil Thielman, directors; C. A. Pierce, gen. mgr. and supt.

Inc. 1912 in Arizona. **Cap.,** \$2,000,000; shares \$1 par; issued, 1,210,855 shares. **Debentures,** \$200,000, at 6%; issued, \$67,460.

Property: the Lee group of 9 claims, 6 patented, about 12 miles N. of Patagonia. Claims show remnants of Tertiary lavas capping a series of limestones and other sedimentary rocks, altered by metamorphism and underlain by a dense black crystalline rock that carries ore. This rock, though seemingly devoid of crush zones or fissures, contains disseminated particles of chalcopyrite with occasional bunches and patches of high-grade ore assaying as high as 27% copper and 100 oz. silver per ton. This rock also holds kidneys, or globular masses of primary copper glance and bornite. Ores are estimated to average about 6% copper, 12 oz. silver and 11 cts. gold per ton.

Development: by 460' shaft and a drift tunnel, with about 5,000' of workings. The shaft is dry, unlike that of the Hosey mine to the N., and the Happy Jack to the S., both in higher ground.

Equipment: includes 30-h. p. gasoline hoist, Cameron pump and Leyner compressor. Idle 1915. Plans extending East drift on 460' level another 600', 1916.

RUBY COPPER MINING CO.

CALIFORNIA

Address: E. A. Walters, Eureka, Calif. **F. W. Belcher,** sec. **Mine near Korbelt, Humboldt Co., Calif. Property:** the Blind Lead and Ruby groups, 38 claims, 760 acres, unpatented, in Horse Mountain mining district; shows a copper deposit developed by a 1,000' tunnel. Ores are chalcopyrite, cuprite, chalcocite and bornite, with some black oxides and occasional gold values. Formation is serpentine with porphyritic diorite dikes and quartzite.

Company plans installation of concentrator in near future. Developed by 510' crosscut tunnel, 60' shaft and 250' of drifting. **Equipment:** several buildings. Mine is yet in development stage.

RUBY GOLD & COPPER CO.

ARIZONA

Mine near Parker, Yuma Co., Ariz. C. H. Ferry, director and chief owner; **W. E. Balcolm,** gen. mgr., at last accounts.

Property: the Billy Mack mine, 8 miles from Parker, covers an area of pre-Cambrian limestone and schist, whose beds dip steeply N. W. Ore occurs as a contact vein between schist and limestone, the deposit being an irregular replacement with no known connection between the small ore pockets. Ore consists chiefly of malachite, chrysocolla and specularite with porous quartz. In the main mine workings a bunch a few feet across consisted of a mass of needle malachite shot through with threads and stringers of gold. As a rule the ore, though often rich, occurs in short and very thin bunches and so far as known, does not afford a basis for profitable mining on a large scale.

Development: by 200' shaft with levels at 100', 150', and 200' below surface, and by several lesser prospect tunnels and inclines. Was developing, 1915, and is reported to have struck large orebody on 200' level, averaging \$20 per ton in copper-gold values.

RUBY KING COPPER CO.

CALIFORNIA

Mine near Ladoga, Colusa Co., Calif. Although generally known as a copper mine, no copper ore has as yet been discovered and property is operated as a mineral paint mine, by the Ruby King Mineral Paint Co., 1027 Eighth St., Sacramento, Calif.

Property: 6 patented claims, developed by 1,200' shaft and 1,000' tunnel. Ore is iron oxide containing a small percentage of cinnabar. **Production:** 500 tons in 1914.

RUBY MINING CO.

WASHINGTON

Mine and home office: Nighthawk, Okanogan Co., Wash. **Eastern office:** Mansfield, Ohio. **Officers:** Monroe Harman, pres. and gen. mgr.; Jas. A. Hower, v. p.; Chas. B. Bushnell, sec.-treas.; preceding with Dr. S. P. Ecki and M. L. Branyan, directors.

Inc. Nov. 5, 1902, in Washington. **Cap.**, \$1,500,000; shares \$1 par; non-assessable; issued, \$1,175,000. **Bonds:** \$100,000 authorized, at 7% maturing 1915; issued, \$35,100. Annual meeting, second Tuesday in June.

Property: 7 claims, unpatented, 136 acres, with 46 acres miscellaneous freehold lands, on Mt. Chopaca, near the Similkameen river, 3 miles south of the international boundary and within 600' of the Great Northern railroad. Claims show syenite, cut by veins containing lenticular orebodies running N. W.-S. E. and dipping at 47°. The vein under development is about 4' thick, traceable for 1,000', and carries cupriferous ore stated by management to assay 0.5 to 10% copper, 1.5% lead, 2.5% zinc, 5 to 2,800 oz. silver, and from a trace to \$4 gold per ton.

Development: by 3 crosscut tunnels with drifts on the vein. The main working tunnel, 300' below the old workings and about 350' below the outcrop, is 1,110' long, and has 550' of drifting on the vein and an equal amount of drifting run from a 100' upraise. An inclined shaft sunk on the vein from the lower tunnel has short levels at 100' and 200' depth. **Ore reserves:** estimated at 135,000 tons of ore blocked out, carrying 30 oz. silver besides copper and gold values and which it is believed can be profitably mined and milled.

Equipment: includes a 15-h. p. electric hoist and 5 buildings. Company's report shows a total expenditure at the mine from beginning of work to April 28, 1913, of \$118,000, of which ore sales furnished \$17,062, bonds \$35,100 and stockholders (175,000 shares) \$65,838.

Property promises to make a good small mine.

RUBY MINING & MILLING CO.

COLORADO

Weston Pass, Leadville, Colo. Is a new company holding a 5-year bond and lease on the Erie Mines Co. property, comprising the Ruby & Lafayette mines on Bull Hill. Mines show much ore in old workings, whose value has been tested in the Wild Horse mill. Company has erected a cyanide plant, known as the Worcester mill, near the Ruby dump. Shipments of calamine ore were made early in 1916.

RUBY SILVER MINING & DEVELOPMENT CO. NEVADA

Office: 15 Broad St., New York; George W. Abel, pres. Cap., 1,000,000 shares, \$1 par; 600,000 outstanding.

Property: 260 acres in the Lewis mining district, Lander Co., Nev., reported to have "opened a substantial ore-shoot" to a depth of 580', and to have found "excellent values" in the 4 tunnels which have been driven to intersect this orebody at various depths. Property is fully equipped. Management states a 50-ton flotation unit is being added to equipment. The mine has been operating for several years and in May, 1916, was brought out by one of the Broad St. (New York) brokers.

RUDOLPH LAND CO.**WISCONSIN**

Idle. Mine near Gordon, Douglas Co., Wis. Inc. 1905, as successor of Minong Range Copper Co. **Property:** 12 miles from Gordon, is in Secs. 11, 12, 13 and 14, T. 43 N., R. 10 W., on the southern fold of the Keweenaw syncline. **Development:** by two shafts, deepest 350', sunk at an angle of 36°, on a dark amygdaloidal trap bed carrying small quantities of native copper. Equipment includes a 6-stamp mill. Property fully described under title of Minong Range Copper Co., Vol. III., Copper Handbook.

RUSH & BROWN GROUP.**ALASKA**

Address: Kasaan, Prince of Wales island, Alaska. U. S. Rush, mgr., and Geo. F. Brown, owners.

Property: 9 claims, 180 acres and 5-acre mill site, near the end of Kasaan bay, 8 miles N. W. of Kasaan. The claims show greenstone intruded by granodiorite and carry three orebodies, 2 in an E. W. shear zone in the greenstone, the third orebody along the greenstone-diorite contact. The latter carries magnetite-chalcopryite ore in a body of unknown extent, but opened for 200' in length, width of 63' and to a depth of 63'.

One shear zone contains the "Sulphide" body. The ore occurs as massive chalcopryite in stringers, bunches and lenses, and also as a commercial impregnation of the greenstone and chloritic schists. The massive chalcopryite without waste, assays 20% to 30% copper, with \$12 to \$18 gold. The lenticular shoots of the clean ore run with the shear zone, and are as much as 7' thick. Pyrite, quartz and calcite are practically absent. The sulphide body, in which these lenses occur, has an average width of 14', varying from 8' to 20' between walls. It has been developed to a depth of 250', and for a length of 170' on the 100' level; 345' on the 200' level, and 90' on the 250' level, with drifts on ore both ways from a winze on the 250' level.

On the footwall side, and at a distance of 30' from the hanging wall, a parallel short vein, evidently in the same shear zone, has been exposed for 45' on the 200' level.

Development: exclusive of stopes amounts to 2,000', of which 1,090' are in ore. It includes a 177' shaft with 1,350' of drifting on the 1st and 2nd levels, and a 50' winze from 2nd level to 250' level.

Equipment: includes a steam plant with hoist and necessary mine buildings. Ore is taken over a 3-mile private railway of 42" gauge to Venus bay.

Work was suspended, 1907, because of the depression of the metal market and was resumed July, 1910.

Production: for 1912 was about 700,000 lbs. fine copper, with small gold and silver values; 1,900 tons shipped in 1914. About 30,000 tons of ore have been shipped from the mine. Smelter returns for four years reported to range between 3.31%-7.1% copper, 0.12-0.20 oz. gold, and 0.52-1.03 oz. silver. Mine considered promising.

RYE PATCH MINING & LEASING CO.**NEVADA**

Address: S. A. Greenwood, sec., 423 Douglas Ave., Salt Lake City, Utah. Mine at Rye Patch, Humboldt Co., Nev. C. A. Conklin, pres.; David W. Jeffs, gen. mgr.

Inc. 1910, in Utah, as a reorganization of the Rye Patch Consolidated Mines Co. Cap., \$250,000; shares 25 cts. par, assessable.

Property: 6 claims, patented, held under a 7-year lease. Mine is 14 miles from a railway, and is said to have been worked extensively prior to 1873, with a reputed production of \$12,000,000 in silver. **Development:** by 1,200' tunnel, in which the present company started new work and developed a 14" vein of extremely rich silver ore carrying 4 to 9% copper.

Equipment: includes a 10-stamp mill with a concentrator.

SACAJEWEA GOLD & COPPER MINING CO.

MONTANA

Office: 11 Broadway, New York. Mine near Helena, Mont. Col. Henry Altman, pres. and gen. mgr.; W. J. Anson, sec. **Cap.** \$3,000,000; shares \$10 par.

Property: 47 claims in the Scratch Gravel district, adjoining the Copper-Silver-Montana Mining Co. Idle some years, but work resumed 1916.

SACRAMENTO VALLEY COPPER CO.

CALIFORNIA

Office: S. W. Winn, fiscal agent, 135 Broadway, New York. Thos. G. El Patton, sec., P. O. Box 296, Placerville, Cal. Mine office: Greenwood, El Dorado Co., Calif. **Officers:** L. H. Wilkins, pres.; A. B. Wilkins, v. p.; Wm. Sheriff, v. p.; W. R. Usher, asst. sec., 135 Broadway, New York, with F. C. Voorhies and Donald Woodrum, directors.

Inc. in Arizona. **Cap.** \$1,000,000; shares \$1 par; fully paid; non-assessable.

Property: Shamrock group of 24 claims, about 492 acres, in Sec. 24, T. 12 N., R. 9 E., in the Greenwood district 42 miles N. E. of Sacramento. **Geology:** Property shows an extensive series of sedimentary rocks with igneous rocks of various ages, intercalated with the sedimentaries, or more commonly occurring as intrusives. Ores occur as sulphide deposits in contact and shear zones, the latter flat-lying, with chalcopryrite disseminated in pyrite, and almost invariably containing gold and silver, but low in copper tenor.

The mine has an 80' shaft, and several short tunnels. There is no power equipment. Management claims ore will average 6-8% copper per ton, with value of "the 100,000,000 pounds of ore ready for mining and shipment at present price copper \$2,950,000 (amount so blocked out is less than 1% of total orebody)"; all of which is grossly exaggerated and misrepresentative. Property is inactive at present; management raising money to begin operations which they hope to start in September, 1916. Among the contemplated improvements is a 250-ton smelter to be built "when the profits estimated would exceed \$1,000,000 per annum." The property has some merit, but it will be many years before the smelter is built under the above conditions.

SADDLE MOUNTAIN MINING CO.

ARIZONA

Office: 902 Chapel St., New Haven, Conn. **Officers:** Frank M. Travis, pres.; Everard Thompson, sec.-treas.

Inc. 1902, in Arizona. **Cap.**, \$2,500,000, increased from \$1,000,000; shares \$1 par; outstanding 1,306,585 shares. **Bonds:** \$1,000,000, first-mortgage, 6%, due July 1, 1918, which have been assumed by the Gila Copper Sulphide Co.

Property consists only of \$300,000 of the capital stock of the Gila Copper Sulphide Co., which acquired in October, 1909, the property of the Saddle Mtn. Mining Co., subject to its authorized outstanding first mortgage bond issue of \$1,000,000, all of which was exchanged in 1915 for the \$1,000,000 first mortgage 6% bond issue of Gila Copper Sulphide Co., due Oct. 1, 1918, convertible at par into stock of Gila Copper Sulphide Co. Interest payable April 1 and October 1. Fully described Vol. VIII, Copper Handbook.

SAFFORD COPPER CO.

NEVADA

Office: 67 Milk St., Boston, Mass. **Officers:** Jas. H. Kimball, pres.; Jas.

S. Whitelock, v. p.; Owen Goldsmith, treas.; Frank W. Smith, supt.; preceding officers are the directors.

Inc. 1915. Cap., \$300,000; shares \$1 par. Metropolitan Trust Co., Boston, transfer agents.

Property: 4 claims in Safford Mining district, Eureka Co., Nev., said to show copper-silver ore in quartz veins from 18"-30" wide, traversing porphyry and rhyolite formation.

Development: by 2 shafts, 30' and 80' deep, on the Evening Star claim. Developing in 1916. Merely a prospect.

SAGAMORE MINING CO.

CALIFORNIA

Idle. Offices: Third and Chestnut Sts., Philadelphia, Pa., and 401 1st Natl. Bank Bldg., Riverside Calif. Mine near Purdy, San Bernardino Co., Cal. Norman P. Sloan, pres. and mgr.

Property: 8 claims, 160 acres, known as the New York mine, 5 miles S. E. of Manvel, in the New York mountains, an extension of the Providence range, shows limestone, quartzite and schist, with intrusive dikes of rhyolite and felsite along which the principal veins are found. Ores found in the quartzite are gold bearing, the silver and copper ores being in limestone.

Development: by shafts of 30', 45', 100' and 150' and several tunnels. longest being 454', showing a number of veins ranging from 18" to 4' in width. A complete report on the property was made, 1902, by Carl Andersen.

Equipment: includes gasline power and a 50-ton mill.

SAGINAW COPPER CO.

MONTANA

Jackson, Beaverhead Co., Mont. **Officers:** Geo. North, pres.; E. M. Frank, sec.-treas.; with Elmer North and Kenneth Campbell, directors.

Inc. Jan., 1916, in Montana. Cap., \$125,000; shares \$25 par.

Property: 5 claims, including the Saginaw mine, in Beaverhead Co., shows fissure veins in porphyry, with E.-W. strike, dip 35° and 3' average width. Developed by a 300' incline shaft. **Equipment:** includes steam hoist. Management reports shipment of 19 cars ore in 1915, average assay, 11% copper.

SAINT ANTHONY MINES CO. (Tungsten)

NEVADA

Operating a 75-ton mill at Toy, 21 miles S. W. of Lovelock, on ore from an 8' vein of 3% scheelite. Producing 20 tons daily from another mine near Sodaville, Mineral Co., Nev., the latter ores being shipped to a concentration mill near Luning.

SAINT ANTHONY MINING CO.

NEVADA

Good Springs, Clark Co., Nev. Jos. Dederichs, gen. mgr. and chief owner. **Property:** 7 claims, 140 acres, in the Yellow Pine mining district, 2½ miles W. of Goodsprings. Ore is said to assay 10% to 18% copper in orebodies up to 15' in width. Developed by 2 incline shafts, 240' and 175' deep, located 500' apart. **Equipment:** includes 2 gasoline hoists and an aerial tram 850' long.

Production: to June, 1915, reported as \$60,000. Reported shipping one car of ore every 6 weeks.

ST. ANTHONY TUNGSTEN MINES.

NEVADA

See Toy Tungsten.

ST. CROIX CONSOLIDATED COPPER CO.

WISCONSIN

Superior, Douglas Co., Wis. **Officers:** Robt. Kelley, pres.; Dr. A. S. Andrews, v. p.; W. W. Strickland, sec.; Ernest A. Arnold, treas. and managing director. **Inc. 1903, in Wisconsin. Cap., \$1,500,000; shares \$1 par; nonassessable.**

Property: about 15,000 acres, 35 miles south of Lake Superior, on the St. Croix range, carries the western extension of the Keweenaw copper belt of Lake Superior. The corporation is a land-holding company that has done no mining work and plans none.

ST. EUGENE MINE.**BRITISH COLUMBIA**

See Consolidated Mining & Smelting Co. of Canada, Ltd.

SAINT FRANCOIS LEAD CO.**MISSOURI**

Leadwood, St. Francois Co., Mo. Inc. in Maine. Cap., \$500,000. Operates 350 acres land in St. Francois county, showing lead-zinc ore at 400' depth. Company ships the crude ore to plant of the St. Louis Smelting & Refining Co. Ignores requests for information.

SAINT JAMES MINING & MILLING CO.**IDAHO**

Mrs. Theresa James, mgr., Wallace, Idaho. Inc. 1911, in Idaho. Cap., \$1,000,000; shares \$1 par.

Property: the St. James mine, comprising the Ula and Try Me claims on Sunset peak near Wallace. Ore: carries lead and zinc. In Nov., 1915, reported as driving a lower tunnel to give a vertical depth of 800' on the vein; tunnel was in 100' with 500' to go. A 2' vein of high-grade zinc ore was reported in the bottom of a 60' shaft.

ST. JOE GOLD-COPPER M. & M. CO.**MONTANA**

Office: Wallace, Idaho. Property: 9 claims, well timbered, on Kelly creek, near Saltese, 3 miles west of the Monitor mine, and one-half mile from a railroad, showing 2 strong ledges. Idle some years.

ST. JOHN MINES (COLORADO), LTD.**COLORADO**

Edwin H. Platt, mgr., Equitable Bldg., Denver, Colo. M. F. Bremer, Broad St. House, E. C., London, Eng., sec.; Geo. A. Williamson, chairman; with Herbert Weld-Blundell, E. J. Nicholas, Chas. P. Winterton, directors.

Inc. Feb. 13, 1913. Cap., £75,000; shares 5 s. par; all issued and fully paid.

Property: company was organized to acquire from E. L. A. Munby and E. J. Munby, the St. John silver-lead-zinc mines, 19 claims, 100 acres, together with concentrator, located on the west side of Glacier Mt., 1½ miles south of Montezuma, Summit Co. Purchase price was £58,250, payable £3,000 cash and £30,000 in fully-paid shares for the property and £20,000 cash and £5,250 in fully paid shares to the promoters, the Tres Forcas Synd., Ltd.

In addition the company owns 50 acres timber land within a mile of the mining property. The bulk of St. John ore is milling grade; small shipments of high-grade ore, £4 to £7 per ton, coming from development work, were being made in February. Ore on dump, in stope fillings, and in the mine estimated at over 100,000 tons.

Company also holds an option on the Revenue Tunnel group of mines, 600 acres, in the Ouray district; this property includes the Virginus mine which is reported as having 400,000 tons of stope filling and 50,000 tons probable ore below the tunnel level. The purchase price of this property is \$187,000 of which \$85,000 has been paid. To provide for further payments a loan of £25,000 was decided upon; to Feb. £10,000 of this has been subscribed to. The undeveloped portion of this property was sold in Nov., 1915, for \$75,000.

In Sept., 1915, a 1/3 interest was acquired in the Hilltop mine at Leadville, said to be producing high-grade zinc carbonate ore, £8 to £9 per ton, until forced to close temporarily owing to the weather; the mine is at an altitude of 13,000'.

The company holds a 2/5 interest in the Ruby mine at Leadville. Production started in Dec., 1916, and in Feb. was returning a profit of £40 per day. A lease is also held on the Shamrock, Mt. Sneffels and Lake claims.

SAINT JOHNS MINES CO. (quicksilver) CALIFORNIA

Address: Box 606, Vallejo, Calif. Officers: C. G. Dennis, pres. and mgr.; John Martin, v. p.; C. F. Colmar, sec.

Inc. June, 1914, in Calif. Cap., \$150,000; shares \$1 par; outstanding, \$90,000. Transfer office: 600 Call Bldg., San Francisco. Annual meeting, January 1.

Condensed balance sheet for 1915 shows: assets, \$110,778. Liabilities include: capital stock, \$90,000; surplus, \$10,782; other liabilities, \$9,996. Gross earnings to Jan. 1, 1916, reported as \$55,239 with operating expenses of \$40,958.

Property: 713 acres on Soscol ranch, 6 miles N. E. of Vallejo, Solano Co., is said to show cinnabar ore occurring as bunches in sandstone and shale over a width of 2' to 30'. Developed by 320' shaft and tunnels; greatest depth of workings, 320'. Management reports 12,000 tons ore blocked out, average assay 0.40% quicksilver.

Equipment: includes a 25-h. p. gasoline hoist, two 7½-ton Neate and one 15-ton Scott furnace, capacity 30 tons daily.

Production: to Jan. 1, 1916, 7,000 tons ore, yielding 64,432 lbs. quicksilver; 9.27 lbs. recovered per ton of ore; cost per 75 lb. flask, \$52.44.

ST. JOSEPH LEAD CO. MISSOURI

Offices: 61 Broadway, New York and Bonne Terre, Mo. Officers: Clinton H. Crane, pres. and chairman Ex. Comm.; Hugh N. Camp, Jr., v. p. and treas.; Irwin H. Cornell, v. p. and sales mgr.; L. H. Besson, sec.; preceding are directors, with Ben Blewett, Daniel C. Catlin, Firmin Desloge, Max Kotany, M. F. Watts, all of St. Louis, Gust. Setz, San Antonio, Charles M. Chapin, F. W. Shibley, New York, and E. C. Smith, Vermont. C. J. Adami, gen. mg., W. A. Smith, mgr. of Herculaneum plant.

Inc. March 25, 1864, in New York. Cap., \$20,000,000; shares \$10 par; outstanding \$14,094,660. Annual meeting, third Monday in Feb. Transfer office: 61 Broadway. Registrar: New York Trust Co. Stock traded in on New York Curb. Bonded debt retired Jan. 1, 1916.

Dividends: 1885-1912, 6%; 1913, 5%; 1914, 2½%; 1915, 4%; 1916, 5% to June 20th.

Comparative General Balance Sheet:

Assets—

	Property & Equip.	Invest's	Working Assets	Cash & Accts. Rec.	Defer'd Accts.	Other	Total
1915	\$10,712,066	\$8,641,497	\$413,951	\$721,307	\$318,204	\$ 31,381	\$20,838,496
1914	10,797,051	9,684,793	763,504	648,943	379,637	512,797	22,776,728

Liabilities—

1915	\$14,094,600	\$2,359,769	\$213,612	\$559,918	\$3,610,537	\$20,838,436
1914	14,094,050	2,415,934	2,239,000	502,276	618,476	2,906,992	22,776,728

Gold notes of the Miss. River & B. T. Ry. amounting to \$154,588 have been taken up.

Summary of Operations 1914-1915 (as reported in the Mining & Scientific Press):

	Lead Output	Value per Ton	Net Profit	Total Income	Net Income	Surplus after Divide.	Previous Surplus	Final Surplus
1915	84,356	\$90	\$4,283,425	\$4,392,360	\$3,489,064	\$1,908,883	\$9,416,629	\$11,415,512
1914	77,404	74	2,317,040	2,427,686	1,547,275	1,273,580	8,237,190	9,416,629

Subsidiary bonds: Miss. River & Bonne Terre Ry. 1st M. 5%, sinking fund gold bonds, due Oct. 1, 1931, \$2,394,922. During 1915, the company reduced its indebtedness by \$2,428,313; this reduction in debt saves the

company about \$130,000 per year in interest charges, exclusive of sinking fund.

The company is the largest independent lead producer in America and the second largest after the A. S. & R. Co. It owns over \$20,000 acres of land in the Southeastern Mo. lead district, in St. Francois and Jefferson counties, power plants, mill, smelting plants, the entire \$3,000,000 capital stock of the Miss. River & Bonne Terre Railway, except directors' qualifying shares; also \$483,940 of the \$500,000 capital stock of the Bonne Terre Farming & Cattle Co. and 98% of the capital stock of the Doe Run Lead Co.; the Miss. & Bonne Terre Ry. owns the St. Francois Co. R. R. Co.

The holdings are in the disseminated lead ore region of S. E. Missouri, where production from ores in the lower Bonne Terre dolomite began in 1869. The producing area is within 5 miles of the towns of St. Francois and Desloge. There are four companies operating and six concentrating mills in commission, those of the St. Joe Co. and its subsidiary handling 8,000 tons out of a total of 17,500 tons daily output.

In 1915, ten shafts were operated that furnished the ore for the old 1500-ton mill at Bonné Terre, for the 1500-ton mill at Owl Creek, and for the 4200-ton Doe Run mill at Rivermines in the Flat River district. The flotation process has recently been adopted by the company.

In 1914, the company finished reconstructing its smelting plant at Herkulaneum, Mo., and now has one of the most modern lead smelters in the country, capable of treating 12,000 tons of concentrates per month. Materials treated are lead concentrates from the company's mills at Bonne Terre, Leadwood and Doe Run; concentrates said to assay from 65 to 74% lead, 14% sulphur, and 1 to 5% zinc.

Equipment includes 8 Dwight-Lloyd sintering machines, 42x264", and 4 blast furnaces 42x192". Recovery of the plant is over 98%. Concentration practise at company's mills and in neighboring plants is fully and well described in Metallurgical and Chemical Engineering, July 15, 1916, p. 93.

The power plants of the St. Joseph and Doe Run Lead companies on a basis of 34,359,458 kw.-hr., showed a cost of 0.77 cts. per kw.-hr. Power consumption was equivalent to about 16.3 kw.-hr. per ton of ore mined and milled. Reported that a \$250,000 power plant will be built at Rivermines this fall; plant to be run in parallel with the present system.

Summary of 1914-1915 production:

Division	Tons Ore Milled	Tons Concentrates		Tons Lead Content		Recovery Per Ton Ore		
		1914	1915	1914	1915	1914	1915	1914
		Bonne Terre.....	592,687	506,123	37,033	28,326	23,146	18,668
Leadwood	490,283	515,948	36,973	35,601	24,971	23,796	101.8	
Doe Run.....	1,044,363	987,976	62,373	56,783	42,008	39,228	80.4	81.

Doe Run Lead Co.

Controlled through ownership of 98% capital stock by St. Joseph Lead Co., 61 Broadway, New York; Bonne Terre, and Rivermines, Mo.

Officers: Clinton H. Crane, pres., New York; F. H. Dearing, sec-treas., Bonne Terre, Mo.; preceding with Edward Whitaker and E. B. Pryor, St. Louis, and W. M. Harlan, Farmington, Mo., directors.

Inc. 1886, in Mo. **Cap.**, \$10,000,000; par \$100; outstanding, \$6,574,900. Stock transferred at company's office in Mo. Annual meeting, second Saturday after first Monday in Nov. at Bonne Terre, Mo.

Proceedings are under way for dissolution of the company.

Comparative General Balance Sheet:

	Assets—	Property & Equip.	Working Assets	Due from Affil. Cos.	Cash	Misc.	Total
1915	\$14,417,547	\$246,805	\$444,890	\$206,910	\$27,034	\$15,343,188	
1914	14,509,283	151,265	509,382	53,705	41,165	15,264,800	

Liabilities—

	Capital Stock	Bonds & Notes	Current	Due Affil. Cos.	Reserves & Surplus	Total
1915	\$6,574,900	\$1,039,500	\$136,753	\$ 48,558	\$7,543,476	\$15,343,188
1914	\$6,578,300	1,039,500	99,183	1,239,477	6,308,340	15,264,800

The \$986,000 bond issue has been paid since Jan. 1, 1916.

Property: in 1907 the properties of the Union Lead Co. and the Columbia Lead Co. were purchased. Company now owns about 6,700 acres of ore land in the Flat River district of the S. E. Missouri lead district.

ST. LAWRENCE PYRITES CO.**NEW YORK**

Offices: 41 Broad St., New York and DeKalb Junction, St. Lawrence Co., N. Y. **Officers:** Edward E. Thalmann, pres.; F. T. Rubidge, v. p.; W. J. Kingsbury, sec.; R. M. Atwater, Jr., treas.; O. F. Pattberg, supt. Controlled by Ladenburg, Thalmann & Co., New York.

Property: located in Hermon Twp., St. Lawrence Co., includes the Stella mines, and is one of the four largest pyrite mines in the U. S.

Ore: pyrite, occurring in lenses or veins in gneiss and schist. The orebodies strike and dip in the same general direction as the gneisses, strike N. E., and dip 20° to 30° N. W. The walls are not sharply defined; the average assay is about 21% sulphur.

Development: by 2 shafts 1,600' apart on parallel deposits. The north shaft, the Stella, is idle; here the orebody extends 1,100' along the strike, averages 10' in thickness and has been worked to a depth of 900' on the dip. The operating shaft, the Anna, opened by levels 50' apart vertically, has an orebody opened for 1,500' on the strike, and average thickness of 20'. The ore is put through a crusher at the shaft before sending to the mill.

Equipment: includes a 700-ton mill with gyratory crushers, trommels, rolls, Hancock and Harz jigs, Wilfley and Deister Machine Co. tables. In cold weather the concentrates, to prevent freezing, are dried in a Ruggles-Coles cylindrical dryer. Concentrate assaying 44% sulphur, is sold to sulphuric-acid manufacturers and to paper mills. Power is electrical, obtained from a hydro-electric company for about \$30 per h. p. per year. The property is thoroughly described in Eng. & Mining Journal, April, 1913, p. 689.

Production: approximately 150,000 tons ore per year, yielding about 60,000 tons concentrates.

ST. LOUIS COPPER CO.**MICHIGAN**

Office: 12 Ashburton Place, Boston. Mine office, Calumet, Houghton Co., Mich. Jas. MacNaughton, gen. mgr. **Inc.** in Michigan. **Cap.** \$1,000,000; shares \$25 par; fully issued. Is controlled by the Calumet & Hecla Mining Co., through ownership of entire share capital.

Property: lying next south of the Old Colony, east of the Laurium and S. E. of the Calumet & Hecla, was opened 1844, as the New York & Michigan, under permit from the Federal War Department, and later became the Washington, changing that name eventually to the present title. Lands 800 acres, being S. ½ of Sec. 19 and W. ½ of Sec. 20, T. 56 N., R. 32 W.

In very early days a shaft showing some fine copper was sunk at the junction between the trap belt and the eastern sandstone. Idle until 1910, when exploratory work was resumed. A cross-section of the formation was made, 1910-12, and ground broken for a shaft, on the St. Louis amygdaloidal bed, July, 1911. The shaft was 600' deep, Aug., 1912. Diamond drilling, in 1912, failed to locate the extension of the so-called Mayflower lode and operations were suspended.

Equipment: includes a 14x18" duplex-cylinder Lidgerwood hoist, with 5' drum, good for one-half mile depth, and a 12-drill air compressor. Google

ST. LOUIS SMELTING & REFINING CO.**MISSOURI**

Subsidiary of National Lead Co. Wm. W. Lawrence, pres. Address: St. Louis, Mo. Inc. in Mo. Cap., \$2,000,000. Controls 1,295 acres of lead-zinc land in St. Francois Co., Mo. Operates 6 shafts, 400' average depth.

Owms and operates a mill, built 1900, with a daily capacity of 2,500 tons. (See article on Concentration and Flotation of Lead Ores of S. E. Missouri, Met. & Chem. Journal, July 15, 1916, p. 93.)

ST. MARY MINING CO.**UTAH**

Office: 601 Providence Bldg., Duluth, Minn. Mine office: Milford, Beaver Co., Utah. Officers: Hansen Ev. Smith, pres.; J. Eton Bowers, v. p.; Paul M. T. Thompson, sec., all of Duluth. W. D. Ryan, mgr. Inc. 1908, in Arizona. Cap., \$500,000; shares \$1 par; assessable.

Property: 4 claims, 3 of 30 acres area, patented, near the Moscow and Red Warrior mines, on the east side of Topache peak, 4 miles from Milford in the Star district. Claims show 5 contact veins between limestone and an igneous intrusive. Orebody under development claimed to average 17% copper, 10 oz. silver and one carload said to have returned \$76 per ton. Development: by a 165' shaft with several hundred feet of drifts.

The mine, opened 1870, produced until 1890. Again opened, 1909, and operated intermittently, producing about 250 tons of ore annually.

ST. MARY'S MINERAL LAND CO.**MICHIGAN**

Office: 705 Sears Bldg., Boston, Mass. Mine office: Houghton, Houghton Co., Mich. Officers: Geo. Peabody Gardner, pres.; Chas. J. Paine, v. p.; Walter Hunnewell, v. p.; Chas. J. Paine, Jr., sec.-treas.; preceding with E. V. R. Thayer, W. Cameron Forbes, Albert S. Bigelow, Thos. N. Perkins, Charles E. Perkins, Richard Olney and Chas. N. King, directors; A. E. Coe, asst. treas.; Fredric W. Nichols, resident agt.; Dr. Lucius L. Hubbard, cons. geologist.

Inc. March 4, 1901, in New Jersey. Cap., \$5,000,000; shares \$25 par; issued, \$4,000,000. Controls, through ownership of entire stock issue, except founders' shares, the St. Mary's Canal Mineral Land Co., a corporation inc. 1863, in New York, to acquire 180,000 acres of land given by the state of Michigan for the construction of the first ship canal at Sault Ste. Marie. These lands in Houghton, Ontonogan and Keweenaw counties, Mich., formerly included the tracts on which the Calumet & Hecla, Baltic, Trimountain, Champion, Ojibway and other mines have been developed. Company has about 400 shareholders. Shares are listed on the Boston Stock Exchange. Old Colony Trust Co., Boston, registrar. Annual meeting, first Wednesday in March, in Jersey City, N. J.

Income of the company consists mainly of dividends from the Champion Copper Co., with a small but steady income from sales of lands, timber and wood, and occasional but irregular large receipts from sales of mineral lands. The balance sheet of Dec. 31, 1909, gave quick assets of \$4,489,273, and on Dec. 31, 1915, the company had \$289,544 cash on hand, with notes receivable, \$34,446, and was without liabilities.

Receipts for the year ending Dec. 31, 1915, were \$1,693,310, of which \$1,550,000 was from dividends of the Champion Copper Co.

Share assets of the company Dec. 31, 1915, were: 50,000 shares Champion Copper Co.; 25,000 shares Mayflower M. Co.; 20,165 shares La Salle Copper Co.; 79 shares Hancock Cons. Mng. Co.; 20,000 shares Pacific Copper Co.; 37,222 shares Houghton Copper Co.; 1,571 shares Franklin Mng. Co.; 2,000 shares Ojibway Mng. Co.; 56,778 shares Winona Copper Co.; 208 shares Copper Range Cons. Copper Co.; 640 shares St. Mary's Mineral Land Co.; 80 shares Old Colony Copper Co.; 8,340 shares Naumkeag Copper Co.; 17,902

shares Douglass Copper Co.; 10 shares Amphidrome Co.; 100 shares D. A. Stratton Co.

From 1863 to 1900 the old company paid cash dividends of \$2,200,000, and also paid stock dividends of 1 share of Tamarack, 1884; 1 share of Iroquois, 1890; 1¼ shares of Baltic and one-half share of Winona, 1898; 1 share of Old Colony and 1½ shares of Trimountain in 1899.

Dividends: (of the present company)

1903	\$1	1911	\$ 3
1904	1	1912	3
1905	2	1913	3
1906	4	1914	0
1907	5	1915	8(b)
1908	0	1916	11(a)
1909	1		
1910	1(c)		

(a) Including dividend declared Aug. 8, 1916. (b) Not including North Lake and Hancock stock distributions equivalent in cash to \$2.59 a share. (c) Not including Franklin stock distribution equivalent to \$4.

Property: Jan. 1, 1916, consisted of 93,012.69 acres freehold, with mineral rights to 14,132.96 acres additional, property being scattered along the Lake Superior copper belt, with principal holdings on the South Range, S. W. of Houghton, in Houghton and Ontonagon counties.

The company, since its reconstruction, in 1900, has refused to sell its mineral lands outright, preferring to join with other land holders in the formation of new companies, taking pay for its lands in shares, on a pro rata basis, or partly in shares and partly in cash. This policy involves heavy outlays for exploratory and development work, but has resulted in giving the company a half interest in a new mine, the Champion, which is capable, alone, of furnishing funds to St. Mary's company for both dividends and development work elsewhere, and a continuance of this policy must result in time in making St. Mary's Mineral Land Co. the part or sole owner of a number of fine mines. Owing to the great extent of its lands, located mainly on the Keweenaw copper belt, stretching along the mineral range for scores of miles, the landed holdings of the company are of great potential value. The management is vigorous and far-seeing.

ST. PATRICK MINING & MILLING CO.

UTAH

Idle. Office: 855 Sherman Ave., Salt Lake City, Utah. Mine office: Hughes Canyon, Salt Lake Co., Utah. Officers: D. A. Buck, pres.; H. H. Paterson, v. p.; B. A. M. Froiseth, sec.-treas.

Inc. March 17, 1906, in Utah. Cap., \$50,000; shares 20 cts. par; non-assessable; issued, 180,000 shares.

Property: 6 claims, unpatented, 7 miles from railroad, opened by shaft and tunnel, with about 650' of workings, showing gold and silver-copper ore. Annual assessment work only being done.

ST. PAUL MINING & REDUCTION CO.

COLORADO

Silverton, San Juan Co., Colo. Norwood Johnson, pres. and treas.; J. B. Ross, v. p. and gen. mgr.; Frank L. Ross, sec. Inc. March, 1908, in Colorado. Cap., \$100,000; shares \$1 par.

Property: the St. Paul group, in the Red Mountain district, an old mine that formerly shipped some ore netting \$1,000 per carload. The mine has a 300' shaft, with levels at 200' and 300', developing small but rich ore shoots, said by former management to carry about 8% copper, 10% lead, 10% zinc, 5 to 10 oz. silver and 1 oz. gold per ton. Since 1914 the mine is being worked by lessees, who are sinking a shaft, said to be in solid ore averaging \$6 per ton.

ST. PAUL MONTANA MINING CO.**MONTANA**

Maiden, Fergus Co., Mont. **Officers:** O. L. Taylor, pres.; Chas. W. Ames, Sr., v. p.; C. L. Ames, treas.; with L. P. Ordway and E. B. Coolidge, directors. **Inc.** in Ariz.

Property: 2 patented claims, at Maiden, said to show gold ore in contact deposits between porphyry and limestone. Developed by a 640' vertical shaft, with 5,000' of underground workings. Ore claimed to assay \$3 to \$5 per ton and property is said to have produced \$4,000,000. Has recently been under lease.

Equipment: includes a hoist and air-compressor; reported as building a cyanide plant.

ST. REGIS COPPER MINING & MILLING CO.**MONTANA**

Office: Missoula, Mont. **Mine office:** St. Regis, Missoula Co., Mont. **S. J. Wilson,** pres.; **F. W. Wilson,** sec.-treas. **Inc.** May, 1901, in Montana. **Cap.,** \$300,000; shares \$1 par; in half preferred and half common stock.

Property: 5 claims, also a 15-acre mill site and miscellaneous lands, 180 acres, on the Northern Pacific railway, shows quartzite and shale, with 2 orebodies under development of 6' estimated average width, carrying chalcopryite ore said to give average assays of 8% copper and \$1.50 gold per ton. **Development:** by tunnels of 60', 380', 800' and 600'. Presumably idle.

ST. REGIS MINING CO.**MISSOURI**

Duenweg, Jasper Co., Mo. **E. R. McClelland,** pres.-treas. **Inc.** in Sept., 1915. **Cap.,** \$100,000.

Company took over the 40-acre lease of the old American Beauty mine, N. W. of Duenweg, which had been idle for some time owing to low price of spelter. The company unwatered the property which is developed by two 208' shafts in sheet ground formation; said to have a 20'-25' ore face, and built a 350-ton concentrator. **Equipment:** includes 4 gas engines, 2 compressors, two 100-h. p. boilers and a change house.

SALIDA COPPER CO.**COLORADO**

Address: care: Wm. Tudor, treas., St. Botolph Club, Boston, Mass. **Mine office:** Salida, Chaffee Co., Colo.

Inc. Oct. 26, 1908, in Arizona. **Cap.,** \$500,000; shares \$1 par. Controls the Mountain Mining Co., of Georgetown, Clear Creek Co., Colo., through stock ownership. Property was formerly held by the Shawmut Consolidated Copper Co., which this company seems to have succeeded.

Property: the Sedalia mine, also various unpatented claims, about 200 acres, 5 miles from Salida. The Sedalia mine has a vein of 35 to 40' estimated average width, carrying oxidized copper ores, mainly below smelting tenor, to shallow depth, succeeded by chalcopryite ore said to average 3 to 4% copper and \$1.40 per ton in combined gold and silver values, but also carrying an average of 4.5% zinc. **Development:** mainly by a 2,000' tunnel to depth of 700' and is said to have about 2½ miles of workings. **Equipment:** includes electric power and an 8-drill air compressor and the mine is connected with the mill by a 1½-mile tramway. 12 men employed and regular shipments made during 1915.

The 50-ton reduction plant, known as the Colorado mill, includes a concentrator and leaching plant; the latter has been idle for several years.

SALISBURY COPPER CO.**NORTH CAROLINA**

Idle. **Address:** Capt. W. M. Wiley, Salisbury, N. C. **Mine** near Gold Hill, Rowan Co., N. C. **T. B. Brown,** pres.; **W. S. Blackmer,** sec.-treas.

Inc. 1904, in Arizona. **Cap.,** \$100,000; shares \$100 par.

Property: 50 acres, freehold, showing altered schists, carrying a fissure vein with N.-E. strike, and estimated at 4' width. Developed by a 100' shaft, showing chalcopryite reported to average 5% copper and \$5 gold per ton.

Ore can be treated by flotation and property probably worthy of careful prospecting.

SALMON RIVER MINING CO.**NEVADA**

Office: 19 West Granite St., Butte, Mont. Mine near Contact, Elko Co., Nev., carries gold and silver-bearing copper ore. Had gasoline power and a small smelter. Not operating, 1916.

SALT LAKE-CALIFORNIA COPPER CO.**CALIFORNIA**

Office: 302 Hooper Blk., Salt Lake City, Utah. Mine office: Smith River, Del Norte Co., Cal. **Officers:** W. Mont Ferry, pres.; Isaac Sparey, v. p.; J. H. Turner, sec.-treas. and gen. mgr.; preceding with C. W. Hoover, Jas. Ivers and E. A. Mehse, directors.

Inc. Nov. 29, 1907, in Utah. Cap., \$1,000,000; shares \$1 par; nonassessable; issued, \$841,615.

Property: 10 claims, unpatented, near Smith river, in the Low Divide district, 120 miles S. W. of Grants Pass, on the S. P. R. R. and 12 miles from the coast. The mine, which was one of the first copper properties on the Pacific coast, was operated 1857-67, when closed by the low price of copper. Claims show 4 parallel shear zones, with prominent gossans, traceable about 3 miles, ore occurring in lenticular masses and shoots, in serpentine or altered peridotite. The zone has a N.-S. strike, and average dip of about 70°, the orebodies, 3' in width, carrying chalcocite and chalcopyrite, estimated to average 2½% copper, \$4.50 in gold and 75c in silver.

Development: by 180' shaft and several tunnels, with about 3,500' of workings. Old workings extend down to the 500' level, but none of the main veins were located.

Equipment: includes 3 buildings. Frank Zaar is developing the Big Bonanza claim, 1915-16; the company itself has been inactive several years.

SALT LAKE COPPER CO.**UTAH**

Office: 11 Broadway, New York. Operating office: McIntyre Bldg., Salt Lake City, Utah. Mine office: Lucin, Box Elder Co., Utah. **Officers:** Frederick Lewisohn, v. p.; E. C. Westervelt, treas.; other directors, Walter Lewisohn, S. W. Peck, E. H. Westlake, E. J. Macnamara, O. B. Van Sant and Geo. B. Wilson, mgr.

Inc. Oct. 10, 1906, in Maine. Cap., \$2,200,000; shares \$10 par. Debentures, \$59,000, at 6%, payable out of net earnings.

Property: 108 claims, known as the Copper Mountain mine, at an elevation of 7,200' above sea level, in the Newfoundland district, and 100 acres within the limits of Salt Lake City.

The Copper Mountain mine has a number of tunnels and shafts, the 1,500' main tunnel having a back of about 400', and a 500' tunnel has been planned to be driven 1,200', to enter the hoped-for sulphide zone. The mine has upwards of 2 miles of workings, and is estimated to have in sight and blocked out 75,306 tons of copper ore of 1.1% average tenor, not at present commercial ore. For the last few years the mine has been worked by lessees.

SALT LAKE TUNGSTONIA MINES CO.**NEVADA**

Office: 212 Kearns Bldg., Salt Lake City, Utah. **Address:** R. W. DeWitt, supt., Tungstonia, via McGill, Nev. I. W. Robbins, pres.-mgr.; Gustav Wissler, v. p.; A. F. Stumpf, sec.; J. A. Rasmussen, directors.

Property: 7 claims adjoining the Shepherd or Ophir mine, in north end of Snake river range, shows a number of veins 1'-21' wide, carrying hübnerite ores said to average 2% tungstic acid. The veins occur in granite, near a limestone contact.

Company is erecting a 20-ton mill, using Marcy ball mill and Wilfley tables.

SALTESE MINING & MILLING CO.**MONTANA**

Office: 22 Symons Blk., Spokane, Wash. Mine near Saltese, Missoula Co., Mont. Officers: J. C. Johnson, pres.; Wm. Daxon, v. p.; O. V. Manning, sec.-treas.; preceding with J. B. Ward and G. A. Turner, directors.

Inc. March, 1911, as the successor of the Saltese Cons. Copper Mng. & Mfg. Co. Cap., \$1,500,000; shares \$1 par; assessable. Levied an assessment of .02c per share, Jan. 12, 1914.

Property: 12 claims, 240 acres, east of Mullan, near the National mine in the St. Regis district, about 8 miles N. W. of Saltese. Development: by 2 tunnels aggregating 1,400'. The lower one, 655' in length, opens a 13' vein, probably the Black Traveler vein, at 460' from the portal, which is said to show 5' of high-grade copper ore. The tunnel is being extended to cut the big iron-capped vein seen on the surface. Developing with a small force, 1915-16. Property considered promising.

SALTILLO, S. A.; COMPANIA MINERA DEL.**MEXICO**

Office: Primera de Galeana No. 2, Saltillo, Coahuila, Mex. Mine near Mazapil, Zacatecas, Mex. Lic. Miguel Cárdenas, pres. Inc. June 15, 1899, in Mexico. Cap., 100,000 pesos; shares 100 pesos par; fully paid. Dividends: were 10,000 pesos in 1907; 15,000 pesos in 1908. Annual meeting, Jan. 31, each year.

Property: the Jesus Nazareno mine with 116 acres of mineral land and 2,099 hectares of miscellaneous lands, in the Nazareno mining district of Mazapil, 10 miles from a railway. The mine has an orebody carrying auriferous lead and copper sulphides sufficiently developed to produce 1,000 metric tons of silver-lead ore monthly. Equipment: includes 5-mile private tram line, and 135-h. p. gas and electric plant. Presumably closed down owing to Mexican revolution.

SAMSON MINING CO.**UTAH**

Subsidiary of the Bingham Mines Co.

SAN ANTONIO COPPER CO.**MEXICO**

Address: Geo. J. Eisele, sec.-treas., Iron Mountain, Mich. Mine office: San Antonio de la Huerta, Sonora, Mex. Officers: Otto C. Davidson, pres.; Dr. J. A. Crowell, v. p.; preceding with John Uno Sebenius, D. M. Clemson, Hon. Richard C. Flanagan, E. G. Kingsford and W. H. Johnston, directors; John E. McIntyre, supt.

Inc. Sept. 23, 1908, in Arizona. Cap., \$2,500,000; shares \$10 par; issued, \$1,000,000 full paid and \$1,000,000, with \$3.50 paid on the latter. Direct title is held through the San Antonio Copper Co., S. A., inc. April 12, 1908, in Mexico, with all stock owned by this company. Annual meeting, second Monday in April.

Property: 9 groups, about 7,500 acres, with 2,000 acres about 3 miles from San Antonio de la Huerta, near the Yaqui river. The property was worked 1862 in a small way.

Lands show a mineralized zone of 200 to 500' width. Ore includes high-grade oxides and carbonates, with sulphides of good average tenor, there being a considerable quantity of chalcocite, giving assays up to 11% copper. Development: consists of 20 tunnels with 15,000' total workings, opening 7 separate orebodies in 2 tunnels, with 4,000' of workings in ore. Mr. Dwight E. Woodbridge estimated, March 4, 1910, that the San Antonio had exposed on one plane, 300,000 tons of ore, figured conservatively, averaging 7% copper, with very low values in the precious metals, and that the newer tunnels should increase this tonnage five-fold. Railway connections to within 2.2 miles of the main tunnels were secured, 1910, and will be extended to the tunnel mouth as soon as peace prevails again. Operations suspended on account of revolutionary disturbances. Property considered promising.

SAN ANTONIO MINING CO.**COLORADO**

Office: 312 Century Bldg., Denver, Colo. Mine office: Red Mountain, Ouray Co., Colo. **Officers:** M. T. Chestnut, pres. and gen. mgr.; Otto Koehler, v. p.; Wm. L. Stephens, sec.-treas., J. F. Roper, supt.

Inc. Feb. 5, 1908, in Colorado. **Cap.**, \$500,000; shares \$1 par.

Property: 37 claims, patented, about 200 acres, a 20-acre mill site and 10 acres miscellaneous lands, 1 mile from a railway, in the Red Mountain district of Ouray and San Juan counties. Lands, including the Carbon Lake mine, show porphyry, carrying several orebodies, estimated at 20 to 30' width, traceable for more than 3,000' and reported by the company to show enargite ore carrying 12% copper, 10% lead, 10 oz. silver and \$3 gold per ton, which is from a narrow paystreak.

Development: by shafts of 37' and 200', the Camp Robber tunnel of 625', and the Koehler tunnel of 2,800', with a back of about 500'. **Equipment:** includes a 5-drill air compressor and 10 mine buildings and dwellings. Idle several years.

SAN BERNABE y ANEXAS; COMPANIA MINERA.**MEXICO**

Zacatecas, Zac.; Mex. C. A. Bentley, mgr., at last reports. **Property:** 25 hectares, including La Confianza, El Faro and La Fama mines, west of the Malancho mine, includes the oldest mine in Zacatecas, discovered about A. D. 1546, which was a considerable producer of silver. Property formerly was under option to an English company, but option was dropped after unwatering the old shaft. Ore is copper, associated with some lead, values being mainly in silver. Idle.

SAN BERNARDO MINING CO.**MEXICO**

Is the Mexican incorporation of the Southern Sonora Development Co., controlled by the Sonora Central Mines Co.

SAN FELIPE MINING CO.**MEXICO**

Hostotipaquillo, Jalisco, Mex. Cof. N. Z. Seitz, pres. and gen. mgr. **Inc.** 1902, in Arizona. **Cap.**, \$1,000,000; shares \$1 par. **Property:** includes a 50-ton mill. The company is said to have paid dividends from stock sales and was considered by Horace J. Stevens as a rank bit of stockjobbery. Idle and probably defunct.

SAN FRANCISCO MINES OF MEXICO, LTD.**MEXICO**

Parral, Chihuahua, Mex. Harold A. Searle, sec., 65 London Wall, London, E. C., Eng. Rt. Hon. Earl of Denbigh, chrm. board of directors. Reg. March 27, 1913 in England. **Cap.**, £650,000; outstanding £350,000; shares £1 par. **Bonds:** £200,000 convertible first mortgage debentures, in denomination of £100 and £20 each; int. payable April and October 1, was paid to Oct. 1, 1914; payment of the next six half-yearly instalments has been postponed for a period of 3 years so that in each of the 6 half years ending Oct. 1, 1920, a year's interest will become due, and on the postponed interest 6% interest will be allowed.

Property: a group of silver, gold, lead and zinc mines, 194 acres, 14 miles from Parral, formerly worked by the San Francisco del Oro Mining Co., Ltd. Examined by Knox and Allen, New York. Property covers nearly 1½ miles on the strike of the San Francisco vein, a fissure lode in limestone. The oreshoot worked has a length of 2,600' with minimum width of 5½'; 4th level is in primary ore; ore minerals are galena, blende, pyrite, and chalcopryite.

Development: by 3 shafts, and 5 levels; deepest shaft, 484'. **Ore reserves:** estimated at 390,000 tons; average grade, 21 oz. silver, 1.4 dwt. gold per metric ton, 12.5% lead and 17.4% zinc. The ore is delivered to the mill by aerial tram. Many mistakes were made in the original design and construction of the mill, but present management has started to reconstruct it.

adding flotation equipment and when rebuilt it will have a daily capacity of 200 tons.

The property has been forced to suspend operations temporarily as a result of the Mexican revolution.

SAN JUAN REDUCTION CO.

MEXICO

San Antonio, Baja Calif. Paul Knapp, gen. mgr.; J. C. Puttner, mine mgr.; David Lawrence, mill supt. Operates a mine yielding gold-bearing arsenopyrite ore, 5 miles E. of Triunfo.

The reduction plant has dry rolls, Hardinge mills, roasting furnaces and cyanide tanks.

SAN LAZARUS MINES CO.

NEW MEXICO

Idle. Office: 2837 Hennepin Ave., Minneapolis, Minn. Mine near San Pedro, Santa Fé Co., N. M. Officers: R. C. Thompson, pres.; Dr. Edw. Gorgon, v. p.; L. J. Hemen, sec.; Clarence R. Thompson, treas.; Geo. W. Churchill, gen. mgr.

Inc. March 9, 1904, in New Mexico. Cap., \$2,000,000; shares \$1 par; nonassessable; issued, \$1,500,000.

Property: 10 claims, unpatented, 200 acres, shows a contact deposit between syenite and limestone, of 3' average width, N.-S. strike and dip of 15 to 25°. This deposit carries copper carbonates and chalcopyrite ore estimated by the management to average 3 to 12% copper, without lead or zinc, 15 oz. silver and \$2 to \$6 gold per ton. Lands are in 3 groups, 2 miles from San Pedro, adjoining the Santa Fé Gold & Copper Mining Co. **Development:** by a 405' incline shaft, and tunnels of 300', 350', 200' and 450', estimated to show 1,000 tons of ore.

Equipment: includes a small steam plant and 20-ton concentrator with Dodge crushers, Huntington mill and 1 Wilfley table. Have no recent information from company.

SAN LUCAS COPPER CO.

MEXICO

See El Magistral Copper Co.

SAN LUIS; CIA. BENEFICIADORA.

MEXICO

San Luis de la Paz, Gto., Mex. Owns the Ojo de Agua smelters. Idle.

SAN LUIS MINING CO.

MEXICO

Office: 15 William St., New York. Mine office: Panuco de Coronado, Durango, Mex. Officers: David F. Beggs, pres. and treas.; C. P. Jacobs, F. C. Hanford, W. B. Raymond, Wm. T. Read and Walter S. Logan, Jr., directors; Myra B. Martin, sec.

Inc. 1900, in West Virginia, and cap. increased, 1905, to \$3,000,000; shares \$1 par. First dividend, 1%, was paid Jan., 1906, and a second dividend was paid July, 1906, both unearned. Direct title to this property apparently is held in the name of Lucia Mining Co. Annual meeting, last Tuesday in February.

Property: 225 pertenencias, 500 acres, and a 25-acre mill site, in the San Lucas and Pánuco de Coronado districts of Durango. The mineral property shows limestone and porphyry, carrying fissure veins and contact deposits, estimated by the management to average 3% copper, 12% lead, 1% zinc, 35 oz. silver and \$4 gold per ton, mainly from sulphide ores. The mines were discovered 1650, and worked more or less irregularly until 1830, when closed on account of water and Indian troubles, remaining idle until reopened, 1901, by the present company.

The Potosina mine is said to show, at the western end, a considerable body of ore of smelting grade and a large quantity of milling ore.

The San Gonzalo mine, 450' deep, has a vein showing mainly low-grade ores carrying silver values above, with copper on the lower levels, and is also reported to have a 2' vein carrying 25 kgs. silver per ton, with some gold.

The Sidney has a 2' vein of galena, giving assays up to 45% lead, 4 oz. silver and 3 grams gold per metric ton, opened by a shallow shaft, but has been idle for some years on account of water.

The San Lucas mine, 19 hectares, about 35 miles N. W. of Gabriel, is an old property claimed to have nearly 2 miles of workings, carrying mainly lead and zinc ores, and presumably is idle.

The San Pablo mine has parallel veins said to carry 6 to 36" paystreaks of sulphide ore, giving assays up to 16% copper, 360 oz. silver and 14 grams gold per ton. Development is by an abandoned incline shaft and a 175' vertical shaft, latter equipped with headgear and hoist.

Equipment: includes steam plants, claimed to aggregate 750 h. p. with 6 hoists and 2 air compressors of 12 drills combined capacity. Buildings include a machine shop, carpenter shop, smithy, offices, 4 general stores and a large number of dwellings for workmen, with a total of 175 buildings. The mill has 2 crushers, 1 jig and 4 Bartlett tables. Concentration seems to have proven more satisfactory than leaching.

The Trinidad leaching mill, of 120 tons claimed daily capacity, has 2 calcining furnaces and apparently treated only about 40 tons of ore daily, when in operation.

Idle on account of revolution.

SAN LUIS POTOSI SMELTER.

MEXICO

See Mexicana; Compañía Metalúrgica.

SAN MARTIN y ANEXAS, S. A.; COMPANIA MINERA.

MEXICO

Office: Aptdo 145, Oaxaca, Mex. Mine office San Martín de los Cansecos, Oaxaca, Mex. **Officers:** Frank M. Leonard, pres. and gen. mgr.; Lic. Jesús Acevedo, v. p.; Ranulfo Bravo, sec-treas. and supt.; preceding with Frank J. Woods and Alfredo Castillo, directors, at last accounts.

Inc. Jan. 15, 1907, in Mexico. **Cap.**, 400,000 pesos; shares 10 pesos par, in 35,000 fully paid shares and 5,000 assessable shares; issued, 37,995 shares.

Property: 53 pertenencias, including El Billete de Banco, King Dodo, La Liga, Las Virginias, La Maria and La Roseta mines, about 10 miles from Ocotlan. Property shows diorite cut by a 6' vein carrying silver ore assaying 5 kgs. silver and 50 grams gold per ton.

Development: a 160' shaft, on the Maria, an 80' shaft on the Billete de Banco and a 350' tunnel on La Liga claims.

The political conditions in Mexico have stopped operations. Property considered promising.

SAN MATEO, S. A.; CIA MINERA.

MEXICO

Idle. Velardena, Durango, Mex. Carlos Michaud, pres. **Inc.** 1911, as successor of the Hileta Gold & Silver Mining Co.

Property: 72 acres, including the Santo Tomas, Bolsa and other mines, and a 60-acre mill site. Claims are reported to show 5 fissure veins in limestone and porphyry, having a generally E.-W. strike.

Development: one vein of 12" to 3' width is developed by a 1,600' tunnel, with 6,000' of workings, carrying ore said to average 1% copper, 6% lead, 36 oz. silver and \$10 to \$50 gold per ton. **Equipment:** includes steam and gasoline hoists, good for 1,000' each, and a 3-drill air compressor. There are 9 buildings. Shut down several years on account of political conditions.

SAN PEDRO COPPER CO., S. A.

MEXICO

A Mexican corporation; subsidiary of the Greene Cananea Copper Co. **Officers:** Geo. Kingdon, pres.; H. B. Paull, v. p.; Geo. Young, sec-treas.; J. W. Allen, asst. treas.; Casey Stites and W. S. Harper, asst. sec'ys.; L. D. Ricketts, gen. mgr. **Directors:** L. D. Ricketts, Geo. Kingdon, H. B. Paull, Geo. Young, Casey Stites.

Inc. July 28, 1906 in Mexico. Cap., 5,000 shares; \$10 par (Mexican); all issued and outstanding. The entire capital stock is owned by the Greene Cananea Copper Co. Balance sheet Dec. 31, 1915 shows assets, \$1,664,311, which includes property and equipment, \$1,054,899; current, \$609,412. Liabilities: capital stock, \$25,000; current, \$1,333,989; surplus, \$300,321. Total income in 1915, \$176,906; expenditures \$128,969.

Principal mines are the Cananea Duluth and America; also owns the following claims: America Copper Belt, El Oriente, Las Dos Naciones, Seguro, Square, Swansea and owns a 40% interest in the Sierra de Cobre mines, the other 60% being owned by the Cananea Cons. Copper Co., S. A.

Production: 1915, 15,574 tons of ore, at a cost of \$2,935 per ton. The yield per ton was 2.63% copper; 1.317 oz. silver; 0.006 oz. gold. (See Greene Cananea Copper Co.)

SAN ROBERTO MINING CO.

MEXICO

Zacatecas, Zacatecas, Mex. C. A. Bentley, gen. mgr. at last accounts. The mine, opened to depth of 300', shows copper, lead and zinc ores, occasionally assaying up to 30% copper with good gold and silver values. The mine has given a limited production of excellent ore.

SAN SIMON COPPER CO.

ARIZONA

Idle. Office: Marquette, Mich. Mine office: Paradise, Cochise Co., Ariz. Officers: Nathan M. Kaufman, pres.; Hon. Norman W. Haire, v. p.; S. R. Kaufman, sec.-treas.; preceding with Thos. F. Cole, John A. Duncan, Wm. G. Rice and Thos. H. Collins, directors.

Inc. 1907, in Arizona, as a reconstruction of the Chiricahua Development Co. Cap., \$2,500,000; shares \$10 par.

Property: 40 claims, 7 patented, about 750 acres, 16 miles from nearest railway, at Rodeo, previously operated by Capt. Thos. Burns as a silver mine. Development: a 750' crosscut tunnel with a 100' winze 700' from the portal, cutting 50' of leached ore, apparently the apex of a sulphide orebody. Also the 400' Mars shaft, bottomed in chalcopyrite ore of 2 to 4% copper tenor. The 400' Planet shaft has drifts on the 4th level.

Equipment: includes two 150-h. p. boilers, two 2,000' Lake Shore double-drum hoists, and a 16-drill Sullivan air compressor. Only assessment work done in recent years.

SAN TOY MINING CO.

MEXICO

Office: Oliver Bldg., Pittsburgh, Pa. Officers: Donald B. Gillies, pres.; C. A. Blanchard, v. p.; with Wm. L. Abbott, Jas. E. Brown, R. R. Brown, G. A. Deitch, Jos. Dilworth, D. L. Gillespie, Geo. E. McCague and M. R. Ward, directors. Edward Hoopes, sec.-treas.; W. P. Paterson, asst. sec.

Inc. 1901, in Maine. Cap., \$7,000,000; shares \$1 par; outstanding \$6,000,000; in May, 1913, \$250,000 was cancelled, leaving, outstanding, \$5,750,000. Dividends: 6% in 1911; 1% in 1912; 2% in 1913; none since. Colonial Trust Co., Pittsburgh, transfer agent. Commonwealth Trust Co., Pittsburgh, registrar. Annual meeting, third Monday in February at Augusta, Me. Stock listed on Pittsburgh Stock Exchange and New York Curb. Controlled by Chas. M. Schwab and associates. Shortly after flotation of the company stock sold up to \$1.25 per share, it has since sold down to 11c.

Comparative General Balance Sheet:

Assets	Mines & Equip.	Supplies	Accts. Rec.	Cash	Total	
1915	\$5,865,564	\$12,156	\$ 4,114	\$290,412	\$6,172,245

1910...	529,470	376,762	157,566		157,566	295,350

(a) After deducting \$10,597, cost value of 526 tons ore on hand, Dec. 31,

1912. (b) Deficit.

Property: 5 claims, the Bustillos, La Fortuna, Independencia, Juarez and La Central; in the Santa Eulalia district, 12 miles S. E. of Chihuahua, adjoining the Potosi mine of the Howe Sound Co. Ore: lead, silver, occurring in chimneys and "mantas" (beds or blankets) in limestone. For detailed description of geology of the district, see Trans. A. I. M. E., Vol. LI, pp. 57-99.

Development: the 2,060' La Central, 1,401' Alta, Juarez and Galdeano shafts, last two out of commission. New work totaled 2,396' in 1913, and 2,410' in 1914. In 1915 La Central shaft was sunk 400' and a small amount of drifting and crosscutting done in addition to 5,000' of diamond drilling, which was without any specific result.

Comparative Statement of Operations:

	Ore Tons	Silver Oz.	Silver Oz. p. t.	Lead Lbs.	Lead % Silver	Ave. Net Value Oz. Lead-Lb.

Ore is shipped to the smelter of the A. S. & R. Co., at Chihuahua. The political disturbances in Mexico have seriously hampered operations during the last three years; work was continued in a desultory way until September 9, 1915, when all American employees returned to the U. S. Operations will be resumed as soon as practicable.

SAN XAVIER COPPER CO.**MEXICO**

Idle. San Xavier, Sonora, Mex. C. C. Rountree, pres.; Wm. Foster, sec.; W. C. Laughlin, mgr. Inc. in Arizona. Cap., \$1,000,000; shares \$1 par and holds direct title to lands through the Cia. Minera de Cerro Verde, S. A., inc. in Mexico.

Property: 1,440 pertenencias, 3,500 acres, 80 miles east of La Colorado in the Hermosillo district, Sonora; also 300 pertenencias lying 24 miles to the southward and about 4 miles north of the Yaqui river.

SANDSTORM-KENDALL CONSOLIDATED MINES CO. NEVADA

Goldfield, Esmeralda Co., Nev. Officers: Geo. Wingfield, pres.; A. H. Howe, treas.; A. I. D'Arcy, mgr.

Inc. in Nev. Cap., 1,500,000 shares; \$1 par; assessable; outstanding 1,326,724. Listed in San Francisco.

Property: 70 acres at Goldfield, developed by shaft to 500' with a winze to the 700' level. Ore: gold in contact deposit between andesite and rhyolite. In April the company was doing development work on the 350' and 700' levels, seeking on the latter level "two large parallel veins. Both these veins were exposed on the 500' level, but at this depth the permanent water level had not been reached and the minerals were found to be too

widely disseminated through the great lode to permit of mining any large quantity of ore at a profit."

The mine is a prospect undergoing development.

SANTA FE GOLD & COPPER MINING CO.

NEW MEXICO

Office: 11 Broadway, New York. **Mine office:** San Pedro, N. Mex. **Officers:** E. J. Macnamara, pres.; Edw. H. Eckhoff, treas.; with Chas. N. King, Ernest W. Brown, M. Kaufman, Leon Raunheim, Frederick C. Fischer, Geo. B. Wilson, Oscar B. Van Sant, directors.

Inc. January 25, 1899 in New Jersey. **Cap.**, \$2,500,000; shares \$10 par. Old Colony Trust Co., -Boston, transfer agent; State Street Trust Co., Boston, registrar. Shares listed on Boston Stock Exchange and New York Curb. Annual meeting, fourth Tuesday in January.

Property: the San Pedro mine, 39,400 acres land, consisting of 3,400 acres of copper claims, and 36,000 acres of miscellaneous lands, comprising the San Pedro Grant in Santa Fe, Sandoval and Bernalillo counties, New Mexico. The San Pedro mine is 17 miles from Stanley on the New Mexico Central railroad.

Development: by a single 200' shaft and 1,600' adit on a blanket vein of 150' average thickness dipping at an angle of less than 15°, about half the orebody being workable. Ore as smelted averages 3% copper. The metal occurs as chalcopyrite, in a garnet and quartz gangue and is almost self-fluxing.

Equipment: includes a steam plant with hoist and 15-drill air compressor. The smelter at the mine has one 125-ton blast furnace, burning Colorado coke and producing matte of about 50% average copper tenor, which is shipped to El Paso, Tex., and Omaha, Neb., for conversion.

Employs 350 men, a good class of Mexican labor. Production started January 1, 1901, but smelting has been suspended many times since that date with mining development alone carried on until copper prices warranted the resumption of ore extraction and smelting operations.

	Production:	Copper	Silver	Gold	Cost per lb. copper (a)
		Lbs.	Oz.	Oz.	
1915 (c).....	1,747,090	24,570	2,104		10.6c.
1913	1,757,315	35,763	1,150		
1912 (b).....	801,895	13,133	494		
1907	1,223,457	17,625	786		14c.
1903	370,483				

(a) After crediting gold and silver. (b) Last 6 months. (c) May 24 to Dec. 31, inclusive.

Operations were suspended in 1914 at the inception of the European war; resumed May, 1915.

The property possesses a large tonnage of quite low-grade ore, besides a limited tonnage of smelting ore, recently developed. Company has no outstanding indebtedness, and can operate when copper prices are above 12c a lb. With the metal selling at a lower figure it is good policy to close down and conserve the ore supply.

SANTA GERTRUDIS CO., LTD.

MEXICO

(Controlled by Camp Bird, Ltd.)

Office: 1 London Wall Bldgs., London, E. C., Eng. A. A. Kelsey, sec. **Directors:** H. C. Hoover, chairman, F. W. Baker, L. Clerc, N. Craig, E. A. Govett, F. H. Hamilton, G. dePass, O. deRivaud.

Technical committee: R. J. Frecheville, J. A. Agnew, L. Chevillon, Wm. J. Cox, cons. engr. Hugh Rose, gen. mgr.

Departmental heads: general, C. A. Lantz; mining, T. C. Baker; accounting and purchasing, E. J. Craig; electrical, F. H. Walsh.

Inc. Dec. 31, 1909, in England. Cap., £1,500,000; increased Jan., 1911, from £1,275,000; shares £1 par; all issued and fully paid. (Camp Bird, Ltd., owns 1,126,901 shares.)

Company organized to acquire from Camp Bird, Ltd., an option to purchase the controlling interest in the Compania Minera de Santa Gertrudis y Guadalupe, owning the Santa Gertrudis gold and silver mines, for \$9,000,000 Mexican currency, approximately £922,130. Consideration for the option was £222,869, payable £20,000 cash and £202,869 in fully paid shares; the vendors also agreed to provide subscribers for 1,072,131 shares at par, and to provide £150,000 working capital, and also the purchase price of £922,130, the preliminary expenses to be repaid to vendors out of the first profits.

The name of the operating company is **Compania de Santa Gertrudis Inc.** Jan., 1910, in Mexico. Cap., \$250,000. Hugh Rose, gen. mgr. The company formed to treat the ores is known as **Compania Beneficiadora de Pachuca, inc.** in Mexico. Cap., \$500,000. Hugh Rose, gen. mgr. All shares in both these companies are owned by Santa Gertrudis Co., Ltd.

Balance Sheet: (year ending June 30).

Assets:	Property & Equip.	Investments (a)	Cash	Miscel.	Total
1915	£1,019,601	£503,507	£99,459	£17,722	£1,640,289

(a) Includes: cost of shares in Cia. Ben. de Pachuca, and Cia. de Santa Gertrudis, S. A., £252,100; Cia. de Santa Gertrudis, S. A., £2,459; Cia. Ben. de Pachuca, S. A., current account, £136,434; shares in Amistad y Concordia Aviado and Recuperadora £93,762; shares in the Messina Transvaal Dev. Co., Ltd., Messina. Zoutpansberg, Transvaal, South Africa, £18,750.

Liabilities:	Capital	P. & L. Acct.	Miscel.	Total
1915	£1,500,000	£130,394	£9,895	£1,640,289

Profit and Loss Account: for year ending June 30, 1915, shows receipts of £52,608, which includes £50,000 dividend declared by Cia. Ben. de Pachuca, S. A. Balance forward, £29,159, to which is added amount brought forward June 30, 1914, £101,526; total £130,685, of which dividend No. 4 paid Nov. 27, 1915, 1 s. per share, absorbed £75,000 and Director's remuneration of 1%, £291; leaving a balance of £55,393.

Dividends: 15% in 1911-12; 15% in 1912-13; nil in 1913-14, owing to unsettled conditions in Mexico and Europe; 5% in 1914-15, paid Nov. 27, 1915.

Property: 626 acres in the Pachuca mining district. State of Hidalgo, about 62 miles from Mexico City, examined by W. J. Cox, R. J. Frecheville, F. J. Pope and E. E. Chase. The ore carries silver-gold values in large fissure veins or crush zones, 50' to 100' wide in andesite. The great ore-shoot is 3,000' long, 18' thick and 600' high and prongs extend upward from the 800' or 900' level, but do not reach the surface.

Development: by shafts with extensive underground workings. New work in year ending June 30, 1915, totaled 15,838'.

Ore Reserves: estimated June 30, 1913, 1914 and 1915, respectively 1,047,000, 1,194,000 and 1,287,000 tons, the latter with an estimated recoverable content of 72,977 oz. gold and 14,595,567 oz. silver, recovery figured at 90%. At normal rate of production the present reserves would be sufficient for about 3½ years. Operating expenses under normal conditions about 18 s. 6d. per ton. For mining and milling practice, see Trans. A. I. M. E., Aug., 1916, pp. 1295-1332.

Equipment: includes a 60-stamp mill and cyanide tank; wt. of stamps, 1,550 lbs. Mill also contains 10 tube mills; capacity, 25,000 tons per month. Crushing commenced June 14, 1911.

Production: (years ending June 30).

	Tons	Value	Gold Oz.	Silver Oz.
1915	211,669(a)	£249,728	10,727	2,000,856
1914	293,836	498,754		
1913	263,554	631,718		

(a) Operations were at 52.7% normal rate. Ore consisted of 136,152 tons filling ore and 59,807 tons new ore; averaged 26 s. 2 d. per ton, of which 18.8% was in the form of gold and 81.2% silver.

STA. MARIA de la PAZ y ANEXAS, S. A.; C. M. B. MEXICO
Tejupilco, Mex. Inc. Aug. 20, 1913. Cap., 15,000 pesos. Owns the Helvetia mine carrying silver-copper ores, apparently but slightly developed. No returns secured.

SANTA MARIA DE LA PAZ; NEGOC. MIN. MEXICO
Office: 10 Cinco de Mayo, San Luis Potosi, Mex. Mine office: Matehuala, Catorce, San Luis Potosi, Mex. Pedro Barrenechea, pres.; Edgardo Mead, sec.; W. B. A. Dingwall, gen. mgr.

Inc. in Mexico. Cap., 240,000 pesos; shares 25 pesos par. From 1895 to 1904 inclusive, the mines yielded 11,327,210 pesos worth of ore, and the company paid 5,778,270 pesos dividends therefrom.

The mines, which are extensively developed, carry gold and silver-bearing copper and lead ores, with values mainly in silver and lead, the gold and copper being byproducts. The ores are mined to depth of 1,500'.

Equipment: includes steam and electric power. The reduction plant includes a 300-ton concentrator with Blake crushers and Chilean mills, and a smelter with two 40-ton furnaces. Company employed about 1,500 men, but closed down 1913, on account of revolution.

SANTA MARIA GOLD & COPPER MG. & REDUCTION CO. UTAH
Office: P. O. Box 517, Ogden, Utah. Mine office: Utah Hot Springs, Box Elder Co., Utah. Don Maguire, pres. and mgr. Inc. 1907, in Utah. Cap., \$500,000; shares \$1 par.

Property: well watered and fairly timbered, includes mill and smelter sites, lying in a very rugged territory in the Sierra Madre district of the Wasatch mountains. Land carries 7 fissure veins, practically parallel, with a strong cross-fissure, and 1 contact deposit. The veins range from 12 to 70' in width, and ore contains chalcopryrite, associated with pyrite and occasional small amounts of galena, ore being mainly of concentrating grade.

Development: by the 2,000' Clara Belle tunnel, cutting 3 veins, and planned to cut 5 more, with backs of 200 to 1,800'. The mine has about a mile of workings, showing ore developed regarded as sufficient to warrant a mill.

Equipment: includes a power house, air compressor, smithy and boarding house. Idle several years.

SANTA MARIA MEXICO MINING ASSOCIATION. MEXICO
Idle. Mine near Parral, Chihuahua, Mex. Wm. G. Gruber, pres. and gen. mgr.; Arthur H. Gruber, sec. and treas. Inc. in Wisconsin. Cap., \$250,000, shares \$1 par.

Property: 50 claims, La Lolita, La Viola and Santa Clara groups, in the Galeana district of the San Blas mountains. **Development:** is on La Lolita group, which has shafts of 75' and 150', showing oxidized ores, shipments from which are said to have averaged 15% copper.

SANTA RITA COPPER MINING & SMELTING CO. ARIZONA
Office: care C. F. Elliott, P. O. Box 592, El Paso, Tex. Mine office: Arivaca, Pima Co., Ariz. Inc. June, 1901, in Arizona. Cap., \$3,000,000; shares \$1 par; issued, \$2,750,000.

Property: 12 claims, unpatented, 220 acres, in the Tyndall district of the

Santa Rita mountains, 13 miles from Arivaca, shows granite, porphyry and diorite, carrying several veins of sulphide ore, usually at the contact of the diorite and granite. Veins range from 4 to 12' in width.

Development: 2 shafts and several tunnels, with a total of about 2,000' of workings, mostly in low-grade ore. A new tunnel, planned to give a back of 110', was 200' long, at last accounts. The mine is without power equipment. Company is a promotion of A. A. Post.

SANTA ROSA MINING CO., LTD.

MEXICO

Subsidiary of the Exploration Co., Ltd.

SANTAQUIN CHIEF MINING CO.

UTAH

Office: 529 Newhouse Bldg., Salt Lake City. L. A. Martin, pres.; C. E. Martin, sec.-treas.

Inc. April 29, 1911, in Utah. **Cap.**, \$100,000; shares 10 cts. par; assessable. In treasury, April, 1916, 176,993 shares stock and \$476 cash. Total debt reported as \$1,955. Listed in Salt Lake City.

Property: 7 unpatented claims, in Santaquin mining district, 65 miles S. E. of Salt Lake City, several miles from a railroad, and adjoining its twin brother, the Santaquin King on the south. Is said to show a well-defined fissure in limestone.

Development: consists chiefly of 250' of tunnels with 225' of winzes. Reported that "The ore found consists of silver, lead and zinc. The ore in sight has not been determined, according to official information." One tunnel is said to show a 3' width of vein with lead-zinc ore. At last accounts work had been resumed and in April a contract let for extending the main tunnel 300'. Property is a prospect, but not in the "preferred" class.

SANTAQUIN KING MINING CO.

UTAH

Office: Newhouse Bldg., Salt Lake City, Utah. R. B. Young, pres.; Ben C. Rich, sec.-treas.

Inc. 1911 in Utah. **Cap.**, 1,000,000 shares, increased in 1912 to 2,000,000; 50 cts. par. In treasury May, 1916, 242,065 shares stock and \$344. Listed in Salt Lake City.

Property: 9 unpatented claims, located in Santaquin mining district, 65 miles S. E. of Salt Lake City, 7 miles from a railroad, adjoins the Santaquin Chief on the north. Ore occurrence said to be similar to that of the Santaquin Chief.

Development: in May, 1916, consisted of 350' of tunnels with total underground workings of 780'; estimated "1,500 tons of commercial ore in sight." Reported that "unquestionably they will still be mining there after we have given way to the next generation"; unquestionably they will, if the old saying holds true that "a sucker is born every minute."

SANTIAGO CONS. MINING, MILLING & TUNNEL CO. COLORADO

Office: 1625 Broadway, Denver, Colo. **Mine office:** Georgetown, Clear Creek Co., Colo. Calvin Jordan, sec. Mine has a 5,000' tunnel showing gold and silver bearing copper ores. Recent development work on the 4th level opened up a 3½' ore body said to give smelter returns of \$70 per ton. The 7th level is now being extended 800' into new ground.

Equipment: includes steam power and a 50-ton concentrator. **Shipments:** in 1916, mainly from the 6th level, said to run 5 oz. gold; 27 oz. silver, and 10% copper. Mine is worked both by lessees and on company account.

SARATOGA MINING CO.

ARIZONA

Crown King, Yavapai Co., Ariz. J. L. Deming, mgr. According to report the company was reorganized in 1915, and in Dec., 1915, completed a 75-ton mill to treat Saratoga ore and also the dump ore of the adjoining

Crown King mine, belonging to the Yavapai Consolidated Gold-Silver-Copper-Co. The shaft will be deepened to the 250' level.

SARATOGA MINING CO.**COLORADO**

Office: Union Trust Bldg., Detroit, Mich. Mine office: Idaho Springs, Clear Creek Co., Colo. Officers: F. L. Colby, pres.; Chas. R. Dunn, sec.; E. W. Pendleton, treas.; with Edwin Lodge, directors. John Owen, gen. mgr.

Inc. Nov. 18, 1911, in Colorado, as the successor of the Clear Creek Mining & Reduction Co. Cap., \$300,000; shares \$10 par; nonassessable; issued. 20,024 shares.

Property: the Saratoga-Gaston group, and the Cyclops claim, at Russell Gulch, opened through the Newhouse tunnel. Equipment: includes steam power. The smelter, at Golden, has been disposed of. Idle 1914-1915.

SARITA MINING CO. (Pittsburgh Liberty)**CALIFORNIA**

Masonic, Mono Co., Calif. Has lease on Pittsburgh Liberty mine and mill, which has been remodeled at a cost of \$15,000 and now has 10 stamps, tube mill, and cyanide equipment, with a capacity of 60 tons per day.

SASCO SMELTER**ARIZONA**

Sasco, Ariz. Operated by A. S. & R. Co. under lease.

SAVANNA COPPER CO.**NEW MEXICO**

Address: Henry Hovland, Lonsdale Bldg., Duluth, Minn. Mine near Leopold, N. M. I. J. Stauber and I. L. Wright, lessees.

Inc. Sept. 16, 1908, in Arizona. Cap., \$2,000,000; shares \$10 par, half in full-paid and half in part paid stock, latter \$5 paid. The company was a merger of the Copper Gulf Mining Co. and Comanche Mining & Smelting Co., and also absorbed the Casa Grande Development Co., owning in fee simple all property formerly owned by the Comanche Mining & Smelting Co. and holding all but 320 shares, or 99.36%, of the stock issue of the Copper Gulf Mining Co. In Jan., 1913, the company had 133,116 shares of full-paid stock outstanding. Cash balance, Feb. 1, 1913, was \$12,628.

The Copper Gulf Mining Co. owns its property in fee and owes the Savanna Co. \$124,464 for money borrowed to develop its claims. The combined properties consisted of 199 claims, about 4,000 acres, all in Grant county, N. M., but in 5 districts. The company has 28 claims, 16 patented, in the Pinos Altos district, 4 patented claims in the Anderson district, 17 unpatented claims in Chloride Flat district and 1 patented claim in the White Signal district.

The claims in the Burro Mountain group sold, Jan., 1916, to Phelps, Dodge & Co. for \$700,000, constituted the principal and most valuable holdings. The Comanche group comprised 43 claims. The Copper Gulf group consisted of 1,440 acres. The Jennie group of 4 claims, patented 1910, on the Gila river, 35 miles N. W. of Silver City, is not worked owing to its inaccessibility, and development on the Chloride Flat property has been confined to assessment work.

SCHEELITE MINES, LTD. (Tungsten)**NOVA SCOTIA**

Scheelite, N. S. Inc. 1914. Cap., £750,000. Property: at Scheelite, Moose River, has 6 veins discovered 1907, showing 4" of ore. There are 9 shafts varying from 30-120' deep.

SCHOOL HOUSE MINING CO.**MISSOURI**

Joplin, Jasper Co., Mo. Inc. in Mo. Cap., \$100,000. Operates on 40 acres lead-zinc land near Carterville. Development: by 3 shafts, average depth 167'. Equipped with 800-ton concentrator. Does not reply to requests for information.

SCHOOL SECTION LEASING CO.**COLORADO**

Alfred La Montague, pres.-gen. mgr., Victor, Colo. Operates under lease

from State, block 8 of School Section 16, on Bull Hill, near Cameron. Company is reported to have operated for 15 years consecutively and to be a steady producer.

SCHUMACHER GOLD MINES, LTD.**ONTARIO**

Schumacher, Ont. F. W. Schumacher, pres., Columbus, Ohio. S. W. Wookey, mgr. Inc. July 16, 1914, in Ont. Cap., \$2,000,000.

Property: the Schumacher mine, adjoining the McIntyre, said to be a good little mine, but not extensively developed, the amount of ore blocked out being small. In April, 1916, diamond drilling located an orebody on the 600' level, said to be the fourth so located. A 150-ton mill was constructed in 1915 and put into operation in October; reported May, 1916, to be running at capacity with ~~mining~~ costs at 80c per ton, and total costs at \$4. During April, 1916, \$23,000 in bullion was shipped.

SCRANTON LEASING CO.**UTAH**

Address: c/o Wade & Funkel, Scranton Mine, Eureka, Utah. Operates under lease the Scranton mine at North Tintic, Utah. Produces lead and zinc ores from new discovery on surface and from Magazine tunnel. Employs 52 men and is producing 50 tons a day in 1916.

SCRANTON MINING & SMELTING CO.**UTAH**

Offices: McIntyre Bldg., Salt Lake City and Scranton, Tooele Co., Utah. **Officers:** T. G. Wolf, pres.; H. A. Knapp, treas., with B. H. Throop, all of Scranton, Pa., R. J. Deighton, sec.-mgr., and Wm. H. Bramel, Salt Lake City, directors. Cap., \$30,000; shares \$1 par.

Property: in the North Tintic district, is an old producer of silver, lead and zinc ores and the stopes were pretty thoroughly worked out. The company operated the mine until 1915. Lessees are now working it; reported in May that 1,200 tons of lead and zinc ores, yielding \$23,000 had been shipped during the past two months. About 50 men employed at present.

SCRATCH GRAVEL GOLD MINING CO.**MONTANA**

Hefena, Mont. **Officers:** W. E. Cullen, pres., Spokane, Wash.; H. I. Wilson, v. p.; John MacGinnis, treas.; T. B. Miller, sec., above with E. M. Hall, directors. Walter Larson, supt.

Inc. Nov. 5, 1915, in Montana. Cap., \$1,000,000; shares \$1 par; \$910,500 outstanding, Jan. 10, 1916; Security Transfer & Registrar Co., New York, transfer office and registrar. Listed on New York Curb.

Financial statement as of Dec. 31, 1915, shows: assets, \$1,116,731 which includes: land and mining rights, \$999,500; equipment \$10,431; cash in bank, \$17,300; treasury stock, \$89,500. Liabilities show accounts payable, \$29,250; capital stock, paid up, \$1,000,000; surplus, \$87,481.

Operating statement for period Nov. 5, to Jan. 1, 1916, shows: income from ore sales \$19,630 with expenses of \$9,399, leaving a profit of \$10,231.

Property: known as the Head property, 34.7 acres lies 1½ miles N. of Helena. Located on same fissure vein as the Franklin mine belonging to the Cruse estate. **Development:** to 300' depth, by 3 incline shafts, 90, 50 and 300', with 800' of drifting. In April the west drift on the 300' level was reported as showing a 5' vein of ore, of which 2' was sulphide said to assay around \$50 per ton; this had been opened for a distance of 30'. Only high-grade ore is being shipped, the low-grade being stored pending the construction of a mill.

Ore reserves: estimated in Nov., 1915, by C. E. Fryburger, E. M., as \$1,400,000 in ore blocked out, of which 35% was shipping ore; balance averaging \$20 per ton.

SEA COAST MINING CO.**ALASKA**

Address: Seattle, Wash., and Valdez, Alaska. **Officers:** C. Christopher, pres.; Earl R. Pulver, sec.-mgr.

Property: 8 claims on Shoups Bay, near Valdez, said to show 6 gold quartz veins in graywacke and argillite. Developed by tunnels. Sampling is said to give results of \$30 per ton. Development work is being done, 1916, and a 10-stamp mill, hydro-electric power plant, 1,800' aerial tram are being built; an air compressor will also be added. Mill and power plant sites are near the landing, while the mine workings are at elevations from 1,750' to 2,600'. See U. S. G. S. Bulletin 622, p. 178.

SEABOARD COPPER CO.**VIRGINIA**

Idle. Office: 77 South Market St., Boston, Mass. **Mine office:** Virgilina, Halifax Co., Va. Geo. R. Leghorn, pres.; Edward L. Pond, sec. **Inc.** July, 1902, in New Jersey. **Cap.**, \$300,000; shares \$1 par.

Property: the Dorothy and Bailey mines, 135 acres, in the Virgilina district, 3 miles from the Southern railroad, shows an 8' fissure vein in schist, carrying bornite ore, estimated to average 3 to 4% copper, with combined gold and silver values of \$1 to \$1.20 per ton. **Development:** by shafts of 30', 265' and 115', and by 2 tunnels, of 165' each, with a total of 840' of underground workings. The ore occurs in well-defined shoots: the proportion of shipping ore is small but mine might be profitably worked if flotation is used.

Equipment: includes a 275-h. p. steam plant, with a 25-h. p. Lidgerwood hoist, good for 500' depth, and a 5-drill compressor. There is a 100-ton mill, and buildings include an engine house, bunkhouse and office. Company inactive since 1904, but still alive.

SEATON MINING & MILLING CO.**COLORADO**

Address: Cincinnati, O. H. E. Machol, supt., Idaho Springs, Colo. **Property:** the old Seaton mine on Seaton Mountain, near Idaho Springs. Mine reopened 1916 through Argo tunnel and 650' raise to be put through from west drift on Seaton vein to connect with Foxhall tunnel. The Seaton vein is cut at 6,007' from entrance to the Argo tunnel.

SEATTLE-ALASKA COPPER CO.**ALASKA**

Office: 638 New York Blk., Seattle, Wash. **Mine office:** Latouche, Latouche Island, Alaska. **Officers:** E. Sparks, pres.; Geo. W. Terwilliger, v. p.; Geo. J. Hodge, sec.; Jos. Bjorn, treas. and O. B. Hess, directors.

Inc. in Washington. **Cap.**, \$1,000,000; shares \$1 par; nonassessable.

Property: 35 claims, about 700 acres, near Montgomery bay, in the southern and central part of Latouche Island. Claims are in 2 groups, one of 10 claims on tide water, with another of 25 claims about a mile from the harbor, latter being said to carry the extension of the Beatson-Bonanza vein.

Development: by a 287' tunnel, on the Delta claim, showing a vein of 4 to 6' width; ore when sorted, assays 11 to 22% copper. The Santa Clara No. 1 claim has a 101' shaft, with a 140' tunnel and an 85' crosscut, showing 2 veins, 1 of 4' width.

Equipment: includes steam power, and there is a mill operated by water power, having five 1,000-lb. stamps, with room for additional stamps, 2 Card tables, and 1 slime table. Small shipments made to the Tacoma smelter in 1914 and 1915.

SEATTLE-BOSTON COPPER CO.**WASHINGTON**

Idle. Company owns water rights of 40,000 est. h. p. and a charter for a railway to open large timber tracts and reach the Dutch Miller mine, described under title of Dutch Miller M. & S. Co. The former mine holdings of the Seattle-Boston C. Co. are described in Vol. VIII, Copper Handbook.

SEATTLE CONTACT MINING CO.**NEVADA**

Address: J. V. Marshall, gen. mgr., Contact, Elko Co., Nev. T. A. Marshall, pres., L. B. Walters, sec., Seattle, Wash.

Property: the Delano mine, 8 claims, in 3 tiers at Contact, Nev., carries the Brooklyn contact vein, the Palo Alto and Blue Bird veins, 150' apart. The latter is a fissure vein, 1'-15' wide, in grano-diorite, with high-grade streak mined in 1916 for 2' to 10' wide, and yielding copper ore.

Geology: and development of this group are fully described by Schrader, Bull. 497, U. S. Geol. Survey, 1912, pp. 119 and 121. **Development:** mainly by tunnels and to a depth of 175'; a new shaft being 170' deep in July, 1916.

Production: Feb.-July, 1916, 1,950 tons, averaging \$45 per ton, and carrying 18% to 23% copper, 6 oz. silver and 80 cts. gold per ton. Production costs are given at \$17.50 per ton. Company has held this property since 1905 and deserves the success it is now having.

SEATTLE MINING, MILLING & POWER CO.**NEVADA**

Contact, Nevada. Henry Smith, mgr. Company owns the Mammoth mine covering 12,000' along a contact deposit 20' to 125' wide, reported to show 55' of 5% ore in one face.

Production: begun May 20, 1916, up to Aug., 1916, amounted to 165 tons containing 9.5% copper, 6 oz. silver and \$2 gold, averaging \$43 per ton. Transportation to the railway at Rogerson is reported as \$7 to \$11 per ton, railway freight \$3.75, smelting \$2 and sampling 50c, or a total of \$13.75. Twelve men are employed.

SECRET MINING & MILLING CO.**UTAH**

Offices: Judge Bldg., Salt Lake City and Alta, Utah. Reported "dead" in Copper Handbook, Vol. X. Reorganized and rejuvenated in 1915.

Officers: Wm. M. Minor, pres.; H. W. Sherwood, v. p.; Judge H. S. Harper, sec.; H. Pingree, treas., with R. W. Clough, directors.

Inc. about April, 1906, in Utah. **Cap.,** \$300,000; increased in 1915 to \$600,000; shares, \$1 par. The additional 300,000 shares were to provide funds for development.

Property: 15 claims, 300 acres, 100 patented, at Alta, Little Cottonwood mining district, adjoining the Albion on the S. E., said to show lead-silver ore. Country rock is quartzite. **Development:** by tunnels; reported in April, 1916, that an 80' tunnel would be extended to cut the surface showings at a depth of 800'. The company is also reported as having obtained the right from the Albion to drive a crosscut into Secret ground from a point 2,500' in from the portal of the Albion tunnel. An upper tunnel is in 500'. Workings total 700'. No orebodies large enough for production have been found. Property is in the speculative class.

SECURITY COPPER CO.**WASHINGTON**

Address: 720 Peyton Bldg., Spokane, Wash. **Mine office:** Chewelah, Stevens Co., Wash. **Officers:** J. F. McGinnis, pres.; M. C. Hunter, v. p.; A. H. Syverson, sec.-treas.; L. K. Armstrong, gen. mgr.; G. E. Hyatt, supt.

Inc. 1913. **Cap.,** \$1,000,000; shares \$1 par.

Property: 9 claims, 120 acres, includes the Matterhorn and Van Slyke groups, adjoining the Standard-Chewelah, and the June-Echo mines. **Development:** by about 2,000' of surface and underground work on a series of six veins. Sinking of shaft on Matterhorn claim, now down 190', will be continued during 1916 to 500', with crosscuts to the No. 4 vein at 350' and 500' levels. **Equipment:** includes a gasoline hoist and a 3-drill air compressor.

SEDALIA COPPER CO.**COLORADO**

Property under lease to the Salida Copper Co., which see.

SEEMANN INVESTMENT & FINANCE CO.**COLORADO**

Address: Box 1375, Denver, Colo. **Officers:** Henry I. Seemann, pres.; K. R. Seemann, v. p.; W. S. Lippencott, sec.-treas., Flint, Mich.

Inc. July 12, 1904, in Colo. **Cap.**, \$100,000; shares \$100 par.

Company owns the following mining claims at Cripple Creek, Teller Co.:—Black Crow Lode, Mayflower Lode, Pride of Grassy Lode, W. E. S., E. F. C., & Rittenhouse, The 4-11-44, Idlewild & Mexican, Dark Cloud and Nada Lodes; and in Clear Creek Co.: Golden Star Lode, Ace of Diamonds Lode, Deuce of Diamonds Lode, Jack of Diamonds Lode, Und. ½ Surprise Ext. West, Vindicator Lode.

The company is not a mining company. It is the intention to lease or sell, or probably form a mining company, and turn the properties over to such company.

SELBY SMELTING & LEAD CO.**CALIFORNIA**

Office: Merchants Exchange Bldg., San Francisco, Cal. **Works office:** Selby, Contra Costa Co., Cal. **Officers:** H. B. Underhill, Jr., pres.; Eugene B. Braden, v. p.; Chas. J. Durbrow, sec.

Inc. 1875, in Nevada and controlled, through stock ownership, by American Smelters Securities Co., a subsidiary corporation of the **American Smelting & Refining Co.** The works represent an investment of about \$4,000,000.

The smelter, at Vallejo Junction, near Carquinez Strait, receives ore by rail and water, from all of the Pacific states, but principally from Nevada. The works include a 400-ton smelter having lead stacks, a 200-ton lead reverberatory, a refinery for parting gold and silver, and a plant for the manufacture of bluestone. **Equipment:** includes steam, electric and air power. The plant includes a bag house, and also a special chamber having the Cottrell process for precipitating solids from fumes, used in connection with the parting room of the gold and silver refinery.

The Selby is perhaps the largest smelter producer of gold in the United States, or possibly in the world.

SELLS MINING CO.**UTAH**

Address: Judge Bldg., Salt Lake City and A. O. Jacobson, supt., Alta. **Officers:** Ezra Thompson, pres.; L. R. Eccles, v. p.; Jas. Murdoch, sec.; John Pingree, treas., with A. O. Jacobson, J. C. Lynch, and Lynn Thompson, directors.

Inc. 1914, in Utah. **Cap.**, 600,000 shares; 25c par; 400,000 issued. In May, 1916, there was \$3,994 in the treasury; debts amounted to \$13,500 on the property and \$24,446 on the 6 patented claims, latter amount is due Sept. 1, 1916. Listed on Salt Lake City Exchange. Company has remained courteously non-communicative to requests for information.

Property: 16 claims, 6 patented, in the Alta-Cottonwood mining district, Salt Lake Co., 8 miles from a railroad, said to cover 1,800' to 3,000' along the mineralized zone passing through the South Hecla property which adjoins on the west. **Ore:** carries silver-lead-zinc-copper, in fissure veins in limestone and in contact deposits between limestone and granite; veins strike N. E.-S. W.

Development: mainly through the Dwyer tunnel of the South Hecla company, consists of a 200' shaft, 2,200' of tunnels and 600' of raises. Reported in May, 1916, 200' of ore proven on the strike, with ore in a 100' raise; average width of ore 6'. Shipments of about 125 tons were made early in 1916, returning \$2,768 net. Initial shipment is said to have assayed 77 oz. silver, 3% lead, 1.6% copper, 1.6% zinc and 19% iron per ton. Is a speculative mining venture, that has promising ground.

SELMA MINES CO.**UTAH**

Office: Kearns Bldg., Salt Lake City, Utah. **Mine office:** Knightsville,

Juab Co. **Officers:** L. C. Peterson, pres.; L. F. Bello, v. p.; O. W. Carlson, sec.-treas.-supt., with C. E. Beers and Edgar Farmer, directors. L. P. Peterson, mgr.

Inc. Dec., 1909, in Utah, as successor of Selma Consolidated Mining Co. Cap., \$50,000; shares 5c par; assessable.

Property: 10 claims, unpatented, near the Lehigh Tintic mine, supposed to carry the northern extension of the mineral zone of the Colorado mine, 2 miles from a railway. The property has a lime-porphry contact, with 3 principal fracture zones carrying silver-lead and copper ores, and has secured small quantities of exceedingly high-grade ore.

Development: by a 3-compartment shaft, and tunnels showing leached ground, with occasional bunches of good ore. The old company expended about \$75,000 on development.

Equipment: includes electric power, with an electric hoist and an air compressor.

Developing: in 1915-16. Reported in Oct., 1915, "Selma has no high-grade orebodies in sight at present, but all indications point to them at any time"; apparently conditions of "low visibility" prevent the ore from being sighted.

SELWAY-BOND COPPER GROUP

MONTANA

Address: Herbert B. Selway, 109 Washington St., Dillon, Mont. **Property:** 6 claims, 120 acres, situated 1½ miles from Armstead, Mont. Claims cover 4,000' on the course of several E.-W. fissure veins, 3' to 3½' wide that cross beds of quartzite, schist and limestone. The ore carries 3%-9% copper.

Development: by 130' shaft and several shallow openings, all said to show ore.

SENECA MINING CO.

MICHIGAN

Subsidiary of the Calumet & Hecla Mng. Co.

Office: 12 Ashburton Place, Boston, Mass. **Operating office:** Calumet, Mich. Mine near Mohawk, Mich. **Officers:** Rodolphe L. Agassiz, prés.; Geo. A. Flagg, sec.-treas.; Jas. MacNaughton, gen. mgr.; preceding with Francis L. Higginson and Thos. L. Chadbourne, directors.

Inc. March 23, 1860, in Michigan. Cap., \$500,000; shares \$25 par; fully issued, \$10 paid. Is controlled, through ownership of 11,207 shares, by the Calumet & Hecla Mining Co. The company had a debit balance, Jan. 1, 1916, of \$179,702. American Trust Co., Boston, registrar; State Street Trust Co., Boston, transfer agent. Annual meeting, fourth Monday in March.

Property: 1,880 acres, just north of the Mohawk and Ahmeek mines, is a swampy tract, somewhat irregular in outline and heavily covered with drift. The property carries the Calumet, Keweenaw and Allouez conglomerates and the Osceola, Kearsarge and other amygdaloidal beds, this statement being based mainly upon the outcrop of the Kearsarge lode seen in the N. E. corner and extending for 1¾ miles across the property. The mine is on the Keweenaw Central railway.

Development: The property was diamond drilled, 1907-08, giving some good cores from the Kearsarge amygdaloidal bed. This was followed by the sinking of a single 3-compartment shaft, located about 3,000' north of No. 1 shaft of the Gratiot mine. The shaft is sunk in the footwall, being 60' from the Kearsarge bed on the 1st level, 250' on the 3rd level, and 220' on the 5th level. The shaft is 957' deep, with 5 levels. Development shows little or no copper values above the 4th level, but the bed has been opened by crosscuts and drifts on several levels, with about 2,000' of laterals. On the 5th level the Kearsarge bed is about 15' wide and for a distance of 150' carries a 4' pay-streak having fair copper values. No. 1 shaft has a temporary frame shaft rock house, with crusher.

There is room for a second shaft on the outcrop of the Kearsarge bed, but this lode must be reached by vertical or sharply inclined shafts on the balance of the property as the lode outcrops outside the holdings, though the underlay extends under the entire tract.

Equipment: includes a small power house, Lake Shore duplex hoist, good for 2,000', a 15-drill air compressor and 2 locomotive firebox boilers. Buildings include a boarding house and bunk house. Operations were suspended April, 1911.

Early in 1916 an attempt was made to form a new company, Seneca Copper Co., to take over the property, but the project is reported abandoned by the Boston brokers who were underwriting the stock, and money paid in by subscribers is said to have been returned to them. Property considered promising.

SENECA SUPERIOR SILVER MINES, LTD. ONTARIO

Offices: 103 Bay St., Toronto and Cobalt, Ontario. **Officers:** S. Harry Worth, pres.; F. W. Zoller, v. p.; R. F. Segsworth, treas., with W. E. Segsworth and A. H. Dewey, directors. W. E. Segsworth, managing director. R. H. Lyman, mine mgr.

Inc. Sept. 29, 1911, in Ontario. **Cap.,** \$500,000; shares \$1 par; 478,884 shares issued.

Annual report for 1915 shows: assets, \$794,509, which includes: mining leases, \$150,000; discount on capital stock, \$262,275; ore on hand and in transit, \$194,748; Peterson Lake Mng. Co., \$47,563; accounts receivable, \$3,339; cash, \$132,766; miscellaneous, \$3,814. Liabilities include: profit and loss, \$306,585; current, \$9,039. Net profit on operations was \$568,501 in 1915, compared with \$320,629 in 1914.

Dividends: \$263,136 in 1913; \$335,219 in 1914; \$335,219 in 1915. Total dividends for the three years equaled 205%.

Property: an 8-year lease on a part of the Peterson Lake property at Cobalt. Starting from a shaft on the shore of Cart Lake, the company ran a crosscut southward and discovered, in Oct., 1912, the Worth vein which is said to have produced 335,575 oz. silver, valued at \$194,847, to the end of the year. Up to 1915 the mine had 9,098' of underground workings.

Ore reserves: at beginning of 1916 consisted mainly of broken ore in the stopes, ore in floors and pillars, and low-grade ore below the 4th level and on the dump, estimated to yield 400,000 to 450,000 oz. of silver, compared with reserves of approximately 2,000,000 oz. the year previous.

Equipment: includes electric power, hoists, compressors, electrically-driven machine shop and a small but complete mill.

Production: in 1914 and 1915—

	Silver Oz.	Cost per Oz. (a)	Profit per Oz.
1915	2,047,150	23.45c	27.84c
1914	1,430,674	30.53c	22.49c

(a) includes a royalty of 25% on silver produced.

In spite of the higher price of supplies in 1915 the cost per oz. of silver extracted was greatly lowered, but this was done at the expense of curtailed development, which was reduced to a minimum; also due to the fact that much of the ore produced came from ore that had been broken in former years. Ore reserves were depleted early in 1916 and lease was closed down in April.

SEOUL MINING CO.

KOREA

Office: 1002 First National Bank Bldg., Denver, Colo. **Mine office:** Hol-Kol, Hwang-Hai, Korea. **Officers:** H. Collbran, pres.; H. R. Bostwick, 1st v. p.; S. S. Selden, 2nd v. p.; H. E. Collbran, sec.-treas.; A. H. Collbran, gen. mgr.-mng. engr.; preceding with J. S. Collbran, aud., F. B. Lawson, and

A. Coors, directors. R. M. Blamey, mine supt.; F. F. Bostwick, purch. agt.; H. G. English, mach. supt.; F. C. Brown, mill supt.; W. T. Hall, resident engr.; E. W. Mills, supt. Tul Nu Chung mine; B. V. Barton, supt. of prospecting.

Inc. April 27, 1908, in Connecticut. Cap., \$500,000; shares \$25 par; issued 20,000 shares. Bankers' Trust Co. of New York, registrar. Annual meeting, third Monday in October.

Dividends: have been 25% in 1910; 50% in 1911, 1912, 1913, 1914 and 1915.

Statement submitted December, 1915, shows total earnings, \$703,701 for 1914; operating expenses were \$290,401 and profits, \$413,300. Cash balance at end of 1914 was \$252,106.

Property: a lease on the Suan concession, granted Nov. 4, 1905, to the Korean Syndicate, comprising a tract of land 13x20 miles in extent, about 52 miles from Pyeng-Yang. The concession carries full rights to examine, develop and operate all mines and deposits contained within the area covered by the grant. Company also has permission to cut timber and to use all the water required for mining, milling and other purposes from sources within, or adjacent to the district. These privileges are given for a royalty of 1% on the gross value of the output of the mines. There is an additional annual tax of about 30 cts. per acre (50 sen for each 1,000 tsubo), on all land actually selected for mining operations, such selections to be made at any time before Feb. 1, 1916.

The rights in this concession are secured to the Seoul Mining Co. by an agreement made with the Korean Syndicate which provides for the payment of 8% royalty of the actual profits derived from the concession, clear of all depreciation charges.

Geology: property shows both granite and limestone, the principal ore-body, known as the "Collbran Contact," lying between limestone and a batholith of granitoid rock. Ores carry gold, copper, tungsten and bismuth, the gold seldom being visible and rarely in coarse condition. Silver is also present, alloyed with the gold to an appreciable percentage. The copper ores contain chalcopyrite, bornite and tetrahedrite, with a high gold content, of fair average, probably being about 1.5% copper and \$12 gold. The orebodies are irregular and in general parallel with the limestone-granite contact, connected more or less by generally well-defined fissures. The gangue is a highly silicious crystalline limestone, altered by contact action and containing a considerable amount of magnesia and alumina.

Ore reserves:	Tons	Value p. t.	Total Value
1914	1,208,600	\$12.42	\$15,015,000
1913	633,300	12.07	7,646,000
1912	421,000	14.44	6,080,000
1911	211,400	16.55	3,499,000

Development: by a 500' inclined shaft and several tunnels, with about 25,000' of workings. **Equipment:** includes 1,200-ton stamp mill, 400-ton ball mill, a steam plant, with hoist and air compressor.

The 40-stamp mill at Soctario, in operation since 1910, treated the following tonnage:

	Tons Ore	Rec'y p. t.	Cost p. t.	Profit p. t.
1914	74,550	\$9.44	\$3.90	\$5.54
1913	71,535	9.39	4.13	5.26
1912	74,432	8.25	3.52	4.73
1911	70,229	7.83	3.01	4.82
1910	32,793	9.86	4.35	5.51

In 1916 the output has averaged \$150,000 per month in bullion and concentrate, the ore running about \$9.60 per ton, with expenses of about \$53,000 per month.

SEVEN DEVILS COPPER CO.

IDAHO

Office: 217 Linden Ave., Ithaca, N. Y. **Mine office:** Landore, Adams Co., Idaho. **Officers:** Wm. K. MacNamara, pres.; Chas. F. Riddle, v. p.; Chas. H. McColloch, sec.; Fred D. Smith, treas.-gen. mgr.; preceding with M. J. Brundage, and Chas. Marvin, directors; Geo. A. Jones, supt.

Inc. March 31, 1908, in Ariz. **Cap.**, \$2,000,000; shares \$1 par; non-assessable; issued, \$1,558,993. **Bonds:** \$250,000 authorized at 6%. Annual meeting, second Tuesday in March.

Property: 15 claims, partly patented, 134 acres, including the Arkansaw, Margaret mines, and bond and lease on the Decorah mine, 16 miles from a railway. Lands show contact deposits, between diorite and limestone, having a strike of N. 75° W., and said to be 15 to 50' in width. These deposits carry oxidized ores, succeeded at a little depth, by sulphides, the chalcopyrite and bornite ores said to average 5% copper, 2 oz. silver and \$1 gold per ton. **Development:** exclusively by tunnels, there being drift tunnels of 900' and 150', and a 483' crosscut tunnel, with 2,800' of workings, estimated by the management to show 182,700 tons of ore blocked out for stoping. The Arkansaw mine has produced a little high-grade ore in the past.

Equipment: includes a 125-h. p. electric plant, taking power from the Oxbow station of the Oregon-Idaho Power Co., and there is a sawmill near the mine.

Production: to 1916, 555 tons ore said to average 11.2% copper.

Inability to pay off \$20,000 debentures caused closing down of mine and suspension of all operations except leasing, in 1915. Arrangements are being made, 1916, for the financing of this loan. Management plans further development of Iowa tunnel and addition of compressor, drills, etc. in 1916.

SEVEN TROUGHS BUCKHORN MINING CO.

NEVADA

Vernon, Humboldt Co., Nev. Operates property showing a 6' vein of gold-silver ore.

SEVEN TROUGHS COALITION MINING CO.

NEVADA

Lovelock, Nev. **Officers:** L. A. Friedman, pres.-gen. mgr.; Wm. Adams, 1st v. p.; M. R. Vanderkloot, 2nd v. p., with J. T. Goodwin, directors. H. J. Murrish, sec.; R. Nenzel, asst. sec.; Frank Bird, supt.

Inc. Sept. 29, 1908, in Nevada, to take over the Seven Troughs Kindergarten Mining Co. and the Seven Troughs Therian Gold Mining Co., together with some other ground. **Cap.**, \$1,500,000; \$1 par; outstanding August 27, 1915, 1,433,027 shares. Security Transfer & Registrar Co., New York, transfer agent and registrar. Listed in Salt Lake City and on New York Curb.

General balance sheet for fiscal year ending June 30, 1915, showed assets of \$1,516,613, which included: mining property, \$1,242,058; buildings and equipment, \$40,698; total current assets, \$142,931. Liabilities showed capital stock, \$1,443,027; accounts payable, \$655; taxes, \$628; surplus, \$71,629.

Report for year ending April 30, 1916, shows total income, \$337,577; total expenses, \$241,136; leaving operating profits of \$96,441. Cash on hand Jan. 1, 1916, \$69,024; current assets, \$122,681.

Dividends: paid in 1915 totaled \$180,380, consisting of four quarterly and one extra dividend in December, all of 2½ cts. per share. Total dividends paid to 1916, \$216,493.

Property: 14 patented claims at Seven Troughs, has high-grade gold-silver ore in a narrow vein which varies in width from 4" up to 20 and 30". Developed to the 1,630' level which is 130' on the dip below the 1,500' level.

Management claims 2½' of \$250 ore on the 1,600' north drift, this ore-shoot also showing on the 1,500' level, and the raise between. No ore reserves given. In 1915 the output totaled 4,509 tons of ore, yielding \$416,084; the ore handled by the mill averaged about \$93 per ton.

No engineer's report on the property has ever been made. Management has not replied to requests for information.

SEVEN TROUGHS MINING CO.

NEVADA

Seven Troughs, Humboldt Co., Nev. **Officers:** L. A. Friedman, pres.; A. A. Williams, v. p.; R. Nenzel, sec.-treas.; with J. D. Hilger and R. J. Evans, directors. C. W. Poole, gen. mgr.

Inc. Nov. 26, 1906, in Utah. **Cap.**, \$1,000,000; shares \$1 par; outstanding, 897,700 shares. Annual meeting, second Monday in June. Listed in Salt Lake City.

General balance sheet, Jan. 1, 1916, shows assets of \$1,107,107, which includes: property and equipment, \$1,086,502; current assets, \$20,605. Liabilities show a surplus of \$16,691. Income for 1915, \$3,528, was mainly on lessee's production; total expenses were \$4,175, leaving a net loss for the year of \$647, compared with profits of \$1,205 in 1914.

The discord among the company's stockholders was apparently settled in May, 1916, when a new management was put in with the purpose of actively developing the property which during the past few years has been worked by lessees.

Property: 29 claims, 26 patented, including the Fairview mine, for several years one of the heaviest producers of the district, located in the Seven Troughs mining district. Developed by a 700' vertical shaft. Said to show gold-silver ore occurring in fissure veins in basalt.

Equipment: includes a 50-h. p. gasoline hoist. Output in 1915 consisted of 260 tons of ore with a gross yield of \$15,000.

The new management, according to report, intends to sink a winze from the 700' level with the hope of developing ore at depth. In a supplemental report to the annual report for 1915, C. W. Poole, gen. mgr., states that the lessees operated in 1915 at a loss to themselves of over \$40,000; he claims there is nothing in the mine it will pay the company to work, and that it will not pay to sink deeper.

SHAPTER MINING CO.

COLORADO

Office: 1 Broadway, New York. **Mine office:** Idaho Springs, Clear Creek Co., Colo. M. S. Payton, pres.; Chas. D. Ross, sec.-treas. Inc. 1880, in New York. **Cap.**, \$100,000; shares \$100 par.

Lands carry copper ores with values mainly in gold. **Development:** by an 800' shaft and a 5,500' tunnel. Has been idle for several years.

SHAPTER SILVER MINE

TEXAS

Owned by the Presidio Mining & Smelting Co., which see.

SHAMROCK CONSOLIDATED MINES, LTD.

ONTARIO

Cobalt, Ont. **Officers:** P. Kirkegaard, pres.; Malcolm Lang, v. p., with Jos. Montgomery, Louis Wintner and Wm. H. Price, directors. A. M. Bilsky, mgr. **Cap.**, \$1,000,000.

Company was formed to reopen the Shamrock mine at Cobalt; considerable development work was done on the property a number of years ago. Reported in April, 1916, that the company was looking for extensions of the Beaver vein by driving a crosscut on the 400' level along the boundary.

SHAMROCK MINING CO.

ARIZONA

Duncan, Yuma Co., Ariz. **Officers:** Robt. McEntee, pres.; Lawrence McEntee, v. p., with B. F. Barbour and G. N. Neal of Birmingham, Ala., directors.

Property: 840 acres, in the footslopes of the Plomosa range, Vicksburg district, Yuma Co. **Equipment:** includes hoist, compressor, etc. **Shipments:** made intermittently since 1913, have been high-grade, running from \$800 to \$1,050 per carload.

SHAMROCK MINING CO.**WISCONSIN**

J. Maloney, mgr., Mifflin, Wisconsin. **Officers:** H. F. Cochenus, pres., 1536 First Nat'l Bank Bldg., Milwaukee, Wis. P. C. Kolinski, gen. mgr.

Property: 37 acres in Mifflin, said to show a 32' vein, running N. W. - S. E., carrying a 10" to 12" streak of lead-zinc sulphides, averaging 35% zinc, 25% lead. Mine is the old Shamrock & Peni mine on the so-called old 80 tract, mined 100 years ago for lead, recently quarried for glass rock and now for its 10" to 12" of coal black "Jack" ore.

Development: by 340' tunnel, and opened to 28' depth, by quarry, stripping off the "glass rock." About 800 tons shipped in 1915, that averaged 30% zinc and 10 tons of lead concentrate.

Ore is treated in 50-ton mill and concentrate goes to DePue smelter. Property worked by double shift 1916. Company took over the Sunset mine, July, 1916.

SHAMROCK MINING & MILLING CO.**NEW MEXICO**

L. D. Harrigan, pres.; Geo. A. Kalar, supt., Steeple Rock, Grant Co., N. M. **Property:** the Shamrock mine, shows gold-bearing copper ore, developed by tunnel work. Has steam plant and railroad spur at mine.

In 1915 company attempted to sell 400,000 shares of treasury stock at 25 cts. a share to provide funds for further development.

SHANNON COPPER CO.**ARIZONA**

Office: 67 Milk St., Boston, Mass. **Mine office:** Metcalf, Greenlee Co., Ariz. **Works office:** Clifton, Ariz. **Officers:** Nathan L. Amster, pres.; H. N. Stonemetz, v. p.; Chas. R. Jeffers, sec.-treas.; preceding with Kenneth McNeil, Wm. A. Paine, Jas. Virdin, C. J. McGilvray, Carl M. Loeb and David A. Ellis, directors. J. W. Bennie, gen. mgr.; H. H. Dyer, mine supt.; Wm. H. Bond, mill supt.

Inc. Nov. 13, 1899, in Delaware. **Cap.,** \$3,000,000; shares \$10 par, increased July, 1909, to \$3,300,000; issued, \$3,000,000, with \$300,000 held in the treasury. **Bonds:** \$600,000 at 7% were retired 1911, but the company has guaranteed an issue of \$600,000 of 6% bonds, authorized May, 1909, by the Shannon-Arizona Railway Co., reduced by purchase to about \$198,000. The company has paid 5 dividends, aggregating \$750,000, to end of 1913. Shares are listed on the Boston Stock Exchange. National Shawmut Bank, Boston, registrar; Boston Safe Deposit & Trust Co., transfer agent. Annual meeting, third Wednesday in March.

Controls the Coronado Mining Co., through ownership of 53% of the stock issue and operates, under lease, the property of the Leonard Copper Co., owning the Copper Belle mine at Gleeson, Cochise county, Ariz.

Comparative General Balance Sheet:

	Assets:		Liabilities:			
	Mines & Equip.	Current	S. A. Ry. Bonds	S. A. Ry. Cur. Acct.	S. A. Ry. Suspense	Total
1915.....	\$3,408,115	\$595,830	\$381,000	\$64,945	\$5,204	\$4,455,094

1915.....	\$3,000,000	\$33,139	\$610,056	\$5,771	\$ 806,128	\$4,455,094
1914.....	3,000,000	31,784	75,168	4,977	1,129,171	4,241,100
Balance sheet of Shannon-Ariz. Ry. Co. for 1915 shows assets: \$1,307,977,						

which includes: road and equipment, \$716,643; bond issue guarantee account, \$590,000; cash, etc., \$1,333. Liabilities include: capital stock, \$600,000; bonds outstanding, \$575,000; Shannon Copper Co., \$64,945; accrued interest, \$6,230; reserves, \$33,910; loss in 1915, \$27,891.

Income Account:

	Metal Sales	Expenses	Profit
1915.....(c)	\$1,102,275	\$ 853,625	\$248,650
1914.....(b)	1,291,539	1,190,345	101,194
1913.....(a)	3,153,412	2,713,837	439,575
1912.....	2,594,867	2,034,252	581,015
1911.....	2,014,219	1,895,365	118,854

(a) 16 months to Jan. 1, 1914. (b) operated first 9 months only. (c) add interest, \$16,228, and deduct expenses 5 months during which property was idle, \$43,044, leaves \$221,833 net profit for 1915.

Property: 34 claims, 562 acres, at Metcalf, in the Greenlee district, also about 600 acres mill and smelter sites at Clifton, Ariz., and some limestone claims on the San Francisco river. The Shannon has a side-line agreement with the Arizona Copper Co., Ltd., by which extra-lateral rights are waived mutually, obviating all possibility of future litigation over apex rights.

Geology: ore occurs between limestone and porphyry, under hematite gossans, the oxidized ores favoring the limestone, while the ores in the porphyry side are mainly silicious sulphides. The ore occurs in irregular deposits, some of which are up to 300' in the greatest dimension. Many of the orebodies are large, and though low-grade and bunched, the quantity is very great. The upper levels in the mine show oxide and carbonate ores of 3 to 8% copper tenor; sulphide ores of 2 to 6% copper tenor are mined in the lower workings, the ores holding chalcopyrite with a little chalcocite. The mine as a whole is deficient in sulphide ores, and about one-third of the production is silicious ore, too low in grade to smelt, not readily amenable to concentration, but giving good results with the Bennie system of leaching when mixed with other ores. The concentrating ores average 2.5% and smelting ores about 4%.

Development: by shafts, tunnels and open pits, workings reaching a depth of 1,300' below the crest of the mountain, and totaling about 28 miles, 1916, with considerable ore reserves. The mine is timbered with 12x12" square sets. Extraction is by 3 double-track tunnels, connecting with a 1,400' double-track incline tram leading to the Shannon-Arizona railway, with 6 ore bins at either end, the tramway, inclined at 36°, having 10-ton cars, operating in counterbalance, the steel cable passing around a 13' double drum, which runs a small air compressor serving as a brake.

Shannon-Arizona Ry. Co. The Shannon C. Co. owns the entire stock of the Shannon-Arizona Railway Co. Cap., \$600,000, shares \$100 par, and \$381,000 of the railway's \$575,000 6% 10-year bonds, guaranteed by the Shannon, and convertible into Shannon Copper Co. stock. The officers are: Nathan L. Amster, pres.; Chas. R. Jeffers, v. p.-sec.-treas.; John W. Bennie, W. A. Paine, B. F. Spriggs and C. G. Cole, directors.

This standard-gauge line, of about 10 miles length, was built and equipped at a cost of about \$700,000, the territory traversed being very rugged and including a 900' tunnel. The line was completed 1910, and not only is saving considerable money to the Shannon on ore haulage, but also gives immunity from serious interferences formerly caused by frequent floods.

Mill: the 500-ton concentrator at Clifton, on the San Francisco river, 8 miles from the mine, has ore bins 100' long, in 2 sections, for first and second-grade ores. The mill is of steel, in 2 connected sections, terraced,

the upper section having two Blake crushers, four 6' Huntington mills, a 220' Robins belt conveyor, Hartz jigs and Wilfley tables. The lower section has 38 sand and slime tables. The steel power house at the concentrator has two 250-h. p. Stirling water-tube boilers and a 300-h. p. Nordberg tandem-compound engine. Water is pumped from the wells near the San Francisco river by a 600-gal. electric triplex pump.

Smelter: the smelter at Clifton, 7 miles from the mines, has 3 blast furnaces with a combined daily capacity of 1,800 tons of ore and treats concentrates and oxidized ores from the mines at Metcalf and pyritic ore from the Copper Belle mine of the Leonard Copper Co. The mixture is almost self fluxing. Above the charging floor are 23 ore bins, with chutes. Fumes from the blast furnace pass through a 10' dust flue to a 20x20x100' dust chamber with hopper bottom, discharging periodically into cars on a railway track in a tunnel beneath, fumes passing from the dust chamber through a 170' flue to a 150' steel smokestack. Slags are hauled by an electric locomotive. The converter plant has 2 stands and is capable of turning out 120,000 lbs. of copper daily. The briquetting plant for fine ore, concentrates and flue dust, has a daily capacity of 60 tons, and there is a small sampling mill in connection. Slag haulage, converters, slag elevators, dust conveyor, briquetting plant and custom sampler, are all operated electrically. The smelter power house has a 300-h. p. tandem-compound condensing engine, direct-connected to blowers, and converter blast is supplied by a 250-h. p. Nordberg air compressor. Fuel is petroleum.

In 1916 a 150-ton leaching plant was built, thorough experimental work having proven that mill tails and probably a very large tonnage of semi-oxidized ore can be treated at a profit.

The company owns general stores, at Metcalf and Clifton. There are about 60 dwellings for employees. The Shannon owns and operates a water plant. Forces are about 1,200 men at the mines, mill and smelter.

Production:

	Copper Lbs.	Silver Oz.	Gold Oz.	Cost Per Lb.	Sell.Price Per Lb.
1916.....(a)	5,364,570				
1915.....(b)	6,017,642	35,450	690	13.40c	17.80c

1907.....	10,874,619	34,037	950	14.50c	

(a) To Aug. (b) 9 months. (c) 16 months.

The property was closed down in Sept., 1914, on account of the low price of copper. Operations were resumed March 1, 1915, but in September the company was compelled to close down again, due to the miner's strike in the Clifton-Morenci district. This is most unfortunate for Shannon, for it is a high cost producer (13.4 cts. per lb. in 1915) and it is only on high priced copper that the company can earn money for dividends. Operations were started in Feb., 1916, and in July company produced 968,000 lbs. of copper, at a cost of 17c a pound. Earnings for Feb. to May inclusive were \$320,000 or about \$1 per share.

SHARP MINING CO.; BYRON E.

Owns Cleveland group of 10 claims, north of Springdale, Stevens Co.,

Wash., an old property closed down because the silver-lead ore was zinciferous; 15,000 tons reported on dumps and blocked out.

A 50-ton mill is to be erected 1916.

SHASTA BELMONT MINING CO.

CALIFORNIA

Office: Carson City, Nev. Mine office: Winthrop, Shasta Co., Cal. Officers: Will E. Casson, pres.; W. Brougher, v. p.; Jas. T. Davis, sec.-treas.; with S. L. Lee, W. H. Cavell, directors. Wm. Arps, supt. Cap., \$1,000,000; shares \$1 par; 684,000 issued.

Property: 8 claims, unpatented, 140 acres, known as the Graham group, in the Copper City district and in the west central part of the Shasta copper belt. The group is about 3 miles east of the Bully Hill mine and smelter, and 8 miles from the Mammoth mine. The property is said to have a surface outcrop resembling that of the Bully Hill mine. Development: by a 75' shaft, 4 short tunnels and several opencuts, all showing streaks and bunches of high-grade copper ore. Buildings include a cabin and smithy. Company did development work in 1914-1915 and made one small shipment of ore to the Mammoth smelter, which ran 7.21% copper and about 4 oz. silver. Driving lower tunnel in 1916 to reach the main orebody.

SHASTA COPPER EXPLORATION CO.

CALIFORNIA

Redding, Shasta Co., Cal. M. E. Dittmar, mgr.; O. Scribner, sec.; Chas. Wheelock, supt. Property: about 650 acres, lying between the Balaklala and Iron Mountain mines, near Kennett, is developed by 8 tunnels, of about 3,000' aggregate length. No. 7 tunnel cut 3 small stringers of copper ore. Company did a large amount of exploration and development work, 1915.

SHASTA MAY BLOSSOM COPPER CO., CONS.

CALIFORNIA

Office: Fruitvale, Cal. Mine near Del Mar, Cal. Officers: Frank J. Golden, pres.; Lucius A. Booth, v. p.; S. Peter, sec.-treas.; H. B. Ward, mgr. Inc. 1903, in Arizona, as a reconstruction of the Shasta May Blossom Mining & Smelting Co. Cap., \$10,000,000; shares \$1 par.

Property: known as the Keith group, has 22 claims, about 300 acres, ½ mile north of Del Mar in the Pittsburgh district. Claims show several deposits between granitic porphyry and slate. The gossan main outcrop 30' wide, said to be traceable about 1,500', shows low-grade copper ore with gold and silver values. The middle vein, 5 to 40' wide, and said to be traceable 1,900', carries sulphide ore, and is opened by tunnels of 200', 300' and 650' with about 1,500' of workings said to show a considerable tonnage of sulphide ore. The West vein, reported to be upwards of 100' in width, has a 100' shaft and 400' tunnel which show ore giving assays of 2 to 7% copper and \$2 to \$2.000 per ton in combined gold and silver values. The mine is reported to have about 2,000' of workings.

Equipment: includes a gasoline hoist, compressor and electric light and power. Property is a prospect.

SHASTA MONARCH MINING CO.

CALIFORNIA

Redding, Shasta Co., Cal. T. W. Rogers, supt. Property: 80 acres at Stella (Whiskeytown), Shasta Co., has been worked for many years; credited with a production of \$127,000 from 1870-1912. There are 4 parallel veins, strike N. 50° W., dip 50° N., in alaskite porphyry near the contact with meta-andesite; pay shoot averages 18" in width; ore is free milling.

Development: by tunnels. Equipment: includes a 10-stamp mill, erected 1914, at which time 10 men were employed. (For geology, see U. S. G. S. Bull. 540, pp. 38, 39, 50, 51.)

SHASTA NATIONAL COPPER CO.

CALIFORNIA

Redding, Shasta Co., Cal. Directors: C. F. Brouillard, Wm. H. Mc-

Ewen, S. S. Norton, M. F. Fries of Redding and A. J. Shields of Anderson, Cal.

Inc. in 1915. Cap., \$5,000,000; shares \$1 par. Company was organized to develop 1,000 acres of copper bearing land adjoining property of Mammoth Copper Co.

SHATTUCK-ARIZONA COPPER CO.

ARIZONA

Office: 120 Broadway, New York. Mine office: Bisbee, Cochise Co., Ariz. Officers: Thos. Bardon, pres.; H. L. Mundy, v. p.; Archibald M. Chisholm, sec.-treas.; Lemuel G. Shattuck, managing director; preceding officers and Louis W. Hill, directors; Norman E. LaMond, asst. sec.; Arthur Houle, supt.; G. L. Allen, met.

Inc. March 22, 1904, in Minnesota. Cap., \$3,500,000; shares \$10 par; nonassessable; fully issued. Company is closely connected, in ownership and management, with the Denn-Arizona Copper Co. National Shawmut Bank, Boston, and Bankers Trust Co., New York, registrars; Old Colony Trust Co., Boston, and Guaranty Trust Co., New York, transfer agents. Shares listed on the Boston and New York Stock Exchanges. Annual meeting, third Saturday in February.

Dividends: \$2 in 1910; \$1 in 1911; \$1.50 in 1913; \$1.50 in 1914; \$2.50 in 1915; \$3.50 in 1916, to August.

Annual report for 1915 shows net profits of \$1,174,028 as compared with \$587,497 in 1914. Total net surplus, Dec. 31, 1915, was \$897,679. Net profit for first 6 months of 1916 was \$1,470,995, at a rate of \$8.40 a share per year.

Property: 8 claims, patented, 109 acres, lying in the northeastern portion of the Bisbee camp, about one-half mile south of the original workings of the Copper Queen, and to the north of the Calumet & Arizona. The property shows carboniferous limestone, with intrusive porphyry dikes, and a big fault, covered with a silicious gossan of 30 to 50' width. Ores carry copper and lead with gold, silver and vanadium values, and are oxidized down to 800', with low-grade sulphides at depth.

The orebodies occur as irregular replacements along certain bedding planes, and along dike contacts.

Development: the mine is opened by a 935' three-compartment shaft, 15x4' 6" in size, connected with the Uncle Sam shaft of the Copper Queen on the 800' level, with the Powell shaft of the Calumet & Arizona on the 600' level, and with the workings of the Wolverine & Arizona on the 200' level. Mining work was begun Aug., 1904, and ore shipments started Sept., 1906, continuing until Nov., 1907, when the panic put a stop to all work for some months. Production was resumed Dec. 4, 1908. The mine is opened by levels at 100' intervals from 200 to 900', inclusive, and at the end of 1915 had 90,240' of workings. New work in 1915 totaled 14,978'.

Development work for the first quarter of 1916 was done on all levels from the 100 to 900' level. On the 100' level a new ore-shoot developed for 400' in length in the Southwest claim, shows a width of 18', averaging 6% copper. This will probably prove to be a continuation of the Southwest orebody being worked between the 200 and 300' levels.

In the Iron Prince claim an ore-shoot averaging more than 7% copper has been opened between the 100' and 200' levels.

In the Ray claim, on the 500' level, a continuation of the ore found along the Contention fault has been developed; this shoot is 33' thick and averages 6½% copper. On the 600' level a continuation of the lead ore-shoot was proven for a length of 60', showing a 21' width of lead ore averaging 26% lead and \$6 per ton in gold and silver.

In the Copper Rock claim an important find of 5½% copper sulphide ore was made on the 800' level, and in the Leo claim on the 800' level, 4.8% copper ore was opened for a length of 60' and width of 16'. On the 900' level development work has shown massive pyrite, containing 1 to 2% copper. The sulphide ores come in between the 700' and 800' levels, occurring in shoots, estimated to contain 104,000 tons of 3.5% copper ore, and extending downward to the 900' level, where there is a considerable tonnage of massive sulphides of about the same grade blocked out. The company's ore reserves are estimated at 40,000 tons of 15% ore, 110,000 tons of 7% ore, 185,000 tons of 6% ore, 104,000 tons of 3.5% ore, 180,000 tons of 12% lead ore, and recently a large body of vanadium ore has been opened up. A great body of siliceous gold-silver ore with a little copper has been developed in a hitherto unexplored part of the tract.

Equipment: 12 mine buildings, including machine shop, carpenter shop, smithy, boiler house, engine house, warehouse, sawmill, and a change house with accommodations for 300 men.

The 750-h. p. steam plant has five 150-h. p. boilers. The main hoist is an 18x48" Allis-Chalmers duplex double-drum engine, working under 125 lbs. steam pressure, with 2 drums, each carrying 1,500' of 1½" round steel cable, capable of handling continuously a 15,000-lb. unbalanced load at a vertical hoisting speed of 2,000' per minute. The air plant includes a 40-drill Sullivan cross-compound air compressor. Fuel is petroleum, with a normal yearly consumption of about 20,000 bbls.

A 3,300' aerial tram of 500 tons daily capacity, with average grade of 18%, supported by 14 towers of 12 to 40' height, built of 12" timber and set on concrete foundations, leads from a 1,000-ton ore bin near the shaft to the El Paso & Southwestern railway, the buckets discharging loads direct into 50-ton ore cars.

The ore is smelted by the Calumet & Arizona Mining Co., at Douglas, under a 5-year contract dating from July 1, 1913. About 50 tons are shipped daily, returning 6% copper, with appreciable gold and silver values.

Recent Production:

	Copper Lbs.	Lead Lbs.	Silver Oz.	Gold Oz.	Copper Cost	Per Lb. Sold
1916..... (a)	10,277,009	1,847,937	182,570	2,897	(*)8.44c	
1915.....	11,154,211	2,345,342	201,869	3,151	8.44c	18.5c
1914.....	10,846,918		198,419	2,444	(b)8.47c	14.13c
1913.....	13,219,756		236,000	2,033	(c)7.22c	

(a) First 7 months. (b) Under curtailed production from Aug. 14 to Oct. 23, when shipments were discontinued, resumed in April, 1915. (c) After crediting gold, silver and lead. (*) 6.44c per lb. for 1st quarter 1916 and 10.44c per lb. 2d quarter 1916.

It was reported in May, 1916, that the company had taken an option on the Calumet & Jerome property at Jerome, Ariz.

Producing about 18 million lbs. of copper annually at a cost of 8½c, the company can earn \$3 to \$3.50 per share on a 15c copper market, with much increased earnings if a higher price is realized.

SHAWNEE COPPER MINING CO.

WYOMING

Idle. J. M. Bovee, mgr., Shawnee, Okla. Inc. in Okla., July 1, 1915. Cap., \$1,000,000; \$1 par.

Property: 5 claims, unpatented, in Medicine Bow Mts., French Creek district, Carbon Co., Wyo., near New Rambler mine, shows granite and

schist cut by a fissured zone 200' wide, carrying \$4.10 gold ore. **Development:** by 160' and 210' shafts. A new 1,500' tunnel is planned. Examinations have been made by H. C. Beeler, A. M. Coffin, J. J. Hinton and other engineers. **SHEA COPPER CO. ARIZONA**

Officers: D. J. Shea, pres.-mgr., Jerome, Ariz. J. P. Connelly, sec.-treas., Nathan Schultz, directors. **Inc.** 1916 in Ariz. **Cap.**, \$750,000; shares 50c par.

Property: 4 patented claims, south of Copper Chief group, carrying 8 or 9 outcrops with gold-silver copper values. **Development:** by shallow shafts, tunnels, etc., all in ledge matter.

SHEEPHERDER'S DREAM MINE

NEVADA

J. F. Goodin, First Nat'l Bank, Lovelocks, Nev. **Property:** at Camp Willard, in section 36, one mile north of Lovelocks, shows strong quartz veins with 1½" of very high gold values. Three leases were let in 1915, with production of about 5 tons of \$100 ore per day, with specimen ore in addition. Bonanza ore was mined out 1915, but property again opened and active 1916.

SHELDEN & COLUMBIAN COPPER CO.

MICHIGAN

Idle. Address: care J. H. Rice, Houghton, Mich. **Property:** lies next north of the Isle Royale mine and includes mineral rights under many private residences, near Portage Lake. An important discovery of sheet copper was made Sept., 1915, in an unidentified lode opened in excavating a cellar in this tract. Described in Vols. I and II of Copper Handbook.

SHELDON MINING CO.

ARIZONA

Address: Care Stukey Bros., Walker, Arizona. John F. Pell, pres., Newark, N. J.; A. R. Ackerman, treas., Walker, Arizona.

Inc. Aug., 1916, in Arizona, as a merger of the Sheldon group, the H. T. Andrews holdings and those of the Empire Mining Co., Metals Mining Co. and the Majors Mining & Milling Co. These holdings include nine very attractive copper-gold properties, several of them pioneer mines of the district. The tract is a few miles south of Prescott.

SHENANDOAH MINES CO.

CALIFORNIA

Address: Clumie Bldg., 519 California St., San Francisco. A. Tisher, mgr.

Property: 3 claims and 2 mill sites, 63 acres, on Jesus Maria Creek, 5 miles N. W. of El Dorado, has a quartz vein 2'-5' wide in mica schist and quartzite. **Development:** by tunnels. The mine is operated through the lower, No. 1, tunnel, which is about 1,700' long and gives a 900' back on the vein. Five other tunnels ranging in length up to 800' have been driven higher up on the vein.

Equipment: 10-stamp mill, 1,000 lbs. per stamp, dropping 6", 100 drops per minute, crushing 3 tons per stamp. Mill is run by 50-h. p. gasoline engine during the dry season and by water obtained from Jesus Maria Creek; water wheel is a 3' Knight, running under a 90' head. At last account a cyanide plant was being built. Twenty-two men employed.

SHERMAN MINING CO.

IDAHO

See Pine Creek Development Co.

SHILL GOLD MINING CO.

ARIZONA

c/o Salt River Valley Bank, Mesa, Ariz. **Officers:** F. J. Davis, pres., G. W. Silverthorne, sec.-treas., M. G. Shill, Frank Griffin and W. J. Lempke, directors. **Inc.** 1914 in Ariz. **Cap.**, \$1,200,000; shares \$1 par. Company offered 50,000 shares at 25c in June, 1916.

Property: the Mesa Copper Group, one mile south of the Humboldt smelter, shows veins in Yavapai schist belt.

Development: two shafts with levels at 100' and 200' said to block out 12,500 tons of \$12 to \$75 ore,

SHIPPER COPPER MINING CO.**NEVADA**

Luning, Mineral Co., Nev. Frank Everett, pres.; Jas. E. Quinlan, mgr. **Property:** 2 claims, 4 miles S. E. of Luning, developed by a 400' shaft, shows a small vein of high-grade copper ore in dolomite, shipments from which are reported to have yielded 8% copper. Management plans early resumption of development work.

SHIPPER GOLD MINING CO.**WASHINGTON**

J. P. Blaine, pres.-mgr., Chesaw, Wash. **Officers:** H. L. Mooney, v. p.; A. C. Blaine, sec.; W. A. Harry, treas. **Inc.** May 31, 1916, in Wash. **Cap.**, \$1,000,000; \$1 par; 600,000 issued.

Property: 3 claims, unpatented, 56 acres, located $\frac{1}{4}$ mile north of Chesaw, Wash., contains a $3\frac{1}{2}'$ flat quartz vein running E.-W., with 22° dip. **Ore:** contains gold values with pyrite, and is said to average \$20 per ton.

Development: 700' of work including 110' shaft, connected with 380' tunnel, blocking out 1,000 tons of \$20 ore. **Production:** 1,200 tons of \$40 ore. Company owns 25-ton mill with rolls and vanners, etc., and will remodel same, develop mine and mill ore in 1916-17.

SHORT CREEK ZINC & LEAD CO.**MISSOURI**

F. A. Homaday, mgr., Joplin, Mo. **Inc.** April, 1916, in Missouri. **Cap.**, \$100,000; \$1 par. **Dividends:** paid $1\frac{1}{2}c$ per share, regular May, July and 2% extra, or $8\frac{1}{2}c$ in three months. Stock dealt in on New York and Boston Curb.

Property: lease on 15 acres of zinc land, 2 miles from Joplin, Mo. Mines have been in active operation since 1914, producing concentrates, returning \$107,000 October, 1914, to Dec., 1915.

SHOSHONE POLARIS MINING CO.**NEVADA**

Lloyd E. Marsden, sec., Room 515 E., No. 30 Church St., New York. Last balance sheet for year ending Dec. 31, 1914, is as follows:

Credit:	Debit:
Mine expenses in year 1914. None	Dec. 31, 1913, to cash on hand. \$ 7.08
General expenses in year 1914. \$289.00	To assessments collected 1914 None
Paid dividends in year 1914. None	To amounts received from
Balance on hand Dec. 31, 1914' 7.08	other sources 289.00

Property: at Bullfrog, Nye Co., Nevada has been idle for two years.

SIERRA ALASKA MINING CO.**CALIFORNIA**

W. S. Schuyler, pres.-mgr., Pike, Calif. J. F. Dickson, v. p.; O. Crook, sec. **Inc.** Jan. 22, 1912, in Calif. **Cap.**, \$2,000,000; \$1 par; all issued.

Property: near Pike, Sierra Co., carries a quartz vein with gold and pyrite, without base sulphides. Developed by 900' shaft and 1,700' of workings. 130 tons ore a day treated in a 40-stamp mill with 10-ton cyanide annex.

SIERRA CONSOLIDATED MINES CO.**MEXICO**

Office: 1400 Alworth Bldg., Duluth, Minn. **Officers:** Jos. B. Cotton, pres.; G. Ashley Tomlinson, v. p.; Frederick R. Kennedy, sec.-treas.; John W. Neukom, asst. sec.-asst. treas.; H. B. Paull, aud.; preceding with Thos. F. Cole, L. D. Ricketts and Chas. D'Autremont, Jr., directors. Robt. Linton, gen. mgr.

Inc. Aug. 18, 1909, in Arizona. **Cap.**, \$5,000,000; shares \$10 par; issued 76,500 shares, full paid, at \$10 each, \$765,000; and 223,500 shares, part paid at \$6 each, \$1,341,000; total outstanding \$2,106,000. Stock transferred and registered at company's office, Duluth. Annual meeting, 1st Tuesday after 1st Monday in May. Stock listed on New York Curb and traded in on Boston Curb.

Balance Sheet: as of Dec. 31, 1914—

Assets:		Liabilities:	
Sierra Mng. Co., S. A.—		Cap. Stock	\$2,106,000
Stock Acc.	\$1,452,602	Accounts Pay.	20,490
Sierra Mng. Co., S. A.—			
Loan Acc.	578,559		
Cash	4,399		
Accts. Receivable	21,000		
Investments	45,000		
Loss and Gain.....	24,930		
	\$2,126,490		\$2,126,490

To further finance the company at this time there was authorized in 1915 the execution of a collateral trust mortgage for \$100,000, and the issuance thereunder of notes dated Oct. 1, 1915, payable on or before 3 years after date with interest at 6% per annum; notes to be issued in denominations of \$100 and multiples thereof. This company owns the entire capital stock of the Sierra Mining Co., S. A., which see below.

COMPANIES CONTROLLED BY SIERRA CONS. MINES CO.**Sierra Mining Co., S. A.**

Principal office: Ciudad Jurez, Chihuahua. Mines and works at Ocampo district of Rayon, Chihuahua, Mex. This company is the Mexican title-holding and operating corporation for the Sierra Cons. Mines Co.

Officers: Jos. B. Cotton, pres.; E. J. Maney, treas.; Juan N. Amador, sec., Ciudad Juarez, Chih., Mex.; John W. Neukom, asst. sec.; Robt. Linton, gen. mgr., Pittsburgh, directors. Henry O. Flipper, commissario.

Inc. Dec. 11, 1908, in Mex. **Cap.**, 25,000 shares at \$20 each (Mexican currency).

Balance sheet as of Dec. 31, 1914, shows assets, \$834,961, which includes: mining property, \$243,073; current assets, \$38,455; cons. and equip., \$170,173; development, \$383,054; suspense, \$205. Liabilities include: capital stock, \$250,000; Sierra Cons. Mines Co., \$578,559; accounts payable, \$6,402.

Property: at Ocampo, 110 miles from Temosachic, a station on the R. G., S. M. & P. R. R., covers about 50 square miles; also owns over 100,000 acres of timber land in the same district, including water rights and timber thereon; also owns real estate in Ocampo, together with valuable water rights and mill sites, mining concessions and rights. The company had reopened several of the old mines on the property and had done about 13,000' of work when they were forced to cease operations in March, 1912, due to the revolution in Mexico. No work has been done since, but property will be reopened on short notice when conditions in Mexico permit. There are said to be six ore-shoots now developed that will produce 100,000 tons of ore, averaging \$12 per ton in gold and silver. The silver-bearing mineral of the ore is practically all argentite, with some associated gold, in a siliceous gangue; the ledge matter is an andesitic breccia cemented with quartz.

Equipment: includes the old El Salto 20-stamp mill. Machinery for the first unit of a 40-stamp is on the ground. Power is furnished by a 300-h. p. steam-electric power plant, at Durazno, 6 miles N. E. of Ocampo.

SIERRA NEVADA CONSOLIDATED MINING CO.**IDAHO**

Subsidiary of Bunker Hill & Sullivan Mining & Concentrating Co., which see.

Production:	Tons Extracted	Gross Value	Cost-Extr. Trans. & Red.	Net Profits
1915.....	15,159	\$110,328	\$63,973	\$46,364

Net profits in 1914 were \$159,339, a decrease in 1915 of \$112,985.

Company began production in July, 1913, selling its output under contract to April 29, 1915, to the American Sm. & Ref. Co. Management being unable to extend contract satisfactorily, discontinued production and only moderate exploration and maintenance work has been done since. Said to have considerable ore reserves.

SIERRA NEVADA MINING CO.**NEVADA**

Office: 339 Bush St., San Francisco. Inc. Nov., 1904, in Calif. **Cap.**, 200,000 shares; all outstanding; shares \$1 par; assessable. Registration Trust Co., San Francisco, registrar. Listed on New York Curb and on San Francisco Exchange.

Property: 3,000' along the Comstock Lode, in the Virginia mining district, at Virginia City, credited with a production of \$1,035,000 to 1908, is being operated in conjunction with the Mexican Gold and Silver Mining Co., which see.

SIERRA RANGE COPPER CO.**CALIFORNIA**

A. L. Beardsley, mgr.; Sioux City, Iowa. **Mine office:** Genessee, Plumas Co., Cal. **Property:** the Mountain Lion group, shows a vein of gold-silver-copper ore, developed by tunnels; and the Iron Dyke and Hirschman groups. Company is doing assessment work only.

SILVER BELL & ALPHA CONSOLIDATED MINES CO.**NEVADA**

Officers: Lorin Hall, pres., Salt Lake City; Clinton D. Ray, sec.; C. B. Smith, supt., Rye Patch, Nev. Inc. 1915 in Utah. **Cap.**, \$1,000,000; shares \$1 par; 450,000 in treasury; 100,000 were to be sold June, 1916, to erect a mill.

Property: two noted silver-gold mines at Rye Patch, Nevada, with reported production of \$11,000,000. Mine is 3.6 miles from railway.

Development: by shaft sunk through old workings and tapped by 1,000' working tunnel, with reserves of 200,000 tons of ore in old workings, said to assay 5 to 30 oz. silver per ton with 40c to \$1.40 gold per ton. Company figures \$2 mine and transportation costs and will erect a mill in 1916. A strike of ore was reported July, 1916, carrying 2,520 oz. silver per ton in brittle silver and black sulphurets. 1,000 sacks were shipped in July.

SILVER CABLE MINING CO.**MONTANA**

Jas. Corbett, pres.-gen. mgr., Missoula, Mont. **Cap.**, \$1,250,000; shares \$1 par; assessable. Listed on Butte Exchange.

Property: 7 claims in east Coeur D'Alene district, just over the Montana line on the eastern slope of Bitter Root Mts., 5 miles from the Northern Pacific R. R.; part of the land lies in Idaho. Said to have a large body of silver-lead-zinc ore; from 500 to 700' of stoping ground, proved for over 200' in length, and from 4 to 6' wide. Ore is said to average better than 15% zinc. Developed by tunnels.

Production: reported shipping in 1916.

SILVER CITY MINING CO.**IDAHO**

Silver City, Owyhee Co., Idaho. Requests for information unanswered.

Property: near Silver City, adjoins the Trade Dollar Consolidated on the east and has a system of parallel fissures containing gold-silver ores. In 1914 the company remodeled the old Blaine mill, purchased from the Trade Dollar Consolidated, located in Long Gulch, ½ mile S. E. of Silver City. Mill has 10 stamps, classifiers, concentration tables, and a 25-ton cyanide plant. Production for 1915 not reported.

SILVER CLIFF GOLD & COPPER MINING CO., LTD.**IDAHO**

Idle. Office: Wallace, Idaho. Mine near Larson, Shoshone Co., Idaho. Jas. D. Young, pres., treas. and gen. mgr. Edw. C. Young, sec. **Cap.**, \$1,500,000; shares \$1 par; an assessment of 5 mills was levied Oct. 11, 1913.

Property: 18 claims, 7 miles from Mullan, developed by 3 tunnels, the

lower of 850' and longest of 1,500', showing copper ore with some lead and fair gold values. **Equipment:** includes a Pelton wheel and an 8-drill air compressor. No report received, 1916.

SILVER COMET MINING CO.

NEVADA

Panaca, Lincoln Co., Nev. **Officers:** E. D. Smiley, pres.-mgr.; F. W. Russell, v. p., 811 Center St., Boston, Mass.; M. J. Smiley, sec.; J. W. Baker, treas., with W. A. Burnett, directors, all of Boston, except E. D. Smiley.

Inc. Jan., 1913, in Nevada. **Cap.**, \$500,000; shares \$1 par. **Annual meeting** in July. Operating expenses for 1914-15 reported as \$30,000; no profits.

Property: 5 unpatented claims, 100 acres, in the Comet mining district, Lincoln Co. **Ore:** gold-lead-silver-tungsten, occurs in nearly vertical fissure veins in quartzite, said to assay \$30 per ton in gold, silver and lead. Developed by 145' vertical shaft, with 950' underground workings.

Equipment: includes a gasoline hoist and 50-ton mill completed in 1915; the mill contains a crusher, rolls, Huntington mill and a Wetherill magnetic separator. Production was supposed to start early in 1916.

SILVER CREEK MINING & MILLING CO.

WASHINGTON

Company dead and property sold for taxes. Now owned by Gold Cord Mining & Milling Co., Keller, Wash.

SILVER FISSURE MINING CO.

MONTANA

Idle. Sec., A. W. S. Cochrane, 30 Broad St., New York. Mine near Polaris, Beaverhead Co., Mont., known as the Polaris mine, formerly operated by F. Aug. Heinze, carries silver, gold and copper ores, latter produced in small quantities as a byproduct. **Equipment:** includes steam and electric power, and a 100-ton smelter. Shut down during 1915.

SILVER FLAT MINING CO.

UTAH

Property: the old Nebraska mine in Delta Creek, Silver Lake section, American Fork, Utah, shows silver-lead ore in fissures in limestone cut by porphyry dikes. Ore is high in zinc.

Development: by 1,200' of tunnels. Work resumed, June, 1916.

SILVER HOARD MINING CO.

BRITISH COLUMBIA

Office: 614 Hutton Bldg., Spokane, Wash., and Ainsworth, B. C. **Officers:** Geo. Chew, pres.-gen. mgr.; E. R. Northrup, v. p.; L. R. Hawley, sec.-treas.; W. S. Hawley, asst. gen. mgr.; preceding with A. B. Lee, W. H. Carder and D. T. Fox, directors, all of Spokane.

Inc. in Wash., registered in British Columbia. **Cap.**, \$1,000,000; \$925,000 issued; shares \$1 par. Listed on Spokane Exchange.

Bonds: authorized, \$75,000, 10% 1st mtge., due Jan. 24, 1921; int. payable semi-annually; \$25,000 offered for sale in denominations of \$100, \$500 and \$1,000 each, carrying stock bonus of one share treasury stock for every dollar's worth of bonds.

Property: 5 claims, 202 acres, crown-granted, near Ainsworth, which are said to carry the vein mined at No. 1 mine of Cons. M. & M. Co., which is 2,400' away. **Ore:** silver-lead-zinc in limestone; claimed that milling ore averages \$15 to \$25 per ton. **Development:** 7,000' of workings. **Ore reserves:** said to be 50,000 tons.

Equipment: includes hydro-electric power, compressor, hoist and saw mill.

Production: since beginning of operations in 1911 to 1916, reported as 43 cars of ore, assaying 46.9 oz. silver, 4% lead, and 15% zinc per ton, with net smelter returns of \$32,000. Management claims ore can be loaded on barges at Ainsworth for 50 cts. per ton. Reported in 1915 that a 50-ton concentrator would be built.

SILVER KEYSTONE CO.**ARIZONA**

J. D. Fields, mgr., Chloride, Ariz. Company planning erection of milling plant, jointly with Keystone Co., which see.

SILVER KING COALITION MINES CO.**UTAH**

Offices: Kearns Bldg., Salt Lake City, and Park City, Utah. **Officers:** David Keith, pres.; Thos. Kearns, v. p. and gen. mgr.; J. S. Bransford, 2nd v. p.; W. S. McCornick, treas.; preceding with Henry Newell, W. M. Ferry, Jas. Ivers, J. F. Judge and M. C. Fox, directors. F. J. Westcott, sec.; B. E. Kearns, asst. sec.; Jas. Humes, supt.

Inc. May 20, 1907, in Nevada. **Cap.**, \$6,250,000; shares \$5 par, all issued. Annual meeting third Monday in May. Transfer agents: Empire Trust Co., New York; Federal Trust Co., Boston, and F. J. Westcott, Salt Lake City. Registrars: Equitable Trust Co., New York; First National Bank, Boston, and Utah Savings and Trust Co., Salt Lake City. Stock listed on Salt Lake City and Boston Stock Exchanges.

Balance sheet as of Dec. 31, 1914, showed: assets, \$6,520,264, which included property account, \$6,320,950; ore in transit, \$62,903; cash, \$135,713. Liabilities included accounts payable, \$90,292; reserved for depreciation, \$124,358; dividend checks not deposited, \$47,970; surplus, \$7,644.

Profits for May, 1916, reported as \$60,000 to \$80,000.

Dividends to Jan. 1, 1916, \$13,772,385, which includes \$10,675,000 paid by original Silver King Mining Co. Present rate, 15c quarterly.

Property: 327 patented claims, about 2,250 acres, covering 19,000' along the strike of the ore zone at Park City, 35 miles S. E. of Salt Lake City, consists of the holdings of the following mining companies: Silver King, Union, Park City, Fairview, Alliance, Woodside, Mass., Jupiter, Kearns-Keith, Crescent, Apex, Boss, Baltimore, St. Louis-Magnolia, Pinyon Ridge, Odin, Belmont and Uintah Treasure Hill Coalition.

Ore: silver, lead, copper and a minor amount of gold, occurs in limestone and quartzite. For geology see U. S. G. S. Prof. Paper No. 77.

Development: shafts and tunnels, with many miles of workings. One of the main workings is the 3-compartment Silver Hill winze sunk from the Alliance tunnel level, at a point 8,500' from the portal; the collar of the winze is 1,600' from surface. In 1915 a complete hoisting plant was installed at this winze.

Ore reserves not reported. The management gives out but little information, which may be due to the fact that the company has had considerable litigation over apex rights.

The mine is electrically equipped, and company owns a 600-ton mill; 400 tons being treated daily at last accounts. A flotation section which started operating Dec. 5, 1915, is said to give an increased saving of from 10% to 15% silver and 10% lead. Company employs 400 men.

Output: for first 11 months of 1915 reported to contain 21,517,219 lbs. lead; 1,053,858 lbs. copper; 1,632,733 oz. silver, and 2,009 oz. gold.

SILVER KING CONSOLIDATED MINING CO. OF UTAH **UTAH**

Office: Newhouse Bldg., Salt Lake City and Park City. **Officers:** Solon Spiro, pres.; R. P. Morris, v. p.; Wm. Pischel, treas., with D. L. Wertheimer, H. A. Lee, Sherman Fargo, W. C. Lewis, directors. G. W. Browning, sec.

Inc. 1902, in Wyoming as the Silver King Consolidated Mining Co.; re-incorporated Feb. 24, 1908, in Utah. **Cap.**, \$700,000, increased Sept. 12, 1912, from \$500,000; shares \$1 par; issued Jan. 31, 1916, 637,582 shares. Annual meeting in February. Security Transfer & Registrar Co., New York, transfer office and registrar. Listed on New York Curb and on Salt Lake City Exchange.

Annual report for year ending Feb. 1, 1916, shows: balance, Feb. 1, 1915, \$210,471; receipts for year, \$539,294, of which \$519,478 was from ore sales; balance, Feb. 1, 1916, \$232,645.

Dividends: year ending Jan. 31, 1914, \$308,791, derived from judgment paid by co-tenant; 1915, \$251,033; 1916, \$255,032; total, \$814,856; to July 2, 1916, \$942,373. Present rate, 40c per annum, payable quarterly.

Property: 543 acres near Park City, adjoins Silver King Coalition on the west. **Ore:** carries lead, silver, gold and copper in replacement deposits in limestone and quartzite. For geology of the district see U. S. G. S. Prof. Paper No. 77.

Development: by shafts; lowest level is at 1,800' depth. Ore mined during 1915 came mostly from stopes adjacent to the 1,700' level, none being stoped on the 1,550' level. The flat ore-shoots adjacent to the main fissure are said to be over 32' thick and 4' to 30' wide. Branches from this main orebody, 1' to 5' thick, extend out into the adjoining country on both sides of the vein, making a mass of ore in places 100' wide. Average grade of ore produced in 1915 was silver, 47.5 oz.; gold, .044 oz.; lead, 28.6%; and copper, 1.5% per ton, sold for an average of \$37.87 per ton. Company employs 200 men.

Production (years ending Jan. 31):

	Ore Tons	Lead Lbs.	Silver Oz.	Gold Oz.	Copper Lbs.	Net Value
1916.....	13,719	7,843,139	652,076	605	411,086	\$519,478
1915.....	9,987	5,593,786	503,784	514	257,912	346,990
1914.....	609	316,434	22,319	40	6,343	19,847
1913.....	612	461,830	27,813	55	9,656	27,143

New work includes a 13,000' working tunnel which is on company ground and will serve for drainage, transportation and development. Estimated cost of tunnel, \$400,000. A 10,000' tramway was built 1916 to convey ore to the mill and railroad. A mill, initial capacity 50 tons daily, is being built by Traylor Engr'g & Mfg. Co., and flotation process will be used.

The property has become a steady producer during the past two years and the company, apparently, is on a sound footing; its earnings are mainly from the lead-silver content of the ore and vary with the market price of these metals.

SILVER KING MINES, LTD.

BRITISH COLUMBIA

Office: Trail, B. C. **Mine address:** Nelson, Kootenay district, B. C. **Officers:** R. H. Stewart, pres.; S. G. Blaylock, v. p.; T. W. Bingay, sec.; W. M. Archibald and R. S. Lennie, directors. Company is owned jointly by the Kootenay Bonanza Co. and the Consolidated Mining & Smelting Co. of Canada, Ltd., in the proportion of $\frac{1}{4}$ and $\frac{3}{4}$, respectively.

Property: 5 claims, on Toad mountain, include the old Silver King mine, formerly owned and operated by the Hall Mining & Smelting Co., Ltd. Mine is opened by a shaft to the 10th level, showing 3 well-defined veins in diabase schist. The ore occurs in those portions of the veins which are intersected by 2 dikes, and in the altered surface zone is principally bornite, with tetrahedrite, iron pyrites and silver occurring in the unaltered zone below. Gold is present in small amounts. Considerable ore was extracted in the past from above the 5th level in the Main vein. The South vein and the K vein are practically untouched. The Main vein is lower in silver but higher in copper than the South vein, and the K vein is higher in silver than either of the others. The total ore reserves in the mine are conservatively estimated at 100,000 tons. Ore in the Main vein has been proven to a depth of 1,130' by diamond drill borings.

Equipment: includes electrical motors of 50-h.p., a 100-h. p. electric

pump, an 1,850' tramway, and all necessary mine buildings. Shut down 1915-16.

SILVER KING MINING CO.**OREGON**

Albany, Ore. Officers: J. J. Lamack, pres.; Wm. S. Risley, sec.-treas. Inc. July, 1916, in Oregon. Cap., \$500,000; shares \$1 par.

Property: a group of claims on Little North Fork of the Santiam river, Elkhorn district, in the Cascade Mts., 75 miles from Portland. Claims show 4 veins, carrying ore with gold and silver values.

Development: by tunnels; the main working tunnel now being driven is expected to cut one vein at 70' and a larger vein at 980' from the portal, at a vertical depth of 1,000'.

SILVER KING OF ARIZONA MINING CO.**ARIZONA**

Office: 25 Broad St., New York City. Officers: Alex B. Downe, mgr., Superior, Ariz.; E. Cowper-Thwaite, pres.; Alex. B. Downe, v. p.; F. C. Masson, sec.-treas.; F. Kent Shiener, Mimon Benzaquen, directors.

Inc. May, 1916, in Ariz. Cap., \$1,500,000; \$1 par; \$63,400 debentures, redeemable by 100,000 shares stock. Security Transfer & Registrar Co., New York, transfer agent.

Property: the Silver King mine, 5 lode claims, nearly 100 acres, 3 miles from Superior, on the Stoneman grade, is an old silver mine, popularly credited with a production of \$10,000,000, and known to have paid \$1,950,000 in dividends up to July, 1887. Opened to a depth of 1,000', the mine was originally worked for gold and silver, copper ore in the form of tetrahedrite coming in at a depth of about 310' and continuing to depth of 510', below which very high-grade silver ores were again encountered. There are about 6 miles of old workings.

Development: recent operations have been limited to work above the water level, 70' from surface, in a number of narrow stringers carrying high-grade silver-copper ores.

The geologic conditions are described in Bull. 540, U. S. Geol. Survey. Though currently spoken of as a vein, the orebody is a stockwork, in which the extraordinarily rich ores, carrying various silver arsenical and antimonial sulphides of silver, with argentite and stromeyerite, apparently gave out at the bottom levels. Below this level, lower grade but payable concentrating ore, amenable to flotation may be expected and lateral development is also expected to develop more ore. Believe property worthy of reopening but that more capital will be needed than present plan provides for.

SILVER LAKE MINES**COLORADO**

Owned by American Sm. & Ref. Co. L. R. Clapp, supt., % A. S. & R. Co., Denver.

Property: 143 patented claims in the Animas mining district, Silverton, San Juan Co., Colo. Ore: gold, silver, lead, copper and zinc in fissure veins in andesite. Veins dip 70°, and have an E.-W. strike. Ore reported to occur in shoots from 1'x20' to 8'x1,200', and said to assay 0.20 oz. gold; 6 oz. silver; 2.5% lead; 1% copper; 3.5% zinc.

Development: by tunnels, the two longest 12,000' and 7,500'; greatest depth of workings 1,700' below surface; total workings 165,000'. **Equipment:** includes 2 air compressors, aerial tram and a 450-ton mill equipped with flotation plant.

Mine has been worked by lessees since 1911 and production figures are not available.

SILVER LEAF MINING CO., LTD.**ONTARIO**

Inc. 1906, in Ont. Cap., \$5,000,000; shares \$1 par. Owns the Silver Leaf mine, adjoining the Crown Reserve property at Cobalt, and was considered a good prospect at one time. It has not been an important

producer and has proven a great disappointment. Mine is being operated by Crown-Reserve Mining Co., Ltd., which see.

SILVER MOON MINING CO.

UTAH

Officers: Myron W. Davis, pres.; Wm. Crome, sec.-treas. **Inc.** Jan. 29, 1912. **Cap.**, \$10,000; shares 2c par, assessable. In treasury, May, 1916, 264,310 shares and \$525 in cash; no debts. Listed in Salt Lake City.

Property: 7 unpatented claims in the Big Cottonwood district. **Ore:** carries silver, gold, lead. Little development has been done. Four men employed. Property is a prospect.

SILVER MOON MINING CO., LTD.

IDAHO

Burke, Idaho. **Officers:** Eugene Sage, pres.; Gus Ehrenberg, sec.-treas.; Ed. Ehrenberg, supt., with Dr. Lambach, Spokane, Wash., and Geo. Steward, directors. **Cap.**, \$1,000,000; shares \$1 par; in treasury 60,000 shares. Listed in Spokane.

Property: 9 claims, north side of Canyon Creek, 4½ miles from Wallace, adjoining the Frisco mine, shows 2 veins of lead ore. Developed by tunnels. Work was stopped two years ago, resumed in 1915 and company reported to be driving a crosscut tunnel to intersect the vein at 1,000'. **Equipment:** includes a 200 cu. ft. compressor, electrically driven. Property is a prospect; reported that "buyers must be prepared for a long pull"—which is undoubtedly true.

SILVER MOUNTAIN MINING CO., LTD.

IDAHO

Office: Potlatch, Idaho. **Officers:** L. Tice, pres.; E. D. Wilkins, v. p.; W. E. Horstkotte, sec.; G. L. Fulton, treas.; directors; Arthur Horstkotte, mgr.

Property: 9 claims, 4 patented, near the Alice mine, on St. Joe Gulch, shortly west of the Morning Mill, about 3½ miles from Mullan. The mine has 3 tunnels, and a 900' crosscut tunnel intersects an 8' vein carrying ore said to give assays of 2% copper, 3 oz. silver and \$1.80 gold per ton. **Equipment:** includes a small steam plant and an air compressor. Development with a small force.

SILVER PEAK MINING CO.

UTAH

J. R. Rickards, mgr., Cedar City, Utah. R. B. Shephard, pres., 408 State St., Salt Lake City. T. F. Kennings, sec.-treas., Garfield, Utah.

Inc. July, 1915, in Utah. **Cap.**, \$10,000; shares 1c par; 600,000 issued.

Property: the Blair mine, 6 claims, 120 acres, unpatented, near Pinto, in Pinto Iron mining district, Iron Co., Utah, shows a contact deposit 8'-10' wide carrying copper-lead ores with gold-silver values.

Development: 200' shaft and 2 others. Dumps show 100 tons of \$8 to \$300 ore. Company doing assessment work only.

SILVER PICK CONSOLIDATED MINES CO.

NEVADA

Goldfield, Nev. **Officers:** Herman Zadig, pres.; D. D. Dewey, v. p.; Chas. D. Olney, sec., with E. P. Barrett, and E. C. Watson, directors. Geo. F. Dyer, mgr.

Inc. in Nev. **Cap.**, \$1,500,000. Listed in San Francisco and Salt Lake City.

Property: at Goldfield, developed by 700' shaft. Reported in May, 1916, that a drill operating from the 700' level cut the shale-lattice contact at a depth of 1,000' from surface, and that the shaft would be sunk to this depth on the strength of assay values found at the contact. The mine is a development proposition. Company has not replied to requests for information.

SILVER PLUME REDUCTION CO.

COLORADO

Operates the Burleigh mill near Silver Plume, Colo., and has a lease on Seven Thirty mine. Installed an Edison plant and oil flotation, 1915.

SILVER QUEEN MINING CO.**WASHINGTON**

Kettle Falls, Stevens Co., Wash. J. J. Budd, supt. Owns sundry claims, 2 miles south of Kettle Falls, developed by shaft and crosscut tunnel, showing silver-copper ore.

Equipment: includes steam power plant. Reported making regular shipments to the Northport smelter in 1916.

SILVER REEF MINING & SMELTING CO.**ARIZONA**

Property: includes the Lake Shore and the Silver Reef mines, at Vekol. Pinal Co., Ariz., originally worked for their silver ores. **Development:** by a 375' shaft and 425' tunnel. **Ores:** are silver-lead and copper.

Equipment: includes a gasoline hoist and air compressor, and a 50-ton all-slime cyanide plant. Company planning development work.

SILVER ROCK MINING CO.**IDAHO**

Company has sold its property to the Rainbow Mining & Milling Co., Ltd., which see.

SILVER SEAL MINING CO.**MEXICO**

Mine at Pilares de Teras, Sonora, Mex. Fred O. Colsen, lessee at last accounts.

Property: includes El Aguaje mine, 12 miles east of Nacozari, showing a fissure vein in andesite rock cut by granite and carrying narrow paystreaks of gray copper, chalcopyrite and galena ore. The mine has yielded ore assaying up to 15% copper and 20 oz. silver per metric ton. Property worked intermittently during recent years.

SILVER SHIELD MINING & MILLING CO.**UTAH**

Office: McCornick Bldg., Salt Lake City. **Mine office:** Bingham Canyon, Salt Lake Co., Utah. **Officers:** Henry Cohn, pres.; H. S. Joseph, v. p.-gen. mgr.; H. W. Cram, sec.-treas., with J. M. Hayes and Lou Moore, directors.

Inc. in Utah. Cap., \$300,000; shares \$1 par; assessable; 225,000 shares issued. Paid \$9,000 in dividends prior to 1903. Listed in Salt Lake City. Requests for information ignored.

Property: about 320 acres, at Bingham Canyon. **Ore:** carries mainly silver-lead, with some gold. **Development:** by a tunnel over 9,000' long, connected with tunnel of the U. S. Mng. Co. Reported in April, 1916, that a 4' vein of \$40 ore had been found by a lessee, 3,500' from the tunnel portal. Several carloads of ore reported to have been shipped and mine now worked on company account. Also reported "Sundays have been designated as days upon which visitors will be welcome."

Company offering 10,000 shares of stock for sale at 50c a share, Aug. 1916, to finance drilling.

SILVER STANDARD MINING CO.**BRITISH COLUMBIA**

Office: New Hazelton, B. C. D. G. Norrie, mgr. Owned by A. L. McHugh, Angus Stewart, D. McLeod, and J. W. Stewart, all of Vancouver. Company reports gross earnings 1914-1915, \$70,000; operating expenses \$60,000.

Property: Silver Standard mine, 15 crown granted claims, 700 acres, 7 miles north of Hazelton, in Cariboo district. Ore carries gold, silver, lead and zinc in a series of fissure veins in quartzite. Veins have a N.-S. strike, dip E. 50° to 80°; vary in width from a few inches to 6'. **Development:** 400' inclined shaft, with 3,000' of workings. In Dec., 1915, 5,000 tons ore were blocked out. **Equipment:** hoist, 2,000 cu. ft. compressor, pump and boilers.

Production: to 1916, 1,200 tons ore; average assays reported as .26 oz. gold, 172 oz. silver, 17.7% lead, and 25% zinc. Plans increased development work and erection of concentrator. The mine is well located for cheap mining; wood and water are plentiful and railway transportation is within a short distance.

SILVER TIP MINING CO.**MONTANA**

Office: care J. N. Keenan & Co., stockbrokers, 78 Broad St., New York. Cap., \$150,000; shares 10c par.

Property: 140 acres in Coeur d'Alene district on Montana side of divide, north of Wallace and 2 miles from Snowstorm mine and Big Eight. Development: 800' of tunnel work. Is a prospect.

SILVER TRAIL MINING CO.**WASHINGTON**

Office: care J. Richard Brown, W. 1619 Clark St., Spokane, Wash. Dr. Robt. Bell, pres., Paulsen Blk., Spokane; A. O. Smith, mgr. Inc. 1915 in Washington. Cap., \$125,000; shares 10c par.

Property: the old Clungstone mine, 8 miles E. of Evans in Colville mining district, opened in early '90s by Col. I. N. Peyton.

Development: tunnels, the lower one 700', with 400' drift on a 2'-6' vein of silver-lead ore. Shipments made to Trail, 1916.

SILVER TUNGSTEN MINING CO.**NEVADA**

Office: 222 Judge Bldg., Salt Lake City. Raymond Ray, pres.; Ernest Kimball, sec.-treas.

Inc. 1916, in Utah. Cap., \$50,000; shares 10c par; assessable; outstanding 38,000 shares. Listed in Salt Lake City. Cash on hand, April, 1916, \$458; no debts except a bond of \$1,750 due May, 1917.

Property: 3 claims, unpatented, in the Cherry Creek mining district, 8 miles from a railroad, said to show an 8' vein, containing tungsten ore. Development work to May, 1916, consisted only of 24' of trenching and 20' of tunneling. Evidently one of the mushroom tungsten companies brought out when tungsten was selling high.

SILVERADO MINING CO.**IDAHO**

Office: C. D. Muxen, sec., Old National Bank Bldg., Spokane, Wash. Officers: Dr. W. B. Pickrell, pres.; W. Wood, v. p.; preceding with John Wyand, Gus Eiler, H. A. Long, directors. W. L. Zeigler, supt., Osborne, Idaho. Cap., \$2,500,000; about 1,850,000 shares issued.

Property: a group of claims near Osborne, reopened in 1915, after several years' idleness, shows fissure vein in shale, running downward into the underlying quartzite.

Development: 4,000' tunnel, 400' of it a drift on a 1-3' vein showing 6"-18" silver-lead and gray copper ore. A 120' winze shows persistence downward.

Equipment: includes compressor and electric power. A mill with flotation plant is under construction, expected to operate by October, 1916.

SILVERED-COPPER MINING CO.**BRITISH COLUMBIA**

Office: 1621 Madison St., Denver, Colo. Mine Office: Aldermere, Atlin district, B. C. Officers: F. Thoman, pres.; C. W. Peaslee, v. p.; C. A. Hubbard, sec.-treas.; C. E. Thoman, gen. mgr.

Inc. March 23, 1908, in Arizona. Cap., \$1,000,000; shares \$1 par; non-assessable; issued, 568,754 shares. Debentures, \$50,000 authorized and unissued.

Property: 6 claims, 300 acres, in the Hunter Basin, Omineca district, about 15 miles from the railway at Telkwa, shows a bedded agglomerate of volcanic rocks, chiefly diorite, beds standing almost perpendicular and striking N. 35° E. Orebodies occur as true fissure veins in diorite. Ores contain bornite and chalcocite. Three cars ore shipped to smelter in 1914 said to have averaged a little over 100 oz. silver and 5% copper per ton.

Development: by a short tunnel, numerous pits and opencuts, with a total of about 200' of workings.

The mine has no power equipment. A concentrator is planned, but ore reserves should first be developed. The company is pinched for funds, but

apparently has a valuable property, which, if handled right, may develop into a paying mine. Idle in 1915.

SILVERFIELDS MINING CO., LTD.

NEVADA

Secretary's address: J. M. Hamilton, Suffolk House, London, E. C., Eng. Mine near Golconda, Humboldt Co., Nev. Inc. Dec 27, 1906, in Great Britain. as. Golconda Consolidated Co., Ltd., and changed name to present title Feb., 1909. Cap., £250,000; shares £1 par; issued, £143,353, fully paid.

Property: sundry claims, with a third interest in the Honolulu group, balance of which is owned by the Golconda-Nevada Copper Co., in the Kennedy and Battle Mountain districts, 8 miles west of Millers.

Development: by a 250' shaft showing a 3' vein in limestone said to assay 8% copper, 26% lead, 390 oz. silver and \$4 gold. Equipment: includes a 25-h. p. hoist and necessary mine buildings. Idle.

SILVERTON MINES, LTD.

BRITISH COLUMBIA

Silverton, B. C. George Stillwell, mgr. Property: the Hewitt-Lorna Doone mine at Silverton, carrying silver-lead-zinc ores, which are concentrated in a mill having a flotation unit. In 1914, 18,000 tons of ore was mined. The silver-lead concentrate is sent to the Trail smelter.

SIMILKAMEEN CONSOLIDATED COPPER CO.

BRITISH COLUMBIA

Office: Miller Bldg., Scranton, Pa. Mining property at Voigt Camp, B. C. Officers: W. S. Ayers, pres.-cons. engr.; Geo. B. Markle, Jr., v. p.; J. Foster Barber, sec.; W. E. A. Wheeler, gen. mgr., with A. Mitchell, Jr., B. R. Bromley, E. T. Beck, S. Davies, H. F. Ferber, W. S. Robins, directors.

Inc. 1914, in Maine. Cap., \$2,000,000; shares \$5 par. Proposed to increase capital to \$5,000,000.

Property: 68 claims, 2,633 acres mining land, 1,700 acres timber land, together with water rights, located at Voigt Camp, 6 miles from Princeton, district, 1 mile from a railway. Claims show Revett quartzite, mineralized in the Yale mining district, 120 miles east of Vancouver.

Geology: the mineralized area, $2\frac{1}{2} \times 3$ miles in extent, lies between two large porphyritic dikes and is said to consist of about 25 veins, separated by smaller dikes. Ore on the east side has considerable iron; that on the west is siliceous. The ore carries copper, occurring as chalcopyrite, containing gold and silver. Company claims to have spent \$200,000 on development, all surficial, consisting of 1,400' of shafts, deepest 170' with 275' of workings, 4,000' of tunnels and 10,500' of trenches and opencuts, together with some diamond drilling.

According to company's statement under date of April 15, 1915, "the average value of the larger orebodies so far exposed appears to be about 2% copper and about \$1 in gold and silver," also "there are large bodies of ore exposed that will average better than \$10 per ton on which the company proposes to begin operations."

The property may have merit, but it will take considerable money to prove its worth. Not only does the official statement of the company underestimate the amount required to put it on a producing basis but its prospectus contains statements, and estimated results accredited to J. C. Laws, which are both ridiculous and misleading.

SIMILKAMEEN MG. & SM. CO., LTD.

BRITISH COLUMBIA

Idle. Office: Bank of British North America Bldg., Vancouver, B. C. Mine near Princeton, Boundary district, B. C. Fred Buscombe, chairman; W. H. Armstrong, managing director; Chas. F. Law, sec.

Inc. Feb. 8, 1906 in British Columbia. Cap., \$2,000,000; shares \$10 par.

Property: the St. Lawrence and St. George groups, 5 claims, 3 crown granted, about 300 acres, 3 miles from Tulameen City, at the head of Bear creek, a few miles from the Great Northern railway.

Development: 4 shallow shafts of about 50' depth each, besides a short crosscut tunnel and numerous trenches. The work shows a strong orebody between schist and granite with intrusive porphyry dikes. The St. Lawrence mine has an 8' vein of massive cupriferous iron sulphide, giving average assays of about \$10 per ton in copper, silver and gold. The St. George group shows a 4' vein, carrying ore with quartz gangue, giving average assays of 1.38% copper, 2.08 oz. silver and some gold per ton. Inactive some years.

SINALOA SMELTING & REFINING CO., S. A.

MEXICO

Subsidiary of the Pacific Smelting & Mining Co.

SIOUX CONSOLIDATED MINING CO.

UTAH

Provo, Utah Co., Utah. **Officers:** Reed Smoot, pres.; R. L. Anderberg, treas. **Inc.** about 1890 in Utah. **Cap.**, \$1,000,000; outstanding \$745,387; shares \$1 par. Listed in Salt Lake City. Has paid total dividends of \$872,105; last 4 cts. per share, July 25, 1911. No report has been issued for about 4 years and stock has been practically dead on the Exchange, quoted around 3 cts. In Feb., 1916, it jumped to 24 cts. Reported in April to have a working fund of \$25,000.

Property: 6 patented claims at Eureka in Tintic mining district, said to show silver-lead ore. Many years were spent in developing the prospect and then it was allowed to lie idle for a number of years. About 1907 work was resumed and ore found in 1908; this put the mine on a dividend basis for a time. Known ore reserves were exhausted in 1911 and mine closed down in May, 1912, to be worked since in a desultory way by lessees.

The rise in stock early in 1916 is attributable to the reported strike of high-grade copper ore at depth in the adjoining Iron Blossom, and to the fact that ore in the Sioux, heretofore too low in grade to be handled, can now be treated at a profit by the new Tintic mill.

Development: by shaft to the 600' level. In April, 1916, the company resumed work; it plans to drive 200' to 300' E. of the old ore zone on the 600' level in search of the continuation of the orebody recently found in the Iron Blossom.

SIXTEEN TO ONE MINE

CALIFORNIA

Property: situated $\frac{3}{4}$ of a mile south of Alleghany, Sierra Co., Calif., was located in 1908 and is credited with a production of \$150,000 to \$300,000 in gold to 1914. **Ore:** quartz in a vein ranging from a narrow streak up to 4' in width. Country rock is amphibolite. **Development:** by tunnels, main tunnel 900' long. Twenty men employed in 1915. Production not given.

SKIDOO MINES CO.

CALIFORNIA

Address: E. A. Montgomery, pres., L. A. Investment Bldg., Los Angeles. Mine at Skidoo, Inyo Co., Calif., J. H. Cooper, supt. **Cap.**, \$1,000,000; shares \$5 par. Reported to have paid dividends of \$385,000 up to April, 1915.

Property: the Skidoo gold mine, is developed by adits and equipped with 15-stamp mill. Water power used.

Production: in 1914, 9,406 tons ore, gross returns \$14.54 per ton. Costs total \$6 per ton. Operated in 1915, but production not reported.

SLICK BROS. MINING & MILLING CO.

COLORADO

Dr. B. B. Slick, mgr., Ridgeway, Colo. W. B. Slick, pres., Boise, Idaho. **Inc.** 1909 in Nevada. **Cap.**, \$1,500,000; \$1 par.

Property: 10 claims, 100 acres, patented, on Mt. Hayden, Uncompahgre district, Colo., shows fissure vein in andesite. The vein runs N. W.-S. E., dips at 45°, which for 2,400' long shows 3' of sulphide copper ore carrying gold-silver values, and reported to average \$35 per ton in all three metals. The shoot is said to carry ore for 600' x 600' x 3'.

Development: by 3 tunnels, aggregating 1,200' and having back of 350'. Property reported on by F. M. Kilmer of Boston Inst. of Technology.

Company was to install machinery and power, expending \$60,000 for this and development work in 1916.

SLOCAN STAR MINES, LTD. (N. P. L.) **BRITISH COLUMBIA**

Offices: 901 Vancouver Block, Vancouver and Sandon, Slocan district, B. C. **Officers:** R. S. Lennie, pres.; A. C. Burdick, v. p., with J. B. White, John Elliott, John McPherson, J. M. Harris and J. P. McGoldrick, directors. T. B. Hooper, sec.-treas.; Bruce White, gen. mgr.

Inc. in British Columbia, Oct. 20, 1911, under the "Companies Act." **Cap.**, \$2,500,000; issued \$2,125,028; shares \$1 par. Listed in Spokane.

Balance Sheet: year ending Oct. 31, 1915—

Assets				Liabilities			
Prop. & Def. Chgs.							
Equip.	P. & L.	Current	Total	Cap. Stock	Current	Total	
\$2,100,127	\$74,464	\$8,766	\$2,185,358	\$2,125,028	\$60,330	\$2,185,358	

Bonds: authorized, \$100,000, 2-yr., 7%, 1st mtge.; issued, \$70,000. **Dividends:** paid in former years, \$542,000. Total quick assets, May 1, 1916, \$43,000 against an indebtedness of \$70,000 represented by the bond issue.

Property: at Sandon, Slocan district, consists of Slocan Star and Rabbit Paw groups of 12 Crown Granted claims, which formed the subject of protracted and costly apex litigation between the Star Mining & Milling Co., plaintiff, and the Byron N. White Co., in the Supreme Court of B. C. for about 10 years, finally determined by a judgment of the Supreme Court of Canada. Holdings also include a patented mill-site and extensive water rights.

Ore: carries silver, lead, zinc. The main vein, the "Slocan Star" is a strong fissure in slate, traceable over a mile. Vein strikes N. E.-S. W., dips S. 47°, width 6-8', widening out in places to as much as 50'.

Development: 10 main adit levels; No. 10, the lowest is 2,300' long; total workings 13,000; new work in 1915, 1,310'. Silver-lead ore has been almost all extracted down to 5th level; from 6th level to surface several zinc-siderite orebodies have been left intact as unprofitable under former market conditions. **Ore reserves:** recently estimated as 49,000 tons zinc concentrating ore in sight with net value of \$190,000 and 100,000 tons partially blocked ore, valued at \$400,000. Average assay value reported as 3 oz. silver, 1.2% lead, and 10% zinc, or total value of \$11.50 per ton. Costs estimated at \$7, spelter figured at 5c.

Equipment: provided for by the recent bond issue includes, 15-drill compressor, 1,500-h. p. electrical plant, 4,000' aerial tram connecting mill with shipping bins at Sandon and flotation units added to the 100-ton concentrator, increasing capacity to 250 tons. Mill is at level of No. 10 adit.

Production: in 1915—

	Tons Average Assay				Tons	Average Assay			
	Crude Ore	Silver Oz.	Lead %	Zinc %		Concts.	Silver Oz.	Lead %	Zinc %
Lead..	204	89	60	6.9	665	66.5	58.3	8.1	
Zinc.	43	12		43.6	1,400				

Gross value crude ore shipped, \$21,937; gross value lead concentrates, \$60,775; zinc concentrates, unsold at end of year.

Management anticipates gross monthly returns of \$50,000 after new equipment is added, with operating expenses of \$10,000. The future of the mine looks very favorable now that litigation is ended, transportation is being bettered and mill capacity increased.

SLOCUM COPPER CO.

Phoenix, Maricopa Co., Ariz. John G. Hardin, pres. and gen. mgr.

ARIZONA

Property: in the Winifred district, 22 miles north of Phoenix, has shafts of 130' and 150', showing ore assaying well in copper, silver and gold. Active development work to be resumed.

SMALL HOPES-BOREEL MINING CO.

COLORADO

Property: the Robert Emmet mine at Leadville, a great producer of lead-zinc ore, is now owned by the Empire Zinc Co. (See New Jersey Zinc Co.)

SMITH VALLEY MINES CO.

NEVADA

E. J. Cooper, Receiver, Yerington, Nev. H. L. Van Valen, representing the stockholders, 410 Advertising Bldg., Chicago, Ill. Inc. 1912, in Nev. Cap., \$2,000,000. Placed in Receiver's hands Oct. 30, 1914; debts were about \$17,000. Reported Jan. 5, 1916, that obligations "are being rapidly paid off; it is expected that the Receiver will be discharged in about 60 to 90 days from present date."

Property: 23 claims, 467 acres at Yerington, said to show gold ore in a contact deposit between andesite and porphyry; width of ore, 6" to 3', with average assay reported of \$16.80 per ton. Claims 60,000 tons ore in sight.

Development: 200' incline shaft, with 900' of workings. **Equipment:** includes 25-h. p. gasoline hoist and a 6-drill compressor.

SMOKEHOUSE MINING CO.

MONTANA

Subsidiary of the Davis-Daly Copper Co., Butte, Mont.

SMOKEY DEVELOPMENT CO.

NEVADA

Property near Ely, Nev., sold at delinquent tax sale, February, 1915. Described Vol. XI, Copper Handbook.

SMOKY BULLION GROUP

IDAHO

E. A. Worswick, mgr., Lovelocks, Nev. Property: 3 claims, patented, 57 acres, on headwaters of Smoky river near Hailey, Blaine Co., Idaho, contains a big deposit of low-grade concentrating ore opened for 4,200' on a contact zone between granite and limestone. Ore carries galena, chalcopyrite and zinc. The sulphide shows on the surface.

Development: amounts to 2,000', mostly by tunnels, one 600' long, with 375' back. Property has been examined by Prof. Knutson and by J. M. Wilfley.

Property has milling plant erected by an eastern syndicate which spent \$100,000 on the property and allowed it to be sold for taxes. Regarded as a promising prospect.

SMUGGLER UNION MINING CO. (THE)

COLORADO

Telluride, Colo. **Officers:** Bulkeley Wells, pres.-gen. mgr., Telluride; H. L. Higginson, v. p., with R. L. Agassiz, T. L. Livermore, N. H. Stone, Q. A. Shaw and J. M. Crafts, directors. T. E. Sherwin, sec.-treas. Chas. N. Bell, supt.

Inc. 1891 in Colo. Cap., \$5,000,000; all outstanding; shares \$100 par. Bonds authorized \$250,000; outstanding \$67,500. Annual meeting in June. 14 Ashburton Place, Boston, transfer office. Financial reports not made public. No dividend reported since 1901. Company is controlled by The New England Exploration Co.

Property: 77 patented claims, 996 acres, in San Miguel and Ouray counties. Ore carries gold, silver, lead and iron, occurring in a true fissure quartz vein cutting andesite, tuff and rhyolite for a vertical distance of 2,000'. Vein strikes N. W.-S. E., dips 70°; average width 2½'. For geology of the Telluride district, see U. S. G. S. Geological Folio No. 57; also see Tomboy Gold Mines Co., Ltd., in this volume.

Development: by tunnels, with a 280' winze from lowest tunnel, 3,700'

long; main haulage level, 3,600' long; greatest depth of workings 2,300'. Total workings aggregate 30 miles.

Equipment: includes a 50-h. p. electric hoist, 2 compressors, pumps, hydro-electric power, one 60-stamp and one 80-stamp mill, 600-ton cyanide plant.

Production: 118,668 tons ore in 1912; 137,567 in 1913; 126,505 in 1914; 107,119 in 1915. Grade of ore and recovery not made public.

SNAKE RIVER CONSOLIDATED MINING CO. WYOMING

Mine P. O.: Columbine, Routt Co., Colo. **Officers:** L. A. Pease, pres., treas. and gen. mgr.; A. L. Arnold, sec.

Inc. July, 1906, in Wyoming. Cap., \$5,000,000; shares \$1 par; nonassessable; fully issued, with \$2,500,000 stock assigned to a trustee, for the benefit of the treasury. Annual meeting, second Wednesday in July.

Property: 9 lode claims, 2 patented, 180 acres, and 520 acres of placer claims, unpatented, in Three Forks district, 26 miles S. W. of Encampment, the nearest rail point. Claims show granite and diorite, reported by management to have veins carrying auriferous galena, with strike of N. 25° W., and cross veins carrying copper striking at nearly right angles. The management reports the galena vein system to have an extreme width of 120', with length of 4,500', the paystreak varying from 10" to 54" in width. The galena ore is said to average 10 to 20% lead, free from zinc, with silver and gold values. The copper veins are undeveloped, but show a variety of oxidized ores, at surface.

Development: by pits and shafts, and numerous short tunnels, from 30 to 500' in length, nearly all openings showing ore. The management estimates 5,000 tons of ore blocked out for stoping. Plans raising necessary funds for proper equipment and small concentrating plant in 1916.

SNOW CREEK MINING CO. OREGON

Baker, Baker Co., Ore. Officers: Henry B. Smith, pres., Bay City, Mich.; Fred. D. Smith, v. p., Ithaca, N. Y.; C. H. McCulloch, sec.; R. J. Davison, treas., with J. H. Boweley, directors. **Inc. June 25, 1914. Cap., \$200,000; shares \$1 par; outstanding 132,000 shares.**

Property: 5 claims, 85 acres, including the Snow Creek mine, formerly owned by Oregon Mines Exploration Co., near Greenhorn P. O. Ore carries gold, silver, lead in contact deposit, 3' to 8' wide; country rock is diorite and slate. Ore extracted in the past is said to have assayed \$12 per ton in gold and silver and 5% lead.

Development: 225' vertical shaft and tunnels, aggregating 1,315'. Claims 9,400 tons of ore blocked out.

Equipment: includes 10-stamp mill. Total output to date about \$40,000.

Title was obtained by present company under foreclosure of mortgage. Sinking shaft 100' deeper and developing is planned, 1916.

SNOWSHOE GOLD & COPPER MINES, LTD. BRITISH COLUMBIA

Property sold to Granby Cons. Mng., Sm. & Power Co., Ltd. and company dissolved. Fully described in Vol. XI, Copper Handbook.

SNOWSHOE MINING CO. IDAHO

Mullan, Shoshone Co., Idaho. Sadie Lucia, sec.; Paul Lucia, gen. mgr. Inc. Sept., 1903, in Idaho. Cap., \$1,000,000; shares \$1 par; assessable; fully issued; 11 assessments of 5 mills each levied to July, 1915. Shares are listed on the Spokane and Butte Exchanges. Annual report to Jan. 1, 1914, shows cash on hand, \$1,323.

Property: 7 claims, patented, adjoins the Snowstorm on the east and supposedly carries the extension of the Snowstorm fault, at the head of Gentle Annie gulch, near the top of Snowstorm mountain, in the Hunter district, 1 mile from railway. Claims show Renett quartzite, mineralized

for 30' in the Snowstorm fault, with some cuprite, azurite and chalcopyrite, giving assays up to 9% copper and 8 oz. silver per ton.

Development: by crosscut tunnels, longest 2,000', and drifts, a total of about 5,000' of underground workings, showing a mineralized zone of 30 to 40' width, carrying various copper ores sparsely disseminated. Drifting on the N.-S. fissure opened up a body of high-grade copper ore, 8'-2' wide, at 650' depth and about 1,600' from portal of No. 2 tunnel. The upper cross-cut tunnel, 700' long, intersected a vein up to 60' wide and running from 1-20% copper, at a vertical depth of 250'. A second crosscut, 696' vertically below No. 1, cut the vein 1,700' in without disclosing any values.

Equipment: includes an air compressor, power house and several buildings. Further development planned and necessary.

SNOWSTORM APEX MINING CO.

IDAHO

J. H. McIntyre, M. E. Delgrove and B. V. May of Spokane, trustees. Inc. 1908 in Wash. Cap., \$1,500,000; shares \$1 par.

Property: on Snowstorm mountain, east of Mullan, shows 2 veins opened by a shallow shaft and a 130' tunnel, with about 200' of workings.

SNOWSTORM EXTENSION COPPER MINING CO.

IDAHO

Address: A. J. Richardson, treas., 216 Wright & Callendar Bldg., Los Angeles, Calif. **Mine Address:** Mullan, Shoshone Co., Idaho. Inc. Oct., 1909, in California, as successor of Snowstorm Extension Mining Co., Ltd. Cap., \$1,000,000. Assessment of 2 mills per share, delinquent March 3, 1914.

Property: 9 claims, adjoining the Snowstorm on the east, supposedly carry the extension of the Snowstorm ore zone. Pits and trenches have shown ore of about 3% copper tenor, markedly similar to that of the Snowstorm. **Development:** by a drift tunnel, starting from North Fork creek, 2,000' long at last accounts, planned to be driven to secure an eventual back of 1,630', on the dip of the vein.

SNOWSTORM MINES CONSOLIDATED.

MONTANA

Officers: Leo Greenough, pres.-gen. mgr., Old Natl. Bank Bldg., Spokane, Wash.; J. B. Greenough, v. p.; W. J. Beaton, sec.-treas., with M. D. Hall, James Broad, E. H. Chaney, and R. E. Walters, asst. gen. mgr., directors.

Inc. in 1916. Cap., 2,500,000 shares; 25c par. Company organized to take over the Snowstorm Mining Co. and to acquire under bond and lease the Banner and Bangle claims, at Troy, Mont., which see. Of the capital stock, 1,500,000 shares will be issued to Snowstorm Mining Co. stockholders in full payment for the corporation's assets. Proceeds of sale of 1,000,000 shares stock not transferred to the former Snowstorm Co. stockholders, will be devoted to developing and equipping the Banner and Bangle property. Reports from the Banner and Bangle mine, in August, announced that 6 tunnels are all in ore and 300 men employed. The work blocks out 400,000 tons of ore averaging 7.5% lead; 8.5% zinc and 4 to 5 ounces silver per ton. It looks as if the Snowstorm stockholders had acquired an excellent property, which should soon put the stock on a dividend basis.

SNOWSTORM MINING CO.

IDAHO

Company being dissolved, July, 1916. Succeeded by Snowstorm Mines Consolidated, which see. **Office and mine:** Larson, Shoshone Co., Idaho. **Officers:** Leo Greenough, pres.-gen. mgr.; J. W. Greenough, v. p.; R. E. Walters, sec.-treas., preceding with J. B. Greenough, J. C. Broad, M. D. Hall and H. E. Chaney, directors.

Inc. July, 1900, in Idaho. Cap., \$1,500,000; shares \$1 par; non-assessable; issued 1,499,500 shares. For fiscal years ending June 30, earnings were \$5,677 net in 1905; \$144,322 in 1906; \$498,013 in 1907; \$243,262 in 1910; \$25,691 in 1911; \$15,787 in 1912; \$141,639 in 1913; \$152,904 in 1914 and in 1915 there was

a net deficit of \$57,891. Company reported a surplus of \$172,761 June 30, 1915.

Dividends: \$90,000 in 1906; \$360,000 in 1907; \$150,000 in 1908; \$202,000 in 1909; \$179,940 in 1910; \$44,985 in 1911, \$74,975 in 1912, \$142,452 in 1913 and 22,492 in 1914, a total of \$1,169,640 to end of fiscal year, 1914.

The property of this company was fully described in Vol. XI, Copper Handbook. By Sept., 1914, ore reserves had been exhausted and mining ceased, but development work was continued until June, 1915, at which time the mine had been thoroughly explored down to and including the 2,200' level. Exploration was fruitless.

In view of the fact that the company owned complete surface and underground mining equipment and had about \$160,000 cash on hand, the management deemed it desirable to continue in other mining activities rather than dissolve. Since then it has been searching for other properties. It had an option on 650,000 shares of the Missoula Copper Co. and did considerable development work on the property, but last reports state it had surrendered its option to the National Copper Co. for \$27,000.

Production: (for fiscal years ending June 30)

Year	Ore, tons	Copper, lbs.	Silver, oz.
1905		4,950,000
1906		6,233,940
1907	76,224	6,850,000	525,000
1908	87,503	8,000,000	596,000
1909	119,816	10,363,438	734,968
1910	91,368	7,125,105	605,075
1911	34,464	2,653,036	267,263
1912	29,964	2,074,447	204,870
1913		4,522,605	368,906
1914		4,632,943	286,695
1915		775,980	45,090

SOCORRO MINING & MILLING CO.

NEW MEXICO

Bought entire holdings of Mogollon Gold & Copper Co. for \$100,000 at public sale in Socorro, N. Mex., August, 1915. Sale ordered to satisfy judgment of \$416,626 obtained by Equitable Trust Co., New York, holders of bonds to that amount.

Property: 26 claims, partly patented, 480 acres, including the Cooney, Peacock, Little Charlie, Independence and Fluoride groups, sometimes known as the Silver Bar mine, in the Cooney district of the Mogollon mountains, 85 miles N. E. of Silver City, the nearest rail point. The property shows porphyry and andesite, carrying the Little Fanny fissure vein of 5 to 10' average width, with a paystreak of about 3' average and 30' claimed maximum width, having numerous narrow feeders, some of which carry high gold values. Ores include slightly auriferous and strongly argentiferous chalcopyrite, bornite and chalcocite, claimed to carry increasing silver values at depth, and the east vein has been said to show native copper at depth of 600'. The Cooney and Peacock mines are said to have produced \$1,250,000 worth of ore in the past.

Development: The Cooney group of 9 claims has a 780' two-compartment main shaft; the Peacock mine, 1,500' from the Cooney, has a 400' shaft and is connected with the Cooney by drifts on several levels; the Little Charlie mine has shafts of 350', 225' and 200', the main shaft being 250' below the tunnel. There are also various tunnels on the several groups.

The Pacific mine was optioned to Socorro M. & M. Co. by the Oaks Co., 1916.

Production reported for June, 1916, as 41 bars of gold and silver bullion; also several tons of high-grade concentrates.

Constructing an aerial tramway, 1916. Has a 230-ton mill.

SOFFE SILVER MINING CO.

UTAH

Directors: J. C. Soffe, pres.; W. R. Soffe, v. p.; J. W. McKinnig, sec.-treas.; W. J. Soffe, mgr.; A. J. Shulson. **Inc.** May 7, 1916, in Utah. **Cap.**, \$10,000; shares 1c par.

Property: 12 claims, unpatented, in Erickson mining district, Tooele Co., 30 miles west of Faust Station on Salt Lake route. Claims show high-grade silver-gold ore. Company plans immediate development.

SOMBRERETILLO MINING CO., S. A.

MEXICO

Was controlled by the Sonora Central Mines Co., now out of business.

SOMBRERO DEVELOPMENT CO.

ARIZONA

Office: Houghton National Bank Bldg., Houghton, Mich. **Mine office:** Globe, Gila Co., Ariz. **Dr.** Lucius L. Hubbard, gen. mgr. Company is a syndicate, not incorporated. **Property:** on Cherry creek, west of Sombrero Butte, and about 50 miles north of Globe, is slightly prospected by adits. The mine has a small water-driven plant. Inactive.

SONORA CENTRAL MINES CO.

MEXICO

Fully described Vol. XI, Copper Handbook. Passed away; foreclosure proceedings took place about 1913, but provided no cash for the bondholders, so they took the property. No reorganization of the Sonora Central was made, but a new company was formed, known as the Alamos Dev. Co.; E. M. Board, v. p., 1510 Dayton St., Chicago; Walter Strong, sec.-treas., 1638 So. Michigan Ave., Chicago, Ill.

SONORA CHIEF MINING CO.

MEXICO

Idle. Office at last accounts: 219 Argyle Bldg., Kansas City, Mo. Mine near Suaqui de Batuc, Sonora, Mex. **Officers:** Jas. E. Crosby, pres.; Dr. Moses T. Runnels, v. p.-treas.; R. A. Bruns, sec.; preceding with C. D. Stoll and I. D. Waggener, directors.

Inc. July 18, 1904, in Arizona. **Cap.**, \$1,500,000; \$1 par.

Property: the Phoenix and Lakeside groups, 464 acres. The flotation was, it is believed, a crooked one. The property has no such showing as reported and described. Such veins as exist are tiny streaks a few inches wide, which in places contained very high-grade ore, chalcocite and perhaps whitneyite. Its location, on the far side of the Yaqui river, is such that even a remarkably good showing would not have been worth development at the time the company was active. The property is totally devoid of merit. Idle several years.

SONORA COPPER MINING CO.

MEXICO

Idle. Office at last accounts: 895 So. Clarkson Ave., Denver, Colo. Edward J. Wilcox, pres.; H. L. Peebles, v. p.; Fred W. Webber, sec.; C. A. Parker, treas., and L. J. Stark, directors. **Inc.** May 17, 1910, in Colorado. **Cap.**, \$10,000, shares \$1 par.

Property: 10 claims, 4 miles from San Felipe, in the Arizpe district, Sonora, and 62 miles from Posa on the S. P. R. R., developed by 820' of underground workings, showing a 12' vein, with some complex silver-lead-zinc ore.

SONORA COPPER SMELTING CO.

MEXICO

Idle. Last address: 424 Scarritt Bldg., Kansas City, Mo. **Mine office:** Noria, Sonora, Mex. **Officers:** A. M. Conard, pres. and gen. mgr.; J. M. Lowe, v. p.; C. E. Kroh, sec.; W. R. Moore, treas.; preceding with J. G. Burnley, F. E. Reed, E. E. Axline, J. E. Kramer and Chas. L. Irons, directors. **Inc.** June 25, 1908, in Ariz. **Cap.**, \$3,000,000, shares \$10 par.

Company supposed to have been organized as successor of the Sonora

Copper Co., but apparently owns only a 50% stock interest in that company, and title to the Mexican property is held in the name of the International Copper Ore Corporation, which is controlled, in some manner, by this company, the corporate relations being neither clear nor satisfactory. Annual meeting, third Tuesday in December.

Property: about 500 acres, including the Cobre Grande, 123 acres, 5 miles east of Noria, the principal mine, is not considered worthy of the money spent upon it and the past history of the president is such that the company is regarded with much suspicion.

SONORA DEVELOPMENT CO.

MEXICO

Office: 601 New Ridge Bldg., Kansas City, Mo. **Mine office:** Nacozari, Sonora, Mex. Alfred Blaker, pres.; Chas. M. Williams, v. p.; Col. Geo. M. Bowie, v. p.; John W. Amerman, sec.; W. A. Rule, treas.; with A. A. Potter and A. D. Fetterold, directors; Chas. A. Hyder, cons. engr.

Inc. in Ariz. Cap., \$2,500,000. Company absorbed the Goodlander Mining & Milling Co.

Property: 198 hectares, including the Nacozari Copper Queen, Wostenholm, Goodlander, Don Genaro y Anexas, and La Madrugada groups, carrying auriferous and argentiferous copper and lead sulphides. The Nacozari Copper Queen mine, 65 acres, lying between the Pilaes de Nacozari and Belle Unión mines of the Moctezuma Copper Co., has given ore assaying up to 58% copper. The property is developed by shafts and tunnels, apparently somewhat at random. The Goodlander has a 10-stamp mill. The company has been idle for several years and will not resume operations until stable conditions prevail in Mexico.

SONORA EXPLORATION CO.

MEXICO

Estación Yzabal, Sonora, Mex. **Property:** formerly held by the Florida Copper Co., in the vicinity of the El Tigre mine, include El Temblor, Last Chance, Texas and other properties, carrying gold and silver-copper ore, developed by shaft. **Equipment:** includes steam power and an air compressor. Idle.

SONORA MINING & DEVELOPMENT CO.

MEXICO

Office: 207 Spitzer Bldg., Toledo, Ohio. **Works office:** Toledo, Sonora, Mex. **Officers:** A. E. Klauser, pres.; H. R. Klauser, v. p. and gen. mgr.; J. G. Meiljnk, sec.-treas.; and A. V. Baumann, directors.

Inc. 1904, in Arizona. Cap., \$5,000,000; shares \$1 par. Company operated in Mexico under the name of the Yaqui Smelting & Refining Co., S. A., which is incorporated in Mexico; **cap.,** 100,000 pesos. Company is exempt from the payment of property tax for 20 years, and also enjoys a 50% reduction on the state tax for 20 years. International Trust Co., Boston, registrar; Frederick R. Tibbetts, Boston, transfer agent.

Property: about 154 hectares of mineral property, and 1,000 acres miscellaneous lands, including a smelter site and town site. Mine is reached by a branch of the Southern Pacific Railway, and company has a government concession for construction of an aerial tram line of 40 kilometers length. Lands are in San Antonio de la Huerta, San Javier and San Onavos, about 80 miles east of Torres and about 60 miles below Campo Santo Niño. The principal property is the Veta Grande mine, about 10 miles from the smelter, said to show a gossan 40' wide, outcropping for a quarter mile. Property also includes the Almeda, Plomosa, Isabella, Moctezuma, San Francisco, Caballos, Ferruginosa, Independencia and Gerberina mines, carrying mainly gold-silver-copper ores, with some auriferous silver-lead ore.

Equipment: the reduction works include a sampler, smelter and power plant, with necessary adjuncts. The 150-ton smelter has a 36" circular Allis-Chalmers blast furnace, for use interchangeably on lead and copper ores.

and a smaller furnace for copper only. The power plant includes two 80-h. p. water-tube boilers, 2 engines, an Erie high-speed engine and a No. 7 Connersville blower, for furnace blast. The lead refinery building has a softening furnace, refining furnace and 2 desilverizing kettles, operating on the Parks process. The silver refining plant includes 2 cupel furnaces, with blast attachments, 1 bullion furnace, 1 muffle furnace, and necessary pots and moulds, with a bullion vault. Idle since 1910.

SONORA MINING & MILLING CO.

IDAHO

Dr. W. A. Smith, sec., White & Bender Bldg., Wallace, Idaho. Norman Ebbly, C. W. Gibbs, A. H. Featherstone, E. O. Hering, all of Wallace, are heavily interested. Funds are raised by occasional 2 mill assessments.

Property: 12 claims, patented, over the hill from the Marsh mine above Burke. Is an old mine on which work has been prosecuted since 1896, spending \$75,000 and doing 3,200' of work prior to 1908, when a 6' vein was cut at 1,400' from portal and at depth of 800'. In 1914, a contract with John Moffatt was made to "find" the vein for 100,000 shares of stock.

In 1914 a shaft and winze was sunk on the Cooney vein at 1,950' from the tunnel mouth, the ore-shoot proving elusive on the Sonora vein. In 1916, company let contract for 200' extension of the 1,500' tunnel, hoping to crosscut another vein.

SONORA-PACIFIC MINING CO.

MEXICO

Noria, Sonora, Mex. Ira E. Bowers, gen. mgr. Inc. 1911, as the successor of the Llano Copper Co.

Property: 10 groups, 526 hectares, on Caracahui mountain, 3 miles east of Noria, the nearest rail point, also 5,000 hectares of ranch lands. Lands show limestone cut by intrusions of diorite and porphyry, with a quartz vein of 3 to 50' estimated width, traceable 6,000' on the company's claims, which is reported to show bunches of ore carrying chalcocite, bornite and chalcopyrite, with a little native copper, that will average about 7% copper. 6 to 10 oz. silver and \$2 to \$5 gold per ton, as developed. **Development:** consists of the 105' No. 1 shaft, No. 4 shaft of 800', and No. 7 shaft of 600', with tunnels of 50', 200', 577' and 750'. Orebodies developed so far are too small and too few for commercial production.

Equipment: includes a 125-h. p. steam plant, with 2 hoists, and a 6-drill Ingersoll-Rand compressor. Presumably idle.

SOUTH AMERICAN DEVELOPMENT CO. EQUADOR & CALIF.

Office: 15 Broad St., New York. J. W. Mercer, gen. mgr. W. H. Knowles, supt., Poison Oak mine, Sonora, Calif. L. O. Kellog, supt., Ecuador property.

Property: company owns mines in Ecuador and has lease and bond on Poison Oak mine, Sonora, Calif., from the Yankee Hill Mining Co., of Santa Ana, Calif. **Development:** 300' shaft, with sulphide ore on 200' level, which was not free milling. Mine idle for 15 years, was reopened Jan., 1916. Company refuses to give out any information.

SOUTH BUTTE MINING CO.

MONTANA

Butte, Mont. John G. Williams, M. E. Riley and Arthur Howell, directors, at last accounts.

Inc. May 25, 1906, in Minnesota. **Cap.,** \$500,000; shares \$100 par. Company was organized by the Great Northern railway interests and has had much litigation, with various individuals and corporations, including the Butte Central Copper Co., East Butte Mining Co., P. D. Morgan and others, winning practically all of the suits. Property was leased to the Montana Consolidated Mining Co., but nothing of particular value was developed, and the latter-named company was liquidated.

Lands: include the Surprise placer claim, but company's chief asset con-

sists of mineral rights to a narrow strip along the Great Northern right-of-way. Idle.

SOUTH CARDIFF MINING CO.**UTAH**

George N. Lawrence, pres., 1021 Newhouse Bldg., Salt Lake City; W. H. King, v. p.; Allen Sanford, sec.-treas.; George A. Steiner and Thos. Marioneaux, directors.

Inc. April 9, 1916, in Utah. Cap., \$1,000,000; 385,000 shares in treasury.

Property: 5 claims, 87 acres in Cottonwood district, adjoining the Cardiff, Howell & Monte Cristo, and the Canton Mining Co. holdings, is supposed to carry extension of Cardiff fissure.

SOUTH EUREKA MINING & MILLING CO.**CALIFORNIA**

Office: San Francisco Nat'l Bank Bldg., San Francisco, Calif. Edward Fox, sec.-treas.; W. H. Schmal, supt.

Earnings in 1915 reported, \$582,762; with operating expense, \$448,013; construction and equipment, \$8,825; supplies \$570; dividends 38c per share, or \$125,354. Stock is listed in San Francisco.

Property: South Eureka mine and the Oneida, lying between South Eureka on the north, and the Kennedy mine on the south, one mile south of Sutter Creek, Amador county. **Ore:** is gold bearing quartz occurring in the Mother Lode, and is on a northern extension of the Kennedy and Argonaut lead. The enclosing rocks are Mariposa slate and greenstone schists. At the South Eureka mine three distinct veins have been developed; the hanging-wall, footwall and middle veins, with the two latter joining below the 2,000' level; most of the pay ore developed on lower levels is in this vein.

Development: by shafts. The north shaft, 2 compartments, on the South Eureka, is down 2,785' on a 67° incline; it cut the hanging-wall vein at 1,700' level, remained in the vein to the 2,000' level and is in the footwall below this. The south shaft, 880' S. E. of the main shaft, has a vertical depth of 600'. The Oneida has a 2,280' vertical shaft sunk in the hanging-wall; it cut the vein on the 1,900' level. Workings of Oneida are connected with South Eureka on the 1,800' level. The lower levels of the Oneida were flooded, but early in 1916 the mine was drained and work resumed.

Equipment: at South Eureka includes 2-ton skips, double-drum hoist driven by two 400-h. p. motors with 24-rope transmission drive and 2 Ingersoll-Rand compressors, each driven by 100-h. p. motor.

Mill: 80 stamps, weighing 1,150 lbs., dropping 6½", 100 drops per minute, crush 5 tons through 24-mesh screen. Each battery of 20 stamps is driven by a 50-h. p. motor. Pulp from amalgamating plates is treated on Frue vanners. Company employs 250 men.

Production: in 1915 totaled 145,124 tons of \$4.34 ore, with a recovered value of \$3.96 per ton, extraction 91%. Cost per ton of ore milled, \$3.09; average value of concentrate, \$68.99 per ton.

See State Mineralogist's Report Mines & Min. Res. of Amador Co., pp. 39, 45.

SOUTH HECLA EXTENSION MINING CO.**UTAH**

Office: 49 So. Main St., Salt Lake City, Utah. Officers the same as South Hecla Mng. Co. Inc. in Utah. Cap., \$500,000; shares \$1 par; assessable; outstanding \$400,000. Listed in Salt Lake City.

Property: 37 acres in the Little Cottonwood district, adjoining South Hecla Mining Co., said to show silver-lead-copper-gold ore. Development is being done through the Quincy tunnel level of the South Hecla mine. Is in the prospect class.

SOUTH HECLA MINING CO.**UTAH**

Office: 49 So. Main St., Salt Lake City, Utah. **Mine Office:** Alta, Salt

Lake Co., Utah. **Officers:** Geo. H. Watson, pres.-gen. mgr.; Herman Bamberger, v. p.; E. Storer, sec.-treas.; preceding with H. C. Edwards, Thos. Coughlin, V. M. Burman and D. W. Harcrow, directors. Matt Aho, mine superintendent.

Inc. Sept. 14, 1910, in Utah. **Cap.**, \$500,000; shares \$1 par; assessable; issued \$262,161. Company was organized as a merger of the South Columbus Consolidated Mining Co., and Alta-Hecla Mining Co., and holds properties formerly held by the Bingham-Centennial, Alta-Quincy, Columbus Wedge, Ivanhoe and Lilburn mining companies. Company exchanged stock on the basis of 1 share of South Hecla for 5 shares of South Columbus, and 1 share of South Hecla for 5 shares of Alta-Hecla. Shares are listed on the Salt Lake Stock Exchange. Annual meeting, second Wednesday in September.

Gross earnings in 1915 amounted to \$100,479, all from ore sales; operating expenses were \$70,834, leaving a credit balance of \$29,645. Initial dividend, 15 cts. per share, paid Aug. 10, 1916.

Property: 41 claims, partly patented, 550 acres, in the Little Cottonwood district. Claims carry 8 well defined ore bearing fissures in granodionite and limestone, running N. 70° E., dipping 70° N. and contact deposits between limestone and granite. The 3 orebodies under development, one in the Kate Hayes, the others in the Wedge fissure, are reported by the management to average 20' in width, and to carry malachite, azurite and tetraehdrite in the surface zone, succeeded by chalcopyrite, galena and sphalerite, estimated by the management to average 1% copper, 15% lead, .05 oz. gold and 35 oz. silver per ton. No. 1 shoot of the Kate Hayes is 940' long; No. 2 proven for 300' long.

Development: is by two main working tunnels, the Quincy and Dwyer; the Dwyer 2,000', Alta-Quincy 1,800', South Columbus 1,400', Rustler 1,200', Scott 1,700', Neversweat 150' and the White of 700'. The mine as a whole has about 7 miles of workings, lighted by electricity. Main development during 1915 was on the 250' level of the Wedge vein; 11 incline raises and 14 crosscuts were driven, all in ore.

Equipment: includes a 60-h. p. electric plant, with a 10-h. p. hoist good for 200', and a 2-stage Pneumatic compressor. Buildings include a shop building, housing smithy, machine and carpenter shops, with a 3-story boarding house and 5 dwellings.

Production: 1915 on company account was 6,957,244 lbs. ore, containing 129,268 oz. gold; 124,676 oz. silver; 668,659 lbs. lead; 384,979 lbs. zinc, 30,388 lbs. copper; 362,881 lbs. iron. Production from lessees, operations was 2,612,889 lbs. ore, containing 31,635 oz. gold, 19,390 oz. silver, 245,832 lbs. lead, 122,863 lbs. zinc, 2,763 lbs. copper and 37,024 lbs. iron. Shipping about 50 tons of ore daily, Aug., 1916, by four sets of lessees. Company employs 60 men. An extensive campaign of development is planned for 1917. Absorption of the Albion property, owning 12 claims at Alta, is reported Aug., 1916. With improved transportation facilities company should soon be a dividend payer.

SOUTH IRON BLOSSOM MINING CO.

UTAH

Robinson, Juab Co., Utah. George Jones, pres.; T. L. Schofield, sec.-treas. **Inc.** 1908 in Utah. **Cap.**, \$100,000; shares 10c par; assessable; outstanding \$241,000. Listed in Salt Lake City.

Property: 4 claims in the Tintic mining district, said to show silver-lead ore.

SOUTH LAKE MINING CO.

MICHIGAN

Office: 60 Congress St., Boston, Mass. **Mine Office:** Houghton, Mich.

Officers: R. M. Edwards, pres.-gen. mgr.; Arthur C. Paine, sec.-treas.; preceding with Thos. S. Woods, E. C. Robinson and Geo. E. Davis, directors.

Inc. Feb. 25, 1880, in Michigan as the Aztec Copper Co.; reincorporated Aug. 12, 1909, under present title and corporate existence extended for 30 years from Feb. 25, 1910. **Cap.**, \$1,000,000; shares \$25 par, increased to \$2,500,000; assessable: 90,000 shares issued; \$6.60 paid in. Last assessment, \$2, payable June 3, 1912. Of the issued stock 40,000 shares were given to the old stockholders share for share, 20,000 were offered the same stockholders of record May, 1913, at \$6.60, but were largely taken by the underwriters; 10,000 shares were offered in March, 1915 and 10,000 more in Oct., 1915, at \$5. The last two offerings were practically all taken by the shareholders. In April, 1916, the last installment of 10,000 shares was offered to the stockholders, at the rate of \$7.75 per share.

Balance of assets Dec. 31, 1915 was \$49,552, including \$36,089 cash on hand; liabilities were \$32,594, leaving a credit balance of \$16,958 as compared with a debit of \$3,790 in 1914. American Trust Co., Boston, registrar; Federal Trust Co., Boston, transfer agent. Annual meeting, first Tuesday in March.

Property: 334 acres of mineral lands, being the W. $\frac{1}{2}$ of Sec. 31, T. 51 N., R. 37 W., adjoining the Lake mine on the east, and the Adventure property on the west.

History: work was begun on the property in 1862, though the name Aztec was originally taken because the remains of extensive workings by a prehistoric race were thought, in those days, to have been the work of the Aztecs. A 16-lb. stone hammer was taken from the old workings.

The mine had a stamp mill in early days, and produced 756,853 lbs. fine copper, of which 100 tons was secured in a single mass. Exploratory work was done, 1905-06, on the Knowlton bed, of the Evergreen series, by the Aztec-Algomah Development Co., and diamond-drill borings were begun Sept., 1909, continuing until March, 1911, when suspended by reason of adverse financial conditions. Borings were begun at the base of Evergreen bluff, near the foot of the Evergreen belt, thence working southward toward the eastern sandstone. Eight drill holes were put down at various points on the property.

Exploratory drilling having shown copper rock in five holes, four of them at the corners of a 200' square, actual mine development work was determined upon. The holes showed that the beds run N. 70° W. and dip at about 56°. The drill cores and recent underground work were carefully studied by A. C. Lane in 1916, who reports that of the four lodes cut by this work, No. 2 lode, or possibly, a combination of No. 1 and No. 2 lodes, is the Lake lode, mined by the Lake Copper Co., and that the lodes dipping north in the 300' crosscut, north of the South Lake shaft, are identical with, and the same as those dipping south on the 600' crosscut south of the shaft. This means that the veins fold over, dipping both N. W. and S. E. and that a vertical shaft can reach both limbs of the \wedge shaped fold.

The vertical shaft, begun May, 1912, and now 1,000' deep, has opened up lodes Nos. 1 and 3, and the Butler lode, north of the shaft, in all of which ore is being mined, 1916. For 400' along the Butler lode, the rock is said to be spectacular in character. The South lodes will not be stoped until November, when a connection with the Lake mine by a drift on No. 3 lode on the sixth level will be completed, giving good ventilation. Drifting on an amygdaloid in the 600' South crosscut at 1958' to 1965' from the shaft is said to carry heavy copper. A north crosscut on this same level shows 51' of ore in No. 3 lode, 64' from the shaft.

On the 300' level the crosscut north is in 773' from the shaft and has passed through 4 lodes as follows:

Lode	Distance from shaft	Amt. of Drifting
No. 1 North.....	135'	847'
No. 2 North (a).....	213'	none
No. 3 North.....	270'	933'
No. 4 North.....	750'	

(a) Not commercial.

On the 600' level the crosscut south is in about 1,970' from the shaft and has passed through 5 lodes of commercial value as follows:

Lode	Distance from shaft	Width	Amt. of drifting
No. 1 South.....	1335'	51'	282'
No. 2 South.....	1431'	49'	224'
No. 3 South.....	1529'	41'	921'
No. 4 South.....	1654'	16'	64'
No. 5 South.....	1958'	10'	—

Production: during 1915, 3,993½ tons of rock were stamped at the Franklin mill and smelted at the Michigan smelter, giving net returns of 61,637 lbs. refined copper or 15.4 lbs. per ton. In Aug., 1916, 100 tons of rock were being hoisted daily, to be increased to 200 tons in the Autumn.

The South Lake installed all machinery, including a 15-drill air compressor in 1915, and completed its new steel shaft and rockhouse. Production commenced April, 1916. Company has a decidedly promising property upon which to work.

SOUTH PARK MINING & DEVELOPMENT CO.

UTAH

Office: 310 Kearns Bldg., Salt Lake City. O. A. Relf, pres.; J. Tracy Wootton, sec.-treas. **Inc.** May 24, 1916. **Cap.**, \$50,000; shares 5c par; assessable; \$3,000 issued. Listed in Salt Lake City.

Property: 13 patented claims in American Fork mining district, said to show iron carbonate containing silver-lead values.

SOUTH RANGE MINING CO.

MICHIGAN

Office: 199 Washington St., Boston, Mass. **Mine office:** Houghton, Houghton Co., Mich. **Officers:** John W. Belches, pres.; Irving J. Sturgis, v.-p.; Arthur E. Coe, sec.-treas.; preceding with Rufus R. Goodell, directors; F. W. Nichols, resident agt.

Inc. Nov. 12, 1899, in Michigan. **Cap.**, \$2,500,000; shares \$25 par; fully paid; issued \$2,370,000. Annual meeting, first Wednesday in June.

Property: 7,000 acres of undeveloped mineral ground, lying mainly between the Globe and Lake mines, in Houghton and Ontonagon counties, Mich., and so effectually scattered that future mining companies acquiring territory in that district will need more or less land from the South Range Mining Co. to secure regular tracts.

SOUTH SIDE MINING CO.

MICHIGAN

Office: 68 Devonshire St., Boston, Mass. **Officers:** John C. Watson, pres.; Frederick Hoitt, sec.-treas.; preceding with Harry F. Fay, Ashley Watson and D. C. Forbes, directors.

Inc. 1859 in Michigan, and reincorporated Nov. 2, 1898; charter expires by limitation April 11, 1919. **Cap.**, \$1,000,000; shares \$25 par; fully issued; \$9.70 paid in. The company levied assessments of about \$90,000, to 1872, and April, 1912, paid a cash dividend of 25 cts. per share and 1,935/10,000 of a share of stock of the Naumkeag Copper Co., received in payment for lands sold to that company. Cash balance in treasury Jan. 1, 1916, \$2,000. Annual meeting first Monday in March.

Lands: were about 200 acres, lying west of the Dacotah and north of the old Naumkeag properties, immediately west of Houghton, sold, with the exception of about 31 acres of surface rights surrounding the water supply of the village of Houghton, for \$22,515 cash and 7,740 shares of stock of the Naumkeag Copper Co. Negotiations for the sale of remaining surface rights to the village of Houghton are in progress, and when completed, company can be liquidated.

SOUTH UTAH MINES & SMELTERS.

UTAH

Office: 165 Broadway, New York. Mine office: Newhouse, Beaver Co., Utah. **Officers:** Hugo Hoffstaedter, pres.; H. G. Robinson, sec.-treas.; with J. F. A. Clark, E. P. Earle and Samuel Newhouse, directors; W. L. Heidenreich, gen. mgr.; R. J. Tullock, mill supt.

Inc. Feb. 28, 1910, in Maine, as successor of Newhouse Mines & Smelters. **Cap.**, \$4,300,000; shares \$5 par; issued 645,800 shares. **Debentures:** \$1,071,000 of 6% 20-year income bonds, convertible into stock at par, remaining from a \$1,500,000 bond issue put out by the Newhouse Mines & Smelters. Interest on bonds is said to be payable annually, but only if and when earned, and then out of net profits of the year's operations. The old company defaulted in interest on its bonds, and the property was bought for \$500,000 under foreclosure, old shareholders being given stock, share for share, plus a payment of \$1 per share for new stock. The reorganization brought about \$600,000 into the treasury, of which all but about \$200,000 was required to liquidate the floating debt of the old company. The annual report for year ended June 30, 1912, showed an operating loss of \$31,113, increasing a former deficit to \$118,353, and gave current assets as \$179,500 and current liabilities as \$33,723. No report has since been issued. Listed on New York curb. Equitable Trust Co., New York, transfer agent; Windsor Trust Co., registrar. Annual meeting, third Monday in October. A dividend of 50 cts. per share, amounting to \$300,000, paid Aug. 31, 1907, by the Newhouse Mines & Smelters.

Property: 13 claims, patented, 201 acres, with miscellaneous holdings, including the Midvale placer, 168 acres, water rights at Wah Wah springs, mill, town sites and grazing lands, total holdings of 7,882 acres.

The mineral property carries about 1 mile of the strike of the Cactus vein. The Cactus mine shows monzonite-porphry country rock, near a limestone contact, and ore is essentially an irregular mass of brecciated monzonite, carrying copper impregnations, including some oxidized ores in the upper workings, but at depth mainly chalcopryrite, associated with pyrite, averaging about 1.15% copper and 25 cts. per ton in combined gold and silver values. Although the average grade of ore is very low, there is some high-grade sulphide ore, mainly chalcopryrite, assaying up to 15 and even 20% copper, but the quantity of such ore is very small.

The mine has practically no ore reserves, though there is an orebody between the 700' and 800' levels containing about 100,000 tons of 1.5% ore, with an additional 100,000 tons of probable ore. A new orebody opened on the 600' level for a short distance was said to show ore averaging about 1.8% copper.

Development: by two working shafts, of 600' and 900' depth, with levels at 100' intervals, and connected on the 600' level with a 6,300' main haulage tunnel, having a grade of 5%, laid with 30-lb. steel rails. Tramming is done by electric locomotives, hauling trains of 21 cars. The tunnel is electric-lighted throughout, and cuts several cupriferous veins before reaching the main orebody. The mine has upwards of 4 miles of workings. Principal developments are between the 300' and 700' levels, and the 600' level, giving the principal showing of ore, was said to have an orebody of

135' width and about 125' length, carrying ore of a little better than 1% copper.

Equipment: includes 200-h. p. steam plant, with a 150-h. p. hoist good for 600', and a 40-drill Ingersoll-Sergeant air compressor, both operated electrically. There also is an auxiliary electric hoist on the second level.

The mine and mill are connected with the San Pedro & Salt Lake railway.

Mill: the 1,000-ton mill is 100x400' in size, in two 500-ton duplicate sections, designed on the unit plan, to allow for future expansion. The western section, which is the concentrator proper, contains a 15-ton Whiting traveling crane, and the power plant. Equipment includes three 10x24" Blake crushers, 4 sets of rolls, 1 Huntington mill, 22 Hartz jigs, 48 Wilfley tables, 10 Johnston tables, 8 Wilfley slimers, 16 Callow tanks and Sherman settling tanks and classifiers. Ore is received in 1,000-ton steel bins, whence it is drawn by belt conveyors, equipped with plunger feed, and transferred to elevators, of which there are 2 for each section, 1 for dry and 1 for wet ore. Concentration is about 12.5 into 1. A flotation unit was added in 1914.

The power plant includes five 350-h. p. Babcock & Wilcox boilers, a Green fuel economizer and a 165' steel smokestack of 8' diameter. The steam plant is held in reserve, machinery being actuated by electric energy, brought 50 miles over the lines of the Telluride Power Co. There are two 500-h. p. Westinghouse-Parsons turbines, making 3,600 r.-p.-m. Water is brought 8½ miles from 6 large springs, at Wah Wah, having a flow of about 1,000 gals. per minute.

Production: for fiscal years ending June 30 was 5,670,993 lbs. fine copper, 53,862 oz. silver and 2,272 oz. gold in 1906; 7,244,179 lbs. copper, 48,595 oz. silver and 1,721 oz. gold in 1908; from Sept. 1, 1910, to June 30, 1912, 5,527,810 lbs. copper, 43,691 oz. silver and 2,450 oz. gold, secured from 426,703 tons of ore, of which 701 tons were smelting ore and 34,062 tons of concentrates, giving an actual net extraction of about 13 lbs. fine copper, 6 cts. silver and 11 cts. gold per ton. During 3 months ended Sept. 30, 1912, production totaled 674,987 lbs. copper. The mine was closed down owing to a strike from Sept., 1912, to April, 1913. From April, 1913, to June, 1914, production was 3,294,113 lbs. copper. Mine was again idle from June, 1914, to Oct., 1915.

Mining costs have been estimated at 90 cts. and milling costs at 50 cts. per ton. It is obvious that the Cactus is an exceedingly low-grade mine and will require careful handling to earn substantial profits.

SOUTH YUBA MINING & SMELTING CO. CALIFORNIA

French Corral, Nevada Co., Calif. Al. Elliger, pres.; C. D. Tregonning, supt. Cap., \$50,000.

Property: 10 claims, in process of patenting, including the Red Ledge mine, 10 miles N. W. of Nevada City, the nearest rail point. Mine shows granodiorite and diabase. There are 3 known veins, mainly copper-bearing, and 1 vein, originally worked for its gold ores, carries considerable quantities of this metal in the copper zone below.

Development: by 6 tunnels, longest 330', with total openings of about 2,000', showing malachite, chalcopyrite and good values in gold and silver. Principal tunnel, starting just above the South Yuba river, is expected to intersect 3 veins, including a 35' vein of cupriferous hematite, and give a back of about 1,500'.

Equipment: includes a 10-stamp mill, cyanide plant and water power. Reported bonded to a New York syndicate, 1916.

SOUTHERN ARIZONA MINING CO.**ARIZONA**

Office: 303 Midland Bldg., Kansas City, Mo. **Officers:** H. A. Sutermeier, pres.; F. D. Reasor, v.-p.; C. E. Sweet, sec.; Chas. L. Cookson, treas., with A. E. White, Emil Thielmann, H. J. Richards, E. P. Greenwood and R. W. Pierce, directors. C. A. Pierce, supt., Patagonia, Santa Cruz Co., Ariz.

Inc. 1912 in Ariz. **Cap.**, \$4,000,000; shares \$1 par; non-assessable; 1,409,079 shares outstanding. Authorized bond issue, \$400,000; \$84,160 outstanding. Annual meeting third Tuesday in January.

Property: the Sweet group, 23 claims, 3 patented, in Wrightson mining district, 10 miles N.W. of Patagonia, shows gold-bearing copper ore, occurring as contact deposit between granite and monzonite. Mine has 365' shaft equipped with steam hoist and air compressor. Not operating in 1915.

SOUTHERN ARIZONA SMELTING CO.**ARIZONA**

Bankrupt. Property bought in by preferred creditors at public auction, March, 1915, and reported leased, 1916, to the American Sm. & Ref. Co. Sascos smelter fully described in Vol. XI, Copper Handbook.

SOUTHERN EUREKA MINING CO.**CALIFORNIA**

Greenville, Plumas Co., Calif. **Inc.** in Washington by George D. Needy, E. F. Yeager, M. A. DeHuff, Hal J. Cole and H. R. Van Dreathen, all of Spokane. **Cap.**, \$2,000,000.

Property: the South Eureka, Hibernia, McClellan and Wardlaw mines, 12 claims, 450 acres, traversed by half a mile of the Crescent-Indian Valley and other lodes, near Greenville.

SOUTHERN EXPLORATION & MINING CO.**COLORADO**

F. B. Goudy, business mgr., 2379 Forest St., Denver, Colo. **Property:** a lease on the Congress mine, owned by the Congress Gold & Copper Co., which sec. Company had \$7,000 debts, mainly for labor and supplies, Dec., 1913, and operations were suspended.

SOUTHERN IDAHO DEVELOPMENT CO.**IDAHO**

D. J. Mahoney, supt., Pocatello, Idaho. U. B. Sollie and Dr. J. C. Arnout, directors.

Property: a group near Pocatello, showing a vein of copper ore, from which a carload shipped, 1916, returned 17.7% copper and 4 oz. silver per ton.

SOUTHERN PACIFIC GOLD & COPPER M. & M. CO.**UTAH**

Office: 39 North Capitol Ave., Salt Lake City, Utah. Mine near Ogden, Weber Co., Utah. **Officers:** T. S. Freney, pres.; Wm. Pough, v.-p.; J. W. Burnham, sec. and gen. mgr., at last accounts.

Inc., July 20, 1903, in Utah. **Cap.**, \$1,000,000; shares \$1 par; assessable; issued \$798,910. Shares are listed on the Salt Lake Stock Exchange.

Property: 12 claims, unpatented, 240 acres, 3 miles from a railway and about 8 miles north of Ogden, in the Sierra Madre district, reported to carry 25 orebodies, mainly contact deposits between quartzite and gneiss. The main vein, of about 50' width, shows some oxidized ores, but mainly auriferous sulphides, including covellite, bornite and chalcopyrite, with some molybdenite, in a 6' vein. **Development:** by 65' incline shaft on the Wizard claim, showing a 2' vein of high-grade copper ore and 8 tunnels, with about 1,000' of workings, said to show ore assaying up to 6% copper, 37 oz. silver and \$1.60 gold per ton. A strike of high-grade molybdenum ore was reported in 1914.

SOUTHERN SWANSEA MINING CO.**UTAH**

Office: 408 South State St., Salt Lake City, Utah. Mine office: Silver City, Juab Co., Utah. Geo. Jones, pres.; Geo. A. Shepard, v.-p.; Richard B. Shepard, treas.; Emma C. Shepard, sec.; R. E. Jones, supt.

Inc. July 31, 1907, in Utah. **Cap.**, \$10,000; shares 1 ct. par; issued,

\$8,500. An assessment of 1/30 of a cent a share is levied annually. Shares are listed on the Salt Lake Stock Exchange.

Property: 12 claims, unpatented, south of the Swansea mine and supposed to carry an extension of the Swansea vein, showing porphyry, quartzite and lime, with a fissure vein of 12' estimated average width, traceable 1 mile, carrying auriferous and argentiferous oxidized and sulphide ores of copper and lead, developed by a 200' shaft.

SOUTHERN ZINC & MINING CO., INC. TENNESSEE-VIRGINIA

Office: 115 Broadway, New York. **Officers:** E. L. Patton, pres.; Geo. F. Reynolds, v.-p.; J. E. Kingsland, sec.-treas., with John H. Banks, S. V. Fulkerson, Horace D. Fry, Kirby Thomas, and H. G. Peters, directors. John H. Banks, cons. engr. and metallurgist.

Inc. in Del. Cap., \$1,600,000 in \$600,000 7% cum. pfd., and \$1,000,000 common stock; shares \$10 par, full paid, non-assessable.

Property: owns mineral rights of Fall Branch and Arcadia mines, 1,125 acres; the Fall Branch property, 225 acres, is in the S.W. corner of Sullivan Co., Tenn., 7 miles S.W. of Fordtown; the Arcadia property is in Sullivan Co., Tenn., and Scott Co., Va., about 12 miles N. of the Fall Branch property.

Ore: carries zinc in Knox dolomitic limestone; said to be in the same ore-bearing zone as the Mascot and Bertha mines. Prospecting to date has shown 4 parallel veins. Development has been confined to the centrally located vein. No. 1 vein is opened by a system of open cuts and a 127' incline shaft that has exposed the ore for 300' along the strike. The greater part of this work was done under lease by the East Tennessee Min. & Dev. Co., which built a mill prematurely and exhausted its funds. Reported in July, 1915, "Not enough work has been done to block out any material quantity of ore. Therefore, it is too early to properly estimate ore in sight." A rough estimate of ore in No. 1 vein gives 188,000 tons of 4% zinc ore above the 100' level. Veins 4, 5 and 6 parallel No. 1, but have had no systematic development.

Mill: 100-ton capacity, is now equipped with "Clifford" dry process system. Company plans to remodel mill and build a 100-ton wet mill on the Scott county land. J. H. Banks states in his report: "I consider this a very promising zinc property and can unhesitatingly recommend its further development."

SOUTHWESTERN COPPER CO.

ARIZONA

See Arizona-Southwestern Copper Co.

SOUTHWESTERN LEASING & DEVELOPMENT CO.

ARIZONA

Has a lease on a part of the property of the Warrior Copper Co., which see.

SOUTHWESTERN MIAMI DEVELOPMENT CO.

ARIZONA

Office: 85 Devonshire St., Boston, Mass. **Mine office:** Globe, Ariz. **Officers:** Geo. F. Ruez, pres.; F. Ward Paine, v.-p.; Robt. H. Gross, sec.-treas., with Thos. S. Dee, D. T. Kennedy, H. B. Hovland and Geo. J. Maas, directors. F. W. Hoar, gen. mgr.

Inc. June 24, 1911, in Arizona. Cap., \$500,000, increased Feb., 1912, from \$250,000; shares \$5 par; issued 15,000 fully paid shares and 85,000 assessable shares; \$2.25 paid in. Last assessment was 25 cts., payable Jan. 12, 1914. The first annual report as of date Dec. 31, 1912, gave receipts since organization as \$276,084 and disbursements as \$197,162 of which \$65,944 was payments on options, leaving a balance of \$78,922. Shares are listed on the Boston Curb. Boston Safe Deposit & Trust Co., registrar.

Property: 17 claims, 4 patented, adjoining the Inspiration Consolidated holdings, in the Miami district, 8 miles west of Globe, shows silicified schist,

mineralized at and near the contact with granite-porphry, the orebody being an extension of the porphyry deposit opened in the Inspiration and Miami properties. Ore occurs as chalcocite disseminated in schist.

Development: by churn drilling, along the same lines followed by its big neighbors, Miami and Inspiration. Eighteen holes have been drilled, averaging about 1,200' deep and the total footage amounting to about 20,000. Ore developed in this manner was estimated by Mr. Hoar, July, 1914, at about 981,000 tons of 1.5% copper, on which a recovery of about 65% is expected and probable total ore reserves of 4,294,000 tons of 1.2% ore. Development work to prove the extension of the orebody consisted of 7,940' in holes 10 and 18 in 1913. Idle during 1915. Property considered promising and management excellent. Mr. Hoar also estimates mining costs at \$1.15, milling costs at 65 cts. per ton, and cost of smelting, etc., at about 3 cts. per lb.

SOUTHWESTERN MINES CO.

NEVADA

Office: Goldfield. Mines at Hornsilver, Esmeralda Co., Nev. **Officers:** Thos. Thorkildsen, pres.; S. H. Brady, v.-p.-gen. mgr.; C. F. Stevens, sec.-treas.

Inc. in Nev. Cap., \$1,250,000; shares \$1 par, non-assessable.

Property: 9 claims, 135 acres, at Hornsilver, 28 miles S.W. of Goldfield, formerly known as the Great Western mine. Claims said to show silver-gold ore with silver predominating in the upper levels, occurring as chlorides and bromides, the gold being free milling. The veins occur in limestone and shales intruded by diorite dikes, the largest vein said to vary from 5' to 20' in width and to traverse the property for 4,000'.

Development: 300' shaft with winze to 445' depth; stoping above the 200' level said to have yielded 6,000 tons of \$25 ore a number of years ago. Reported in June, 1915, 4,000 tons of \$10 ore remaining in stopes; 8,300 tons of \$18 ore in west ore-shoot and 7,000 tons of \$8 ore on dump.

Reported in April, 1916, that examination was being made to determine advisability of erecting a mill.

SPARTA MINING CO.

NEVADA

Mina, Mineral Co., Nev. W. E. Bell, pres. **Cap.,** \$1,000,000; shares \$1 par. Listed in Salt Lake City.

Property: 19 unpatented claims in Gold Range mining district, with about 300' of development work, said to show 3,000 tons silver-lead ore. Is a prospect.

SPEARHEAD GOLD MINING CO.

NEVADA

Goldfield, Nev. **Officers:** Geo. A. Kernick, pres.; A. A. Codd, sec.-treas., Reno, Nev.; H. F. Bruce, supt. Reorganized in April, 1916. **Cap.,** 1,500,000, increased from 1,000,000, shares, \$1 par, and put upon an assessable basis. Listed in San Francisco and Salt Lake City.

Property: 2 claims, 30 acres, at Goldfield, adjoins the Kewanas, Jumbo Extension and Merger Mines Co. on the east. Several years ago lessees sunk 4 shafts, 80' to 100' in depth; since then the property has been idle most of the time. Reorganized Booth, which see, holds apex rights covering part of the property. Work was resumed in Oct., 1915, with the idea of continuing the 250' shaft to the shale-latite contact, presumably at 950' depth. In April, 1916, shaft had reached 620' depth. Property is a prospect.

SPECIE PAYMENT GOLD MINING CO.

COLORADO

John Owen, mgr., Idaho Springs, Clear Creek Co., Colo. **Property:** shows a vein with gold-silver-copper ore, developed by a 2,800' tunnel. The vein was intersected 2,800' from the portal of the tunnel and 1,000' of drifting has been done to the west. Reported in Nov., 1915, that mine

would be reopened. **Equipment:** includes electric driven air compressor and a 20-stamp mill.

SPENCE MINERAL CO.**CALIFORNIA**

Office: 1061 Mills Bldg., San Francisco, Cal. Mine near Spenceville, Nevada Co., Cal. D. M. Kent, sec. **Property:** an old mine, operated 1875-1903, the shaft caving in the latter year. Fully described Vol. XI, Copper Handbook.

SPIRAL LEAD & ZINC CO.**MISSOURI**

Chas. Dodley, supt., Joplin, Mo. J. S. Mullen, pres., Ardmore, Okla. **Property:** the Martha Ball mine, bought for about \$30,000; a sheetground mine W. of Chitwood, S.W. of Sparkler mine and E. of La Nora B mine, with ore 195' deep.

SPOKANE ROCHER DE BOULE MNG. CO.**B. C.**

Officers: P. J. Jennings, pres., 1314 Addison St., Spokane, Wash. P. A. Brady, v.-p.; John J. Jennings, sec.-treas.

Inc. April, 1916. **Cap.**, \$100,000; shares 10c par; 600,000 shares subscribed by incorporators, balance in treasury.

Property: 7 claims, including Spokane & Washington and has bond on Daly West group near New Hazelton, B. C. Ore so far developed said to carry 7% copper, \$2 gold and 15 oz. silver per ton.

Development planned is a 1,000' drift tunnel on vein giving 1,000' back at face and cutting beneath four ore-shoots. \$30,000 to be spent in 1916 installing compressor plant, power station on Mission creek, an aerial tram and wagon road, an ambitious program for this amount of money.

SPRING GULCH MINING & MILLING CO.**COLORADO**

W. R. Benzie, sec., Majestic Bldg., Denver, Colo. **Officers:** George M. Quigley, pres.; S. H. Dunlop, v.-p.; George Lopez, treas.

Property: the Star mine and mill at Ward, Boulder Co., Colo., with a record of \$2,000,000 production. Has a 10-stamp mill expected to be in operation in Fall of 1916.

SQUARE DEAL GOLD MINING CO.**COLORADO**

Central City, Colo. **Officers:** R. J. Foster, pres., 424 Wyoming St., Scranton, Pa.; Max Frank, v.-p.; E. H. Lawall, treas., with J. K. Griffith and L. F. Hueblein, directors. Harry J. Wolf, mgr., Golden, Colo. Thos. Martin, supt. Capitalization and financial statement not reported.

Property: 3 patented claims, near Central City, said to show gold, silver, copper and lead ore in quartz vein. Vein strikes E.-W., dips 65° N. **Development:** 850' incline shaft, with 4 miles of workings. Ore reserves and production not given.

Reported in Dec., 1915, that property is tied up in a law suit, but is being operated by a lessee who places his royalties in trust pending the outcome of the suit.

STANDARD AMALGAMATED EXPLORATION CORPORATION.**CALIFORNIA**

Office: 161 Sumner St., Boston, Mass. Mine near Esmeralda, Calaveras Co., Calif. **Officers:** Frank E. Bramhall, pres.; W. F. Dwyer, v.-p.; A. F. Riedel, sec.; H. H. Brown, treas.; with Alfred Grover, E. Kessler, E. F. Curtiss, Geo. Clark and J. L. Whitten, directors. Louis Robin, mgr.; Chas. Cuneo, supt., Esmeralda, Calif.

Inc. Jan. 2, 1909, in Nevada. **Cap.**, \$1,500,000; shares, \$1 par; non-assessable; outstanding April 23, 1916, 1,264,223 shares.

Bonds: authorized and outstanding, \$40,000. Company is successor of the Standard Amal. Exploration Corp. **Cap.**, \$2,500,000, promoted by Inter-Trust Security Co., alias Victor M. Weil, who came to grief with

the U. S. Postal authorities in 1910. Weil is reported to be at present indirectly connected with the company, which is a handicap.

Property: the Economic mine, 2 patented claims, 36 acres, near Esmeralda, is said to have a steeply dipping 6' quartz vein in slate. **Development:** by a 700' tunnel, with total workings of 5,000'. Management claims ore blocked out sufficient to run the mill 4 years; assay \$18 to \$46, regarded as excessive. **Equipment:** includes a 20-stamp mill, 100-h. p. compressor and electric power.

Company reports operating expenses, 1914-1915, as \$36,573; also that 20 stamps will be added to the mill and a cyanide plant built.

STANDARD CHEMICAL CO.

COLORADO-UTAH

A subsidiary of the American Vanadium Co. Operated in 1914 and 1915 in Colorado and Utah, mining radium and vanadium-bearing ores in Paradox Valley, Colo. Company gives out no information. See U. S. Bureau of Mines Bull. No. 1:25, p. 944.

STANDARD COPPER MINES CO.

ALASKA

Controlled by Galena Bay Mining Co.

Idle. **Office:** 68 Williams St., New York. Mine office: Landlock, S. E. Alaska. **Officers:** Morris B. Mead, pres.; John L. Steele, v.-p. and engr.; E. F. Bourke, sec.; J. O. Molander, treas.; Jas. A. Bourke, gen. mgr., with Thos. R. Manley and Chas. Williams, directors.

Inc. Feb. 2, 1906, in New Jersey. **Cap.**, \$300,000; shares \$100 par; issued, \$220,000. Bonds, \$300,000 issued. Is operated as a close corporation. Annual meeting, third Saturday in December.

Property: 13 claims, at Thorn Arm, on Landlock bay, in the Prince William Sound district. The lands, which are very precipitous, show country rock of greenstone, reported to carry 17 fissure veins, of which 4, under development, carry lenticular shoots of ore estimated to average 6% copper, 1 oz. silver and 90 cts. gold per ton. **Development:** by a shaft and tunnels of 290', 175', 85' and 660', with about 1,300' of workings, estimated to show 20,000 tons of ore with 12,000 tons blocked out for stoping.

The mine is connected with 500-ton ore bunkers on a wharf at tide-water by a 3,300' aerial tram, in 2 sections, 1 of 912' and 1 of 2,526' length.

STANDARD GOLD-COPPER MINING & MILLING CO. COLORADO

Officers: F. E. Groves, v.-p.-mgr., Salida, Colo. Hon. W. P. O'Brien, pres.; George L. Ramey, sec.; J. S. Ramey, treas.; Jas. Zoeter, John Millner, Dr. S. B. McFarland, directors.

Property: 8 claims, 144 acres, in Monarch district, Pass Creek, Chaffee Co., Colo., shows fissure veins in granite porphyry that carry copper-lead ores. Values run \$4-\$16 per ton.

Development: by 900' of tunnel work with 285' back. Company has a mill with flotation equipment and is expected to operate in 1916. Examinations have been made by Clyde H. Jay and J. H. Freeman.

STANDARD SILVER LEAD MINING CO.

BRITISH COLUMBIA

Offices: Empire Bldg., Spokane, Wash., 50 Broad St., New York and Silverton, B. C. **Officers:** W. J. C. Wakefield, pres.; J. C. Meyer, v.-p.; Chas. Hussey, sec.-treas.; Geo. H. Aylard, gen. mgr., Victoria, B. C., with John F. Clark and Henry White, directors.

Inc. Dec., 1910, in Wash. Operated under present management since 1911. Controlled by the Finch-Campbell-Clark estates of Spokane. **Cap.**, \$2,000,000; shares \$1 par; full paid; non-assessable; all issued. Annual meeting, 1st Tuesday in May. J. J. Stewart & Co., 50 Broad St., New York, transfer agent. Security Transfer & Registrar Co., New York, registrar. Listed in Spokane and on New York Curb.

Operating statement for 1915 shows total income of \$799,473, of which

\$752,153 was from ore sales. Expenses totaled \$289,042; dividends, \$250,000. Transferred to surplus, \$260,430, compared with a deficit of \$169,836 for 1914 operations. Shipments were suspended from Sept., 1914, to Sept., 1915, on account of the war. In Jan., 1916, due to adverse weather conditions, operations resulted in a loss of \$26,330 and of \$13,393 in Feb. Net earnings for March were \$136,943; for April, \$86,773, and \$38,436 in May, due to a smaller production of lead and concentrates. Surplus April 1, 1916, \$284,163.

Dividends: 1912, \$425,000; 1913, \$650,000; 1914, \$475,000; 1915, monthly at rate of 2½% commenced Sept. 10, total for the year, \$250,000; 1916 to Aug. 11, \$400,000; total to Aug. 11, 1916, \$2,200,000.

Under present Canadian taxation laws the company is taxable for 25% of earnings over the 7% allowance. With reported present earnings of \$1,000,000 yearly there would be available for dividends approximately \$785,000 against present dividend requirements of \$600,000.

Property: 10 full claims, 6 fractions, 600 acres, 2 miles N.E. of Silverton, located on Slocan Lake, B. C. The claims carry fissure veins in slate and graphitic schist. Ore carries silver, lead and zinc in a quartz-pyrite gangue. Silver occurs as gray copper and ruby. The orebodies occur in the form of lenticular masses along the vein, varying in width from 1' to 25'.

Development: tunnels numbered from 1 to 7, inclusive, develop the vein to a depth of 800'; tunnel No. 8, now being driven, gives an additional 400' depth. Work in 1915 amounted to 5,749', compared with 9,059' in 1914. Total work to April 1, 1916, aggregated 20,000' of drifts on the vein, raises and crosscuts. **Ore reserves:** not reported, but management claims that reserves guarantee many years of profitable operations.

Equipment: 150-ton concentrator, hydro-electric power plant on Four Mile Creek and an 8,000' tramway connecting mine and mill.

Production:	Ore, Tons	Silver, Oz.	Lead, Lbs.	Zinc, Lbs.
1915 (b).....	39,447
1914 (a).....	49,720 (b)	1,050,000	10,000,000	5,000,000
1913.....	13,959	1,081,849	17,988,805
1912.....	9,702	811,823	13,497,260

(a) Approximate production. (b) Gross; tons milled, 44,806 in 1914; 35,920 in 1915.

In 1915 shipments totaled 12,762 tons, which included 3,557 tons crude lead ore averaging 54.7% lead and 93.4 oz. silver per ton; 4,804 tons lead concentrates averaging 59.8% lead and 98 oz. silver per ton; 4,401 tons zinc concentrates averaging 42.5% zinc and 23 oz. silver per ton.

Total cost per ton, exclusive of development, was \$4.33 per ton; development charges were \$1.10 per ton ore mined.

The vein contains ores which are readily concentrated and which constitute the bulk of the mine's output. There is, however, a large amount of material in the vein in which ruby silver and zincblende occur as streaks and coatings and in which galena is found in a very finely divided state in graphitic schist and slate. Such ores cannot be treated successfully by ordinary concentration. An experimental flotation plant installed in 1914 was unsuccessful, as the graphite floated off with the metallic particles. In 1916 the plant was rebuilt, using Wyman pneumatic flotation machines, which have given a total recovery of 93-95% of the values in the mill feed. The ore as sent to the mill averages 24% lead, 35 oz. silver and 14% zinc.

STANDARD TUNGSTEN CO.

CALIFORNIA

L. Porter, gen. mgr., Tungsten City, via Bishop, Inyo Co., Calif. A. J. Clark, pres.; J. L. Curtis and S. L. Carpenter, directors, Inc. in Nevada. Filed in Calif., Aug. 3, 1910. **Cap., \$200,000; shares \$1 par.**

Property: a group of claims at head of Deep Canyon, 7 miles west of Bishop, shows large bold croppings of scheelite-bearing garnet rock, close to granite contact. Part of company's holdings were sold 1915 to the Tungsten Mines Co. **Development:** by tunnels and an open quarry. Ore is quarried and will be carried to the mill over a 1,600' incline surface tramway. Company operates 100-ton mill, enlarged July, 1910, from 50 to 100 tons daily capacity. It has Dodge crusher, Davis rolls and Isbell tables. **Production:** 200 tons concentrates to July 15, 1916.

STANLEY MINES CO.**COLORADO**

Office: 1023 First National Bank Bldg., Denver, Colo. Mine office: Idaho Springs, Clear Creek Co., Colo. **Officers:** J. J. Fisher, v. p.; J. W. T. Gray, sec.; J. P. H. Cunningham, treas.; H. J. Wolf, mgr.; preceding officers are directors.

Inc. 1904 as successor of the Consolidated Stanley Mining & Milling Co. **Cap.**, \$750,000; shares \$5 par; 128,025 shares issued. Annual meeting in June.

Property: 89 claims showing gold and silver-bearing lead and copper ores. **Development:** by 641' main shaft and 3,300' adit. Has steam and water power. The reduction plant has 10 stamps. Property inactive in 1915. Development work necessary.

STANLEY MINING CO.**IDAHO**

Burke, Idaho. **Cap.**, \$1,500,000; shares \$1 par; treasury, 200,000 shares. Listed in Spokane. Controlled by Day family, principal owners of Hercules Mining Co.

Property: 12 patented claims, west of Benton and N. E. of Humming Bird, in George Gulch, N. of Burke, said to show antimony ore. Authentic information is scarce. The Humming Bird crosscut tunnel, run by the Hercules, passes through Stanley ground. Was developing in 1915. Shipments are said to have been made a number of years ago.

STAR ANTIMONY CO.**IDAHO**

Kellogg, Idaho. Burke McIntosh, mgr. **Inc.** March, 1916, in Idaho. **Cap.**, \$10,000; shares 1 ct. par. Has bond and lease on the Brown and Finnell old antimony claims, in the Pine Creek district, near Wallace. Ore carries antimony sulphide with quartz, occurring in a 5' vein. **Development:** by tunnels. Reported in Feb., 1916, that first shipment, 30 tons of 50% antimony ore, had been made.

STAR LAKE GOLD MINES, LTD.**CANADA**

Office: 449 Main St., Winnipeg, Manitoba, Can. Mine in Twp. 9, Ranges 16-17 E., 7 miles S. W. of Ingolf on the C. P. R. R. Provisional directors: W. R. Milton, J. W. Harris, John Smith, E. R. Potter and J. H. Hicks. G. J. Lovell and J. H. Hicks, fiscal agents.

Inc. Nov., 1915, to purchase the property of the Penniac Gold Reef Mines, Ltd. Terms of purchase were as follows: owners agreed to take 333,333 shares of stock and to set aside 33,333 shares for development purposes. Stockholders in the Penniac Mines to receive 200,000 shares and to pay to the Star Lake \$25,000 to liquidate liabilities of old company, amounting to \$15,000, and leave a surplus for development work. Star Lake Co. agreed to have \$100,000 in treasury within 6 months from Nov., 1915, otherwise vendors could cancel agreement. 125,000 shares offered to public at \$1 par.

Property: 3 full and 3 fractional claims, 210 acres, on Star Lake, eastern Manitoba. **Ore:** occurs in quartz vein, in a shear zone of Keewatin conglomerate near a contact between granite and schist. Vein minerals include quartz, gold-bearing pyrite and arsenopyrite. Samples cut for 10 to 15' across the vein carry \$3.50 to \$5.80 per ton. The Penniac company

is reported to have spent \$100,000 on development work, consisting solely of test pits and a 90' shaft, said to disclose two lodes. The main shear zone is said to be 200' wide, with two main and several lesser parallel quartz veins with strike N. 35-45° E. and dip N. W., all showing gold values in payable quantities. Property reported on by Prof. R. C. Wallace, University of Manitoba, and W. H. Jeffrey.

Equipment: includes a mill, office and several buildings. Management plans extensive development and equipping property with compressor and cyanide plant.

Is a new Curb promotion in Boston. Apparently a fair gamble.

STAR MINING & MILLING CO.

BRITISH COLUMBIA

See Slocan Star Mines, Ltd.

STARLESS MINE.

UTAH

Office: care Col. Enos A. Wall, owner, Salt Lake City, Utah. Mine office: Bingham Canyon, Utah.

Property: 8 claims, patented, 160 acres, lying N. E. of the holdings of the Utah Copper Co., is developed by an incline shaft and numerous tunnels, longest 2,000', with crosscuts and upraises, aggregating 10,000'. Development said to block out 800,000 tons of 1 to 2% copper ore. Equipment includes a hoist.

The 125-ton mill, enlarged and remodeled 1910, at a cost of \$50,000, is equipped throughout with machinery of Col. Wall's own design, comprising Wall corrugated rolls, Wall steel rolls for middlings, 3 sets of jigs, 2 tables for concentrates, 2 Wilfley tables, and washers, of trough form, with valves and sprayers, concentrates being discharged through the bottom and sands from the top. Reported in Sept., 1915, that operations would be resumed in 1916.

STECKNER GOLD MINING CO.

IDAHO

Care D. B. Cornell, sec.-treas., Great Barrington, Mass. Henry Tator, pres.; F. H. Cornell, v. p. Inc. Feb. 17, 1914, in Arizona. **Cap.**, \$2,000,000.

Property: the Gold Dollar group, 10 lode and 5 placer claims, near Orogrande, Idaho Co., Idaho, shows fissure veins in granite. The veins are 2'-4' thick and carry gold ore, shown by systematic sampling to carry \$3 to \$13 per ton.

Development: by 3,000' of work, all tunnels, 1,000' depth.

STEEPLE ROCK DEVELOPMENT CO.

NEW MEXICO

Steeple Rock, N. Mex. **Property:** the Carlisle and Jim Crow groups, 33 claims, was sold to George H. Utter, in 1914, who sold it 1915 to H. K. Welch and S. McKeever, of New York.

Mine shows big fissure vein, 20'-40' wide, developed to depth of 637'. Ore carries chalcopryrite, sphalerite and some galena. A \$150,000 Huff electrostatic plant is planned. Operating 1916.

STEIFER MINING CO., P. B.

CALIFORNIA

Coutolenc, Butte Co., Calif. P. B. Steifer, pres. Inc. Dec. 6, 1901, in Calif. Is a gold mine. Company was sued by Henry T. James and W. C. Pershbaker, alleging illegal issuance of stock, issuance of notes, and that company is a stock selling proposition.

STEPTOE VALLEY SMELTING & MINING CO.

NEVADA

Company dissolved 1914. Property owned and operated by Nevada Cons. Copper Co., which see.

STERLING COPPER CO.

ARIZONA

Address: care Judson A. Elliott, Phoenix, Ariz. Mine office: Dos Cabezas, Ariz. **Officers:** J. W. Thomas, pres.; L. C. Elliott, sec.; D. E. Nelson, treas.; with E. A. Congdon and J. A. Elliott, directors. C. H. Bean, supt.

Inc. 1906 in Arizona. **Cap.**, \$1,000,000; shares \$1 par; nonassessable; issued, 482,600 shares.

Property: in the vicinity of Dos Cabezos, Cochise Co., Ariz., is developed by short tunnels and a shaft 125' deep, following a limestone porphyry contact, showing copper and lead ore which is said to average 5% copper. There has been about 1,000' of work done and \$3,000 spent in 1914-15 on development. Company plans driving a 4,000' tunnel. Property is a prospect.

STEVENS COPPER MINING CO.

ARIZONA

Office: No. 1 Broadway, New York. Mine office: Clifton, Greenlee Co., Ariz. **Officers:** Fred Enos, pres.; W. Rowland Cox, v. p.; Geo. H. Kent, sec.-treas.; D. D. Irwin, resident mgr.

Property: 39 claims, all patented, 780 acres, about 2 miles from Metcalf, Ariz., shows granite overlaid by Cambrian quartzite and Silurian limestone, with much faulting and intrusive porphyritic dikes, with orebodies near the fault lines. Some of the claims have been leased during the past two years and have produced copper ore, which was shipped to the Shannon smelter. Property being worked by lessees at present.

STEWART MINING CO.

IDAHO

Office: 61 Broadway, New York. Mine office: Kellogg, Idaho. **Officers:** H. C. Todd, pres.-treas.; C. W. Saacke, v. p.; C. T. Lark, sec.; J. L. Williams, asst. treas.; Wm. A. Beaudry, gen. mgr.; with Judge Nash Rockwood, directors.

Inc. Aug. 29, 1902, in Idaho. **Cap.**, \$1,250,000; shares \$1 par, increased July, 1916, to \$3,000,000; shares \$1 par; 1,238,362 outstanding. No bonded indebtedness. J. L. Williams, New York, transfer agent; Metropolitan Trust Co., New York, registrar. Annual meeting in August. Listed on New York Curb.

Balance sheet of June 30, 1915, shows: total assets, \$2,218,602, which includes plant and equipment, \$1,520,209; ore and concentrates, \$107,940; acct's receivable, \$17,380; demand loans secured by collateral, \$130,457; cash, \$318,916. Current liabilities: \$74,129.

Profit for fiscal year 1915 was \$654,694, almost \$200,000 less than dividend requirements. Earnings in 1914 were \$854,436. Company controls the Coeur d'Alene Development Co. through ownership of 562,498 shares out of 1,000,000 shares.

Dividends: paid at the rate of 10c quarterly from 1913 to Dec., 1915, with extra dividends amounting to 32½c in 1913; 62½c in 1914; 70c in 1915. Rate was reduced to 5c quarterly in 1916.

Property: the Stewart mine at Kellogg, 8 claims, partly patented, 150 acres, 2,000' along the outcrop of the contact, carries silver-lead ore averaging \$6.06 per ton. Country rock is soft Burke quartzite. Output during 1914 and 1915 averaged 500 tons daily, but has been reduced to 125 tons in 1916. The mine is practically worked out, and as extensive development work in 1915 failed to locate any new orebodies, management is considering the purchase of new properties at Lone Mountain and Tuscarora, Nevada, and development of the Coeur d'Alene Development Co. property, which adjoins the Stewart.

Mill: the Stewart mill at Wallace, 12 miles from the mine, has a daily capacity of 500 tons. **Equipment:** includes crusher, 4 sets of rolls, 2 Huntingtons, 12 Wilfley tables, 18 Frue vanners, 36 Harz jigs, 4 Deister slimers. A flotation unit was added in 1914. General Naval Stores flotation oil is used. Concentration ratio is 6 into 1, the product averaging 50% lead and 50 oz. silver per ton.

Production and Costs in 1915:

Tons extracted	189,615,148
Gross yield	\$ 2,140,363
Cost of extraction.....	612,796.01
Cost of transp. mine to mill.....	29,392.65
Cost of smelting.....	563,833.65
Cost of reduction.....	76,592.50
Cost of repairs.....	3,317.03

Management has been searching for new properties for some time, and various mines have been investigated and considered, including the Old Sport Group of the Quatsino Copper Co., comprising 26 patented claims, 2,000 acres, Vancouver, B. C., on which \$100,000 was spent before the option was relinquished.

Litigation with the Ontario Mining Co. was decided adversely, April, 1915, and the Ontario company granted \$48,000 for ore illegally extracted.

Notwithstanding the spectacular career of the Stewart Company under the Heinze regime, the mine made good, paying \$1,000,000 a year dividends for two years. It has a substantial surplus in the treasury, \$906,110 June 30, 1916, so that the present management is in position to develop new properties to replace the dwindling production of the Stewart proper.

Coeur d'Alene Development Co.

Property: 10 patented claims, developed to 400' level and equipped with a mill. Ten years ago a rich orebody produced about \$150,000 worth of ore, but property was abandoned when this vein was worked out. Extensive development work under way.

In 1916 company acquired the Lone Mountain mine, near Elko, Nevada, paying 1,000,000 shares of stock, exchanged at parity for those of the Lone Mountain Company. Property is a new mine of excellent promise, having a large vein of silver lead ore.

STOCKTON STANDARD MINING CO.**UTAH**

W. N. Gundy, sec., Stockton, Utah. **Officers:** A. P. Davidson, pres.; D. J. Lemmon, v. p.; H. Roy Allen and Hon. A. C. Smoot, directors.

Property: 8 claims, 5 patented, showing a 5' vein of silver-lead ore in a 70' shaft. **Development:** 200' shaft with levels and drifts being driven to cut the vein.

STODDARD MILLING CO.**ARIZONA**

Stoddard, Yavapai Co., Ariz. Is controlled through ownership of 51% of capital stock by Stoddard Mines Co., the Copper Queen Gold Mining Co. owning the remaining 49%. **Officers:** W. H. Reynolds, pres.; Louis Goldman, v. p.; C. M. Stoddard, treas-mgr.

Company is constructing a 125-ton flotation plant, designed by H. Kenyon Burch, to treat Stoddard Mines Co. and Copper Queen Gold Mng. Co. ore.

STODDARD MINES CO.**ARIZONA**

Office: 225 Fifth Ave., New York. Mine office: Stoddard, Yavapai Co., Ariz. **Officers:** W. H. Reynolds, pres.; C. M. Stoddard, v. p.; John H. Whyte, sec.

Inc. Jan., 1906, in Arizona, as successor of Stoddard Copper Co. Cap., \$500,000; shares, \$5 par; fully issued. Annual meeting, in January. Owns 51% of stock of Stoddard Milling Co., which see.

Property: 6 claims, patented, 105 acres, known as the Binghamton mine, some distance from a railway, shows fissure veins in schist, carrying gold, silver, copper. **Development:** by 1,000' tunnel and shafts of 500' and 190', with about 4,000' of workings. Mine was discovered 1882, and reopened June, 1906, by present company.

Equipment: includes double-drum electric hoist, a 10-drill compressor and pumps. Management estimated 200,000 tons of 4% copper ore. June, 1916. Ore will be treated at the new mill of the Stoddard Milling Co.

STOWELL MINE.**CALIFORNIA**

Owned by Mammoth C. Mining Co. and described thereunder.

STRATTON COPPER CO.**ARIZONA**

Address: P. O. Box 1116, Tucson, Ariz. **Officers:** Chas. N. Wilson, pres. and mgr.; A. W. Conduit, v. p.; with H. A. Walker, W. F. Milholland and C. P. Lesh, directors; W. H. Kershner, sec.-treas.; W. H. Scheerer, supt.

Inc. June, 1915, in Arizona. **Cap.,** \$2,500,000; shares \$1 par; outstanding, \$700,000. Annual meeting in June.

Property: 12 claims and 3 mill sites, 255 acres, in the Catalina Mts., Pima Co., said to show a contact deposit of copper ore in limestone, assaying 7% copper and 10 oz. silver. **Development:** surficial only, by shallow shafts and short tunnels. Claims 1,000 tons ore blocked out.

Equipment: includes gasoline hoists and air compressor. Steam power used. Property is a prospect.

STRATTON CRIPPLE CREEK MNG. & DEV. CO.**COLORADO**

(Stratton Estate.) **Property:** the American Eagle, Abe Lincoln and other mines on Bull Hill and Globe Hill at Cripple Creek, with the typical veins of the district. Company is operating the American Eagle mine and has 30 sets of lessees at work on other properties, total production being 2,000 tons of ore a month.

Matoa Gold Mng. Co. is a subsidiary, and there are a half dozen or more incorporated leasing companies working on Stratton ground.

STRATTON'S INDEPENDENCE, LTD.**COLORADO**

Secretary and offices: H. P. Smith, 3 Lothbury, London, E. C., Eng. **Directors:** C. F. Rowsell, Ch., F. W. Baker and F. S. E. Drury. Philip Argall & Sons, Denver, cons. engrs.

Inc. Sept. 8, 1908, as a reorganization of a company of same name, inc. April 29, 1899. **Cap.,** £62,500 in 1,000,000 shares of 1s 3d each, all issued; was originally £125,000. Under reorganization plan stockholders were offered one share credited as 1s 6d paid for every old fully-paid £1 share held. On sale of the property it was decided to reduce the capital to present amount, by canceling 9d per share and returning to stockholders 6d per share, thus reducing the shares to 1s 3d each. Plan was approved by the Court, Dec. 14, 1915, and warrants were posted for the return of capital, Jan. 7, 1916.

Dividends: by present company, 1908-9, 5%; 1909-10, 15%; 1910-11, 10%; 1911-12, 20%; 1912-13, 20%; 1913-14, 5%; 1914-15, 13 $\frac{1}{2}$ %, paid January 31, 1916.

Company formerly operated the Independence Gold mine and mill at Cripple Creek, Colo., sold, June, 1915, to the Portland Gold Mining Co. for £68,027. Out of the cash received stockholders had returned to them 6d per share, the balance being retained with a view to acquiring a new property. Up to date of sale mine produced ore with a gross value of \$23,621,728, yielding \$8,116,778 in earnings. Present company paid \$455,625 in dividends and had \$510,000 cash on hand after selling the property for \$372,000. Company has closed its business at Cripple Creek and is looking for a new property.

STRONG GOLD MINING CO.**COLORADO**

Victor, Colo. Is a close corporation, owned in Colorado Springs.

Property: the Jolly Tar claim, 7 $\frac{1}{2}$ acres near Victor, in the Cripple Creek camp, shows a cluster of veins in granite, carrying large shoots of

ore. The yield of gold per acre is said to be the richest of any mine in the camp.

Development: by 1,350' shaft with extensive levels and drifts. Has 20-drill compressor.

STURDY GOLD MINING CO.

ARIZONA

Montgomery, Maricopa Co., Ariz. **Officers:** John Sturdy, pres.; F. H. Lerch, v. p.; N. Sturdy, sec.-treas. and mgr., Montgomery; with Wm. H. Sturdy and Albert Martin, directors.

Inc. June 16, 1915, in Arizona. **Cap.**, \$750,000; shares \$1 par; outstanding, \$500,000. Annual meeting, second Thursday in January.

Property: 4 claims, 65 acres, in the Winifred mining district, formerly owned by Fortuna Gold & Copper Co., described in Copper Handbook, Vol. XI. Was acquired by present management at sheriff's sale. Claims are said to show six parallel quartz veins in granite, averaging 4' in width and carrying gold and silver ore. **Development:** 125' vertical shaft, with 1,000' of workings. Claims to have 6,000 tons ore blocked out, average grade \$10 per ton.

Equipment: includes a 6-h. p. Fairbanks-Morse gasoline hoist. New management raised \$7,900 to build a small mill and develop. At last accounts, shaft was being sunk to 600' level.

SUCCESS MINING CO.

IDAHO

Office: Wallace, Idaho. **Officers:** P. J. Gearon, pres. and gen. mgr.; Jas. Gearon, v. p. and supt.; L. C. Wilson, sec.-treas.; with E. H. Becker and C. M. Carroll, directors. **Cap.**, \$1,500,000, all outstanding; shares \$1 par. Stock listed in Spokane and Butte; traded in on New York curb.

Balance sheet: Dec. 31, 1915, showed: assets, \$1,791,435, which included: property, \$1,503,763; cash, \$246,103; ore in transit, \$27,408; other current assets, \$14,160. Liabilities included: surplus, \$251,110; current, \$40,324.

Profit and loss statement: total income, 1915, \$1,225,802; operating expenses, \$356,866; net profits for year, \$898,936; deduct dividends Nos. 24-36, inclusive, \$555,000, and deficit, Dec. 31, 1914; surplus Dec. 31, 1915, \$251,110.

For quarter ending March 31, 1916, company earned \$137,994 net from a total income of \$248,568. Dividends absorbed \$135,000. Cash in banks, March 31, 1916, reported as \$259,480. April earnings reported as about \$90,000.

Dividends: suspended April 20, 1913, totaled \$345,000 to that date; resumed April 30, 1915, and \$550,000 paid in 1915; \$345,000 to July 26, 1916. Present rate is 3 cts. per month with extra payments of 2 cts. quarterly.

Property: is one of the oldest located properties in the Wallace district; first operated by the Granite Mining Co., taken over in 1905 by H. F. Samuels, who organized the Success Mining Co., continued under his management until 1915, when control passed to "practical" mining men and brokers, and large blocks of stock, aggregating over 1,000,000 shares, were worked out through the New York, Duluth, Spokane and Butte exchanges.

The company has had considerable publicity during the past year, due to stock manipulation, said to be aided by the management, and to friction between the management and several publications on mining news. This has been aggravated by the seeming aversion of the directors to take stockholders into their confidence, especially in connection with the new smelter contract with the Grasselli Chemical Co., effective May 1, 1916. The distrust of the management culminated, April, 1916, in the Success officials being summoned to court to show why stockholders should not know the terms of contract.

Litigation with the adjoining Alameda company, which claimed pay-

ment for ore said to have been extracted from its ground by Success; was decided in favor of Alameda Co., but the Success Co. has appealed.

Property: 8 claims on Nine Mile Creek, 2 miles N. W. of Wallace.

Ore: zinc with lead-silver content. According to U. S. G. S. Prof. Paper, No. 62, there is no vein, the ore occurring in masses of irregular form and size, which are chiefly replacements of quartzite in places where it has been most thoroughly fissured. The ore is strictly confined to the sedimentary rock; surrounding country rock is monzonite.

Development: by tunnels to 700' level, and by shaft from 700' to 1,300' level, the latter recently opened. New York in 1915, 1,575', included 200' of shaft sinking. Considerable time and trouble were required to locate the ore on the 1,200' level.

Ore reserves: under date of Jan. 24, 1916, the president reported "tonnage now in sight is better than at any time during the past year, and is estimated sufficient to run the mill at the present rate for about 18 months." Grade of ore not given. Examination made in March, 1916, said to show 21,500 tons ore, blocked out above the 1,200' level, and in addition 87,200 tons of probable ore, no grade given.

Equipment: includes a 250-ton mill. Flotation is used.

Production: in 1915, 21,867 tons concentrates, dry weight, with a gross value of \$1,255,801; cost of extraction, transportation and reduction, \$356,865. Actual tonnage of ore produced not reported.

The nature of the ore occurrence almost necessitates having but small reserves. Present conditions indicate the possibility of opening up new ore at depth. In June, 1916, it was reported that the orebody had been cut on the 1,300' level, and also that a new orebody had been found on the 700' level.

The reticence of the management regarding operations and costs, its connection with the stock promotion, and the many conflicting reports issued, are all poor policy and have tended toward giving a feeling of uncertainty to stockholders and the investing public. If the management is sincere, a little frankness would do no harm.

SULLIVAN COPPER DEVELOPMENT CO.

ARIZONA

Office: care P. H. Nelson, pres., 610 Lonsdale Bldg., Duluth, Minn. **Mine office:** Paradise, Cochise Co., Ariz. Geo. H. Crosby, sec.-treas.

Property: 14 claims, 6 patented, 4 miles west of San Simon, Chiricahua Mts., has opencuts, showing leached copper ore and a little very rich ore, and has a 60' tunnel showing lead ore. Management considered good and property promising. Idle, except for annual assessment work.

SULLIVAN ZINC MINING CO.

MISSOURI

Inc. by Harry Kingsbury, Allen Dorsey and R. D. Talmadge, Jan., 1916, to take over a 20-acre lease at Joplin, Mo., on sheet lead ground. The workings are 180-205' deep. Company has a new 150-ton mill.

SULPHUR MINING & RAILROAD CO.

VIRGINIA

Office: 11 S. 12th St., Richmond, Va. P. H. Haskell, supt., Mineral, Louisa Co., Va. **Property:** a pyrite mine whose ore carries low copper values. Has 600' shaft with steam power, compressor, etc. Ore handled in 500-ton concentration mill. Company makes cement copper from its mine and seepage waters, but is primarily a producer of pyrite for sulphuric acid plants. Is controlled by Virginia-Carolina Chemical Co.

SULTANA-ARIZONA COPPER CO.

ARIZONA

See Kelvin-Sultana Copper Co.

SULTANA MINE.

NEVADA

Under lease and bond to Henry Robbins, Good Springs, Nev. Mine contains a 10' vein of silver-lead-zinc ore, which is smelted in a 40-ton

concentrating mill, making 12 tons of zinc concentrate per day. Forty men are employed.

SUMMIT GOLD MINING CO.**MONTANA**

Office: 520 Lyceum Bldg., Duluth, Minn. **Mine office:** Radersburg, Broadwater Co., Mont. **Officers:** W. A. Eaton, pres.; T. M. B. Hicks, v. p.; A. O. Rabideau, sec.; G. L. Maycroft, treas.

Inc. Jan. 22, 1912, in Minn. **Cap.**, \$400,000; shares \$1 par; nonassessable; issued, \$298,000. Annual meeting, third Tuesday in January. Company is virtually successor of Summit Copper Co., shares of which were convertible into stock of this company at the ratio of 2½ old shares for 1 new share.

The company, inactive at present, had a bond and lease on 8 partly developed claims, 4 miles S. W. of Radersburg, described in Vol. XI, Copper Handbook. Reports in 1916 state that management is in quest of a gold property.

SUMPTER SMELTER.**OREGON**

See Northwest Smelting & Refining Co., Sumpter, Baker Co., Ore.

SUN DIAL GOLD MINING CO.**ARIZONA**

A. F. Carper, supt., Oatman, Ariz. Is one of the big crop of wildcats that have been born at Oatman since the strike in the United Eastern.

SUN TUNGSTEN CO.**COLORADO**

Address: J. N. Caldwell, sec., 325 Foster Bldg., Denver, Colo. **Officers:** A. E. Blakesley, pres., Denver Cons. Stock Ex.; Valdo F. Wilson, v. p.; Paul Hardy, directors; Mr. Von Kueren, supt., Boulder, Colo. **Cap.**, \$3,000,000; \$1 par; 2,800,000 in treasury.

Property: 2 claims, the Lucille group of tungsten mines, Sunshine district, near Boulder, Colo., held under bond and lease, and similar lease on O. D. mine at Cripple Creek.

Development: at Boulder, an old tunnel reopened 1916, said to show a 6' vein. Stock offered at 5c a share, March, 1916. Is a G. R. Q. proposition.

SUNNYSIDE GOLD MINES CO.**COLORADO**

Wm. L. Terry, supt., Eureka, San Juan Co., Colo. **Property:** shows a deposit of complex silver-lead-copper-zinc ore, developed by 400' shaft and 200' tunnel. **Equipment:** includes electric power, air compressor, a 150-ton concentrator with 40 stamps, tube mills, flotation unit and a Huff electrostatic zinc separating plant.

SUNNYSIDE MINING CO.**ARIZONA**

Oatman, Mohave Co., Ariz. **Officers:** P. Mullen, pres.; M. Sullivan, v. p.; J. F. Flannagan, treas.; C. W. Herndon, sec.; with A. H. Woollacott, directors.

Inc. in Ariz. **Cap.**, \$1,000,000; shares, \$1 par; treasury, 550,000 shares. Listed in Los Angeles.

Property: Sunnyside group of 3 claims, 2 miles S. E. of Oatman, said to have a vein with assay values from \$2 to \$8 gold per ton. In April, 1916, a shaft was being sunk from 120' depth. Property is in the development stage.

SUNSET COPPER CO.**NEW MEXICO**

L. M. Stiles, pres. and mgr., Box 393, El Paso, Tex.; W. P. Stiles, v. p.; S. F. Johnson, sec.; L. B. Wilcox, treas.

Property: includes the old King mine, 7 miles N. W. of Hachita, developed by 400' shaft with workings on a vein said to show gold-silver-copper ores. Is a prospect.

SUNSET MINING & DEVELOPMENT CO.**NEVADA**

Office: 265 Russ Bldg., San Francisco, Calif. **Mine office:** Rhyolite,

Nye Co., Nev. **Officers:** Edw. S. Van Dyck, pres.-treas.; O. A. Newcomer, v. p.; Chas. D. Olney, sec.

Inc. Dec. 9, 1912, in Nevada as a reorganization of the Tramps Consolidated Mining Co., Bullfrog Sunset Mining Co. and Denver Bullfrog Annex Mining Co. **Cap.**, \$5,000,000; shares \$1 par; issued, \$1,750,000. Listed on New York Curb as a prospect. Security Transfer & Registrar Co., New York, transfer agent and registrar. Balance sheet Oct. 1, 1915, shows cash \$18,000.

Property: 20 acres, patented, in the Bullfrog district, said to show ore occurring in fissure veins in rhyolite, with dip of 30°. Veins vary from 6' to 20' in width. **Development:** by 5,000' of tunnels; total underground work about 18,000'.

Equipment: includes an electric hoist, 6-drill compressor and a 100-ton cyanide plant, making an extraction of 93% on a consumption of 0.6 lb. of cyanide per ton of ore treated. Company claims to have treated 12,000 tons in 1915, averaging \$4.40 per ton. Mine barely paid expenses the first year, but having now doubled the milling equipment it should show better results. Total cost for mining and milling in 1915 on a 50-ton per day basis was \$3.74.

SUPERIOR BONANZA MINING CO.

MEXICO

Controlled through stock ownership of 60,000 shares by Greene Cananea Copper Co. **Office:** Cheyenne, Wyo. Head office: Cananea, Sonora, Mex. **Officers:** George Kingdon, pres.; John Cuddihy, v. p.; C. Sites, v. p.-sec.; J. V. Montague, treas.-asst. sec.; J. F. Carmichael, asst. treas.; with A. E. Peterman, A. S. Cox, A. C. Cole and W. L. Thomas, directors

Inc. in Wyoming, Aug. 31, 1907. **Cap.**, \$1,250,000; shares \$10 par; 74,923 issued. Owns the entire capital stock of Bonanza Mining Co., S. A.

SUPERIOR & BOSTON COPPER CO.

ARIZONA

Office: Houghton, Mich. Mine office: Globe, Gila Co., Ariz. **Officers:** Wm. G. Rice, pres.; John H. Rice, v. p.; John R. Pimlott, sec.-treas.; preceding, with Hon. Norman W. Haire, Jas. W. Harrington and Geo. Kingdon, directors; A. L. Graham, supt.

Inc. Nov. 23, 1906, in Arizona. **Cap.**, \$6,500,000; was originally \$1,500,000, increased Sept. 5, 1908, to \$2,000,000; April 22, 1909, to \$2,500,000; July 25, 1911, to \$3,000,000; Sept. 30, 1911, to present amount; shares \$10 par; \$7 paid in; issued, 283,827. Company has levied 7 assessments, last one of \$1 Feb. 7, 1916. Listed on Boston Stock Exchange. State Street Trust Co., Boston, registrar; Boston Safe Deposit & Trust Co., transfer agent. Annual meeting, first Monday in December.

Comparative Financial Statement: fiscal year ending Sept. 30—

	Ore Sales	Calls & Sundries	Balance Oct. 1	Balance Prev. Total	Total	Total Balance
					Expend.	Oct. 1
1915.....	\$ 54,530 (a)	\$ 19,108	\$59,285	\$132,923	\$103,394	\$29,529
1914.....	291,515	1,720	75,268	368,503	309,218	59,285
1913.....	153,436	268,503	81,382	503,321	428,052	75,269

(a) Lessees produced \$42,164 additional.

Property: 51 claims, 785 acres, 28 claims, 388 acres, patented. The Globe & Arizona tract of 22 claims was bought for \$320,000, an adjoining group of 21 claims was bought for \$46,000, and the Collins-Doyle group of 5 claims was bought for \$150,416.35, giving a total cost of \$516,416.35 for lands. The Collins-Doyle group, added 1909, adjoins the former holdings on the north, carrying the extension of the Old Dominion fault, and being well located with respect to the Great Eastern vein. The property is a compact tract next east of the Arizona Commercial, and east of the Old Dominion. Lands are about 4,200' above sea level, and about 800' above

Pinal creek, at Globe. The property carries both limestone and iron ore for fluxes. It is reached by the Arizona Commercial and Arizona Eastern railways, both connecting with the main line at Globe.

Geology: the property shows diabase cutting through about 600' of quartzite with interbedded shale and Globe limestone. Copper ore occurs in veins filling fault fissures. There are 2 dominant fault-belts, one series including from north to south, the Old Dominion, Great Eastern or Black Hawk, Limestone, Quo Vadis, Black Oxide and Iron King fault veins, intersected at nearly right angles, by other faults of later age, apparently but slightly mineralized. Three of the veins named show ore in commercial quantities. Later development may show the Quo Vadis to be the faulted continuation of the Great Eastern; there is a possibility that both are merely the eastern extension of the Old Dominion vein. The average strike of the faults is N. 70° E., with average dip of 60° N. The oxidized zone is deep, ore opened on the 8th level including cuprite, native copper, as well as chalcocite. Malachite is found in the workings above.

Development: by 4 shafts, the McGaw, Great Eastern, Limestone and Gardner, and 1 tunnel. Underground workings total about 30,000'. New work during year ending Sept. 30, 1915, amounted to 2,094'. The Great Eastern 444' vertical shaft being poorly located, was replaced by the McGaw shaft, to the north.

The McGaw shaft is 1,185' deep, with 3 compartments. The 10th level opened at 970' corresponds with the 10th level of the Arizona Commercial mine, next west. This shaft lies 900' north of the old shaft and is sunk between the Old Dominion fault on the north and the Great Eastern vein on the south, and is planned to intersect the Great Eastern vein at depth. This is the main working shaft of the mine and does the ore hoisting for the entire property.

The Great Eastern vein on the 6th level in the McGaw shaft, showed an ore-shoot 10 to 30' wide, proven for a distance of over 800'. The 8th level exposed this vein for over 400' and also showed the zone of oxidation to continue to this depth. The 10th level discloses the first sulphide ore encountered in the McGaw workings of the mine, but the 12th level shows little or no copper in this vein, as far as developed. The vein matter is heavily stained with iron, highly silicious and, when commercial, carries about 7% copper.

The Old Dominion vein is tapped by crosscuts from the McGaw shaft, on the 4th, 6th and 10th levels, where it shows only oxidized material, quite thoroughly leached, carrying slight silver values, but with promise of copper ore at greater depth.

The 318' Limestone shaft showed a 4' footwall paystreak of commercial ore on the 300' level; has not been operated for several years.

The Gardner 3-compartment vertical shaft at the southern end of the property, on the Black Oxide vein, is 435' deep; mine is now idle. The Black Oxide vein apparently is a continuation of the Buckeye fault, on which the Old Dominion has opened mines on the Buckeye, Carrie and True Blue claims.

The 1,054' Black Oxide tunnel has its portal about 1,000' S. W. of the Limestone shaft, and cut the Black Oxide vein at 670', giving a 400' back drifts on this level showing a vein carrying micaceous hematite, with small quantities of copper, and a little shoot of smelting ore. Indications are favorable to the existence of good bodies of high-grade sulphide ore at greater depth. The Black Oxide is 280' east of the True Blue mine of the Old Dominion, from which lessees shipped small quantities of high-grade ore for several years.

The Iron King vein, parallel with the other 4 faults of the property,

shows a good gossan, and has an old 70' shaft, in leached vein material similar to that in the other faults, at similar depth.

Equipment: includes hoists at each shaft, aggregating 1,260-h. p. The main plant, at the McGaw shaft, has four 250-h. p. Stirling water-tube boilers, a 5-ton hoist good for 1,600', and a 1,200-cu. ft. Nordberg cross-compound air compressor, with an auxiliary compressor at another shaft. The mine has two 1,000-gal. Prescott pumps.

The company owns 38 buildings, including machine shop, smithy, carpenter shop, office and warehouse, with a number of dwellings for employees. The shops are well equipped and the smithy has a Word drill sharpener. The changing house at the McGaw shaft has steam-heated lockers, shower baths and drying racks. Buildings are lighted by electricity. Fuel is mainly petroleum, with 5,000-gal. and 12,000-gal. storage tanks.

Production: was begun Feb., 1908, and to end of 1910 amounted to 27,126 tons ore, yielding 3,846,402 lbs. copper and 94,698 oz. silver, all from the Great Eastern vein above the 6th level with the exception of about 681 tons extracted by lessees from the Black Oxide workings. Known ore reserves being exhausted, production was suspended Aug., 1910, to March, 1913, when shipments were again resumed, curtailed in 1914 and resumed March 15, 1915.

Development work will be resumed below the 12th level, with funds provided by the last assessment. After awaiting developments at the Arizona Commercial property below its 1,200' level, which have proved satisfactory, Superior & Boston can now enter upon this new work with considerable encouragement. The management hopes to open up reserves of sulphide ore, which, if done, should make the company a steady and profitable producer.

SUPERIOR COPPER CO.

MICHIGAN

Controlled through ownership of 50,100 shares, bought 1906, by the Calumet & Hecla Mining Co.

Office: 12 Ashburton Place, Boston, Mass. Operating office: Calumet, Mich. Mine address: Houghton, Mich. Rodolphe L. Agassiz, pres.; J. F. Perkins, sec.-treas.; A. J. Garceau, asst. treas. and asst. sec.; G. G. Endicott, aud.; Jas. MacNaughton, v. p. and gen. mgr.; R. E. Agassiz, Chas. F. Ayer, Benj. Joy, Jas. MacNaughton and Francis L. Higginson, directors; Ocha Potter, supt.

Inc. July 23, 1904, in Michigan. **Cap.,** \$2,500,000; shares \$25 par; fully issued and \$1 paid.

Report for 1915 showed a net profit from mining operations of \$245,017, and balance of assets of \$216,274. In 1915 the company acquired 18,836 shares of the Lake Milling, Sm. & Ref. Co.'s stock for \$240,000. Shares are listed on the Boston Stock Exchange. Old Colony Trust Co., Boston, registrar; American Trust Co., Boston, transfer agent. Annual meeting, second Tuesday in April.

Property: 400 acres, carries about 6,000' of the strike of the Baltic amygdaloidal bed, between the Isle Royale and Atlantic mines. It embraces Sec. 15, of T. 54 N., and R. 34 W. The tract has room for 3 or 4 shafts, and has a light overburden, the bed being proven by trenches at intervals of 1,000', showing an amygdaloid of 35 to 40' average width, with extensive carbonate stains, due to weathering, and a little fine copper near surface. The property has been trenched to the eastern sandstone.

The mine has 2 workable copper lodes, the Baltic, locally known as the Superior, and the West lode, discovered in 1911, a formation independent of the Superior, 14 to 30' thick, which, however, cannot be stopped until the Superior lode is mined.

Development: by 2 shafts, sunk in the footwall of the lode, insuring solid ground, but necessitating crosscuts at each level. Owing to the great width of the copper-bearing stratum, it is necessary to crosscut along the bed at 100' intervals. The Superior mine is opened on the northern extension of the Baltic amygdaloidal bed, though some call this the Superior lode, not being satisfied that the correlation is correct. The Baltic bed, in the Superior mine, carries copper impregnations in the footwall, always an evidence of strong mineralization, and there is a conglomerate bed under the foot that carries a small amount of copper. The stamp rock is remarkably deceptive in appearance, as the copper oxidizes readily, and when it has been broken a few weeks, appears lean, unless a fresh fracture shows its true nature. As a triangular tract of land intervening between shafts Nos. 1 and 2 is owned by others, they cannot be connected above the 12th level. The mine had about 9 miles of workings at the end of 1915. Underground work for 1915 totaled 4,199', compared with 2,654' in 1914, and 5,835' in 1913.

No. 1 shaft, about 1,200' south of the northern boundary of the property, is 2,469' deep and develops the Superior and West lodes, the first opened on all levels, and the second lode from the 12th to 26th inclusive. Both lodes carry copper in exceptional quantity. Improved values have been encountered with depth, and the workings of No. 1 shaft give a good showing. The ground, especially in the upper levels, is very treacherous, and requires careful attention and close timbering.

No. 1 shaft has a frame shaft rock house, of the Calumet & Hecla type, equipped with Westinghouse engine and two 23x36" crushers. The hoist is good for 4,000'.

The equipment at No. 1 shaft includes a combination boiler and engine house, with 90" Belpaire boilers, a hoist, and 10-drill and 18-drill air compressors. No. 1 shaft is connected with the main line of the Atlantic railway by a 7,000' spur, and also with the Isle Royale railway.

No. 2 shaft, 2,540' S. W. of No. 1, and 2,400' from the southern boundary, sunk 40' in the footwall, at an angle of 53°, is 1,628' deep. Equipment at No. 2 includes a steam hoist, formerly used at No. 1, and a shaft rock house having 2 crushers and a Westinghouse engine, with rated capacity of 1,000 tons daily.

Buildings include an office, warehouse, smithy, change house, and a number of dwellings for employees at a small town site lying between the shafts.

Production: (begun Jan., 1909)

	Tons R'k Stpd.	Lbs. Cu. p. Ton	Cost p. T. (b)	Lbs. Cu. Prod.	Cost per Lb.	Rec'd per Lb.
1915.....	212,051	18.23	\$1.88	3,866,484	12.29c	18.125c
1914.....	191,628	16.79	1.75	3,217,635	12.43c	12.645c
1913.....	130,826	22.87 (a)	2.36	2,992,765	12.86c	15.387c
1912.....	172,322	22.76 (a)	2.33	3,921,974	12.75c	16.45c
1911.....	162,599	19.90	2.39	3,236,233	15.31c	12.70c
1910.....	140,514	22.64	2.69	3,181,041	14.29c	12.63c
1908-09....	16,835	22.22	374,077

(a) An excellent return, and materially above the average secured from the good amygdaloidal mines of the Lake Superior district. (b) The high cost of mining is largely accounted for by the comparative newness of the mine; costs include mining, transportation, stamping and taxes.

Production was lessened in 1913 and 1914 by the strike of the Western Federation of Miners, lasting from July 23, 1913, to April 12, 1914, and from Sept. 1, 1914, to Feb. 1, 1915, the mine operated on a three-quarter time basis

on account of the condition of the copper market following the outbreak of the European war. Superior has thus far been a disappointment; the copper yield per ton rock is lower than originally calculated, and production remains below the 4,000,000-lb. mark. It cannot reasonably be expected to do much better.

SUPERIOR COPPER CO., LTD.

ONTARIO

Idle. Office: Sault Ste. Marie, Ont. Mine office: Superior Mine, via Algoma Central Railway, Algoma, Ont. Officers: G. R. Nicholson, pres.; C. H. L. Jones, v. p.; Emory W. Clark, sec. and treas.; with E. L. Fisher, Capt. John Mitchell, Geo. T. Arnold, J. W. Staley, Geo. Kemp and Capt. Benj. Boutell, directors.

Inc. Sept. 13, 1901, in Ontario. Cap., \$3,000,000; originally \$1,500,000; increased 1903, to \$2,000,000, and again July 29, 1907; shares \$10 par; issued, \$2,402,160. The company was organized with nonassessable stock, but a special act of the provincial parliament of Ontario rendered the stock assessable. Total assessments to Dec. 31, 1910, were \$132,080.52. Security Trust Co., Detroit, registrar and transfer agent. Annual meeting, second Thursday in June.

Property: 11 claims, crown granted, 800 acres, in an unorganized mining district of Algoma, shows granite and chloritic schist carrying fissure veins of 10' and 70' estimated average widths, traceable 7,000'. The quartz veins carry chalcopyrite with a little chalcocite, estimated by the management to average 4% copper, 1 oz. silver and 40 cts. gold per ton. **Development:** amounting to 1,233' includes a 400' shaft and 949' tunnel with 5 shallow shafts, a 189' tunnel and many surface cuts.

Mine is reported to show 4,000' tons of ore on the dump, with 140,000 blocked out, apparently a serious over-estimate.

Equipment: includes a 150-h. p. steam plant, 12-drill compressor engine house, changing house, boarding house, machine shop, smithy, office, store and dwellings, and a 50-ton concentrator.

The mine has been idle since Dec., 1908.

SUPERIOR & GLOBE COPPER CO.

ARIZONA

Idle for several years. Office: 3 Calumet State Bank, Calumet, Mich. Officers: John Daniell, pres.; Fred Smith, v. p.; Chas. Chynoweth, sec.; Joseph W. Selden, treas., and Hon. Norman W. Haire, directors.

Inc. Dec., 1908, in Arizona. Cap., \$3,000,000; shares \$10 par; issued, \$2,450,000, in 15,000 shares of full paid stock and 230,000 shares of stock \$1 paid. Property is fully paid for; lands were bought for \$75,000 cash and 15,000 shares of full paid stock. First National Bank, Calumet, registrar. Annual meeting, third Monday in November.

Property: 13 claims, 250 acres, include the Magnet group of 12 claims, adjoining the Mineral Farm group of the Globe Mining Co., and 1 fractional claim, of several acres. The property, 2 miles N. E. of Globe, is in the eastern portion of the Globe district, lying N. of the Arizona & Michigan and N. E. of and adjoining the Globe Mining Co. and the Yuma mine of the Old Dominion, latter carrying the Yuma-Big Johnnie-O'Dougherty fault. The outcrop of the Yuma fault, on the Superior & Globe lands, shows an iron gossan carrying copper stains for about 3,000'.

Development: by several old shafts of 50 to 60' depth, said to have been sunk for gold ore. Present owner has sunk a 680' vertical shaft in the hanging of the Yuma fault, on Copper Trust No. 2 claim, about $\frac{3}{4}$ mile from the Superior and Boston mine. The shaft cuts a 5' vein carrying iron with copper stains and has about 1,100' of workings on the 650' level, the N. crosscut 522' long showing 2 veins. The Yuma vein, cut at 235' from the shaft, has 320' of drifting, with an 85' winze and a 17' crosscut

to the vein from the bottom of the winze. The vein shows merely iron and manganese, with copper stains and small silver contents. In the N. crosscut, 487' from the shaft, a second vein was cut showing a width of 20' and a 38' drift thereon showed material similar to that in the other vein, neither carrying commercial values. The S. crosscut on the 650' level was driven 233' in hard diabase, developing nothing of value.

Diamond drilling was begun in June, 1910, a 350' horizontal and a 957' vertical hole being bored from the bottom of the shaft. This work was continued until early 1912, but developed nothing of importance.

Equipment: includes a 100-h. p. gasoline plant having a 60-h. p. Fairbanks-Morse hoist good for 1,000' and a 3-drill gasoline air compressor. There are 5 buildings, including carpenter shop, engine house, office and dwelling.

SUPERIOR & PITTSBURGH COPPER CO.

ARIZONA

Sold Dec. 31, 1915, to Calumet & Arizona Mining Co., which see.

SUPERSTITION CONSOLIDATED MINING CO.

ARIZONA

General office: 44 Broad St., New York. **Mine office:** Phoenix, Ariz.

Officers: J. P. Bickell, pres.; Louis Ford, v. p.; A. W. Scott, sec., treas.-mgr.

Inc. Jan. 7, 1915, in Ariz. Cap., \$2,000,000; shares \$1 par; outstanding \$500,000. Security Transfer & Registrar Co., New York, transfer office and registrar. Listed on New York Curb as a prospect. Liabilities in Feb., 1915, a 2-year 6% note of \$10,000, dated Jan. 20, 1915.

Property: 7 claims, Arizona King group and 2 adjoining claims in the Pioneer mining district, Pinal Co., 60 miles E. of Phoenix and 7 miles from a railroad. Said to show schist and intrusive porphyry with a vein outcropping for 3,000', from 5 to 40' in width; strike N. W., dip 65° E. The ore is gold claimed to assay from \$3 to \$48 per ton, with very little copper present.

Development: a 400' shaft with several hundred feet of workings. Ore reserves not given. A 50-ton flotation mill was built in 1915; no returns available.

SURF INLET GOLD MINES

BRITISH COLUMBIA

Surf Inlet, Princess Royal Island, B. C. F. W. Holler, supt. Controlled by Tonopah Belmont Mining Co. and operated by Belmont Canadian Mines, Ltd., which see.

SURPRISE MINE

BRITISH COLUMBIA

Owned by Wm. Kent, 1410 Borland Bldg., Chicago, Ill. H. L. Hollis, mgr., 1025 Peoples Gas Bldg., Chicago; J. P. McFadden, supt., Sandon, B. C.

Property: 3 crown granted claims, 93 acres, 2 miles N. E. of Sandon, in Slocan mining district, said to show silver, lead and zinc ore in a fissure vein in slate with N. E. strike and dip of 65°. Crude lead ore averages 148 oz. silver per ton, 65% lead, and 7% zinc. Mill feed averages 28 oz. silver per ton, 9% lead, and 16% zinc. Ore reserves not estimated.

Development: by tunnels; main tunnel 3,000' long is 1,000' below outcrop; underground workings total 12,000'. **Equipment:** includes an aerial tram.

Shipments: in 1915 totaled 2,550 tons lead concentrate, 2,740 tons zinc concentrate and 375 tons crude lead ore.

SUSQUEHANNA MINING CO.

NEW MEXICO

Address: C. J. Plankenhorn, sec., Williamsport, Pa. Company succeeded North American Copper Co., described in Copper Handbook, Vol. XI. In 1915, part of the property was worked by lessees. In 1916, B. W. Randall operated the Nellie Bly mine under lease and bond.

Property: near Lordsburg, 14 claims, unpatented, in the Pyramid and Virginia districts, including the Nellie Bly and Cobre Negra groups. Claims show andesite, diorite and trachite, having 8 orebodies, reported as fissures running parallel with porphyry dikes.

Development: the Nellie Bly mine, in the Pyramid district, 8 miles S. W. of Lordsburg, has shafts of 450', 125', 65', 33' and 40', with about 6,000' of workings. The 400' level shows a vein of 12' estimated width, with bornite-chalcopryrite ore, said to average 5.8% copper and 5.5 oz. silver per ton.

The Cobre Negra mine, in the Virginia district, 6 miles S. W. of Lordsburg, is reported to carry melaconite, malachite, azurite and chalcopryrite, and is developed by shafts of 332', 180', 60', 85' and 85'. Idle since 1906.

Equipment; includes a 40-h. p. hoist, good for 600', at the Nellie Bly mine, and several mine buildings and 4 dwellings. There is said to be a 50-ton concentrator, but this is not in commission.

Production: 1916, about 6 cars a month, of ore averaging 4.5% copper, and 4 oz. silver per ton, with 50% to 60% silica, 5% to 6% iron, and 8% to 10% lime.

SUTTER CREEK MINING CO.

CALIFORNIA

Alex Rennie, supt., Sutter Creek, Amador Co., Calif. Cap., \$300,000.

Property: the East Eureka mine, also called the Rose, or Poundstone, a mile east of Sutter Creek. Shaft was reopened 1916 and 10-stamp mill repaired.

SUTTON CONSOLIDATED MINING CO.

NEW MEXICO

Former properties at Lordsburg, N. M., sold and company out of business. See Vol. XI, Copper Handbook.

SWANSEA CONS. GOLD & COPPER MINING CO.

ARIZONA

Bankrupt. O. M. Souden, trustee, c/o U. S. Nat'l Bank, Los Angeles, Calif. Property at Swansea, Yuma Co., Ariz., leased to Judge W. J. Thomas of Los Angeles, early in 1915; operated, 1916, by the Thomas Estate.

Property: reported as 132 claims, 3,300 acres, about 10 miles from Planet, includes the Signal mine, erroneously called the Clara, and the Moro and Clara groups.

Geology: the Signal orebody is a replacement deposit formed in a limestone bed 15 to 100' thick, associated with overlying shales and amphibolitic schist and resting on granite gneiss, all of pre-Cambrian age. The outcrop is an irregular replacement, 30' wide, of copper-stained hematite, dipping at 52° N. This orebody extends 150' downward in the mine, is 20 to 30' wide, 90' long and contains boulders of unreplaced limestone. The orebody is encased in soft chloritic schist derived from amphibolite and appears to rest on a strong fault plane that separates the granitic gneiss from the sedimentary series. Two parallel, smaller, but similar orebodies occur in the hanging wall of the deposit. The ore consists of soft, red hematite with manganese-oxide and chlorite, holding grains and nodules of chalcopryrite and pyrite. The ore as a whole averages perhaps 2.5% copper, though 4% ore is obtained for smelting by rough sorting. See U. S. G. S. Bull. 451, pp. 59-67.

Development: by 2 main shafts with extensive underground workings along the main fault or lode, and by stopes on 3 orebodies. The mine has 4 vertical and 2 inclined shafts. No. 1 shaft, 400' deep, vertical, has a 15-h. p. Fairbanks & Morse gasoline hoist, raising ore with a bucket. No. 2 shaft, 325' deep, is an incline, and has a 50-h. p. Western gasoline hoist, operating a 2-ton skip. No. 3 shaft, also inclined, is 200' deep. No. 4

shaft, the largest and deepest, 3 compartments, is 500' deep, with a hoist. No. 5 shaft, 373' deep, has a 75-h. p. steam hoist, and No. 6 shaft, 250' deep, has a 25-h. p. steam hoist. Some drilling done 1908, with a Keystone churn drill, showed another orebody.

Equipment: the power plant has two 250-h. p. boilers, a 300-k. w. d. c. Westinghouse motor, and a 150-k. w. belt-driven Ideal motor, latter operating pumps at the Bill Williams Fork river, supplying water to the mine and works through 3" and 6" pipe lines. Buildings include a machine shop, sawmill and other structures.

The smelter has a Mitchell water-jacket blast furnace of 750 tons rated daily capacity. A reverberatory furnace was partly completed when the mine closed down in 1913.

The power house has a 15,000 cu. ft. Nordberg air compressor, and a Connersville blower direct-connected to a Hamilton Corliss compound engine. Slags are handled by a Jeffrey electric locomotive. The smelter building is of structural steel. The converter department has 2 stands and 9 shells, rotated electrically, with a 40-ton electric crane, having 2 auxiliary hoists, and a silica mill, with electric motor, for linings.

The mines and works are connected with the Santa Fé, Prescott & Phoenix railway by a 21-mile line, known as the Arizona & Swansea railroad, operated, but not owned by the company. The property is an example of enthusiasm run wild, coupled with reckless stock selling and the foolish construction of surface works before the development of enough ore to keep them busy.

Lessees are reported to have made shipments regularly during 1915 and in 1916 to date. Profits for March said to be \$22,000, with daily shipments of 3 cars of 4% ore during April. The ore is shipped to Arizona Smelting Co., at Humboldt, Ariz. Twenty men employed.

SWANSEA CONSOLIDATED MINING CO.

UTAH

Office: Knight Bldg., Provo, Utah. **Officers:** Jesse Knight, pres.; R. E. Allen, sec.-treas. **Inc.** in Utah. **Cap.**, \$100,000; shares 10 cts. par; 999,798 outstanding; assessable. Listed in Salt Lake City.

Owens 145 acres in Tintic Mining district, said to show silver-lead ore.

SWANSEA EXTENSION MINING CO.

UTAH

Officers: Arthur L. Thomas, pres.; Heber M. Wells, sec. and treas. **Inc.** June 12, 1908. **Cap.**, \$100,000; issued \$2,245; shares 10 cts. par. Listed in Salt Lake City.

Owens 3 claims in Tintic mining district. No information available.

SWARTHMORE CONSOLIDATED MINING CO.

COLORADO

Idle. Mine near Cardinal, Boulder Co., Colo. **Officers:** Chas. B. Galbreath, pres.; Harvey Hanes, v. p.; J. E. Carpenter, sec.; Paul Barriclow, treas.

Inc. July, 1907, in Colorado, as a merger of the Swarthmore Copper Co. and Enterprise Mining Co. **Cap.**, \$3,500,000; shares \$1 par.

Property: 17 claims, 11 patented, 60 acres, about 2 miles west of Cardinal and the D. B. & W. R. R., in the Grand Island mining district of Boulder county. Property includes the Golden Fleece mine, having fissure veins in pre-Cambrian gneiss cut by dikes. The vein thus far developed said to average 8' wide and to carry a paystreak of 3 to 5% copper ore with occasional telluride of gold. **Development:** by 5 shafts, deepest 403', and by tunnels of 800', 1,000' and 2,000'.

Equipment: includes 2 small steam plants, one having a 60-h. p. hoist and a 12-drill air compressor. There is a small concentrator with a 50-ton chlorination plant, and 4 new mine buildings.

SWASTIKA DEVELOPMENT CO.

CALIFORNIA

F. W. Woods, mgr., 1832 E. 16th St., Los Angeles, Calif. Property

leased during 1915 to F. W. Giroux, Prescott, Ariz. Mine is a small producer of silver-lead ore, but is now operated for copper.

SWASTIKA MINING CO.**MONTANA**

Philipsburg, Granite Co., Mont. W. W. Williams, mgr. **Officers:** W. I. Power, pres.; F. R. Andrus, v. p.; C. E. Hansen, sec.; W. W. Kroger, treas.; the officers are the directors.

Inc. April, 1913, in Montana. **Cap.**, \$500,000; shares \$1 par; 407,043 outstanding.

Property: 3 claims, 1 patented, known as the old Basin mine, and held under long term option, shows a 4' vein of argentiferous copper ore, oxidized to carbonates near the surface, exposed for 100' on the 150' level. **Development:** consists of a 190' shaft, and 200' of drifts. Ore averages 4% in copper, 1½ oz. silver, 50 cts. gold per ton.

Equipment: includes electric hoist good for 500', compressor and Cameron pump.

Mine was closed down in 1914, but efforts being made in 1916 to increase capitalization and resume operations.

SYLVANITE GOLD MINES, LTD.**ONTARIO**

Subsidiary of Kirkland Lake Proprietary. Chas. A. O'Connell, mgr., Kirkland Lake, Ont. **Inc.** June, 1913, in Ont. **Cap.**, \$2,000,000. Owns the Wright and Robbins claims adjoining the Tough-Oaks gold mine, Kirkland Lake. Work to date has been chiefly surface exploration.

SYNCLINE GOLD-SILVER-COPPER MINING CO.**NEVADA**

Lida, Esmeralda Co., Nev. **Officers:** L. Kershaw, Tacoma, Wash., pres.; H. C. Peet, v. p.; L. E. Campbell, sec.-treas.-gen. mgr.; with F. A. Campbell, B. A. Howes, E. P. O'Leary, E. B. Campbell, E. C. Peet, directors.

Inc. June 4, 1910, in Nevada, as successor of Washington-Nevada Mining & Milling Co. **Cap.**, \$1,000,000; shares \$1 par; nonassessable; issued \$799,420. Annual meeting, first Monday in January.

Property: 11 claims, 3 patented, 57 acres, with 120 acres mill and smelter sites, 30 miles S. W. of Goldfield and 10 miles from a railway, in the Lida district. District shows Cambrian limestone and shale, cut by quartz monzonite, capped by volcanic rocks. The ores occur as impregnations and veins. The claims are reported by the management to carry 12 deposits, 4 under development of 4 to 20' average width, traceable 5,000', carrying a sulphide ore, said to give assays of 8.7% copper, 17 to 19% lead, 11% zinc, 11 oz. silver and \$1.90 gold per ton. **Development:** by 9 shafts, of 31 to 120' depth, and by 6 tunnels, of 12 to 140' length; the tunnels are not being used. Owing to lack of rail transportation and complex nature of the ore, company is devoting attention mainly to the development of lead carbonate ores.

Equipment: includes a 15-h. p. gasoline hoist and 5 mine buildings. The management plans deepening the main shaft to 200'.

SYNDICATE MINING CO.**UTAH**

Santaquin, Utah Co., Utah. B. H. Bullock, pres.-mgr.; Nora A. Bullock, sec.-treas. **Inc.** Jan. 7, 1911, in Utah. **Cap.**, 1,250,000 shares; 2 cts. par. Listed in Salt Lake City.

Property: 10 unpatented claims, near Santaquin, said to show a 20' vein containing ore with gold, silver and copper values. The vein fissures are in limestone and orebodies are expected at vein intersections. Development by 725' tunnel. Property is a prospect, in which ore in commercial amount has not yet been found, though surface croppings are very promising.

TABLE MOUNTAIN COPPER CO.**ARIZONA**

Was controlled by Arimex Consolidated Copper Co., now defunct; a Thos. W. Lawson promotion. Fully described Vol. XI, Copper Handbook.

TACOMA SMELTING CO.**WASHINGTON**

Office: 165 Broadway, New York. **Works office:** Tacoma, Pierce Co., Wash. **Officers:** G. H. Brownell, pres.; Edw. Brush, v. p.; F. W. Clark, treas.; L. D. Craig, sec.; H. Y. Walker, gen. mgr., and L. C. Beyer, directors. R. F. McElvenny, supt.; T. R. Wilkinson, refinery supt.; Roger Taylor, asst. supt.

Inc. in Nevada. Cap., \$500,000; shares \$1 par. Is a subsidiary of the American Smelters Securities Co.

Property: a smelting plant with a 52-acre site, 6 miles from Tacoma, on Puget Sound, whose tidal flats are being reclaimed by filling in with slag. Property is well located for receipt and dispatch of materials, and has extensive wharves, with ore bunkers and automatic devices for unloading cargoes, connected with all departments of the works by an electric tram line.

The smelter, originally of 300 tons capacity, built for lead ores only, has been increased to 1,650 tons daily capacity, and now treats lead matte, copper, lead, silver and gold ores and concentrates, from the entire western coast of North America, and a considerable tonnage of South American ores.

Equipment: includes three 60-ton mechanical roasters and two 10-ton hand-roasters. There are 6 blast furnaces, including four 100-ton stacks for lead ores, and a 400-ton water-jacket blast furnace for copper. A 36" cupola resmelting furnace, with outside settler, can treat 75 tons of 50% matte daily. There is a circular slag-casting machine, having 144 tilting molds. The reverberatory furnaces are of 350 tons daily capacity. The 1,000' dust flues of the blast and reverberatory furnaces lead to a 306' stack of reinforced concrete.

The converter department, equipped with a 30-ton electric traveling crane, has 2 stands and six 72x100" shells, of barrel type.

The electrolytic plant, increased from 35 to 50 tons daily capacity, has a 20-ton electric traveling crane for handling anodes and cathodes.

Electric power is received at 40,000 volts and stepped down to 100 volts for use, the works requiring about 2,000 h. p. There are 3 Connorsville blowers, driven by a 200-h. p. Westinghouse induction motor, furnishing blast for the lead furnaces. Fuel is petroleum, brought in tank steamers from the oil fields of southern California.

The Tacoma smelter is one of the most important custom plants on the Pacific coast, the management is progressive, and the metallurgical practice excellent.

TACOMA STEEL CO.**BRITISH COLUMBIA & WASHINGTON**

Office: Provident Bldg., Tacoma, Wash. **Mine offices:** Van Anda Island, B. C., and Darrington, Snohomish Co., Wash. **Officers:** Joshua Pierce, pres.; E. M. Shelton, v. p.; A. Y. Eastman, sec.-treas. and gen. mgr.; Alex Grant, supt.

Inc. with cap. \$5,000,000, reduced later to \$3,000,000. Paid a \$35,000 dividend April 2, 1907.

Property: a mine at Darrington carrying gold-copper ore, idle for some years, 4,000 acres of lands carrying coke and coal in Washington, 208 acres of iron ore lands on Redonda Island, B. C., and the Marble Bay mine, 640 acres, crown-granted, near Marble Bay harbor, at the northern end of Texada Island.

The Marble Bay mine, about one-fourth mile from the Cornell and

Copper Queen mines, has ore of similar nature occurring as lenticular shoots, carrying argentiferous chalcopyrite, with bornite, in a garnetiferous marble near a contact between diorite and limestone. The mine is developed by a 1,350' three-compartment shaft, showing, on the lower levels, a vein of 18' width, with copper values unchanged and gold values gaining with depth. Recent development work mainly between the 1,200' and 1,300' levels.

Equipment: includes steam and electric power, with 5 Lidgerwood hoists, 5-drill Ingersoll-Rand, small Canadian-Rand and 10-drill Allis-Chalmers-Bullock air compressors. Buildings include a power house, machine shop and there is a wharf, on Marble Bay, having large ore bunkers, connected with the mine by a ground tram. In connection with the mine there is a limestone quarry and 4 kilns, with daily capacity of 300 bbls. of lime.

Production: shipped mainly to the Tacoma smelter, was 6,237 tons of ore, yielding 293,269 lbs. fine copper in 1907; 11,438 tons of ore, estimated to have yielded 1,250,000 lbs. fine copper, in 1909; 22,500 tons averaging 5% copper in 1911; 17,870 tons in 1912; 12,600 tons in 1913, containing 2,216 oz. gold; 22,400 oz. silver; 1,031,009 lbs. copper.

Mine considered valuable and management good.

TAHOE COPPER MINE

CALIFORNIA

Title to property is held through the Sacramento Valley Copper Co., which see.

TAJO; MINAS DEL

MEXICO

George Kislingsbury, supt., Rosario, Sinaloa, Mex. Owned by the Bradbury Estate, Bradbury Bldg., Los Angeles, Calif. Is one of the great gold-silver mines of Mexico, showing a big fissure vein in andesite, developed to 1,000' in depth. Working \$8 ore from old fills and pillars, above 600' level, 1916. Has a very complete equipment with 1,000-k. w. gas producer-electric plant.

The mill is handling about 250 tons per day, 1916.

TAKILMA SMELTING CO.

OREGON

Office: P. O. Box 64, Colorado Springs, Colo. **Works office:** Takilma, Josephine Co., Ore. Chas. L. Tutt, pres.; Wm. T. Tutt, v. p.; J. A. Hull, sec.-treas.; Roy H. Clarke, mgr.

Inc. in Colorado. Cap., \$250,000; shares \$10 par. Owns a controlling interest in the Waldo Smelting & Mining Co.

Management reports gross earnings of \$55,000 in 1914-15, with operating expenses of \$7,500.

Property: 175 acres, and a 160-acre smelter site, total holdings 335 acres 320 patented, in the Waldo district, including the Queen of Bronze mine, showing diorite and serpentine, carrying several veins, with N.-S. strike, of which 3 are more or less developed.

The Queen of Bronze mine carries lenticular orebodies in diorite and serpentine occurring along vein fractures. The ore contains bornite and chalcopyrite, and the ore shipped in 1915 is reported to have averaged 10% copper with \$5.15 in gold. **Development:** includes a 150' shaft and tunnels of 1100', 300' and 400' length, with 20,000 feet of workings.

Smelter: at Takilma, has a 125-ton water-jacket blast furnace, making matte, when in blast averaging 45% copper, 2.5 oz. silver and \$2.50 gold per ton, which is shipped to the Tacoma smelter for conversion. Owing to heavy rains in fall and winter, causing impassable roads, the smelter can be worked only in summer. The nearest rail point is Grant's Pass, 42 miles distant. Equipment includes a sawmill.

Production: 7,543 tons of ore smelted yielding 1,563 tons of matte of

about 45% copper tenor, indicating an average return of 8% copper from ore smelted, with production of about 1,350,000 lbs. fine copper in 1905, and 499,662 lbs. fine copper in 1907; the works have been idle since Jan., 1908. Early in 1915 the Queen of Bronze mine was leased and about 15 tons of ore daily are shipped to Tacoma Smelting Co. Smelter returns for 1,542 tons said to be \$53,104. Ore is hauled 27 miles by auto truck to Waters Creek.

TAMARACK & CUSTER CONSOLIDATED MINING CO. IDAHO

Wallace, Idaho. **Officers:** J. J. Day, pres., gen. mgr. and treas.; E. R. Day, v. p.; H. L. Day, sec.; R. M. Walker, E. H. Knight, F. M. Rothrock, E. Boyce, directors.

Inc. in Nevada, 1913. **Cap.**, \$2,000,000; \$1 par; unissued \$223,500.

Financial statement for 1915 shows: 26,146 tons shipping ore of gross value, \$1,238,754; mining cost, \$449,041; treatment and transportation, \$439,156; improvements, \$3,760; net profits, \$346,796; profits for 1914, \$187,063. First dividend of 2 cts. per share was paid May, 1916.

Property: about 40 claims and fractions, acquired from the old Tamarack & Chesapeake and Custer companies, on Nine Mile Creek, Coeur d'Alene district, Shoshone Co., Idaho. The Hercules mine nearby is controlled by the same interests.

Ore: contains silver and lead values, part direct smelting and part concentrating. In 1915, shipments of lead ores and concentrates amounted to 1,700 tons monthly. Mill recovery is reported to be about 83% without flotation. The management is considering the erection of a new 600-ton mill to cost about \$150,000.

The company with the Hercules interests built and is operating the new lead smelter at Northport, which is to be enlarged to handle custom products. The management has been criticised for its policy of secrecy. Direct information is not available but it is said that the gross ore reserves are about \$9,000,000. One ore-shoot on the Leonard tunnel level is reported to have been proved for 1,500' with ore on both faces.

TAMARACK MINING CO.

MICHIGAN

Office: 12 Ashburton Place, Boston, Mass. Mine office: Calumet, Mich. Works office: Hubbell, Houghton Co., Mich. **Officers:** E. V. R. Thayer, pres.; Jas. MacNaughton, gen. mgr.; other directors, R. S. Bradley, F. L. Whitcomb, Geo. S. Mumford, E. B. Dane, W. D. Calverley, and E. C. Lewis; Geo. A. Flagg, sec.-treas.; Clarence H. Bissell, asst. sec.-treas.; John T. Been, supt.; Chas. D. Hohl, chief engr.; John T. Reeder, gen. clerk and purch. agt.; A. Lincoln Burgan, mill supt.; E. J. Waters, chief mng. capt.; John Rowe and Wm. Rosevear, mng. capt.

Inc. 1882, in Michigan. **Cap.**, \$1,500,000; shares \$25 par. State Street Trust Co., Boston, registrar; Old Colony Trust Co., Boston, transfer agt. Annual meeting, 1st Wednesday in April. **Dividends:** begun 1888, were 43 in number, aggregating \$9,420,000 to end of 1915, last dividend having been \$4, July 23, 1907.

The company sold its Cliff lands, 1910, for \$680,000 to the Cliff Mining Co., using the proceeds to liquidate the floating debt, interest on which was equivalent to 85 cts. per share, 1909.

Balance sheet of Dec. 31, 1915, gave assets, exclusive of mining equipment, of \$1,589,111 with liabilities of \$384,130, leaving a balance of assets of \$1,204,981. Operations 1907-11 have given net annual losses, amounting to \$249,277 in 1907; \$172,246 in 1910; \$193,198 in 1911, resulted in a profit of \$271,625 in 1912, a loss of \$49,923 in 1913, and of \$174,945 in 1914; a profit of \$308,987 or \$1.31 per share in 1915.

Was controlled, through ownership of 19,400 shares of outstanding

stock, by Calumet & Hecla Mining Co. In April, 1916, stockholders of the Tamarack Mining Co. voted to accept the offer made by Calumet & Hecla, of \$3,563,486, or \$59.39 per share, for all the property and assets, except the Mineral Range R. R., of the company. Transfer was to have been made between June and July 1, but suit was filed early in June by G. M. Hymans to restrain the sale. He charges Calumet & Hecla is acting as both vendor and purchaser which renders the sale void, also that the price offered "is grossly inadequate." To date no settlement has been made and it seems certain the sale will not materialize.

Property: 1,120 acres, in Secs. 10, 11, 14 and 15, T. 56 N., R. 33 W., with a mill site on Torch Lake, miscellaneous timber lands and other realty giving total of 8,746 acres, from which the Cliff mine was sold, 1910.

The Tamarack mine proper is a tract of very irregular outline, bounded on all sides by lands of the Calumet & Hecla, and opened on the underlays of the Calumet conglomerate and Osceola amygdaloidal beds. The mine was planned by Capt. John Daniell, who conceived the idea of opening the underlay of the conglomerate by a deep vertical shaft. The actual work of sinking No. 1 shaft began 1882, and the conglomerate was cut $3\frac{1}{2}$ years later, in 1885, at a depth only 10' greater than the estimate of Capt. Daniell made before the work was started.

Development: Tamarack No. 1 shaft, 3,409' deep, cuts the Calumet conglomerate at 2,270' beneath the surface and the Osceola amygdaloid about 1,000' deeper. This shaft is used exclusively for hoisting water, raising approximately 11,500,000 gals. per month, all the water of the mine being diverted to this shaft, since at greater depth the amount of seepage is trivial. There are 2 Nordberg direct-connected duplex pumps on the 6th and 9th levels, each lifting 600 gals. per minute from the 9th level. Equipment at No. 1 includes a powerful hoist.

The Tamarack No. 2 shaft, N. E. of No. 1, is 4,355' deep. The conglomerate ground tributary to No. 2 shaft has been worked out, down to and including the 26th level, leaving the 27th to 30th levels, inclusive, still to be stoped. The pressure on the conglomerate is very great, requiring the installation of timber pillars in order to keep the drifts open.

The mine has 5 shafts, 2 at the South Tamarack, two at the North Tamarack, with No. 5 shaft about midway between. The 16th level of No. 3 and the 38th in No. 5 are the same depth and are connected. The shafts are all connected for ventilation.

New openings have been 6,221' in 1907, 5,501' in 1910, 8,912' in 1911, 2,646' in 1912, 1,113' in 1913; none in 1914; 880' in 1915. Ore is mined from both the Calumet conglomerate and the Osceola amygdaloid.

As the Tamarack lands do not carry the outcrop of the copper lodes worked, but cover the "underlay," or downward continuation of the veins below the Calumet & Hecla workings, the Tamarack shafts are vertical and all levels must be opened by crosscuts, some of them at great depth, having a length of nearly one-third of a mile.

The mine is dry, though there was an increase in the inflow of water after the earthquake of 1905. A concrete dam has been built on the 34th level, to increase the storage capacity for water underground. The lowest level of the mine shows only a slight seepage of water, extremely bitter to the taste, shown by analysis to carry sodium and magnesium chlorides and bromides.

Tamarack No. 3 shaft, nearly a mile north of No. 1, is the principal shaft of the mine. It is 5,253' deep, and below this depth, only 27' less than 1 mile, is continued for 500' further as a blind shaft, sunk on the dip of the bed at the end of an 800' crosscut. This was done to save deepening

of main shaft and the cost of crosscuts, constantly increasing in length. The incline blind shaft has a single track with stations on the 19th, 20th and 21st levels, and a compressed air hoist, on the 18th level, which raises all rock to that point. The 18th level has shown only fair copper values. No. 3 shaft cuts the Calumet conglomerate at a vertical depth of 4,835' where the bed is 20 to 25' wide, but carrying irregularly-distributed copper, though payable as a rule. The shaft is connected with the Calumet & Hecla mine on the 17th level south and 39th level north. The mine has endless rope haulage on the 15th, 16th, 17th, 31st, 32nd and 35th levels. The normal output of No. 3 shaft is about 1,000 tons daily.

No. 3 shaft has an Allis-Chalmers hoist having a semi-conical drum with 18' maximum diam. There is a Nordberg auxiliary hoist used for lowering and raising men and timber in No. 4. Equipment at No. 3 shaft includes a 60-h. p. fan, 10' in diam., capable of supplying 192,000 cu. ft. of free air per minute, to the depth of the shaft, both ventilating and cooling the mine, which otherwise would be 90° F. in the bottom levels.

No. 4 shaft, 4,450' deep and about 600' N. E. of No. 3 is connected with No. 3 for ventilation and safety. While occasional payable ground is shown, the section of the lode about the mine is as a whole poor.

No. 5 shaft, sunk about 3,300' S. W. of No. 4, and midway between the old Tamarack and North Tamarack workings, is the deepest and largest shaft of the mine, and is the only shaft that has been deepened for several years; it has a vertical depth of 5,308', or a mile and 28'. Though No. 3 mine of the Tamarack has deeper openings, No. 5 is the deepest shaft sunk anywhere in the earth's crust. Sinking was begun Aug. 2, 1895, and the conglomerate was cut Dec. 20, 1901, at a vertical depth of 4,062', the late Capt. Wm. E. Parnall having foretold the depth within 12', and the time required within 11 days, more than 6 years previously. No. 5 is connected underground with the workings of No. 2 and No. 3 shafts and is bottomed just below the footwall of the Osceola amygdaloidal bed.

In sinking this shaft, 83 separate trap, amygdaloidal and conglomerate strata, all barren, were cut, before the Calumet conglomerate was reached. The north drifts on the 35th, 36th and 37th levels have been carried to the Calumet & Hecla boundary and the 41st is the bottom level. Openings on the 40th level are in good copper ground though the showing on the 39th level is rather poor. The Osceola amygdaloidal bed shows no copper values except in a small streak along the hanging wall. The ground on the conglomerate bed tributary to this shaft is limited and though the conglomerate is of good width it is low in grade and shows constantly decreasing copper contents with depth.

As Tamarack No. 5 is the deepest mine shaft in the world the particulars concerning it are worthy of notice. The shaft is 7x29', inside measurement, with 5 compartments in a row. The 3 central compartments, 5'x7' 2" each, are used for cages. One of the end compartments is 7' 2"x5' 4", the extra 4" being allowed for timber strain, while on the other side of the shaft there is a 3'x7' 2" compartment for ladders, pipes and wires. The 10x14" wall plates of this shaft are 29' 2" long, and the 5x7" runners, serving as guides for the cages, are 16 to 22' in length. Instead of lag screws being countersunk, the runners have a central groove 2" wide and 1½" deep running from top to bottom on both sides of each of the 4 hoisting compartments, these grooves providing for the escape of loosened lag screws, without damage to cages or runners. The shaft openings have automatic covers that lift for passage of the cages.

Equipment: surface equipment at No. 5 is the most extensive at any shaft of the property. The engine house has 2 duplicate 6,500-h. p. Nord-

berg hoists, each with four 36" high-pressure cylinders, having 72" stroke. The drums were 24' in diam. in the center tapering to 16' at the ends, each half carrying 6,500' of 1½" steel cable, the hoists, operating in counter-balance, being capable of raising from 6,000' depth a net load of 6 tons of rock, this having a gross weight, with cage and cable of about 12 tons. The hoists cost \$60,000 and \$90,000 respectively, and 1 hoist was made over, 1910, and given a 36' Nordberg drum, weighing upwards of 30 tons. The boiler house has six 200-h. p. Burt boilers, with 84" shells, and two 115' brick-lined self-supporting steel smokestacks.

The compressor house at this shaft has a 35-drill Ingersoll-Sergeant and a 100-drill triple-expansion Nordberg compressor. The electric plant at No. 5 shaft has a 150-k. w. generator supplying current to all branches of the mine.

The pumping station on the shore of Lake Superior, nearly 5 miles N. W. of the mine, has two 1,250,000-gal. pumps, that take water from a 40' well, connecting with a tunnel driven 425' under the bed of the lake, the intake being about 35' below water level. These pumps raise water against a static and frictional head of nearly 700', delivering it into steel tanks of 42' and 65' diam., with combined storage capacity of 200,000 gals., standing on the highest ground at the mine. Water is distributed from these tanks to the Tamarack and Osceola locations.

The Tamarack has 2 stamp mills on Torch Lake, a little more than a mile S. of the Calumet & Hecla mills, each with 5 compound heads and 2 simple heads. The mills have a combined daily capacity of about 3,500 tons of conglomerate rock, which is materially greater than any possible productive capacity of the mine. The stamp heads are fitted with 8" mortar grates, opening into ¼" mesh revolving screens, with Parnall-Krause hydraulic discharges. The stamps have accessory Nordberg crushing rolls, to care for raggings from the mortars, the rolls having rigid journals, with independent wash for each set. Mineral is dressed to about 50% copper.

A regrinding plant, 99'x240', and a leaching plant, both similar to those of the Calumet & Hecla Mining Co., are being built. The regrinding plant will contain 32 Hardinge mills and 92 Wilfley tables and will treat the accumulated tailing in the lake, which is an important factor in Tamarack's assets. The management figures the new process of regrinding and leaching the tailing will result in a total profit therefrom of \$5,000,000.

The joint pump house of the Tamarack and Osceola mills has two 40-, 000,000-gal. pumps and one 15,000,000-gal. pump. The 2 larger pumps, which are duplicates, have triple-expansion steam ends, with 22", 40" and 60" cylinders of 52" stroke, and the water end of each has three 30" plungers and a 42" discharge pipe.

The Tamarack and Osceola companies have joint wharves, and steel coal sheds, with 2 steel unloading towers, at Dollar Bay, on Portage Lake, these being among the most extensive in the district.

Recent production:

(a) Includes mining, trans., stamping and taxes. *First 6 mos.

Maximum production was 20,222,529 lbs. fine copper in 1897.

During the labor strike from July, 1913, to April, 1914, the mines were closed down. Operations were resumed in May only to be suspended again in Aug., 1914, due to the depression in the copper market caused by the European war. Production was resumed in April, 1915.

The Tamarack always has been an expensive mine to work, and with expenses increasing by reason of depth and decreased mineral values, it can be worked at only a small profit, under ordinary metal conditions. The company has reached the point where with 12 ct. copper it would either have to close down the mine or expend a large sum in developing possible orebodies at greater depth. It would seem that for the best interests of all concerned it should dispose of its property to the Calumet & Hecla, which company operating it in conjunction with its own ground, could make a respectable working profit.

In August, 1916, this sale to the C. & H. is reported abandoned on account of threatened litigation. As company's quick assets are equivalent to about \$25 per share (May 31), any additional amount represents the value of the plant, tailings pile and lands.

TAMARACK-OSCEOLA COPPER MFG. CO.

MICHIGAN

Liquidated. Assets sold, 1912, to John A. Roebling's Sons Co., for \$180,000.

TANK PASS CONSOLIDATED MINING CO.

ARIZONA

Address: A. Tennyson Pryor, pres. and gen. mgr., 933 Dime Bank Bldg., Detroit, Mich. Ward Smith, v. p.; Wm. D. Calverley, sec.-treas.

Inc. Nov., 1909. Cap., \$3,000,000; shares \$10 par. Company controls the Alvin Development Co. through stock ownership, and took over the property of the Cobralla Copper Co., March, 1910.

Property: known as the Ultimatum or Cobralla group, adjoins the Alvin, near Tank Pass in the Harcuvar mountains, Ellsworth mining district, about 10 miles from Wenden. The mine carries about 4,500' of the strike of various fractures in a contact zone following granite intrusive in quartzite, amphibolite and limestone, the ores carrying bornite and chalcocopyrite, and estimated to average 3 to 5% copper, 5 to 6 oz. silver and \$1 to \$8 gold per ton, with occasional paystreaks and masses of high-grade ore.

Development: by the 150' Carbonate Hill shaft and a 200' tunnel. **Equipment:** includes gasoline hoist. Is a prospect.

TAOS MINING CO.

NEW MEXICO

Idle. **Mine office:** Twining, N. Mex. **Officers:** A. Clarence Probert, pres.-mgr., P. O. Box 56, Taos, N. Mex.; John B. Bidwell, v. p.; J. Wight Giddings, sec.; H. F. Probert, treas.; with Harry W. Davis, directors.

Inc. Nov. 11, 1914, in Delaware. Cap., \$2,000,000; shares \$10 par; \$1,173,090 outstanding. Annual meeting, last Monday in January.

Property: 15 claims, 4 patented, 333 acres in Rio Hondo mining district, near Twining, said to carry copper-gold-silver ore in schist and gneiss, averaging 2½% copper, \$4.17 gold and 5 oz. silver per ton. Developed by 1,800' vertical tunnel and several shorter tunnels. **Equipment:** includes air compressor and concentrator.

TAR BABY MINING CO.

UTAH

Office: 702 McIntyre Bldg., Salt Lake City, Utah. **Mine office:** Alta, Salt Lake Co., Utah. **Officers:** C. R. Greene, pres. and gen. mgr.; R. E. Savage, v. p.; C. F. Greene, sec.-treas.; H. E. Moon and J. W. Brewer, directors; H. D. Greene, supt.

Inc. 1911, in Utah. **Cap.**, 500,000 shares, increased June, 1916, from 400,000; 25 cts. par; outstanding, 350,000 shares. Listed on Salt Lake City Exchange.

Property: 6 claims, in South Fork of Big Cottonwood. The purpose of the enterprise is to cut extensions of orebodies in adjoining mines by a tunnel, 2,200' long, July, 1916, with depth of 1,300' at face. The tunnel follows the porphyry dike and is planned to reach the schist-limestone contact which has surface ore. New equipment includes 2-drill air compressor and machine drills.

TARBOX MINING CO.

MONTANA

Office: 426 High St., Wallace, Idaho. Mine office: Saltese, Mont. Richard Daxon, pres., mgr., treas. W. J. Smith, v. p.; R. E. Seysler, sec.; preceding with Dennis Reardon and T. H. Cotton, directors. **Cap.**, 1,500,000 shares; \$1 par; assessable; 500,000 shares in treasury. Listed on Butte Exchange.

Property: 12 claims on Packer Creek, 3 miles N. of Saltese, Missoula Co., Mont. Ore carries silver-lead, mostly concentrating grade. Vein at surface is 10' to 30' wide and filling is quartz and siderite. Machinery has recently been added for deepening the shaft and a concentrating mill is planned.

TASSOO MINING & SMELTING CO., LTD. BRITISH COLUMBIA

Jedway, Queen Charlotte Islands, B. C. Robt. R. Hedley, pres., Vancouver, B. C. **Property:** 12 claims, 850 acres, including a town site on the S. W. side of Tassoo harbor, W. side of Moresby Island. The mine is accessible by steamer direct, or by 5-mile trail from Sewell. Property shows granite cutting limestone, with diabase and trap dikes in both rocks. The ore deposits, in limestone, consist of magnetite containing 62% iron, 2% copper, \$1 gold-silver, 1% lime and 3% silica. The orebody is 107' wide, with 56' of 2.5% ore, balance 1.55% and 23' more of 1%. A 280' adit tunnel, at 1,130' elevation, cuts the orebody.

Shipment to Tacoma smelter totaled 750 tons in 1914. Nothing reported since. A 2,300' aerial tramway connects mine with harbor.

TAUNTON-NEW BEDFORD COPPER CO.

MASSACHUSETTS

Taunton, Mass. Henry F. Bassett, sec.-treas. Absorbed Revere Copper Co. Inc. Jan. 15, 1831. **Cap.**, \$800,000; shares \$100. Corporation does a copper manufacturing business, making sheet brass, copper print rollers, etc.

TAYLOR MOUNTAIN MINING CO.

COLORADO

Office: 609 New York Life Bldg., Omaha, Neb. Operating office: Salida, Colo. Mine office: Garfield, Chaffee Co., Colo. W. F. Norway, pres.; C. S. Montgomery, sec.; Geo. H. Purmort, supt.

Inc. Oct., 1905, in Colorado. **Cap.**, \$600,000; shares \$1 par. Annual meeting, in November.

Property: the Lily mine, 7 claims, 65 acres, in the Monarch district, 1½ miles from Garfield and 19 miles from Salida. The property has a nearly vertical N.-S. contact vein, between granite and limestone, carrying lead and copper ores. The mine shows a little lead carbonate ore assaying 20% lead, 75 to 180 oz. silver and \$6 gold per ton, besides copper ore which the management estimates will average 8% copper, 8 oz. silver and \$1 gold per ton. **Development:** by a 280' main shaft, with 4,000' of workings.

Equipment: includes electric power with 16-h. p. hoist and 35-h. p. General Electric air compressor. Buildings include an engine house, smithy, carpenter shop. Was shipping about 120 tons per month in 1914. Nothing reported since.

TECOLOTE COPPER CO.**MEXICO**

See West Coast Smelting & Refining Co.

TECK-HUGHES GOLD MINES, LTD.**ONTARIO**

Controlled by Buffalo Mines, Ltd. Office: 14 Wall St., New York. Mine office: Swastika, Kirkland Lake district, Ont., Canada. Officers: C. L. Denison, pres. and gen. mgr.; R. W. Pomeroy, v. p.; H. D. Crooks, sec.; H. Clark, treas.; L. W. Ledyard, supt. Cap., 2,000,000 shares; 15 cts. par.

Buffalo Mines, Ltd., acquired $\frac{2}{3}$ of the issued stock in 1915. A bond issue of \$150,000 was made to furnish working capital to continue development and build a mill. The mill has been completed and according to last reports was waiting for connections with the electric power line of the Northern Ontario Light & Power Co.

Property: 4 miles from Swastika, is developed by a 265' shaft; 3,000' of drifting has been done and ore said to be worth \$350,000 has been blocked out.

TECOPA CONSOLIDATED MINING CO.**CALIFORNIA**

Operated on old property near Tecopa, Inyo Co., Calif., worked 40 years ago for silver alone and later for silver, gold and lead. Cap., \$3,000,000; shares \$1 par. In 1910, shipped 300 tons daily to smelter. Passed into hands of Graves Bros., Philadelphia, who added to equipment. In 1915 all Graves' holdings were sold at auction for \$98,000.

Property: 575 acres, 4 miles W. of Tecopa. Report for 1914 shows that the Gunsite mine produced 10,000 tons of ore, worth \$128,000, at a profit of \$52,000. The Noon Day produced 1,000 tons yielding \$1,499 profit. Mining costs, \$1.66 to \$3.62 per ton.

Mine being worked according to latest reports.

TEDDY MINING & MILLING CO., LTD.**IDAHO**

Kellogg, Shoshone Co., Idaho. J. B. Cox, sec. Cap., \$1,000,000; shares \$1 par. **Property:** 7 claims and a mill site, 1 mile E. of Kellogg, shows 2 veins, 1 of about 15' width, carrying copper ore with quartz gangue, and 1 of about 12 to 35' width carrying silver-lead ore giving assays up to 12% lead and 30 oz. silver per ton. **Development:** by crosscut tunnels of 100' and 550'. There are several mine buildings.

Mine is being operated under 2-year lease from March, 1916, by C. W. Brown, Dr. T. R. Mason and J. W. McCrea, of Kellogg. The lease covers only the ground above the intermediate tunnel, which is to be extended 40' to intercept the main vein.

TEJON MINING CO.**ARIZONA**

Office: Bakersfield, Calif. L. I. Thiers, supt., Gleeson, Cochise, Ariz. Inc. in Arizona. Cap., \$1,000,000; shares \$1 par.

Property: 8 patented claims, 150 acres, at Gleeson, in the Turquoise or Courtland district, Arizona, adjoining the Copper Belle mine of the Leonard Copper Co. mine, shows heavy bedded limestone dipping steeply eastward into the mountain ridge and cut by intrusive bodies of monzonite and later quartz porphyry. Ore occurs as a contact deposit. Average assays reported at 5% copper, 6 oz. silver, 0.07 oz. gold per ton.

Development: by the 500' Tejon shaft, and by several old tunnels with extensive drifts and stopes in oxidized ore. **Equipment:** modern and complete, includes electric and steam power, compressor, etc. Railway is close at hand. Property appears meritorious and management good.

TEK MINING, MILLING & LEASING CO.**COLORADO**

Address: care J. B. Arthur, Kansas City, Mo. Mine near Idaho Springs, Colo. **Property:** an old mine with dumps estimated to contain 150,000 tons of complex gold-silver-lead ore averaging \$4 per ton.

TELLURIDE CHIEF MINING CO.

ARIZONA

A. F. Hannon, mgr., Kingman, Ariz. S. F. Kelly, v. p., San Bernardino, Calif.

Property: a group of claims in Maynard district, 15 miles east of Kingman, said to contain the Garnier and Big Swede veins, the latter 8' thick and said to average \$22 per ton in gold and copper in surface cuts.

Development: by 45' shaft on Garnier vein; sinking to 150'. Has gasoline hoist. Is a likely prospect.

TELLURIDE M., M. & DEV. CO.

ARIZONA

Offices: Bagdad and Needles, Calif. Mine office: Oatman, Ariz. **Officers:** J. E. Rose, pres.; W. Matthie, v. p.; N. E. Scott, sec.-treas.

Inc. 1915, in Ariz. **Cap.**, 1,100,000 shares; \$1 par; treasury shares, 675,000.

Property: 10 claims, 200 acres, at Oatman, Mohave Co., said to carry gold ore of milling grade. **Development:** by 500' main working shaft with crosscutting and drifting on 200' and 400' levels. **Equipment:** includes 40-h. p. White & Middleton engine, double-friction hoist, Fairbanks-Morse compressor, mine buildings, etc. A double-compartment shaft, to be sunk 600' has been started.

TEMISKAMING & HUDSON BAY MINING CO., LTD. ONTARIO

Address: New Liskeard, Ont., Can. **Officers:** Geo. Taylor, pres.; A. A. McKelvie, v. p., with T. McCamus, D. M. Ferguson, S. S. Ritchie, John Dunkin and Chas. L. Sherrill, directors. F. L. Hutchinson, sec.-treas.

Inc. July 29, 1903, in Ontario. **Cap.**, \$25,000; shares \$1 par; outstanding \$7,761. Annual meeting, last Tuesday in October. Company is a holding corporation, operating property is the Hudson Bay Mines, Ltd., which in turn controls Dome Lake Mining & Milling Co., Ltd.

Balance sheet for year ending Aug. 31, 1915, shows: assets, \$2,953,183, which includes, stock of Hudson Bay Mines, Ltd., 580,000 shares, \$2,900,000; cash, \$10,360; Hudson Bay Mines, Ltd., account receivable, \$37,975; Gowanda claims, \$4,500; furniture, \$348. Liabilities include: outstanding capital stock, \$7,761; balance, loss and gain account, \$2,945,422.

Dividends: during the year one 300% dividend was paid, bringing total dividends paid since incorporation in 1903 to 25,000%, or \$1,940,250. Operations are described under titles of the subsidiary companies.

TEMISKAMING MINING CO., LTD.

ONTARIO

Office: 810 Lumsden Bldg., Toronto. Mine office: Cobalt, Ont., Can. **Officers:** F. L. Culver, pres.-gen. mgr.; W. T. Mason, v. p.; R. Graham, sec.; H. E. Tremain, treas.; C. C. James, W. E. Stevenson, F. L. Lovelace, directors; J. W. Moffitt, supt.

Inc. 1906 in Ontario. **Cap.**, \$2,500,000; shares \$1 par; nonassessable; all issued. Company office, Toronto, transfer office. Union Trust Co., Ltd., Toronto, registrar. Annual meeting in March. Listed on Standard Stock Exchange, Toronto.

Dividends: 15% in 1908; 6% in 1909; 11% in 1910; 9% in 1911; 12% in 1912; 3% in 1913; none 1914; 3% in 1915; 3% in March, 1916.

Owing to the low price of silver in last half of 1914, most of the bullion was stored for future sale. June 30, 1914, company had 311,922 oz. silver in storage, 90,276 oz. at smelters and 100,089 bagged at mine, a total of 502,287 oz. with \$170,219 cash on hand.

Comparative General Balance Sheet:

Assets—

1915.....	\$732,263	\$262,471	\$469,731	\$462,487
1914.....	146,649	228,071	*81,422	85,621
1913.....	438,455	320,881	117,574	196,920

* Deficit.

Properties: in which the company is directly or indirectly interested: Daigle claim, 20 acres; Gans property; McDonald claims, 40 acres in North Cobalt; Peterson claim, 40 acres; Osland claim, 40 acres; also 40 acres each in McCool, Cook and Barnet townships; the Morrison claims, commonly called the Red Jacket and the North Dome property in the Porcupine Mining Division. The Red Jacket claim was leased 1916 to a syndicate which is now unwatering it.

Ore: high-grade silver, containing arsenic and smaltite. Assays on shipments average from 500 to 6,000 oz. silver per ton. Deposits occur at contact of the Keewatin formation with a diabase sill. Pay ore is found in shoots.

Development: by vertical shaft. Greatest depth is 1,180' and total extent of workings about 2½ miles. Reserves include 10,000 tons broken ore on stulls.

In the first half of 1916, new development aggregated 3,080', including 307' of shaft sinking. Surface trenching was done on the Gans lot and on the McDonald claim, but nothing new was done at the North Dome mine at Porcupine.

Diamond drilling has proved that another contact occurs below the diabase sill at a depth of about 2,000'. Sinking to strike this lower contact is in progress. **Equipment:** includes a compressor for 20 drills, a Nordberg hoist with 6' drums and capacity of 2,500'. Electric power is hydraulically generated.

The 150-ton, 40-stamp mill is equipped with concentrating machinery and handles low-grade material. Concentrates average 1,302 oz. silver per ton; shipping ore averaged 6,400 oz. per ton during 1915. Low-grade reserves average 20 oz. silver per ton.

Total cost of production, 1915, was 16 cts. per oz. silver.

TENABO MINING & SMELTING CO.**NEVADA**

Office: 105 Mercantile Blk., Salt Lake City, Utah. Mine address: care A. E. Raleigh, supt., Tenabo, Lander Co., Nev. **Officers:** W. Mont Ferry, pres.; John Pingree, v. p.; John Janney, sec.; E. O. Howard, treas., and Benner X. Smith, directors; Duncan MacVichie, cons. engr.

Inc. 1909 in Nevada. **Cap.**, \$3,000,000; shares \$2 par; issued \$1,922,156. Annual meeting, second Monday in February. Union Trust Co., New York, registrar; Windsor Trust Co., New York, transfer agent; Walker Bros. Bank, Salt Lake City, depository. Stock is listed on the unqualified department of the Boston curb.

Company bought, 1909, the property of the Gem Cons. Mining Co., at Tenabo, which in turn had taken over the property of the Reliance M. & M. Co., the Tenabo Mng. & Sm. Co. giving 450,000 shares of stock to the Gem Consolidated for the lands. Company also bought the property of the Tenabo Cons. Mines Co., comprising the Copper Hill and Widows mines, for 300,000 shares of stock.

Property: 223 acres of mineral lands and an 80-acre mill and smelter

site, in 4 groups, all with more or less development work. The principal group shows a deposit of low-grade copper ore, stated by company to average 300' in width, outcropping for nearly a mile. The management estimates the ore on this group to run about 3% copper, with small gold and silver values.

The Little Gem mine, about 1 mile from Tenabo, has a contact deposit between rhyolite and sedimentary rocks, carrying copper carbonates and chalcopyrite, with quartz gangue, a 450' shaft, sunk at the very flat angle of 22°, showing an orebody ranging from 2' to 14' in width, reported to have 24,884 tons blocked out, that will average \$18 per ton.

The mine was acquired upon a report by Duncan MacVichie that it contained 7,783 tons of \$13.38 smelting ore and 17,257 tons of \$3.88 concentrating ore and that \$25,000 spent on the property would bring reserves up to 100,000 tons.

Another property has a 150' incline shaft, in a vein, apparently widening in depth with 5 parallel veins in a cross-section of about 600'. The property as a whole has about 3,000' of workings, and about \$100,000 has been expended in development and equipment. Twenty-three cars of ore, from the Little Gem mine, gave net smelter returns of \$17,640.

TENAS MINING CO.

WASHINGTON

Idle. Office: 320 California Bldg., Tacoma, Pierce Co., Wash. Mine near Keller, Ferry Co., Wash. **Officers:** J. R. Turner, pres.; P. J. Sweener, v. p.; C. E. Peterson, sec.; D. McPherson, treas.; preceding, with Otto B. Roeder and F. W. Heide, directors, all of Tacoma, Wash.

Inc. Sept., 1910, in Washington, succeeding the Iconoclast Consolidated Mines Co., whose property was sold for debt. Cap., \$10,000; shares \$1 par; fully paid and assessable up to 25% per year; issued, 3,448. Assessments to 1916, 71 cents per share.

Property: 5 claims, 95 acres, relocated 1912, 2 miles N. of Keller, shows 3 contact deposits with an orebody 30' in maximum width, giving average assays of 3.6% copper and 2 oz. silver per ton with some gold. **Development:** by a 325' main shaft and 3 tunnels with claimed total length of 514'. Annual assessment work only has been done since 1908. Company is a holding corporation, awaiting an opportunity to sell or bond the property.

TENDERFOOT HILL CONSOLIDATED MINING CO.

COLORADO-SOUTH DAKOTA

Office: 516 Exchange Nat'l Bank Bldg., Colorado Springs. **Officers:** W. A. Otis, pres.; L. L. Aitken, v. p.; A. D. Aitken, sec.; T. A. Dines, treas. **Cap., \$1,500,000; shares \$1 par; all issued. Listed on Colorado Springs Stock Exchange. Last stockholders' meeting held 1911. No liabilities and no production. Cash in treasury, Jan. 1, 1916, \$14,210.**

Property: 61 acres on Tenderfoot Hill, Cripple Creek district, and 93 acres in the Black Hills, South Dakota.

Development: main shaft on Cripple Creek property, 511' deep with 600' of drifting. Black Hills property has drifts, tunnels and crosscuts totaling about 1,350'.

TENNESSEE COPPER CO.

TENNESSEE

Office: 2 Rector St., New York. Mine at Copperhill, Polk Co., Tenn. **Officers:** Utley Wedge, pres.; L. D. Vorce, v. p.; B. G. Slaughter, v. p.; preceding, with W. B. Joyce, Martin Vogel, W. A. Neereamer, S. J. Jennings, Jos. Walker, Jr., Richard Sutro and H. M. Kilborn, directors. Frank H. Rude, sec.-treas.; N. H. Emmons, 2nd, gen. mgr.; Arthur L. Tuttle, asst. gen. mgr.; M. A. Caine, mine supt.; A. J. Bone, smelter supt.; D. F. Dryden, acid plant supt.; Utley Wedge, cons. eng.; A. M. Faillie, assayer; Chas. A. Magnell, purch. agt.

Inc. April 26, 1899, in New Jersey. Cap., \$6,875,000; shares \$25 par; \$5,000,000 issued. State Street Trust Co., Boston, and Equitable Trust Co., New York, registrars; Old Colony Trust Co., Boston, and National City Bank of New York, transfer agents. Stock listed on New York, Boston and London Exchanges. Annual meeting, fourth Thursday in April.

Authorized bond issue, 1915, \$3,000,000; 1st mortgage 6% 10-year convertible sinking fund gold bonds; \$2,000,000 outstanding. This issue enabled the company to retire the \$800,000 outstanding bonds of the first issue. Dec. 1, 1915.

	Profit	Dividend		Profit	Dividend
1903.....	\$417,565	\$218,750	1910.....	\$ 445,387

* \$1.50 to April, 1916.

Net surplus, Dec. 31, 1915, was \$2,375,100. The 1915 profits show an increase of but \$400,000 in net income over 1914, in part due to increased copper prices and not to sulphuric acid alone. Allowing for increased capitalization, earnings for 1915 were less than \$3.50 per share.

Property: 2,080 acres of mineral land and 11,000 acres of miscellaneous lands, in the Ducktown district. Ore was discovered and mining first begun in 1850, and the mines were operated regularly by a New York company previous to the Civil War, and, during the earlier part of the war, under compulsion by the Confederate Government to supply copper for munitions of war. Company owns the Burra Burra, London, Polk County, Eureka and Tennessee mines. The Eureka was formerly operated under lease for iron ore by the Virginia Iron, Coal & Coke Co.

Geology: property shows pre-Cambrian metamorphosed mica-schist carrying several lines of mineralization with lenticular orebodies. Four deposits, under development, show extensive gossans, originally having a little rich sooty glance ore under the gossan, which was mined out many years ago. The lenses range 30 to 150' in width, 500 to 2,000' in length, and are of unknown depth. The ore consists of a massive mixture of pyrite and pyrrhotite, with a little chalcopyrite, in a gangue of various metamorphic minerals and quartz, ore ranging from 2 to 4% copper, 40% iron, 27% sulphur and 15% silica, with minute quantities of gold and silver. As zinc and other refractory elements are lacking the ore is excellently adapted to smelting, giving very clean slags.

Development: the mines are extensively developed; new work in 1915 totaled 1,042' of diamond-drill holes and 1,904' of winze and raise work.

Ore reserves: Mch. 15, 1916, estimated at 3,707,421 tons of copper ore and 2,500,000 tons sulphur ore, not including ore indicated by diamond drilling.

The **Burra Burra mine**, which is the principal property, is operated through a 1,000' main central shaft, sunk at 75° in the footwall, having its first level 170' below the collar, with succeeding levels at 100' intervals, the mine ending 1915 with 8 producing levels, the 9th level under development and the shaft sinking for the 10th level. The method of back stoping adopted in 1910 met expectations. The entire output in 1915 came from back stopes in the mine and over 250,000 tons of broken ore was in the stopes Jan. 1, 1916.

The main orebody of the Burra Burra is 1,200' long and averages 60'

wide on the 3rd level. There also is the north, or McPherson orebody, developed by a drift from the 3rd level of the main shaft; connecting with the McPherson shaft, now down to the 6th level. This shaft is 2,200' N. E. of the main shaft and facilitates working the McPherson orebody, which is about 900' long with an average width of 25'. The Hiwassee shaft, 900' S. W. of the main Burra Burra shaft, is sunk to the 8th level, showing a comparatively small orebody, of about 200' length and 12' average width. During 1915 a total of 1,132' of underground development work was done. Diamond-drill holes put down from the 8th level for 400' showed continuity of the orebody. Burra Burra produced 367,291 tons of ore in 1915.

The London mine has a 750' shaft, sunk at an incline of 75°, with 6 levels opened, developing an orebody of 25 to 75' width and about 600' length, ranging 2 to 4% in copper tenor. A total of 193' of underground work was done in 1915, consisting mainly of raises and drifts. The London produced 101,405 tons of ore in 1915.

The Polk County mine has a 485' vertical shaft, with 5 levels opened, developing an orebody of very irregular shape, up to 120' maximum width, of about 2% average copper tenor. The Polk mine is held under lease and development work was resumed in May, 1915. To Jan. 1, 1916, about 575' of drifting had been done, and a south drift on the 2nd level is now being driven. Production of the Polk County mine was 43,244 tons of ore in 1915.

The Eureka mine, idle since 1912, has a shaft 165' deep, at which point the first level will be opened. Diamond-drill borings have shown an orebody of 20 to 165' width, about 1,000' length, and it is estimated that this mine has 2,500,000 tons of ore developed that average 44% iron, 30% sulphur and about 1% copper. This ore is to be treated for its iron and sulphur, as experiments indicate that it will make a good non-phosphorous iron ore. An initial unit to try out the process is planned.

Equipment: at the Burra Burra includes a Nordberg electric hoist, 3 Ragler type electrically driven 2,500-cu. ft. compressors, a combination shaft house and crusher building. Crushing plant includes 18x36" Blake crusher, feeding to a 36"x33' Robins belt conveyor, used as a picking belt, which discharges into storage bins of about 2,500 tons capacity; as far as possible all barren rock is removed from the crushed ore by hand picking, plant having a daily crushing and assorting capacity of 1,500 tons, ore being reduced to 4" size. There are similar shaft rock houses at the London and Polk County mines.

The brick power plant at the Burra Burra includes four 150-h. p. Babcock & Wilcox boilers, having Murphy automatic stokers. There are 2 Nordberg 2-stage air compressors, each capable of reducing 2,000 cu. ft. of free air per minute to 70 lbs. initial pressure. A small plant furnishes electric light for the Burra Burra and London mines.

The company's private railway connects the mines with the works and has connection at Copperhill with the Louisville & Nashville railway. The track is of standard gauge, with 7½ miles of main line and 4½ miles of sidings and spurs. Equipment includes four 105,000-lb. Schenectady locomotives, eighty-five 50-ton and two 40-ton steel tank cars, 40 standard gauge gondolas and 10 flat cars. The company has a repair shop for locomotives and cars, equipped for making all repairs and capable of completely rebuilding when necessary.

The smelter: at Copperhill, a little N. of the Tennessee mine and 1 to 5 miles from the other mines of the company, was designed and built by J. Parke Channing. On the upper level are the ore bins, having storage

capacity for 10,000 tons of ore, 800 tons of coke, and necessary fluxes and furnace products requiring retreatment. Charges are drawn from the bins into cars of 44 cu. ft. capacity, hauled by electric locomotives, there being scales for weighing charges, and 4 tracks that run under the bins and circle around the furnaces, so that a train loaded on any track may go to any furnace and return to the bins.

Dust is removed from the chamber by two 12" conveyor belts running in the tunnel underneath and treated in a sintering plant. This plant has two 42x264" Dwight-Lloyd machines, producing over 1,000 tons of sinter coke monthly; part of the flue dust is spread over the beds and covered with low-grade first-fusion matte, the product being a light porous material in excellent condition for resmelting.

The furnace building of steel has 7 blast furnaces, each having a 16' circular settler lined with low-grade silicious copper ore. Slags skim into pots of 105 cu. ft. capacity, which are hauled by electric locomotives, considerable slag being used for railway ballast.

The converter department has two 40-ton electric traveling cranes taking matte from the settlers to the converters. Two 12' basic lined converters of the Great Falls type were installed in 1916 to replace the old ones.

Hot converter slag is poured into the blast furnace settlers, by reason of which the only converter slags requiring resmelting are the skulls forming in the ladles. Converter bars average about 99.4% in copper tenor. Copper is cast in 210-lb. pigs and sent to the Baltimore Copper Smelting & Rolling Co. for electrolytic refining, which effects the saving of the very small gold and silver values contained. The finished electrolytic copper is marketed through the American Smelting & Refining Co.

The smelter power house includes two 250-k. w. 500-volt d. c. Westinghouse generators, direct-connected to 2 Nordberg tandem-compound Corliss engines, and one 400-k. w. 500-volt d. c. Crocker-Wheeler generator, driven by a Bates tandem-compound Corliss engine, all 3 engines running non-condensing, with exhaust steam going to a feedwater heater. Furnace blast is supplied by 3 Nordberg piston blowing engines, each of 20,000 cu. ft. capacity per minute, and 3 Nordberg duplex cross-compound piston blowing engines, each of 30,000 cu. ft. capacity per minute, supplying blast at 50 oz. pressure to a common blast-main, above the charge floor. Converter blast is furnished by 2 Nordberg duplex cross-compound air compressors, supplying 10,000 cu. ft. per minute each, at 12 lbs. initial pressure. An Ingersoll-Rand air compressor furnishes air at 100 lbs. pressure for operating the charging doors and sundry pneumatic tools. The electric plant includes a 110-k. w. 250-volt Keystone generator, direct-connected to a Ball tandem-compound engine furnishing current for electric light, and there is a motor-generator set for transforming a 500-volt current to 220-volt current for electric lighting outside of the power plant.

The smelter boiler house has four 512-h. p. Altman & Taylor water-tube boilers, with Murphy automatic stokers and Foster superheaters, delivering steam at 175 lbs. pressure, with 150° superheat. Coal and ashes are handled mechanically by a bucket and chain conveyor, an 800-ton steel coal bunker being located to feed automatically to the boilers. A brick transformer house was added to the plant in 1915.

The smelter treated 424,197 tons of company ore in 1910; 436,285 tons in 1911; 444,289 tons in 1912; 470,135 tons in 1913; 485,051 tons in 1914; 475,301 tons in 1915.

Water is pumped from the Ocoee river by three 10" 2-stage Worthington pumps, belt-driven by motors, each with capacity of 2,800 gals. per

minute, to large storage tanks above the smelter, and a large reservoir at the McPherson shaft. A 4,000,000-gal. reservoir at about the level of the furnace floor received the flow from the water-jackets, which passes over a Worthington water-cooling tower.

The company operates a quartz quarry at Austral, Tenn., 35 miles N. of Copperhill, on the Louisville & Nashville railway. Equipment of the quarry consists of a boiler, air compressor, rock drills and a Bucyrus steam shovel.

The mines and smelter employ a total of 1,315 men.

The smoke damage situation is complicated by the location of the works, which are in the extreme S. E. corner of Tennessee, winds carrying the bulk of the fumes into the State of Georgia, by reason of which the state authorities of Georgia brought suit against the Tennessee Copper Co. and the Ducktown Sulphur Copper & Iron Co. in the Federal courts, and the latter decided that the smelters must cease operations or stop the fumes by using them for a sulphuric acid plant. This undertaking proved much more difficult than was anticipated by reason of the intermittent and varying nature of the gas supply from the blast furnace tops.

The acid plant cost about \$1,600,000 and was put into full operation early 1908, with a rated capacity of 120,000 tons yearly of 60° Beaumé chamber acid; the plant has been enlarged since to a nominal capacity of 200,000 tons yearly, with somewhat greater actual output.

As the furnace gases contain sulphur dioxide, sulphur trioxide, carbon dioxide, oxygen and nitrogen in considerably varying percentages, new methods of control were found necessary to maintain the volume of sulphurous gases suitable for making sulphuric acid by the chamber process. After some experimentation the problem was solved by equipping 1 of the smaller and 3 of the larger blast furnaces with tight tops, above the charge floor, to exclude atmospheric air, these being connected with a dust chamber, where most of the solid matter is precipitated from the gas, the dust chamber being so constructed as to conserve the heat of the gases sufficiently to concentrate the acid in the Glover towers. There are 2 octagonal Glover towers of 30' diameter and 50' height with suitable nitre plants at the foot of each. After passing through the towers the gases are conducted through very large lead flues of 200 sq. ft. sectional area, which deliver the fumes to the chamber system containing 4,600,000 cu. ft. of chamber space. In a general way the chamber plant is of conventional design, yet the enormous quantities of fumes received and acid produced have brought about developments that are quite new to the industry, among the most notable being the size of gas connections, acid lines, acid coolers and fans, which are all on a scale never before known. The discharge from the chamber plant is conducted into 12 Gay-Lussac towers, which are of a gigantic size, the 3 latest and largest being octagonal of 36' diameter and 65' height. The estimated capacity of 180,000 tons per year of 60° Beaumé chamber acid is now demonstrated to be low. The company has contracted for the sale of its entire production of sulphuric acid and for an even larger output of acid than 200,000 tons yearly, for a period of 10 years, to the International Agricultural Corporation, at a price understood to be \$4.81 per ton. This acid plant, the largest and most complete in existence, requires a force of only about 30 men for its operation. During 1915 a concentrating plant, nitrating plant, nitric acid plant and storage building were erected. A large addition to the sulphuric acid plant will be put in operation in 1916.

Recent Production:

	Lbs. Cu.		Oper. Cost	—Production—		Cost p. Lb.	Rec. p. Lb.
	Tons Ore Smelt.	p. Ton Ore		Acid Tons	Copper Lbs.		
1915.....	475,301	26.83	\$2.82	210,666	12,750,418	10.53c	16.274c
1914.....	485,051	26.54	3.14	210,163	12,871,113	11.84c	13.706c
1913.....	470,135	28.70	3.25	197,713	13,493,140	11.34c	15.748c
1912.....	444,289	29.80	3.27	192,084	13,252,634	11.00c
1911.....	436,285	31.65	3.44	13,808,940	10.88c

Silver produced in 1915 amounted to 60,953 oz.; gold, 276 oz.

The big acid plant giving continual trouble, it was shut down and overhauled for two months early in 1916, but after ten weeks' operation broke down again, and the company's chief customer, the International Agricultural Co., a fertilizer manufacturer, has been seriously hampered. Company's phenol plant at Ridgefield, N. J., closed down for several months, resumed operations Aug. 3, 1916.

Low-grade copper ores are treated profitably at other points, but in nearly all other cases there are considerable gold and silver values, which are lacking in the case of the Tennessee. This company has shown both courage and ability in changing the old method of semi-pyritic smelting, and has shown equal ability and greater courage in the installation of its acid plant, by virtue of which a very serious handicap has been turned into a permanent source of large revenue.

This progressiveness received a setback in March, 1916, when the trinitrotoluol plant, built with \$1,500,000 advanced by the Russian government, was burned down and suit for recovery of the money begun by lender. The quarterly dividend was omitted on this account.

As property has large ore reserves, is well equipped and operating continuously with splendid earnings, the future is assured despite this loss.

TENNESSEE MINE.**ARIZONA**

Chloride, Ariz. N. S. Churchill, supt. Described under Needles Mng. & Sm. Co.

TENNESSEE MINING & MILLING CO.**COLORADO**

Office: care J. W. Thayer, sec., 677 Roscoe St., Chicago, Ill. Mine office: Empire, Clear Creek Co., Colo. **Officers:** J. W. Loofbourrow, pres.; S. B. Anderson, v. p.; J. F. Kidnell, treas., and H. J. Fersdick, directors; Abel Guion, supt. **Inc.** Feb. 11, 1911, in Colorado. **Cap.**, \$400,000; shares \$1 par; nonassessable; issued 260,000. Annual meeting, Aug. 13. Company is a reorganization of the Gold Bug Mining Co.

Property: 6 claims, 2 deeded, in the Colorado district $1\frac{1}{4}$ miles from Colorado Southern railroad. Claims have veins which show gold and silver ore with traces of copper. Property has been leased and development work is planned for 1916. **Development:** by 1,300' of tunnels, a shaft and several drifts.

TEPEE MINING & DEVELOPING CO.**COLORADO**

Alamosa, Colo. **Officers:** J. F. Reynolds, pres.-mgr.; C. L. Cunningham, v. p.; W. W. Platt, sec.; B. P. Middleton, treas.; with J. F. Reynolds. W. W. Platt, T. L. Connolly, directors.

Inc. 1914 in Colorado. **Cap.**, 1,000,000 shares; \$1 par; nonassessable; in treasury, 95,000 shares.

Property: 21 claims, about 400 acres, at Alamosa Forest Station, Forest Reserve, Conejos Co., Colo. Pay ore occurs in shoots in veins in diorite. Veins vary from vertical to 45° dip, and from 8" to 2' in width, with strike N. E.-S. W. Ores are both oxidized and sulphide and contain gold-silver values.

There is one 90' shaft worked by windlass. It is proposed to cut vein by tunnel 1,500' long. Operating expenses for 1915 were \$3,000; development mostly confined to annual work.

TERRA NOVA PROPERTIES, LTD. NEWFOUNDLAND

Secretary and office: E. A. Swisham, Fleetway House, Farrington St., London, Eng. Mine address: Millertown, Newfoundland. Mayson M. Beeton, chairman; William Scott, supt., at Grand Falls, Newfoundland. Is a subsidiary of the Anglo-Newfoundland Development Co.

Company owns rights over about 2,500 sq. miles, held by 99-year lease, in the central part of Newfoundland, surrounding Long lake. The principal property is Buchan's River mine, about 5 miles W. of the lake on the N. shore. Ore occurs in sericitic schists formed of volcanic grits, the vein having strike of N. 51° E. and dipping about 30°.

Development: consists of a 370' shaft with several levels, having long drifts on the vein. The one orebody thus far found varies from 5 to 10' in thickness, is 350' long, horizontally, and 370' in downward extension. The ore is a complex sulphide carrying 2.36% copper, 8.14% lead, 20.38% zinc, 6.70 oz. silver and \$2.72 gold per ton.

Property promising.

TERRIBLE EDITH MINE. IDAHO

A group of claims in the Eureka district, near Murray, under lease to C. and W. H. Conn, of Butte, Mont. In 1915 a 1,300' crosscut and 600' of drifting developed zinc ore of shipping grade. Several shipments of 50% ore were made and 150 tons monthly contracted for. The mine is also said to show promising bodies of galena with silver and gold.

TERRIBLE DUNDERBERG MINING & POWER CO. COLORADO

Office: c/o H. F. Wells, 60 Congress St., Boston, Mass. **Mine office:** Silver Plume, Colo. **Officers:** W. Rotch, pres.; C. C. Ramsay, v. p.-sec.; H. F. Wells, treas.; L. Williams, A. L. Carnahan and P. R. Eaton, directors; W. Marshall, supt.

Inc. 1913 in Colo. **Cap.,** 100,000 shares; \$5 par; nonassessable; outstanding, 79,300 shares. Authorized bonds, \$60,000, unsold. Annual meeting in May.

Property: a consolidation in 1913 of two old properties worked for 40 years, comprising 43 patented claims, about 300 acres, at Silver Plume, Clear Creek county. The company controls a number of old-time producing mines, and the dump from the Seven-Thirty, Mammoth, Brown and Dunderberg workings, known as the "Big Slide in Brown gulch." **Ore:** carries gold, silver, lead and zinc occurring in a fissure vein in granite and schist. Vein dips 70° N. and strikes N. E. The sulphide pay ore occurs in shoots and streaks of varying size.

Development: by a working tunnel with 7 levels above it and 7 below it, reached by a 70° shaft, 480' deep. Method of working, stulls and stope filling. Total extent of workings, about 5 miles. A winze 70' below deepest working is in \$50 ore the entire length.

Equipment: includes hoist, compressor and pumps. Both water power and steam are used. The 100-ton mill contains crushers, rolls, jigs and tables.

Present operations consist in remodeling and enlarging the mill, and introducing flotation treatment to handle the low-grade and zinc ores left in the old stopes or on the dump piles. Development to lower levels is also in progress, this work in 1915 having yielded an income of \$3,000.

Owners claim that the mine has a production record of \$10,000,000, all from high-grade ore, and that the property now has 100,000 tons of \$10

ore left. This includes 200,000 tons in the Big Slide, a great pile of ore carried down-hill by a snow slide, whose net value is figured at \$300,000.

Management will expend \$50,000 to enlarge mill to 300-ton capacity, so as to handle 200 tons per day of low-grade ore from the dumps. The Big Slide ore is said to average 40c gold, 3.7 oz. silver per ton with 0.45% lead and 1.22% zinc.

H. C. Bonnevie has reported on both the mine and the treatment of the Big Slide ore. Property has attractive possibilities in depth and in virgin ground, if funds are provided for the plans outlined above.

TETER-STONE AZURITE MINING CO.

ARIZONA

Dr. D. W. Teter, pres. **Property:** 3 miles south of Dragoon, Cochise Co., Ariz., has a 4 to 10' contact deposit, between limestone and granite, showing outcrops of azurite and malachite, with some sulphide ore in a tunnel. Operations were suspended, 1913, owing to a heavy inflow of water.

TEXAN MINING CO.

UTAH

Office: 400 W. 7th South St., Salt Lake City, Utah. Chas. Tyng, pres.; Frank Nelson, sec. **Inc.** in Utah. **Cap.**, \$1,000,000; shares \$1 par; outstanding, \$825,000. Listed in Salt Lake City.

Property: 200 acres in American Fork district, said to show silver-lead-copper-gold ore.

TEZIUTLAN COPPER CO.

MEXICO

Inc. in New Jersey. **Cap.**, \$1,000,000; shares \$100 par. Is controlled, through ownership of entire stock issue, by Teziutlán Copper Mining & Smelting Co. Fully described Vol. V, Copper Handbook.

TEZIUTLAN COPPER MINING & SMELTING CO.

MEXICO

Office: R. E. Safford, sec., 82 Beaver St., New York. **Mine office:** La Aurora, via Teziutlán, Puebla, Mex., and Ejutla, Oaxaca, Mex. **Officers:** Stephen W. Reynolds, v. p.; Chas. J. Peabody, v. p.; preceding, with E. W. Gould, Jr., D. C. Brown, R. H. Cromwell, W. F. Gillesby and R. M. Carter, directors; Donald C. Brown, asst. gen. mgr.

Inc. April, 1905, in New Jersey. **Cap.**, \$10,000,000; shares \$100 par. Controls, through entire stock ownership, the Teziutlán Copper Co., and has a close working agreement with the Compañía Metalúrgica Mexicana. State Street Trust Co., Boston, transfer agent. Annual meeting, first Thursday in June.

Regular dividend rate is 6% per annum, and dividends were \$100,000 in 1903; \$350,000 in 1904; \$495,216 in 1905; \$800,000 in 1906; \$800,000 in 1907; \$300,000 in 1908; none in 1909-10; \$400,000 in 1911; \$400,000 in 1912 and \$300,000 in 1913.

Property: La Aurora and Ocote mines, the former with 4,500 acres, 10 miles from Teziutlán, and about 130 miles E. of the City of Mexico, with a 16-acre smelter site, and 2,500 acres of miscellaneous lands, including La Chignautla limestone quarry, about 3 miles from the smelter. The climate is equable, and the mines are surrounded by fine arable lands, with an adequate supply of good labor.

Los Ocotes group, 240 hectares, bought Oct., 1905, is 2½ miles N. of San Martin. Ejutla, Oaxaca, Mex., and includes the San Juan mine, which is one of the few copper properties that has paid for development from production, since inception, and in addition, has given a profit, the mine having been a steady producer since 1900. This property shows 4 fissure veins, in porphyry. The one worked in the San Juan mine varies from 2 to 30' in width and has lenticular shoots of quartzose-chalcopyrite ore without zinc, antimony, arsenic or bismuth. The ore averages 4 to 5% copper, and 15 oz. silver per metric ton, with a trace of gold, and the mine has produced considerable ore carrying up to 11% copper and 4 kgs. silver per metric ton.

Development: by 4 shafts, 1 for ventilation. The San Juan or main shaft is 830' deep, and is connected on the 7th level with the Dolores shaft, 200 meters to the N., of 164 meters depth, having 9 levels. The San Francisco shaft, 475 meters S. of the San Juan, is not yet connected with the main workings. The mine is quite dry, making only about 25,000 gals. of water daily. Ore reserves were estimated March, 1912, at 1,000,000 tons.

Equipment: at the San Juan mine of Los Ocotes group includes steam, gas and electric power, with steam hoists good for 500 meters depth, at the San Juan and Dolores shafts, and a 6-drill Rand air compressor. There also is an old mill erected by the former owners near the San Juan shaft.

The company owns a private narrow-gauge railway, of 10.7 miles length, from La Aurora mine to Teziutlán, where connection is had with the Interoceanic Railway of Mexico. This line has 2 Shay mountain-climbing locomotives, with a Rogers switch engine at the works. A railway is projected from Teziutlán to the port of Nautla, on the Gulf of Mexico, a distance of 100 miles, which would give a direct outlet, and reduce transportation charges, which are very high at present.

The company has 2 aerial tram lines, the lower of 50 metric tons hourly capacity, carrying ore and limestone, and the upper, of 15 metric tons hourly capacity, with automatic loading and dumping devices, carrying limestone only.

A new 500-ton concentrating mill at Aire Libre, Puebla, Mex., electrically operated, and of the most modern and complete equipment, was practically completed at end of 1913, when all work had to be suspended on account of revolutionary conditions.

Smelter: 17 kilometers from Teziutlán, was remodeled and blown in April 8, 1910. Buildings are of concrete and steel and the flow of material is by gravity throughout. Ore is brought from the mine in trains of 4 cars each, passing over a gravity tramway equipped with scales and dumped in two rows of six 250-ton ore and flux bins, having pneumatic gates. There are two 500-ton blast furnaces, doing semi-pyritic smelting, requiring about 7½% charges of Connellsville coke, charged by cars taking current from a third rail, with motors mounted on the axles, ore being dumped into 65-ton charge hoppers above each furnace. Each hopper is divided into 6 vertical sections, for half the height, each section having 2 gates, operated hydraulically by banks of levers in front of the furnace, permitting charging to any part of each furnace desired, as charging can be done at 10 different points independently. The discharge of the water-jacket piping is visible. The furnaces have 11' circular settlers, of 4' 6" height, with 18" linings, provided with cooling pipes. Under the furnace floor is a 4x7' concrete-lined slag tunnel, which also cares for drainage, slags being granulated and washed out by a jet of water into the river, the launder having a 45' fall. A 10' steel balloon flue leads from the furnaces to the 150' steel stack, of 14' diameter, set on a 30' concrete base.

The converter department, occupying an extension of the furnace building, has a 30-ton electric crane, of 40' span. There are 2 stands and six shells, with fusible disks, tilted electrically. Blister copper is cast into 110-kg. pigs, in tilting moulds carried on trucks, and converter bars, averaging 98.6% in copper tenor, are exported through Vera Cruz for refining at the Perth Amboy works, and electrolytic copper is marketed by L. Vogelstein & Co.

The power plant at the smelter has 5 Connorsville blowers of 10,000 cu. ft. capacity each, driven by 100-h. p. individual motors, for furnace blast, and a 40x42" Nordberg double blower, rope-driven by a 350-h. p. motor, for converter blast. There are 2 hydro-electric power plants and the cost of

electric power is figured at \$14 per h. p. year, exclusive of interest and insurance. The 1,000-h. p. hydro-electric installation at the smelter takes water from the Totoyoc or Xolat river, through a 3,600' flume, under a head of 150', the company having a government concession for 2,500 liters of water per second from that stream. The second hydro-electric power plant, on the Atexcaco river, 9 kilometers from the smelter, has about 3,000 h. p. available, partially developed by a 1,500-k. w. hydro-electric plant of 4 units, driven by Pelton wheels under a head of 1,340', delivering current at 6,000 volts, which is carried by double transmission lines, each of capacity adequate for the entire load, and stepped down to 440 volts in a transformer station at the smelter.

Production: 6,788,404 lbs. fine copper in 1902; 6,786,488 lbs. in 1903; 7,512,252 lbs. copper, 286,012 oz. silver and 3,057 oz. gold in 1905. The plant has a capacity of about 12,000,000 lbs. fine copper yearly, and was producing early 1911, at the rate of nearly or quite 1,000,000 lbs. fine copper monthly. Employs 2,500 men when working at capacity. The Teziutlán is the most promising and successful copper mine in southern Mexico, and management is considered good. Closed down since 1913, owing to Mexican troubles.

THARSIS-YORK CO.

MEXICO

Office: 178 Devonshire St., Boston, Mass. **Mine office:** Nacozari, Sonora, Mex. **Officers:** Herbert E. Young, v. p.; Thomas L. Pryor, sec.; Willard T. Carleton, treas.; preceding, with R. C. Heath, E. C. Williams, W. R. Sparrell and Wm. J. Maloney, directors.

Inc. April 29, 1909, in Delaware. **Cap.**, \$1,000,000; shares \$5 par; fully paid and nonassessable; issued 145,761. Boston Safe Deposit & Trust Co., registrar; State Street Trust Co., transfer agent, Boston, Mass. Annual meeting, second Wednesday in April.

Property: 12 claims, 1,015 acres, in 6 groups, 1 known as the Esquina, the main group, adjoining and lying between the Nacozari Consolidated Copper Co. and the Pilares mine of the Moctezuma Copper Co., with 1 shaft near the boundary of the latter. There are several attractive orebodies on the property, 3 partly developed.

The Esquina claims carry a dike-like mass of red-stained mineralized porphyry, similar to the outcrop of the Pilares orebody and on the same line of fracturing. This outcrop is 600' wide and extends across the claims. Like the Pilares it has a footwall of white rhyolitic breccia, a hanging wall of andesitic breccia, and the lode filling is an altered, sericitized, silicified and mineralized rhyolite, supposedly with copper and iron sulphides below water level.

Development: includes considerable prospect work, with shafts of 168' and 170', latter planned to be sunk to 300' with tunnels of 330', 107', 268' and 485', the mine having about 1,500' of workings. The company was driving a crosscut tunnel to cut the lode at 800' in and to drain the bottom of the 168' shaft and continue across the ore zone. This mineralized belt has thus far shown only bunches of ore, but is expected to develop ore similar to that of the Pilares mine.

Equipment: includes an 80-h. p. electric plant, with a 25-h. p. hoist and a 3-drill air compressor, and the company has the use of the shops of the Moctezuma Copper Co. Was forced to close down in 1914, owing to revolutionary disturbances, and has been idle since then. Property considered promising and development well planned.

THIRD VENTURE MINING CO.

COLORADO

W. A. Palmer, pres.-mgr., Leadville, Lake Co., Colo. Company owns a lease on the St. Louis mine which has a vein with complex sulphide ores

carrying copper-lead and zinc with gold-silver values. **Development:** by 1,450' tunnel. **Equipment:** electric with Leyner air compressor. Shipments reported to have been 25 tons a day during 1915.

THOMPSON-QUINCY CONSOLIDATED MINING CO. UTAH
Reorganized, 1915, as New Quincy Mining Company, which see.

THOR MINING CO. UTAH
Merged 1916 with Great Western Gold & Copper Co. and Mountain Lake Mining Co., with title of Great Western Mines Co., which see.

THOUSAND MEMBER GOLD MNG. ASSOCIATION. NEVADA
Described under Eastern Star Mining Co. (a gold brick).

THREE FORKS COPPER MINING CO. MONTANA
Copper City, Broadwater Co., Mont. Herbert G. Dunbar, supt., Three Forks, Mont. **Property:** a group of claims, at Copper City, 7 miles north of Three Forks. Operations resumed Feb., 1916, shaft deepened to 400' and vein shown to dip at 45°. As shaft is in lead material from top down, the lode is said to be 200' wide. Sulphide copper ore appears at 325', or 25' above water level. Company plans extensive prospecting on 400' level.

The ore is somewhat bismuthiferous, assaying up to 20% copper, with small gold and silver values. **Equipment:** includes steam power and an air compressor.

THREE KINGS SILVER MINING CO. UTAH
Mine at Park City, Utah. **Officers:** W. R. Elliott, pres., 616 Newhouse Bldg., Salt Lake City; E. S. Fisher, v. p.; P. J. McIntosh, sec.-treas.

Inc. May 13, 1914, in Utah. **Cap.**, \$100,000; shares 10c par; \$75,000 issued. Annual meeting June 8.

Property: Nelson, Mineola groups, 156 acres at Park City, showing usual geologic conditions of that camp, with fissures carrying silver-lead ore.

Development: 550' shaft, and 660' crosscut to limestone quartzite contact. Started a raise on 500' level, June, 1916.

THREE MAN MINING CO. ALASKA

Office: 31 Nassau St., New York. Mine office: Landlock, Prince William sound, Alaska. **Officers:** W. A. Dickey, pres.-gen. mgr.; H. C. Bryan, sec.; Duncan Edward, treas.; officers are the directors.

Inc. in New York. **Cap.**, \$1,000; shares \$100 par; fully issued. Is a close corporation, having only 3 shareholders.

Property: 43 claims, 10 patented, 812 acres, on tidewater, at Landlock bay, in the Valdez mining district of Alaska, giving the company nearly a mile along a great shear zone, only one end of which has been developed. The property, which has been under continuous development since 1903, is said to show 10 orebodies with a general E.-W. strike, occurring as fissure veins and as replacement deposits in shear zones in greenstone and slates. Orebodies reported to average 8' in width and to carry chalcopryrite ore in lenticular shoots averaging 10% copper. Low-grade ore is continuous, with rich ore found mainly on the footwall in paystreaks of 1 to 8' width, the largest shoot carrying massive chalcopryrite, assaying 10% copper, 1 oz. silver and 50 cts. gold per ton. The quantity of low-grade ore of concentrating tenor is very much greater than that of the smelting ore, but it is not available for present use.

Development: by tunnels, with 6,000' of workings. Six levels have been opened up on one orebody, giving a little over 600' of stoping depth on the ore. Another orebody has been opened up on 3 levels, giving about 500' of stoping depth. No stoping has been done, all ore produced having been extracted from levels and upraises. Company claims to have over 200,000 tons of 3% copper ore developed.

The mine has no machinery or power equipment, owing to development by tunnel, but has 14 buildings, with ore bunkers on a wharf at tide-water, connected by a short ground tram with the portal of the 5th level.

Production: about 600 tons of 10% ore were shipped, 1910, to the Tacoma smelter, yielding 120,000 lbs. fine copper, and over 3,000 tons of 10% ore yielding 610,000 lbs. fine copper in 1912. No shipments were made in 1913 and 1914, but in 1915, 300,000 lbs. copper was produced. Over 5,000 tons of 10% ore has been shipped. Total production to date is about 1,000,000 lbs. copper.

All shipments are made under name of W. A. Dickey and not by the company. Property considered promising

THREE R MINES.

ARIZONA

Patagonia, Santa Cruz Co., Ariz. R. R. Richardson and A. E. Crepin, owners. Mine was operated under option from April, 1912, to Oct., 1914, by N. L. Amster, 67 Milk St., Boston, Mass.

Property: 55 claims, about 1,000 acres, unpatented, on the westerly slope of the Patagonia mountains, 9 miles S. of Patagonia, at an elevation of 5,000'. Claims show alaskite with small, irregular areas of trachyte and rhyolite porphyries. **Ore:** occurs mainly along several lodes in a N.-S. shear zone as chalcocite in high-grade shoots and also disseminated low-grade values. The first orebody opened had stopes 70 to 80' long and 40' wide extending from the 50' to the 400' level; a second parallel ore-shoot, 100' from the first, was 23' wide and carried 8% ore.

Development: the Colossus tunnel, Evening Star tunnel and the 260' Colossus shaft, with total underground workings of 8,740'. Practically all the high-grade ore has been mined.

Equipment: includes a 50-h. p. Fairbanks-Morse oil-type hoist at the Colossus shaft, 40-h. p. and 60-h. p. oil-type engines operating individual belt-driven Sullivan air compressors.

Production: from April to Sept., 1913, 3,717,571 lbs. fine copper from 22,253 tons dry ore, averaging 9.1% copper. During 1914 about 100 tons of 12% copper ore was shipped daily.

Owing to litigation involving title between R. R. Richardson and Ben Heney, a former partner, the Amster lease was relinquished in 1914 and mine has since been idle.

Reported in May, 1916, to have been sold to the Harrison interests of Mexico for \$500,000. A mill is to be built to treat the low-grade ore.

THUNDER CREEK MINING CO.

WASHINGTON

Succeeded by Thunder Creek Transportation & Smelting Co., reorganized as Puget Sound, Chelan & Spokane Railway Co.

TICON MINING CO.

MONTANA

Controlled by Jas. A. Murray and the estate of Silas F. King, of Butte, Mont. **Property:** 1 fractional claim, about 2 acres, lying between the Bell and Wild Bill mines of the Anaconda and the Speculator and Edith May claims of the North Butte. Mine has a 700' incline shaft on the vein with levels opened at 300', 500', 550' and 600', said to show 4' of good ore in the bottom. Work was stopped by an injunction, secured by the Anaconda Copper Mining Co. in 1908.

TIFFANY MINING CO.

WISCONSIN

Address: care E. M. Wagner, Board of Trade, Chicago, Ill. Inc. 1916. **Cap.**, 50,000 shares; \$5 par.

Property: 160 acres, leasehold, known as the Tiffany mine, formerly owned by W. N. Tiffany, of Platteville, Wis. Property has been drilled and orebody proven. Claims lie east of the Wilson Mining Co. land.

Company is sinking shaft and constructing new mill and power plant.

Also reported to own Lucky Three mine and to hold leases on Horseshoe mine, 250 acres, at British Hollow and on Carter Coal Co.'s ground. Two drilling machines are working.

TIGER GOLD MINING CO.**ARIZONA**

Crown King, Ariz. See Oro Belle Development Co.

TIGRE MINING CO., S. A.**MEXICO**

See Lucky Tiger Combination Gold Mining Co.

TILLCUM DEVELOPMENT CO.**WASHINGTON**

Mine at Loomis, Okanogan Co., Wash. **Officers:** A. G. Elston, pres.; L. M. Deller, sec., both of Spokane, Wash.; F. G. Burnham, treas., Holyoke, Mass., at last accounts.

Is the successor of the Palmer Mountain Tunnel Co., inc. Aug., 1912, in Washington. **Cap.**, \$300,000; shares \$1 par; 50,000 preferred, 250,000 ordinary; issued, 30,000. Debentures, \$19,000, 6%, none issued.

Property: 15 claims, 250 acres, in the Loomis (Palmer Mt. or Wannacut Lake) district, 12 miles from the Great Northern railroad. The Summit claim shows a N. W.-S. E. fissure vein in diorite, averaging 8' wide and proven to depth of 115'.

Development: 3 tunnels, all on the vein, said to show ore of commercial grade in small amounts. Vein averages 5' between walls and gives indications of opening up an orebody of profitable size. Ore reported to average \$40 gold and 10 oz. silver with traces of copper. Company has 750-h. p. water power and 450-k. w. electric plant, transmission line and machinery, as well as 100-stamp mill and sawmill.

Company's original plan of tunneling Palmer Mountain appears to have been abandoned. This crosscut is reported to be 5,993' long. Presumably idle.

TILT COVE COPPER CO., LTD.**NEWFOUNDLAND**

Liquidated, 1913. Fully described Vol. XI, Copper Handbook.

TIMBER BUTTE MILLING CO.**MONTANA**

See Elm Orlu Mining Co.

TIMES MINING CO.**ARIZONA**

Oatman, Ariz. **Officers:** Z. J. Bergeron, pres.; W. E. Gray, v. p. and gen. mgr.; F. H. Lathrop, sec.; L. L. Wallace, treas.; preceding and L. R. Myers, directors.

Inc. 1915, in Ariz. **Cap.**, 1,500,000 shares; 25 cts. par; non-assessable, outstanding, 763,000 shares. Listed on San Francisco Stock Exchange.

Property: 12 claims, about 240 acres, in the Oatman district, said to show an almost vertical fissure vein occurring in granitic porphyry, andesite and rhyolite. Pay ore occurs in shoots and values are gold.

Development: includes shaft which it is planned to sink to 550'. Cross-cutting reported to have developed ore of both shipping and milling grades.

Equipment: includes a 40-h. p. hoist, 500' compressor, 80-h. p. engine, power drill sharpener, etc.

Operations began Nov. 1, 1915, and no reports are as yet available.

TINTIC CO.**UTAH**

Office: 734 Fifth Ave., New York. Mine office: Bingham Canyon, Salt Lake Co., Utah. **Officers:** Grant B. Schley, pres.; Kenneth B. Schley, v. p. and sec.; E. B. Schley, treas.; preceding with Frederick Strauss, Alfred Jaretzki, E. J. Berwind and D. Sullivan, directors.

Inc. 1903, in Maine. **Cap.**, \$2,700,000; shares \$3 par; issued \$2,091,249. Original cap., \$3,000,000; shares \$5 par, increased, 1906, to \$4,000,000, with an outstanding issue of \$3,500,000 stock in 700,000 shares of \$5 par, which was first reduced 1909, to \$2,100,000, by cutting the par value from \$5 to

\$3 and was immediately thereafter increased to present amount of \$2,700,000.

Bonds: \$500,000 authorized, at 6%, convertible into stock, of which \$422,900 is outstanding, this bond issue having been made to liquidate a floating debt. The company is a securities-holding corporation only, and is the parent company of the Tintic Mining & Development Co., Yampa Smelting Co. and West Mountain Tramway Co., properties of which are described under the titles of the 2 first-named companies.

TINTIC CENTRAL MINING & MILLING CO.

UTAH

Office: Provo, Utah. Mine address: T. T. Holdaway, Knightsville, Juab Co., Utah. Geo. M. Smoot, pres.; R. L. Anderberg, sec.-treas.

Inc. June, 1907, in Utah. **Cap.**, \$50,000; shares 5 cts. par; assessable; all issued. Three assessments yearly of one-half cent a share. Stock listed on Salt Lake Exchange.

Property: 20 claims, covering ground adjacent to the Iron Blossom in the Tintic district and supposedly carrying the extension of the ore-bearing fissures of that mine. These fissures are in limestone and are cut by porphyry, carrying irregular but very profitable orebodies.

Development: includes a 1,038' shaft with extensive workings on the 870', 920' and 1,020' levels. In 1914 about 542' of development was done on the 870' level, opening up a fissure of low-grade quartz and a streak of lead-silver ore, running parallel with the fissure. During 1915. work was confined to the 800' level.

Equipped with electric power and a compressor.

TINTIC COMBINATION MINING CO.

UTAH

Consolidated with Tintic Empire and Bullock companies to form United Tintic mines, now dead, the property passing to the Tintic Tunnel Co.

TINTIC DELMAR MINING CO.

UTAH

Office: Snow Bldg., Provo, Utah. Mine office: Eureka, Juab Co., Utah. **Officers:** Andrew Madsen, pres.; Wilford Giles, v. p.; Harvey Cluff, sec.-treas.

Inc. March 27, 1909, in Utah. **Cap.**, \$100,000; shares 10 cts. par.

Property: 27 claims, partly patented, in the North Tintic district, on which limestones occur with geologic conditions like those of Centennial Eureka mine. **Development:** by 350' tunnel, to be extended to crosscut formation, which shows stringers of quartz carrying ore said to give good assay values in silver, lead and copper where 2 large cross breaks intersect. A 114' winze encountered fissures opened by a drift, 100' below the tunnel, reported to show ore carrying 300 oz. silver, some gold, lead and a little copper in a shoot encased in low-grade ore. Active development work was resumed the latter part of November, 1915.

Property reported on favorably by C. A. Porter, of Utah Copper Co. and by Prof. J. E. Tallmadge. Is a promising mining gamble.

TINTIC MILLING CO.

UTAH

Provo, Utah. **Officers:** Jesse Knight, pres.; G. Dern, v. p.-mgr.; W. L. Mangum, sec.-treas.; T. P. Holt, gen. supt.

Inc. in Utah. **Cap.**, 1,000,000 shares, 3 cts. par; assessable. The purpose of the company is to provide a process and a mill for treating low-grade ores of the locality, hitherto found valueless. The mill employs the Holt-Dern and Knight-Christensen roasting furnaces and leaching. Operations began Mar., 1916, the mill treating 150 tons daily.

TINTIC MINING & DEVELOPMENT CO.

UTAH

Office: 734 Fifth Ave., New York. Mine office: Bingham Canyon, Salt Lake Co., Utah. **Officers:** Grant B. Schley, pres.; D. Sullivan, v. p.; W. J.

Walworth, sec.-treas.; E. B. Schley, asst. sec.-treas.; preceding with W. S. Gurnee, E. J. Berwind and Kenneth B. Schley, directors.

Inc. Aug., 1896, in West Virginia. **Cap.**, \$3,000,000; shares \$5 par; re-organized Jan., 1906, in Maine. **Cap.**, \$600,000; shares \$1 par. Is a subsidiary of the Tintic Co., and operated as a close corporation, making no public reports. Property was mortgaged 1910, for \$150,000, jointly with the Yampa Smelting Co. and West Mountain Tramway Co., to secure a \$675,000 issue of 8% gold bonds.

Property: includes claims near the Mammoth, Grand Central and Centennial-Eureka mines in the Tintic district, having a 300' shaft, with a power plant and air compressor. Heavy expenditures on this property gave indifferent results, and it has been idle several years.

Owns the Yampa mine and a group of 30 claims, 180 acres, on Carr fork, Bingham canyon, near the Ohio mine, and adjoining the Utah Consolidated on the N. and Boston Consolidated on the W. The claims carry a contact or bedded vein, of 10' minimum, 37' average and 200' maximum width, between a quartzite foot and limestone hanging, this being among the largest orebodies in the Bingham district, outside of the properties having disseminated porphyry ores. The deposit carries disseminated chalcocite, covellite and chalcopyrite, said to average 1 to 3% copper, 2 oz. silver and \$1.50 gold per ton, while smelter returns for 1909 were only about 1.7% copper, and probably under \$2 per ton in combined gold and silver values. The ore has a considerable excess of iron, rendering it valuable for smelting the highly silicious ores common to the Bingham district.

Development: is confined to the Yampa mine, a claim of less than 6 acres, entirely surrounded by the Utah Consolidated, and developed by 2 tunnels and a shaft. The Craig haulage tunnel, on the 1,200' level, is 3,248' long, intersecting the main vein at about 2,200' from the portal and connecting with the shaft at 2,448'. The upper or Yampa tunnel intersects the shaft at 475' and runs about 1,000' on the vein. The 1,700' shaft has 3 compartments, and is operated in 2 sections, 1 from the 400' level to surface, and 1 from that level to the 1,200' level, with balanced hoists. There are 12 levels opened, approximately 128' apart. Ore from the upper workings is sent down the shaft to the Craig tunnel, which has an electric haulage system, with 2 electric locomotives, taking trains of six 3-ton cars.

Equipment: includes an electric hoist, and a power plant near the portal of the Craig tunnel, with steam and electric motors. Power is furnished by the Telluride Power Co. There is a 35-drill Ingersoll-Rand 2-stage air compressor, direct-connected to a 200-h. p. motor. Ore is transported by the West Mountain Tramway Co., controlled by the Tintic Co., which has a 12,270' Leschen aerial tram, the longest in the district, of 700 tons daily rated capacity, having 600-ton ore bins at the upper terminal, connecting with the Yampa smelter at the lower end. The tram line saves about 25 cents per ton on cost of transporting ore.

Production: 4,069,886 lbs. fine copper in 1905; 4,699,765 lbs. in 1906; 5,001,255 lbs. in 1907; 5,412,850 lbs. in 1908; 6,500,000 lbs. in 1909; 6,172,243 lbs. in 1910; 6,157,175 lbs. in 1911; 1,666,000 lbs. copper, 45,680 oz. silver, and 2,699 oz. gold in 1915. Present output July, 1916, is about 200 tons ore per day, shipped to Garfield.

The Yampa mine, though small, is considered valuable and the management good.

TINTIC SMELTING CO.

UTAH

Company dissolved, 1915. Plant described in Vol. XI, Copper Handbook.

TINTIC STANDARD MINING CO.**UTAH**

Office: 422 Judge Bldg., Salt Lake City, Utah. Mine office: Eureka. Juab Co., Utah. **Officers:** E. J. Raddatz, pres., treas.-gen. mgr.; W. I. Snyder, v. p.; Geo. F. Busch, sec.; with A. N. Holdaway and Jas. Beveridge, directors; E. J. Raddatz, gen. mgr.

Inc. Oct. 2, 1907, in Utah. **Cap.**, \$1,000,000; shares \$1 par; assessable; issued, \$895,000. Has levied 19 assessments and is expected to levy 5 more of $\frac{1}{2}$ c each in 1916. Stock listed on Salt Lake Exchange. Annual meeting, Sept. 15th.

Property: 15 claims, patented, 300 acres, $2\frac{1}{2}$ miles from a railway, in the East Tintic district. Company plans acquiring 18 new claims, 300 acres, adjoining on the E. and W. The mine shows limestone and porphyry, carrying fissure veins with N.-S. strike and dip of 55° W., in limestone. Ore carries lead and copper values and is reported to assay from a trace to 50% lead, 1 to 105 oz. silver and \$1 to \$15 gold per ton. The management reports the main orebody as 200' wide.

Development: by an old incline shaft and a 1,200' shaft, with nearly a mile of workings. The 1,000' level, 925' E., had a promising showing but though the company did a large amount of work by shaft, drifts and diamond drill, it failed to locate a profitable orebody. In June, 1916, a 362' incline winze from the 1,200' level is reported down 60'. Management plans sinking to the 1,400' level.

Equipment: includes a 100-h. p. steam plant, with an 80-h. p. double-cylinder hoist, good for 1,500' depth, and a 3-drill air compressor. There are 5 buildings. Shipments from the 1,200' level said to have averaged 33% lead, 12 oz. silver, \$1.20 gold, 30% zinc.

TINTIC TUNNEL CO.**UTAH**

Office: Newhouse Bldg., Salt Lake City. **Officers:** L. A. Martin, mgr., with F. C. Richmond, D. R. Beebe, S. B. Smith, B. D. Lyon, H. J. Fitzgerald, R. J. Evans, D. F. Davis and C. E. Martin, directors. **Inc.** 1916, in Utah. **Cap.**, \$2,000,000.

The company plans to drain the E. and S. ends of the Tintic district by means of a 5-mile tunnel. It has absorbed the holdings of the United Tintic Mines, which was a consolidation of the Tintic Combination, the Tintic Empire and Bullock companies.

Properties: 28 claims, about 600 acres, in the Tintic district, near Eureka, said to show 4 parallel veins in an ore zone, or channel, that lies east of the Mammoth-Grand Central and the Centennial-Eureka ore zones. The claims are so located as to give approximately 2 miles on this vein system. **Ore:** carries copper, lead, silver and gold values. The veins vary greatly in width, but are generally of small size, the Bullock vein, in which work has been centered, showing a maximum width of about 4'. The ore in this vein runs high in iron and carries about \$20 per ton in copper, lead and silver.

Development: principally on the old Bullock property, includes shafts of 280', 215' and 102' and several old tunnels. **Equipment:** includes a small steam plant and hoist.

Plans drifting S. from shaft No. 2 in hopes of finding orebody at intersection of veins. Excess of water and high cost of mining below water level have caused decrease of production.

TINTIC ZINC CO.**UTAH**

Address: Newton A. Dunion, pres., 23 H. St., Salt Lake City; W. A. Black, sec. **Inc.** 1913, in Utah. **Cap.**, \$1,000,000; shares \$1 par. Listed in Salt Lake City.

Property: 270 acres in the Tintic mining district, said to show zinc-lead-silver ore.

TIP TOP CONSOLIDATED MINING CO. ARIZONA

Prescott, Ariz. **Officers:** C. W. Davis, pres.-treas.; A. F. Muter, v. p.; F. L. Haworth, sec., with W. W. Elliott and D. E. Nelson, directors.

Inc. 1916, in Ariz. **Cap.**, \$375,000. Company was organized to operate the old Tip Top silver mine, about 25 miles south of Prescott, credited with a production of several million dollars, 1875-85, under Hagen, Head and Hearst.

The mine was originally opened to the 800' level; the present management has reopened it to the 200' level. The dumps, stope filling and low-grade ore left in the mine will be worked for silver and for the tungsten which was formerly passed over. It is reported that there are 120,000 tons in the dumps that will assay $1\frac{1}{2}\%$ tungstic acid, and over \$5.20 per ton silver, largely as chloride.

TIP TOP COPPER CO. ARIZONA

Idle. **Office:** Commonwealth Bldg., Philadelphia, Pa. Mine office: Helvetia, Pima Co., Ariz. **Geo. A. Aman, pres.;** S. Charles Pratt, v. p. and gen. mgr., at last accounts. **Inc.** 1902, in Arizona. **Cap.**, \$1,150,000; shares \$1 par.

Property: 24 claims, 400 acres, also known as the Little Helvetia mine, including the Tip Top and Copper Duke claims, also a 100-acre mill site, about 2 miles from Helvetia, shows 3 veins, averaging 14' width. These veins have extensive bodies of soft black sulphide ore in altered clayey limestone and porphyry, reported to give average assays of 5% copper and 1 oz. silver per ton, with a trace of gold.

Development: mainly by tunnel with about 4,000' of workings; also the usual prospect shafts and tunnels. **Equipment:** includes gasoline power. Was bonded 1907, to Guggenheim interests, for \$250,000, with cash payment of \$75,000, but both parties to bargain were dissatisfied, and property reverted to owners.

TIP TOP MINE ONTARIO

Col. S. W. Ray, owner, Port Arthur, Ont. Mine near Kashaboiwe, Rainy River district, Ont. **Property:** 4 claims, freehold, 336 acres, locations K62, K63, K64 and K65, 9 miles by trail S. W. of Kashaboiwe station, Canadian Northern railway. The claims are near Round Lake, in Moss Twp., and show schist, greenstone and quartz porphyry of Keewatin age, with folded quartzite cut by quartz porphyry dikes. The ore occurs disseminated in dikes of flesh-colored felsite and quartz porphyry. There are several lenses of this chalcopryite and pyrite ore, stoped for 8 to 10' wide and 40' long, giving average assays of 7% copper, 5 to 12 oz. silver and \$1 to \$2 gold per ton.

Development: by a main incline shaft, dipping 70° N. of 208' depth, with about 760' of workings, on 4 levels, about 190' of drifting on each level. This work is estimated to show 45,000 tons of ore, of 4 to 6% copper, on a vein ranging up to 60' width.

Equipment: includes a 100-h. p. steam plant, with 30-h. p. hoists, and a 4-drill Ingersoll-Sergeant air compressor. See Ontario Bureau of Mines Report, 1911, p. 209.

TIRO GENERAL DE CHARCAS MINE MEXICO

Mine address: Charcas, San Luis Potosi, Mex. Owned by Cia. Metalurgica Nacional de Matehuala, controlled by the American Smelting & Refining Co. Mine was formerly owned by the Cia. Minera del Tiro General, S. A.

Property: 72 pertenencias, 178 acres, with 46-acre mill site, and 50-acre

farm, in the Venado district. The mine, an *antigua*, discovered 1583, was worked on a small scale for 3 centuries, and in a larger way since 1859. It shows 2 main ore zones, carrying fissure veins in porphyry, near a limestone contact, with a generally E.-W. strike and dip of about 70°. The N. vein, of 3 to 8 meters width, with known length of 500 meters, is opened to depth of 1,361', showing chalcopyrite and sphalerite estimated by the management to average 2% zinc, 430 grams silver and 8 grams gold per metric ton. There are 9 tunnels, 4 reported by the management to be of 656' each, and 5 of 1,312' each, the mine having 13,123' of workings. The mine and works, when operating normally, employ about 1,200 men.

Equipment: includes a 700-h. p. steam plant, with hoists of 100-h. p. and 175-h. p. and a 10-drill air compressor, and some use is made of malacates at the shallower shafts. Buildings include an engine house, combination smithy and carpenter shop, machine shop, general store, office, laboratory, warehouses, a hospital, 5 dwellings for officials, and accommodations for 40 Mexican families. There is a 10-stamp mill and a 150-ton concentrator, having Blake crushers and 5 sets of rolls, with trommels and other necessary equipment. The mill has 10 Sutton, Steele & Steele pneumatic dry concentrators, treating sulphide ores and giving a preliminary lead concentrate, cut out from the final zinc concentrate, the latter being a 45% zinc product, secured largely from rosin jack.

See American Smelting & Refining Co. and Matehuala, Cia. Met. Nac. de.

TIRO GENERAL; CIA. MINERA DEL.

MEXICO

Sold property to the Cia. Metalúrgica Nacional de Matehuala, San Luis Potosi, Mex., which is controlled by the American Smelting & Refining Co.

TISDALE GOLD MINING CO., LTD.

ONTARIO

Inc. Oct., 1910, in Ont. Cap., \$500,000; shares \$5 par. See Dobie Mines, Ltd.

TODD MINING CO., R. B.

NEVADA

Office: 203 Nixon Bldg., Reno, Nevada. Lewis E. Aubury, H. F. Norcross, Robt. W. Dunlap, M. H. Jacobs and R. B. Todd, directors.

Inc. Jan. 12, 1916, in Nev. Cap., \$250,000; \$1 par; \$225,000 issued. Is the successor of the Luning Gold Mines Syndicate.

Property: 5 claims and option on 13 more of the L. G. M. Co., 5 miles N. E. of Luning, said to show 12 veins carrying gold and copper ores. The mineralized zone is 300' wide and a mile long.

Development: 300' Robert shaft, on vein and 500' Cevita tunnel. Is reported shipping gold ore from the 12' Hahn vein on a granite contact. See Idaho Luning Co.

TOGO MINING & SMELTING CO.

WASHINGTON

Reorganized under name of Consolidated Copper Co. and described under that title.

TOLTEC MINE

MICHIGAN

Idle many years. Office: care J. M. Longyear, Marquette, Mich. Owners, Gogebic & Ontonagon Land Co. and Galen L. Stone.

Mine at Greenland, Ontonagon Co., Mich., 960 acres, carries the underlay of the Evergreen belt and the Calico and adjacent beds of the Michigan. **Production:** 1851-60, was 413,443 lbs. fine copper. Some diamond drilling was done, 1908.

TOM MOORE GROUP

UTAH

Office: 159 South State St., Salt Lake City, Utah. Mine office: Bingham Canyon, Salt Lake Co., Utah. A. M. Surbaugh and Thos. Moore Surbaugh, owners.

Property: 39 claims, 22 patented, 715 acres, with direct rail connec-

tion, in the N. E. part of the Bingham camp. **Development:** by 16 shallow shafts and short tunnels, principal work being by the Highline tunnel, with another tunnel driving at lower depth. The mine carries gold and silver-bearing lead and copper ores, with small quantities of native copper, in quartz. Owners do not care to have output or other details made public.

TOM REED GOLD MINING CO.

ARIZONA

Office: 503 Central Bldg., Pasadena, Calif. Mine office: Oatman, Ariz. **Officers:** W. P. Moerdyke, pres.; C. Mushrush, v. p.; E. M. Rabb, supt.; Ellis Mallery, cons. geologist.

Inc. 1907, in Arizona. **Cap.**, \$1,000,000; shares \$1 par; outstanding 909,555. No bond issues, mortgages or indebtedness. Listed on Los Angeles Stock Exchange. In treasury March 30, 1916, 90,455 and about \$200,000 cash.

Dividends: aggregate \$2,555,934. The first dividend of 6% was paid in 1908. In 1910 the present 20-stamp mill was built and a second dividend of 3% was paid. Since then dividends have averaged 4½% per month for five years.

History: the mine was discovered in 1900, 20 years after the discovery of the Gold Roads mine nearby. Early development proved unsuccessful and in 1904 the mine was sold for \$75,000, one-tenth cash. The purchasers failed to meet payments and the property passed to the Title Insurance & Trust Co., of Los Angeles, representing creditors, for \$45,000. The present company was formed and deeper development undertaken. The Ben Harrison shaft was then 150' deep and the Tom Reed 90'. The first shoot of commercial ore was encountered on the 150' level.

Property: three distinct groups of claims, 437½ acres. Also owns water rights and mill sites in Cottonwood Canyon. Thus far most of production has been from the Tom Reed group, but development on the Black Eagle group promises early production.

The claims cover the outcrop of the big Tom Reed lode, one of the typical quartz-adularia veins of the district, which has been reopened and crushed by strike faulting with enrichment of the primary ore. The ore-shoots persist to the deepest level developed (1,200') with no change in size or value. **Ore:** is gold bearing; average value about \$24 per ton.

Development: to a depth of nearly 1,400', with total workings of about 30,000'.

Equipment: working shaft has a 150-h. p. electric hoist. Power is supplied by the Desert Light & Power Co., Kingman. Also includes 5 other mine hoists and compressors with capacity of 2,000 cu. ft. The mill has stamps, tube-mills and cyanide machinery. Mine has machine shops, supply store, hospital, recreation hall, etc. Present equipment cost more than \$300,000.

Production: for year ending March 31, 1915, company mined and milled 46,995 tons; average value \$21.23 per ton. Mining, milling, administration and depreciation charges totaled \$9.21, leaving a profit of \$12.11 per ton.

Property is a good one, and equipment complete.

TOM REED, JR. MINING CO.

ARIZONA

Office: Citizens Bank Bldg., Los Angeles, Calif. Mine office: Oatman, Ariz. **Officers:** E. S. Moody, pres.; J. L. Mason, v. p.; C. S. Baxter, sec.; with H. G. Peabody and W. S. Morse, directors.

Inc. 1909, in Ariz. **Cap.**, \$1,000,000; shares \$1 par; non-assessable; issued 786,226 shares. Annual meeting, in Nov. Listed on Los Angeles Stock Exchange.

Property: 6 unpatented claims, about 120 acres, in the San Francisco district, Mohave Co., ½ mile from Oatman. The fissure vein occurs in

andesite-rhyolite and varies in width from 4' to 12'. Pay ore occurs in shoots, and ore developed is said to average from \$4 to \$15 per ton in gold.

Development: by inclined shaft, 300' deep. Lateral workings amount to 330'.

Equipment: includes 2 hoists, a 344' compressor, with gasoline power, shaft house, etc. A larger hoist has been provided to sink a new shaft to 500'. Is a prospect.

TOMBOY GOLD MINES CO., LTD.

COLORADO

Under management of Exploration Co., Ltd., of London.

Offices: 11 Cornhill, London, E. C., Eng., and 61 Broadway, New York. Mine office: Telluride, Colo. **Officers:** Lord Arthur Butler (chairman), Marquis d'Hautpoul, Hon. A. G. Brand, and J. H. M. Shaw, directors; P. L. Foster, cons. engr.; D. A. Herron, gen. mgr.; T. Dundas Pillans, sec., 24 Lombard St., London, E. C.

Inc. June 7, 1899, in England. **Cap.**, 350,000 shares; £1 par, issued 310,000 shares.

Total revenue for year ending June 30, 1915, \$1,050,870; profit, \$396,223; with balance of \$230,000 there was available \$626,223, of which \$226,000 was paid in dividends. After allowing for depreciation, income tax, etc., the balance was \$110,000.

Property: included, July, 1915, 76 claims; others have since been added. Original holdings were the claims acquired from the old Tomboy Gold Mines Co. of W. Va., also claims carrying a parallel vein, known as the Argentine. Later company bought the claims containing the Montana vein and its northern extension from the Nevada Tunnel Co.

A cyanide mill and concentrating plant have been built and paid for out of profits, as well as additions and improvements to the plant of the Tomboy Tramway and Tunnel Co.

Geology: the veins in the Telluride district are filled fissures, 2½' to 4' in width, larger lodes sometimes appearing as a number of parallel plates of filled veins separated by sheets of altered rock. Country rock is andesite, rhyolite and San Juan tuff, with underlying sedimentaries in which the existence of the veins has not been proven. Principal metallic minerals are gold, pyrite, galena, zincblende, and chalcopryite. Ores contain 2 to 3% sulphides, and yield about \$6 in gold and a few ounces of silver per ton. For geology of the district see U. S. G. S. Geologic Folio No. 57, also Lindgren's "Mineral Deposits."

Development: the Tomboy and Montana properties to 2,400' depth, and on the Argentine to 2,200'. **Ore reserves:** Argentine, 185,000 tons; Montana, 200,000 tons, June 30, 1915.

Equipment: 80-stamp mill, concentrating plant and cyanide mill, all arranged practically under one roof, have a daily capacity of 400 to 450 tons.

Milling for the year ending June 30, 1915, gave an average of \$7.05 per ton, 42% being recovered as bullion and the rest as concentrates.

Production: for year ending June 30, 1915, 145,857 dry tons of ore, which yielded in bullion, \$414,114; in concentrates, \$537,494, and in cyanide bullion from tails, \$75,915.

Costs: were \$4.49 per ton; mining and development, \$2.44; milling \$0.53; concentration, including shipping, \$0.48; water supply, \$0.09; assay office, \$0.03; cyaniding, \$0.45; general expense, \$0.24; taxes and insurance, \$0.23.

TOMBOY GROUP OF MINES

ARIZONA

Address: Bruce Hobbs, sec., 29 Otis St., Boston, Mass. **Property:** 7 claims, 150 acres, in the Castle Creek district of the Bradshaw mountains.

about 13 miles from Wickenburg, formerly owned by the Arizona Mines Co., shows an orebody up to 50' in width, traced by trenching for nearly 1 mile.

Development: includes several short tunnels, and a 250' shaft, showing a vein carrying about 3' of disseminated malachite, ore being exclusively oxidized to depth opened. Mine as a whole has about a quarter-mile of workings. **Equipment:** includes an 18-h. p. hoist, good for 600' depth, and necessary mine buildings.

A full report on the property was made Oct., 1910, by Mark Bradley, mg. engr. Presumably idle.

TOMMY BURNS GOLD MINES, LTD.

NOVA SCOTIA

Controlled and operated by Tommy Burns Gold Mining Co., which see. **Property:** 134 acres, ½ mile from Brookfield, the nearest R. R. station, said to show a fissure vein, 2½-3½' wide, running E.-W., with dip 30°, and traceable at surface for 900'.

Development: by 108' shaft, sunk on the vein and drifts on the 50' and 100' levels. **Equipment:** includes a 5-stamp mill, boiler, hoist and pump. A pleasing prospect.

According to T. A. Rickard, who made a report on the gold deposits of Nova Scotia for the provincial government, none of the Nova Scotia gold deposits can be relied upon to carry their values to any great depth.

TOMMY BURNS GOLD MINING CO.

ONTARIO

Office: F. W. Joy, sec.-treas., 1 Wall St., New York. **Officers:** L. W. Myers, pres.; E. Schmid, v. p., with T. B. Pope and J. Fairbrother, directors; P. H. Moore, cons. engr., Porcupine-Bridgewater, Can.

Inc. in Del. Cap., \$3,600,000; shares \$1 par; Registrar & Transfer Co., 32 Nassau St., New York, registrar and transfer office.

Owens all but 5 shares of stock of the Tommy Burns Gold Mines, Ltd. Balance sheet of Jan. 31, 1916, shows no other assets besides this stock and \$5,000 cash. Balance sheet of the same date for the Tommy Burns Gold Mines, Ltd., gives this stock a value of \$99,995 and shows \$4,000 cash and total development expense of \$5,645.

See Tommy Burns Gold Mines, Ltd.

TONOPAH BELMONT DEVELOPMENT CO.

NEVADA

Office: 501 Bullitt Bldg., Philadelphia, Pa. Mine office: Tonopah. **Officers:** C. A. Heller, pres.; W. M. Potts, v. p.; K. Kitto, sec. and treas.; R. G. Wilson, asst. sec.-treas.; C. Berkeley Taylor, gen. counsel; C. Ducheneau, aud.; J. C. Fraley, H. C. Brougher, M. B. Cutter, C. A. Heller, R. G. Park, W. M. Potts, S. D. Sinkler, T. W. Synnott, C. B. Taylor, directors; F. Bradshaw, gen. mgr.; G. H. Garrey, cons. geol. T. F. M. Fitzgerald, supt. of mine; A. H. Jones, supt. of mills; F. W. Holler, supt. of Surf Inlet companies, Surf Inlet, B. C.

Inc. 1902, in N. J. Cap., \$1,000,000; shares \$1 par; increased, 1906, to \$2,000,000, but \$500,000 was later cancelled, leaving \$1,500,000 outstanding. Stock transferred at company's main office. Fourth Street Nat'l Bank, Philadelphia, registrar. Annual meeting, last Tues. in May, at Camden, N. J. Listed on Philadelphia, San Francisco and Salt Lake exchanges and traded in on New York and Boston curbs.

Comparative General Balance Sheet: Tonopah Belmont Dev. Co. and Belmont Milling Co., year ending March 1:

Assets—

Ore On

	Property Invest's	Def.Chgs.	Supplies	Hand	Current	Total
1916 . . .	\$1,563,189	\$27,500	\$360,888(a)	\$188,813	\$1,473,522	\$3,722,411
1915 . . .	2,141,473	29,453	100,040(b)	157,735	1,425,441	3,993,938

(a) \$351,325 advanced for development of Surf Inlet and other mining properties, under purchase options. (b) \$74,750 advanced for development of Surf Inlet mine.

Liabilities—

	Capital Stock	Current	Res. For Deprec.	Special Reserve	Surplus	Total
1916.....	\$1,500,000	\$137,670	\$2,084,741	\$3,722,411
1915.....	1,500,000	96,176	\$217,749	\$216,727	1,963,286	3,993,938

Comparative Operating Account: year ending March 1:

	Metal Receipts	Oper. Expense	Oper. Profit	Total Income	Deduct's (a)	Surplus	P. & L. Surplus
1916	\$2,160,522	\$1,184,865	\$ 975,657	\$1,047,768	\$ 796,756	\$251,012	\$2,084,741

(a) Includes dividends; \$750,016, and \$1,462,504. (b) Deficit.

Dividends: 20c in 1906; 20c in 1907; none in 1908-09; 15c in 1910; 90c in 1911; \$1 in 1912; \$1.10 in 1913; \$1.10 in 1914; \$0.50 in 1915; \$0.25 first half of 1916.

Properties: 11 claims, 161.5 acres, adjoining Montana Tonopah and Tonopah Mining on the east, at Tonopah, Nev.; the Surf Inlet Gold Mines, on Princess Royal Island, B. C.; option on this property was exercised Dec. 31, 1915; the partially developed Bull Moose gold mine, near Carrara, Nye Co., Nev., taken under a 2-year option, reported in Sept. 1916, that option had been given up; the Biddlecome mine, near the Bull Moose, taken under a long-term option.

Reported in April, 1915, that an option had been taken on the Potosi gold mine of the Tunkey Mining Co., in Nicaragua, 20 miles from the Tonopah Mining Co.'s Eden mine. If the option is exercised it is proposed to organize a \$2,000,000 company, of which Tonopah-Belmont will own 51% and the Tunkey Mining Co. 49%. Reported in May, 1916, that an option had been taken on the Emma gold mine, in the Cone mining district, Dolores Co., Colo.

Geology: (at Tonopah) the district is made up of a thick series of rhyolitic and andesitic rocks, which is faulted in a very intricate manner, together with the accompanying veins. The deposits are quartz veins, in part filled and in part replacement, intersecting the earlier andesite and to some extent entering into the underlying rhyolite. Principal ore minerals are argentite and polybasite, with small amounts of pyrite, chalcopyrite, galena, zinblend and gold. Veins vary in width from 3' to 25'. The principal producer of the Tonopah Belmont has been the Belmont vein, cut off near 1,500' depth by the Mizpah fault; the veins now producing are not as productive as it was.

Development: by 3-compartment vertical shafts. The Desert Queen workings have a 1,127' shaft and 36,758' of workings, March 1, 1916. The Belmont workings have a main shaft, 1,718' deep and 101,840' of workings. New work amounted to 21,362' in fiscal year ending March 1, 1916, compared with 24,630' during the previous year.

Ore reserves: totaled 142,164 tons, March 1, 1916, compared with 295,084 tons the previous year.

Equipment: includes the old reduction mill at Millers, Nev., operated as a custom mill and the 60-stamp mill of the Belmont Milling Co., at Tonopah; operations started July, 1912. For a detailed description of this plant see Trans. A. I. M. E., August, 1915.

Production: Tonopah plant, year ending March 1:

	Tons Milled	Value p. Ton	Oper. Costs Mine	Costs p. T. Mill	Extr. %	Profit p. Ton	Production—Oz.	
							Gold	Silver
1916	165,157	\$14.13	\$3.92	\$2.68	92.97	\$ 6.59	31,112	2,968,565
1915	181,424	16.74	4.02	2.56	92.99	40,591	3,714,862
1914	172,398	21.08	4.35	3.05	94.45	8.83	44,465	4,251,746
1913	60,359	24.21	4.35	3.66	94.43	12.42	38,371	3,826,399
1912	87,349	20.84	4.85	3.36	14.31	45,069	4,535,762

To offset the decreasing production of the original claims at Tonopah, the company has been branching out, acquiring new properties, thus making the company a permanent organization independent of the life of the Tonopah mines.

TONOPAH BONANZA MINING CO.

NEVADA

Control of this property was acquired, 1915, by the Greenwater Copper Mines and Smelter Co., which see.

Property: 15 unpatented claims, 380 acres, at Tonopah, Nev., increased 1916, by acquisition of the Desert King Mining Co.'s property, 40 acres, adjoining on the S. E. The claims which lie in the western section of the district, had a 2-compartment shaft, 1,100' deep, when new company took over the property and some crosscutting had been done on the 600' level, but no commercial ore had been developed. The new management is sinking to the 1,700' level, 1,470' deep, May, 1916, where lateral development work will be done. **Equipment:** includes a small compressor, and electric power.

TONOPAH EXTENSION MINING CO.

NEVADA

Office: 30 Church St., New York. Mine office: Tonopah, Nev. **Officers:** M. R. Ward, pres.; S. A. Brown, v. p.; L. E. Marsden, sec.-treas.; W. G. Benham, asst. sec.-treas.; John G. Kirchen, gen. mgr., Tonopah; S. A. Brown, B. H. Campbell, J. G. Kirchen, W. R. Rose, M. A. Ward, directors.

Inc. 1902, in Ariz. **Cap.**, 2,000,000 shares; \$1 par; non-assessable; outstanding, 1,272,801. Original capital of 1,000,000 shares was increased June, 1915, to 2,000,000 and issue authorized of 156,294 shares for acquiring Tonopah Merger and 173,074 shares for Tonopah Victor Co. U. S. Corporation Co., 34 Nassau St., New York, transfer office and registrar. Annual meeting, in May. Listed on San Francisco and Nevada Stock Exchanges and on the New York Curb.

Comparative General Balance Sheet: year ending March 31:

Assets—						
	Property & Equip.	Supplies	Invest's	Bullion & Cash	Other Current	Total
1916.....	\$1,636,283	\$97,892	\$209,470	\$206,507	\$156,387	\$2,306,539
1915.....	1,217,246	79,048	130,462	190,606	128,208	1,745,570
Liabilities—						
	Cap. Stock	Current	Surplus	Total		
1916.....	\$1,272,801	\$194,126(a)	\$839,612	\$2,306,539		
1915.....	943,433	134,450(b)	667,687	1,745,570		

(a) Includes dividend No. 18, payable April 1, 1916, \$127,267.40. (b) Includes dividend No. 14, payable April 1, 1915, \$70,756.54.

Comparative Profit and Loss Statement: year ending March 31:

	Receipts Metal	Total Income	Oper'g Expenses	Admin. & Gen.	Treat. & Trans.	Profit For Year
1916.....	\$1,532,900	\$1,555,639	\$859,089	\$66,017	\$46,112	\$584,421
1915.....	1,289,817	1,341,620	662,269	50,140	32,319	596,892

Dividends: (calendar year) 15% in 1905; 15% in 1906; 5% in 1912; 15% in 1913; 20% in 1914; 32½% in 1915; 25% to July, 1916.

Total dividends to 1916, \$1,082,640. Present rate, 10c per share quarterly, increased to 15%, July 1, 1916.

During the fiscal year 1910-11 the company acquired the properties of the Red Rock Cons. Mining Co., McKane Mining Co. and Pittsburg Tonopah Extension Mining Co. and in June, 1915, properties of the Tonopah Merger Mining Co. and the Tonopah Victor Mining Co.

Property: 45 claims, 6 unpatented, 581 acres in the Tonopah mining district, Nye and Esmeralda counties, Nev., adjoins Tonopah Mining Co. on the W. and West End Cons. Mining Co. on the N.

Geology: ore carries silver and gold in quartz veins in rhyolite, trachyte and volcanic breccia. The ore minerals are argentite, stephanite, polybasite, some proustite and pyrargyrite. There are 3 main veins, from N. to S., the North Merger, O. K. and Murray, of which the Murray is the most important, showing a stoping width of 14'. The veins strike N. 45° W., S. 70° W., and N. 70° W., with dip 20 to 70°, growing steeper with depth. The orebodies occur in shoots ranging in width from 3-25', with a maximum length of 450' for any single shoot. Ore treated during year ending March 31, 1916, assayed 24.93 oz. silver and 0.24 oz. gold per ton, a decrease from previous year of 3.20 oz. silver and 0.024 oz. gold per ton.

Development: by 2 vertical main working shafts, viz., the Extension No. 2, 950', and the Victor, 1,540' deep; greatest depth of workings, 1,540'. Operations were temporarily discontinued at No. 1 shaft in Jan., 1916, on account of the remaining ore, so far as exposed, being very low-grade.

New work amounted to 13,967' in fiscal year ending March 31, 1916, compared with 12,651' in 1915. Total underground workings, Feb., 1916, 112,000'. Ore is extracted by overhead stoping and subsequent waste filling.

Developments in 1916 have proven a new 5' vein of \$20 ore, between the Merger and O. K. veins. Stoping is in progress in 3 veins, the O. K. with 6', the North Merger with 10' and the Murray with 14' of ore.

Ore reserves: no attempt is made to block out ore and calculate reserves, but conditions are so favorable that the mill capacity was recently increased 30%.

Equipment: at the mine includes a 150-h. p. Hendrie-Bolthoff hoist, 150-h. p. Nordberg hoist, Dean duplex and Aldrich quintuplex pumps, 2 Chicago Pneumatic Tool Co.'s compressors of 1,700' capacity, and tramway from mine to mill. All machinery is electrically driven. The 50-stamp mill, cyanide plant and concentrator have a daily capacity of 400 tons.

Production: (year ending March 31)

	Tons	Value	Extr.	Oper.	Cost, p. Ton	Metal Sold—Oz.		
	Milled	Per Ton	%	Mine	Mill	Total	Silver	Gold
1916	91,981	\$18.038	92.39	\$4.61	\$4.48	\$9.59	2,106,519	20,576
1915	71,882	19.966	89.57	5.19	3.75	9.39	1,790,032	17,585

Production for the first 5 months of 1916 was 869,115 oz. silver, produced at a cost of 22.2c (after crediting gold values). The new 10-stamp unit at the mill is expected to increase earnings.

The company occupies the premier position in the Tonopah district. Mine development at depth has proven the values to be consistent; the Murray vein in particular has shown up exceptionally well; ore reserves are larger than any other Tonopah mine and the company has a large area

of undeveloped territory. Under the present capable management the outlook is bright.

TONOPAH MERGER MINING CO. NEVADA

Consolidated with Tonopah Extension Mining Co., which see.

TONOPAH MIDWAY MINING CO. NEVADA

Tonopah, Nev. **Officers:** H. C. Brougher, pres.-mgr.; R. P. Stenson, v. p.; E. J. Erickson, sec.-treas.; T. Loddie, W. Brougher, R. B. Govan, W. J. Douglass, directors; W. J. Douglass, supt.

Inc. in Ariz; reorganized, 1915, in Nevada. **Cap.**, 1,500,000 shares; \$1 par; assessable; outstanding, 1,132,096. Annual meeting, in February. Listed on San Francisco and Salt Lake Stock Exchanges.

Property: 5 patented claims, 50.58 acres, in Tonopah district, said to show silver and gold ore. The quartz vein in trachyte dips 45° and pay ore occurs in shoots. **Development:** by 2 shafts, 1,350' and 835' deep.

Operating expenses for year ending February, 1916, were \$25,788 and earnings \$11,088, all received as royalties. Developing.

TONOPAH MINING CO. OF NEVADA NEVADA

Office: 572 Bullitt Bldg., Philadelphia, Pa. Mine office: Tonopah, Nevada. **Officers:** J. S. Austin, pres.; J. Harvey Whiteman, v. p. and gen. counsel; J. E. Spurr, v. p. and advising engr.; C. A. Higbie, sec.-treas.; W. W. Charles, comptroller; with J. S. Austin, C. A. Daniel, C. R. Miller, C. A. Higbie, H. D. Moore, J. H. Whiteman, S. Bell, Jr., directors. W. H. Blackburn, mine supt.; F. F. Heydenfeldt, mill supt.

Inc. 1901, in Delaware. **Cap.**, 1,000,000 shares; \$1 par; all outstanding. Annual meeting, May. Transfer office: 572 Bullitt Bldg., Philadelphia, Pa. Registrar: Fourth Street National Bank, Philadelphia, Pa. Listed on Philadelphia and San Francisco Stock Exchanges and on New York and Boston Curbs.

Comparative General Balance Sheet: year to March 1:

Assets—

1915.....	1,000,000	50,000	64,760	3,649,534	4,764,294

Comparative Income Account: year to March 1, Tonopah Mining Co. and Desert Power & Mill Co.:

	Metal Receipts	Oper. Expense	Net Income	Income D. P. & M. Co.	Divid's & Deprec'n	P. & L. Surplus
1916.....	\$1,831,589	\$1,380,693(a)	\$783,064	\$150,629	\$1,089,678	\$3,704,259
1915.....		1,628,648(b)	925,557	124,567	1,165,234	3,860,244

Dividends: 1905, 75% of capital stock; 1906 and 1907, 120%; 1908, 50%; 1909, 130%; 1910, 150%; 1911 and 1912, 160%; 1913, 145%; 1914, 100%; 1915, 90%; total dividends paid to March, 1916, amounted to \$13,300,000. Present rate 60c per share, payable quarterly.

Property: 9 patented claims in Tonopah, Nye Co., adjoins Tonopah Extension on the east and north and Jim Butler Tonopah Mining Co. on the north. Also owns the entire stock, \$400,000, of the Desert Power & Mill Co., and controlling interest in the Tonopah & Goldfield R. R. Co., Eden Mining Co., and Tonopah Placers Co. Acquired a 2-year option on

the property of the Mizpah Extension Co., and began development work on Jan. 1, 1915. The Eden Mining Co., which see, is a Nicaragua company. Also owns \$30,000 capital stock of the Esmeralda Power Co. The company has recently acquired property in the Schist and Flin Flon lakes district in Ontario and is doing considerable diamond drill work there.

For geology of the Tonopah district, see Tonopah-Belmont Mining Co. and Tonopah Extension.

Development: to a depth of 700', chiefly through the Mizpah, Desert Queen, Silver Top and Red Plume shafts. The Mizpah shaft is bottomed at 1,500' but lateral development has not been done at depth. Yearly development work during the past few years has been at the rate of about 17,000'. Total workings aggregate 40 miles, mainly above the 650' level.

Ore Reserves: est. March 1:

	Tonnage	Value		Tonnage	Value
1913.....	200,702	\$3,062,661	1915.....	102,056	1,525,731
1914.....	172,761	2,475,795	1916.....	53,493	798,789

Mill: 100-stamp mill at Millers, Nev., 19 miles from the mine, operated under name of Desert Power & Mill Co., employs the concentrating, leaching and sliming processes. Recovery of gross contents in year ending Feb. 29, 1916, was 94% gold and 90.9% silver, a decrease of 1% gold and 0.3% silver from previous year. Recovery based on net smelter returns was 90.3%, the highest net recovery for the mill, compared with 89% the previous year. In May, 1916, recovery was 13½ oz. silver and \$3.25 gold per ton, a low record compared with 19½ oz. silver and \$4 gold per ton for the first quarter of 1916.

Production: year to March 1:

	Tons Treated	Value p. Ton	Costs Per Ton				Metal Loss	Profit p. Ton
			Mine	Mill	M'k't'g	Total		
1916	136,246	\$13.66	\$3.87	\$2.94	\$0.97	\$7.78	\$1.11	\$4.77
1915	143,432	16.25	4.40	2.96	1.15	8.51	1.23	6.51
1914	163,387	17.79	3.28	2.81	1.32	7.41	1.96	8.42
1913	173,336	18.16	3.27	2.67	1.25	7.19	1.85	9.12

Mine costs include cost of handling dump ore. Marketing costs include freight.

The productive life of the Tonopah property is nearing an end; to counteract this and to make a permanent dividend-paying organization, new properties have been acquired. There is no doubt that the plan will succeed as the management is thoroughly experienced and capable.

TONOPAH NORTH STAR TUNNEL & DEVELOPMENT CO.

NEVADA

Office: 265 Russ Bldg., San Francisco, Cal. Mine office: Tonopah, Nev. **Officers:** H. Zadig, pres.; C. D. Olney, sec.; J. W. Chandler, supt.-treas. Inc. 1912, in Nev. **Cap.,** \$1,000,000; \$1 par; assessable. Company's San Francisco office, transfer agent and registrar. Annual meeting in April. Listed on Salt Lake Stock Exchange.

Property: 5 claims, Ivanpah, Elaine, Pyramid Fraction, Crosscut and Crosscut Extension, 46 acres in Tonopah, said to show gold and silver ore. **Development:** by shaft, 1,250' deep. In 1914 lateral workings totaled about 5,000'.

Soon after reorganization the company struck a shoot which yielded some hundreds of tons of shipping ore in 1913 and 1914, but the shoot proved of limited extent and shipments declined. In 1915, the property shipped a moderate tonnage to the West End mill.

TONOPAH PLACERS CO.

COLORADO

Controlled by the Tonopah Mining Co., Tonopah, Nev., which see.

TONOPAH 76 CONSOLIDATED MINING CO. NEVADA

Address: E. Tanzey, sec.-treas., Tonopah, Nev. **Officers:** M. R. Averill, pres.; T. J. Lynch, v. p.; with W. S. Harris and L. L. Blumenthal, directors.

Inc. 1911, in Nev. **Cap.**, 1,500,000 shares; \$1 par; non-assessable; outstanding, 1,255,575. No annual meetings since July, 1913. Listed on San Francisco Stock Exchange.

Property: 5 patented claims and fractions, about 60 acres, $\frac{1}{2}$ mile W. of Tonopah. **Development:** by vertical shaft 300' deep. **Equipment:** includes a 60-h. p. electric hoist. **Prospecting.**

TONOPAH VICTOR MINING CO. NEVADA

Controlled by Tonopah Extension Mining Co., Tonopah, Nev., which see.

TOPEKA CONSOLIDATED MINING CO. COLORADO

Central City, Gilpin Co., Colo. **Officers:** at last accounts, Henry P. Lowe, pres., treas. and gen. mgr.; C. A. West, sec., with Sir Chas. Allen, Arthur Firth and M. A. Lowe, directors.

Inc. July 30, 1909, in Colorado, as successor of Topeka Mining Co. **Cap.**, \$1,000,000; shares \$5 par; nonassessable; fully issued. Annual meeting, June 30.

Property: 7 claims, patented, 16.46 acres, in the Russell district, shows schists and metamorphic gneiss, cut by 3 veins with N.-E. strike and dip of 45°. One vein of 4' average width, traceable 1,300', carries chalcocopyrite and sphalerite estimated to average 0.5% copper, 2% zinc, 2 oz. silver and \$10 gold per ton. **Development:** by shaft 1,500' deep, with a second 510' shaft and a total of 11,640' of workings, estimated to show 50,000 tons of ore. The mine was discovered 1862, and worked at intervals until 1900, when closed by litigation, until reopened Aug., 1909.

Equipment: includes steam plants, with a 250-h. p. hoist at No. 1 shaft, and a 60-h. p. hoist at No. 2 shaft. There is a 7-drill Rand Imperial 2-stage air compressor and 15 hammer drills. The mine was closed down again in 1914, leaving workmen unpaid. Reputation of management is capable of much improvement.

TORCH LAKE MINING CO. MICHIGAN

Idle. **Office:** 5-19 Exchange Place, Boston, Mass. Mine office: Leopold Bldg., Houghton Co., Mich. Thacher Loring, pres.; Chilton Cabot, sec.; F. W. Nichols, agt. **Inc.** in Michigan. **Cap.**, \$500,000; shares \$25 par; assessable. **Property:** 1,280 acres, Secs. 35 and 36, T. 56 N., R. 33 W., lying east of the Tecumseh mine of the La Salle, and about midway between Calumet and Lake Linden. The property was slightly prospected, 1899-1900, by diamond-drill borings. Reported that exploration work would be resumed in 1916.

TORRETTE GROUP. ARIZONA

Owned by Monte Cristo Mining & Milling Co., which see.

TORREON, S. A.; COMPANIA METALURGICA DE. MEXICO

Torreón, Viesca, Coahuila, Mex. **Officers:** at last accounts, Col. Carlos Gonzales, v. p.; Lic. Pragedise de la Peña, sec.; Lic. Pedro Torres Saldefia, treas.

Inc. June, 1901, in Mexico. **Cap.**, 5,000,000 pesos; shares 100 pesos par, in 1,500,000 pesos 6% preferred redeemable stock, and 3,500,000 pesos common stock. The company maintains a large cash working capital, and has been controlled by the Madero family. Profits were 629,279 pesos in 1904, and 775,285 pesos in 1906. Dividends were 20% in 1902; 18% in 1903; 14% in 1904; 12% in 1905; 12% in 1906; none in 1907 or 1908; 6% in 1909; 6% in 1910; 4% in 1914.

Property: a number of lead mines and several partly-developed copper mines, in northern Mexico. The San Diego and Buena Suerte mines at Santa Barbara, Chihuahua, produce galena and sphalerite ores, treated in a 125-ton concentrator, and employ about 250 men. Las Adargas mine. Jiménez, Chihuahua, has auriferous silver-lead ores; La Voladora and La Mitra mines, in Nuevo León, produce silver-lead ores; Las Cabrillas and Las Higueras mines, at Los Muertos, Centro, Coahuila, produce silver-lead ores and also have promising deposits of iron ore.

Smelter: of 1,250 tons rated daily capacity, is connected with all railway lines entering Torreón, treats the large production of the company's own mines and also does an extensive general custom business on gold-silver, lead and copper ores. Equipped with 10 blast furnaces, including eight 100 metric ton silver-lead stacks, and two 250-ton copper stacks, the blast furnaces using mechanical charging. There are 8 reverberatory roasters, for lead matte, the first-fusion product carrying only 10 to 15% lead, which is calcined and resmelted. The works have a converter plant of 30 tons daily capacity. Water is furnished by 3 large wells. The works employed about 600 men.

This company went through the 1907 panic in better shape than perhaps any other Mexican smelting corporation. The company is one of the most successful and well-managed mining and smelting enterprises in the republic, its success being especially interesting because the works are owned and controlled by Mexicans, who have shown their ability to compete, on even terms, with American and European mining men and financiers. Property was operated throughout 1912, but was forced to close down during the fighting that continued in this district, and has only been operated intermittently since 1914.

TORTILLITA COPPER CO.

ARIZONA

Office: room 1003, 299 Madison Ave., New York. **Western office:** care Hon. J. B. Wright, 32 No. Stone Ave., Tucson, Ariz. **Officers:** Wm. P. Michel, chairman; Robinson V. Thompson, pres.; Thos. Rowland, v. p.; Leon N. Salmon, sec.; J. W. Edward Michel, treas., with Biana Le Manna, directors.

Inc. March, 1912, in Arizona. **Cap.**, \$1,000,000; shares \$1 par; 600,000 issued. Stock is not listed. Annual meeting in January at the Tucson office.

Company claims to have sufficient funds on hand for continuation of systematic development work during 1916. Management is in hands of the Eastern Stockholders Committee, a group of 10 stockholders, business men, who, according to their own statements, form "A Committee of Progress and Development—not Grievance". Is reported to be controlled by Cameron Holding Co. of N. Y.

Property: 17 claims, 340 acres, about 14 miles N. E. of Redrock, Pinal Co., Ariz., includes the Cloudburst and Yankee Girl mines, purchased under foreclosure in May, 1912. Property is an old-time silver producer.

Development: the "Yankee Girl" double-compartment vertical shaft, 12' wide, 440' deep, July 1, 1916, being sunk to the 500' level. Work has also been done on the 300' level.

Equipment: includes an oil driven air compressor, drills and a gasoline hoist. Management is apparently developing the property along sound lines and is in no need of outside financial assistance. The merits of the property itself can not be judged from the present limited development.

TOTTENVILLE COPPER CO.

NEW YORK

Works at Tottenville, Richmond Co., N. Y. A. Weiss, gen. mgr. Is an extensive copper refinery for the production of ingot copper and alloys.

Above information sent through Nassau Smelting & Refining Works, 603 W. 29th St., New York City. No other information available.

TOUGH OAKS GOLD MINES, LTD.

ONTARIO

(Subsidiary of Kirkland, Lake Proprietary, Ltd.) Office: 119 Finsbury Pavement, London, E. C., Eng. Mine office: Kirkland Lake, Ont. Officers: G. R. Bonnard, chairman; Maj. F. Johnson, R. Simpson, E. H. R. Trenow, directors. H. H. Johnson, cons. mgr.; C. O. Connell, mine mgr.; H. J. Almond, sec.

Inc. in England, Jan., 1914. Cap., £500,000; shares £1; 230,007 outstanding. Organized to acquire 426,388 fully paid shares of company of same name registered in Canada, with a capital of \$3,000,000 (£600,000), in \$5 shares, together with an option to January 31, 1915, on a further 85,555 shares at 15s each and 85,555 at 20s. To September 30, 1915, £44,997 cash and £30,000 in fully paid shares had been paid on account of shares of which 66,781 had been delivered, and in the annual report, December 31, 1915, it was stated that legal proceedings were in progress regarding delivery of further shares in the Canadian company. According to latest reports, although the litigation has not been terminated, the control will remain with the Canadian Company, of which C. A. Foster is president.

The financial statement for the year ending Dec. 31, 1915, shows a net profit, \$275,038; mining cost, \$101,897; milling, \$83,054; general and administrative expenses, \$48,843. During 1915, two dividends of 2½% each were paid.

Property: 5 claims, 185 acres, at Kirkland Lake, Ont., said to carry 10 distinct veins. The ore carries gold and silver values, the average for 26,196 tons milled in 1915 being \$21.04 per ton. The mill ore consists of about 75% tough porphyry and quartz with 25% softer graywacke and conglomerate. The ore carries about 1% concentrate. The gold is mostly fine with a small proportion of coarse.

Development: by 2 working shafts, greatest depth about 400'. **Equipment:** includes hoists, buildings and a 100-ton cyanide mill. Electric power is supplied by the Charlton-Englehart Power Co. In the mill, crushing is accomplished by ball and tube mills, concentrating tables remove about 1%, and the pulp is treated by Dorr counter-current decantation. Precipitation by zinc dust.

TOWNSITE EXTENSION SILVER MINES OF COBALT, LTD.

ONTARIO

Acquired by the Mining Corporation of Canada, which see.

TOY TUNGSTEN MINE

NEVADA

Mr. Beck, supt., Toy, Humboldt Co., Nev. **Property:** 6 claims known as St. Anthony mine, formerly owned by Peter and A. M. Anderson, said to show a 5' vein of 4% ore. **Development:** 100' shaft, 100' winze and an adit. A 50-ton mill, 2 miles S. E. of Toy, erected 1915, has crushers, steel ball mills and concentrating tables.

TRAIL CREEK MINING CO.

CALIFORNIA

Callahan, Calif. G. A. Foster, pres. and supt.; G. Hart, sec.

Property: 100 acres in Trail Creek, Siskiyou Co., reached by trail from Callahan. A fissure vein occurring between schist walls, dips 60° N., course N. 40° W., is said to carry an ore shoot 300' long and 2' wide. Workings consist of 850' tunnel, drifts and a stope 200' long.

Equipment: includes two Huntington mills, run by water power and several buildings. Owners claim 3,000 tons ore reserves. Production to July, 1915, \$40,000.

TRAIL SMELTER.

BRITISH COLUMBIA

Owned by Consolidated Mining & Smelting Co. of Canada, Ltd.

TRANSVAAL MINING CO. OF UTAH.**MEXICO**

Mine and works office: Cumpas, Sonora, Mex. **Officers:** Louis J. Hauck, 433 Dayton St., Cincinnati, Ohio, pres.; Percy Andraea, 1st v. p.; Theo. M. Foucar, 2nd v. p.; Alfred Vogeler, sec.-treas., with Louis Hehman, W. C. Geis, Leo G. Cloud, Bernhard Freiberg and Solon Spiro, directors. Leo G. Cloud, gen. mgr.

Inc. Dec. 19, 1908, in Utah, as a reconstruction of the Transvaal Copper Co. **Cap.**, \$6,200,000; shares \$10 par; issued 531,589½ shares. **Bonds:** \$650,000 authorized, at 6%; issued, \$597,600. Annual meeting, first Monday in March.

Property: 5,560 acres of mineral land, including a 50-acre smelter site with 75-acre townsite adjoining; La Piedra Verde ranch of 15,000 acres and an interest in the San Nicolas Tolentino ranch, 26,000 acres, including timber and grazing lands.

Geology: company's holdings cover the heart of a mountainous district showing widespread rock alteration with acid stream waters, bleached and iron-stained areas, and "chimneys" or "pipes" of silicified breccia. The tract shows granitic exposures, part of an underlying batholith, cutting recrystallized volcanic breccias, baked by contact action. In the Transvaal mines, both granite and this cover of fragmental rock are cut by irregular mineralized fractures along which orthoclase, carrying chalcopyrite, fluorite, chlorite, and calcite have been deposited by pneumalytic action. The "pipe" or "chimneys" of brecciated material cemented by quartz, are mostly barren, but in some cases, as at La Verde and Cobre Rico, contain workable copper ores. It is a peculiar type of deposit and resembles the Calumet-Copper Creek deposits of Arizona, the Kamloops mine in British Columbia and the neighboring Washington mine, 4 miles W. of the Cobre Rico property.

Extensive drilling at La Verde, or the Transvaal mine proper, has developed a great tonnage of low-grade primary ore, averaging 1¼% copper and estimated by the management at 3,000,000 or more tons, which will doubtless be treated some day by flotation methods. The drills have shown the ore to extend to a depth of 1,100'.

Development: the Cobre Rico mine has 2 shafts, No. 1 of 100' and No. 2 about 140' deep, with several tunnels and about 16,400' of workings, including diamond drilling developing several orebodies in a mass of brecciated rock, locally called trachite. Ore is estimated to average about 2% copper, 1 to 2 oz. silver and a trace of gold. Management estimates 2,500,000 tons available in this mine.

The Transvaal or Verde mine has shafts, 318' and 210' deep, former the main working shaft with about 5,000' of drift and crosscut work including several tunnels. This development has opened up considerable low-grade ore carrying chalcopyrite which can only be treated by concentration. Development near the mine by diamond-drill work has shown the existence of a large body, or bodies, of primary ore, the cores varying from a trace up to 17.85% copper and 46.8 oz. silver for 2' at 1,032' depth. About 10,000' of drill work had been done up to March, 1913, which shows that the orebody is somewhat irregular in shape and spotty in character but of fair average value.

Equipment: at the Verde shaft includes two 80-h. p. boilers, a steam hoist and air compressor. The water supply at this mine is bad, owing to its acidity. Management estimates between three to four million tons of concentrating ore available at this mine.

The Buckeye mine has about 10,000' of tunnel work, on a blanket vein of 6" to 4' thickness, showing ore reported to have given average returns

of 12% copper and 8 to 10 oz. silver, with a trace of gold. There are about 5,000 tons of high-grade ore left in the mine and a considerable amount of low-grade ore of no present commercial value. The mine, however, has been thoroughly explored in the bottom, or lower tunnel level and the ore shoot found to have played out.

The San Nicolas mine is a silver property about 8 or 10 miles from the Transvaal. It shows a vein along an igneous contact varying from 1 to 4' in width, carrying silver-lead ore said to change to copper in the lower workings. The mine is reported to have yielded 6,000 tons of 60 oz. silver ore and still has between 2,000 and 3,000 tons of 50-oz. silver ore, but is locally regarded as practically worked out, though the limited amount of development work does not disprove the downward extension of the ore shoot. It is regarded as a promising prospect, especially for lateral development.

The Ultima Chanza mine has a 300' incline shaft and a 100' winze, with about 5,000' of workings, developing a fissure vein of 10 to 42" width. The management estimates 50,000 tons of ore in sight, averaging 10% copper, 5 oz. silver and a trace of gold. This property is a good, but small mine, needing further development. Equipment includes a steam plant and hoist.

The Guadalupe mine carries cupriferous iron ore, used for flux.

The nearest rail station is at Nacozari, 30 miles north, but the Cananea, Rio Yaqui y Pacifico railway has surveyed a line to within 9 miles of the smelter. The company has built about 35 miles of wagon roads and 25 miles of trails at a cost of \$50,000, with a maintenance charge of about \$5,000 yearly.

The main camp is at La Verde, 25 miles S. W. of Cumpas, where mining operations are centered. There are 20 buildings, including 3 power plants, machine shop, carpenter shop, smithies at the principal mines, 2 laboratories, a boarding house, general store, with a branch store at the smelter, a hospital, and several dwellings. The company has a telephone system, costing about \$5,000.

Smelter: at Cumpas, at an average distance of about 25 miles from the mines, was located at that point because of a good site and ample water supply, both lacking at the mines. Equipment includes a 125-ton 42x120" El Paso Foundry & Machine Works water-jacket blast furnace, with room for 2 additional furnaces of the same size. There is a reverberatory furnace, variously rated by the company as of 20 to 50 tons daily capacity, and the works have a sampling mill, capable of sampling ore to feed 3 furnaces. The smelter power plant includes three 80-h. p. Babcock & Wilcox boilers, an Allis-Chalmers tandem-compound engine and a Connersville blower. This smelter was blown in, May 1, 1906, treating ores from the Buckeye and San Nicolás mines and doing a little custom business, producing matte shipped to the Laurel Hill works of the Nichols Copper Co., that was reported by the company as averaging 37%-40% copper, 100-140 oz. silver and 0.1-0.5 oz. gold per ton. The smelter was blown out, Oct., 1907, and has been idle since.

From May 1, 1906, to Nov. 3, 1907, a period of 18 months, the smelter, in operation about two-thirds of the time owing to scarcity of freighting outfits, smelted 18,550 tons of ore having an average assay tenor of about 10% copper and 8 oz. silver for copper ore, and 2% copper and 60 oz. silver for silver ore, making 3,089 tons of matte, yielding 2,178,855 lbs. fine copper, 407,607 oz. silver and 240 oz. gold.

The extensive development work done on the property since 1909, shows the existence of small veins of rich ore and large deposits of low-grade ore. The property is a valuable one and will be worked on a large

scale when given the rail connections now lacking, but absolutely essential to the successful exploitation of the ores.

TREASURE MINING CO.**CALIFORNIA**

Office: 575 Mills Bldg., San Francisco. Mine office, Amador City, Calif. **Officers:** W. Rothchild, pres.; E. J. McCutcheon, v. p.; E. S. McCurdy, sec.-treas., with H. G. Stevenson, G. W. McEnerney, directors. J. H. Bell, supt.

Property: one claim, near Amador City, Amador Co., said to show a gold quartz vein in schist with dip 45° to 55° and N. W. strike. **Development:** by 50° incline shaft, 1,650' deep, with levels at 375', 810', 1,000' and 1,600'.

Developing and building mill containing ball and Hardinge mills.

TREMONT & DEVON MINING CO., LTD.**MICHIGAN**

Office: First National Bank Bldg., Hancock, Mich. Mine at Victoria, Ontonagon Co., Mich. **Officers:** H. L. Baer, pres.; Fred H. Begole, v. p.; Chas. D. Hanchette, sec.-treas., with Jos. Bosch, Jas. B. Cooper, W. M. Gibson and Robt. T. Dunstan, directors.

Inc., Dec., 1908, in Michigan. Cap., \$250,000; shares \$25 par; 4,000 issued; two 10-ct. assessments levied to date.

Property: 680 acres, freehold, including the old Tremont and Devon mines, adjoining and directly W. of the Victoria, carrying about 1¼ miles of the strike of the Keweenawan copper formation, and apparently in the horizon of the western extension of the Lake bed. The Victoria has a vein of some promise, outcropping about one-half mile from the Tremont & Devon line. A little work was done, in olden days, on shallow shafts near the center of the property, from which rock was taken, said to have yielded 500 lbs. fine copper per fathom of ground broken, which was better than 25 lbs. of finished copper per ton.

In Feb., 1916, the E. J. Longyear Co. began diamond drilling. Three holes were put down; the first cut an unidentified lode lying above the Forrest lode; the third is said to have shown good values in the Victoria lode.

TRENCH CONSOLIDATED MINES CO.**ARIZONA**

Address: Chas. Clark, Jerome, pres.; John Hoy, mgr. **Property:** also known as the Farrel mine, is near Patagonia and Harshaw, Santa Cruz Co., Ariz. The mines were acquired in 1913 by Senator W. A. Clark at a price said to be \$250,000. A 500' shaft being sunk 1915-16.

TRENTON-SONORA MINING CO.**MEXICO**

Mine Office: Tarachi, Sonora, Mex. L. Laurent, mgr., at last accounts. **Property:** 4 miles S. of La Calera, includes the San José, Santa Eduvigis, El Porvenir and other mines, carrying copper ores, with values mainly in silver. The San José mine is reported to show an 18" paystreak of highly auriferous chalcoppyrite. **Development:** by a 200' shaft, sunk on the vein, equipped with a hoist. There is a mill and a smelter. Probably idle owing to Mexican revolution.

TRES SEÑORES MINING CO.**MEXICO**

Mine: at San Pedro Ocampo, Zacatecas, Mex. **Property:** includes La Providencia and La Poderosa mines, near San Pedro Ocampo, yielding ores that have given smelter returns of 10% copper, 3,234 grams silver and 120 grams gold per metric ton. **Property:** closed down.

TRETWEWEY SILVER COBALT MINE, LTD.**ONTARIO**

Office: 1428 Traders Bank Bldg., Toronto. Mine office, Cobalt, Ont., Can. **Officers:** Alex. M. Hay, pres.; S. R. Wickett, v. p.; L. J. Pashler, sec. and treas., with W. J. Sheppard, J. D. Tudhope, G. Taylor, T. E. Leathers, directors; H. S. Robinson, mgr.

Inc., 1906, in Ontario. **Cap.**, \$2,000,000; shares, par \$1; non-assessable; outstanding, \$1,000,000. No bond issues. Annual meeting, February. Toronto General Trust Corporation, transfer office. C. E. Robinson, registrar. Listed on New York Curb.

No financial statement for 1915 is available, operations having been suspended for most of the year owing to the low price of silver. For the year ending December 31, 1914, gross earnings were \$254,190, of which \$251,843 was realized from sales of ore; operating expenses were \$179,512.

Dividends: total 108% of outstanding capital stock. Last dividend of 5%, paid July, 1914.

Condensed Balance Sheet: December 31, 1914, shows assets, \$1,158,795, with liabilities as follows: cap. stock, \$1,000,000; accts. payable, \$15,762; credit of rev., \$143,033.

Property: one patented claim, 40 acres, Coleman township, Cobalt district; also owns control in Rochester Mines, Ltd., of Cobalt. Ore deposits yield silver and cobalt and occur between conglomerate and diabase. Pay ore occurs in shoots. Average of all ore milled in 1914 gave 18.9 oz. silver.

Development: by vertical shaft, greatest depth about 230' and total linear extent of workings 23,836'. **Reserves:** blocked out, 19,000 tons, and total reserves, 23,011 tons, estimated to contain 529,691 oz. silver.

Equipment: compressors, hoists and other necessary mining machinery besides a 30-stamp concentrating mill with a capacity of 100 tons daily.

Total output to date, about 5,000,000 oz. silver.

Company spent \$17,634. during 1914, in prospecting other properties. Operates under lease the Rochester mine at Cobalt, the Rochester to get 20% of the net profits.

Reports in the Spring of 1916 announce early resumption of operations, due to improved price of silver, also the probable adoption of flotation for treatment of slime dumps.

TRIANGLE MINING & DEVELOPMENT CO. MONTANA

Office: 8 Allen Blk., Missoula, Mont. Mine office: Clinton, Missoula Co., Mont. **Officers:** R. B. Hughes, pres. and gen. mgr; Oliver Blood, v. p.; H. Y. Gephart, sec.-treas., with David C. Smith, E. C. Mulroney, and Geo. E. Sullinger, directors; Henry E. Kuphal, engr.

Inc., Aug. 25, 1906, in Montana. **Cap.**, \$500,000; increased later to \$1,200,000; shares \$1 par, nonassessable; issued \$662,808. Debentures, \$150,000 6%, \$37,900 issued. Annual meeting, third Monday in February.

Property: 13 claims, 10 unpatented, 250 acres, well-watered and partly timbered in the Wallace district, 2½ miles from a railway, in 3 groups, known as the Triangle group of 8 claims, and the Hill group of 5 claims, 2 miles N. E. of Clinton and 17 miles E. of Missoula. The company also owns land in the town of Clinton.

The claims contain fissure veins cutting granite and altered sedimentary rocks near the contact with a large batholith of granite. The veins show chalcopyrite and bornite associated with hematite, siderite, and quartz in altered granite. The Triangle group shows a 16' vein, opened by a 540' tunnel with back of 450'. At the face the vein is 14' wide and assays 2% copper, ½ oz. silver and 40 cts. gold, while an 8" streak averages 15.04% copper, 3.20 oz. silver and .24 oz. gold, and a 4' footwall streak averages 4.65% copper, 1.2 oz. silver and 80 cts. gold.

Development: by a 140' crosscut and 540' drift tunnels and 40' shaft, estimated to block out 25,000 tons ore. The Grass Widow claim has 513' of crosscutting and 300', 75' and 100' drifts. The Hill group has a 300' drift tunnel.

Equipment: includes a 40-h. p. boiler and an Ingersoll-Rand air compressor, besides several mine buildings. Idle.

TRI-BULLION SM. & DEV. CO. ARIZONA & NEW MEXICO

Office: 10 Wall St., New York. Mine office: Kelly, Socorro Co., N. M.

Officers: Judson G. Wall, pres.; Chester E. Gleason, v. p.; J. D. Thompson, treas.; J. R. Gemmill, sec.; preceding with H. H. Barnes, C. P. Brown, H. V. M. Dennis, Jr., J. M. Henderson, W. D. Johnston, A. J. Smith, Howard Paschal and Gustavus Taylor, directors; Geo. E. Farish, cons. engr.

Inc., 1903, in Arizona. Cap., \$5,250,000; shares \$5 par; in 50,000 participating; cumulative 4% stock with 1,000,000 common; issued 6,700 shares preferred and 999,900 shares common. Listed on New York Curb. Empire Trust Co., New York, transfer office.

Property: includes the Kelly mine, for many years the company's principal asset, which is a zinc, lead and copper producer in New Mexico, operated since May 1, 1915, under lease by Ozark Smelting & Mng. Co. It is 2½ miles from Magdalena on the Santa Fe R. R. Also owns the Starlight group of copper claims in Arizona and a 150-acre group of gold-silver claims in the Pipestone district, Jefferson county, Mont. The Montana property has about 800' of shaft work but is idle save for annual assessment requirements.

The Kelly mine, Elmer Pfouts, supt., 350 acres, patented, is said to show veins of ore yielding lead and zinc carbonates in the upper workings, running from 25 to 30% lead with small silver values and 25 to 40% zinc. The sulphide ores occurring in depth, give average smelter returns of 25 to 35% zinc, 12 to 15% lead, ½ to 2% copper and 6 to 8 oz. silver per ton. **Development:** includes the 400' Traylor shaft and a 365' accessory shaft.

The Starlight group of 12 patented copper and lead claims, in Godless gulch, in the Stanley Butte district, 8 miles S. of the San Carlos Indian agency, was discovered 1886, but not opened until 1903, because it was a part of the San Carlos Indian Reservation, previous to its segregation in 1901. This property shows quartzite, granite and limestone, with short veins, carrying replacement deposits, of 3' estimated average width, holding oxidized ores, estimated by company to average 8% copper, 40% lead, 10 oz. silver and \$3.50 gold per ton. The ore being low in silica, and rich in lime and iron, is self-fluxing. Development is mainly by 3,000' of crosscut tunnels exposing low-grade orebodies. Reported in May, 1916, that development would be resumed and machinery added, with John E. Penberthy in charge.

The Nit and Silver Bell groups were acquired in 1912. The Nit mine, adjoining the Graphic, has an underground connection with the Waldo mine of the Ozark Smelting & Milling Co. The workings of this mine disclose a 50' vein of 4.7 to 6% copper ore, 454' E. of the 215' shaft, in a crosscut from the bottom of a 45' winze sunk from the bottom level.

The Kelly mine has a power house with three 150-h. p. boilers, a large first-motion hoist, 15-drill air compressor, electric pumps and electric light plant. An aerial tram connects the Paschal and Grand Tower (or Legal Tender) shafts.

The 100-ton concentrating mill includes a 75-ton magnetic plant equipped with roasters and Ding electric separators for parting the zinc and iron sulphides. This plant has been in successful operation for several years.

The Kelly mine was reported, 1914, to be practically worked out and the operations from Nov., 1912, to July 7, 1913, resulting in a loss and consequent debt of over \$30,000, the mine was shut down on the latter date.

Since the Ozark Sm. & Mng. Co. took a lease on the Kelly mine, it has uncovered a fine body of zinc-copper ore in new-ground, exposing 50,000 tons of ore. The Ozark Co., a subsidiary of the Sherwin-Williams paint manufacturers, owns and operates a 200-ton mill with flotation equipment.

The Tri-Bullion Co. suffered a loss of over \$32,000 from embezzlement by its former treasurer, 1913-15.

Property now in good hands, and with an able consulting engineer has a promising future.

TRIMOUNTAIN MINING CO.

MICHIGAN

Office: 82 Devonshire St., Boston, Mass. Mine office: Trimountain, Houghton Co., Mich. **Officers:** Wm. A. Paine, pres.; Frederic Stanwood, sec.-treas.; Frederick W. Denton, gen. mgr.; preceding with Chas. A. Snow, F. W. Paine and John R. Stanton, directors; John Jolly, supt.; Edw. Koepel, mill supt.; H. T. Mercer, engr.; Benj. D. Noetzel, clerk; Richard Bowden, mg. capt.; Wm. J. Richards, master mechanic.

Inc., 1899, in Michigan. **Cap.,** \$2,500,000; shares \$25 par; paid in \$20; \$1,200,000 issued. In controlled, through ownership of 99,353 shares, by Copper Range Co. Old Colony Trust Co., Boston, registrar. Annual meeting, second Wednesday in May.

Dividends: \$3 in 1903, \$5 in 1908, \$1.50 in 1910, \$3 in 1912, and \$2 in 1913.

Balance of assets Jan. 1, 1916, \$1,244,082, including \$513,558 cash and copper on hand amounting to \$207,974. Liabilities amounted to \$85,938, leaving a surplus of \$1,158,144 for the year.

Property: 1,120 acres, the E. $\frac{1}{2}$ of Sec. 19, W. $\frac{1}{2}$ of Sec. 20, N. $\frac{1}{2}$ of Sec. 29, and N.-E. $\frac{1}{4}$ of Sec. 30, all in T. 54 N., R. 34 W. The Baltic mine lies to the N. and the Champion to the S., with undeveloped lands to the E. and W.

Owing to a very heavy sand overburden the mine was opened by drop-shafts sunk through alluvium, with raises to surface on the angle of the dip of the stratified formation. The Baltic bed runs 15 to 50', with an average width of 25', on the Trimountain property. Heavy copper is found near the walls, and masses upwards of a ton in weight have been found, but values occur mainly disseminated in stamp rock.

The Trimountain shafts enter lean streaks or shoots, sometimes 500' in horizontal length, with flat northerly pitch or rake, underlain by copper ore. Lying parallel with and about 65' W. from the Baltic bed, is a wide amygdaloid, carrying some heavy copper and considerable stamp rock. This bed has not yet been worked, but may be made available for production at some time in the future. The great width of the lode has led to a dry-wall-ing with waste rock, which is used also for building underground chutes, which are roughly circular, with inner diameter of about 5' and are filled about with waste, as stopes are carried upward, the chutes being built at a sharp pitch, the wedging of the surrounding waste rock serving to hold the walls immovable. The saving in timbering brought about by dry-wall-ing and building chutes of mine rock is very great.

Development: No. 1 shaft, 210' north of the Champion boundary line, is sunk at an angle of 68°, with 1st level opened 168' below the collar, levels thereafter at 100' intervals. The upper levels tributary to No. 1 shaft have been worked out, and the shaft abandoned at depth of 2,284'. It now serves as a waste sand chute.

No. 2 shaft, 1,023' N. E. of No. 1, was 3,859' deep at the end of 1915, and a considerable improvement has been noted in ground below the 14th level, with the bottom levels the best opened in this shaft. The shaft rock house,

has 2,000-ton rock bins, and is equipped with an engine, steam hammer and two crushers. Rock is raised by a 2,500-h. p. Nordberg direct-connected duplex hoist, with double-conical drum of 18' maximum diameter, capable of raising 6-ton skips from 1 mile depth.

No. 3 shaft, 1,027' N. E. of No. 2, sunk at an angle of 68°, was 2,563' deep at the end of 1915. Beneath 60' of sand, the rock was found to be badly fractured and barren down to the 2nd level, only becoming solid and payable below the 14th level.

No. 4 shaft, the northernmost, 2,548' deep at the end of 1915, is the best shaft of the mine.

Equipment: the mine buildings near shafts Nos. 2 and 3, include machine and carpenter shops, smithy and warehouse. There is a 35-drill Rand air compressor at No. 2 shaft, with a Deane condensing plant in a separate building. The power plant at No. 3 shaft includes a battery of Stirling water-tube boilers and a 4,500' Nordberg air compressor. The mine has electric pumps and works about 60 drills. The property is served by the main line of the Copper Range railway, which reaches all the shafts and principal shops.

The mine property has macadamized roads, a large boarding house, upwards of 100 dwellings, general store, hospital and a nurses' home.

Mill: The mill, at Beacon Hill, 2 miles west of Redridge, occupies a 100-acre mill site having about 2 miles of frontage on Lake Superior. It has 4 steeple-compound Nordberg stamps. Complementary machinery for each stamp includes crushing rolls, 36 improved Hodge jigs, 6 slime tables and 1 Wilfley table. Tailing losses, originally as high as 0.50 to 0.65%, have been reduced to 0.26%, by the installation of regrinding rolls and settling tanks. The mill is also equipped with regrinding machinery, including Hardinge mills, for treating the richer portions of the mill tailings, has a 300-h. p. engine, and a small but complete machine shop on the second floor.

The mill boiler house has six 250-h. p. and two 200-h. p. Stirling boilers, the latter maintaining a steam pressure of 180 to 200 lbs. per sq. inch.

The pump house at the mill has a 20,000,000-gal. Nordberg pump, taking water from a well connected with a tunnel running 1,960' to an intake crib in Lake Superior.

Production was begun Jan. 4, 1902, with 1 leased head at the Arcadian mill. The Trimountain began production with a return of 37 lbs. fine copper per ton, but fell off later to 27 lbs., and, when the present management secured control, the production fell sharply to 18 lbs. fine copper per ton.

TRINIDAD MINING & SMELTING CO.**WASHINGTON**

Office: Tonasket, Wash. **Officers:** Jos. Coleman, pres.-mgr.; T. W. Brown, v. p.-sec.; E. H. Twight, treas.; T. W. Brown, supt.

Inc., Dec. 1, 1911, in Washington. **Cap.,** \$1,000,000; shares, \$1 par; 703,700 issued.

Property: the Central group, 16 unpatented claims, 320 acres in the Galena mining district, Okanogan Co., shows gold and silver-bearing lead-copper ores, occurring as a dissemination in andesite. **Development:** to depth of 150', consists of shaft, tunnel, trenchings and open cuts, with a total of 700' of underground workings. Average assays said to run from \$12 to \$30 for shipping ores and from \$2 to \$8 for low-grade ore. Property is owned and operated by the officers of the company.

TRINITY COPPER CO.**CALIFORNIA**

Office: 33 State St., Boston, Mass. Mine office: Kennett, Shasta Co., Calif. **Officers:** Thos. W. Lawson, pres.; Arnold Lawson, v. p.; Homer Albers, sec.; Allen Arnold, treas.; F. M. Leland, gen. mgr.; preceding with Arthur P. French, John N. Reynolds, John R. Turner, E. A. McSweeney, directors.

Inc., Oct. 18, 1900, in New Jersey. **Cap.,** \$6,000,000; shares \$25 par; 240,000 shares outstanding. International Trust Co., Boston, registrar; Federal Trust Co., Boston, transfer agent. Shares listed on Boston Stock Exchange and on the New York Curb. Federal Trust Co., Boston, transfer office.

Balance sheet as of Sept. 1, 1915, shows assets: mining claims, \$5,221,000; mine development, construction and interest account, \$705,810; expenses, \$208,383; Railway and Power Co., \$36,500; cash, \$925; total, \$6,172,618. Liabilities: capital stock, \$6,000,000; American Smelting contract payable in ore, \$28,547; ore account, \$39,471; accounts payable, \$104,600; total \$6,172,618.

Property: 1,700 acres, also a patented town site, near Kennett, with total holdings of 3,233 acres. Property includes the Shasta King, which is the principal mine, the Lost Desert and King Copper groups.

The Shasta King group, 12 claims, adjoins the Balaklala mine, on the southern fork of Squaw creek, 4 miles east of Iron mountain. The main double track tunnel is 1,145' long; there is another tunnel driven 175' vertically lower. The mine has 15,000' of workings and property has been tested by 5,119' of diamond-drill borings. The orebody is a lens, claimed to be approximately 150' wide by 1,000' long, but apparently the ore does not go to great depth, and it is possible that the bottom limits have been reached. The property is said to have ore reserves of 400,000 tons, with fair chances of 750,000 tons, and possibilities of a greater tonnage. The cross-cut tunnels, driven in from the sides of the mountain, connect with drifts on the orebody, which is low-grade pyritic ore containing disseminated chalcopyrite, and holding 1 to 2½% copper, with combined gold and silver values of about \$1 per ton. The ore carries small quantities of zinc and an excess of iron, and probably averages around 2½% copper and 1 oz. silver per ton, with small gold values. The Trinity also has an orebody, of undetermined size, on the opposite side of the gulch from the Shasta King.

The Shasta King mine has ore bins, and a 2,000' incline tram, of about 500 tons daily capacity, leading to the head house of the Balaklala tramway. The Copper King group of 22 claims, on Motion creek, about 2½ miles S. of the Shasta King mine, has about 1,000' of exploratory workings, but apparently no ore has been found in place. The Statesman group has been partially explored, in an effort to locate and develop silicious ores required for fluxing the heavy sulphide ores of the Shasta King mine. The Uncle

Sam group, held under bond and lease at last accounts, also has been explored for fluxing ores, the Shasta King having large bodies of low-grade copper sulphide, but lacking the silicious ores required to make free-smelting furnace mixtures. The Uncle Sam group shows some oxidized ore, at and near surface, of 3 to 8% copper tenor.

Equipment includes a steam plant with 6-drill air compressor and power drills; also a diamond drill, with which considerable boring has been done. Buildings include a laboratory, warehouse, shops, hospital and about 25 houses for employes.

The company was reported to be ready for production Sept., 1907, at the rate of about 150 tons daily, but none of the ore reached the smelter. Management started production Oct., 1908, and shipped ore to the Balaklala smelter, but closed down early, 1909, and no record of the actual production of copper can be secured. The Trinity Co. claimed to have a contract with the Balaklala smelter calling for the treatment of 300,000 tons of ore for the first year and 360,000 yearly for the 9 succeeding years; with a minimum of 300 and maximum of 1,000 tons daily, which was to have been matted for \$3 per ton, but the contract was not carried out, and the mine has been closed down since Feb., 1909, waiting first for 15 ct. copper and now for the Balaklala smelter to resume operations. For history of the company, see Vol. X, Copper Handbook.

President Lawson stated, at the annual meeting, 1913, that Trinity's day will come and that the property's decriers will be forced to "eat their boru-of-ignorance criticisms." His statement was in part as follows: "Trinity is still awaiting the resumption of First National-Balaklala smelting operations, and if these efforts are successful, the unbroken chain of Trinity's misfortunes should be at an end. Mining operations were entirely suspended during the year, but mine workings, machinery, buildings, roads and fire-protection apparatus have been maintained with a minimum of depreciation, considering the adverse conditions of a shutdown in a rugged, mountainous country, so that ore extraction may commence economically at short notice."

TRINITY GOLD MINING & REDUCTION CO. CALIFORNIA

Office: 654 W. 51st St., New York. **Mine office:** Carrville, Trinity Co., Calif. **Officers:** at last accounts, Henry W. Miller, pres.; Archibald Nesbitt, v. p.; James H. Lee, sec.-treas.

Inc. Feb., 1909, in Arizona. **Cap.**, \$1,000,000; shares \$1 par; issued, \$969,220. Lincoln Trust Co., New York, registrar. Annual meeting, second Tuesday in January.

Property: 498 acres, 323 patented, including the Headlight mine, in Trinity Center district, 1½ miles S. E. of Carrville. Company also owns 115 acres timber land. The mine has an orebody forming a flat shoot 40' thick but containing large dikes of disintegrated porphyry which did not show at the surface, so that the ore reserves reported by engineers do not exist and the oxidized ore has been worked out. A new orebody, found 1912, in another part of the property, is said to have developed 100,000 tons of ore, carrying ½ to 2% copper, 47% sulphur and about \$4.50 in gold and silver. This orebody has been proved by diamond drilling and by a 200' crosscut.

Equipment: includes a complete power plant, stamp mill and concentrator, which in 1912 treated 47,600 tons of ore with a recovery of 81.88% at a cost of \$1.01 per ton. Mining costs were \$1.43 and the ore assayed \$4.36 per ton. Property was idle in 1914 and management was experimenting with a wet process for the treatment of the sulphide ore, as it cannot be roasted owing to the Government Forestry restrictions. Nothing has been reported since and the management has ignored all requests for information.

TROJAN MINING CO.**SOUTH DAKOTA**

Office: Deadwood. Mine office, Trojan, S. D. **Officers:** H. W. Seamon, pres.; G. M. Curtis, v. p.; F. M. Clark, sec.; H. S. Vincent, mgr.; above are the directors.

Inc. 1911 in S. D. **Cap.**, 3,000,000 shares; par \$1; nonassessable; outstanding, \$1,000,000. Annual meeting, June.

The company publishes no financial reports.

Property: 157 patented claims, 1,000 acres, at Trojan, Lawrence Co. Deposit is a flat blanket body between sandstones and slates and yields gold and silver.

Equipment: 100-h. p. electric hoists, capacity 5,000'; 600 cu. ft. compressor and 2 gasoline locomotives. Mill equipment is for cyaniding. Capacity 400 tons daily. Crushing is by Chilian and tube mills.

Production: stated to be 315,000 tons to date, part of which was shipped directly to smelters and the rest milled.

TROY ARIZONA COPPER CO.**ARIZONA**

Address: A. K. Sloan, sec.-treas., 15 Maiden Lane, New York City. **Officers:** John F. Galvin, pres.; Calvin Page, v. p.; Brackley Shaw and H. C. Rogers, directors. Leo Von Rosenberg, engr. in charge of mine.

Cap., \$3,000,000; shares \$10 par. Company is a reconstruction of the old Troy Copper Co., succeeded by Troy-Manhattan C. Co., which in turn was succeeded by the Troy Consolidated Mining Co., fully described in Vol. IX, Copper Handbook. Operations of all these "Troy" companies proved disappointing. Stock offered, 1916, at \$5 per share by Boston brokers, prior to listing on Boston Curb.

Property: 85 claims, 1,600 acres, 3½ miles N. E. of Erman, on the Arizona Eastern R. R., known as Troy, Climax and Manhattan groups. The Troy group said to have 12 and Manhattan group 6 veins. **Development:** reported to aggregate over 5 miles, including several shafts, deepest 500'. Company's engineer states that while a large tonnage of ore is not blocked out, yet with a moderate amount of work several hundred thousand tons could readily be made available.

TUCKER MINING & MILLING CO., LTD.**IDAHO**

Office: Gem, Idaho. Mine near Mullan, Shoshone Co., Idaho. Peter Bahn, pres.-gen. mgr.; J. Pearson, v. p.; W. Turner, sec.-treas.; above are directors.

Inc. March, 1907, in Idaho. **Cap.**, \$1,000,000; shares \$1 par; assessable; issued, \$700,000; given in exchange for the property. Annual meeting, second Saturday in April.

Property: 6 claims, unpatented, 120 acres, in the Hunter district, 3 miles E. of the Snowstorm, shows Revett quartzite, cut by a diabase dike with veins, 1 to 4' in surface width, said to carry copper-gold-silver ore. Average assays said to run \$8 silver, \$1 gold, with small copper values.

Development: by a 1,200' tunnel, shows a 4' vein, 85' from the portal, carrying low-grade copper and lead ore, and another vein, about 300' from the portal with stringers of high-grade copper ore carrying silver. Present work consists of crosscutting the ledge every 200'.

Equipment: includes an hydraulic installation of about 100-h. p.

TUCSON CONSOLIDATED COPPER CO.**ARIZONA**

Office: 511 Chamber of Commerce, Milwaukee, Wis. Mine office: Tucson, Pima Co., Ariz. **Officers:** J. H. Wussow, pres.; Dr. M. A. Brandt, v. p.; F. J. Rodee, sec., Tucson; C. W. Schneider, treas.; Hon. Fred W. Fickett, gen. mgr.; preceding officers, J. G. Albright, C. F. Freeman, P. P. Donohue, A. Ballantine, R. L. Bennett and S. W. Purcell, directors.

Inc. April 15, 1907, in Arizona. **Cap.**, \$3,000,000; shares \$1 par; non-assessable; in one-half full paid and one-half common stock; issued, \$1,500,000. Annual meeting, third Monday in March.

Property: formerly 103 claims, now 81 claims, unpatented, in 4 groups, 1,620 acres, in the Papago district. The property of the Old Pueblo Mining & Milling Co., 9 claims, is held by this company under an option calling for 51% of stock on completion of \$50,000 worth of work. Presumably includes Purcell Grand Cons. Mng. Co. property.

The 4 groups are 8 miles W. of Twin Buttes and 35 miles W. of Tucson. Claims show granite-porphry and limestone, with fissure veins and contact deposits, 5 being under development. The largest deposit is described as a chimney in limestone, about 55x150' in size. The groups as a whole have 3,800' of workings, mostly tunnels, longest 800', but including 10 shafts, deepest 525'. Ore is said to give assays of 6 to 30% copper, 12 to 80% lead, 3 to 125 oz. silver and 80 cts. to \$30 gold per ton, from azurite, chalcocite, chalcopyrite and galena. The reserves were estimated at 500,000 tons ore blocked out for stoping, which estimate is regarded as excessive.

The **Purcell** group of 16 claims, 3 fractional, 275 acres, shows 3 approximately parallel mineral zones, developed by a 96' shaft and a 200' tunnel, estimated by the company to give assays of 15% copper, 20 oz. silver and \$1.50 gold per ton.

The **Bolello** group of 9 claims, 180 acres, 2 miles S. of the Purcell, has basic granite, with frequent quartz-porphry intrusions, showing 3 copper veins, slightly developed, carrying ore that has given assays up to 24% copper, with gold and silver values.

The **Black Dyke** group of 48 claims, 960 acres, is W. of and about 3 miles N. from the Purcell group, constituting a parallelogram 3,600' wide and 12,000' long, showing strong iron outcrops, with favorable indications, having a number of shallow shafts, showing copper ore of 4 to 25% copper tenor, and silver-lead ore assaying up to 69% lead and 139 oz. silver per ton. This group has little development, but appears promising.

Equipment: includes a 250-h. p. steam plant, burning petroleum, with 2 hoists, and there are 6 buildings, including 2 general stores.

The **Old Pueblo Mining & Milling Co.'s** property consists of 9 claims, 5 miles W. of Tucson, developed by the 517' Quien Sabe shaft and a tunnel. A 70' shaft cut, at depth of 30', a 15-ton pocket of chalcocite, assaying 33% copper, 16 oz. silver and \$2.50 gold per ton.

The reports by Wishon, 1908, and Attix, 1903, issued by the company are so old, one wonders why this "sure thing" mine has been so long idle, and what work, if any, has been done in the past 8 years.

TUCSON MINE.

COLORADO

George O. Argall, mgr., Leadville, Colo. See Iron Silver Mining Co.

TULAROSA COPPER CO.

NEW MEXICO

Office: Tularosa, N. M. **Mine office:** Bent, Otero Co., N. M. **Officers:** F. P. Kern, pres.; A. J. Merrill, Geo. B. Bent, secretaries; J. M. Beaty and P. M. Lynch, directors; W. Roland Cox, cons. engr.; Geo. F. Harley, gen. mgr.

Inc. March 5, 1905, in New Mexico, as successor of Tularosa Mining & Milling Co. **Cap.**, \$5,000,000; shares \$5 par; issued, \$3,125,000. Stock listed on New York curb. Registrar & Transfer Co., New York, transfer office.

Property: 807 acres, 307 acres patented, at Bent, on the Tularosa river. Mine is 12 miles N. E. of Tularosa on the E. P. & S. W. R. R., about 100 miles N. E. of El Paso, Texas.

Geology: the property is underlaid by a flat sheet of diorite resting on

quartzite and covered in general by the basalt sandstone of the Red Beds of the region. This diorite outcrops at the Virginia mine, as the company's workings are called, and dips gently in every direction away from this point. The ore is found in the uppermost part of the diorite, which is much altered to a depth of 35 to 55' below its surface. This ore bed shows lenses of glance, 2 to 18" wide, running in all directions, which together with stringers and veinlets of ore, make a stockwork proved to be ore-bearing over an area 200' wide and about 1,200' long. The altered rock between the lenses also carries disseminated copper glance and the ore as a whole averages $2\frac{1}{2}\%$ copper; 30 to 55' below the diorite surface, the rock is fresh except along fractures; stringers of ore occur, however, at depths of several hundred feet.

Development: at the Virginia mine there is an open pit 60x120' across and 35' deep which is opened on the richest part of the deposit. The 1st level corresponds to the bottom of the pit; the 2nd level is 25' deeper. These workings are said to block out 85,398 tons of ore in an area of 105x180' in extent. Twelve diamond-drill holes from 88 to 400' deep prospect the ground, and the results form the basis for an estimate of 800,000 tons of indicated ore of an average value of $2\frac{1}{2}\%$ copper.

Property was to be drilled in 100' squares and the limits of the orebody fully determined. One drill hole encountered 136' of ore at a depth of 300'.

Equipment: includes a 12,000' power ditch with hydro-electric plant, consisting of Platt-Francis turbine, alternating-current generator and complete electrically-driven concentrating plant.

The mill was remodeled and enlarged to 300 tons capacity in 1912, new rolls, a hydraulic classifier, another Wilfley table and 5 No. 3 Deister slime tables being added under the supervision of Godfrey D. Doveton. It is said that about 7,000 tons of ore was run through the 30-ton experimental plant in the 4 years ending July 1, 1910, giving a return of 221,230 lbs. fine copper, a net return of almost exactly 1.5% copper. The mill put 15 into 1, giving concentrates said to average 37% in copper tenor, with about 1 oz. silver per unit of copper, but the figures indicate 25% copper tenor for concentrates, if made at the ratio named.

Compared with other deposits of similar character, this one is small and the ore bed thin, averaging perhaps 35', while the ore reserves are not large enough to compare with those of any of the copper porphyries. The property does not warrant a large mill.

There seems to be no reason why the orebody should not extend over a greater area, or another one be found, and a drilling campaign may result in such an extension being found. The new parties in control have had wide experience in mining and possess ample means to test the property thoroughly. All work was suspended in 1914.

TULLOCH GOLD & COPPER CO.

NEW MEXICO

Silver City, Grant Co., N. M. D. H. Tulloch, president. Inc. 1907. **Lands:** 50 claims, 1,200 acres, on Edith mountain in the White Signal district, said to show good ore near surface. Developed by 2 shafts, 1 of 200', on the Dagger Point claim, showing ore claimed to average 14% copper. A crosscut tunnel on the Wild Horse claim, run along a dike of iron gossan, showed ore averaging 3% copper. No reports received and property presumably idle.

TUNGSTEN COMPANY OF AMERICA.

CONNECTICUT

Office: 115 Broadway, New York. Mine and concentrating plant at Long Hill, Conn. **Officers:** B. T. Lyons, pres.; Lawrence Mortimer, v. p.;

F. H. Osborn, sec.; E. M. Post, treas.; with H. C. Dickinson and Melville E. Grey, directors; T. Parsons, asst. sec.; Kirby Thomas, cons. engr.

Inc. March 9, 1916, in Del. **Cap.**, \$1,000,000; shares \$5 par; all outstanding. Registrar & Transfer Co., New York, registrar and transfer agent. Listed on New York Curb. Statement of assets and liabilities, June 9, 1916, shows: assets, \$1,323,140, which includes leases and contracts, \$1,250,000; accounts receivable, \$10,340; ore and concentrates, \$22,500; equipment, \$40,000; cash, \$300. Liabilities include bills payable, \$20,000; accounts payable, \$11,500; surplus, \$68,640.

Property: the old tungsten mine at Trumbull, Conn., was acquired in Jan., 1916. See U. S. G. S. 22nd Annual Report, 1900-1901. **Ore:** consists of wolframite, scheelite and wolfram ocher, occurring in a contact deposit, 3' to 5' thick, between crystalline limestone and hornblende-gneiss; dip 25° N. Company claims ore averages 2 to 3% tungsten.

Development: shallow pits and a short adit. Management states "pending the completion of the new plant, mining operations on a large scale will be continued to block out large bodies of ore and to pile up ore reserves," also "the cost of mining and milling this ore will not exceed \$5 per ton."

The old buildings were destroyed by fire; plans building a 100-ton concentrator. The present company began production of tungsten concentrates about April 6, and to May 11, 1916, shipped to the Vanadium Alloys Steel Co., Latrobe, Pa., 4,008 lbs., yielding \$8,734. Prior to being taken over by new management the property had been operated in a small way. Mine is an old and well known mineral producer, but it is very doubtful if it could pay operating expenses should the price of the tungsten ore decline to its anti-war price of \$6 per unit.

TUNGSTEN EXPLORATION CO.

COLORADO

Lakewood, Colo. Peter Knuth, supt. Inc. April, 1916. **Officers:** L. A. Ewing, pres.; Chas. Theobald (of Theobald & Knuth, Cripple Creek, Colo.), v. p.; Dr. R. W. Bailey, treas.; L. A. Tilborg, sec.; with C. M. Webb, Norfolk, Va., G. C. Stumm and Clark G. Mitchell, directors.

Property: the Bradley tract, 200 acres, 1 mile E. of Lakewood, adjacent to Primos Chemical Co.'s mines, the Gold Spring Cross and Bonanza mines.

TUNGSTEN GIRL CO.

COLORADO

Offices: 325 Majestic Bldg., Denver, Colo. and Ward, Boulder Co., Colo. **Officers:** Joe Connors, pres.; S. T. Weller, v. p.; Dr. Osee Wallace, treas.; Hon. L. I. Harrington, sec.; above, with Kenneth Kennedy, A. V. Lafferty, Dorothy Weller and E. S. Connors, directors.

Inc. 1916 in Ariz. **Cap.**, \$1,000,000; shares \$1 par.

Property: the Blue Jay and Burnt Mountain groups, 3 miles from Ward, adjoining holdings of the National Tungsten Co.

TUNGSTEN METALS CORPORATION.

COLORADO

Boulder, Colo. Inc. April, 1916. **Cap.**, \$550,000. Company has taken over property of the Tungsten Metals Co. and the Ferberite Co., including the Red Sign, Red Sign No. 2 and the Ferberite mines, and is constructing a \$50,000 mill in Boulder Canyon, about 7 miles from Boulder.

TUNGSTEN MINES CO.

CALIFORNIA

L. L. Stevens, gen. mgr.; Cooper Shaplye, supt., Bishop, Calif. **Officers:** T. M. Townsend, pres.; Leo Kaufman, sec.; G. L. Cooper, A. J. Clark, L. L. Stevens and J. C. McKinstry, directors. **Cap.**, \$3,000,000; shares \$10 par. Operates a tungsten mine and mill near Bishop and is preparing for extensive development and equipment 1916.

Property: a group of claims, purchased 1915 from the Standard Tung-

sten Co., situated in a deep gulch known as Deep Canyon, 7 miles west from Bishop. The scheelite bearing garnet rock occurs in granite.

Development: by 2 tunnels, one on each side of the new mill and connected therewith by 700' tram line.

The 300-ton mill, built 1916, is equipped with Allis-Chalmers rolls, tube mills and tables.

TUNKEY MINING CO.

NICARAGUA

See Tonopah Belmont Mining Co.

TUOLUMNE COPPER MINING CO.

MONTANA

Mine office: 311 Daly Bank Bldg., Butte, Mont. **Officers:** Edw. Hickey, pres.; N. J. Bielenberg, v. p.; Lyman J. Roscow, treas.; preceding officers, T. E. Murray, Wm. Jahn, Paul Gow, mgr., and Geo. Palmer, directors; J. J. Harrington, sec. Walter Harvey Weed, cons. engr.

Inc. June 4, 1906, in Arizona. **Cap.**, \$800,000; shares \$1 par, of which \$400,000 in stock was given for the property, and 210,000 shares were sold on the Butte market at par, increased May, 1916, to \$2,500,000; \$1 par. Shares are listed on the New York curb, Boston, Spokane and Butte stock exchanges. State St. Trust Co., Boston, transfer office. Beacon Trust Co., Boston, registrar. Annual meeting, June 20.

Balance sheet: as of May 31, 1916, shows assets of \$2,082,457; this includes, Tuolumne property and equipment, \$828,502; deferred, \$9,000; current, \$44,955; Butte Main Range Copper Mining Co. and Colusa Leonard Extension Copper Co. properties under options and contracts, for which 1,200,000 shares of capital stock are held in trust, \$1,200,000. Liabilities include: issued capital stock \$2,000,000, of which \$800,000 is outstanding and \$1,200,000 is held in trust; current liabilities, \$39,584; surplus, \$42,873.

Profit and Loss Statement: for 1914, 1915 and to May 31, 1916, shows: operating loss, 1914, \$2,083; operating loss, 1915, \$26,591; depreciation, \$28,899; other, \$3,061; total loss, \$60,635, or \$1.39 per ton ore mined. Net earnings for first five months, 1916, \$42,939, or \$0.985 per ton ore mined, leaving a net loss on operations, \$17,695, or \$0.405 per ton ore mined.

Dividends: 15 cts. per share in 1911; none in 1912, and two 10 ct. dividends in 1913.

Property: the Tuolumne, 1 fractional claim, and a tract of 80 acres near the Tropic and East Butte mines held through a 51% interest in the Colusa-Leonard Extension and a $\frac{2}{3}$ interest in the Butte Main Range companies, described under their respective titles. Properties adjoin the Tropic mine of Anaconda on the north. Under terms of the agreement Tuolumne must do development work estimated at \$500,000. This work includes sinking the Colusa-Leonard shaft from 800' to 1,600' depth and crosscutting to the side lines of the claim about 1,500'.

The Tuolumne claim carries the Jessie and Edith May veins, parallel N. W.-S. E. fault veins with large oreshoots.

Development: by a main 3,000' shaft, developing an orebody of 12 to 15' width, which carried ore ranging from 5 to 12% copper with an average of about 7% down to 2,000', but in the lower levels the vein consists mainly of pyrite, with low copper values. In 1916 all development was confined to the 2,400' level and mining carried on on the 800', 2,000', 2,200' and 2,400' levels.

Equipment: includes a steam plant with six 150-h. p. Erie City boilers delivering steam at 150 lbs. pressure per sq. inch. There is a powerful Nordberg hoist, good for 3,000' depth, and a 20-drill Nordberg air compressor.

Ore shipped to the Washoe Works, under contract.

Comparative Statement of Production.

	Tons 1st Class Ore	Tons 2nd Class Ore	Lbs. Copper	Ounces Silver	Av. % Copper	Av. oz. Silver

(a) Last 5 mos. (b) First 5 mos. * Not reported.

Work was stopped on property in Oct., 1914, resumed Aug., 1915.

The Eastern holdings of the company embrace 10 claims, 80 acres, covered largely by wash, but containing several strong veins, proven by development work from the Sinbad and the Colusa-Leonard shafts to contain commercial orebodies. Moreover, the tract lies in line with the extension across the valley bottom of several of the known productive veins of the North Butte and Anaconda holdings, and the claims lie west of the big displacement known as the Continental fault.

At the Sinbad shaft, drifts on the 400 and 500' levels expose a 6' vein in which a 12" band of high-grade ore occurs that will be mined. The 700' level, under water July, 1916, will be unwatered and cleaned out as soon as the shaft is retimbered.

Both shafts will be operated, and shipments made in the Autumn of 1916. This tract is very favorably regarded, and development is confidently expected to disclose large and profitable orebodies.

With its new ground the company has started on an active campaign of development which will, it is believed, make it an important producer and dividend payer.

TUSAS PEAK GOLD & COPPER MINING CO. NEW MEXICO

Idle. Office: Portage, Wis. Mine and mill at Tusas, Rio Arriba Co., N. M. R. H. Owen, pres.; R. J. Rosenfeld, sec.-treas.

Inc. April 28, 1902, in New Mexico. Cap., \$2,000,000; shares \$1 par. Bonds, \$100,000 authorized; issued, \$16,000.

Property: 13 claims, 230 acres, and a 5-acre mill site, in the Bromide district, 14 miles W. of Tres Piedras, and 10 miles from a railway. Principal development is on the Tampa mine, having a 13' vein of copper ore, with a 5' paystreak said to average 7.5% copper, balance of ore being of concentrating grade. The Tampa has shafts of 80', 85' and 425', with about one-half mile of workings, showing ore reported by company to assay 5 to 44% copper, 1 to 4.5 oz. silver and \$1.20 to \$3.80 gold per ton, with some ores assaying up to 2.3 oz. platinum per ton and carrying some molybdenum. The main shaft shows ore of good average tenor, but in small quantities, and the management believes that it will be necessary to sink to 500 or 1,000' depth in order to develop good orebodies.

Equipment: includes a hoist and 3-drill air compressor, with an hydraulic dam on Tusas creek, sawmill and a 40-ton leaching plant, planned to treat oxidized ores, but not in operation.

TUSCARORA MINING & MILLING CO. CALIFORNIA

Address: care Al. D. Myers, president, Los Angeles, Cal. Mine in the Monument Peak, or Whipple Mountain district, 12 miles N. of Parker, and 14 miles N. of Vidal, on the A. T. & S. F. R. R. Company is a reorganization of the Tuscarora Mining Co. Property shows pre-Cambrian schist and gneiss with veins from 2 to 5' wide, carrying chalcocopyrite and glance ore

with gold values. **Development:** by 2 shafts on the same vein, 2,000' apart, opening ore to a depth of 300'. A "strike" of gold ore was reported, Feb., 1912. Property closed down and company in litigation.

TUSCARORA-NEVADA MINES CO.**NEVADA**

Bankrupt. **Address:** J. E. Harrington, 1482 Broadway, New York. Henry Stanley Haskin, receiver; \$150,000 receiver's certificates authorized; 53,286 issued; \$600,000 claim against company allowed by Court. Property leased Aug. 18, 1915, for ten years to Jas. E. Harrington.

The mortgage held by the Dexter Tuscarora Cons. G. M. Co. on the Dexter group of this company has been foreclosed and the property purchased by the mortgage holders. This includes 17 claims and the Jack Creek power plant, all under bond and lease for \$175,000.

TUSCUMBIA MINING CO.**IDAHO**

Address: Morton Webster, sec.-treas., Wallace, Idaho. **Officers:** George May, pres.; George W. Dougherty, v. p.; with D. L. McGrath, Wallace, D. J. Whaley, M. L. Whaley and A. A. Whaley, of Stevensville, Mont., directors.

Inc. 1910 in Idaho. **Cap.**, 1,500,000 shares; 50c par. Mine is under lease for 2½ years from April, 1915, to Gust Ehrenburg, of Spokane, and Albert Nelson, of Wallace.

Property: 4 claims, 76 acres, covers nearly 3,000' of the apex of the Tuscumbia (Sunset) lode, and 1,000' more or less of the Idora lode. The Tuscumbia is a strong, persistent vein in Pritchard slate, varying from 6 to 20' in width and branching at times. It carries shoots of silver-lead ore and of zinc.

Development: by tunnels, the lowest now worked being the Idora crosscut tunnel. The Hill tunnel, 4,000' long, has not cut the vein; it is 1,015' below the Idora tunnel.

Mine has been stoped and orebodies largely mined out above the Idora tunnel, but the vein is believed to give promise of large bodies of milling ore at deeper levels. The property also has title, through ownership of apex, to an important orebody of the Idora mine. Deep development can be done by tunnels, as the Roy or Hill tunnel is 1,300' below the Tuscumbia apex and 1,015' below the Idora tunnel.

Property considered very promising, but company needs financing to provide funds for deep and extensive development work.

TUSCUMBIA MINING & MILLING CO.**ARIZONA**

Jas. H. Sullivan, supt., Crown King, Ariz. **Inc.** March, 1916, in Arizona. **Cap.**, \$1,000,000; shares \$1 par.

Property: the Tuscumbia mine, in the Bradshaw Mtn. district, carrying a lode with silver ores, said to be like those of Tonopah. A shoot opened May, 1916, is reported to show 3.8% copper and 115 oz. silver per ton in a shoot 50' long and 4' wide.

TWIN BUTTES MINING & SMELTING CO.**ARIZONA**

Office: 314 Railway Exchange, Milwaukee, Wis. Mine office: Twin Buttes, Pima Co., Ariz. **Officers:** Michael Earls, pres.; W. A. Barber, v. p.; Edw. P. Hackett, treas.; preceding, with Hon. David S. Rose, W. B. Hill, Howard Nunnemacher, Geo. P. Mayer, John G. Baxter and Jas. R. Ricketson, directors; Albert L. Waters, gen. mgr.

Inc. Sept. 8, 1903, in Arizona. **Cap.**, \$2,000,000, increased, 1905, from \$1,000,000 to \$1,250,000, and again increased, Jan., 1910; shares \$1 par. Bonds outstanding were \$100,000, at last accounts. Controls the Twin Buttes Railroad Co. Wisconsin Trust Co., transfer agent and registrar. Annual meeting, third Tuesday in January.

Property: the King and Glance mines with 61 claims, partly patented,

1,250 acres, in the foothills of the Sierrita mountains, in the Helvetia district. Lands are reported to carry fissure veins in limestone, and contact deposits having a limestone foot and granite-porphry hanging. The various properties of the company had about a mile of workings 1906, estimated to show 50,000 tons of ore blocked out for stopping, averaging 7% copper and 1.85 oz. silver, with traces of gold, which estimate was too high.

Development: the Senator Morgan shaft, of about 500' depth, shows a vein of 25' width, carrying sulphide ore.

The new Main shaft, 700' deep, has a hoist and compressor.

The Copper Glance mine has a 415' shaft, sunk on an orebody having a 30' gossan, succeeded by about 200' of carbonate ore. On the 300' level a crosscut passed through 35' of marcasite carrying kidneys of chalcocite, and a crosscut on the 400' level encountered a promising ledge of soft leached ore.

The Copper King mine has a 200' shaft, showing carbonate ores in the upper workings and sulphides in the bottom.

Equipment: includes a 300-h. p. steam plant, burning wood and petroleum, with a 125-h. p. Leyner double-drum hoist, capable of raising 3-ton loads, and a 10-drill Leyner compound air compressor at the main shaft. There is a gasoline plant at the Copper King mine. There are 14 dwellings, including the power house, machine shop, smithy and a general store.

The Twin Buttes railway, 25 miles in length, running from Twin Buttes to Tucson, completed 1906, has 1 locomotive and 3 flat cars. It is said that the company sold its line to the Southern Pacific.

Production: 258,672 lbs. copper and 3,446 oz. silver in 1910. Shipped about 100 tons daily in 1912, to the Pioneer smelter. The Glance mine has been worked under lease to E. G. Bush since 1913. Property not considered especially promising.

TWIN CITIES MINING CO.

MISSOURI

Address: Geo. Moore, mgr., Webb City, Mo. Inc. in Mo. **Cap.**, \$50,000. Is a merger of the Laura Alice and Ben Franklin mining companies.

Operates lands leased from Daugherty & Davey, in Jasper Co., on Center Creek, between Webb City and Carterville, using the 175-ton Davey No. 1 mill. Developed by two shafts, steam power being used. Work is in progress on the 160' level on a face said to show 18' ore.

TWIN CITY MINING & MILLING CO.

MONTANA

Elliston, Powell Co., Mont. **Officers:** W. M. O'Connell, pres.; F. B. Hubbard, v. p.; E. J. P. Dwelly, sec.-treas.; preceding, with P. H. McCauley, J. L. Hurd and John Churchill, directors; Allan McNaughton, gen. mgr.

Inc. in Montana. **Cap.**, \$500,000; shares \$1 par; issued, 300,000, fully paid and nonassessable. Annual meeting, April 4.

Property: 5 claims, 70 acres, patented, in Elliston district, 8 miles from Elliston, on east side of Telegraph creek. Ore occurs in granite and management reports 6 veins, of which one is developed by 2 shafts, 185' and 50' deep, and a 250' tunnel with 3 crosscuts. Total workings 525', said to prove vein 18' wide, traceable for 3,000' and proven to 170' depth, carrying 5% copper, 4% lead, 19 oz. silver and \$3 gold per ton. Values said to increase in depth and sulphide ores expected at about 300'.

Equipment: includes steam power, one 40-h. p. hoist and several buildings. Reported in March, 1915, that development would be resumed during the summer; nothing reported since.

TWIN-EDWARDS COPPER MINE CO.

NORTH CAROLINA

Greensboro, Guilford Co., N. C. Inc. Sept., 1902. **Cap.**, \$100,000; shares \$100 par. Owns sundry old properties, including the Twin mine, with an 18' vein, which was worked previous to the American Civil War. Property

shut down many years, but company understood to be only dormant, not dead.

TWIN LAKES MINING & MILLING CO.

COLORADO

Twin Lakes, Colo. G. W. Boyce, mgr. Inc. with Leadville and Chicago capital to lease and operate the Gordon-Bengal Tiger mine in the Twin Lakes district, Lake county. Working capital provided, \$100,000.

The Gordon-Bengal Tiger was at one time a large producer. In 1897 it was sold for \$225,000, but litigation prevented operation for seventeen years. At the time of leasing, reserves were said to be between 40,000 and 60,000 tons of \$10 ore. Ore is white quartz with some pyrite and galena, gold occurring free.

Equipment: includes new 10-stamp mill, which began operations latter part of 1915.

TWO LAKES COPPER MINING CO., LTD.

ONTARIO

Idle. Office: Oil City, Pa. Mine office: Sowerby, Algoma, Ont. Officers: Dr. E. L. Dickey, pres.; S. F. Amsler, v. p.; D. G. Bailey, sec.; J. C. Wilkins, treas.; F. W. Bailey, gen. mgr.; preceding, with J. W. Russell, C. W. Coulter, G. W. Freeman and Edw. Schwabenbauer, directors.

Inc. Oct. 12, 1906, in Ontario. Cap., \$500,000; shares \$1 par; nonassessable; issued, \$270,000. Annual meeting, first Tuesday in November.

Lands: 8 claims, 1 fractional, 300 acres, freehold, including the Robinson and Tupper mines, 8 miles from Thessalon, and 4 from a railway. The property shows pre-Cambrian rocks, slate, conglomerate and greenstone, carrying a number of fissure veins, of which 3, under development, are of 2 to 10' estimated average width, carrying sulphide ores of about 4.5% copper, with small quantities of silver and gold. **Development:** by shafts of 50', 25' and 10'.

Equipment: includes a 60-h. p. boiler and 35-h. p. hoist. There are 8 small buildings. At last reports the management was planning further development as soon as the financial situation improved, but is apparently still adhering to a "watchful waiting" policy.

TYEE COPPER CO., LTD.

BRITISH COLUMBIA

Office: 45 Leadenhall St., London, E. C., Eng. E. V. Hearn, agent, Victoria Trust Bld., Victoria, B. C. Works office: Wm. J. Watson, mgr., Ladysmith, Vancouver Island, B. C. Thos. Headland Wilson, chairman; Harry von Berg and H. Loeffler, directors; Wm. Gardner, sec.

Inc. April 4, 1900, in Great Britain. Cap., £180,000, increased 1901 from £120,000; shares £1 par; fully issued and paid.

Accounts: for year ending April 30, 1915, show a debit balance of £120,205; cash, £379; debtors, £7,947; creditors, £1,779. Reserve for royalties owing, £7,333; mortgage on property, £19,100.

Dividends: 10%, or 2 shillings in 1904, 10% in 1905, 5% in 1906, 7½% in 1907, none since.

Property: 1,247 acres, including 13 claims, crown granted, 342 acres, a 45-acre smelter site and 800 acres timber lands. Company had option on the Big Strike group of claims, on Ship bay, near Valdez, Alaska, and also prospected for coal, with diamond drills, on islands adjacent to the E. coast of Vancouver Island.

The Tyee mine, on Mt. Sicker, in the Somenos district, 11 miles N. W. of Duncans, and about 80 miles from Victoria, yielded only 1,200 tons of ore 1907, and has been idle since. The orebody was rich, but shallow, and although the vein was explored thoroughly, nothing of value was found.

Company has been looking for a new mine for several years. It had a bond and lease on the Cornell mine, at Van Anda, Texada island, B. C.,

and was reported to have acquired the McGraw claims, adjoining the United Metals property on Granby Bay, for \$100,000 in 1914.

Smelter: known as the Ladysmith works, is well located, on a 45-acre site on Oyster harbor, and treated custom ores from as far N. as Alaska and as far S. as Mexico. The smelter was remodeled and practically rebuilt 1909-10. There is a 40x210' wharf, having an electric hoist, connected, by an elevated incline trestle, with the smelter bins, which are of 5,400 tons capacity. The works are terraced throughout, permitting handling of material by gravity, and have a capacity of 500 tons daily.

The furnace building has 42x120" and 48x160" Allis-Chalmers blast furnaces, of 200 and 300 tons daily capacity, respectively. The furnaces use a hotblast, and have water-jacketed forehearth, slags skimming into a settler, and thence into a launder, where granulated and sluiced out by running water to low ground in the bay for filling. The 8x11x165' dust flue leads to a 90' smokestack of 7' diameter. The furnaces reduce 9.45 tons of ore and flux with 1 ton of coke. Equipment also includes a briquetting plant for fines. Furnace product is a 40% copper matte, shipped to American works for refining. Smelter closed down Dec., 1911. The smelter power plant uses electric current and includes 2 Connorsville blowers and an Ingersoll-Sergeant air compressor. Miscellaneous buildings at the smelter include a good laboratory, smithy and machine shop.

Smelter production was 3,604,474 lbs. copper in 1903; 5,045,000 lbs. in 1904; 3,039,398 lbs. copper, 103,474 oz. silver and 5,952 oz. gold in 1905; 3,173,431 lbs. copper in 1908; 2,148,058 lbs. copper in 1909; 45,758 tons of ore, yielding 3,392,901 lbs. copper, 41,128 oz. silver and 10,041 dz. gold in 1910. In 1911, 42,030 tons of custom ore were treated. In 1913 the Tye Co. leased the smelter to the Ptarmigan Mines, Ltd., for the ores from the Big Interior mine, and Mr. H. H. Johnston was sent out as manager.

TYRONE COPPER CO.

NEW MEXICO

Properties at Tyrone, Grant Co., N. M., adjoining the Chemung group, are now owned by the Phelps, Dodge Co.

UBEHEBE COPPER MINES & SMELTER CO.

CALIFORNIA

Idle. **Office:** 956 Rockefeller Bldg., Cleveland, Ohio. **Operating Office:** Tonopah, Nev. **Mine Office:** Lone Pine, Inyo Co., Calif. **Officers:** John Salisbury, pres., St. Francis Hotel, San Francisco, Calif.; Henry G. Merry, v. p. and cons, engr.; J. J. Griffith, sec.-treas.

Inc. 1907 in Nevada. **Cap.**, \$3,000,000; shares \$1 par.

Property: 50 claims, 1,000 acres in the Butte range, 48 miles from Thorpe on the Bullfrog & Goldfield railway, said to show veins of 8 to 50' width, in granite and limestone, carrying copper ore with gold-silver values. Property advertised 1907 as a mountain of gold-silver-copper ore nearly 2,000' high.

Development: by an 80' shaft and 145' tunnel, with some work on other holdings. The company has done annual assessment work but contemplates no further extensive development until the financial situation improves, and means of transportation are devised. Was a promotion in 1907 of Pearce Hill & Co. of Baltimore, Md. Property has merit and systematic development is needed.

UMATILLA-TONOPAH MINING CO.

NEVADA

Office: 265 Russ Bldg., San Francisco, Calif. **Mine office:** Tonopah, Nev. **Officers:** H. Zadig, pres.; A. S. Wolberg, v. p.; C. D. Olney, sec.; preceding and R. L. Colburn, directors; A. H. Haskins, supt.

Inc. in Nev. **Cap.**, \$1,500,000; shares \$1 par; assessable. **Company**

office, transfer office Registration Surety Co., San Francisco, registrar. Listed on San Francisco and Salt Lake exchanges.

Property: 8 claims, 80 acres, in Tonopah district. Developed by 1,200' shaft. Diamond drilling said to have struck \$1 to \$7 ore at a depth of 1,762'.

Reported in May, 1916, that Umatilla-Tonopah Mining Co. and Montana-Tonopah Mng. Co. would merge and operate under name of the After All Mines Co.

UNA MINING CO.

IDAHO

J. M. Hinton, supt., Oro Grande, Ida. **Officers:** J. W. Turner, pres.; Thos. A. White, v. p.; Ralston McCraig, sec.-treas., with Dr. W. B. Phillips and W. S. Willis, directors.

Inc. 1914. Cap., \$1,250,000; shares \$1 par.

Property: the Una mine, near Oro Grande shows a vein 100' wide, carrying pay streaks of a few inches to 5' thick. In the 40' shaft the ore is said to average \$7 per ton in gold with some silver. **Development:** by 900' tunnel to cut vein at 200' depth.

UNCLE SAM CONSOLIDATED MINING CO.

UTAH

Office: 516 Dooly Block, Salt Lake City, Utah. **Mine office:** Eureka, Juab Co., Utah. **Officers:** Hon. John Dern, pres.; M. P. Braffet, v. p.; Frank D. Kimball, treas.; Fred C. Dern, sec.; J. C. Dick, gen. mgr.; C. C. Griggs, supt.

Inc. June 29, 1900, in Utah. Cap., \$750,000; shares \$1 par; assessable; increased, Aug. 21, 1912, from \$500,000; issued, \$550,000, with 1 assessment levied. The company formerly owned a 50% stock interest, 400,000 shares, in the May Day Mining & Milling Co., which stock was distributed 1910, to shareholders, as a stock dividend. The Richmond & Anaconda Mining Co., adjoining, was absorbed 1912, by the Uncle Sam.

Shares are listed on the Salt Lake exchange. Annual meeting, first Monday in June.

Regular dividend rate was 2 cts. per share monthly, changed June, 1910, to 2 cts. quarterly, with an extra dividend of 3 cts., Dec., 1910, dividends for 1910 having been 19 cts. per share; total dividends to April, 1913, were \$470,000; none since.

The annual statement for year ended May 31, 1916, shows cash on hand, \$8,703.

Receipts:		Value.	Disbursements:	
Ore sales, zinc ore.....	\$	6,824.31	Ore sales, paid lessees, exp.	
Ore sales, lead ore		7,973.14	on ore	\$ 8,568.66
			Mine expense	2,179.79
Total		\$14,796.45	Mine labor	2,511.38
May Day M. & M. Co. div.		33.11	Assaying	75.40
Gen. exp.		52.00	Gen. expense	702.84
Cash on hand, June 1, 1915		9,333.10	Salaries	1,200.00
			Taxes	273.08
Total		\$24,214.66		
			Totals	\$15,511.15
			Cash on hand, June 1, 1915	8,703.51
			Total	\$24,214.66

Property: 4 claims, patented, in Tintic district, including the Humbug mine, which is the principal property, producing mainly auriferous silver-lead ore of both smelting and milling grades. A good orebody was developed, 1911, in the western part of the property. Equipment is electrical. Mine worked by 5 lessees in 1916.

Production: in 1915, 183,396 tons zinc ore and 520,744 tons lead ore.

Last report states that company expects to do development on west part of the property, with funds derived from royalties. This work will it is hoped disclose the southern extension of the Yankee orebody, recently opened.

UNDERWRITERS LAND CO.

Joplin, Mo. **Officers:** G. H. Worthington, pres.; A. Good, sec.; F. N. Bendelari, treas.; F. R. Harrington, gen. mgr.; with J. W. Gibbons, A. E. Bendelari, directors.

Inc. 1901. Cap., \$1,000,000; shares \$1 par; outstanding \$1,000,000; non-assessable. Annual meeting in February. No bond issues. Transfer office: 812 Hippodrome Bldg., Cleveland, O. **Registrar:** Delaware Trust Co., Wilmington, Del. No dividends in 1915.

Property: 240 acres, leased and 232 acres, in fee, in Jasper Co., Mo., and Ottawa Co., Okla. The blende ore is hoisted by vertical shaft, total depth of working, 250'. The concentrating mill yields 62% zinc concentrates.

UNION AMALGAMATED MINING CO.

NEVADA

Manhattan, Nev. **Officers:** C. F. Wittenberg, pres.; J. H. Forman, v. p.: Percival Nash, sec.

Inc. in Nevada. Cap., 2,000,000 shares; 10c par. C. D. Olney, 265 Russ Bldg., San Francisco, Calif., transfer agent. Company is a merger of the Manhattan Amalgamated Mining Co., Litigation Hill Merger Co., and the Manhattan Earl Mining Co.

Property: 6 claims, 74 acres; 3 claims patented, covering Litigation Hill at Manhattan, Nye Co., said to show gold-silver ore in fissure veins, from 4-8' in width. **Development:** mainly by the 350' Earl shaft with 5 levels. The three properties have produced 9,615 tons ore returning \$183,848, ore running from \$15 to \$21 per ton.

Equipment: includes electric hoists, transformers, surface track, ore cars and the Manhattan Milling & Ore Co.'s 10-stamp mill, cyanide plant and sampler. Work will be prosecuted through the Earl shaft, 350' deep and connecting with five levels.

Total production: of the properties merged, about 10,000 tons; value \$15 to \$21 per ton. A large amount of mill ore, running \$7 to \$10 per ton has been developed by lessees, which will be treated in the mill, recently overhauled and repaired.

UNION BASIN MINING CO.

ARIZONA

Office: 67 Milk St., Boston Mass. **Mine office:** Golconda, Mohave Co., Ariz. **Officers:** N. L. Amster, pres.; C. R. Jeffers, v. p., sec-treas., with Otto Sussman, directors. J. D. Wanvig, Jr., supt.

Inc. in Ariz. Cap., \$1,000,000; shares \$1 par; 835,350 outstanding. Annual meeting, third Tuesday in March.

Property: the Golconda zinc mine, at Golconda, 16 miles N. of Kingman. Developed by 1,000' shaft, to be sunk to 1,200' level.

Equipment: includes a 200-ton flotation mill. Electric power is obtained from the Desert Power & Water Co. at Kingman. Property is an important producer, 1916.

UNION CHIEF MINING CO.

UTAH

Office: Newhouse Bldg., Salt Lake City. **Officers:** G. L. Bemis, pres-mgr., Santaquin, Utah; Geo. Baglin, sec.; A. N. Larson, supt.

Inc. 1903 in Utah. Cap., \$1,000,000; shares \$1 par; assessable. Listed on Salt Lake Exchange.

Property: 18 claims, 6 patented, 370 acres, in Santaquin mining district, shows lead-silver ore in vein reported to be about 6' wide.

Development: over 8,000' of tunnels and drifts. Reported to have found

high-grade ore at 550' depth in 1916, but as only picked samples seem to have been assayed, no averages can be given. Equipped with electric power line and compressor. Extracting several tons of ore daily, 1916, with small force of men.

UNION CONSOLIDATED MINING CO.**NEVADA**

Offices: 265 Russ Bldg., San Francisco, Calif., and Virginia City, Nev. **Officers:** H. L. Slosson, Jr., pres.; W. W. Turney, v. p.; A. P. Swain, sec., with Whitman Symmes, J. H. Goldman and H. G. Dodds, directors. Whitman Symmes, supt.

Inc. Nov., 1904, in Calif. Cap., \$200,000; shares \$1 par; all outstanding; assessable. **Transfer office:** 381 Bush St., San Francisco, Calif. **Registration Surety Co., San Francisco, registrar.** Annual meeting, third Thursday in Nov. Listed on New York Curb and San Francisco Exchange. Company is under same management as Mexican Gold & Silver Mining Co., which see.

Gross earnings in 1914-1915, \$72,615, all from ore sales; operating expenses, \$76,095.

Property: 2 claims and 6 fractions, patented, located on the Comstock lode at Virginia City, carries silver ore. See Mexican Gold & Silver Mining Co. for geology of Comstock lode. Present work is on the 2,500' level and above; ore being shipped from the 2,400' level ranges from \$11 to \$32 per ton; from the 2,400' level, \$16. The old Union shaft has been retimbered and put in first-class condition from the 2,000' to the 2,400' level; this will give better ventilation to the north end lower levels and should make a material reduction in operating costs. Greatest depth of workings, 2,700'; total underground workings, 6,400'. Ore blocked out, April 20, 1916, 6,000 tons of \$20 ore.

Equipment: includes electric hoists, 2 air compressors of 75 and 100-h. p. each and electric power.

Pumping is done by the United Comstock Pumping Ass'n. Ore is treated at the Mexican mill; tonnage treated in 1915 amounted to 3,117 tons, averaging \$15.60 per ton; a 92% extraction was obtained.

Production: to 1916, approximately \$3,000,000.

New work planned consists of completing the Union shaft to 2,700' level, and reopening the 2,300', 2,400' and 2,700' levels in the main Comstock and "East vein."

UNION COPPER CO.**NEVADA**

Yerington, Nev. Title changed to Standard Copper Co., in 1912.

UNION COPPER LAND & MINING CO.**MICHIGAN**

Office: 70 State St., Boston, Mass. **Mine office:** Houghton, Mich. **Officers:** Harry F. Fay, pres.; Harold H. Anthony, Ezra H. Baker, Samuel Carr, Albert B. Merrill and John G. Stone, directors. C. J. Morrissey, sec-treas.

Inc. 1863, and reincorporated 1893, in Michigan. Cap., \$2,500,000; issued, \$2,000,000; shares \$25 par, \$2.06—2/3 share, paid in. Old Colony Trust Co., Boston, registrar; American Trust Co., Boston, transfer agent. Stock listed on Boston Stock Exchange. Annual meeting, fourth Thursday in March. Books close 20 days before. Net cash balance, Jan. 1, 1916, \$13,745.

Dividends: in 1899 company paid 50c per share and 1/8 share of stock of Old Colony Copper Co. and in 1907 and 1908 dividends of \$2 and of 50c per share respectively were paid; none since.

Property: 5,323 acres of land, carrying both surface and mineral rights, and 1,043 acres additional of mineral rights only, comprising 200 different tracts on the Keweenaw copper belt in Keweenaw, Houghton, Ontonagon and Gogebic counties. Company is primarily a land-holding corporation,

although its charter empowers it to carry on mining operations as well and it has from time to time investigated various tracts to determine their mineral value. Greater part of the land is covered with timber, stated by company's president to be valued conservatively at \$125,000. In 1910-11, exploratory work was done by diamond drill on 320 acres of land, lying W. of the Allouez and North Kearsarge mines. The drill holes cut the Allouez conglomerate and the Quincy-Pewabic amygdaloid, the latter showing good copper values; a number of other beds carrying indications of copper were also cut. Through sales of part of its timber, concluded 1914 and 1915, the company is amply supplied with funds and is saving a considerable amount yearly in taxes.

UNION COPPER MINE

NORTH CAROLINA

Office: care Sig. H. Rosenblatt, 18 Broadway, New York. **Mine address:** % Thos. Smith, Gold Hill, Rowan Co., N. C.

Lands: 550 acres, freehold, about 15 miles from Salisbury, in Rowan and Cabarrus counties, well watered and timbered. The property has schists, carrying 5 veins with average strike of N. 20° E. and practically vertical dip, of 2 to 20' width, 3 of which carry copper ores, the other 2 reported to carry silver and gold ores respectively, being but slightly developed. The copper veins are mineralized zones carrying lenticular shoots of ore, longest about 100' in length.

Development: is on the Big Cut copper vein, trenched at intervals for a distance of about 1 mile, and having 10 shafts, deepest 650'; these shafts were claimed to show a vein of 20 to 40' width, but actual maximum width is about 20' only. The Big Cut vein shows oxidized ores and a little native copper in the upper workings, succeeded by chalcopyrite, with quartz gangue. A careful sampling by Dr. A. R. Ledoux gave averages of 4.4% copper, 4 oz. silver and 40 cts. to \$1.20 gold per ton. No. 7 shaft, of 200' depth, shows a vein 4" wide at surface and 3 to 4' wide on the bottom level, where the ore is claimed to average 4.5% copper. There are 14 shafts all told, and the mine has about 5,000' of workings. The property has been claimed, in the press, to have produced about \$1,000,000 worth of gold in early days.

Equipment: machinery plant is extensive, but archaic, including 27 boilers, 18 hoists and a new Ingersoll-Rand air compressor. There is a small electric light plant.

Buildings include a machine shop, smithy, engine house, boiler houses, foundry, office building, 50-room hotel, 130 dwellings and a stable for 400 horses and mules. A little development work was done in 1915.

UNION COPPER MINES CO.

NORTH CAROLINA

Company dissolved. Formerly owned the Union Copper Mine.

UNION DEVELOPMENT CO.

IOWA

Owns Blazing Star mine, Calaveras Co., Calif. See Blazing Star mine.

UNION HILL MINING CO.

CALIFORNIA

Office: 716 Phelan Bldg., San Francisco. **Mine office:** Grass Valley, Calif. **Officers:** F. W. McNear, pres.; G. S. Johnson, v. p.; O. B. Johnson, sec.; E. L. Oliver, treas.; Errol MacBoyle, gen. mgr.

Property: about 160 acres in Grass Valley district, Nevada Co. Ore is free milling gold, but some tungsten ore has been shipped. The shaft, 800' deep, will, it is reported, be sunk to 1,200'. Most of the gold produced was extracted from upper 300' of the mine.

Equipment: includes a hoist good for 2,000', 20-drill compressor, black-smith and machine shops, pumps, 20-stamp mill, assay office, buildings, etc.

Production: of bullion 1915-16 has been reported to be from \$12,000 to \$15,000 monthly. Total production is said to exceed \$2,000,000.

UNION LEASING CO.

Office: 715 E. & C. Bldg., Denver, Colorado. Owns no mining properties, but operates under lease the mine of the Gold Sovereign Mining & Tunnel Co., which see.

UNION MINES CO.

Office: Union, Nev. **Officers:** W. P. Fairman, pres.; E. T. Comfort, sec.; L. R. Thatcher, mgr. Operates a silver-lead mine, 35 miles S. of Palisade, Eureka Co., Nev. A close corporation and prefers not to publish information.

UNION MINES CO.

Union, Wash. Company owns a group of claims carrying veins with silver-lead ores, said to average \$25-\$45 per ton. **Development:** by a 200' shaft with a level at 190'. Twenty-five men are employed and shipments made occasionally. Company plans sinking shaft to depth of 400'.

UNITED COPPER CO.

Dead. Fully described Vol. XI, Copper Handbook.

The preferred stockholders' protective committee of the United Copper Co. stated Aug., 1915, that it had been unable to obtain any offer from the holders of the company's pledged assets which justifies the committee in continuing its efforts either to formulate a reorganization plan or redeem the pledged assets; that \$750,000 would have to be provided to redeem assets, which would require a cash assessment of about \$20 per share, which it is believed could not be raised under existing conditions. Committee also stated that it had considered possibility of instituting proceedings to recover wasted assets, but decided that there were no reasonable prospects of obtaining substantial results in such proceedings. Preferred stockholders were notified that stock deposited with the committee would be returned on presentation of certificates of deposit to the Central Trust Co. of New York.

The \$10,500,000 cash which was turned over to the United Copper Co. at the time that corporation sold its principal physical assets to the Rede Metals Mining Co., controlled by the former Butte Coalition Mining Co., was made the subject of an investigation by the receivers of the United Company in 1914.

When F. A. Heinze was on trial in the United States Court in New York several years ago it was charged that for a time preferred dividends were paid from capital account, while two of the common dividends were not from earnings but from money borrowed from Heinze and his associates.

Explanation is yet to be made as to what became of the cash and assets of the United Copper Co. treasury, both before and after the Assets Realization Co. became entangled with it.

UNITED COPPER-GOLD MINES CO.

Office: Murphy Blk., Salem, Ore. Mine at Selma, Josephine Co., Ore. **Officers:** W. S. Low, pres. and gen. mgr.; E. O. Mull, v. p.; Daniel Webster, sec.; C. E. Lebold, treas.; preceding with W. C. Buckner, James Greig and H. Neugabauer, directors.

Cap., \$500,000; shares \$1 par; issued 219,654. Annual meeting, first Monday in August.

Property: on Pickett creek, near Merlin, has been sold and company now owns 11 claims, in Illinois district, Ore., about 12 miles N. W. of Selma. Ore occurs, in serpentine near porphyry and diorite contacts. A dark gossan sometimes stained with copper is underlain at 15' depth by ore carrying 18% copper and 5 to 10 oz. silver and upwards of \$1 gold, according to management.

Development amounts to 1,000' with a 500' tunnel and 200' crosscut, ex-

COLORADO**NEVADA****WASHINGTON****UNITED STATES****OREGON**

posing 1,000 tons of ore. Property is 34 miles from S. P. R. R. Is regarded as a prospect which will be worked on a large scale when railroad transportation is nearer.

UNITED COPPER MINING CO.**WASHINGTON**

Office: 417 Hutton Bldg., Spokane, Wash. **Mine office:** Chewelah, Stevens Co., Wash. **Officers:** Conrad Wolffe, pres.-gen. mgr.; W. G. Collins, v. p.; M. E. Poole, sec.-treas.; with Daniel Hoch, J. H. Griffith, S. Rosenhaupt, directors. E. A. Wolffe, supt.

Inc. 1906 in Washington. **Cap.**, \$1,000,00; shares \$1 par; fully issued; assessable. Last assessment Sept., 1914, ½ cent a share. Annual meeting, Jan. 28.

Annual report for 1915 shows a net indebtedness Jan. 1, 1916, of \$84,928. Total net smelter returns for 1915 were \$117,269. Net profits for first quarter of 1916 were \$14,029.

Dividends: \$40,000 to end of 1912.

Property: 11 claims, patented, 123 acres, and 240 acres miscellaneous lands, 4½ miles N. E. of Chewelah, the nearest rail point. The property shows shale and schist, and a vein with an orebody of 6' estimated average width, carrying malachite, chalcopryite and tetrahedrite, reported by the company to have been proven to average 2.5% copper, 5 oz. silver and 40 cts. gold per ton. Ore is mainly chalcopryite, with streaks of gray copper ore on both walls, latter carrying up to 24% copper, 400 oz. silver and \$2 gold per ton.

Development: by shafts of 1,000', 175' and 275', and a 1,700' tunnel on the 400' level, of which the first 735' is a crosscut and balance a drift, with a 3,700' lower tunnel, on the 1,000' level, planned to be driven 5,000' to gain a back of 1,100'. Considerable development work was done in 1914-15; diamond drilling reported to prove the orebodies to depth of 1,400'. The mine has about 40,000' of workings.

Equipment: includes 2 hoists, air compressors, capacity 1,200 cu. ft., 11 power drills, 2 pumps, and an electric light plant. Electric power is obtained from the Meyers Falls Power & Light Co. There are several mine buildings, including a 15x24' frame machine shop.

In 1915 the capacity of the 125-ton concentrator was increased to a daily capacity of 235 tons by the addition of 50 stamps, making a total of 74, and an oil flotation plant, in which Gen. Naval Stores oils are used. Recovery to date has been from 77% to 80%. Ore and concentrates are shipped to the Cons. Mng. & Sm. Co., at Trail, B. C.

Production: for 1915, 650,995 lbs. copper, 103,195 oz. silver and 8 oz. gold.

UNITED COPPER SECURITIES CO.**NEW YORK**

(Dead). Fully described Vol. XI, Copper Handbook. Also see United Copper Co. Assets apparently consisted solely of a \$30,000,000 "damage" suit brought early 1913, against the Amalgamated Copper Co., and its subsidiaries, which was dismissed in U. S. District Court, New York, Dec., 1914.

UNITED EASTERN MINING CO.**ARIZONA**

Oatman, Ariz. **Officers:** F. A. Keith, pres. and supt.; G. W. Long, v. p.; W. K. Keith, sec.; R. I. Rogers, treas.; F. A. Keith, G. W. Long, J. L. McIvor, D. C. Jackling, S. W. Mudd, R. C. Nowland, R. I. Rogers, W. K. Ridenour, P. Wiseman, directors.

Inc. 1914, in Ariz. **Cap.**, 1,500,000 shares; par \$1; outstanding 1,200,000. Equitable Trust Co., New York, transfer office. Listed on Los Angeles stock exchange and on New York and Boston curbs.

Property: 194 acres, patented, at Oatman, Mohave Co., adjoining the Tom Reed mine on the N., and covering the N. W. extension of Tom Reed vein.

Development: main shaft 665' deep, with crosscuts opening the vein on the 303', 465', 565' and 665' levels. Development to June, 1916, is said to indicate that average width of orebody is about 20' and value about \$26 per ton. Before the vein was cut on the 665' level the ore reserve estimate gave 115,253 tons of \$23.84 ore.

Equipment: has been ordered for a 400-ton cyanide mill; the first 200-ton unit is under construction. Crushing will be by gyratories, ball and tube mills, and treatment by Dorr counter-current decantation and zinc dust precipitation.

Is a great gold property, which will soon be making large earnings.

UNITED GLOBE MINES.

ARIZONA

Office: 99 John St., New York. **Mine office:** Globe, Gila Co., Ariz.

Officers: Jas. Douglas, pres., A. C. James, v. p., Geo. Notman, sec.-treas., with C. H. Dodge, Jas. MacLean, Wm. Church Osborn and E. Hayward Ferry, directors. **Cap.**, \$2,300,000, shares \$100 par. Is controlled through ownership of entire stock issue, by the Old Dominion Co.

Income account for 1915 was \$1,454,323 from sales of ore and limestone, with expenses of \$642,072, giving net income of \$812,251, and a total surplus of \$277,468, Dec. 31, 1915.

Dividends: \$6.50 in 1905; \$6 in 1906; \$4 in 1907; \$20 in 1912; \$30 in 1913; \$18.50 in 1914 and \$27 in 1915, a grand total to 1916 of \$2,576,000. In 1916 has paid \$33 per share to July 1.

Property: 60 claims and 4 mill sites, lying W. of the Old Dominion group, including the Grey, Buckeye and Buffalo mines. **Development:** is by several shafts and through the workings of the Old Dominion, of which this mine is practically a part, carrying the main vein of the Old Dominion in which the greater part of the development work is centered. The Kingdon and Grey are the operating shafts. In 1915 operations were confined to ore extraction, exploration and development work on the Old Dominion, Grey, and Buffalo veins. Operations in the Grey mine were suspended Aug., 1914, but were resumed Oct., 1915.

Good productive ground is opened on the 800', 1,000', 1,200', 1,400' and 1,600' levels in the Old Dominion vein. The orebodies are extensive, but erratic, and the ores are decidedly silicious, but are in good demand at the smelting works of the southwest for converter charging. Practically all of the ore is treated in the Old Dominion smelter. An enormous tonnage of concentrating ore, of 3 to 4% copper, has been developed, as well as large quantities of high-grade smelting ore up to 10% in copper tenor. An underground haulage line has been installed on the 14th level E. drift from "A" shaft of the Old Dominion mine.

The Kingdon Shaft is being sunk from the 14th to 16th level. This will permit the shaft to be used for hoisting and ventilating purposes down to the present lowest operating level of the mine, and will greatly facilitate mining operations on the east side. It is planned during the coming year to add at the Kingdon Shaft an adequate hoisting plant, together with necessary surface and underground equipment to allow of the entire Old Dominion and United Globe tonnage being hoisted at this point in cases of a shut-down at the "A" shaft.

Production:

Year	Copper			Silver			Gold				
	Lbs.	Oz.	Oz.	Year	Lbs.	Oz.	Oz.	Year	Lbs.	Oz.	Oz.
1906	4,607,537	5,277		1912	12,252,073	124,361	789				
1907	3,399,084	12,382		1913	11,348,100	119,587	1,536				
1908	2,599,155	29,308	17	1914	11,086,674	91,582	1,580				
1909	3,674,728	43,486	33	1915	11,536,021	105,109	1,508				

(See Old Dominion Co.)

The following table gives a comparison of tonnages and grades of ore for the last two years:

	Dry Tons		% Cu.	
	1915	1914	1915	1914
Smelting oxide ore.....	19,112	14,352	6.90	6.38
Smelting sulphide ore.....	292	12,639	1.01	1.69
Concentrating ore	119,537	121,812	3.63	3.23
Silica converter lining.....	2,299	6,402	4.73	7.44
Total	141,240	155,205	4.08	3.57

All the 141,240 tons of ore produced was shipped to the Old Dominion Copper M. and S. Co. The metal production from this ore was 11,536,021 lb. of fine copper, 105,109 oz. of silver and 1,508 oz. of gold. The costs at Globe for mining, pumping, development and other expenses at the mine were \$624,574, or about \$4.44 per ton of ore.

UNITED GOLD MINES CO.

COLORADO

Office: Exchange Nat'l Bldg., Colorado Springs, Colo. **Officers:** A. E. Carlton, pres.; H. McGarry, v. p. and gen. mgr.; R. C. Wilson, sec.-treas.; L. J. Russell, supt.; R. Roelofs, L. J. Carlton, I. T. Snyder, directors. Stock is listed on Colorado Springs Stock Exchange.

Controls several subsidiary mining companies at Cripple Creek, Teller Co., including the W. P. H., Damon and Montrose Co., Ironclad Hill, May B. Squaw Mountain, Deadwood, Wild Horse, Regua Gold Mining & Milling Co., B. H. & S. M. Co. on Bull Hill. Company leases its mines.

Production: by lessees in 1915, 13,966 tons of ore. Gross value, \$181,657. Net profits, \$7,221.

UNITED GOLD MINES CO.

IDAHO

Officers: % Underwriters Idaho Mines Syndicate, 120 Broadway, New York and Boise, Idaho. **Officers:** Jas. H. Hawley, pres.; L. M. Hart, v. p.; Geo. W. Fletchers, treas.; Geo. C. Luebbers, sec.; J. A. Czizek, mgr.; above are directors.

Inc. April, 1916, in Del. **Cap.**, 500,000 shares; \$5 par; outstanding 199,800 shares. Security Transfer & Registrar Co., New York, transfer agent and registrar. Listed on New York Curb.

Property: 2 groups of claims, 120 acres, including the Little Giant and Charity mines, in the Warren mining district, Idaho Co., 49 miles from a railroad. Has been idle for several years. Claims said to cover 2 distinct veins for 4,500' along the outcrop. In addition company owns a millsite, and 4½ miles of ditches and pipe lines, with water rights.

Ore: is gold, in a series of parallel quartz veins. **Development:** by tunnels and shallow shafts.

The Little Giant, said to have yielded \$1,000,000 in the past, is claimed to show an orebody 4' wide and 50' thick, proven for 120' east of the shaft. That will assay better than \$40 per ton, with \$20 dump ore. No work has been done below the 200' level. Present management is driving a tunnel to cut the vein 400' below present workings; estimated time to complete this tunnel, 9 months from March, 1916. The Charity mine has been developed by shallow tunnels. Plans continuing a tunnel that will cut the vein 100' below present workings and building a 10-stamp mill. No estimate of ore reserves given.

Property is a prospect.

UNITED GREENWATER COPPER CO.

CALIFORNIA

Office: Tonopah, Nev. **Mine office:** Dale, via Amboy, San Bernardino Co., Calif. Company is now operating the Supply mine and owns the O. K.

mine. This group is developed by shafts of 800' and 1,100'. Has a 50-ton cyanide plant which was enlarged in 1915. Reported to have treated 60 tons of ore daily, 1915, averaging \$14 per ton. Milling costs said to be 75c per ton.

UNITED LEAD CO.**COLORADO**

Controlled since 1906 by the National Lead Co., which see.

UNITED LEAD MINING CO.**IDAHO**

Office: 616 Old National Bank Bldg., Spokane, Wash. Mine near Osburn, Shoshone Co., Idaho. **Officers:** E. S. Ross, pres.; Dr. W. B. Pickrell, v. p.-gen. mgr.; C. D. Muxen, sec.-treas., directors. Thos. Stoll, supt.

Inc. in Washington. **Cap.**, \$2,500,000; shares \$1 par. Indebtedness, \$4,000 mortgage.

Property: 21 claims, 440 acres, $\frac{1}{4}$ mile from the O. W. R. & N. R. R., shows lead-silver vein in quartzite developed by about 5,000' of workings.

Equipment: consists of 25-h. p. compressor and 6 buildings.

UNITED METALS CO.**ALASKA**

See Alaska Metals Co. Property is the Corbin mine, near Coppermount.

UNITED METALS SELLING CO.**NEW YORK**

Office: 42 Broadway, New York. John D. Ryan, pres.; T. Wolfson, v. p.; C. W. Welch, sec.-treas., with Wm. Rockefeller and H. H. Rogers, directors. C. S. Henry & Co., 12 Leadenhall St., London, E. C., Eng., European agts.

Inc. Jan. 29, 1900, in New Jersey. **Cap.**, \$5,000,000; shares \$100 par; dissolved in 1915 and reorganized March 15, 1915, in Delaware. Is controlled by the Anaconda Copper Mng. Co., through ownership of entire share capital.

The company does a general commission business in metals, mainly in copper, and is the largest copper broker in the world, being the sales agent for the Anaconda Copper Mng. Co., and affiliated corporations, and for a number of other producers, having the marketing of upwards of 400,000,000 lbs. of copper yearly.

UNITED MEXICAN MINES**MEXICO**

Idle. Mine near La Verde via Cumpas, Sonora, Mex. O. L. Neer, manager. **Lands:** 40 miles S. of Nacozari, include the Veta Grande and Cerro Gordo groups, near the Transvaal mine.

Property shows rhyolite, granite and porphyry, with several orebodies occurring in fissure veins, and as breccia deposits between trachite and granite. Ores are copper sulphides.

UNITED MINES COMPANY OF ARIZONA**ARIZONA**

Bouse, Ariz. **Officers:** J. C. Denton, pres.; George D. Christie, v. p.; Sydney H. Stewart, treas.; E. A. Goodrich, sec., with H. E. Woods and Arthur G. Halm, directors.

Inc. May, 1916, in Ariz. **Cap.**, \$1,750,000; shares \$1 par; 900,000 in treasury.

Property: 30 claims, 600 acres near Bouse, Ariz., including former holdings of Little Butte Cons. Mines Co., the Arizona Pride and Bullion groups.

Geology: the holdings are in an extensive district of pre-Cambrian schists, quartzites and limestones, cut by intrusive granites and other igneous rocks, and covered by recent volcanic flows. The ore deposits of the country though varied in nature carry gold, silver or copper ores. The typical copper ores of the region contain specular red hematite, and the deposits worked at Planet, Mineral Hill and the Clara are largely replacements of limestone beds.

The **Little Butte** claims cover an area of sedimentary rocks running E. W. and dipping at 50°, including a 1,500' belt of brown limestone in part overlaid by an old rhyolite breccia. These rocks are faulted against a coarse granite, the fault being mineralized, though nearby, the limestone caps and covers the granite. The vein outcrop shows an interlacing network of quartz-hematite stringers forming a wide lode. The underground workings show irregular lenticular bunches of oxidized ore on and above the 120' level, and close to the granite hanging-wall, with 75' or so of altered andesite (rhyolite) between the lode and the limestone. Shipments of 388 tons yielded \$8,040, or \$20.72 per ton. The lode is in part leached below these residual masses of ore, and former development was stopped at 388', below which the richer ore probably lies. The association of chlorite specularite and quartz indicates that the mineralization will extend downward to very considerable depth, and the ores will be chalcopyritic.

Development: a 388' incline shaft with 1,000' of levels at depths of 75, 120, 210 and 310'. Water was encountered at 200', but the lowest limit of oxidation has not yet been reached. The 120' level shows ore bunches for 600' along the drift. The 210' level shows mainly leached vein matter with occasional bunches of copper ore, but the leached material is said to average \$7 per ton for 200' along the drift. Similar conditions obtain at 300', but the best ore in the mine is said to have been found on this level.

The **Arizona Pride Group** claims cover part of the granite area in which gold-bearing quartz veins occur. Development includes 50' and 60' shafts, both showing ore.

The **Bullion Group** covers a sedimentary area, cut by intrusions of diorite and andesite, with veins following the intrusive contacts. A 205' shaft on one vein has not yet reached water level, the filling being leached.

Production: under former owners the Little Butte mine shipments produced 73,400 lbs. copper, the ore averaging \$7.60 per ton gold, 9.4% copper, 29% iron and 32.4% silica.

The property has merit and warrants carefully planned development, as conditions promise extensive bodies of chalcopyrite ore in depth.

UNITED MINING CO.

NEVADA

Mine office: Carson City, Nev. **Officers:** H. D. Cowden, pres. and gen. mgr., Bloomington, Ill.; R. H. Hingston, treas. and gen. supt.; F. W. Boston, sec.; L. B. Perry, asst. sec.

Inc. 1905 in Nev. **Cap.,** \$3,000,000; shares \$1 par; nonassessable; 500,000 preferred and 2,500,000 common; issued \$1,876,150.

Property: 34 claims, 680 acres, in the Delaware district, 12 miles from Carson City. Country rock is granite, cutting sedimentary and intrusive rocks. Claims show 4 fissure veins in andesite and porphyry, capped by a strong iron gossan up to 200' in width. The limestone is highly crystallized and intruded by porphyry dikes. Ores developed are azurite and malachite with some copper oxides and silicates succeeded by sulphide ore at a shallow depth.

Development: by shafts of 100' and 450', numerous test pits and prospect tunnels. The veins vary greatly in width, the principal orebody said to be 7 to 12' wide, so far as developed.

Equipment: includes a 25-h. p. gasoline hoist, a 90-h. p. gas engine with air compressor of 5 drills capacity and a sinking pump, with about 8 buildings. Management reported, Jan., 1916, "property is not working now, as we are looking for some process that will enable us to handle our ores and have our own plant."

Reported in 1915 that the Nevada mine was abandoned and stockholders given shares in the Boston American Mining Co., an equally unpromising

and doubtful proposition. It is evident from the misrepresenting literature sent out by these companies that the management prefers to mine the public instead of its mines.

UNITED M., M. & COPPER SM. CO. MARYLAND & PENNSYLVANIA

Idle. Office: Frederick, Md. Mines at New London, Md., and Charmian, Pa. A. L. Wickart, sec., Allentown, Pa. Inc. 1913, in New Jersey, as a merger of the Eagle Metallic Copper Co. and the Linganore Copper Co., now dead. Owns all the property of Linganore C. Co. Cap., \$2,000,000.

Property: 806 acres, in 2 groups, include the Dolly Hyde, New London and Eagle mines, on the Western Maryland and Baltimore & Ohio railroads.

The Dolly Hyde mine, 220 acres, was for many years the principal copper property of Maryland, though never a large producer. The mine has contact deposits in dolomite and phyllite, carrying a little malachite in the upper workings, succeeded at shallow depth by bornite and chalcopyrite in white marble. This mine is idle, but was being prepared for production, late 1913.

The New London or Linganore mine, 86 acres, with 14 acres of timber land, was opened and worked 1835-55, apparently at a profit, and was idle after 1881, until reopened, May, 1907, but is again idle. The property has two 4 to 5' fissure veins in slate, with N.-E. strike, carrying bornite and gray copper, estimated to average 3% copper and 16 oz. silver per ton, with a trace of gold. Development is by a 250' shaft and 4 tunnels, longest 340', with a total of 1,095' of workings, estimated to block out 17,307 tons of ore for stopping.

The New London mine has a 65-h. p. steam plant, with a 35-h. p. hoist, good for 500' depth, and an 8-drill Sullivan air compressor. There are 12 buildings.

The mill, 40x25' in size, consisting of a ball mill and slime tables, was built in 1911.

The Eagle mine comprises 500 acres near Charmian, including an old copper mine, never successfully worked. Property shows a mineralized zone of 400' average width, carrying native copper, chalcocite, bornite, chalcopyrite and tetrahedrite, averaging about 2 oz. silver per ton, with traces of gold. Mine has a 480' shaft at 40° incline, in ore from surface, giving assays up to 6% copper, but is worked opencast.

Equipment includes a 175-ton smelter and 150-h. p. steam plant.

UNITED NORTHERN MINES CO.

ARIZONA

Office: 434 I. W. Hellman Bldg., Los Angeles. Mine office: Oatman, Ariz. Officers: C. T. Howland, pres.; W. H. Thomas, sec. and treas.

Inc. 1915, in Ariz. Cap., 1,000,000 shares; par, 10c; in treasury 500,000. Listed on Los Angeles Stock Exchange.

Property: the Lion, Kennedy Fraction, and Poorman claims, 40 acres, between United Eastern and Gold Road mines, N. of west end of Fessenden claims. **Equipment:** 25-h. p. gasoline hoist, compressors, etc. Sinking 2 compartment shaft to explore two veins.

UNITED PROMONTORY MINING CO.

UTAH

Officers: B. D. Siegfus, pres., 572 S. 12 E. St., Salt Lake City, Utah; M. Rumph, v. p.; B. O. Siegfus, sec.-treas., with A. W. Phillips, O. P. Peterson and Geo. A. Horn, directors.

Cap., 700,000 shares, 1c par; 300,000 shares in treasury, June, 1916.

Property: 6 claims, in Boxelder Co., Utah, 7 miles N. of Promontory on the S. P. R. R., shows vein 20' thick in limestone-porphry contact. Developed by 125' shaft with levels at 45' and 115'. Upper level showed some

high-grade copper ore; 115' level, at 18' from shaft showed bunches of copper ore. Company has been developing the mine for about 8 years.

UNITED SMELTERS, RAILWAY & COPPER CO. WYOMING

Dead. The property claimed by this company is described under the title of the Penn-Wyoming Copper Co., which apparently was the legal owner, and full particulars regarding the entire chain of rotten promotions, including this company, are given in Vol. X, Copper Handbook, under Penn-Wyoming Copper Co.

Judgment for \$2,500,000 secured by Continental & Commercial Trust & Savings Bank, Chicago, Dec., 1913. Bank had loaned money to company taking a mortgage on property. Several years of litigation were thus ended and the properties of the United Sm., R'y. & C. Co. and its subsidiaries were sold at forced sale, being bought in by the bank.

UNITED SMELTING & REFINING CO. MONTANA

Is controlled by American Smelting & Refining Co. **Property:** the East Helena, Mont., silver-lead smelting plant.

UNITED STATES CONTINENTAL MINES CO. ARIZONA

Office: I. K. Farrington & Co., 30 Broad St., New York. Arthur P. Monk, sec. **Cap.**, \$1,000,000; shares \$1 par; outstanding \$670,000. Registrar & Transfer Co., New York, transfer office and registrar. Controls 80% of capital stock of the Cons. Homestead Mines Corp., cap. \$600,000; shares \$1 par; payment for this stock being 50,000 shares U. S. Cont. M. Co.'s stock, placed in pool, and \$7,500 payable within one year.

Property: includes the Copper Bullion mine of the Continental and the Homestead mine, acquired in 1916; the latter consists of one patented claim in the Lynx-Creek mining district, near Walker, Yavapai Co., Ariz. This claim is said to carry the Homestead-Eureka vein, 4' to 7' wide in porphyry and diorite, showing gold ore, partially free milling, silver, lead, zinc and copper ore. The mine workings opened years ago were badly caved when present management acquired it.

Management reports "two powerful veins opened for 1,500"; that the deepest shaft is 120' and estimates \$210,000 yearly earnings on a basis of 100 tons ore daily, an output which will never be realized.

Equipment: one report states there is a 5-stamp mill on the property, another that there is a 5-stamp mill building; also that "management therefore does not contemplate reconstructing its 5-stamp mill until a tonnage is developed that will warrant larger mill construction than 5-stamps."

UNITED STATES COPPER CO. NEW MEXICO

Hanover, Grant Co., N. M. **Officers:** J. W. McAlpine, pres., treas.-gen. mgr.; John Orelbeke, 1st v. p.; F. C. Bell, 2nd v. p. and supt.; N. A. Karsten, sec., 869 7th St., Milwaukee, Wis. J. T. James, cons. engr.

Inc. May 1, 1911, in New Mexico, as a reconstruction of the Philadelphia Copper Mines Co. **Cap.**, \$500,000; shares \$1 par; non-assessable; issued 252,164. Annual meeting 3rd Monday in February.

Property: 6 claims, 3 fractional, surveyed for patent, about 60 acres, partly timbered, in the Central district, near Hanover, showing a contact vein between limestone and granite-porphyry, with strike of N. 36° E., and practically vertical dip. The ore estimated by the management at 4-20' width, carries chalcopyrite, with some bornite and occasional chalcocite, said to carry 6-20% copper, 30%-60% iron and \$2-\$5 gold-silver values. The mine, opened 1881, is said to have shipped \$110,000 worth of ore under various ownerships.

Development: by trenches and shafts of 180', 268', 65' and 60', with 3,388' of workings. Reported to be producing 240 tons per month, 1916.

Equipment: includes a steam plant with two 100-h. p. Freeman tubular

boilers, 2 hoists, and a 10-drill air compressor. There are 10 buildings, including warehouse and office. Plans sinking shafts No. 1 and 2 to the 550' level.

UNITED STATES COPPER-GOLD MINE WASHINGTON

Prospect about 3 miles N. E. of Chewelah, Stevens Co., Wash., shows small quartz veins in limestone. Ore is chalcopyrite, pyrite with some malachite and azurite. Developed by 340' and 100' tunnels.

UNITED STATES EXPLORATION CO. CALIFORNIA

Office: 617 Pacific Bldg., San Francisco. Mine office: Granite Basin, Plumas Co., Calif. Officers: O. P. Posey, pres.; C. N. Miller, sec. and mgr. Inc. 1904, in Nev. Cap., \$1,000,000; shares \$1 par; promotion stock, 300,000 shares.

Owens Pepin mine, also lease and option on Robinson mine. Report of E. C. Reed, mining engineer, gives value of \$20.50 for 240' of ore-shoot. Vein said to average 2' wide. Machinery on ground for 75-ton mill, including crusher, rolls, jigs, concentrators.

U. S. GOLD CORPORATION COLORADO

Boulder, Colo. Officers: N. P. Garretson, Topeka, Kansas, pres.; J. R. Wolff, v. p.-gen. mgr.; W. T. McGinnis, sec.-treas.; J. W. Middlesworth, J. H. Howry, F. E. Campbell and C. N. Watts, directors. Geo. W. Oates, gen. supt., and T. J. Benjovsky, mine supt.

Inc. 1903, in Colo. Cap., \$3,500,000; shares \$1 par; non-assessable; \$3,271,062 outstanding. Net receipts for 1915 were \$626. Treasurer's report for 1915 shows \$36,360 received from stock sales and ore; disbursements \$35,733.

Property: the Klondike group, 225.93 acres, patented, Sphinx group, 22 mining claims, in T. 1 N., R. 72 W. in Boulder Co., Colo., Livingston group, 50 acres. Company also owns 50,000 shares, or entire capital stock of the U. S. Reduction Co., which owns the mill.

Development: 1914-15, totaled 1,470.19'. Claims show fissure veins in porphyry, carrying gold ore. Widths, 3'-15' in different workings; mill feed varies from \$4 to \$12 per ton.

Production: 34 tons of ore were shipped, 1915 to Denver smelters, which netted \$1,414. Company reports April 10, 1916, bullion to the amount of \$15,086 shipped to U. S. Mint, Denver, and that 7 tons ore shipped to Denver smelter Feb. 9, yielded \$1,974. Mill said to be treating 45 tons daily and expected to handle 100 tons daily at end of 1916.

After 13 years of intermittent development, and lurid advertising, company is at last producing. Barber & Co. said to be promoting the enterprise. The corporation is not looked upon favorably, and investors are advised to take company statements with a grain of salt.

U. S. LEAD & ZINC CO. MISSOURI

Promoted by C. L. Glass & Co., Vandergift Bldg., Fourth Ave., Pittsburgh, Pa. Directors: P. S. Chambers, D. A. Rees, D. R. Stitsel, W. S. Maxey and J. H. Montgomery. Inc. in Delaware. Cap., \$600,000; shares, \$1 par; non-assessable.

Property: Operates a 20-acre lease in the lead-zinc sheet ground formation in the Joplin district. Development: 140 ft. shaft, with a drift said to show 9½ feet of ore and drill holes said to show ore at depth of 160 feet and 180 feet. Ore milled is reported to have given returns of better than 12%.

Equipment: "Consists of everything necessary for economical operation." A 150-ton mill has recently been completed.

Promoters claimed in August, 1916 that "dividends of ¼c to 2c per share monthly are possible inside of 90 days."

UNITED STATES MANGANESE CO.**VIRGINIA**

Office: 74 Broadway, New York. **Mine address:** Elkton, Va. Fred Berger, supt. **Property:** a tract of several hundred acres S. E. of Elkton, shows 5' of manganese ore mostly psilomelane and pyrolusite, occurring disseminated and massive in yellow clay overlying quartzite. Recent development indicates a large deposit of commercial ore. Mine has washer and concentrating tables.

UNITED STATES METALS REFINING CO.**NEW JERSEY**

Office: 120 Broadway, New York. **Works office:** Chrome, Middlesex Co., N. J. and East Chicago, Ind. F. Y. Robertson, v. p. and gen. mgr.; R. W. Deacon, supt. Copper Ref'y, Chrome, N. J. Wm. Thum, supt. Lead Ref'y, East Chicago, Ind.

Inc. Nov., 1903, in New Jersey. Reorganized Oct. 15, 1906. Cap., \$4,000,000, shares \$100 par, half in 7% cumulative preferred and half in common shares; issued \$3,100,000, half preferred and half common stock. Is controlled, jointly, through stock ownership, by the United States Smelting, Refining & Mining Co., and Aaron Hirsch & Sohn, of Halberstadt, Germany. Annual meeting, second Tuesday in May.

The Chrome works, which have had to be enlarged nearly every year since they were first built, include a complete smelting and converting plant for the treatment of ores, concentrates and mattes, with smelting capacity of 15,000 to 18,000 tons a month, converting capacity of 3,500,000 to 4,000,000 lbs. of blister a month, and an electrolytic refinery with a capacity of 180,000,000 lbs. annually.

The smeltery has two 42x180" blast furnaces, two 84x120" basic-lined converters, one 60x6' rotary kiln for sintering fine material, and one Dwight-Lloyd sintering machine. The smeltery is further equipped with a 500' steamship dock, with berth for 2 steamers, the most modern type of Fairbanks scales, having a sensitiveness of 10 lbs. on a load of 100,000 lbs., and a very complete automatic sampling mill, equipped with Brunton samplers.

The refinery has one 225-ton and two 175-ton anode furnaces and two 225-ton wire-bar furnaces, equipped with charging cranes, casting wheels, waste heat boilers and the most modern devices for mechanical handling. The tank house has 896 tanks arranged on the Walker system.

The power house is steam-driven and arranged for highest economy with economizer and superheater equipment, 3 compound condensing units and 1 triple expansion unit, using an exhaust steam turbine for the third expansion. Current is generated at the rate of 13,000 amperes. Three circuits are carried in the tank house with a voltage of 115 volts each, 1 power unit being carried in reserve.

The anode slimes are refined by the usual processes, the doré bullion produced being parted electrolytically. Some of the rarer elements are recovered as byproducts.

The Grasselli plant, consisting of a 75-ton electrolytic lead refinery, was the first electrolytic lead refinery in the United States. Has annual capacity of 72,000,000 lbs. lead.

The plants of the United States Metals Refining Co. are strictly modern in design and equipment and are noted for the technical excellence of their practice and the purity of their commercial products. The Betts process is used which permits the recovery of bismuth and other by-products.

UNITED STATES MINING CO.**COLORADO**

W. R. Benzie, 502 Majestic Bldg., Denver, Colo. **Inc. in Colo. Cap., \$50,000; shares \$1 par; non-assessable. "No individual liability." Organized to operate leases in the Cripple Creek district. Is a stockbrokers', mail order promotion.**

UNITED STATES MINING CO.**UTAH**

Dissolved. See U. S. Smelting and U. S. S. R. & M. Co.'s, and Vol. XI, Copper Handbook, for full description.

U. S. REDUCTION & REFINING CO.**COLORADO**

Address: Byrne & McDonnell, 60 Broadway, New York. Defaulted in payment of interest on bonds due Jan. 1, 1916, and plant ordered sold at auction May 11, 1916, by Federal Court in bankruptcy, all restrictions as to minimum bid being removed, when no bids were received April 25, for price of \$250,000. Property included the Standard plant, near Colorado City; the Union plant near Florence, Fremont county; metallic cyanide plant at Cyanide, Fremont county; interests of the company in the Cripple Creek Sampling & Ore Co.; property in Cripple Creek mining district, Teller county; all interest in the plant and site of the United States Smelting Co. near Canon City in Fremont county; National plant near Florence, in Fremont county; National sampler site near Cripple Creek; all mining claims owned by the defendant company in Summit county; the Brush Hollow ranch of 200 acres in Fremont county, together with all water rights, reservoirs, pipe-lines, franchises, contracts, etc.

U. S. SMELTING, REFINING & MINING CO.

Office: 55 Congress St., Boston, Mass. **American operating office:** 920 Newhouse Bldg., Salt Lake City, Utah.

Selling Office, United States Smelting Co., Inc., 120 Broadway, New York City.

Needles Mining and Smelting Co.

Custom Lead and Zinc Concentrator at Needles, Cal. **Address:** Needles, Cal.

Mammoth Copper Mining Co.

Custom Copper Smelter at Kennett, Cal. **Address:** Kennett, Cal.

United States Smelting Co.

Custom Lead and Copper Smelters and Custom Lead and Zinc Concentrating Mills at Midvale, Utah. **Address:** Salt Lake City, Utah. Custom Zinc Smelters at Iola, Altoona and La Harpe, Kansas. **Address,** 413 Republic Bldg., Kansas City, Mo.

Goldroad Mines Co.

Goldroad, Arizona.

United States Metals Refining Co.

Custom Copper Smelter and Electrolytic Copper Refinery at Chrome, N. J. Electrolytic Lead Refinery at Grasselli, Ind. **Address:** 120 Broadway, New York City, N. Y.

Cia. de Real del Monte.

Mines and Mills at Pachuca and Real del Monte. **Address:** Pachuca, Hidalgo, Mexico.

U. S. Smelting, Refining & Mining Exploration Co.

For Examination and Purchase of Metal Mines. **Address:** 55 Congress St., Boston Mass.; 120 Broadway, New York, N. Y.; 1504 Hobart Bldg., San Francisco, Cal.; Newhouse Bldg., Salt Lake City, Utah; 906 Mills Bldg., El Paso, Texas; Edificio La Mutua 411, Mexico, D. F. **Officers:** Wm. G. Sharp, pres.; Chas. G. Rice, B. Preston Clark, Jas. J. Storrow, Sidney W. Winslow, executive committee; Frederick Lyon, v. p., in charge of operation; Sidney J. Jennings, v. p., in charge of exploration and mining investments; C. W. Van Law, 2nd. v. p., in charge of operations; Robt. S. Bradley, Stephen L. Bartlett, Robt. J. Edwards, Chas. F. Brooker, Robt. Treat Paine, 2d., Andrew Preston, Frederick Ayer, C. A. Hight, Edw. B. Bayley, J. J. Phelan, S. W. Winslow, Jr., and David A. Ritchie, directors; F. W. Batchelder, sec.-treas.; M. F.

Kennedy, asst. to the pres.; John Laurie, comptroller; Carl F. Moore, chief engr.; A. P. Anderson, field engr.; Geo. W. Heintz, traffic mgr. and gen. mgr. United States Smelting Co.; J. H. Horlick, mercantile mgr.; G. W. Cushing, traffic mgr.

Inc. Jan., 1906, in Maine. Cap., \$75,000,000; shares \$50 par, in \$37,500,000 of 7% preferred cumulative stock and \$37,500,000 common stock; issued \$24,317,500 preferred and \$17,555,750 common stock, May 19, 1915. National Shawmut Bank, Boston, registrar; Old Colony Trust Co., Boston, transfer agent. Annual meeting in May. Listed on Boston and New York Exchanges.

Dividends: rate is 7% on preferred stock, payable in quarterly dividends of 1¾%; first dividend paid April 15, 1906. Dividends on the common stock are given in the table below. 1916 dividends amount to \$2.75 per share up to July 15, the new rate being \$1 quarterly.

Financial Statement:

	Net Earnings	Deprec. & Reserve	Pfd. Dividend	Bal. for Common	Earned Common	Paid Com.
1915....	\$7,579,184	\$ 986,859	\$1,702,225	\$4,890,100	27.85%	
1914....	2,932,519	666,878	1,702,222	563,421	3.21%	\$1.50

1909....	3,956,608	810,248	1,700,963	1,429,487	8.14%	2.00
1908....	3,359,222	311,632	1,700,801	1,308,737	7.46%	2.00

\$600,000 was written off 1915 earnings, and balance was written off during 1916 to pay off the cost of the three zinc smelters acquired in 1915, amounting to \$953,597.

The working capital of the company has been increased to \$13,700,000, and the company had at the end of the year cash on hand \$2,482,830, as against current liabilities of \$3,620,148. Total assets and liabilities stood at \$65,444,732. The balance sheet as of Dec. 31 last shows:

Assets: capital assets, \$47,368,980; improvements, options and other deferred charges \$635,845; discount on gold notes to be amortized \$96,666; ores, matte and by-products at cost \$1,287,127; supplies, fuel and timber at cost \$1,573,611; metals in transit, in process and on hand (at less than market value) \$6,172,835; notes receivable \$3,867,148; accounts receivable \$1,959,685; cash \$2,482,830; total \$65,444,732.

Liabilities: common stock \$17,553,837; preferred stocks \$24,313,725; capital stock of subsidiary companies not held by U. S. Sm. Ref. & Mng. Co.; \$1,029,699; 4-year 5% gold coupon notes \$4,000,000; current liabilities \$3,620,148; depreciation and reserve funds \$6,327,798; undivided surplus, applicable to stocks of subsidiary companies not held by U. S. Sm., Ref. & Mng. Co., \$346,069; profit and loss surplus \$8,253,454; total \$65,444,732.

1916 earnings to June 1 are \$5,072,840, only \$1,000,000 being derived from Mexico.

Company is a securities-holding corporation only, owning shares in the following subsidiaries:

Average prices received:

	Copper Per Lb.	Lead Per Lb.	Silver Per Oz.	Zinc Per Lb.
1915	\$0.18183	\$0.04546	\$0.49965	\$0.14964
1914	.13404	.03827	.55564	
1913	.15433	.04396	.60503	
1912	.16237	.04529	.61291	

The total amount of ore from the Centennial-Eureka, Mammoth, Gold Road, Tennessee, and Bingham mines, also mines in Mexico was 1,066,025 tons, of which the values of the metal-contents were in the proportion of 30% copper, 5% lead, 21% zinc, 25% silver, and 19% gold. The Real del

Monte mills were operated at 50 to 80% of their capacity, in spite of great handicaps. The coal output was 707,559 tons.

Profits for the first quarter of 1916 have been at the rate of \$30 per share on common stock and with advancing prices for silver will be greatly augmented. Developments at company's silver mines in Mexico are the most sensational that have ever taken place in Mexico's mining history. The ore developed on the 1,400' level is reported to have a net value of \$15,000,000, while a reasonable extension of the orebodies would give a net valuation of \$75,000,000 according to reports received. The company's operations have not been as seriously curtailed as those of other companies, and with peace in Mexico, these properties will break all records for silver production.

Company is ably managed and in the hands of experienced, yet courageous, executive officials, so that an even more prosperous future is assured.

United States Smelting Co.

Office: 55 Congress St., Boston, Mass. **Operating office:** 920 Newhouse Bldg., Salt Lake City, Utah. **Works office:** Midvale, Salt Lake Co., Utah. **Officers:** Wm. G. Sharp, pres.; C. G. Rice, v. p.; C. W. Van Law, 2nd v. p., in charge of operations; F. W. Batchelder, sec.-treas.; preceding with S. W. Winslow, B. Preston Clark and J. J. Storrow, directors; Geo. W. Heintz, gen. mgr.; L. D. Anderson, smelter supt.

Is controlled, through ownership of entire capital stock issue, by the U. S. Sm., Ref. & Mng. Co. Inc. Sept. 2, 1902, in Maine. Cap., \$1,000,000; shares \$100 par.

The company owns the following property: (1) The Old Jordan, Telegraph & Galena mines, including 99 patented and 15 unpatented claims at Bingham, Utah. (2) The Midvale Smelter, at Midvale, Utah. (3) Three zinc smelters, in Kansas, with a total capacity of 70 tons spelter per day, purchased in 1915 to handle the output of the company's subsidiaries and to obtain the great profit between the price of ore and spelter. (4) Lime quarry at Topcliffe, Utah. (5) This company also owns 10 shares of Centennial Eureka Mng. Co., 1,690 shares Niagara Mining Co., 81 preferred and 41 common stock of the U. S. Sm. Ref. & Mining Co. stock.

The Bingham mining property includes very valuable mines producing silver-lead, copper, gold and zinc ores, in part complex. They have been operated since 1870, and by this company since 1899. The orebodies occur in limestone, which precludes the economic blocking out of large ore reserves, but the company states that 2 or 3 years supply is developed, the unexplored territory is large and the outlook promising. The geology of the district is fully described in U. S. Geol. Survey Prof. Paper No. 38, 1905.

In 1914 the mines produced 194,898 tons of ore of an average value at the mine of \$7.198, at a mining cost of \$2.86. Production in 1915 amounted to 94,166 tons of lead and 34,313 tons of copper. The mines are connected by a 3 mile aerial tram with the D. & R. G. Ry., and by the Niagara tunnel with the Garfield Bingham Ry.

Midvale smelter

Midvale smelter, at Midvale, Utah, comprises a lead smelter, and lead and zinc concentrating mill which treat not only the company's ores but do a general custom business. The smelter has six blast furnaces with a smelting capacity of 481,000 tons per year. It is equipped with modern blast and roasting furnaces, charging apparatus and bag houses which eliminate smelter fumes, and recover arsenic and cadmium.

All ore is received at the sampling plant, which contains 2 mills, one for oxidized and one for sulphide ores. The former is equipped with one 10"x20" Blake crusher, one No. 2 style D Gates crusher, one set 14"x27"

Davis rolls, one set 14"x26" Colo. Iron Wks. rolls, two 42" Snyder samplers, two 27" Snyder samplers, giving final sample of 1 part in 720, 50-h. p. a. c. induction motor.

The sampling mill for sulphide ores, which is also used for a crushing plant, contains: one 10"x20" Blake crusher, two 36"x16" Allis Chalmers class B rolls, three 27" Snyder samplers, giving final sample of 1 part in 360, one 50-h. p. a. c. induction motor.

The **Lead Smelter**: of 1,500 tons daily capacity, contains: six 250 tons blast furnaces, having 5 water jackets each side and one at each end; ten 3½" tuyeres each side. Each furnace is 48"x160" at tuyeres and measures 7', 11"x13', 4" at charge floor. The crucible is elliptical with I beam binders. The forehearth is 4', 5x9' and is 3" to 6" deep.

The matte pans are 5' dia.x9" with anchors for embedding in the cast matte for handling by monorail crane. The slag is handled in Stearns-Rogers slag cars of 28 cu. ft. capacity which are emptied by tapping through hole 8" from bottom. The molten lead is drawn off from side of crucible into pots, wheeled to remelting plant, dumped into 4 remelting kettles of 9' dia. and 30 tons capacity.

Skimmings are handled by a Howard dross press. Most of the lead is drawn through iron siphon pipes and cast into anodes on a continuously revolving casting table carrying 10 moulds, but a small amount is cast into pigs. The anode plates are sent to Grasselli works of U. S. Metals Ref. Co. for electrolytic refining. The blast furnace building is ventilated by hoods over forehearth and slag pots, with No. 12 Sirocco fan to baghouse, containing 768 cotton bags 12"x23' long.

Ore handling. Ore is bedded by means of 18" belt conveyor from oxide sample mill and Robins automatic reversing tripper. 3 Brownhoist electric scale charge larries make up charges and deliver into 6' gauge charge cars which dump directly into tops of blast furnaces.

The roasting department contains: 26 converter roasters (worked during one 8 hr. shift only), each converter roaster consists of a 6'x6x3' high cast iron shell with 3' hood, bottom of grate bars, through which 9 oz. blast is blown for about 4 hrs. Solid sintered cake is discharged by ram car, and carried by half gantry crane to a 24"x36" Farrel crusher which delivers the broken product to an inclined skip hoist discharging into R. R. cars. There are also 4 Wedge furnaces, each 21' dia.x7 hearths; the feed is brought by belt conveyors; the product handled by pan and belt conveyors. Sulphur in product is still further eliminated in D. & L. plant. The plant also contains 6 Dwight-Lloyd sintering machines for which the feed is mixed in bins and on conveyor belts, and the product is discharged into R. R. cars.

The fumes pass into a brick baghouse 60'x283' in ground section and 58' high, with 8 separate compartments, 5 for roaster fumes, each compartment or bay having 416 woolen bags 18" dia.x32'-6" long; 3 handle part of the blast furnace fumes, each having 420 woolen bags. All bays have steel hoppers under thimble floor provided with 9" screw conveyors for discharging dust into cars.

All Dwight-Lloyd roaster fumes pass into a 5½' balloon flue, leading into two 10' dia. cooling flues, where fumes from the ZnO furnace are added to neutralize SO₂.

Wedge furnace and converter roaster fumes pass into 8½' balloon flues and through a 122" fan run by 50-h. p. motor into two 10' cooling flues above. Slack lime is added to neutralize SO₂. All roaster fumes pass through 13'-6" Sturtevant fan run by 150-h. p. motor to roaster section of baghouse. From baghouse two No. 20 Sirocco fans run by 150-h. p. motor force gases into 16'-6"x245' steel stack, at same time drawing in fresh air

for diluting gases. Gases issuing from stack must contain less than .75% by volume of SO_2 by Court decree. Part of the blast furnace fumes pass through rectangular brick flue with hopper bottoms to 15' Sturtevant fan run by 100-h. p. motor and then into blast furnace section of baghouse. Each of 3 blast furnace bays has a separate stack 6' dia. x 100'. The blast furnace fumes not handled in this baghouse pass through a balloon flue 15' dia. x 160' to a No. 14 Sirocco fan (run by 50-h. p. motor) into a brick chamber which is connected by air operated valves to a 5-compartment baghouse lined with asbestos sheets. This baghouse has 1,200 12" x 34' cotton bags. Dust is collected in cars in tunnel under baghouse hoppers. Blast furnace fumes are neutralized with slacked lime before they enter baghouse.

Roaster dust is briquetted in Chrisholm-Boyd-White machine. Blast furnace dust averaging 40 to 50% arsenic is taken to arsenic plant.

The crude product carries 97 to 99% arsenious trioxide, which is removed through the doors, and sent, in buggies, over a monorail crane to the refining furnace, where charged direct into a 30x66" steel hopper in the top of the refining furnace. Access to the interior of the refining furnace is through three 9x15" doors on each side and a temperature of about 700° F. is maintained. The capacity of the refining furnace being 15 tons daily, and output of crude arsenic being only about 2 tons daily, from each Brunton furnace, the refining furnace is worked only part time. The product of the refining furnace is crystalline arsenious trioxide of 99.87% average tenor, which is sent to a 3' buhr-mill, ground and packed for shipment. The grinding is done in a small room, tightly closed, and connected with an exhaust fan discharging into a small baghouse, so that no arsenic may escape into the air. Workmen about the arsenic plant wear a one-piece suit of overalls, with a hood, furnished by the company, and also wear respirators, when entering the chambers, or otherwise coming in contact with the arsenic. All employes of the arsenic plant are required to take a bath and make a complete change of clothing when going off shift.

Residue from Brunton furnaces is ground in 3'x3' 6" pebble mill, treated with sulphuric acid, roasted in a reverberatory type roaster, ground again, agitated with water in a Pachuca tank, filtered, the filtrate going into 8 electrolytic tanks having lead anodes and aluminum cathodes on which cadmium is recovered.

The Power Plant contains 4-250-h. p. batteries of water tube Sterling boilers (2 of which are in continuous operation) generating steam at 140 lbs. pressure; 2 batteries with American stokers and 2 with Roney stoker. Steam is used to operate 3 Nordberg tandem compound Corliss engines 12"x24"x36" each, direct connected to 175 cu. ft. Connersville blower, and 1-10"x18"x36" Nordberg cross compound Corliss engine tandem connected to 12"x12"x36" compressor for supplying air for forges, air hammers, air lift pumps, hoists and various pneumatic machinery. Main power plant includes one 500-k. w. Curtis steam turbine, one 200-kva synchronous motor generator set for D. C. current at 500 volts, one 150-k. w. D. C. generator, one 150-k. w. A. C. generator, both connected to 12"x24"x36" tandem compound engine by belt, one 200-k. w. D. C. generator connected to 16"x32"x36" tandem compound engines.

Electric current is supplied by the Utah Power & Light Co. at 44,000 volts stepped down to 480 volts in three 300-kva single phase transformers and one 400-kva 3 phase transformer. Current for electrostatic zinc mill and 150-ton concentrator is stepped up to 1,440 volts in 200-kva. auto transformer, and again stepped down at mill to 480 volts in 200-kva auto transformer.

Zinc-Lead Concentrating Mill

The concentrating mill has a capacity of 210,000 tons of ore per year. It treats the low-grade silver-lead ores of the Bingham mines, producing lead concentrates sent to the smelter, and a "middling" product containing zinc and iron sulphides, which is treated in the Huff electrostatic mill. The wet concentrating plant has two units, one of 150, the other of 450 tons daily capacity.

The 450-ton concentrator has the following equipment: one 10x20 Allis Chalmers-Blake crusher, three 36x16 Allis Chalmers style B rolls, 10 trommels, seven 3-compartment single Harz jigs, twenty 8' and 9' Callow tanks, two shovel wheels, six 16" Bucket elevators, two 5'x14' Denver Eng. Wks. tube mill, eleven 20" to 60" double cone classifiers, eight Deister slime tables, 11 Overstrom tables, 24 Wilfley tables, one 4-compartment concentrates bin, misc. settling tanks and centrifugal pumps, one 100-h. p., one 75-h. p., two 50-h. p., one 35-h. p., one 30-h. p., one 25-h. p. motors.

Concentration $2\frac{1}{2}$ to 1; extraction is 85 to 90% silver-gold-lead, 40% zinc, 80% copper.

The 150-ton smelter at the concentrator contains one 9x15" Hodge Blake crusher, four 30x12" Allis Chalmers rolls, 7 trommels, four 3-compartment single Harz jigs, six 8' Callow tanks, one shovel wheel, one 24" Atkins classifier, four 12" and 16" bucket elevators, nine 20" 60-60" double cone classifiers, 12 Wilfley tables, 4 Deister slime tables, one 2-compartment concentrates bin. Misc. settler tank and centrifugal pumps, one 75-h. p. motor, two 35-h. p. motors. Ratio of concentration is $1\frac{3}{4}$ into 1. Extraction averages 85 to 90% gold, silver; lead, 50% zinc, 80% copper.

The 75-ton electrostatic zinc mill contains 1 zinc middlings receiving bin, one 60"x30' Ruggles-Cole dryer, 2 Banks of Newaygo screens—16, 40, 60, 100 mesh; 9 Huff roughing machines, 12 Huff finishing machines, 6 combined roughing and finishing toboggan machines, one 35-h. p., one 50-h. p., one 10-h. p., three 5-h. p. induction motors; one baghouse with No. 70 A. Blower Co. fan for collecting dust from mill, with 64-12" dia. x 16' cotton bags. Product 40% to 50% zinc and iron pyrites.

Other Plants

The U. S. Smelting also owns and operates zinc smelters at Altoona, Iola, and LaHarpe, Kansas, and operates under a lease the Ravenswood mine near Reeds, Mo. All smelters are equipped for either oxide or sulphide ores.

Altoona Zinc Plant: Altoona, Kansas. Local supt., I. A. Palmer. The property includes 30 acres, and has a capacity of 39,000 tons of ore per year. It contains 6 blocks; 12 furnaces; 3,960 retorts; the total capacity per day is 108 tons, producing approximately 30 tons spelter per day.

Iola Zinc Plant: Iola, Kansas. Local supt., A. R. Campbell. The plant has 34 acres land and a capacity of 34,000 tons of ore per year. It consists of 5 blocks, 10 furnaces, with 3,440 retorts. Total capacity per day 95 tons, producing approximately 25 tons spelter per day.

LaHarpe Zinc Plant: LaHarpe, Kansas. Local supt., A. R. Campbell. The plant has 19 acres and treats 18,000 tons of ore per year. The smelter has 3 blocks, 6 furnaces, 1,924 retorts. The total capacity per day is 52 tons, or approximately 15 tons of spelter.

All three smelters use natural gas as fuel, having 14,481 acres of gas land in fee or under lease. The total capacity per day is 225, or 7,650 tons per month, which is approximately 70 per day, or 2,100 tons per month of spelter.

Ravenswood Mine: Local supt., T. J. Rightly, Reeds, Jasper Co., Missouri. Mine production 218,000 tons (per annum). The zinc mill has a

capacity of 218,000 tons (per annum). The mine was unwatered and production begun at the end of 1915.

In 1916 the company purchased the Marbury leases consisting of 60 acres lying between the Blue Goose and Beaver mines in the Cardin camp, and has started the development of the property by sinking two shafts to the ore deposit. The consideration given for the property is said to have been \$125,000. There were 20 drill holes put down and of these 18 were said to have struck good ore from 280 to 312'. The company moved its Ravenswood mill to the newly acquired lease.

U. S. Smelting, Refining & Mining Exploration Co.

Office: 120 Broadway, New York. **Operating office:** 508 Dooly Bldg., Salt Lake City, Utah. Subsidiary of the U. S. Sm. Ref. & Mng. Co., which owns the 900 shares issued of a total of 1,000 shares capital stock.

Inc. in Maine. Officials: C. W. Van Law, v. p.-gen. mgr.; A. P. Anderson, Pacific Coast mgr.; E. N. Funston, El Paso mgr.; D. D. Muir, Jr., Inter-Mountain mgr.; C. F. Moore, cons. engr.

Company was organized for the purpose of exploring and developing new properties, which, when acquired, would be turned over to operating subsidiaries of the U. S. Sm. Ref. & Mining Co.

Leadville Unit. Leadville, Colo. H. S. Lee, mgr. E. H. Hamilton, supt.

This unit is unwatering the 407' Harvard shaft on Fryor Hill, and the shaft will be sunk several hundred feet through quartzite to the second contact. Thorough exploration and a geological study of the entire territory controlled by this unit is in progress. Property is equipped with hoist, compressor, etc.

Arizona Unit. F. B. Weeks, Tucson, Ariz. The Durham property in the Tortillita Mountains, 50 miles N. E. of Red Rock, Ariz., is being explored by churn drills. The land adjoins that of the Tortillita Copper Co.

UNITED STATES TUNGSTEN CORPORATION NEVADA

Address: O. E. Roodhouse, mgr., Tungsten, Nev. Operates a mill for concentration of tungsten ores, S. of Osceola, White Pine Co. Ores milled are partly purchased and partly obtained from company ground on the Snake range. The statement that this company is a subsidiary of the Tonopah Mining Company or has any connection with it is officially denied.

In May, 1916, took over properties near Nederland, Colo., held by Colorado Tungsten Co., controlled by W. M. Long of Boulder, Colo. The property at Tungsten, Nev., includes not only the Hub vein from which the company has obtained most of its ore, but also numerous new discoveries of hübnerite ore elsewhere on the group.

A mill is in operation, treating custom ore, as well as the company's own production.

The Independent Tungsten, Consolidated Tungsten, Nevada Scheelite, Ophir Mining and Atkins, Kroll companies are also operating in this district.

UNITED STATES ZINC CO. COLORADO

All stock owned by the A. S. & R. Co., which see. Plant at Pueblo, Colo., has 2,320 retorts.

UNITED TINTIC MINING CO. UTAH

Office: 403 Newhouse Bldg., Salt Lake City. L. A. Martin, pres.; C. E. Martin, sec. **Inc. in Utah. Cap., \$1,000,000; shares 50c par; assessable.** Listed in Salt Lake City. Owns 28 claims in the Tintic mining district. Operations not reported.

UNITED VERDE COPPER CO.**ARIZONA**

Office: 20 Exchange Place, New York. **Mine office:** Jerome, Yavapai Co., Ariz. **Smelter office:** Clarkdale, Ariz. **Officers:** Wm. A. Clark, pres.; Jas. A. MacDonald, v. p.; J. H. Anderson, sec.; H. H. St. Clair, treas.; Chas. W. Clark, gen. mgr.; officers are the directors; Will L. Clark, mgr.; Robt. E. Tally, mine supt.; Thos. Taylor, smelter supt.; Clarence V. Hopkins, mg. engr.; Dave Hopkins, purch. agt.; A. L. Reese, chem.-assayer.

Inc. 1883, in New York and reorganized Sept. 2, 1899, in West Virginia. **Cap.**, \$3,000,000; shares \$10 par; fully issued and fully paid. Is practically a close corporation, having less than 20 shareholders, and is controlled, through stock ownership, by W. A. Clark. Five hundred shares were sold at auction, March, 1910, for \$70 per share.

Gross sales of copper, silver and gold were \$5,368,672 in 1909, \$5,605,488 in 1910, \$4,736,834 in 1911, \$5,899,457 in 1912, \$6,171,116 in 1913, \$5,186,909 in 1914.

Company's investments at end of 1915 were valued at \$2,587,724, compared with \$2,696,725 in 1914. Cash on hand and in bank total \$1,163,044 Jan. 1, 1916.
